VOLUME XXVIII, PART VII.

CONGRESSIONAL RECORD AND APPENDIX,

FIFTY-FOURTH CONGRESS, FIRST SESSION.

The American people are alive to this question, and if the Republican party, the great party that it has been, is of the opinion that it can hold in its folds the great mass of intelligent people in the Northwest who have voted its ticket, who have defended its interests, who have believed in its principles, with the gold standard incorporated in its platform they never made a greater mistake. If they choose to adopt the gold standard, as the demand now is that they shall, they will see their vote in this Chamber disappearing, because there are States in the West which have maintained the Republican flag here and kept the party in power in this body for twenty years which will not longer send men here who will regard the tariff question as the paramount one when it comes to legislation.

What the Republican party will do at St. Louis I do not know, but I believe I know enough of the public sentiment of the great West, I believe I know enough of the public sentiment of the plain people, the honest people, to know that the party which inscribes on its banner "The gold standard" inscribes on its banner "Defeat."

Mr. BURROWS obtained the floor.

Mr. BROWN. I should like to ask the Senator from Colorado a single question.

The PRESIDING OFFICER. Does the Senator from Michigan yield to the Senator from Utah?

Mr. BURROWS. Certainly.

Mr. BROWN. I wish to ask the Senator from Colorado if he thinks the sole test of devotion to silver is to vote against the Senator from Vermont [Mr. MORRILL] or the Senator from Ohio [Mr. SHERMAN]?

Mr. TELLER. Oh!

Mr. BROWN. If they should propose a silver measure or be in favor of it or vote for it should we as silver men vote against it?

Mr. TELLER. That question is not worth answering.

Mr. CULLOM. Will the Senator from Michigan allow me to put a few facts into the RECORD?

Mr. BURROWS. Certainly.

Mr. CULLOM. The Senator from Colorado [Mr. TELLER] has referred to Illinois lands and property. I desire simply to put their value into the RECORD. The farm values in Illinois were, in 1850, $96,133,000; in 1860, $408,944,000; in 1870, $920,506,000; in 1880, $1,009,594,000; in 1890, $2,262,870,000. The value of lands in Illinois is not declining very rapidly.

Mr. TELLER. I should like to say one word. I did not go into the details. The authorities state that in Pennsylvania there has been a shrinkage of $120,000,000 in farm values. In the products of farm and field in the United States in the last five years there has been a shrinkage of $1,400,000,000.

Mr. BURROWS. Mr. President I scarcely possess the assurance at this late hour, when I know how impatient the Senate is to vote upon the pending proposition, to ask the attention of the Senate to anything I may have to say, and I desire to assure Senators at the outset that I shall not detain the Senate long to state the reasons why I can not give the pending measure my support.

The bill presented by the Senator from North Carolina [Mr. BUTLER], and which has engaged the attention of the Senate for many days, involves the consideration of only three propositions, namely: First, the terms of the existing law; second, the proposed change; and third, the probable effect which would follow such change. It in no way involves directly the silver question, and I shall not, therefore, discuss that issue.

THE EXISTING LAW.

The existing law which it is proposed to modify is the act of January 14, 1875, commonly known as the resumption act. I beg to insert it here in my remarks:

ACT OF JANUARY 14, 1875.

An act to provide for the resumption of specie payments.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is hereby authorized and required, as rapidly as practicable, to cause to be coined, at the mints of the United States, silver coins of the denominations of 10, 25, and 50 cents, of standard value, and to issue them in redemption of an equal number and amount of fractional currency of similar denominations, or, at his discretion, he may issue such silver coins through the mints, the subtreasuries, public depositaries, and post-offices of the United States; and, upon such issue, he is hereby authorized and required to redeem an equal amount of such fractional currency, until the whole amount of such fractional currency outstanding shall be redeemed.

SEC. 2. That so much of section 3524 of the Revised Statutes of the United States as provides for a charge of one-fifth of 1 per cent for converting standard gold bullion into coin is hereby repealed; and hereafter no charge shall be made for that service.

SEC. 3. That section 5177 of the Revised Statutes, limiting the aggregate amount of circulating notes of national banking associations be, and is hereby, repealed; and each existing banking association may increase its circulating notes in accordance with existing law without respect to said aggregate limit; and new banking associations may be organized in accordance with existing law without respect to said aggregate limit; and the provisions of law for the withdrawal and redistribution of national bank currency among the several States and Territories are hereby repealed. And whenever, and so often, as circulating notes shall be issued to any such banking association, so increasing its capital or circulating notes, or so newly organized as aforesaid, it shall be the duty of Secretary of the Treasury to redeem the legal-tender United States notes in excess only of $300,000,000, to the amount of 80 per cent of the sum of national-bank notes so issued to any such banking association as aforesaid and to continue such redemption as such circulating notes are issued until there shall be outstanding the sum of $300,000,000 of such legal-tender United States notes, and no more. And on and after the 1st day of January, A. D. 1879, the Secretary of the Treasury shall redeem in coin the United States legal-tender notes then outstanding on their presentation for redemption at the office of the assistant treasurer of the United States in the city of New York in sums of not less than $50. And to enable the Secretary of the Treasury to prepare and provide for the redemption in this act authorized or required he is authorized to use any surplus revenues, from time to time, in the Treasury not otherwise appropriated, and to issue, sell, and dispose of, at not less than par, in coin, either of the descriptions of bonds of the United States described in the act of Congress approved July 14, 1870, entitled "An act to authorize the refunding of the national debt," with like qualities, privileges, and exemptions, to the extent necessary to carry this act into full effect, and to use the proceeds thereof for the purposes aforesaid. And all provisions of law inconsistent with the provisions of this act are hereby repealed.

It will be observed by the express provisions of this act it is declared that on and after the 1st day of January, 1879, the Government of the United States would undertake to redeem in coin, on demand, all its outstanding United States notes, commonly known as "greenbacks."

At the close of the war, in 1865, it was found that the Government of the United States had outstanding $400,000,000 of paper currency, or promises-to-pay "dollars," worth at one time only 35 cents on the dollar. At that time there was no expectation in the public mind, nor any other course suggested, than to pay these obligations at an early day. It was the only honest thing to do. Secretary McCullough but reflected public sentiment when, in 1865, he recommended, as Secretary of the Treasury, the payment and retirement of these outstanding notes.

On the 12th of April, 1866, Congress approved of the recommendation of the Secretary by passing the following act:

ACT OF APRIL 12, 1866.

To amend an act entitled "An act to provide ways and means to support the Government," approved March 3, 1865.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the act entitled "An act to provide ways and means to support the Government," approved March 3, 1865, shall be extended and construed to authorize the Secretary of the Treasury, at his discretion, to receive any Treasury notes or other obligations issued under any act of Congress, whether bearing interest or not, in exchange for any description of bonds authorized by the act to which this is an amendment; and also to dispose of any description of bonds authorized by said act, either in the United States or elsewhere, to such an amount, in such manner, and at such rates as he may think advisable, for lawful money of the United States, or for any Treasury notes, certificates of indebtedness, or certificates of deposit, or other representatives of value, which have been or which may be issued under any act of Congress, the proceeds thereof to be used only for retiring Treasury notes or other obligations issued under any act of Congress; but nothing herein contained shall be construed to authorize any increase of the public debt: *Provided*, That of the United States notes not more than $10,000,000 may be retired and canceled within six months from the passage of this act, and thereafter not more than $4,000,000 in any one month: *And provided further*, That the act to which this is an amendment shall continue in full force in all its provisions, except as modified by this act.

SEC. 2. *And be it further enacted*, That the Secretary of the Treasury shall report to Congress at the commencement of the next session the amount of exchanges made or money borrowed under this act, and of whom, and on what terms, and also the amount and character of indebtedness retired under this act and the act to which this is an amendment, with a detailed statement of the expense of making such loans and exchanges.

Under the operation of this law the Secretary had retired only about $44,000,000, when there arose a public clamor that the further retirement of these notes should cease. Not only this, but a demand was made that the Government, instead of paying its outstanding obligations of irredeemable paper, should increase its volume until, in the popular phrase, it should be "equal to the demands of trade," whatever that might be.

In the campaign of 1868 the issue was fought upon these lines, and all sorts of financial schemes were devised and suggested to avoid the honest payment of our national obligations. The idea took possession of the public mind that an inflated and irredeemable cheap currency meant increased prices and enlarged prosperity. It was even proposed to pay the 5-20 interest-bearing bonds in United States notes, discharging interest obligations with noninterest obligations, and some people actually believed one debt could be liquidated by another. All sorts of financial vagaries were rife, including the theory that a "stamp made money," and that therefore all that was necessary to secure sufficient currency to meet the "demands of trade" was to issue paper stamped as money, redeemable in nothing and payable to nobody. That was a popular idea in some portions of the country. As General Butler, one of the leaders of this faction, said: "As in the beginning God said, 'Let there be light,' and there was light; so might the Government of the United States say 'Let there be money,' and there is money." I have been astonished to hear that same sentiment repeated in this Chamber during the progress of this debate. But such was the public apprehension that the Government of the United States was about to embark upon the perilous and boundless sea of irredeemable paper money that even the public-credit act of March, 1869, which declared:

The United States solemnly pledges its faith to make provision, at the earliest practicable period, for the redemption of the United States notes in coin—

even this did not serve to allay public apprehension or avert the panic of 1873. With that panic came, of course, hard times and

low prices, and the demand became more violent for an increased issue of irredeemable paper, and Congress, yielding to this demand, by the act of 1874 directed a reissue of the $44,000,000 of greenbacks which had previously been retired.

This act was promptly vetoed by President Grant, with the declaration that the road to prosperity was not paved with irredeemable paper money.

The people at last learned in the severe school of experience that there could be no assured and permanent prosperity until the Government returned to a sound financial basis.

Hence the resumption act of 1875.

By the terms of that act the Government promised on the 1st day of January, 1879, to redeem in coin all its outstanding notes, and the holders of these notes, which heretofore bore no date of payment, were authorized to write in the body of these obligations "January 1, 1879," so that they should read: "The United States will pay the bearer ——— dollars January 1, 1879."

In order to enable the Secretary of the Treasury to make good this public declaration, he was authorized not only to use all the surplus revenues of the Government not otherwise appropriated, but was also empowered to issue, sell, and dispose of the bonds of the Government for the purpose of securing coin with which to keep faith with the public. This power to borrow money, conferred upon the Secretary, knew no limit save the credit of the nation, and it was given him for the very purpose of making the resumption of specie payment a certainty, and place it beyond the possibility of failure.

The propriety of conferring upon the Secretary this extraordinary and unusual power for the purpose indicated was never objected to in the debate in either House during the consideration of the resumption act either by Senator Thurman, Senator Schurz, or any gentleman in either House participating in the debate, but on the contrary it was deemed absolutely essential to insure a return to specie payment.

Under this act and by virtue of it alone the 1st day of January, 1879, saw the Treasury of the United States with $133,000,000 of gold, and prepared for resumption.

It is worthy of mention that this condition of the Treasury was secured by the sale of bonds only to the extent of $95,500,000, and such was the confidence of the public in the intention and ability of the Government to resume and maintain specie payments, that before the day of resumption arrived every United States note was at par with gold, and the "gold room" in New York City closed forever.

From the 1st day of January, 1879, to this hour the Government has not permitted one of its $346,000,000 of outstanding United States notes to go to protest, but has kept them at all times as good as gold and convertible into gold on demand. It is also worthy of note in this connection that from the 1st of January, 1879, to February, 1894—a period of fifteen years—the Government was not compelled to issue a single bond for redemption purposes. Such was the confidence in the purpose and ability of the Government to maintain specie payments that during the first year after the date of resumption only $11,000,000 were presented for payment, and from January 1, 1879, to July 14, 1890—a period of eleven years—there were presented only $28,250,000; while since July 14, 1890, to June 1, 1896, there have been presented for redemption over $390,000.000.

I beg to submit the following table in support of this statement. The total redemptions of notes in gold and the exports of that metal during each fiscal year since the resumption of specie payments have been as follows:

Fiscal year.	United States notes.	Treasury notes of 1890.	Total.	Exports of gold.
1879	$7,976,698	----------	$7,976,698	$4,587,614
1880	3,780,638	----------	3,780,638	3,639,025
1881	271,750	----------	271,750	2,565,132
1882	40,000	----------	40,000	32,587,880
1883	75,000	----------	75,000	11,600,888
1884	590,000	----------	590,000	41,081,957
1885	2,222,000	----------	2,222,000	8,477,892
1886	6,863,699	----------	6,863,699	42,952,191
1887	4,224,073	----------	4,224,073	9,701,187
1888	692,596	----------	692,596	18,376,234
1889	730,143	----------	730,143	59,952,285
1890	732,386	----------	732,386	17,274,491
1891	5,986,070	----------	5,986,070	86,302,654
1892	5,352,243	$3,773,600	9,125,843	50,195,327
1893	55,319,125	46,781,220	102,100,345	108,680,844
1894	68,242,408	16,599,742	84,842,150	76,978,061
1895	109,783,800	7,570,398	117,354,198	66,131,183
1896 (3 months)	36,461,249	1,307,097	37,768,346	37,958,844
Total	309,343,878	76,032,057	385,375,935	679,103,689
Total June 1, 1896	416,304,929	79,757,922	469,062,851	----------

This in outline is the existing law and the result of its enforcement.

THE PROPOSED CHANGE.

It will be observed that under the terms of the resumption act the Secretary of the Treasury was empowered to obtain coin for redemption purposes from two sources, viz, the surplus revenues of the Government and from the sale of United States bonds. And I declare here if it had not been for the power vested in the Secretary of the Treasury to sell bonds, as we are without surplus revenues, all the United States notes and the Treasury notes of 1890 would have gone to protest long ago and the Treasury of the United States been forced to suspend. The measure under consideration—and this brings me to the second point—proposes virtually an amendment to the resumption act by striking out—

And to issue, sell, and dispose of, at not less than par, in coin, either of the descriptions of bonds of the United States described in the act of Congress approved July 14, 1870, entitled "An act to authorize the refunding of the national debt," with like qualities, privileges, and exemptions, to the extent necessary to carry this act into full effect, and to use the proceeds thereof for the purposes aforesaid. And all provisions of law inconsistent with the provisions of this act are hereby repealed—

and inserting the following so it will read:

And to enable the Secretary of the Treasury to prepare and provide for the redemption in this act authorized or required, he is authorized to use any surplus revenues, from time to time, in the Treasury not otherwise appropriated but—

In the language of the Senator's bill—

the issuance of interest-bearing bonds of the United States for any purpose whatever without further authority of Congress is hereby prohibited.

Such is the startling modification proposed by the Senator from North Carolina.

THE PROBABLE EFFECT.

If it were possible, Mr. President, to so modify the resumption act as suggested by the Senator from North Carolina, then the only reliance of the Government for a resumption fund would be upon its surplus revenues. But it is conceded we have no surplus revenues. Look at the Treasury exhibit. Our deficiency June 30, 1894, was $69,800,000; June 30, 1895, it was $42,800,000; and June 30, 1896, this very month (thirty days estimated), will be over $30,000,000, aggregating during the three years of this Administration a deficit of $142,000,000.

So it will be observed that the power to maintain resumption from the surplus revenues is utterly destroyed.

NO GOLD REVENUES.

Without this power to sell bonds, gold redemption is absolutely impossible, for our gold revenues are reduced practically to nothing. Where are we to secure gold without the power to borrow? I hold in my hand a statement showing the percentage of gold received for customs during the fiscal years from 1890 to 1896:

Statement showing the percentage of gold received for customs during the fiscal years from 1890 to 1896 (nine months).

Period.	Receipts from customs.	Amount paid in gold.	Per centage of gold received for customs.
Fiscal year—			
1890	$229,668,584.57	$178,988,528.00	77.9
1891	219,522,205.23	147,835,416.50	67.3
1892	177,452,964.15	47,584,479.00	26.8
1893	203,355,016.73	20,747,888.50	10.2
1894	131,818,530.62	27,885,538.80	21.3
1895	152,158,617.45	6,938,368.50	4.6
1896 (9 months)	126,288,486.74	5,069,638.50	4
Total	1,240,264,405.49	435,049,857.80	35.1

OFFICE OF TREASURER UNITED STATES, *May 23, 1896.*

It would seem, therefore, that we have no way of securing gold from our customs revenue and we have no other source of supply. With only a hundred and six millions, in round numbers, of gold in the Treasury, including the reserve, and that constantly decreasing, and without the power to purchase gold, and with substantially no revenues payable in gold, it is perfectly apparent that under the measure proposed gold redemption would have to be abandoned. But if the Senator's bill should become a law it would inaugurate a raid upon the Treasury for the redemption of the outstanding "greenbacks" which would not cease until the last dollar of gold had been drawn from the Treasury and the Government forced to close its doors and suspend specie payments.

Mr. STEWART. Will the Senator from Michigan allow me to ask him a question?

Mr. BURROWS. I do not care to yield.

Mr. STEWART. Suppose they should pay silver first?

Mr. BURROWS. I will come to that. But the answer is as suggested this moment by the Senator from Nevada, we will redeem in silver. That, of course, means a silver basis at once. But we could not even maintain redemption in silver for any considerable time, for we have only twenty-eight millions of free silver, which would hardly be regarded a sufficient sum to redeem on demand nearly five hundred millions of outstanding paper. So it is seen to what condition we would be reduced. With no

power to purchase either gold or silver, and with no surplus revenues at our command in either coins, the suspension of specie payments would become inevitable.

But it is stated that this power has been abused by the present Administration. Grant it if you please. That is no reason why it should be wholly withdrawn. All power is subject to abuse, but that is no reason why its legitimate exercise should be withheld. And I repeat if this power had not existed under this Administration, and had not been exercised with vigor and courage the doors of the Treasury would have been closed long ago and our paper gone to protest. But let me suggest in this connection that the exercise of the power to sell bonds to the extent of more than $260,000,000 has been made necessary by the free-trade policy of this Administration, by which the revenues of the Government have been cut off and reduced far below the necessary expenses of the Government.

From 1879, the day of resumption, to March 4, 1893, when this Administration came into power with its policy of free trade, there was no complaint and there was no "endless chain" drawing the gold out of the Treasury, because we always were in possession of a surplus revenue.

As I have already stated, there were no bond sales to secure a redemption fund from 1879 to 1894, and not until the revenues under this Administration became insufficient to meet the ordinary expenses of the Government was public apprehension aroused lest the Government would be unable to meet its demand paper. So the "endless chain" was set in motion, which, from July 14, 1890, until June 1, 1896, this very month, drew more than $390,000,000 of gold from the Treasury.

How far the apprehension that we are to go to a silver basis has contributed to this disaster I shall not now stop to inquire.

THE SENATE'S PATRIOTISM?

One word more and I am done. It is said no harm will come, although we have no means of securing gold or silver. It is said that no harm will come, because Congress can be convened at any time and its patriotism can be relied upon to meet any emergency. Several Senators have given expression to such a sentiment. It might be responded to gentlemen who express such unbounded confidence in the patriotism of Congress as was said of old, "I have not seen such faith; no, not in Israel."

The patriotism of the people in the end will settle this question, and settle it rightly, but I fear if we depend upon the patriotism of Congress it will be found that we lean upon a broken reed. Rely upon the patriotism of Congress! If there was ever a time in the history of this Government when there was an opportunity for the exhibition of patriotism and business judgment it has been during the last six months, while this Congress has been in session, when the Treasury has been depleted and the public credit imperiled.

Unfortunately the course of the present Congress, so far as the Senate is concerned, has not been such as to inspire public confidence either in the patriotism or financial wisdom of this body. The House of Representatives, within thirty days after its organization, proposed and passed a measure to increase the revenues of the Government by $40,000,000. The Senate referred that bill to its Committee on Finance, which committee loaded it down with a proposition for the free and unlimited coinage of silver, knowing when they did it that as thus amended it could never pass the House of Representatives, or if it did it could not receive Executive approval. Was that patriotic? The Senate then refused to even take the measure up for consideration, and I am safe in saying that it never will be considered by this body.

This is the patriotic response of Congress to the demand to replenish an exhausted Treasury. Neither can the patriotism of Congress, so far as this Senate is concerned, be relied upon to confer upon the Secretary of the Treasury the power to issue bonds to acquire coin for the purpose of maintaining the public credit. The House of Representatives at the present session very promptly passed an act authorizing the Secretary of the Treasury to issue and sell bonds bearing interest at 3 per cent, and requiring him to use the proceeds from such sale for the redemption of United States legal-tender notes, and for no other purpose, so as to avoid the abuse of that power, and also to issue $50,000,000 of certificates of indebtedness, drawing a like rate of interest, for the purpose of meeting any temporary deficiency.

What was the "patriotic response" of this Senate to that proposition? Free and unlimited coinage of silver—the same proposition that was attached to the tariff bill—the coinage of the seigniorage in the Treasury, and providing for the issuing of silver certificates for the same in advance of its coinage. The Senate could not wait even for the coinage; and then, to cap the climax, providing for the redemption of the United States and Treasury notes in gold or silver, at the option of the Government. So much for the patriotism of the Senate of the United States.

But, I repeat, this measure is a proposition to force this Government to a silver basis by cutting off the revenues and then depriving the Secretary of the Treasury of the power to purchase coin.

Take from the Secretary of the Treasury the power to sell bonds for the purpose of obtaining coin for the maintenance of specie payments and convene this Congress for the purpose of reinvesting him with such power, and I hazard nothing in saying the only response that would be made would be a proposition for the free and unlimited coinage of silver and the payment of our outstanding demand obligations in either gold or silver at the option of the Government.

If it is not the purpose of the author and supporters of this measure to secure this end, the effect of it will surely be to force the Government to a silver basis.

But fortunately for the country this proposition can not receive, whatever may be its fate here, the approval of the House of Representatives or the sanction of the Executive. It will be most unfortunate if it shall receive the approval of a majority of the United States Senate. It is to be deplored that this great body, regarded as the most august legislative assembly on earth, should attempt to strip the Government of all power to maintain its credit, even in times of profound peace.

If it were possible for such a proposition as this to receive legislative approval and Executive sanction, bringing upon the nation financial distress and dishonor, for myself I had rather it had gone down in the awful storm of war than to survive a hissing and a byword among the nations of the earth.

Unfortunate for the country, most unfortunate for our financial reputation and good name, if this bill shall pass the Senate. Each Senator, however, must act and will act upon his own responsibility to the State which he represents, and I hope, in a higher sense, upon his responsibility to the whole country.

We are approaching a crisis in our financial affairs fraught with incalculable danger, which I trust and believe the sober second thought of the American people will avert. For myself, however, whatever the outcome and whatever the consequences to me personally, I will never lend a hand to remove the last prop by which the public credit of my country is sustained.

Mr. PALMER obtained the floor.

Mr. BUTLER. I wish to ask the Senator from Michigan a question before he yields the floor. Will the Senator from Illinois allow me to ask a question of the Senator from Michigan?

Mr. PALMER. I yield to the Senator from North Carolina for that purpose.

Several SENATORS. Let us vote.

The PRESIDING OFFICER. The Senator from Illinois has been recognized.

Mr. BUTLER. The Senator from Illinois has yielded for a question of the Senator from Michigan. I wish to ask the Senator from Michigan a question. He has seen fit to criticise the American Senate with severe strictures, and upon these criticisms he makes the astounding statement that he could not trust the judgment and patriotism of this body to say when bonds shall or shall not be issued. He would rather see this country plunged into war than to see Congress consulted about this vital matter. I should like to ask him if he can trust the judgment and patriotism of the Democratic Executive rather than the will of the people as expressed in the legislative branch of the Government? Will he investigate with the same scrutiny the actions of the Administration and then say that he can trust the patriotism of the Executive before he can trust the patriotism of the Senate? If he votes against this bill, then he is willing to take from Congress the most important and tremendous legislative power and put it into the hands of one man; not only that, but into the hands of a man who is responsible for the secret bond deal, the most indefensible and disgraceful action in the history of this or of any other Government. He will be equally responsible for the wrong already done by the President and for any wrong that may be done in bond transactions in the future.

The Senator from Michigan has, however, done the country a valuable service in one respect at least. He has shown that you can not get gold from revenue. Then his proposition is——

Mr. PALMER. I did not yield to the Senator from North Carolina for a speech.

Mr. BUTLER. One sentence only, and I am through. You can not, according to your own admission, get gold from revenue. The gold standard must be maintained. You can not maintain it from revenue raised by taxation, no matter if you had a thousand millions of surplus revenue. Therefore your only hope and method for maintaining the gold standard must be by selling bonds. You do not expect to do it in any other way, and that is why you are opposed to this bill; that is why you do not want to intrust the credit and honor of the country in the hands of Congress. You know, first, that Congress will never authorize the maintenance of the gold standard and, second, that Congress will adopt the bimetallic standard and provide for meeting all of the coin obligations of the Government with gold and silver coin, according to the letter and spirit of the contract. You know Congress can and would do this without selling bonds. But you are anxious for bonds to be sold, therefore you are opposed to this bill.

Mr. PALMER. Mr. President, I observe around me such a desire to vote upon this question that if I could be assured that a vote would be taken at once I would not weary the Senate by any extended remarks certainly, and I shall not detain the Senate now beyond a single point. I have before me the bill prepared by the Senator from North Carolina [Mr. BUTLER]. Its language is—

That the issuance of interest-bearing bonds of the United States for any purpose whatever without further authority of Congress is hereby prohibited.

I understand that the Senator by this bill intends to affirm or confirm all the issues that have heretofore been made, and that the $260,000,000 that have been issued are, in his judgment, supported by existing legislation.

I have before me the amendment proposed by the Senator from Utah [Mr. BROWN] and the amendment proposed by the Senator from West Virginia [Mr. ELKINS]. I understand the Senator from Utah desires nothing more than to establish what my friend from Nebraska [Mr. ALLEN] terms the proposition of notice, and that the reason why the Senator from Utah desires that this measure shall be voted upon by the Senate is simply that notice may be given. Caveat emptor, I think my friend from Nebraska said, is the proper term; and I will remark to my friend from Nebraska that that term in Illinois has an official interpretation. Governor Reynolds, of Illinois, was once asked by a young lawyer, "What is the meaning of 'caveat emptor'?" He said: "My young friend, it signifies 'flee from the wrath to come.'" [Laughter.] I understand, therefore, that the Senator from Nebraska has himself by a resolution or by some speech he has made warned the purchasers of bonds to flee from the wrath to come, and that the Senator from Utah has done no more by his proposed amendment.

Mr. President, in view of the urgent desire of Senators present to vote upon this proposition, it seems to me that I ought to limit my remarks to a very narrow extent. I understand, and I fully sympathize with that view, that this bill is not only intended—I will not say intended, but that the effect of this bill will be to shut up the public Treasury. We all know that the revenues of the Government are not sufficient now to pay its current expenses; we all know that if the public debt is met at all, whether in silver or in gold, it can only be done by borrowing money for that purpose.

Senators say that we ought to have had laws, we ought to have had legislation that would have afforded abundant revenues for the Government. We have no such legislation. It is not important now to inquire whose fault it is. We are called upon to meet this particular question, Shall we strip the Secretary of the Treasury of all power to borrow money? I say it is not important whose fault all this is, or what legislation has produced this result. Can the Senator from North Carolina [Mr. BUTLER] say that he desires now that the Secretary of the Treasury shall be stripped of all means of maintaining the public credit either by the payment of gold or silver? Undoubtedly the latent motive which dictates the support of this bill is the desire that by some means or other we shall reach the point of free coinage of silver.

Mr. President, I have great respect for my Democratic friends who favor the free coinage of silver, but I am astonished that they should seek to accomplish that result by indirection; that they should seek to bankrupt the Treasury, deprive it of all means of raising temporary supplies, if it be so regarded, and that they should by that means not establish the free coinage of silver, but endeavor to reach the free coinage of silver through the bankruptcy of the public Treasury.

We know, I know, and I assert that bankruptcy of the Treasury would result if it were possible for this bill to pass, which, thank God, it is not, because this debate is only intended to affect the approaching election. Nobody expects the bill to become a law. It is pressed here merely that men may commit themselves; but still I say I rejoice that it can not become a law. I rejoice, too, that the authors of the bill do not expect it to become a law. It is intended as a mere part of the agencies by which Presidential elections are to be influenced, if not controlled.

Mr. President, having thus expressed my own views on this subject, having asserted that this is an essential, necessary power to be retained by the Secretary of the Treasury, and being earnestly desirous to avoid bankruptcy, earnestly desirous to avoid the discredit of the Government by an inability to pay, I can only say that I shall, with the greatest satisfaction, vote against this bill.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Rhode Island [Mr. ALDRICH].

Mr. BACON. Let the amendment be read.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. It is proposed to add at the end of the bill the following:

Unless in case of an emergency it is necessary, in the opinion of the President of the United States and the Secretary of the Treasury, to issue such bonds, in accordance with the provisions of existing law, to preserve the public credit or to meet obligations of the United States created by such existing law which can not otherwise be met, and all such bonds when so issued shall first be offered at public sale.

Mr. ALLEN. I move to lay the amendment on the table.

The PRESIDING OFFICER. The Senator from Nebraska moves to lay the amendment of the Senator from Rhode Island on the table.

Mr. HILL and Mr. LODGE called for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. ALLISON (when his name was called). I am paired on all the votes on this question with the Senator from Missouri [Mr. COCKRELL].

Mr. BERRY (when his name was called). On this question I am paired with the Senator from Delaware [Mr. GRAY]. If he were present, he would vote "nay" and I should vote "yea."

Mr. PASCO (when Mr. CALL's name was called). My colleague [Mr. CALL] is paired on all these votes with the Senator from Vermont [Mr. PROCTOR].

Mr. CARTER (when his name was called). I am paired on all matters relating to this question with the junior Senator from Maryland [Mr. GIBSON].

Mr. GEAR (when his name was called). I am paired with the senior Senator from Georgia [Mr. GORDON]. If he were present, I should vote "nay."

Mr. CARTER (when Mr. MANTLE's name was called). I desire to announce that my colleague [Mr. MANTLE] is paired on all phases of this question with the Senator from West Virginia [Mr. ELKINS]. My colleague is in favor of the bill of the Senator from North Carolina, and if present would vote "yea" on the pending question and the Senator from West Virginia would vote "nay."

Mr. HILL. Perhaps I might as well call attention right here to a fact, to which I invite the attention of the Senator from Nevada [Mr. STEWART]. Last week the Senator from Nevada asked me to have my colleague [Mr. MURPHY] paired upon this question with his colleague [Mr. JONES], which I did. I merely call attention to it.

Mr. STEWART. My colleague is here now.

Mr. HILL. He is here, but my colleague is not, and the Senator's colleague [Mr. JONES of Nevada] has voted.

Mr. STEWART. Then the Senator's colleague [Mr. MURPHY] is not paired.

Mr. HANSBROUGH. On this question the Senators in charge of the pairs have arranged a pair between the Senator from Wyoming [Mr. CLARK] and the Senator from New York [Mr. MURPHY].

Mr. HILL. The pair, then, with my colleague has been transferred to the Senator from Wyoming?

Mr. HANSBROUGH. Yes; on this question.

Mr. HILL. Very well.

Mr. JONES of Nevada. I understood the pair had been transferred before I voted.

Mr. HILL. That is all right, then.

Mr. MITCHELL of Wisconsin (when his name was called). I am paired with the Senator from New Jersey [Mr. SEWELL], but as we are agreed on this subject, I vote "nay."

Mr. PASCO. I will state that the pair of the Senator from New Jersey [Mr. SEWELL] has been transferred to the Senator from Louisiana [Mr. BLANCHARD], which permits the Senator from Wisconsin [Mr. MITCHELL] to vote.

Mr. PERKINS (when his name was called). Upon this question and all of its different phases I am paired with the Senator from Maryland [Mr. GORMAN]. If present, he would vote "nay" while I should vote "yea."

Mr. PRITCHARD (when his name was called). I have a general pair with the Senator from Louisiana [Mr. BLANCHARD], but inasmuch as we agree on this proposition, I exercise my choice and vote "yea."

Mr. PUGH (when his name was called). I have a general pair with the senior Senator from Massachusetts [Mr. HOAR]. On this question I transfer my pair with him to the junior Senator from Virginia [Mr. MARTIN] and vote "yea."

Mr. SHOUP (when his name was called). I announce on all phases of this question that I am paired with the Senator from Ohio [Mr. SHERMAN].

Mr. TILLMAN (when his name was called). I have a general pair with the Senator from Nebraska [Mr. THURSTON], who is absent. With the consent of the Senator from Florida [Mr. PASCO], who has charge of the pairs on this side of the Chamber, I will transfer that pair to the Senator from North Dakota [Mr. ROACH] and vote "yea."

Mr. ALLEN. My colleague [Mr. THURSTON] is detained from the Senate by sickness in his family.

Mr. HALE (when Mr. VOORHEES's name was called). My colleague [Mr. FRYE] is paired with the Senator from Indiana [Mr. VOORHEES]. If present, my colleague would vote "nay" and the Senator from Indiana, I presume, would vote "yea."

The roll call was concluded.

Mr. BURROWS. I desire to announce that my colleague [Mr.

McMILLAN] is paired with the senior Senator from Kentucky [Mr. BLACKBURN]. If present, my colleague would vote "nay."

Mr. HARRIS. I have a general pair with the Senator from Vermont [Mr. MORRILL]. If he were present, I suppose he would vote "nay" upon this motion, and I should vote "yea." I will, however, transfer that pair to the senior Senator from South Carolina [Mr. IRBY], and record my vote "yea."

Mr. GALLINGER. I rise to announce that on this vote and on all votes relating to this bill the junior Senator from Kansas [Mr. BAKER] is paired with the Senator from South Dakota [Mr. KYLE].

Mr. BERRY. I am paired with the Senator from Delaware [Mr. GRAY], and the Senator from Iowa [Mr. ALLISON] is paired with the Senator from Missouri [Mr. COCKRELL]. By transferring our pairs the Senator from Iowa and I will be at liberty to vote. I vote "yea."

Mr. ALLISON. Assenting to that arrangement, the Senator from Delaware [Mr. GRAY] will stand paired with the Senator from Missouri [Mr. COCKRELL], and I vote "nay."

The result was announced—yeas 32, nays 25; as follows:

YEAS—32.

Allen,	Daniel,	Mitchell, Oreg.	Teller,
Bacon,	Dubois,	Morgan,	Tillman,
Bate,	George,	Pasco,	Turpie,
Berry,	Hansbrough,	Peffer,	Vest,
Brown,	Harris,	Pettigrew,	Walthall,
Butler,	Jones, Ark.	Pritchard,	Warren,
Cannon,	Jones, Nev.	Pugh,	White,
Chilton,	Mills,	Stewart,	Wolcott.

NAYS—25.

Aldrich,	Davis,	Lodge,	Smith,
Allison,	Faulkner,	McBride,	Vilas,
Brice,	Gallinger,	Mitchell, Wis.	Wetmore,
Burrows,	Hale,	Nelson,	Wilson.
Caffery,	Hawley,	Palmer,	
Chandler,	Hill,	Platt,	
Cullom,	Lindsay,	Quay,	

NOT VOTING—32.

Baker,	Elkins,	Irby,	Proctor,
Blackburn,	Frye,	Kyle,	Roach,
Blanchard,	Gear,	McMillan,	Sewell,
Call,	Gibson,	Mantle,	Sherman,
Cameron,	Gordon,	Martin,	Shoup,
Carter,	Gorman,	Morrill,	Squire,
Clark,	Gray,	Murphy,	Thurston,
Cockrell,	Hoar,	Perkins,	Voorhees.

So the amendment was laid on the table.

Mr. ALDRICH. I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. At the end of the bill it is proposed to insert the following:

Provided, however, That nothing contained in this act shall be construed to impair the obligation of the United States to redeem in coin upon presentation, as now required by law, outstanding United States legal-tender notes and Treasury notes, nor to restrict or lessen the authority now given by law to the Secretary of the Treasury to obtain the necessary coin for the purposes of such redemption.

Mr. ALDRICH. Mr. President, I do not intend to detain the Senate by discussing this amendment, but it is important that this bill should be clearly understood and that its purpose should be clearly defined. If it is the purpose of the Senate in passing this bill to stop the redemption of United States notes and Treasury notes in coin, they should be willing to say so in definite set terms, and I therefore ask that a vote may be taken on the amendment by yeas and nays.

Mr. MILLS. I move to lay the amendment on the table.

The PRESIDING OFFICER. The question is on the motion of the Senator from Texas.

Mr. ALDRICH. I ask for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. HALE (when Mr. FRYE's name was called). My colleague [Mr. FRYE] would vote "nay" if here. He is paired with the Senator from Indiana [Mr. VOORHEES].

Mr. GEAR (when his name was called). I am paired, as I before stated, with the Senator from Georgia [Mr. GORDON]. Were he present, I should vote "nay."

Mr. HARRIS (when his name was called). Being paired with the Senator from Vermont [Mr. MORRILL], and supposing he would vote "nay" upon this motion, I transfer my pair to the senior Senator from South Carolina [Mr. IRBY] and vote "yea."

Mr. LODGE (when Mr. HOAR's name was called). My colleague [Mr. HOAR] now stands paired with the Senator from Virginia [Mr. MARTIN]. If my colleague were present, he would vote "nay."

Mr. BURROWS (when Mr. McMILLAN's name was called). I make the same announcement in regard to my colleague [Mr. McMILLAN] that I before made.

Mr. PERKINS (when his name was called). I desire again to announce my pair with the senior Senator from Maryland [Mr. GORMAN].

Mr. PRITCHARD (when his name was called). I am paired with the Senator from Louisiana [Mr. BLANCHARD]. If he were present, I should vote "nay."

Mr. TILLMAN (when his name was called). I make the same announcement as to pairs, and I will vote. I vote "yea."

The roll call was concluded.

Mr. BERRY. I am paired on this question with the Senator from Delaware [Mr. GRAY]. If the Senator from Delaware were present, he would vote "nay." With the consent of the Senator from Iowa [Mr. ALLISON], we will make the same arrangement, and I will transfer the pair with the Senator from Delaware to the Senator from Missouri [Mr. COCKRELL]. I will vote "yea."

Mr. ALLEN. It is due to the junior Senator from South Dakota [Mr. KYLE] to say that he stands paired on this question with the junior Senator from Kansas [Mr. BAKER].

The result was announced—yeas 31, nays 25; as follows:

YEAS—31.

Allen,	Daniel,	Mitchell, Oreg.	Tillman,
Bacon,	Dubois,	Morgan,	Turpie,
Bate,	George,	Pasco,	Vest,
Berry,	Hansbrough,	Peffer,	Walthall,
Brown,	Harris,	Pettigrew,	Warren,
Butler,	Jones, Ark.	Pugh,	White,
Cannon,	Jones, Nev.	Stewart,	Wolcott.
Chilton,	Mills,	Teller,	

NAYS—25.

Aldrich,	Davis,	Lodge,	Smith,
Allison,	Faulkner,	McBride,	Vilas,
Brice,	Gallinger,	Mitchell, Wis.	Wetmore,
Burrows,	Hale,	Nelson,	Wilson.
Caffery,	Hawley,	Palmer,	
Chandler,	Hill,	Platt,	
Cullom,	Lindsay,	Quay,	

NOT VOTING—33.

Baker,	Frye,	McMillan,	Sewell,
Blackburn,	Gear,	Mantle,	Sherman,
Blanchard,	Gibson,	Martin,	Shoup,
Call,	Gordon,	Morrill,	Squire,
Cameron,	Gorman,	Murphy,	Thurston,
Carter,	Gray,	Perkins,	Voorhees.
Clark,	Hoar,	Pritchard,	
Cockrell,	Irby,	Proctor,	
Elkins,	Kyle,	Roach,	

So the amendment was laid on the table.

Mr. HILL. I offer an amendment.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. It is proposed to add at the end of the bill:

It is further provided that upon the redemption of any United States notes the Secretary of the Treasury shall not reissue the same.

Mr. MILLS. I move to lay the amendment on the table.

Mr. HILL. On that I ask for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. HARRIS (when his name was called). I again announce my pair with the Senator from Vermont [Mr. MORRILL], and for the last time. I transfer my pair to the senior Senator from South Carolina [Mr. IRBY]. I vote "yea," and shall continue to vote hereafter upon these questions, making that transfer without further statement.

Mr. MITCHELL of Wisconsin (when his name was called). I am paired with the senior Senator from New Jersey [Mr. SEWELL]. I understand that the Senator from North Carolina [Mr. PRITCHARD] is paired with the Senator from Louisiana [Mr. BLANCHARD].

Mr. PRITCHARD. I am so paired.

Mr. MITCHELL of Wisconsin. If it is agreeable to the Senator from North Carolina, we will transfer our pairs.

Mr. PRITCHARD. That is perfectly agreeable.

Mr. MITCHELL of Wisconsin. I vote "nay."

Mr. PERKINS (when his name was called). I desire again to announce my pair with the senior Senator from Maryland [Mr. GORMAN].

The roll call was concluded.

Mr. ALLISON. I am paired with the Senator from Missouri [Mr. COCKRELL], but understanding that he would vote "yea" on this vote, I am at liberty to vote. I vote "yea."

Mr. GEAR. I am paired with the Senator from Georgia [Mr. GORDON]. If he were present, I should vote "yea."

The result was announced—yeas 43, nays 12; as follows:

YEAS—43.

Allen,	Daniel,	Lindsay,	Stewart,
Allison,	Davis,	McBride,	Teller,
Bacon,	Dubois,	Mills,	Tillman,
Bate,	Gallinger,	Mitchell, Oreg.	Turpie,
Berry,	George,	Morgan,	Vest,
Brown,	Hale,	Nelson,	Walthall,
Butler,	Hansbrough,	Pasco,	Warren,
Cannon,	Harris,	Peffer,	White,
Chandler,	Hawley,	Pettigrew,	Wilson,
Chilton,	Jones, Ark.	Pritchard,	Wolcott.
Cullom,	Jones, Nev.	Pugh,	

NAYS—12.

Brice,	Hill,	Palmer,	Smith,
Caffery,	Lodge,	Platt,	Vilas,
Faulkner,	Mitchell, Wis.	Quay,	Wetmore.

NOT VOTING—34.

Aldrich,	Cockrell,	Irby,	Roach,
Baker,	Elkins,	Kyle,	Sewell,
Blackburn,	Frye,	McMillan,	Sherman,
Blanchard,	Gear,	Mantle,	Shoup,
Burrows,	Gibson,	Martin,	Squire,
Call,	Gordon,	Morrill,	Thurston,
Cameron,	Gorman,	Murphy,	Voorhees.
Carter,	Gray,	Perkins,	
Clark,	Hoar,	Proctor,	

So the amendment was laid on the table.

Mr. QUAY. I offer an amendment.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. It is proposed to add at the end of the bill:

When any Treasury note shall be received at the Treasury for redemption it shall be canceled, and it shall be the duty of the Secretary of the Treasury to issue in lieu thereof a note of similar denomination, payable in gold, at the option of the United States, and receivable for all debts, public and private, except duties upon imports and interest on the public debt.

Mr. HARRIS. I move to lay the amendment on the table.

Mr. CHANDLER. I ask that the amendment may again be read.

The Secretary again read the amendment.

Mr. PLATT. I should like to be advised as to what a Treasury note is.

Mr. ALDRICH. Treasury notes issued under the act of 1890.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee to lay on the table the amendment offered by the Senator from Pennsylvania.

The motion was agreed to.

Mr. HILL. I wish to make one more motion before the final vote is taken. I move to postpone the further consideration of the pending bill until the first Monday in December next.

The PRESIDING OFFICER. The Senator from New York moves to postpone the further consideration of the bill until the first Monday in December next.

Mr. HILL. On that I ask for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. GEAR (when his name was called). I am paired with the Senator from Georgia [Mr. GORDON]. If he were present, I should vote "yea."

Mr. BERRY (when Mr. GRAY's name was called). The Senator from Delaware [Mr. GRAY] is paired with the Senator from Missouri [Mr. COCKRELL]. If the Senator from Delaware were here, he would vote "yea," in favor of postponement, and the Senator from Missouri would vote "nay."

Mr. LODGE (when Mr. HOAR's name was called). My colleague [Mr. HOAR] is paired with the Senator from Virginia [Mr. MARTIN]. If my colleague were present, he would vote "yea."

Mr. PERKINS (when his name was called). I desire again to announce my pair with the senior Senator from Maryland [Mr. GORMAN].

The roll call was concluded.

Mr. BURROWS. My colleague [Mr. MCMILLAN] is paired with the Senator from Kentucky [Mr. BLACKBURN]. If my colleague were present, he would vote "yea."

The result was announced—yeas 24, nays 32; as follows:

YEAS—24.

Aldrich,	Cullom,	Hill,	Palmer,
Allison,	Davis,	Lindsay,	Platt,
Brice,	Faulkner,	Lodge,	Quay,
Burrows,	Gallinger,	McBride,	Smith,
Caffery,	Hale,	Mitchell, Wis.	Vilas,
Chandler,	Hawley,	Nelson,	Wetmore.

NAYS—32.

Allen,	Daniel,	Mitchell, Oreg.	Teller,
Bacon,	Dubois,	Morgan,	Tillman,
Bate,	George,	Pasco,	Turpie,
Berry,	Hansbrough,	Peffer,	Vest.
Brown,	Harris,	Pettigrew,	Walthall,
Butler,	Jones, Ark.	Pritchard,	Warren,
Cannon,	Jones, Nev.	Pugh,	White,
Chilton,	Mills,	Stewart,	Wolcott.

NOT VOTING—33.

Baker,	Frye,	McMillan,	Sherman,
Blackburn,	Gear,	Mantle,	Shoup,
Blanchard,	Gibson,	Martin,	Squire,
Call,	Gordon,	Morrill,	Thurston,
Cameron,	Gorman,	Murphy,	Voorhees,
Carter,	Gray,	Perkins,	Wilson.
Clark,	Hoar,	Proctor,	
Cockrell,	Irby,	Roach,	
Elkins,	Kyle,	Sewell,	

So the motion was not agreed to.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, and was read the third time.

The PRESIDING OFFICER. The question is, Shall the bill pass?

Mr HILL and Mr. HAWLEY called for the yeas and nays, and they were ordered.

The Secretary proceeded to call the roll.

Mr. PASCO (when Mr. CALL's name was called). I wish to announce that my colleague [Mr. CALL] is paired with the Senator from Vermont [Mr. PROCTOR]. If my colleague were present he would vote for the passage of the bill, and he would have voted against all the amendments which have been offered.

Mr. HALE (when Mr. FRYE's name was called). My colleague [Mr. FRYE] would vote "nay," if he were here. He is paired with the Senator from Indiana [Mr. VOORHEES].

Mr. GEAR (when his name was called). I will again announce my pair with the senior Senator from Georgia [Mr. GORDON]. If he were present, I should vote "nay."

Mr. BERRY (when Mr. GRAY's name was called). Upon this question the Senator from Delaware [Mr. GRAY] is paired with the Senator from Missouri [Mr. COCKRELL]. If the Senator from Delaware were present, he would vote "nay," and the Senator from Missouri would vote "yea."

Mr. LODGE (when Mr. HOAR's name was called). My colleague [Mr. HOAR] is paired with the Senator from Virginia [Mr. MARTIN]. If my colleague were present, he would vote "nay."

Mr. ALLEN (when Mr. KYLE's name was called). The junior Senator from South Dakota [Mr. KYLE] is paired with the junior Senator from Kansas [Mr. BAKER], and would vote "yea" if he were present.

Mr. HILL (when Mr. MURPHY's name was called). My colleague [Mr. MURPHY] is paired with the Senator from Wyoming [Mr. CLARK]. If my colleague were present, he would vote "nay."

Mr. PERKINS (when his name was called). I again announce my pair with the senior Senator from Maryland [Mr. GORMAN]. If he were present, he would vote "nay" and I should vote "yea."

The roll call was concluded.

Mr. SMITH. My colleague [Mr. SEWELL] is paired with the Senator from Louisiana [Mr. BLANCHARD]. If my colleague were present, he would vote "nay."

Mr. BURROWS. My colleague [Mr. MCMILLAN] would vote "nay" if he were here. He is paired with the Senator from Kentucky [Mr. BLACKBURN].

Mr. WARREN. My colleague [Mr. CLARK] is detained from the Chamber and is paired with the Senator from New York [Mr. MURPHY]. If present, he would vote "yea."

The result was announced—yeas 32, nays 25; as follows:

YEAS—32.

Allen,	Daniel,	Mitchell, Oreg.	Teller,
Bacon,	Dubois,	Morgan,	Tillman,
Bate,	George,	Pasco,	Turpie,
Berry,	Hansbrough,	Peffer,	Vest,
Brown,	Harris,	Pettigrew,	Walthall,
Butler,	Jones, Ark.	Pritchard,	Warren,
Cannon,	Jones, Nev.	Pugh,	White,
Chilton,	Mills,	Stewart,	Wolcott.

NAYS—25.

Aldrich,	Davis,	Lodge,	Smith,
Allison,	Faulkner,	McBride,	Vilas,
Brice,	Gallinger,	Mitchell, Wis.	Wetmore,
Burrows,	Hale,	Nelson,	Wilson.
Caffery,	Hawley,	Palmer,	
Chandler,	Hill,	Platt,	
Cullom,	Lindsay,	Quay,	

NOT VOTING—32.

Baker,	Elkins,	Irby,	Proctor,
Blackburn,	Frye,	Kyle,	Roach,
Blanchard,	Gear,	McMillan,	Sewell,
Call,	Gibson,	Mantle,	Sherman,
Cameron,	Gordon,	Martin,	Shoup,
Carter,	Gorman,	Morrill,	Squire,
Clark,	Gray,	Murphy,	Thurston,
Cockrell,	Hoar,	Perkins,	Voorhees.

So the bill was passed.

REGULATIONS CONCERNING FILLED CHEESE.

Mr. ALLISON, Mr. BROWN, and others addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from Iowa.

Mr. ALLISON. I move, in accordance with an understanding and at the request of the Senator from Ohio [Mr. SHERMAN], to take up the bill known as the filled-cheese bill, not, however, with a view of proceeding with its consideration to-night.

Mr. HARRIS. I hope the Senator will let that motion go over until to-morrow. It is now a little after 7 o'clock.

Mr. ALLISON. I will state to the Senator from Tennessee that the Senate is now very full. It was understood that this should be the next order of business, and I hope that arrangement will not be disturbed.

Mr. HARRIS. I do not know that there was any understanding that it should be the next order of business; and it will require a majority vote of the Senate to make it such.

Mr. ALLISON. I move that the Senate proceed to the consideration of the bill.

Mr. HARRIS. Very well.

The PRESIDING OFFICER. The Senator from Iowa moves to proceed to the consideration of a bill the title of which will be read.

The SECRETARY. A bill (H. R. 8008) defining cheese, and also imposing a tax upon and regulating the manufacture, sale, importation, and exportation of filled cheese.

Mr. HARRIS. I move, at 5 minutes after 7 o'clock, that the Senate do now adjourn.

The PRESIDING OFFICER. The Senator from Tennessee moves that the Senate do now adjourn.

The motion was not agreed to.

The PRESIDING OFFICER. The question recurs on the motion of the Senator from Iowa to proceed to the consideration of the bill indicated by him.

The motion was agreed to.

The PRESIDING OFFICER. The bill is before the Senate as in Committee of the Whole.

Mr. VEST, Mr. HILL, and others addressed the Chair.

Mr. HILL. I was going to move that the Senate adjourn.

Mr. ALLISON. I ask the Senator from New York to wait one moment. The Senator from Missouri wishes to say a word.

Mr. VEST. I renew the notice I gave, that to-morrow morning after the routine business is finished I shall move that the Senate proceed to the consideration of the river and harbor bill and the veto message upon it.

I move that when the Senate adjourn to-day it be to meet at 11 o'clock to-morrow.

The motion was agreed to.

Mr. HILL. I move that the Senate adjourn.

The motion was agreed to; and (at 7 o'clock and 7 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, June 3, 1896, at 11 o'clock a. m.

HOUSE OF REPRESENTATIVES.

TUESDAY, *June 2, 1896.*

The House met at 12 o'clock m. Prayer by the Chaplain, Rev. HENRY N. COUDEN.

The Journal of the proceedings of yesterday was read.

The SPEAKER. The Journal should have contained the statement: "A quorum appearing, the Speaker caused the Journal to be read." With that modification, in the absence of objection, the Journal will be approved.

HOUR OF DAILY MEETING.

Mr. HENDERSON. Mr. Speaker, I am instructed by the Committee on Rules to present the privileged report which I send to the desk.

The report was read, as follows:

The Committee on Rules, to whom was referred the following resolution: "*Resolved*, That during the remainder of the present session the hour of the daily meeting of the House will be 11 o'clock a. m.," have had the same under consideration, and ask leave to report it with the recommendation that it be agreed to.

The resolution was agreed to.

Mr. HENDERSON. Mr. Speaker, in connection with this report, I would like to have the gentleman from Maine, the chairman of the Committee on Ways and Means, make a statement to the House.

Mr. DINGLEY. Mr. Speaker, I desire simply to call the attention of members of the House to the condition of the business of this body. There remain seven of the general appropriation bills in conference, on several of which there are disagreements between the House and the Senate which appear to be causing considerable delay, and on which some votes are likely to be called for in the House. I desire, therefore, to call attention to the importance of preserving a quorum, especially on account of these remaining appropriation bills, and to warn members who are leaving, as I notice many are inclined to do, that, in view of the condition of business in the House, it will undoubtedly be necessary to have a quorum for the purpose of closing up the business. I therefore hope that members who are intending to leave will bear in mind that in the absence of a quorum it may become necessary to send for them through the Sergeant-at-Arms.

Mr. CANNON. Mr. Speaker, I desire to supplement what the chairman of the Committee on Ways and Means has said with this statement: I am constantly asked for an opinion as to when this session will come to an end. In my judgment there is no prospect of the present session of Congress ending before Wednesday of next week, and more probably it will not end until Friday or Saturday.

Mr. HENDERSON. But the adjournment will be expedited by keeping an effective quorum on hand.

Mr. CANNON. Oh, if there is not a quorum in attendance we shall not get away in a month from now.

The SPEAKER. The Chair desires to add that he trusts that quorum keeping will commence each day at 11 o'clock precisely.

GAS IN THE DISTRICT OF COLUMBIA.

Mr. BABCOCK. Mr. Speaker, I desire to present a conference report.

The report was read, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 6994) relating to the sale of gas in the District of Columbia, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the first and second amendments of the Senate, and agree to the same amended so that the first section of the bill, down to the proviso, shall read as follows:

"That the Washington Gas Light Company of the District of Columbia is authorized to charge and collect, after the 1st day of July, 1896, for illuminating gas furnished to and paid for by private consumers in the District of Columbia at the rate of not exceeding $1.10 per thousand cubic feet until the 1st day of July, 1901, after which last-named date the rate shall not exceed $1 per thousand cubic feet; and that after the 1st day of July, 1896, the Washington Gas Light Company of the District of Columbia shall furnish to the United States Government and the District of Columbia gas at the rate of $1 per thousand cubic feet."

And that the Senate agree to the same.

That the House recede from its disagreement to the amendments of the Senate numbered 3 and 4, and agree to the same amended so that the second section of the bill, down to the proviso, shall read as follows:

"SEC. 2. That the Georgetown Gas Light Company, doing business in that part of the District of Columbia formerly known as Georgetown, is authorized to charge and collect, after the 1st day of July, 1896, for illuminating gas furnished to and paid for by private consumers in that part of the District of Columbia at the rate of not exceeding $1.35 per thousand cubic feet until the 1st day of July, 1901, after which last-named date the rate shall not exceed $1.25 per thousand cubic feet; and that after the 1st day of July, 1896, the said Georgetown Gas Light Company shall furnish to the United States Government and the District of Columbia gas at the rate of $1.25 per thousand cubic feet."

And that the Senate agree to the same.

That the House recede from its disagreement to the fifth, seventh, and eighth amendments of the Senate, and agree to the same.

That the House recede from its disagreement to the sixth amendment of the Senate, and agree to the same amended as follows: In lieu of the words "twenty-four" insert the words "twenty-five"; and that the Senate agree to the same.

That the House recede from its disagreement to the ninth amendment of the Senate, and agree to the same amended so that section 5 shall read as follows:

"SEC. 5. That neither the Washington Gas Light Company nor the Georgetown Gas Light Company shall hereafter issue any greater number of shares of stock than shall be equal to the actual cash value of said plants and necessary cost of the construction of future extensions or future enlargement of plants, which cash value and cost of extensions shall first be ascertained and authorized upon petition therefor to the supreme court of the District of Columbia, under such regulations as the chief justice and the justices thereof shall prescribe; also, if either of the said corporations shall desire hereafter to issue bonds upon their property, secured by mortgage or otherwise, upon petition therefor to said court, setting forth the necessity thereof and the amount of stock issued and outstanding, it may and shall be lawful for said court, or the chief justice and justices thereof, as the case may be, or one of them, upon public notice, to be prescribed by the rules of said court, to permit the issuance of such bonds and mortgage as desired: *Provided*, That the amount of stock and bonds issued shall not exceed the actual cash value of said plants and the cost of such extensions or enlargement of plant: *And provided further*, That the Washington Gas Light Company is hereby authorized to issue such additional amount of capital stock as will provide for the conversion into such stock of its outstanding certificates of indebtedness, which conversion of said certificates is hereby authorized to an amount not exceeding $600,000."

And that the Senate agree to the same.

That the Senate recede from its tenth amendment.

That the House recede from its disagreement to the eleventh amendment of the Senate, and agree to the same amended so that said amendment shall stand as section 6; and that the Senate agree to the same.

J. W. BABCOCK,
B. B. ODELL,
JAMES D. RICHARDSON,
Managers on the part of the House.

JAMES MCMILLAN,
CHAS. J. FAULKNER,
J. H. GALLINGER,
Managers on the part of the Senate.

The statement of the House conferees was read, as follows:

The effect of the bill agreed upon by the Senate and House conference committees will be as follows:

1. To reduce the price of gas to the United States Government and to the District of Columbia to $1 per thousand, to take effect July 1, 1896.

2. To reduce the price of gas to private consumers to $1.10 per thousand, commencing July 1, 1896, and continuing until July 1, 1901, when it will reach a basis of $1 per thousand.

3. We have fixed the standard of gas at 25 candlepower, measured by the methods in common use. Under the present methods in use in the District for testing gas this will show about 21 candlepower, or an increase over the present law of about 5 candles.

4. The effect of this bill will be to save to the consumers of gas in the District of Columbia $120,000 per year, based upon the consumption of gas for 1895. As the consumption of gas increases, as it is likely to do at this reduced price, the saving will be greater, and, in the opinion of your committee, will reach a sum equal to $150,000 within the next five years.

This conclusion has been reached after numerous conferences with the Senate committee, and the report has been unanimously agreed upon at a full meeting of the conference committee.

Mr. HEPBURN. Mr. Speaker, I think a mistake will be made if the amendments of the Senate to this bill are agreed to with reference to the price of gas and in regard to the ninth proposition, authorizing the increase of the capital stock of this company. I hold in my hand a copy of the hearings before a subcommittee of the Senate Committee on the District of Columbia as to the price of gas furnished by the Washington Gas Light Company. In these hearings, had in 1886, it was shown by the testimony of the then president of the company that coal gas was being made

in this city by his company at a cost of 42 cents a thousand feet, and water gas at a cost of 39.6 cents per thousand feet. That is the price at which it was put into the reservoir, the cost of distribution being 14 cents a thousand feet, making the total cost of manufacturing the gas and delivering it to the consumer 56 cents for coal gas and less than that for the water gas.

Mr. BABCOCK. Does the gentleman mean 56 cents or 76 cents?

Mr. HEPBURN. Fifty-six cents. That was at a time when the material used for the manufacture of gas cost the company as much as or more than it does now, and when no part of the residuum was sold because of the want of a market for it in this place. That was the cost when a little over 500,000,000 feet were manufactured in a year. Now more than 900,000,000 feet are made, and of course at a large reduction of cost for distribution.

It was shown in that investigation that every dollar of the original capital stock that had been paid into this company had been returned in extraordinary dividends—dividends above and beyond 10, 12½, or 15 per cent annually. It was shown that for the first thirty-one and a half years of the existence of the company there had been an annual dividend of 19 per cent upon the alleged capital stock, and from the expiration of that period down to this time it is capable of being shown that the dividends have been even larger.

At that time it was shown that one-third of the gas used was water gas. It has been recently shown that since that period, through new processes adopted, the water gas can be manufactured for about one-half of the then cost, and that in the manufacture of the composition that is distributed to this city the company, instead of using one-third of the cheaper quality as they did then, use now a much larger percentage.

There is no reason in the world, Mr. Speaker, why gas might not be sold in the city of Washington at 75 cents a thousand feet and yet yield a handsome dividend upon all of the alleged capital invested in this corporation. It can be done. There has been testimony before this committee showing that fact; and I am confident that it is the opinion of the chairman of the House committee that gas can be manufactured in this city for less than 65 cents a thousand feet.

Now, I am content to believe that our conferees have up to this time done all that they could do, without a further expression on the part of the House, to secure gas at a just and proper price; and I think that the House ought to express itself now in a positive way in the direction of demanding some recognition of the rights of the people of Washington at the hands of this corporation.

Mr. Speaker, I want to remind the conferees that we are not powerless in this matter; that there is in the District appropriation bill a provision on the subject of gas, and that even if this bill should fail (which I suppose the gas company would desire) we still have the possibility of compelling something like a proper agreement on this subject. If the House will stand firm we can compel dollar gas in the District appropriation bill, for the Senate will not dare to lose that bill in the effort to serve the interest of a gas corporation at the expense of the rights of the people of this District.

Mr. Speaker, I object to this measure as now reported for the further reason that it will fix the price of gas at $1.10 for the next five years; for it will be said that this act is in the nature of a compromise; that some of the obligations of contract are created by this stipulation; and we shall not be able to change the price during that period.

Again, sir, I object to the ninth proposition in this report allowing capital stock to be issued to the full value of the plant of this company. I make the statement without the fear of contradiction that every dollar that was placed in this enterprise has been returned in the shape of extraordinary dividends—dividends of 50 per cent at one time, of 50 per cent at another time, of 40 per cent at another time, of 30 per cent at another time. Dividends of this class have returned to the original projectors every dollar of the $2,000,000 of alleged stock. Further, let me say that well on to a million dollars has been put into the permanent improvements of the company out of the earnings of the company, in addition to the payment of all these dividends.

Now, what will be the result of the adoption of this provision with reference to the issue of additional capital stock? Under the terms of this bill you will allow the issue of stock to the amount of $1,200,000 now represented by certificates of indebtedness, because that enters into the cost. Provision is made for the issuance of stock to that amount. There will be $2,400,000 of additional stock. Then all these betterments that have been made out of current earnings will be capitalized in the same way; and under the terms of this bill I undertake to say there may be issued not less than $5,000,000 of stock, not one dollar of which is represented now in the plant of the concern excepting the present certificates and bonds of a million two hundred thousand dollars. I do not believe that it is wise or right or fair to the people of this District—who must pay the dividends on this stock—75 per cent of which will be water—who it will be insisted must do so in order to be honest—to adopt the provision suggested by the conference committee.

Mr. BABCOCK. Mr. Speaker, if I can have the attention of the House for a few moments I will make a fair and accurate statement of this report.

In answer to the gentleman from Iowa [Mr. HEPBURN], I would say that he brings before the House a report upon this subject which was made in 1886. He might have gone back ten years further, for Congress has handled the subject for twenty years and never yet has been able to pass a bill changing the price of gas in the District.

This bill, if passed, will make a saving to the consumers of gas in the District of Columbia of from $120,000 to $150,000 a year. And I desire to say on behalf of the conference committee of the House that we have persistently maintained the position and views of the House on this subject; and only at the end of four conferences and after a full and thorough consideration of the subject, when it became evident that it was this or nothing, have we agreed to accept the Senate provision which is embodied in this report. We have insisted on our bill for dollar gas all the way through, until we have reached the point where, as I have said, it is this bill or nothing.

The gentleman well said that the gas company of the District would like to see this bill fail. Undoubtedly they would, for it would be a saving to them of from $120,000 to $130,000 a year—just that much money in their pockets—if the House refuses to adopt the report.

As to the continuing price for five years, I would say that the bill contains the full repealing clause, and it is entirely in the power of Congress to change it at any time.

Now, in reference to the stock; some years ago this company issued $600,000 worth of certificates that draw interest at 6 per cent. These certificates state on their face that they are redeemable in stock at the option of the holders. The company simply asks authority now to take up the certificates of indebtedness and issue stock in their stead, and to which the holders are entitled by the terms of the agreement. They also ask authority to go before the supreme court of the District of Columbia, when desiring to make extensions or betterments of their plant, or at any other time they can show that the cash value of their plant is in excess of the present capitalization, and issue stock to the amount of such cash value at the rate of 100 cents on the dollar.

Mr. HEPBURN. If the gentleman will permit me, these certificates bear interest at 6 per cent——

Mr. BABCOCK. Yes.

Mr. HEPBURN. And there are $1,200,000 instead of $600,000.

Mr. BABCOCK. I beg the gentleman's pardon; there are $600,000 of certificates and $600,000 of bonds.

Mr. HEPBURN. And the stock is worth nearly 3 to 1.

Mr. BABCOCK. About 2 to 1. It is 45 now for each twenty-dollar share.

Mr. HEPBURN. Oh, a good deal more than that.

Mr. BABCOCK. The stock is selling at $45 per share.

Mr. HEPBURN. I have seen it quoted at $49 a share quite recently. It would be a good investment if the certificates held by the present stockholders should be converted into this high interest or dividend bearing stock, would it not?

Mr. BABCOCK. The certificates are worth 150 cents on the dollar to-day. They can not be bought really at any price.

Now, this is the proposition we lay before the House, as I have explained it. It is the very best we can do. We have maintained and backed up the position of the House to the fullest extent; and, gentlemen, now we put it in your own hands. If the House thinks there should be no legislation on the subject, then take the responsibility and relieve the committee. We have reported this proposition, which is the only proposition, in our judgment, that it is possible to pass, or, at all events, the best that can be had. It will relieve the citizens of the District to the extent of $120,000 to $150,000 a year as a saving on gas bills.

I ask a vote on the adoption of the report.

Mr. HEPBURN. I would like a vote on the two propositions separate.

The SPEAKER. It is not possible to divide the report and have two votes upon it. It must be accepted or rejected as a whole.

Mr. RICHARDSON. Mr. Speaker, before the question is taken I desire to say a word or two (as I have been serving on the committee of conference on the part of the House) to gentlemen on this side of the Chamber.

We have sought in every possible way to reduce the cost of gas to the people of the District to $1 per thousand feet. We have had four or five conferences—four I think—with the Senate, and have reached this agreement at $1.10 per thousand feet for the term prescribed in the bill, that is, five years, after which the price shall be $1 per thousand. I agree with what the chairman of the

Committee on the District of Columbia has so well said, that this is all we can do. I think it likely the gas company would be glad to have the report voted down, for they will make a large saving thereby. The cut made in the price of gas will cost them more than $120,000 a year each year for five years, making a total of over $600,000 within that period. At the same time the District of Columbia and the Government of the United States will immediately get gas at $1 per thousand feet instead of about $1.25 which they are now paying. I believe that it is the very best we can do, and we feel safe in advising the House to accept the report of the conference committee.

Mr. COOPER of Florida. Mr. Speaker, I should like a little further light, before voting on this question, as to why this is the best that the House committee can do? Reference has been made by the chairman of the Committee on the District of Columbia [Mr. BABCOCK] to the fact that the report read by the gentleman from Iowa [Mr. HEPBURN] was made in 1886. I hold in my hand a report made in 1894, upon full investigation, made by the Committee on the District of Columbia.

Mr. BABCOCK. One moment. I desire to ask the gentleman if Congress has ever succeeded in passing any regulation in regard to the price of gas for twenty years?

Mr. COOPER of Florida. No; but this House has passed such a bill several times. In 1894 that matter was fully investigated. I was on the District Committee and one of the subcommittee that made that report. I went into that investigation as devoid of prejudice as a man could possibly be. I examined it simply as I would have examined any proposition of law or business in my office. We gave an impartial and careful hearing to all parties in interest, and we determined and reported that at $1 a thousand the gas company could pay all its fixed charges, pay the interest upon its bonds and certificates of indebtedness, pay 10 per cent per annum upon its stock, and have an ample surplus for contingencies. That was demonstrated by the facts and the figures.

The House passed a bill then reducing the price of gas to a dollar a thousand. It passed it again at this session. There is no reason that I know why the law should not fix the price at that, except that it is said that we can not pass it through the Senate. I think that the House should make one more effort at least, should instruct its conferees to further insist on making the price of gas at a just and reasonable figure. The extension to $1.10, together with the provision for a term of years, is simply yielding to compulsion, for which justice makes no demand. I know that the chairman of the District Committee [Mr. BABCOCK] sympathizes with the demand for gas at $1 a thousand. I know that he believes that it is a reasonable demand. I think this House should emphasize it, in justice to the people of this District, in justice to the Government, and that if this gas company is to go on with this blackmail it shall do it over the emphasized and repeated protests of this House at least.

Mr. BABCOCK. Mr. Speaker, I desire to say that this House has emphasized its position on this matter for twenty years, and has accomplished nothing, and I believe that unless the House adopts this report the whole legislation will fall, and we shall still pay a dollar and a quarter for gas.

On this question, Mr. Speaker, I ask the previous question.

The previous question was ordered.

The question was taken on agreeing to the conference report; and on a division (demanded by Mr. HEPBURN) there were—ayes 126, noes 29.

Accordingly the conference report was agreed to.

On motion of Mr. BABCOCK, a motion to reconsider the last vote was laid on the table.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 8109) making appropriations for fortifications and other works of defense, for the armament thereof, for the procurement of heavy ordnance for trial and service, and for other purposes.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 7664) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1897, and for other purposes, had further insisted upon its remaining amendments, had agreed to the conference asked for by the House of Representatives; and had appointed Mr. ALLISON, Mr. HALE, and Mr. GORMAN as the conferees on the part of the Senate.

The message also announced that the Senate had agreed to the amendment of the House of Representatives to the bill (S. 819) granting a pension to Catherine Leary.

The message also announced that the Senate had agreed to the amendment of the House of Representatives to the bill (S. 1342) granting an increase of pension to Lena D. Smith.

The message also announced that the Senate had passed without amendment bills of the following titles:

A bill (H. R. 5946) granting an increase of pension to Abraham H. Parker;

A bill (H. R. 6221) granting an increase of pension to Mary E. Chamberlin; and

A bill (H. R. 3582) to remove the charge of desertion now standing against Henry H. Bailey.

The message also announced that the Senate had disagreed to the amendment of the House of Representatives to the bill (S. 1291) granting an increase of pension to Celeste A. Boughton, widow of Bvt. Brig. Gen. Horace Boughton; asked a conference with the House on the disagreeing votes of the two Houses thereon; and had appointed Mr. GALLINGER, Mr. PALMER, and Mr. HANSBROUGH as the conferees on the part of the Senate.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 8293) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1896, and for prior years, and for other purposes, had further insisted upon its amendments numbered 14, 24, 25, 27, 30, 31, 37, 74, 79, 80, 81, 82, 83, 103, 104, 105, 106, 122, 137, 147, 148, 190, 192, 200, 207, and 208, disagreed to by the House of Representatives; had asked a further conference with the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. HALE, Mr. ALLISON, and Mr. COCKRELL as the conferees on the part of the Senate.

ENROLLED BILLS SIGNED.

Mr. HAGER, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles; when the Speaker signed the same:

A bill (S. 3161) amending and extending the provisions of an act of Congress entitled "An act approving, with amendments, the funding act of Arizona," approved June 25, 1890, and the act amendatory thereof and supplemental thereto, approved August 3, 1894;

A bill (S. 807) granting a pension to Charles Williamson;

A bill (S. 997) granting a pension to Ella D. Cross;

A bill (S. 1672) granting a pension to Lue R. Brown;

A bill (S. 819) granting a pension to Catherine Leary;

A bill (S. 148) granting a pension to Catharine Dillon;

A bill (S. 804) granting a pension to Mrs. Eleanor Carroll Poe;

A bill (S. 1247) to establish and provide for the maintenance of a free public library and reading room in the District of Columbia;

A bill (H. R. 3578) granting a pension to Elmira E. Dustin; and

A bill (H. R. 7578) granting the Flagstaff and Canyon Railroad Company right of way for railroad purposes through the Grand Canyon Forest Reserve in northern Arizona.

RETURN OF A BILL FROM THE PRESIDENT.

Mr. BABCOCK. Mr. Speaker, I desire to call up a privileged resolution on the Speaker's desk, with reference to the return of a bill.

The Clerk read as follows:

Resolved by the House of Representatives (the Senate concurring), That the President be requested to return to the House the bill (H. R. 3279) to authorize the reassessment of water-main taxes, and for other purposes.

The resolution was agreed to.

RIVER AND HARBOR APPROPRIATION BILL.

Mr. HOOKER. Mr. Speaker, I am directed by the Committee on Rivers and Harbors to report back the bill (H. R. 7977) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, with the veto message of the President, and the recommendation that the bill pass notwithstanding the disapproval of the Executive. On that, Mr. Speaker, I desire to send up the report of the committee.

The SPEAKER. Does the gentleman desire the report read as a part of his remarks?

Mr. HOOKER. I do.

The Clerk read as follows:

The Committee on Rivers and Harbors, to which was referred House bill 7977, together with the message of the President of the United States, dated May 29, 1896, disapproving the same, have had the same under consideration and beg leave to report the same back with the unanimous recommendation of the committee that said bill do pass, the veto of the President to the contrary notwithstanding.

Your committee feel that they would be remiss in their duty to the House of Representatives if they should fail to make some statement regarding the merits of said bill, and especially as the same may be affected by the criticism thereof contained in the message of the President. It may be well to state at the outset that of the 417 items of appropriations contained in the bill all of them except 27 are for projects contained in river and harbor bills heretofore enacted into law, and which projects now and for some years have been in process of construction and completion by the Government. No new projects were added to the river and harbor bill of 1894. It will thus be seen that the principal work of the Committee on Rivers and Harbors has been the investigation and examination of works of improvement to which Congress has by repeated acts committed itself. The river and harbor bill of 1892 also contained a very limited number of new projects. The river and harbor bill of 1890 appropriated $25,136,295, and placed certain works under the contract

system, which involved the additional expenditure of $15,282,980. It appears, therefore, from this statement that by far the greater number of projects appropriated for in this bill were also appropriated for in the bill of 1890 and which are not yet completed. That bill was referred by President Harrison to Gen. Thomas L. Casey, then Chief of Engineers, who was noted for his rugged honesty, his great executive capacity, and his superb mastery of all matters coming under his supervision, for his opinion as to the merits of the several projects therein contained. After an examination of the bill he reported to President Harrison that only eight items in the bill, in his judgment, seemed to be of limited or local benefit. The gross amount appropriated for these items was $72,500. All other items in that bill were considered by him to be in the interest of commerce. From this it will be seen that by far the larger part of the projects contained in the present bill passed the scrutiny and received the approval of General Casey and have gone unchallenged until now. The bills of 1890 and 1892 were approved by President Harrison, and the bill of 1894 was permitted by the present Executive to become a law by limitation.

The President in his message states:

"Many of the objects for which it appropriates public money are not related to the public welfare, and many of them are palpably for the benefit of limited localities or in aid of individual interests."

Your committee is not advised as to the objects against which this criticism is directed. They can only state that this bill was prepared after a most careful examination of the reports of the engineers and after giving hearings to delegations and others interested in the various projects named in the bill, and they respectfully submit that they were careful to avoid making provision for any objects which were not directly related to the public welfare and in the interests of commerce.

The President also states that—

"On the face of the bill it appears that not a few of these alleged improvements have been so improvidently planned and prosecuted that after an unwise expenditure of millions of dollars new experiments for their accomplishment have been entered upon."

Your committee, in the absence of any direct information upon this point, have concluded that this criticism is based upon a misconception of the language used with regard to quite a number of the projects named in the bill. It has often occurred that after a project had been adopted in accordance with certain defined plans submitted by the engineers the interests of commerce required that a greater and more effective improvement than that first contemplated should be made. In such cases it has long been the custom of Congress, amply justified by results, to order from time to time new surveys and estimates to be made with a view to enlarging the scope of these projects. In making appropriations for these enlarged projects the bill often directs that the money appropriated shall be expended in accordance with the modified or enlarged projects submitted by the engineers. It may be that the President inferred from the language so used that the original plans had been improvident and ill advised and the money expended upon them had been wasted, whereas the truth is that the money expended upon the original plans was judiciously expended and would have been expended even if the modified or enlarged plans had been originally adopted, the work under the original plans being in all cases included in that embraced in the modified plans. Instances of these so-called modified or enlarged projects may be found in the cases of Baltimore Harbor; Portland Harbor, Maine; Newtown Creek, which is a part of New York Harbor; Wilmington, Del.; St. Johns River, Florida; Savannah Harbor, and many others.

The President also states:

"I learn from official sources that there are appropriations contained in the bill to pay for work which private parties have actually agreed with this Government to do in consideration of their occupancy of public property."

When this bill was originally reported your committee were not aware that it contained such appropriations as those described by the President. Since the reception of his message they have reexamined the bill and made diligent inquiry to ascertain if in fact it does contain such appropriations, and they feel justified in asserting and do assert that the information upon which the President bases this charge is wholly without foundation. There is nothing in the reports of the engineers or in any information laid before your committee from any source whatsoever calculated to suggest even a suspicion that any such appropriations as indicated by the President are contained in the bill.

The President states that this bill—

"Directly appropriates or provides for the immediate expenditure of nearly $14,000,000 for river and harbor work."

In so far as this statement is calculated to produce the impression that it is contemplated that the whole amount of cash appropriated by this bill is to be immediately expended it is an error. It is well understood that only one river and harbor bill is passed by each Congress. The cash appropriated therefore by this bill is intended to cover the expense of the prosecution of works named in the bill, except as to those placed under the contract system, for the whole of the two fiscal years ending June 30, 1898. The actual cash appropriation carried by this bill is $12,621,800, which includes the cash appropriation amounting to $2,525,500 for projects placed under the continuous contracts in the bill.

After alluding to the $3,000,000 carried by the sundry civil bill for works heretofore placed under contract the President adds:

"The result is that the contemplated immediate expenditure for the objects mentioned amounts to about $17,000,000."

For the reason already given, it is obvious that this statement is an error. As already stated, $12,621,800 is intended to be expended during the two fiscal years ending June 30, 1898.

The President is also mistaken in his statement that this bill authorizes contracts for river and harbor work amounting to more than $62,000,000. The true amount for which such contracts are authorized is $59,616,404.91.

The President also states in connection with his discussion of these contract works:

"Of the remainder, nearly $20,000,000 will fall due during the fiscal year ending June 30, 1898, and amounts somewhat less in the years immediately succeeding."

This is also an error for the reason that if all the contracts authorized by this bill are promptly entered into by the Secretary of War for the full amounts estimated for the completion of each by the Chief of Engineers the maximum amount that can be expended under the limitations of this bill in any one fiscal year is $16,612,873.91.

The President also says:

"There is no ground to hope that in the face of persistent and growing demands the aggregate of appropriations for the smaller schemes not covered by contracts will be reduced or even remain stationary. For the fiscal year ending June 30, 1898, such appropriations, together with the installments on contracts which will fall due in that year, can hardly be less than $30,000,000."

The President here falls into the error of assuming that there will be another appropriation for the "smaller schemes" not covered by contracts to be expended during the fiscal year ending June 30, 1898. As a matter of fact, the next river and harbor bill, should one be passed, will only cover the cost of prosecuting these smaller works for the two fiscal years ending June 30, 1900, and no additional appropriations for the smaller works will be made for the fiscal year ending June 30, 1898.

The accusation of extravagance in this bill is most effectually disproved by a comparison with the appropriations for river and harbor improvements already made for the six years ending June 30, 1896:

There has been appropriated, commencing with the river and harbor bill of 1890, including $3,000,000 carried in the pending sundry civil bill	$100,200,000.00
Or an average per annum of	16,700,000.00
The amount carried under contract in the present bill, which will be distributed over a period of six years, is	59,616,404.91
Our experience with the contract system in the past, together with positive statements laid before your committee, justify the expectation that these contract works will be completed for at least 30 per cent less than the amount stated, or in round figures, say	42,000,000.00
To this should be added necessary to complete harbor works hitherto undertaken	4,000,000.00
And it is safe to assume that the river and harbor bills which will probably be passed in 1898 and 1900 will each carry not exceeding	10,000,000.00
Add to this cash appropriated in the present bill	12,621,800.00
And it may be estimated that during the ensuing six years there will be expended for river and harbor improvements in all	78,621,800.00
This would involve the expenditure during each of the next six years of	13,100,000.00
As against	16,700,000.00

during each of the past six years. This does not include the item for probable expenditure under condemnation proceedings authorized for dams and locks upon the Monongahela River. This amount can not be definitely stated.

It should be borne in mind that the sum of $59,000,000 and more embraced in these continuous contracts provided for in this bill are the estimates of the engineers upon the old plan of doing the work by piecemeal, and that these estimates were many of them made three, four, five, or more years ago, when the cost of construction was much greater than it is now; that in formulating this bill we have limited in all cases the cost of any projects put upon the continuous-contract plan to the estimates of the engineers, and there is every reason to believe that the experience of the past will be the experience of the future in the saving upon these contracts; and when we say that we believe these contracts will all be completed for $42,000,000 we think we are easily within the range of accurate statement.

Your committee can not too strongly recommend the adoption of the continuing contract system in the prosecution of public works. It has already been tried, and official estimates carefully prepared have shown a saving differing in amount somewhat, but averaging 30 per cent when compared with the estimates furnished by the engineers. So far from this method affording opportunities for the concealment of the magnitude of projects, as would seem to be intimated by the message of the President, we regard it as much more open to examination and to understanding than the old method of making appropriations. Under the method formerly employed appropriations were made from year to year without an adequate understanding as to the ultimate cost of the project. Under the continuing contract system the total cost is stated in each bill and a limit fixed beyond which the officers controlling the work are not allowed to go. On this subject Secretary Lamont, in his last annual report, states:

"The policy some time ago adopted by Congress in respect to certain of the more important river and harbor improvements for which fixed projects have been adopted for the completion of the work results in much economy of money and, what is more important, secures to the country early and appreciable benefits from the expenditures. In the main the objects for which such provision has been made are those which so eminently promote the enlargement of our commerce as to commend themselves to liberal consideration, and the extension of that policy to embrace other worthy improvements is earnestly commended."

Your committee confidently assert that the old system by which appropriations for river and harbor improvements were made biennially resulted in extravagance and waste. The continuing contract system secures more prompt and satisfactory results. It avoids the exasperating delay incident to the old system, provides for the completion of contracts entered into at a greatly diminished cost, and secures the early utilization of useful improvements. This system is a distinctive feature of the present bill, and your committee strongly recommend its continuation.

After a full consideration of the message of the President and a reexamination of the principal features of the bill your committee are satisfied that it should be passed notwithstanding the veto, and that no good reason has been assigned why the House should recede from its action with regard to the bill. It must not be forgotten that if this bill should fail there are hundreds of useful projects of improvement that have been in process of completion for a number of years and against which the most captious critic could urge no objection, which would be suspended, whereby great waste would be incurred and great loss sustained.

Notwithstanding all that has been said against the bill, your committee make bold to assert that if it should become a law it would yield most substantial benefit to the farmers, the producers, the consumers, the merchants, and the business communities of this country and contribute largely to general prosperity.

APPENDIX.

Amounts appropriated in river and harbor appropriation acts, Forty-eighth to Fifty-third Congresses:

Forty-eighth Congress, first session	$13,949,200.00
Forty-ninth Congress, first session	14,473,900.00
Fiftieth Congress, first session	22,397,616.00
Fifty-first Congress, first session	25,136,295.00
Fifty-second Congress, first session	21,154,218.00
Fifty-third Congress, first session	11,643,180.00
Fifty-fourth Congress, pending bill	12,621,800.00

Mr. HOOKER. Mr. Speaker, I move to pass the bill, the objections of the President to the contrary notwithstanding. I desire to say in behalf of the committee that we were of the opinion that the message of the President raised all the possible objections to the bill that could be raised. We have endeavored, in the report which has just been read, to cover every objection which he has raised to the pending measure.

There are a large number of members who have applied to me for time to discuss this measure, and had I yielded to them and allotted to them the time that they have asked, it would consume

two, three, or four days. It has been thought best by the committee, under the circumstances, to submit to the House the question whether or not we desire to engage upon a long and exhaustive debate upon this measure, and for the purpose of testing the sense of the House, without in any manner expressing the views of the committee or myself on the subject, I demand the previous question. [Applause.]

Mr. DOCKERY. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. DOCKERY. I ask the gentleman to yield to me for a moment.

Mr. HOOKER. Regular order!

Mr. DOCKERY. The gentleman agreed with me yesterday that we should have debate upon this bill, and it is unfair, it is unjust, and it is unmanly to pursue this course. [Great confusion on the floor.]

The SPEAKER. The House will please be in order. Gentlemen will take their seats.

Mr. CATCHINGS. The gentleman from New York——

The SPEAKER. The gentleman from Mississippi is not in order. This is a matter for the House to determine. The gentleman from New York [Mr. HOOKER] asks for the previous question. If the previous question is ordered, the House will proceed immediately to vote on the question of reconsideration.

Mr. DOCKERY. Mr. Speaker, will the Chair allow me to ask the gentleman from New York a question?

The SPEAKER. The gentleman demands the regular order. [Cries of "Regular order!"]

Mr. DOCKERY. I desire to say—— [Cries of "Regular order!"] I desire to state that the gentleman had agreed that we should have debate. [Renewed cries of "Regular order!"]

The SPEAKER. The question is on ordering the previous question.

The question was taken; and the Speaker announced that the ayes seemed to have it.

Mr. RICHARDSON and Mr. DOCKERY. Division.

The House divided; and there were—ayes 178, noes 60.

Mr. DOCKERY. The yeas and nays.

The question was taken on ordering the yeas and nays.

The SPEAKER. Forty-six gentlemen have arisen—not a sufficient number [applause]; the yeas and nays are refused, and the previous question is ordered. The question now is: Will the House upon reconsideration agree to pass the bill; and on this question the yeas and nays, by the Constitution, are to be taken.

Mr. DOCKERY. I desire to know whether there will be any debate under the rules on this question of reconsideration?

The SPEAKER. There will not be.

Mr. DOCKERY. Then, on a proposition to reconsider as required by the Constitution, no debate is permitted under the policy pursued by the gentleman from New York.

The SPEAKER. Provided the House of Representatives so vote.

Mr. DOCKERY. And they have so voted——

Mr. HENDERSON. Regular order!

Mr. DOCKERY (continuing). To stifle debate.

The SPEAKER. The Clerk will call the roll.

The question was taken; and there were—yeas 219, nays 61, not voting 74; as follows:

Mr. BAILEY. Mr. Speaker, I am paired with the gentleman from Georgia, Mr. BARTLETT. I desire to withdraw my vote.

Mr. LOUD. Mr. Speaker, I am requested by my colleague, Mr. BOWERS, who is detained at home by illness, to state that if he were present he would vote "nay."

Mr. BARRETT. Mr. Speaker, my colleague. Mr. MORSE, who is unavoidably absent, was very anxious to be paired on this question. I thought I had arranged a pair for him with the gentleman from Vermont, Mr. GROUT, but that gentleman informs me today that he deems it his duty to vote on the bill. It is now too late for me to pair my colleague, and I desire to state that if Mr. MORSE were present he would vote in the affirmative.

Mr. SWANSON. Mr. Speaker, I am paired with the gentleman from Georgia, Mr. CRISP. If he were present he would vote to pass the bill over the veto, while I would sustain the veto.

The following pairs were announced:

Until further notice:

Mr. WOOMER with Mr. RUSSELL of Georgia.

Mr. COUSINS with Mr. LIVINGSTON.

Mr. BOWERS with Mr. MINER of New York.

Mr. SNOVER with Mr. MADDOX.

Mr. CORLISS with Mr. MOSES.

Mr. JOHNSON of Indiana with Mr. COX.

Mr. PICKLER with Mr. MILES.

Mr. MEIKLEJOHN with Mr. CROWLEY.

Mr. FOSS with Mr. MCLAURIN.

Mr. FOOTE with Mr. HUTCHESON.

For this day:

Mr. RANEY with Mr. WHEELER.

Mr. WILLIAM A. STONE with Mr. MCCREARY of Kentucky.

On this question:

Mr. HYDE with Mr. DOWNING.

Mr. ROYSE with Mr. WOODARD.

Mr. SPENCER with Mr. CURTIS of Kansas.

Mr. DRAPER with Mr. LOCKHART.

Mr. COWEN with Mr. WASHINGTON.

Mr. BARTLETT of Georgia with Mr. BAILEY.

Mr. CRISP with Mr. SWANSON.

Mr. MAHON with Mr. OTEY.

Mr. BLACK of New York with Mr. LAWSON.

Mr. STEPHENSON with Mr. MILNES.

Mr. OVERSTREET with Mr. PATTERSON.

Mr. STEELE with Mr. RUSK.

Mr. NEILL, to pass over veto, with Mr. ABBOTT, to sustain veto.

Mr. THOMAS. Mr. Speaker, I desire to say that my colleagues, Mr. CORLISS and Mr. SNOVER, who are unavoidably absent, would have voted for the bill if they had been present.

Mr. ABBOTT. Mr. Speaker, I am paired with the gentleman from Arkansas, Mr. NEILL. I want the RECORD to show that I would vote to sustain the veto, and Mr. NEILL would vote against the veto.

The SPEAKER. On this question the yeas are 220, the nays are 60. [Applause.] Two-thirds having voted in the affirmative, the House determines, upon reconsideration, to pass the bill.

Mr. HOOKER. Mr. Speaker, I desire the present consideration of a resolution which I send to the Clerk's desk to be reported.

The SPEAKER. The gentleman from New York asks unanimous consent for the present consideration of the resolution which will be reported.

The Clerk read as follows:

Resolved, That there be printed, for the use of members of the House, 10,000 copies of the message of the President and the report of the committee on the river and harbor bill.

The SPEAKER. Is there objection to the present consideration of the resolution?

Mr. DOCKERY. Is that privileged?

The SPEAKER. It is not. The Chair asks if there is objection.

Mr. DOCKERY. I will not object.

The SPEAKER. Does the gentleman object?

Mr. DOCKERY. I do not.

Mr. STROWD of North Carolina. I do.

The SPEAKER. Objection is made.

MEMORIAL ASSOCIATION OF THE DISTRICT OF COLUMBIA.

The SPEAKER. Under the act of June 14, 1892, the Chair appoints the following members of the Memorial Association of the District of Columbia: Mr. W. D. Davidge and Mr. A. T. Britton.

CONTESTED-ELECTION CASE—MITCHELL AGAINST WALSH.

Mr. LONG. Mr. Speaker, I call up for consideration the contested-election case of Mitchell against Walsh, and I ask that the resolutions be read.

The Clerk read as follows:

Resolved, That James J. Walsh was not elected a Representative to the Fifty-fourth Congress from the Eighth Congressional district of New York, and is not entitled to his seat.

Resolved, That John Murray Mitchell was elected a Representative to the Fifty-fourth Congress from the Eighth Congressional district of New York, and is entitled to his seat.

Mr. MAGUIRE. I desire to offer a substitute for the resolutions.

The Clerk read as follows:

Resolved, That James J. Walsh was duly elected a Representative in Congress from the Eighth Congressional district of the State of New York at the election held on the 6th day of November, 1894, and is entitled to the seat which he now holds as such Representative.

Mr. LONG. Mr. Speaker, before proceeding with the discussion of this case, I would like to know from the opposite side whether we can agree upon the time at which this debate shall close. Will the gentleman from California [Mr. MAGUIRE] who represents the minority agree that a vote may be had on these resolutions at 4 o'clock?

Mr. MAGUIRE. It is impossible to discuss a case of this kind in one hour on each side—utterly impossible. There is a record of some 1,400 pages and the charges are fraud and bribery. The evidence is voluminous and is largely hearsay. To attempt to discuss it in an hour as it should be discussed before decision would be perfectly idle. I stated to the gentleman from Kansas the other day, when we tried to agree on time, that less than two hours on a side would be unreasonable.

Mr. LONG. Then the gentleman declines to agree?

Mr. MAGUIRE. I can not agree that we shall take the vote at 4 o'clock.

Mr. LONG. I will state to the House that it is the intention of the committee that a vote shall be had on these resolutions before adjournment this evening.

This case, Mr. Speaker, involves the right to the seat from the Eighth Congressional district of the State of New York. James J. Walsh is the sitting member, and has a returned majority of 367. The district is composed of certain election districts in the Second, Third, Seventh, Eighth, Ninth, Tenth, Eleventh, and Twelfth assembly districts of the State of New York. An assembly district is a subdivision of that State which is entitled to a representative in the State assembly, which is the lower branch of the State legislature. This contest is confined to the Second assembly district. There are 34 election districts in the Second assembly district. An election district is the smallest subdivision of the State for election purposes, and corresponds to a precinct in the majority of the States. All these 34 districts were attacked by the contestant for fraud and bribery, but by the report of the committee the controversy relates to but five election districts—the twenty-fifth, thirtieth, thirty-fifth, thirty-sixth, and forty-fourth.

It certainly will be gratifying to the House, after its experience in the contested election case of Johnston *vs.* Stokes, in which the committee that reported that case was divided into four sections, each with different views as to the law and the facts, to be informed that in this case there is no division in the committee as to the law, and but very little controversy as to the facts. The majority of the committee find that an organization to bribe the electors existed in these five election districts. The minority of the committee admit that it existed in one, the forty-fourth, and take issue as to its existence in the other four.

Mr. MAGUIRE. Will the gentleman permit a suggestion?

Mr. LONG. Certainly.

Mr. MAGUIRE. The minority does not concede the existence of fraud in the forty-fourth district, but admits that the failure on the part of the contestee to call one witness (Thomas Dineen) who should have been called leaves unanswered a prima facie showing that some men were bribed to vote the Democratic ticket in that election district, and makes it inexpedient to contest that question here.

Mr. LONG. Very well. Then upon the record and upon the report of the minority, from which I shall read, I will leave it to the House to decide whether or not the minority do concede the existence of this organization in the forty-fourth election district. This is probably the first time, Mr. Speaker, in a contested election case in this House where the views and conclusions of the majority of the committee are fortified and reenforced by the report of the minority, and I will shortly call attention to that report.

This organization that existed in these five districts was known as Tammany Hall. In its inception it appears to have been a charitable institution, but for some years it has neglected its original purpose and design [laughter], has devoted itself exclusively to the management and control of politics in the city of New York, and has interested itself in the success of the Democratic party and its candidates. However, it still appears to be a nonpolitical organization. [Laughter.] This organization, outside of its general officers, had a "leader" in each assembly district and a "captain" in each election district. The leader in the Second assembly district was Patrick Divver. There was a captain in each one of the five election districts in controversy. The election law of the State of New York provided for official ballots, not one official ballot, as in a majority of States, but a number of them. It appears that there were nine official ballots used in the Second assembly district. Under certain regulations any organization might have an official ballot, and Tammany Hall had one, and it was the Democratic ticket from governor down, including contestee for Congress. It may be well to observe that the contestee in this case was a vice-president of the Tammany Hall organization.

Mr. MAGUIRE. Will the gentleman state where that evidence is and what it is?

Mr. LONG. It is in the record.

Mr. WALSH. In what part of the record? Produce it.

Mr. LONG. The gentleman appears to question the finding of the majority in regard to the contestee being a vice-president of Tammany Hall. Do you [Mr. Walsh] deny being a vice-president of that organization?

Mr. WALSH. I do deny being a vice-president of the Tammany organization in 1894.

Mr. LONG. Then you deny the record.

Mr. WALSH. Produce the record. I would be proud to have been a vice-president of that organization at that time, but you can not produce the record to show that I was.

Mr. LONG. I have here the original record in this case. [Exhibiting a large volume.] In it is a book containing the names of the members of the "Democratic-Republican general committee of the city of New York, Tammany Hall, 1894. New York, Tammany Hall Print, 1894."

Mr. WALSH. What month? [Laughter.]

Mr. LONG. Here, on page 4 of this book, I find the name of "James J. Walsh, 27 City Hall," in the list of vice-presidents. Is that your name?

Mr. WALSH. My name is James J. Walsh.

Mr. LONG. Do you reside at 27 City Hall?

Mr. WALSH. I do not.

Mr. LONG. Did you then?

Mr. WALSH. I did, in 1893.

Mr. LONG. In 1894, also?

Mr. WALSH. I did until after the election, when I moved.

Mr. LONG. Then you ceased to be a vice-president before the election came off?

Mr. WALSH. The general committee is elected four months before election. The members of the committee whose names are contained in that book that you have there were elected in 1893, before the election in question. But it is immaterial.

Mr. LONG. Oh, it is?

Mr. WALSH. Yes, entirely so.

Mr. MAGUIRE. Is that all the evidence the gentleman has of the fact?

Mr. LONG. This is the record, showing that the contestee is a vice-president of the organization.

Mr. MAGUIRE. I deny that there is any evidence of that fact. All you have shown is that somebody printed a book containing those names. That is not evidence.

Mr. LONG. This was introduced in evidence by a witness. It is Exhibit L of the contestant's evidence, and it is in this record and unrefuted.

Mr. MAGUIRE. So are several newspaper interviews, but they are not evidence.

Mr. QUIGG. Will the gentleman from Kansas permit a question?

Mr. LONG. Certainly.

Mr. QUIGG. Did the gentleman discover in his investigation of this case that gentlemen in this House connected with Tammany Hall felt themselves humiliated by the representation that they were officials of that body? [Laughter.]

Mr. LONG. Outside of the contestee in this case I have not found it so.

Mr. WALSH. Speaking for myself, I will say that I am proud of my membership in Tammany Hall, and always will be.

Mr. LONG. Yes, but you do not like to be called a vice-president. [Laughter.]

Mr. WALSH. Not when the fact is not so.

Mr. LONG. Now, Mr. Speaker, when I was interrupted I was speaking in regard to the law providing for a number of official ballots. Tammany Hall had an official ballot, which was the Democratic ticket. The law also provided for what is known as a "paster." The voter could take any one of the official ballots and use a paster on it. He could place the paster over the name of any one candidate or over the entire face of any official ballot, and could vote that instead of an official ballot, and could return the unused official ballots to the election officers. The paster might have but one name on it, or the names of all the candidates that were to be voted for at that election.

This nonpolitical organization, this nonpartisan organization (because it is referred to here as the Democratic-Republican organization), this "charitable institution" had a paster, and it was known as the Tammany paster. It was identical with the Democratic ticket, and in these five districts it was used exclusively in the corruption of the voters. This is the way it was done: The Tammany captain had his headquarters near the voting booth. He had his "inside" workers and his "outside" workers. The outside workers brought the voters to his place of business. The voter was there instructed how to prepare his ballot. The instruction consisted in handing him a Tammany Hall paster, and informing him that he could paste that on any official ballot, and he was instructed to do so. He was then taken to the election booth, where he received all of the official ballots. He retired to the election booth and prepared his ballot—placed the Tammany paster over one of the official ballots. It did not make any difference which he got it on. He came out and returned the unused ballots to the election officer. Having voted an official ballot with the Tammany paster on its face, he was then taken to the headquarters, the captain was informed that he was "all right," and he received the money agreed upon in advance—usually a dollar or two dollars.

This was carried on all day in these five election districts under the leadership of Tammany captains. It was done in these five districts principally because in these districts were found many of the lodging houses of New York City. In these lodging houses beds could be obtained at from 10 to 25 cents a night. They were occupied largely by transients who had no fixed abode. These were the places where the Tammany Hall organization did its work. The managers of these houses were generally members of the organization. The clerks took an interest in the registration of the lodgers, and saw on election day that they voted. These lodgers only take an interest in elections when they are paid for it. They have no fixed opinions on political questions, and they vote as they are paid. The only organization that is there to see that they are paid is Tammany Hall.

To show the extent of the vote from these lodging houses it is only necessary to state that in four of these districts, the thirtieth, thirty-fifth, thirty-sixth, and forty-fourth, 837 persons registered from 20 lodging houses. The contestee in these four districts received 582 votes, and 558 voters gave as their places of residence these lodging houses. The committee believe it fair to assume that nearly all of these lodging-house voters voted for the contestee, for the reason that they voted only when purchased and for the reason that his organization was the only one that was there to do the purchasing.

The returned vote of the contestant is not attacked in any particular. There is not a particle of evidence that indicates that the contestant or his political adherents were in any manner connected with obtaining votes by bribery.

A great deal of evidence was introduced by the contestant relative to the manner of carrying on the operations in those five districts. He went down and secured the evidence of the men who were purchased—the evidence of the men who assisted the Tammany Hall workers. They came upon the witness stand and confessed to their own infamy. Their evidence is in the record, and we have referred to a part of it in the report of the committee.

Allow me now to call attention to what the minority report states in relation to one of these districts—the forty-fourth. Remember the evidence in regard to all these districts is similar; it came from the men who were engaged in the proceedings I have described. It was the only kind of evidence that could be produced under the circumstances. Let me read what the minority say in regard to the forty-fourth district; and I wish to call the special attention of the gentleman from California [Mr. MAGUIRE] to the statements in this minority report which warranted me in believing and saying that we did not differ on the evidence in relation to the forty-fourth district. I refer to page 14 of the minority report:

> In the forty-fourth election district there is a prima facie showing of bribery committed by Dineen and Grant and Parmlee in the interest of the Democratic ticket, from which the contestee, if his name was on the Democratic ticket, may have reaped an advantage.

His name was on the Democratic ticket.

Mr. MAGUIRE. It was not. It was on but one official ballot—the Tammany ballot. Your own evidence shows that it was not on the official Democratic ticket.

Mr. LONG. I call the gentleman's attention to page 211 of the record, where the official ballots are printed. There is the Tammany Hall ticket—No. 4 on that page.

Mr. MAGUIRE. Yes; Mr. Walsh's name is on that ticket.

Mr. LONG. The head of that ticket is DAVID B. HILL, for governor; then follows the full Democratic ticket, and down further is, "For Representative in Congress for the Eighth Congressional district, James J. Walsh."

Mr. MAGUIRE. And on page 211, Exhibit E, the New York State Democratic ticket will be found with the name of Congressman omitted.

Mr. LONG. That is not the Democratic ticket of the State of New York. That is the ticket of the New York State Democracy, an organization in opposition to Tammany Hall. [Applause on the Republican side.] But it was not the New York State Democratic ticket, and you know it. The contestee will not dare to stand up in his place and say that he was not the Democratic candidate for Congress in that district. If he does I am willing to yield to him the time to make the declaration now.

Mr. MAGUIRE. We do not propose to try the case here. That proposition belongs to the province of what may be called pettyfogging.

Mr. LONG. If the contestee will stand up in his place and say that he was not the candidate on the Democratic ticket——

Mr. MAGUIRE. I say his name was not on any official ticket that was denominated "Democratic."

Mr. LONG. There is a difference between the New York Democratic ticket and the ticket of the New York State Democracy. The State Democracy is a local organization in the city of New York, and the contestee's name was not on their ticket, although he was indorsed by them. Tammany Hall was the regular Democratic organization in that district, and contestee was the candidate on their ticket for Congress, and he will not deny it.

Mr. MAGUIRE. You are evidently referring to the Democratic State ticket. The official designation of the ticket on which Mr. Walsh's name appears was the "Tammany Hall" ticket.

Mr. LONG. But that was the Democratic ticket, and the gentleman knows it.

Mr. MAGUIRE. It was the Tammany Hall ticket.

Mr. LONG. Was it not the Democratic ticket?

Mr. MAGUIRE. It does not so appear from the evidence. [Derisive laughter on the Republican side.]

Mr. LONG. Of course, the contestee was not on the Democratic State ticket, for he was running for Congress, but he was on the Democratic ticket of the State of New York, the only Democratic ticket there on which his name could be. And it is a strange position for Tammany Hall and their representative here, the gentleman from California in charge of this case, that after all the claims of regularity which they set up in New York at that election they now come in and say that there was not a regular Democratic organization in that district. [Applause on the Republican side.]

Mr. MAGUIRE. The gentleman is mistaken. I do not represent Tammany Hall nor the New York State Democracy on this floor. I am here in a judicial capacity to pass on the question presented here on the evidence submitted; and I say to you that if you unseat Mr. Walsh you will not do so on the evidence in this case.

Mr. LONG. Allow me to call your attention to page 133 of the record.

Mr. MAGUIRE. I will be pleased to examine it.

Mr. LONG. I find this admission on the part of the contestee:

The contestee admits that he resides at No. 27 City Hall Place, in the city of New York, in the Eighth Congressional district.

Contestee admits that he was nominated for Representative in Congress of the Eighth Congressional district at the last election, held November 6, 1894, and was indorsed by what was known as the State Democracy and the Empire State Democracy. All other organizations were opposed to him.

The contestee concedes that the regular Democratic organization is commonly called Tammany Hall.

[Applause.]

There is the record admitted by the contestee himself in the taking of the evidence in this case. I call the attention of the gentleman from California to it.

Mr. HEPBURN. Of course that makes no difference to him. [Laughter.]

Mr. LONG. Of course it makes no difference to him. He will be denying the minority report before we get through with this case. [Laughter.]

Mr. MAGUIRE. I would suggest that I have not yet done so, and there will be time enough to make such prophecies when the gentleman has better grounds on which to proceed.

Mr. LONG. No; you have not yet denied it, but when you deny matters that are clearly in evidence in the record——

Mr. MAGUIRE (interrupting). I do not.

Mr. LONG (continuing). It is to be presumed that before you get through you will be found denying your own minority report.

Now, I return to this report of the minority because, as I before stated, probably this is the first instance in the history of contested election cases where the views of the majority of the committee are reenforced and strengthened by the report of the minority. Let me read again what is said in the minority report relative to the forty-fourth district:

In the forty-fourth election district there is a prima facie showing of bribery committed by Dineen and Grant and Parmlee in the interest of the Democratic ticket, from which the contestee, if his name was on the Democratic ticket, may have reaped an advantage.

His name was there. There is not any question about it. The Dineen here referred to was the Tammany captain of the forty-fourth election district. Here follows a criticism or aspersion on the witnesses. Then follows this:

But if this House of Representatives is disposed to accept such testimony to unseat a member, then by giving credit to it the House may hold that a prima facie case has been made against contestee, so far as the forty-fourth election district is concerned, and, under the rule set forth in Payne on Elections, section 491, cited in the majority report, and which we concede to be correct, namely, "When evidence of bribery by an active supporter of respondent is shown, the court will draw unfavorable conclusions from the neglect or refusal of the person so charged to explain his conduct in the witness box," would justify the exclusion of the vote cast in that precinct from consideration.

I call your attention to the closing part of the report of the minority:

We submit that there is no justification whatever for disregarding or excluding from consideration the votes cast in any of the election districts in question, save and except the votes cast in the forty-fourth election district, and, in our opinion, even votes cast in that district ought not to be thrown out, because, while there is nominally testimony to justify a finding of general bribery in favor of the Democratic ticket, including contestee's office, in that precinct, the testimony is shown by the witnesses themselves to be utterly unworthy of credence and utterly insufficient in point of credibility to justify the making of any finding based upon it. The throwing out of the entire vote cast in that precinct, however, may be conceded, thus reducing contestee's returned plurality from 367 to 255, leaving contestee still elected by a plurality of 255.

There is the position of the minority. They say, "Throw out the forty-fourth district." Why? Because of the bribery that was carried on there by the Tammany Hall captain and his assistants. The majority of the committee go further. They say that it is a reflection upon the ability and shrewdness of the great Tammany Hall organization to say that, while it was interested in electing one of its vice-presidents to Congress, it confined its operations to one little insignificant election district and did not operate in other districts that were near it. For remember that four of these districts, the twenty-fifth, thirtieth, thirty-fifth, and thirty-sixth, are contiguous. They are on the Bowery. The forty-fourth is separated from these districts by a block only, and it is on the Bowery. And these five districts, as I have stated before, take in the lodging houses of the city of New York.

There is no difference, then, between the majority and the minority as to the rule to be followed. There was no evidence introduced which proved that the contestee received bribed votes equal to the number of votes that were returned for him in the forty-fourth district. There was a showing that in that district there existed an organization to bribe, carried on under the leadership of a Tammany Hall captain, and that it was impossible to determine the extent of the bribery or how far it extended, and the committee were of the opinion—and we have followed the precedents in this House—that it was right and proper to exclude the vote of that district from the count, as it was impossible to separate the bribed votes from the legal votes. That was done in the forty-fourth district, and on the same kind of evidence the twenty-fifth, thirtieth, thirty-fifth, and thirty-sixth were excluded by the majority of the committee.

I want to call the attention of this House to the fact that the contestant placed upon the witness stand witnesses to prove the bribery and the existence of this organization to bribe in these five election districts. Remember that the contestee did not go upon the stand and deny these charges. Remember that not a Tammany Hall captain in any election district upon whom the crime of bribery was fixed by the evidence went upon the stand and testified that he was not engaged in corrupting the voters. Remember that from the beginning of this record to the end of it not a particle of evidence was introduced by the contestee to disprove or dispute in any way any of the evidence introduced by the contestant showing that bribery was practiced in these districts by Tammany Hall.

The exclusion of the entire vote of these five districts will elect the contestant by 76 majority. If you adopt the other theory, that only the votes of the contestee should be excluded, there being no evidence of bribery on the part of the contestant, the contestant will be elected by 343 majority.

[Mr. MAGUIRE addressed the House. See Appendix.]

Mr. TAYLER. Mr. Speaker, the judicial posture which the gentleman from California [Mr. MAGUIRE] assumes respecting the right of a member of this House to consider matters of public knowledge is novel, especially coming from that side of the House. I suppose that the gentleman from California ought to be informed of the fact that there is such an organization in the city of New York as Tammany Hall; that it is a political organization, and that it is popularly known to be the place of abode of all the civic virtues. It is the asylum for all retired members of good-government clubs. It is an organization that produced and is about to canonize Dr. Parkhurst; it is the organization that brought out Colonel Strong as a candidate for mayor, and that gave a start, life, and vitality to the committee of one hundred, and it is intended that two great sons of New York shall be lifted up as models to the American generations, and Tammany Hall's representative will be Mr. Patrick Divver.

Now, the gentleman from California insists, with an ignorance that is absolutely appalling, that we have no right to consider facts that are facts within the common knowledge of the people. The fact is that the contestee in this case was the only Democratic candidate for Congress in the Eighth Congressional district of New York. He was the Democratic candidate, and recognized as such. He is here as a Democratic member, proud of his Democracy and of his association with Tammany Hall, and he now and here nods his head in admiring assent to the proposition I have just laid down. The ticket that Tammany Hall gave out was indorsed "Tammany Hall," for there is little of Democracy in the city of New York except Tammany Hall.

I am only going to detain this House a moment. I am going to answer an inquiry that was put by the gentleman from California [Mr. MAGUIRE] to any lawyer in this House. I may truthfully say that I am "any lawyer," even if I am not much of a lawyer. The first proposition that I want to speak about, and that but for a moment, is as to the sufficiency of William A. Hoar as an officer before whom testimony could be taken. I am not going to discuss the question as to whether William A. Hoar was a notary public when these witnesses stood up before him, holding up their hands and swearing before Almighty God that they would tell the truth. It was supposed that Mr. Hoar was a notary. All of the parties to this controversy acted upon the theory that he was a notary. He signed himself as a notary. If he was not a notary, it was the duty of those who now question his notarial capacity to have known it then. They were chargeable with knowledge of the status of William A. Hoar as a notary, and it is now too late for them to object to his capacity to thus act.

Mr. MAGUIRE. Will the gentleman permit a question?

Mr. TAYLER. I would, cheerfully, if I had more than a moment.

Mr. MAGUIRE. I call attention to the fact that I yielded frequently to the gentleman from Kansas and others.

Mr. TAYLER. I will yield to the gentleman.

Mr. MAGUIRE. If Mr. Hoar was not a notary, could the witnesses before him be prosecuted for perjury?

Mr. TAYLER. I am coming right to that. I am not going to dally with the proposition, but will meet it squarely. It is my judgment as a lawyer to the extent which qualifies me to enter into this discussion, that not one of these witnesses who testified before William A. Hoar during the time that he pretended to act as a notary could to-day be prosecuted for perjury. That is merely a personal opinion of mine, but it bears not at all upon the question as to the sufficiency of the testimony for the consideration of this House. And that is precisely the proposition I was coming to. What is this House? It is a body charged by the Constitution with the power to pass upon the elections, qualifications, and returns of its own members. It may determine that question in any way

it sees fit. This House, acting as a House, will look at such facts as come before it. What were the facts? A crowd of witnesses came before one who not only held himself out as a notary public, but whom every party to this controversy, the contestant and the contestee, and the horde of lawyers about them, treated as though he were a notary public. The witnesses held their hands up as solemnly as if the chief justice of the Supreme Court was administering the oath, and took an oath to tell the truth, the whole truth, and nothing but the truth. Therefore, even though a witness does not come here subject to the charge of perjury, he comes here under all the solemnity that the most solemn oath could give his testimony, and therefore, since the witnesses come before this House, testifying, as they believed, under the sanctity of an oath, the testimony comes into this House with a sufficient solemnity to justify this House in considering it.

Mr. DANIELS. If the gentleman will allow me to interrupt him, in the case of the People against Cook, which was reported in 4 Selden, New York, the officers of election were sworn upon a copy of Watts's Hymns, and the court of appeals decided that that would be sufficient to bind them in the discharge of their duties.

Mr. MAGUIRE. But the oath was administered by a person competent to administer oaths.

Mr. DANIELS. Yes; but upon a copy of Watts's Hymns.

Mr. MAGUIRE. In California they can be sworn without any book.

Mr. TAYLER. But I regard that as entirely immaterial. This House is not a court of law created by statute. It is a court that is self-created. It is the product of the Constitution, and in its own way it seeks to do right, and no man can say that for this House to consider this testimony, precisely as if it had been sworn to by one qualified to administer oaths, would be departing one hair's breadth from the path that the House ought to follow, seeking to do justice and to act judicially, as it must act under its constitutional duty. The question here is not as to whether this notary was a notary de facto, with the right to administer oaths. But as I take it, that is a question entirely unimportant. I would rather stand upon the other principle, as sustaining the dignity and the power of this House to take that which came before it with all the solemnity that any testimony could have, and pass upon the question.

But the gentleman says that there is not a word of testimony here showing that these men were Tammany captains, or that these witnesses were bribed, or that they saw anybody bribed, or that, if bribed, they voted for the Democratic ticket, or that Mr. Walsh's name was on it.

Mr. MAGUIRE. There is no evidence that they voted for the contestee.

Mr. TAYLER. I understand Mr. Walsh to admit by the fact that he is here that he ran as a candidate at that election.

Now, I want to give to this House the testimony of one witness, which is merely typical of a vast volume of testimony which leads to the same effect, and speaks respecting all of the five precincts to which we have given consideration. We have examined other branches of the testimony, and we have examined other questions. There were certain technical objections made to certain returns. I imagine that if they had been pressed, or if the committee had been compelled to pass upon them, they would have demanded that we entirely exclude certain returns. But we do not do that. We simply say this: In five precincts in which the majority for Mr. Walsh exceeds his majority in the entire district, an organized system of bribery was carried on in nearly every instance by men who were described and known to be leaders, to be captains of Tammany Hall election districts. These witnesses who testify respecting these various violations of law were not witnesses of the highest character. They came from the gutter. We had to take them from the gutter, and such character as that class of people have must be allowed to them. They came from this eleemosynary institution.

Mr. MAGUIRE. That was at New London—the eleemosynary institution. [Laughter.]

Mr. TAYLER. The New London eleemosynary institution was probably no better than any other. But as to these five precincts the witnesses testified with particularity. They pointed their fingers at a Tammany captain and said: "You bought my vote," or "I saw you buy 5 or 10 or 15 or 20 votes; I saw you give the men pasters and instruct them to vote the Democratic ticket." That specific testimony is given by witnesses as to each one of these five precincts.

Mr. MAGUIRE. I deny that there is any such evidence in the case.

Mr. TAYLER. I can not be interrupted further, Mr. Speaker. I would yield if I had time. The testimony of these witnesses, I say, is as specific as I have stated in relation to these five precincts. Now, I repeat that the character of these witnesses is not of the best. Their testimony is unreliable. They are not witnesses of the most truthful character. But after all, let the House consider that no man lives but can at times tell the truth, and when the meanest and the lowest creature testifies that a certain thing transpired respecting another person, reflecting on that other person, and when that other person, with full opportunity, with every inducement under heaven to deny it, declines to deny it, then I say the testimony of the most unreliable witness is entitled to full credence. Now, that is the case here. Witnesses testify respecting these five precincts. They name the men who bribed the voters. Let me read, as typical of these five and others, this testimony:

Q. Do you know Dan O'Rourke?
A. Yes, sir.
Q. Is he the Tammany captain of that district?
A. Yes, sir.
Q. Did you see him on election day?
A. Yes, sir.

My friend from California [Mr. MAGUIRE] says this witness is a liar, but he is the only man that has ever had the temerity to call him a liar. Why did not Dan O'Rourke call him a liar?

Mr. MAGUIRE. Hermin himself——

Mr. TAYLER. This is not Hermin. This is John Reilly, and Mr. O'Rourke, thus referred to by name and referred to as a Tammany captain, and, as will be seen later on in the testimony of Reilly, charged with doing certain things, never denied this testimony.

Mr. WALSH. Did John Reilly ever sign his testimony?

Mr. TAYLER. I do not care whether John Reilly ever signed his testimony or not. Did Dan O'Rourke ever deny that he had bribed voters?

Mr. WALSH. Why should he deny something that was not sworn to? Reilly never signed his testimony and never swore to it.

Mr. TAYLER. Did O'Rourke know that?

Mr. WALSH. I do not know whether he did or not. He was not there.

Mr. TAYLER. Did you tell him?

Mr. WALSH. No, sir.

Mr. TAYLER. Well, O'Rourke was here charged by a witness who testifies in this case seriously, declaring that O'Rourke did these things, and O'Rourke went away. How far did he go? Did he go to where indictments could not reach him?

Now, Reilly goes on and testifies that he was given Tammany pasters. Let me say here that the Australian ballot exists in New York only in name. There is an official ballot, but there is an unofficial "paster" which can be plastered all over the ballot, so that when a Tammany captain wanted to see that his man voted right he would give him a paster and say to him, "Go to the polls and plaster that on anything you please and that will be a Democratic vote." It was a blanket paster covering everything—all of the candidates. Reilly testifies on this point as follows:

Q. You went in and voted the Democratic paster?
A. Yes, sir.
Q. Did you see O'Rourke after he had voted?
A. Yes, sir.
Q. Did he give you anything?
A. Yes, sir.
Q. What did he give you?
A. One dollar.
Q. Did you see any other men around there on election day that received any money from O'Rourke?
A. Yes, sir.
Q. How many men did you see?
A. Well, there was about fifteen, I would think.
Q. Fifteen men?
A. Yes, sir.
Q. You saw O'Rourke giving them money?
A. Yes.
Q. Had you seen any of these men going into the voting place?
A. Yes, sir.

Now, it is assumed that because, by some technical effort, it is made to appear that Mr. William A. Hoar was not a notary, or because it is said this witness, John Reilly, did not sign his name to the transcript of his testimony, therefore Mr. O'Rourke was not bound to deny this charge thus made under oath. If that gives comfort to gentlemen on the other side, they are welcome to it.

Mr. QUIGG. Let me ask the gentleman how many witnesses of whom Reilly is a type were examined in this case?

Mr. TAYLER. There are two, I believe, cited in the report, and the evidence is multiplied in every precinct. I can not answer the gentleman's question exactly, because I have not analyzed the testimony for the purpose of determining just how many witnesses testified with respect to each precinct. But the important thing is this: We have got in this record all that a court or a jury would need for the purpose of coming to the conclusion that bribery was carried on in these five precincts to such an extent as to invalidate the returns from them, because it is brought home to the parties themselves. Every one of the parties charged had an opportunity to testify. Not one of them was even called as a witness. Not one of them even undertook to shield himself behind his privilege on the ground that this testimony might tend to criminate him. Not an excuse was offered why these persons

should not testify, except, perhaps, in the case of Dineen, who was under indictment.

The failure of these persons to speak when they ought to have spoken is affirmative testimony supporting contestant's witnesses. Any cloud on the veracity of contestant's witnesses was dispelled by the silence of these Tammany captains. Not an excuse is offered why these people should not testify, except that Dineen was then under indictment and others were not. Let me say that as to the forty-fourth precinct, where Dineen was the Tammany captain, the evidence is absolutely overwhelming; there is a vast cloud of testimony upon the proposition that Dineen was there bribing witnesses, and also as to the other four. But the report of the minority admits our contention respecting the forty-fourth precinct, and therefore we have given it no attention.

But it must be borne in mind that these other four precincts were in the immediate vicinity of the forty-fourth precinct, and were themselves contiguous. Those four precincts besides the forty-fourth did not cover the area of half of this Capitol square, and the same means which were resorted to in one were resorted to in the others. They were all down on the Bowery, where "they say such things and they do such things" on election day. [Laughter.]

As I said, there is a certain probative force in any man's declaration, however slight may be his means of information, however reckless may be his manner of statement, or however vile may be his character, when set up against the statement of a truthful man; and whenever a man in whom we have not the highest confidence makes a statement we are apt to discount the value of his statement, not because he is intrinsically not entitled to credence, but because we discount in advance the denial of the party who is charged with some impropriety by him. But these witnesses who testify were at least of as high character as the Tammany captains themselves; and they testify here that they were bribed, that they were offered bribes, that they saw bribes given. And no Tammany captain thus specifically charged with committing this crime had the courage to come and testify, or was even called and asked to testify by the contestee in this case.

So I say, Mr. Speaker, that if there were nothing in this case but the testimony of men whose character was such that you would not take their statement against the statement of anybody else, yet when they themselves under the supposed solemnity of an oath swear to a certain fact, and the people concerning whom they testify do not come forward and deny it, it makes a case that is absolutely complete, both in philosophy and in law and in the common sense of life, which would compel this House to say that this contestee must be unseated.

Mr. QUIGG. I should like to ask the gentleman a question or two, simply to identify this election. The election was in 1894, and there was elected in the city of New York at that time a mayor, was there?

Mr. TAYLER. Yes, sir.

Mr. QUIGG. This election was the one held immediately after the Lexow investigation?

Mr. TAYLER. Precisely.

Mr. QUIGG. And it was the election at which Tammany Hall was defeated and Colonel Strong elected mayor?

Mr. TAYLER. Yes, sir. I might add that this election showed Tammany Hall at the nadir of its power, because there was at that time an honest board of elections, or one supposed to be such, in each election district; and therefore Tammany Hall—I trust I may be pardoned for making so offensive a use of that name—Tammany was compelled, in order to carry those elections in the lower districts, to resort to bribery and the use of pasters, for it could no longer stuff ballot boxes or use the judges of the election.

Mr. QUIGG. And the five contiguous election districts which have been described in this case were in a down-town assembly district, and these five election districts contained a number of lodging houses, as I understand?

Mr. TAYLER. A large number—far more lodging houses than any other quarter of the city of the same size. The center of the four districts other than the forty-fourth is the Five Points of New York, in the neighborhood of Chatham Square.

Mr. SULZER addressed the Chair.

The SPEAKER pro tempore (Mr. GROSVENOR). For what purpose does the gentleman rise?

Mr. SULZER. I ask for recognition.

The SPEAKER pro tempore. The gentleman will proceed.

Mr. SULZER. Mr. Speaker, in discussing this case I do not desire to go beyond the record. I have no disposition to discuss the local politics of New York City other than as they may apply to the case. In my judgment there are only two questions in this case which should be considered by the members of this House, and I will confine myself to a discussion of those two questions.

At the election held in the city of New York in 1894 Mr. Walsh was the candidate of the Democratic party and Mr. Mitchell was the candidate of the Republican party in the Eighth Congressional district of the State of New York. I know something about that election; I know something about the politics of New York city; and I stand here and say—and I defy any New York representative to successfully contradict me—that the election in New York City of 1894 was as honest and as fair an election as ever was held in this country. It was so admitted at the time by the candidates and the representatives of all parties. No charge was made of fraud, bribery, intimidation, or corruption.

In that election Mr. Walsh received 9,466 votes; Mr. Mitchell received 9,099 votes, giving Mr. Walsh a very clear and decisive majority. No one doubted the election of Mr. Walsh the morning after the election. There was not a Republican newspaper in the city of New York that challenged the validity of his election when the votes were counted. This contestant did not challenge the honesty of that election at the time, and he did not begin the contest until the day before the expiration of the time under the statute. At first he seems to have been satisfied he was not elected. What finally induced him to institute this proceeding does not appear in the record, but no one can doubt that it was an afterthought, and prompted by the hope that a Republican House would give him the seat on the slightest pretext. So the contest was begun. How the alleged testimony in the case was procured I will discuss later on.

Just a word or two at this time in regard to the way in which elections are held in the city of New York. No man can vote in New York City until he has registered. He has got to register according to law. That registration law compels the elector on one of four several days, either one of which he may choose, to go to the designated voting place in the election district in which he lives and have his name written on the registry books. There is no question in this case regarding the honesty of the registration. The registration was fair; it was honest; it was correct and according to law. No claim is made, I believe, that it was otherwise. So much for the registration.

Now, in regard to the election. I was amused by hearing the gentleman from Kansas [Mr. LONG] tell all he knew, or rather all he did not know, about Tammany Hall. He said that Mr. Walsh was the regular Democratic nominee of Tammany Hall; that he was the vice-president of Tammany Hall. He seemed inclined to rest his case on those two allegations, and on them demand Mr. Walsh's seat. Well, suppose Mr. Walsh was the regular Democratic nominee. Suppose he was the vice-president of Tammany Hall. Does that make any difference? That is quibbling, is it not? Let us be fair and honest. It makes no difference what organization nominated you; it makes no difference what party you belong to; it makes no difference what your political affiliations may be, if you get a majority of the votes in your Congressional district and the election was fair and honest under the law and under the Constitution, you are entitled to a seat in this House. That is the position of Mr. Walsh; that is what I claim, and it is on that line that I intend to argue the question presented here to-day by the record in this case. If I can not convince any fair-minded and honest Representative here that Mr. Walsh was duly elected and is entitled to retain his seat, then I am inclined to believe that this is no longer a representative body, where election cases and questions are decided according to law and according to the facts, but rather according to politics. Then you are going to unseat Mr. Walsh, not because he was not honestly elected, not because he is not entitled to the seat he now occupies, but because, forsooth, he is a Democrat and the man who wants his seat is a Republican.

Mr. Speaker, I know something about Mr. Walsh's district. It adjoins mine. Part of this Congressional district involved in the pending controversy I had the honor to represent five times in the legislature of the State of New York. Many of the persons mentioned in the record I know. Let us see how this district went. That was a peculiar election, if you remember aright—one of the most peculiar elections ever held in this country. It was a tidal wave against the Democracy. Districts that had always been Democratic before went Republican. The State of New York went Republican that year; New York City elected a Republican mayor that year. There are men here to-day sitting in this House who were elected Republican members from strong Democratic districts, districts that were overwhelmingly Democratic, districts that had always been Democratic, and districts that will be Democratic next fall.

In that election there is no question about the honesty of the registration, as I have already shown. There can be no question about the counting of the votes. The Republican party was represented equally with the Democratic party on the boards of registration; the Republican party was represented equally with the Democratic party on the day of election in the voting booths; the Republican party was represented equally with the Democratic party after the polls were closed and the vote counted; and after that vote had been fairly, honestly, and legally counted the returns were signed by the Republicans and Democrats and were sent to the police commissioners, to the county clerk, and to the clerk of the board of aldermen. These returns showed Mr. Walsh

duly elected. The board of aldermen, according to the law of the State of New York, is the board of county canvassers. They canvass the votes and declare the result of the election.

That board canvassed the vote, went over every figure, line upon line, and declared Mr. Walsh elected. The State board of canvassers subsequently canvassed the same vote in the same way and declared the same result. The State board of canvassers was a Republican board, every one a Republican, and that board gave the certificate of election to James J. Walsh, and if you take away his seat you override that Republican board of State canvassers and reverse the decision of the Republican county board of canvassers, and you deprive the people of the Eighth Congressional district of their chosen Representative. There was no doubt when this canvass was made regarding the election of Mr. Walsh. No one appeared before these boards of canvassers and contested the validity of his election. No one appeared for the contestant and claimed his election. At that time every Republican on these boards conceded and declared officially that Mr. Walsh was duly, fairly, and honestly elected; but the day before the time expired under the Federal statute for the contestant to file the notice of contest he did so.

Now, I submit to you, as men of logical minds, as men of intelligence, if the contestant thought that he was so surely elected, why did he not make a contest before the county board of canvassers? Or why did he not file his protest before the State board of canvassers? But no; he never claimed in any way whatever in any newspaper, before any of these boards, or to a single human being that I know of, that he, the contestant, was elected or claimed he was elected. This contest was an afterthought. So much for that. Now let us see what there is in the record. As I said, there are only two points in this case. The two points are in regard to the validity of the testimony taken and in regard to the character of that testimony. One is a question of law; the other is a question of fact. Both points should be determined in favor of the contestee.

Let me discuss the legal aspect of the case briefly. The eloquent presentation of that part of the case by the distinguished gentleman from California [Mr. MAGUIRE] is unanswerable and conclusive. I claim as a matter of law, and it is conceded by the committee, that part of the testimony taken in this case by the contestant is entitled to no credence, is irregular, and should be stricken from the record. It is invalid, and it was, in my judgment, the duty of the committee to throw out that testimony. That testimony was taken before a man named Hoar who was not a notary public. He claimed to be a notary public, but by reason of his removal from Kings County to New York County he vacated his office. This is admitted by all. Every bit of that testimony should be expunged from the record. The gentleman from Ohio [Mr. TAYLER], in his remarks, conceded and admitted that Mr. Hoar, when he took this testimony, was not a notary. He practically admitted that no witness who appeared before Mr. Hoar and was sworn could be indicted for perjury if he swore falsely. That is undoubtedly so, and there can be no question about it. The committee in its majority report, conceding that this man was not a notary under the law, conceding that he had no right to take this testimony, conceding that this testimony could not be used in a case under that exception in any court of record in any State in this Union, conceding that no witness who testified before that notary, if he swore falsely, could be indicted and convicted of perjury, says this:

The Revised Statutes of the United States, section 110, provides that the contestant may apply for a subpœna to any notary public—among others—who may reside in the Congressional district in which the contested election was held.

It is provided, in section 120, that all witnesses who attend the examination shall be examined under oath.

It appears that William A. Hoar was, in 1893, a resident of Kings County, N. Y., and, as a resident of that county, was appointed a notary public.

The statutes of New York provide that a notary public, appointed for the county of Kings—as well as for some other counties—upon filing a certified copy of his appointment, etc., in the clerk's office of New York County, may exercise all the functions of his office in that county, as well as in the "county in which he resides and for which he was appointed." In compliance with this provision, Hoar filed a certified copy of his appointment in the clerk's office of New York County.

Prior to the taking of testimony in this case Hoar removed from Kings County and took up his residence in the Congressional district in which this contested election was held, which is in the city and county of New York.

The statute of New York, section 20, chapter 681, laws of 1892, provides, among other things, that an office shall be vacant when an incumbent, if he is a local officer, ceases to be an inhabitant of the political subdivision of which he is required to be a resident when chosen. The courts of New York have held that a notary public is an officer within the meaning of the statute.

The contestee made no claim as to any infirmity in Hoar as a notary public, or as to any want of validity in his acts as such, until after the taking of contestant's testimony in chief was completed.

The several notices to take testimony served upon the contestee described Hoar as a resident of the Eighth Congressional district of New York, while the transcripts of testimony, copies of which were from time to time served on the contestee, described Hoar as a "notary public of Kings County, certificate filed in New York County."

When Hoar commenced taking testimony in rebuttal objection was made on the ground that he was not a notary with power to administer oaths.

We are of opinion that the testimony taken before William A. Hoar ought to be considered by the committee and the House, for the reasons following:

1. Because it is too late for the contestee to be permitted to object on this ground. He knew, or, what is the same in legal effect, he was charged with knowledge of the fact as to whether Hoar was a notary authorized to administer oaths. He knew that the notary was described, in the notice, as residing in the Eighth Congressional district, and in his signatures to the transcript of testimony, as notary of Kings County, with certificate filed in New York County. To say the least, he was put upon inquiry.

The contestee is in the same position as if he and the contestant had agreed that the testimony might be taken before a person who was not, by any law, authorized to administer oaths. It is true that such an agreement might not be recognized by the House of Representatives. It might abrogate that, as it might any other agreement between parties. But it does not lie in the mouth of either party who has, either in fact or constructively, so agreed, to object to the validity of testimony so taken.

That is ridiculous. It is a well-settled proposition of law known to every lawyer in this House that on the taking of depositions before an officer authorized to take them, if you fail to object at the time of the taking of the testimony you have a right to object in court when the testimony is offered in evidence.

If this testimony were offered in a court of justice under an objection it would be excluded. We should exclude it here. Do so and the contestant has not a leg to stand on. Do so and Mr. Walsh retains his seat.

The committee say that the contestee was at least put upon inquiry. The contestee could not be put upon inquiry in a matter of this kind. How could he know? How could he find out? The man claimed to be a notary. He was held out to be a notary by the contestant. He was sitting there in a quasi judicial capacity, and it was not for the contestee to ascertain whether he was the proper officer to take this testimony or not, but it was the duty of the contestant to know that he was the proper officer, and if he was not the contestant must suffer the consequences.

Throw out that testimony taken before that notary, and the case of the contestant falls to the ground. He has no standing in court. And remember, if you follow the two reports, the report of the minority and the report of the majority, you can honestly and consistently throw out all of this testimony, because btoh concede that he had no right to take it, that he was not a notary, and that the testimony was not taken according to the statutes of the United States. This testimony should be excluded, and we should vote to retain Mr. Walsh in his seat.

Now, in regard to the second proposition—the question of fact. I suppose there is not a member of this House whose seat would be safe if some few tramps in his Congressional district should come forward and swear, to hearsay testimony, that there had been bribery in his Congressional district. Take this hearsay testimony as it appears in the record. If the members of this House will read the testimony and decide this case as a jury would decide a case of fact submitted to it in a court of justice, Mr. Walsh will keep his seat. The witnesses who testified for the contestant are not entitled to belief. If you could see them that would be enough to discredit them. They were from the cheap lodging houses of the Bowery, men without honor or homes, outcasts of humanity, drunkards; men with several names, bums, the scum of the earth, the worst people you could pick up anywhere in the United States from one end to the other; men who gravitate to the Bowery; men who have no homes, no local habitation; men who live in lodging houses where they only pay 5, 10, or 15 cents a night for lodging, and when they have not that to pay they sleep on the benches in the parks.

These are the kind of witnesses that the contestant has brought before this alleged notary to prove his case. Read the character of these men, read their antecedents, read how the contestant got them. If you are honest, if you are fair, and if you are not going to decide this case on account of politics, you will keep out of Congress the man who procured these witnesses and relies on their testimony and you will allow Mr. Walsh to remain in his seat. The contestant has failed to prove his case. No fair man who will examine the case can possibly doubt it. If you unseat a man on this kind of perjured testimony no man's seat is safe.

How did the contestant get these witnesses? The gentleman from Kansas [Mr. LONG] does not know. The gentleman from Ohio [Mr. TAYLER] does not know. The members from New York know how he got them, and how anybody could get them, under the same or similar circumstances. Get a lawyer who has not very many scruples. Have him pay these poor creatures, feed them, get them drunk, and tell them what to testify to, and they will do it. That was what was done in this case. That is how this testimony was procured. The contestant's lawyer went to these men, he intoxicated them, he gave them money, he gave them clothes, he took them up to Connecticut and kept them in a hotel up there and fed them, gave them all they could drink, did all of these mean, contemptible things, which in my judgment—and I say it deliberately—are just as much bribery as if he had paid them so much money to go on the stand before this alleged notary and swear to what he told them to swear to. Let me give you a few samples of this testimony:

It appears that Morris, Nathan, Fitzpatrick, and others in the employ of Rawson, who was the attorney for contestant in this case, went about the Bowery scouring it for witnesses who were willing to testify that they themselves had sold their votes on election day, and had seen others sell their votes on that day, at from $1 to $2 apiece; that inducements were offered to those

vote sellers in the way of board and lodging and beer and money (page 535) to give affidavits and testimony in support of contestant's charges in this case; that these witnesses were herded by agents of contestant in various places; that they were boarded and lodged at the expense of contestant for a considerable period before giving their testimony. (See record, pages 534 to 541, 546 to 548, 549 to 569, 512 to 514, 525 to 530. See also the extraordinary questions asked by Mr. Rawson himself of the witness Fitzpatrick, on page 541.)

"Q. (By Mr. RAWSON.) Didn't I very often trust you to give the men (witnesses) a few dollars here and there?

"A. That is right.

"Q. Didn't I place every confidence in you?

"A. That is proper.

* * * * * * *

"Q. Did you see any of the witnesses get drunk in our office?

"A. I never seen them get drunk because it was always in the other room. I never seen anybody get full there.

"Q. Wasn't the beer given to them with the lunch now and then?

"A. I know there was plenty of beer given to them.

"Q. You didn't take any that time yourself at all?

"A. Oh, yes; I did. I didn't take any when I first started in.

"Q. Afterwards you had some?

"A. Yes, sir; everybody had some.

"Q. And cigars?

"A. Oh, yes.

* * * * * * *

"Q. You were never promised anything for trying to get Mr. Bobolsky or Mr. Bernstein or Mr. Nathan away from us?

"A. No, sir; not a cent.

"Q. Nor attempted it?

"A. No; I did not promise them anything. They were always, week after week, hanging after me.

"Q. Did you ever tell them if they came up and worked for the other side there would be a good deal more in it for them?

"A. No, sir; I never told them that. I never seen these people."

The extraordinary thing about these questions is that they should have been asked by Mr. Rawson himself of one of the agents who had been in his employ and under his direction during a large portion of the period covered by the contest. It reveals the legal methods pursued by Mr. Rawson in the contest as hardly any other showing could reveal them. It may be urged that as the events concerning which contestant was obliged to produce testimony occurred in the Bowery region of New York, that he was obliged to rely upon the testimony of such people as usually frequent that quarter, and upon the methods which alone can procure either the testimony or the votes of such people, but that explanation can not establish the credit of such witnesses testifying under such circumstances, nor justify this Congress or any court or tribunal on earth in determining any great question of right upon such utterly disreputable and unworthy testimony.

Here is another piece of testimony, given by a Mr. Hermin (see pages 549 and 550 of the record):

I was picked up by a man named Nathan. Asked me to come and have a drink. We had several drinks and he brought me down and said, "If you come down here you will make all kinds of money. Come down to 44 Pine street—to Rawson's office, attorney for John Murray Mitchell." Had several drinks before I went there. Half drunk when I got there. I had a bottle of beer in the office of Mr. Rawson. * * * Nathan said that I could make $10 to $50 and a suit of clothes out of it before the thing got through. Nathan paid for my lodging that night. We had several drinks together; went to bed pretty well drunk. Saw him next morning. Had drinks with him. He brought me down to Rawson's office. He called me one side and asked me, "Don't you want to go up to New London?" Saw Nathan following day. Took me down to Rawson's office. Said when he left, "I guess I will take care of you again to-night." He showed me a two-dollar bill and a one. Saw him next morning. Went again to Rawson's office. Had several drinks on the way down. I had a bottle of whisky in my pocket when I got to Rawson's office. Nathan bought it for me at No. 9 Bowery. And when I went into the office I was pretty well full; and in that condition I gave my testimony. After that I went to New London; four men with me—McDonald, Bernstein, Paddy Ryan, and another. Saw Mr. Mitchell when I came down. He treated me to a couple of whiskies and one cigar, three rounds. I received a dollar that night from Mr. Corcoran, a witness in this case. The following Sunday Corcoran gave three of us a half dollar apiece to come down the following Wednesday. Went down the following Wednesday. Bernstein gave me half a dollar. I had a couple of drinks before I signed my testimony—Bernstein and I. At New London I stopped at the Hoffman House with a man named Ryan—Lynch, Bernstein, McDonald, and myself. We were all pretty well drunk up there.

I saw plenty of beer in Mr. Rawson's office. We had all we wanted to drink at New London. I did not pay a cent for it. Mr. Rawson's agents paid for it. I do not know what ticket I voted election day. I was too drunk. I don't know whether I voted at all.

That is the kind of testimony on which the contestant relies. This man Rawson—and if you will read the testimony you will see what kind of a man he is—gathered up these tramps, this miserable scum of humanity. He took them to Connecticut to a nice hotel, with beautiful rooms. Why, they had not had such a good time in years, not since their earlier days, when they first began to go wrong and journey down the broad highway that leads to ruin and destruction. Oh, what a sight that was for representative government! How insecure every man's seat on the floor of this House would be if those things were resorted to by every contestant. He took these witnesses to Connecticut, paid their fare from New York, got them into a nice hotel owned by the contestant's lawyer. There he got them drunk, so they did not know anything. He gave them everything they wanted to eat and drink. He admits that he gave them money. And after he got them in a receptive mood—to use a very gentle phrase—he no doubt intimated to them what to swear to when they went on the stand before this alleged notary.

Accept this kind of testimony under all the surrounding circumstances, and you will establish a precedent that will rise up frequently in the future to plague and harass you.

The way this testimony was procured and the nature of it is, to say the least, discreditable to the agents of the contestant. We should not take away a man's seat on such flimsy statements.

We should not mince words in denouncing this kind of testimony. It is best to be honest and aboveboard. You all know I am telling the truth, and if I am not strictly according to the printed record of the case I want some member who seeks to take away Mr. Walsh's seat to get up and say so. I pause for an answer. You have made aspersions, gentlemen, all outside of the the record, however, but you can not asperse my colleague's character; you can not show by any testimony in the record that he did anything wrong or discreditable in the whole case.

You can not show that he did anything wrong at the election, but I regret that the same can not be said for the agents of the contestant. I refer to the way in which he got this testimony. These witnesses came down from that hotel in Connecticut after they had been fed, wined, clothed, given everything they wanted; and they went on the stand and testified to what? I have not time to read their testimony in detail. I wish I had. If I had the time to read this testimony before the members of this House, there is not an honest man here whose cheek would not flush with mad indignation. These poor wretches, outcasts of humanity, men who would testify to almost anything and for anybody, provided you treated them well and paid them for it—these men came down to the office of the contestant's lawyer, where this testimony was to be taken, and there they had 600 bottles of beer!

No witness testified there who was not under the influence of liquor; no witness testified who would be believed in any court; no witness testified who was not a disgrace to civilization. If you could see them and hear them you would not believe them; and if you will read the testimony of these men in the record I am satisfied you will not believe it even in its printed form. They told of the way they had been induced to give their testimony. And what did they say—all hearsay, all hearsay; nothing direct, nothing positive. All, with the exception, I believe, of three or four witnesses in this case, testified to matters of hearsay. All of them when they were put on the stand afterwards in a criminal trial refused to testify to what they had testified to in this record. You will remember it has been said that Mr. Dineen, one of the election district captains, was indicted for bribery on the testimony given by these three witnesses on their examination in this case.

These witnesses went before the grand jury and the grand jury found an indictment. Mr. Dineen was subsequently tried on that indictment. The jury saw these men and heard them testify. These witnesses did not testify on the trial against Mr. Dineen as they testified in this case. They could not identify him; they refused to say that he was the man they had referred to; they went back on their previous testimony, and the jury without leaving their seats acquitted Mr. Dineen. That is the whole story. Those are the facts. That is the kind of case you have. That is all you have got to support your case. Do you want to take away my colleague's seat upon such a state of facts and on the testimony of such witnesses? I hope not; I trust not. Remember the precedent you establish here will frequently rise to taunt you, and, like Banquo's ghost, it will not down. Mr. Walsh was fairly and honestly elected, and should retain his seat. As he desires to speak in his own behalf, I take great pleasure in yielding to him the balance of my time.

Mr. WALSH rose.

The SPEAKER pro tempore (Mr. GROSVENOR). The gentleman is recognized for the remaining time of the gentleman from New York, Mr. SULZER.

Mr. WALSH. How much time is that, Mr. Speaker?

The SPEAKER pro tempore. Twenty minutes.

Mr. WALSH. Am I not entitled to one hour in my own right?

The SPEAKER pro tempore. Not at this time.

Mr. WALSH. I ask for recognition in my own right.

Mr. SULZER. Mr. Speaker, as I understood it, I was entitled to one hour's time.

The SPEAKER pro tempore. That is correct.

Mr. SULZER. And my friend and colleague on the committee, Mr. MAGUIRE, suggested that I turn over the balance of my time to my colleague from New York, Mr. WALSH.

The SPEAKER pro tempore. The Chair has recognized the gentleman's right to yield his time to his colleague.

Mr. SULZER. Now, as my colleague is to be given an hour in his own right, I would like to conclude my argument.

The SPEAKER pro tempore. The gentleman from New York, Mr. WALSH, has been recognized for the remaining time of his colleague from New York, Mr. SULZER, so that the latter gentleman has no time left.

Mr. WALSH. Mr. Speaker, I recognize the delicate situation in which any man is placed who stands in a body of this kind to argue his own case, and I would be very diffident about accepting the responsibility were it not for the fact that some statements in the majority report which have not yet been referred to by the

gentlemen who have argued the case on the other side are made to reflect personally on me. It is therein stated that I threw every obstacle in the way of the contestant procuring his evidence. That statement is not justified by a single line of testimony in the record, yet it was made as boldly as any other finding in the majority report. But, Mr. Speaker, I will not stop to waste time upon personal matters, when we are all so much concerned in the rights of a member to his seat. I appeal to you as a judicial tribunal to determine this question. If it is determined after just consideration adversely to me, I promise you that no one will be less complaining than I, because I would not voluntarily occupy for one moment a seat that did not belong to me by the right of the vote of the people.

In 1894, in the State of New York, we had one of the most important elections that ever took place in that State. On the Republican ticket was Governor Morton, whose election meant that he would probably be the candidate of his party in that State for the Presidency of the United States. On the Democratic side the candidate was DAVID B. HILL, whose election at that time almost certainly meant that he would be the candidate of his State, if not of his national party, for President of the United States. The parties were deeply interested in those elections. Congressional fights were forgotten. The main bent of all the parties in that State that year was toward the election of the Democratic or the Republican State ticket. In the city of New York we had a contest the like of which had not been seen in forty years.

William L. Strong was the candidate for mayor of that city; and it was whispered about at that time that his election as mayor was one stroke toward the nomination of McKinley for President of the United States. Against him the forces on the other side were arrayed behind Hugh J. Grant; and the winning of that election determined for at least five or six years to come who should control the vast patronage in the city of New York. Yet this committee would have you find that the Democratic party turned aside from these great questions, from these important matters, to bribe a few voters in the lodging houses in one Congressional district to vote for a Representative of humble capacity who they could not believe could help them much in this representative body; that neglecting the candidacy of Morton and HILL, the candidacy of Strong against Grant; neglecting the canvass of CUMMINGS, one of our colleagues on this floor, who was running that year against Mr. Shannon, and who had rendered valuable services to his party on this floor; neglecting the canvass of Mr. BARTLETT, who had been a useful member of this House; neglecting the canvass of Sickles and of every important candidate for Congress, they turned in to bribe voters for me at that election. That is the position of the majority of the committee.

Mr. QUIGG. Will my colleague yield a moment?

Mr. WALSH. I have not much time.

Mr. QUIGG. I will ask only one question.

Mr. WALSH. Certainly.

Mr. SULZER. Will the gentleman agree to extend the time of the contestee?

Mr. QUIGG. Of course I would be delighted to do so.

Mr. SULZER. I suppose that everybody on your side will agree to the same thing.

Mr. QUIGG. There is a single question which I would like the contestee to answer, and I tell him frankly that his answer will control my vote. If there was bribery done in the interest of the Democratic ticket in that election district, was not the gentleman the beneficiary of it just as much as any other candidate on that ticket?

Mr. WALSH. No; and I will tell the gentleman why. I was nominated by the Tammany Hall Democracy. I am a Tammany Hall man yet. But my colleague [Mr. QUIGG] asked the question of a gentleman heretofore occupying the floor: Was not Tammany Hall a part of the regular State Democratic organization? I state frankly that it has been so recognized in State conventions. But there is another organization there which claims to be regular and which also nominated me; and my name should have gone on the official ballots of that organization. The gentleman knows as well as I do there should have been two official ballots for every voter who was registered; 46,000 official ballots should have been at the polls, so that the voters of that organization might be able to select their ballot from those official ballots and to vote for me if they desired to do so. Those 46,000 ballots were sent to the polls and not a single ballot contained my name. Yet the majority of this committee would have you believe that I was not elected and that my opponent was elected by only 76 majority.

How much was I hurt by the failure to produce those 46,000 ballots at the polls? Was I hurt 76 votes? There were 675 blank votes cast at that election. How many of those were State Democratic ballots? Why was not my name on them? I had complied with every requirement of the law; the record shows that; it is conceded that I was the State Democratic candidate, and my name should have been on those ballots. Yet 46,000 of them were sent to the polls, and my name not on a single ballot; and that according to the contestant's testimony—not mine.

Mr. QUIGG. That was the State Democratic ticket, I understand?

Mr. WALSH. Well, as much the State Democratic ticket as any other.

Mr. QUIGG. But on the Tammany ticket—the regular ticket—your name appeared?

Mr. WALSH. On the Tammany ticket my name appeared.

Mr. QUIGG. The regular ticket?

Mr. WALSH. Do you want me to decide which is the regular Democracy?

But, gentlemen, I do not want you to take my word as to the condition of things at that election. I hold in my hand the report of the Lexow committee which was sitting in New York at that time—the committee that investigated the election and the police department as thoroughly as any committee could. Remember, it is complained here that my majority was abnormally large in the second district, because I received a majority of 1,675 votes over Mitchell. Why, sir, the year before the Democratic majority was 9,900. It is claimed that fraud was committed in the forty-fourth election district of the Second assembly district because these scamps come forward and testify that they heard other people say that they had received money for voting. The truth is that Mr. Mitchell ran 17 votes ahead of the vote for the Republican governor in that district, and 17, 18, or 20 votes ahead of every other Republican candidate in that district. And that is the district where I am charged, and my party is charged, with fraud by the majority of this committee. But I ask you to consider this Lexow report for a little while. They allude in this citation which I will make to the election of 1893 as compared with the election of 1894, as being far less important than the election of 1894. They say that in 1893 there was only a judge of the court of appeals to be elected, while in 1894 there was the governor and many other important State officers on the ticket to be elected. They say—

> In 1893 the judge of the court of appeals and minor State officers only were candidates. In 1894 the governorship, lieutenant-governorship, the judge of the court of appeals, and mayoralty of the city were in the balance, and yet the vote cast in 1894 in the district referred to was smaller by more than 4,000 votes, or by more than 25 per cent of the total votes cast, than that cast in 1893; while in view of the greater importance of the issues involved, there should normally have been a large increase in the number of votes polled, indicating that in 1893 more than 4,000 fraudulent votes were cast and counted in a single assembly district of the city. It was due to the presence of and the revelations before your committee that similar frauds were not enacted at the late election.

They sat in New York City during that election. It is not disputed here that there was a nonpartisan board of election. There were two Republicans and two Democrats on every election board, appointed by a board of police commissioners composed of two Republicans and two Democrats, and when I name the Republicans you will see that they were absolutely impartial boards, appointed by such dyed-in-the-wool Republicans as Charles Murray and Michael Kirwin.

They were the Republicans on the board, and the law provides that the minority representation on the board, otherwise the Republicans, shall be appointed by the members of the board in the minority party, and that the Democratic members of the board of election inspectors, there being two, shall be appointed by the majority; that is to say, the Democrats and Republicans combining for their appointment. That is the law of 1894. That board of election in this case was honestly constituted. There has never been any question of that. There is an absence of every indication of corruption or fraud, an absence of every motive for fraud in regard to the matter, and yet there is a finding on the part of this committee, in the majority report, that this formidable antagonist who was contesting a seat with me in that district, who had never been heard of before, was so dangerous in a district that never sent a Republican to this House that Tammany Hall devoted all of her strength in the Eighth Congressional district for the purpose of defeating him by fraud.

Just think of it. A man who had never been regarded as formidable to overcome! Is such a statement reasonable? Is it consistent with the facts or with the course of affairs that the great Tammany organization should have done such a thing as that under such circumstances? Where was the motive for it? What reasons could have been assigned for it? Where was the formidable competitor to vanquish that the entire strength of this organization should be turned aside from Presidential politics—from vast local issues—for the purpose of sending to this body its most humble representative? And yet they tell us that there was a conspiracy; a conspiracy without naming a single perpetrator who was engaged in it. That Tammany Hall was a conspirator, a great secret organization they say, and yet not a line of evidence to sustain such an allegation. There is—and they forget to make the distinction—there is a distinction between Tammany Hall and the Tammany Society. I am not a member of the Tammany Society,

which is a secret society, as I understand. Tammany Hall, of which I am a member, is a political society. I am a member of the Tammany Hall committee. Tammany Society is a charitable organization; Tammany Hall is a political one, and I trust her banners may long wave! [Laughter and applause.] We conflict with gentlemen on the other side, but only on questions of principle. I do not think that our opponents will ever say that we give anything but a square and honest fight. And I trust in my career, at least, that I shall never see her downed again, though a couple of years ago she got a pretty bad smash. [Laughter.]

Now, my friends, there are 23,000 voters in this Congressional district. They called about 50 witnesses out of the whole number as to that conspiracy to bribe voters of which they speak. How many of the voters out of the 23,000 did they name? How many out of the whole registered number have you named to establish your allegations of bribery? Just 6! Out of 23,000, 6 were named, and one witness, a man who swore to 4 as having voted, John Hendrick by name, never returned to sign his testimony; and we find on an investigation of the record that it is in evidence that one of the men he swore was bribed registered and did not vote at all, and that the other three were never registered even, and did not vote. That is the kind of testimony on which you are asked to unseat me. That is the kind of testimony that this committee presents for the purpose of giving the seat to another. John Riley, whose testimony was referred to by the gentleman from Ohio [Mr. TAYLER], got on the witness stand. He was on the stand, and one of the contestant's own employees swore that while he was on the witness stand a note was passed to him by the witness, telling him to get out of the room, because his presence embarrassed this witness Riley, because he was swearing under a false name and sent this note for the purpose of getting this man Fitzpatrick, who knew him, to leave the room during his testimony. Fitzpatrick left the room, and it seems that Mr. Mitchell's attorney followed him and asked him what the trouble was, and he said that the man testified in the name of Riley; that he knew the witness' name was not Riley but Phelon; and that the witness knew that he knew it, and passed this note to him requesting him to leave the room so that he might not be embarrassed pending the delivery of his perjured testimony.

Riley did not return to sign his testimony at all; and yet this testimony of a man who was guilty of perjury is the only testimony on which you are asked to throw out over 200 votes in that one district. The only testimony in the district on which you are to throw out over 200 votes of honest voters, who are to be disfranchised, is the testimony of a man who did not even sign the testimony that he undertook to swear to—a man who committed perjury before a notary public; practically admitted that he committed perjury; who was convicted of perjury by Mitchell's own witness, and who never dared return to sign his own testimony.

And the same is true as to John Hendrick. He was caught in perjury, and he never returned to sign his testimony. You may cry, "Fraud, fraud!" and you may think it a convenient cry, considering the repeated slanders on Tammany Hall in recent years; but it will not do. There is a constituency beyond you that we can appeal to. We are with them always. We are in touch with them. They have better opportunities for observing us than you have, and they will observe us; and we shall hear from the appeal in the future.

Now, gentlemen, I am not here to beg. I am here to demand my rights, and not mine alone, but the rights of my people of the Eighth Congressional district. I believe as firmly as I stand here that by an honest majority of the votes cast in that district I was elected as their Representative in Congress. Since I have been here I have tried in my humble way to serve those people faithfully. If it is true that I was not elected, I hope that the mistake has made no difference to them. At the same time, I believe that I was elected, and I believe that you are establishing a precedent that will be awfully dangerous to you in saying that a man can be unseated on testimony taken before an officer who is not authorized to administer oaths, hearsay testimony in most cases, testimony of a character such as this is, purchased testimony, bribed testimony, suborned testimony, testimony that no reasonable man and no reasonable court can accept. I will not trouble you with the details of this case. They are to be found in the minority report, in the brief, and in the record. I can not believe that you have read them all through, because the record is the most voluminous which has been submitted in any contested election case at this session of Congress. I will say that, whatever your action may be—and I am afraid, from the partisan character of the House, that it is going to be adverse—you do not do me half as great a wrong as you do the people who sent me here, and I shall take pains that they know it. [Applause.]

Mr. LONG. One word only in answer to the Tammany representative [Mr. SULZER], who spoke before the contestee rose. The threat of that gentleman does not have the effect to cause me to change my position in this case, which I believe to be right. The fact remains that the majority of the committee find that an organization to bribe existed in five districts. The minority of the committee concede that it existed in one—the forty-fourth. The same kind of evidence was introduced as to all these districts. The majority of the committee believe that it was sufficient to exclude the five districts from consideration.

Talk about the downfall of Tammany Hall! The records of this House prove that it has retrograded. In the Fifty-second Congress there stood on this floor a Tammany chieftain who stated what he thought the rule should be in reference to bribery and bribed votes. I refer to the Hon. Bourke Cockran. I read his language, in the contested election case of Noyes *vs.* Rockwell:

> Why, sir, if there were no contest before the House, if Mr. Noyes sat in this seat, and nobody appeared to question his right to represent his district, and it became apparent to the members of this body that one single vote cast for him had been purchased; that he was the beneficiary of one single vote acquired by corrupt and discreditable methods, it would be the duty of this House, and it would be the duty of every member of it, under the Constitution, to expel him as something too unclean for contact with honorable men.

Probably that rule is too severe, but in the closing part of that speech Mr. Cockran made use of this language, in which he agrees with the position of the committee in this case:

> I hope that when this vote is recorded there will be found some men on this side of the House [the Republican side] to declare their belief that purchased votes can not be considered as the expression of the popular will, and that no title to a seat can be maintained upon a record tainted with bribery, corruption, and fraud, and which seeks to establish itself not by denial of crime, but by an attempt to shelter itself behind a technicality unfairly and improperly injected into the case by the report of the majority.

Mr. SULZER. Will the gentleman permit a question?

Mr. LONG. Certainly.

Mr. SULZER. I have no fault to find with that language——

Mr. LONG. I am pleased to know that you indorse it.

Mr. SULZER. But what is your opinion about a man who seeks admittance on this floor who concedes that he has purchased, or that his agents have purchased, testimony?

Mr. LONG. There is no such admission.

Mr. MAGUIRE. Read page 141 of the record.

Mr. SULZER. Read the record.

Mr. LONG. I have read the record, and you have not. You have not denied the bribery. You have not put a witness on the stand to disprove the evidence that was taken by the contestant. I believe that this House should adopt the report of the committee and seat the contestant, who received a majority of the legal votes cast at the election.

Mr. Speaker, I move the previous question.

The SPEAKER. The gentleman from Kansas [Mr. LONG] moves the previous question.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the substitute.

Mr. SULZER. I make the point of order that there is no quorum.

The SPEAKER. That will develop, if there is none.

The substitute was rejected.

The SPEAKER. The question is on the original resolution.

Mr. RICHARDSON. I should like to have the resolution reported.

The SPEAKER. It has been reported.

Mr. RICHARDSON. When was it reported?

The SPEAKER. Reported when the discussion commenced.

Mr. SULZER. I ask that this resolution that we are to vote on may be read for the information of the House.

The SPEAKER. The Clerk will read it, if there be no objection.

Mr. KEM. I object, Mr. Speaker. [Laughter.]

The SPEAKER. The question is on agreeing to the resolution.

Mr. SULZER. I rise to a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. SULZER. My point is, that no proposition should be put before a legislative body that anybody in that legislative body does not know what he is voting on. I do not presume that any man——

The SPEAKER. The gentleman will please be in order. The gentleman started to make some inquiry, but the Chair thinks he has not made one yet. [Laughter.]

Mr. SULZER. I ask, then, Mr. Speaker, whether it is not in order that this resolution, which I know nothing about and have not heard, may now be read for the information of the House.

The SPEAKER. The resolution was reported to the House.

Mr. SULZER. At what time?

The SPEAKER. At the time the case was brought up for consideration, and the proposed amendment was also reported.

Mr. SULZER. I did not hear it.

The SPEAKER. Was the gentleman present?

Mr. SULZER. I do not think I was present, Mr. Speaker. [Laughter.]

The question being taken on the resolution reported by the committee, the Speaker declared that the ayes seemed to have it.

Mr. MAGUIRE. I ask for a division.

The House divided; and there were—ayes 138, noes 32.

Mr. SULZER. Mr. Speaker, I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 162, nays 39, not voting 153; as follows:

YEAS—162.

The following additional pairs were announced:

Until further notice:

Mr. DALZELL with Mr. CRISP.

Mr. ALLEN of Utah with Mr. TALBERT.

Mr. STEPHENSON with Mr. NEILL.

Mr. MAHON with Mr. PATTERSON.

Mr. BLACK of New York with Mr. LAWSON.

Mr. SMITH of Michigan with Mr. BERRY.

Mr. PERKINS with Mr. HALL.

Mr. GILLETT of Massachusetts with Mr. COWEN.

Mr. DRAPER with Mr. SPENCER.

Mr. HEATWOLE with Mr. DINSMORE.

Mr. LOUD with Mr. SWANSON.

Mr. BURRELL with Mr. COCKRELL.

Mr. BARTHOLDT with Mr. COOPER of Florida.

Mr. COLSON with Mr. KENDALL.

Mr. FOOTE with Mr. HUTCHESON.

Mr. ROYSE with Mr. TURNER of Virginia (except on the Tucker-Yost election case).

On this question:

Mr. HUFF with Mr. STALLINGS.

Mr. HEINER of Pennsylvania with Mr. LOCKHART.

Mr. HARRIS with Mr. CULBERSON.

Mr. RANEY with Mr. COBB.

Mr. HICKS with Mr. ABBOTT.

Mr. HUBBARD with Mr. ROBERTSON of Louisiana.

Mr. HARMER with Mr. CLARKE of Alabama.

Mr. TRELOAR with Mr. MCCREARY of Kentucky.

Mr. EDDY with Mr. YOAKUM.

Mr. HEMENWAY with Mr. WILLIAMS.

Mr. MCCLEARY of Minnesota with Mr. BLACK of Georgia.

Mr. ODELL with Mr. WASHINGTON.

Mr. LOW with Mr. CATCHINGS.

Mr. ELLIS with Mr. OTEY.

Mr. TAWNEY with Mr. SPARKMAN.

Mr. WELLINGTON with Mr. TATE.

Mr. FAIRCHILD with Mr. LESTER.

Mr. HENDERSON with Mr. MCMILLIN.

Mr. LOUDENSLAGER with Mr. OWENS.

Mr. MCCALL of Tennessee with Mr. WOODARD.

Mr. BARRETT with Mr. SHAW.

Mr. HULL with Mr. STRAIT.

Mr. TOWNE with Mr. ELLETT of Virginia.

Mr. EVANS with Mr. RUSK.

Mr. FOWLER with Mr. BARTLETT of Georgia (on all election cases except Underwood's).

Mr. MCLAURIN with Mr. JOHNSON of North Dakota (also Murray-Elliott election case).

Mr. TALBERT. Mr. Speaker, I have voted, but I withdraw my vote, being paired with the gentleman from Utah, Mr. ALLEN.

Mr. LOUDENSLAGER. Mr. Speaker, I voted in the affirmative, but I withdraw my vote, being paired with the gentleman from Kentucky, Mr. OWENS.

Mr. EVANS. Mr. Speaker, I am paired upon this question, but wish to be noted as present.

The result of the vote was then announced as above recorded.

SWEARING IN OF A MEMBER.

Mr. LONG. Mr. Speaker, Mr. Mitchell is present and desires to take the oath.

Mr. Mitchell appeared at the bar of the House, and the oath of office was administered by the Speaker.

BILLIARD AND POOL TABLES, DISTRICT OF COLUMBIA.

Mr. CURTIS of Iowa. Mr. Speaker, I desire to present a conference report.

The report was read, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 5490) to license billiard and pool tables in the District of Columbia, and for other purposes, having met, after a full and free conference respectfully report that they have been unable to reach an agreement.

G. M. CURTIS,
A. MILNES,
J. H. HULING,
Managers on the part of the House.

ISHAM G. HARRIS,
GEORGE P. WETMORE,
Managers on the part of the Senate.

Mr. CURTIS of Iowa. Mr. Speaker, I move that the House insist on its disagreement and ask for a further conference.

The motion was agreed to.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6994) relating to the sale of gas in the District of Columbia.

The message also announced that the Senate had passed the bill (S. 3184) granting an increase of pension to James H. Kile; in which the concurrence of the House was requested.

The message also announced that the Senate had agreed to the concurrent resolution of the House requesting the President to return to the House the bill (H. R. 3279) to authorize the reassessment of water-main taxes, and for other purposes.

SENATE BILL REFERRED.

Under clause 2 of Rule XXIV, the following Senate bill was taken from the Speaker's table and referred by the Speaker as follows:

A bill (S. 3184) granting an increase of pension to James H. Kile—to the Committee on Invalid Pensions.

ELECTION CONTEST—MARTIN VS. LOCKHART.

Mr. BAILEY. I ask unanimous consent to file and have printed the views of a minority of the Committee on Elections in the case of Martin *vs.* Lockhart.

The SPEAKER. Is there objection?

Mr. KEM. I object.

The SPEAKER. Objection is made by the gentleman from Nebraska [Mr. KEM].

NAVAL APPROPRIATION BILL.

Mr. BOUTELLE submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 7542) making appropriations for the naval service for the fiscal year ending June 30, 1897, and for other purposes, having met, after full and free conference, have agreed to recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 53.

That the House recede from its disagreement to the amendments of the Senate numbered 33, 34, 35, 36, 37, and 38, and agree to the same.

Amendment numbered 2: That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment as follows: Restore the matter stricken out by said Senate amendment; and the Senate agree to the same.

On the amendments of the Senate numbered 32, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 51, and 52 the committee of conference have been unable to agree.

C. A. BOUTELLE,
JOHN B. ROBINSON,
AMOS J. CUMMINGS,
Managers on the part of the House.

EUGENE HALE,
M. S. QUAY,
A. P. GORMAN,
Managers on the part of the Senate.

The statement of the House conferees was read, as follows:

The Senate conferees recede from their amendment numbered 53, which was a provision for finishing one of the gunboats heretofore authorized as a training ship for the use of the Naval Academy.

The House conferees recede from their disagreement to the Senate amendments numbered 33 to 38, inclusive, relating to character, speed, and cost of the torpedo boats authorized.

The House conferees recede from their disagreement to the Senate amendment numbered 2, and agree to the same with an amendment restoring the provision of the House bill, that all officers of the Navy or Marine Corps after service in a different corps shall have all the benefits of their service in the same manner as if said appointments were a reentry into the Navy or Marine Corps. The Senate amendment thus agreed to provides further, "That hereafter no payment shall be made from appropriations made by Congress to any officer in the Navy or Marine Corps on the active or retired list while such officer is employed, after June 30, 1897, by any person or company furnishing naval supplies or war material to the Government; and such employment is hereby made unlawful after said date."

The committee of conference have been unable to agree upon Senate amendment numbered 32, which proposed to reduce the number of battle ships from four to two, and upon amendments numbered 39 to 49, inclusive, which relate to the location and conditions of the construction of the battle ships and torpedo boats, and to price to be paid for armor plate, and amendments numbered 51 and 52, which are simply changes in the totals of appropriations to conform to proposed amendments.

Mr. BOUTELLE. I move the adoption of the conference report.

The report was adopted.

Mr. BOUTELLE. I move that the House further insist on its disagreement to the Senate amendments still in controversy, and ask a further conference with the Senate.

The motion was agreed to.

The SPEAKER. The Chair appoints the same conferees.

FORTIFICATIONS APPROPRIATION BILL.

Mr. HAINER of Nebraska submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 8109) making appropriations for fortifications and other works of defense, for the armament thereof, for the procurement of heavy ordnance for trial and service, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 4, 9, and 10.

That the House recede from its disagreement to the amendments of the Senate numbered 3, 6, 18, 19, and 20, and agree to the same.

That the House recede from its disagreement to the amendments of the Senate numbered 1 and 2, and agree to the same with an amendment as follows: In lieu of the amended paragraph insert the following:

"Gun and mortar batteries: For construction of fortifications, $2,500,000; of which sum not exceeding $100,000 may be expended for the construction of necessary buildings connected therewith: *Provided*, That contracts may be entered into, under the direction of the Secretary of War, for materials and work for construction of fortifications, to be paid for as appropriations may from time to time be made by law, to an additional sum in the aggregate not to exceed $2,500,000."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 5, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$1,205,038"; and the Senate agree to the same.

That the House recede from its disagreement to the amendments of the Senate numbered 7 and 8, and agree to the same with an amendment as follows: In lieu of the amended paragraph insert the following:

"In all, $3,770,076: *Provided*, That the following sums, to meet payments as they become due for the afore-mentioned objects under armament of fortifications, are hereby appropriated, namely."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 11, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$650,000"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 12, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$750,000": and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 13, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$300,000"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 14, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$200,000"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 15, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$2,075,000"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 16, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$650,000"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment as follows: After the word "guns," in line 1 of said amendment, insert the following: "of American manufacture"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 21, and agree to the same with an amendment as follows: In line 1 of the matter inserted by said amendment, after the word "fortifications," insert the words "in its discretion"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "That in the act making appropriations for fortifications and other works of defense, for the armament thereof, for the procurement of heavy ordnance for trial and service, and for other purposes, approved February 18, 1893, the paragraph beginning with the words 'Of the $110,000' and providing for terms of payment for the 12-inch elevating gun carriage to be contracted for with A. H. Emery under the provisions of said act be, and is hereby, amended to read as follows:

"Of the $110,000 to be paid for the carriage and its foundations, 85 per cent shall be paid in partial payments as the work progresses, in accordance with the proposals submitted by A. H. Emery to the Board in his letter of January 21, 1893. And no bond shall be required for the return of this money if the carriage is not accepted, nor shall the said Emery be required to return the money paid, and the carriage shall belong to the United States when the tests are completed. The balance of the $110,000 shall be paid as soon as said carriage shall have been completed in all respects according to contract, and shall also have undergone and endured a test satisfactory to the Board of Ordnance and Fortification. Of the $20,000 to be paid for testing of the carriage, three-eighths shall be paid the contractor when the preliminary tests are completed, and the other five-eighths shall be paid to him proportionally as the 50 rounds for proof are furnished. And the Secretary of War is hereby authorized and directed to enter into a supplemental contract with the contractor for this carriage for the supply by him of a loading apparatus to go with and belong to the carriage and to be furnished therewith as a part thereof, and the carriage shall be so constructed that a part of the work of recoil can be used for the horizontal traverse of the carriage and the working of the loading apparatus, and the payment for the work so furnished under this supplementary contract shall be $10,000, which sum shall be due and payable when said loading apparatus is completed in all respects according to contract, and shall also have undergone and endured said test hereinbefore mentioned, to make which payment the sum of $10,000 is hereby appropriated."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 23, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"To enable the Board of Ordnance and Fortification to procure and test one 8-inch caliber high-power gun, cast in one piece, on the plan of R. J. Gatling; and the Secretary of War is hereby authorized and directed to contract with said Gatling for said gun, without advertisement, which gun shall be constructed according to the plans and specifications prepared by said Gatling and under his supervision, and to be subjected to the same test now applied to the built-up gun of the same caliber, and the sum of $40,000 is hereby appropriated to pay for said gun, of which sum 85 per cent shall be paid in partial payments as the work progresses, in accordance with the contract to be entered into between the Secretary of War and the said Gatling, and the remainder upon the completion and test of said gun: *Provided*, That before said contract is entered into the plans and specifications for said gun shall be deposited with the Secretary of War, which plans and specifications may be modified, in the discretion of said Gatling, from time to time as the work progresses: *And provided further*, That the said gun shall conform in general form and dimensions to modern ordnance, and shall not, therefore, differ materially in form and dimensions from service guns, in order that it may admit of being mounted on a service carriage and in a service emplacement or fortification."

And the Senate agree to the same.

E. J. HAINER,
WILLIAM W. GROUT,
FRANKLIN BARTLETT,
Managers on the part of the House.

GEORGE C. PERKINS,
W. B. ALLISON,
A. P. GORMAN,
Managers on the part of the Senate.

The statement of the House conferees was read, as follows:

The managers on the part of the House of the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 8109) making appropriations for fortifications, submit the following written statement in explanation of the action agreed upon and recommended in the accompanying conference report on each of the Senate amendments, namely:

On amendments numbered 1 and 2: Appropriates $2,500,000, instead of $1,885,000, as proposed by the House, and $5,000,000, as proposed by the Senate, for construction of fortifications, and authorizes contracts for materials and work additional to said sum to the amount of $2,500,000, instead of $3,375,000, as proposed by the House.

On No. 3: Appropriates $500,000, as proposed by the Senate, instead of $250,000, as proposed by the House, for sites for fortifications and seacoast defenses.

On Nos. 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 15: Appropriates $2,075,000 instead of $1,729,000, as proposed by the House, and $2,576,000, as proposed by the Senate, for the various objects under "Armament of fortifications"; authorizes contracts for a sum additional to said amount of $1,695,076, instead of $2,167,276, as proposed by the House, and $1,079,076, as proposed by the Senate; authorizes the procurement of forgings for one type 16-inch gun, as proposed by the House, and limits the price under contracts for steel for high-power coast-defense guns and mortars to not exceeding 24 cents per pound.

On No. 16: Appropriates $650,000, instead of $497,449, as proposed by the House, and $1,000,000, as proposed by the Senate, for payment for 8, 10, and 12 inch guns manufactured by contract under the fortification acts of 1890 and 1891.

On No. 17: Appropriates $35,000, as proposed by the Senate, for purchase of machine guns of American manufacture, including $15,000 for such guns of approved musket caliber.

On No. 18: Appropriates $50,000, as proposed by the Senate, instead of $66,500, as proposed by the House, for projectiles, including shrapnel for issue to the service.

On No. 19: Provides, as proposed by the Senate, that hereafter the ordnance storekeeper on duty in Washington as disbursing officer and assistant to the Chief of Ordnance shall have the rank of major.

On No. 20: Appropriates $150,000, instead of $100,000, as proposed by the House, for expenses under the Board of Ordnance and Fortification.

On No. 21: Authorizes the Board of Ordnance and Fortification, in their discretion, to procure and test, as proposed by the Senate, one 10-inch counterpoise carriage of the type patented by Commodore J. A. Howell, of the United States Navy.

On No. 22: Inserts the provision proposed by the Senate, modifying the fortification act of 1893 as to authority to contract with A. H. Emery for a gun carriage, the full text of which is set forth in the conference report.

On No. 23: Inserts a provision of which the full text is set forth in the conference report, to enable the Board of Ordnance and Fortification to procure and test one 8-inch caliber high-power gun, cast in one piece, on the plan of R. J. Gatling.

The bill as it passed the House appropriated $5,845,837 and authorized contracts additional to that sum to the amount of $5,542,276, making in all, for fortifications and authorizations, $11,384,613. The bill as it passed the Senate appropriated $10,763,888 and authorized contracts additional thereto to the amount of $1,079,076, making in all, for appropriations and authorizations, $11,842,964.

The bill as agreed upon by the conference committee appropriates $7,377,888 and authorizes contracts additional thereto to the amount of $4,195,076, making in all, appropriations and authorizations, $11,572,964,

E. J. HAINER,
WILLIAM W. GROUT,
FRANKLIN BARTLETT,
Managers on the part of the House.

Mr. HAINER of Nebraska. I move the adoption of the report.

Mr. DINGLEY. One question before that is done. As I understand, the amount of appropriations and authorizations taken together is substantially the same in the bill as agreed to in conference as in the bill passed by the House.

Mr. HAINER of Nebraska. A trifle reduced.

Mr. DINGLEY. But the appropriations of money from the Treasury are larger in the bill as now agreed on than in the bill as passed by the House.

Mr. HAINER of Nebraska. That is correct.

Mr. DINGLEY. How much have the appropriations been increased in amount?

Mr. HAINER of Nebraska. Very nearly a million and a half of dollars.

Mr. DINGLEY. And that increase is taken off the amount of the authorizations?

Mr. HAINER of Nebraska. Yes, sir.

Mr. DINGLEY. In other words, having an abundance of money, we have increased the appropriations!

Mr. HAINER of Nebraska. We agreed in conference as best we could. The bill is not in as good condition now as when it left the House; but it is in better shape than at one time we feared it might be.

Mr. STEELE. What is the style of this Gatling gun for which the sum of $40,000 is appropriated? It is not the old rapid-firing gun, is it?

Mr. HAINER of Nebraska. No, sir; this is a gun of new device. It is intended to be cast in a vacuum. It is a cast-steel gun, which the Senate thought it would be very advisable to try.

Mr. STEELE. Is it made on the plan of cooling the gun from the inside first, instead of casting it solid and then boring it out?

Mr. HAINER of Nebraska. Yes, sir.

The SPEAKER (having put the question on agreeing to the conference report). The ayes seem to have it.

Mr. KEM. No quorum, Mr. Speaker.

The SPEAKER. Does the gentleman demand a division?

Mr. KEM. Yes, sir.

The House divided; and there were—ayes 83, noes none.

Mr. KEM. No quorum.

Mr. HAINER of Nebraska. I move that the House adjourn.

The SPEAKER (having put the question). The motion is agreed to; and the House, in accordance with the order already adopted, stands adjourned until to-morrow morning at 11 o'clock.

EXECUTIVE COMMUNICATION.

Under clause 2 of Rule XXIV, a letter from the assistant clerk of the Court of Claims, transmitting a copy of the findings filed by the court in the case of W. T. Ratcliff, administrator of Mrs. Nancy Wells, deceased, against The United States, was taken from the Speaker's table, referred to the Committee on War Claims, and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several Calendars therein named, as follows:

Mr. CURTIS of New York, from the Committee on Military Affairs, to which was referred the bill of the House (H. R. 8443) to amend section 4878 of the Revised Statutes, relating to burials in national cemeteries, reported the same without amendment, accompanied by a report (No. 2127); which said bill and report were referred to the House Calendar.

He also, from the same committee, to which was referred the bill of the Senate (S. 2420) entitled "An act to regulate the pay of noncommissioned officers in the Army," reported the same without amendment, accompanied by a report (No. 2128); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. BARNEY, from the Committee on the Public Lands, to which was referred the joint resolution of the House (H. Res. 154) providing for an investigation by the Secretary of the Interior of the claims of certain homestead entrymen in the State of Wisconsin for loss occasioned by the subsequent cancellation of their entries, and appropriating a sum of money to pay the expenses thereof, reported the same without amendment, accompanied by a report (No. 2130); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. CUMMINGS, from the Committee on the Library, to which was referred the joint resolution of the Senate (S. R. 27) granting permission for the erection of a monument in Washington, D. C., for the ornamentation of the national capital and in honor of Samuel Hahnemann, reported the same without amendment, accompanied by a report (No. 2131); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. GRIFFIN, from the Committee on Military Affairs, to which was referred House bill No. 9024, reported in lieu thereof a bill (H. R. 9289) to amend an act entitled "An act to promote the administration of justice in the Army," approved October 1, 1890, and for other purposes, accompanied by a report (No. 2132); which said bill and report were referred to the House Calendar.

Mr. SHERMAN, from the Committee on Interstate and Foreign Commerce, to which was referred the bill of the House (H. R. 8814) to authorize the construction by the Duluth and North Dakota Railroad Company of two bridges across the Red River of the North between the States of Minnesota and North Dakota, reported the same without amendment, accompanied by a report (No. 2133); which said bill and report were referred to the House Calendar.

Mr. PAYNE, from the Committee on the Merchant Marine and Fisheries, to which was referred the bill of the House (H. R. 9253) to amend an act approved August 19, 1890, entitled "An act to adopt regulations for preventing collisions at sea," reported the same without amendment, accompanied by a report (No. 2134); which said bill and report were referred to the House Calendar.

Mr. ALLEN of Utah, from the Committee on the Public Lands, to which was referred the bill of the Senate (S. 2047) entitled "An act extending the time within which the University of Utah shall occupy lands heretofore granted to it," reported the same without amendment, accompanied by a report (No. 2135); which said bill and report were referred to the House Calendar.

Mr. QUIGG, from the Committee on the Library, to which was referred the bill of the Senate (S. 1922) entitled "An act creating an art commission of the United States, and for other purposes," reported the same without amendment, accompanied by a report (No. 2136); which said bill and report were referred to the House Calendar.

He also, from the same committee, to which was referred the bill of the House (H. R. 7860) making an appropriation for the erection of a monument to commemorate the services and achievements of the private soldiers and sailors of the United States in the late war of the rebellion, reported the same with amendment,

accompanied by a report (No. 2137); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. PARKER, from the Committee on Military Affairs, to which was referred the bill of the House (H. R. 9151) to authorize the Secretary of War and the Secretary of the Navy to make certain disposition of condemned ordnance, guns, and cannon balls in their respective Departments, reported the same without amendment, accompanied by a report (No. 2163); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

By Mr. HURLEY, from the Committee on War Claims, a resolution (House Res. No. 396) to refer the bill (H. R. 2466) for the relief of John Carney, with all accompanying papers, to the Court of Claims, reported in lieu of House bill No. 2466. (Report No. 2129.)

By Mr. ANDERSON, from the Committee on Invalid Pensions: The bill (H. R. 7504) granting an increase of pension to Charles McAllister. (Report No. 2139.)

By Mr. ANDREWS, from the Committee on Invalid Pensions: The bill (S. 916) entitled "An act granting an increase of pension to Mrs. Cornelia I. Skiles." (Report No. 2140.)

The bill (S. 2401) entitled "An act granting a pension to Mrs. Hattie E. Redfield, of Omaha, Nebr." (Report No. 2141.)

By Mr. KIRKPATRICK, from the Committee on Invalid Pensions:

The bill (H. R. 4622) granting a pension to Mrs. J. J. Woods. (Report No. 2142.)

The bill (H. R. 6464) granting a pension to John S. Dukate, late assistant surgeon, Fifty-third Regiment Indiana Veteran Volunteers. (Report No. 2157.)

The bill (H. R. 8094) granting a pension to Alfred D. Johnson. (Report No. 2158.)

The bill (S. 248) entitled "An act granting a pension to Martha Allen." (Report No. 2159.)

By Mr. McCLELLAN, from the Committee on Invalid Pensions: The bill (H. R. 6419) granting an increase of pension to Maj. Samuel P. Dill. (Report No. 2143.)

By Mr. PICKLER, from the Committee on Invalid Pensions: The bill (H. R. 9089) granting a pension to Benjamin F. Whitehouse. (Report No. 2144.)

The bill (H. R. 9090) granting an increase of pension to Jacob Stebler. (Report No. 2160.)

By Mr. POOLE, from the Committee on Invalid Pensions:

The bill (H. R. 2961) for the relief of Angus McVigor. (Report No. 2145.)

The bill (H. R. 3845) granting a pension to Eunice Taylor. (Report No. 2146.)

By Mr. SULLOWAY, from the Committee on Invalid Pensions: The bill (S. 3245) entitled "An act granting a pension to Elvira Bachelder." (Report No. 2138.)

The bill (H. R. 5851) to increase the pension of Edward O. Fisher. (Report No. 2148.)

The bill (H. R. 6946) granting a pension to Maria Kenney. (Report No. 2147.)

The bill (H. R. 9294) granting a pension to James Donovan, reported in lieu of the bill H. R. 4811. (Report No. 2149.)

By Mr. WOOD, from the Committee on Invalid Pensions:

The bill (H. R. 5718) granting a pension to Malinda Kelly, of Jackson County, Ill. (Report No. 2150.)

The bill (H. R. 1187) granting a pension to Rev. J. M. Madding. (Report No. 2151.)

The bill (H. R. 7663) to increase the pension of Jesse Sims. (Report No. 2152.)

The bill (H. R. 7283) granting pension to Mary Dozha. (Report No. 2161.)

By Mr. FENTON, from the Committee on Military Affairs: The bill (H. R. 2308) for the relief of John L. Jefferies, late a captain in the One hundred and tenth Regiment Pennsylvania Volunteer Infantry. (Report No. 2153.)

By Mr. BISHOP, from the Committee on Military Affairs: The bill (H. R. 1937) for the relief of Robert McFarland. (Report No. 2154.)

By Mr. GRIFFIN, from the Committee on Military Affairs: The bill (H. R. 4853) for the relief of John Duncan. (Report No. 2155.)

By Mr. HARDY, from the Committee on Pensions: The bill (H. R. 7206) granting a pension to Frank Stay. (Report No. 2156.)

By Mr. PARKER, from the Committee on Military Affairs: The bill (H. R. 8364) for the relief of Capt. Henry C. Seaman. (Report No. 2162.)

PUBLIC BILLS, MEMORIALS, AND RESOLUTIONS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials of the following titles were introduced and severally referred as follows:

By Mr. LACEY: A bill (H. R. 9287) to enforce obedience to subpœnas in criminal cases—to the Committee on the Judiciary.

By Mr. MEREDITH (by request): A bill (H. R. 9288) to promote aerial navigation for military purposes—to the Committee on Military Affairs.

By Mr. DENNY: A bill (H. R. 9290) for the purchase of a site at Congress Heights, D. C., to be used as a summer residence for the President of the United States, and for other purposes—to the Committee on Public Buildings and Grounds.

By Mr. HICKS: A bill (H. R. 9291) granting 4 condemned cannon and 100 cannon balls to Lieutenant S. C. Potts Post, No. 62, and Fred C. Ward Post, No. 468, Grand Army of the Republic, of Altoona, Pa.—to the Committee on Naval Affairs.

By Mr. ROBINSON of Pennsylvania: A bill (H. R. 9292) for the erection of a public building at Phœnixville, Pa.—to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 9293) to provide for the construction of a public building at West Chester, Pa.—to the Committee on Public Buildings and Grounds.

By Mr. CHARLES W. STONE: A joint resolution (H. Res. 194) extending the scope of the investigations by the Agricultural Department in the matter of the improvement of public roads—to the Committee on Agriculture.

By Mr. CATRON: A resolution (House Res. No. 388) for special order for consideration of House bill No. 4052 and Senate bill No. 2022—to the Committee on Rules.

By Mr. SHERMAN: A resolution (House Res. No. 397) requesting the Secretary of the Treasury to furnish information in reference to defaulted bonds formerly belonging to Indian funds and assumed by the United States Government—to the Committee on Indian Affairs.

By Mr. ODELL: A resolution (House Res. No. 398) authorizing the appointment of Daniel J. McKeever as an additional page—to the Committee on Accounts.

By Mr. SMITH of Michigan: A resolution (House Res. No. 399) relative to the President notifying the Governments of Mexico, Brazil, etc., for the purpose of considering and recommending to each Government some measures for arbitration, etc.—to the Committee on Foreign Affairs.

By Mr. BARRETT: A resolution (House Res. No. 400) relative to the employment of an extra laborer in the Doorkeeper's department—to the Committee on Accounts.

By Mr. HOOKER: A resolution (House Res. No. 401) authorizing the printing of 10,000 copies of the message of the President and the report of the Committee on Rivers and Harbors—to the Committee on Printing.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills; which were referred as follows:

The bill (H. R. 2939) for the relief of John E. Welch, a citizen of the United States—Committee on Invalid Pensions discharged, and referred to the Committee on Claims.

The bill (H. R. 3995) granting a pension to George K. Knowlton, late of United States Navy—Committee on Invalid Pensions discharged, and referred to the Committee on Naval Affairs.

The bill (H. R. 9211) to grant a pension to Mrs. Charles B. Gatewood, widow of Charles B. Gatewood, late first lieutenant, Sixth United States Cavalry—Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

PRIVATE BILLS, ETC.

Under clause 1 of Rule XXII, private bills of the following titles were presented and referred as follows:

By Mr. HARRIS: A bill (H. R. 9295) granting a pension to Sturgis O. Lovell—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9296) granting a pension to William H. Zombro—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9297) for the relief of Leonard B. Johnson, of Sandusky, Ohio, for the use of his land for a Confederate military cemetery—to the Committee on Claims.

Also, a bill (H. R. 9298) to reimburse Henry Gregg for moneys expended at the last sickness and burial of a deceased soldier—to the Committee on Claims.

By Mr. HICKS: A bill (H. R. 9299) to correct the military record of Joseph Albert Miles—to the Committee on Military Affairs.

Also, a bill (H. R. 9300) to increase the pension of Henry D. Roger, of Belsano, Pa.—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9301) to correct the military record of Joseph P. Swope—to the Committee on Military Affairs.

By Mr. HUNTER: A bill (H. R. 9302) granting a pension to W. H. Dunbar—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9303) granting a pension to John A. Loudon—to the Committee on Invalid Pensions.

By Mr. JOY: A bill (H. R. 9304) for the relief of Cass Avenue Distilling Company—to the Committee on Claims.

By Mr. MARSH: A bill (H. R. 9305) to grant an honorable discharge to Peter Hoots—to the Committee on Military Affairs.

By Mr. McCREARY of Kentucky: A bill (H. R. 9306) granting a pension to Amanda Woodcock—to the Committee on Invalid Pensions.

By Mr. MEYER: A bill (H. R. 9307) for the relief of the heirs of Pierre Sauvé—to the Committee on War Claims.

Also, a bill (H. R. 9308) for the relief of the New Orleans Gas Light Company—to the Committee on War Claims.

Also, a bill (H. R. 9309) for the relief of John F. Kranz—to the Committee on War Claims.

By Mr. MEREDITH: A bill (H. R. 9310) for the relief of the estate of Phillip Otterback, and for other purposes—to the Committee on the District of Columbia.

By Mr. PICKLER: A bill (H. R. 9311) granting a pension to Daniel Martin—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9312) granting an increase of pension to Stephen H. Morse—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9313) granting a pension to Charles Stow—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9314) granting a pension to Newman C. Nash—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9315) granting a pension to H. R. Draper—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9316) granting an increase of pension to Isaac Smouse—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9317) granting an increase of pension to George W. Bolster—to the Committee on Invalid Pensions.

By Mr. STEELE: A bill (H. R. 9318) granting an increase of pension to Catherine Clifford—to the Committee on Invalid Pensions.

By Mr. CALDERHEAD: A bill (H. R. 9319) granting a pension to Malachi Salters, a sergeant of Company F, Ninth Regiment Illinois Volunteer Cavalry—to the Committee on Invalid Pensions.

By Mr. FARIS: A bill (H. R. 9320) to correct the military record of Henry W. Prince—to the Committee on Military Affairs.

PETITIONS, ETC.

Under clause 1 of Rule XXII, the following petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. BARRETT: Resolutions of the board of aldermen of the city of Chelsea, Mass., protesting against the adoption of the so-called Pasco amendment to the Post-Office appropriation bill, now pending—to the Committee on the Post-Office and Post-Roads.

By Mr. BROMWELL: Memorial of Wyoming Chapter, Daughters of the American Revolution, concerning the publication of papers of the American Continental Congress—to the Committee on Printing.

By Mr. BULL: Paper to accompany House bill to promote Lieut. William McCarty Little—to the Committee on Naval Affairs.

By Mr. CRUMP: Resolutions of the Board of Trade of Chicago, Ill., remonstrating against the adoption of House bill No. 8536 and Senate bill No. 2967, being amendments to the interstate-commerce act—to the Committee on Interstate and Foreign Commerce.

Also, petition of Rev. C. T. Patchell and 300 members of the Congregational church of Bay City, Mich., favoring the enactment of a Sunday-rest law for the District of Columbia—to the Committee on the District of Columbia.

By Mr. COCKRELL: Petition of the Woman's Christian Temperance Union of Iowa Park, Tex., favoring the Denny bill, prohibiting the issuance of United States liquor permits in prohibition districts—to the Committee on Alcoholic Liquor Traffic.

By Mr. FARIS: Papers to accompany House bill No. 9080, for the relief of William H. Wood—to the Committee on Military Affairs.

By Mr. HARDY: Papers to accompany House bill No. 9279, for the relief of Wesley Porter—to the Committee on Military Affairs.

By Mr. KERR: Petition of Wolfersberger & Page, protesting against the passage of House bill No. 4566, amending the postal laws—to the Committee on the Post-Office and Post-Roads.

By Mr. MEIKLEJOHN: Petition of the common council of Columbus, Nebr.; also of the delegates to the Democratic State convention, asking for the passage of the bill providing for the transmississippi and international exposition at Omaha—to the Committee on Ways and Means.

By Mr. RICHARDSON: Papers relating to the claim of Rice A. Coffey, of Jackson County, Ala.—to the Committee on War Claims.

By Mr. SKINNER (by request): Petition of certain citizens of Washington, D. C., in relation to irregularities in the administration of education within the District—to the Committee on the District of Columbia.

By Mr. TURNER of Virginia: Petition of George W. Fisher, for pay for extra services—to the Committee on Accounts.

By Mr. WHEELER: Papers relating to the claim of Jesse Jefferson—to the Committee on War Claims.

Also, papers relating to the claim of John Haynes—to the Committee on War Claims.

Also, papers relating to the claim of Benjamin Carter—to the Committee on War Claims.

Also, papers relating to the claim of Cyrus Jones—to the Committee on War Claims.

Also, papers relating to the claim of David Vincent—to the Committee on War Claims.

Also, papers relating to the claim of William S. Kerr—to the Committee on War Claims.

SENATE.

WEDNESDAY, *June 3, 1896.*

The Senate met at 11 o'clock a. m.

Prayer by the Chaplain, Rev. W. H. MILBURN, D. D.

On motion of Mr. HALE, and by unanimous consent, the reading of the Journal of yesterday's proceedings was dispensed with.

EXECUTIVE COMMUNICATIONS.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, in response to a resolution of the 29th ultimo, directing him to transmit a report of Special Employee T. A. Byrne, relative to an investigation of the alleged undervaluation of merchandise imported into this country, stating that the report has been transmitted to the United States attorney at New York, with the request that proper proceedings be taken, etc.; which was ordered to lie on the table and be printed.

He also laid before the Senate a communication from the Attorney-General, in response to a resolution of the 2d instant, calling for a list of all final judgments rendered in Indian depredation claims since the 21st day of May, 1896, transmitting a list of judgments rendered in the Court of Claims in favor of claimants on June 1, 1896; which, with the accompanying paper, was referred to the Committee on Appropriations, and ordered to be printed.

MRS. JANE STEWART WHITING.

The VICE-PRESIDENT laid before the Senate the amendment of the House of Representatives to the bill (S. 1511) granting a pension to Mrs. Jane Stewart Whiting.

The amendment of the House of Representatives was, in line 5, before the word "dollars," to strike out "seventy-five" and insert "thirty."

Mr. MITCHELL of Wisconsin. I move that the Senate nonconcur in the amendment of the House of Representatives.

The motion was agreed to.

Mr. MITCHELL of Wisconsin. I move that the Senate request a conference with the House of Representatives on the disagreeing votes of the two Houses.

The motion was agreed to.

By unanimous consent, the Vice-President was authorized to appoint the conferees on the part of the Senate; and Mr. GALLINGER, Mr. CANNON, and Mr. MITCHELL of Wisconsin were appointed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 7542) making appropriations for the naval service for the fiscal year ending June 30, 1897, and for other purposes; further insisted upon its disagreement to the amendments to the bill numbered 32, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 51, and 52; asked a further conference with the Senate on the disagreeing votes of the two Houses thereon; and had appointed Mr. BOUTELLE, Mr. ROBINSON of Pennsylvania, and Mr. CUMMINGS managers at the conference on the part of the House.

PETITION.

Mr. PRITCHARD presented the petition of Rev. Z. Sams and sundry other citizens of Madison County, N. C., praying for the enactment of legislation to amend the military record of Stephen Rice, of Company A, Second North Carolina Mounted Infantry; which was referred to the Committee on Military Affairs.

BILL INTRODUCED.

Mr. SHERMAN introduced a bill (S. 3256) to remove the charge of desertion from James H. Troy; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Military Affairs.

MARITIME CANAL OF NORTH AMERICA.

On motion of Mr. HANSBROUGH, it was

Ordered, That 2,000 additional copies of Senate Report No. 1094, on S. 3049, to incorporate the Maritime Canal of North America, and for other purposes, be printed.

ELIZABETH W. SUTHERLAND.

Mr. GALLINGER submitted the following resolution; which was considered by unanimous consent, and agreed to.

Resolved, That the Secretary be directed to request the House of Representatives to return to the Senate the bill (S. 1420) granting an increase of pension to Elizabeth W. Sutherland.

METRIC SYSTEM OF WEIGHTS AND MEASURES.

Mr. CANNON. I submit the following resolution, and ask for its present consideration.

The resolution was read, as follows:

Resolved, That the Committee on Finance collect and have printed for the use of the Senate all obtainable information on the subject of a metric system of weights and measures, the expense for the collection and preparation of such data to be paid from the contingent fund of the Senate.

The VICE-PRESIDENT. The resolution will, under the rule, have to go to the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. HALE. If it is a matter of any magnitude it should first go to the Committee on Printing.

Mr. CANNON. Very well.

The VICE-PRESIDENT. The resolution will be referred to the Committee on Printing.

RIVER AND HARBOR BILL—VETO MESSAGE.

Mr. SHERMAN. I move to proceed to the consideration of House bill 8008, known as the cheese bill.

Mr. VEST. Mr. President——

The VICE-PRESIDENT. The Chair has recognized the Senator from Ohio.

Mr. VEST. I beg pardon. Some one had called my attention away at the moment. The understanding was yesterday that the filled-cheese bill should become the regular order of business and should be laid aside for appropriation bills, and I stated then that at the end of the routine business this morning I would move to reconsider the river and harbor bill, that the President's veto message might be laid before the Senate.

Mr. SHERMAN. I did not know when I made the motion that the cheese bill is the unfinished business, to come up at 1 o'clock.

The VICE-PRESIDENT. The Chair so understands.

Mr. SHERMAN. In that case I will give way for any other business until that time.

Mr. VEST. I move to reconsider the bill.

Mr. GEAR. Will the Senator from Missouri yield to me a moment to call up the bill (H. R. 3771) for the relief of Stratton B. Bencoster?

Mr. VEST. Certainly.

Mr. PETTIGREW. I ask to have the conference report on the Indian appropriation bill laid before the Senate. I suppose it takes precedence over other business.

The VICE-PRESIDENT. The Chair will submit the motion of the Senator from Missouri. It is for the Senate to determine as to the precedence of the two measures.

Mr. PETTIGREW. I wish to say that there will be another conference necessary, and it is very important, it appears to me, that the first business we should transact is to dispose of the report now before the Senate. It seems to lead to some discussion. I think we can dispose of it this morning, however, and thus be enabled to hold another conference, which will be upon the question of Indian sectarian schools, and may lead to another controversy in the Senate. I hope that the Senator from Missouri will not insist upon taking up this measure until the conference report is disposed of.

Mr. VEST. The trouble is that the debate threatens to be almost interminable upon the Indian appropriation bill. There is a great deal of feeling in regard to it, and it is very evident that a number of Senators propose to address the Senate upon it, the Senator from Mississippi [Mr. GEORGE] having only commenced his remarks. If we are to act upon the river and harbor bill and the veto message of the President, it is very obvious that it should be done as speedily as possible. No question can be presented to the Senate outside of the national honor which can be more important to the people of the United States than to know whether the great works of improvement are to be suspended, a large number of them destroyed, or whether in the contingency that the veto is sustained we should proceed and attempt to enact another river and harbor bill at the present session. That question ought to be determined now, and it seems to me that it is largely superior to any appropriation for Indian schools or any other provisions in the Indian appropriation bill, however important they may be.

Mr. GEORGE. Will the Senator from Missouri allow me to interrupt him?

Mr. VEST. Certainly.

Mr. HALE. I call for the regular order.

Mr. GEORGE. I desire to state to the Senator from South Dakota that it would probably facilitate the passage of the Indian appropriation bill, at least it would not obstruct it, if he would allow a vote to be taken upon the river and harbor bill.

The VICE-PRESIDENT. The Chair submits to the Senate the motion of the Senator from Missouri to reconsider the river and harbor bill.

Mr. PETTIGREW. On that motion I demand the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. GEAR (when his name was called). I have a general pair with the Senator from Georgia [Mr. GORDON]. Knowing how he would vote on this question, I vote "yea."

Mr. MITCHELL of Wisconsin (when his name was called). I am paired with the Senator from New Jersey [Mr. SEWELL], but as we agree on this question, I vote "yea."

Mr. WHITE (when his name was called). I am paired with the Senator from Idaho [Mr. SHOUP], but we agree upon this question, and I vote "yea."

The roll call was concluded.

Mr. BROWN (after having voted in the negative). I wish to withdraw my vote. I am paired with the Senator from Maine [Mr. FRYE].

Mr. CULLOM. I have a general pair with the Senator from Delaware [Mr. GRAY], but I feel satisfied that he would vote "yea" if present, and I will therefore vote. I vote "yea."

Mr. BURROWS (after having voted in the affirmative). I am paired with the senior Senator from Louisiana [Mr. CAFFERY], but I am advised that he would vote in the affirmative. So I will let my vote stand.

Mr. PALMER. Has the Senator from North Dakota [Mr. HANSBROUGH] voted?

The VICE-PRESIDENT. He has not voted, the Chair is advised.

Mr. PALMER. I withhold my vote. I should vote "nay" if the Senator from North Dakota were present.

Mr. BROWN. At the request of friends of the Senator from Maine [Mr. FRYE], with whom I am paired, I will vote to make a quorum. I renew my vote "nay."

Mr. GALLINGER (after having voted in the affirmative). I have a general pair with the senior Senator from Texas [Mr. MILLS], who has not voted. I will transfer that pair to the Senator from Connecticut [Mr. HAWLEY] and allow my vote to stand.

Mr. PALMER. As my vote is probably necessary to make a quorum, I will take the liberty of voting. I vote "nay."

The result was announced—yeas 38, nays 10; as follows:

YEAS—38.

Aldrich,	Faulkner,	McBride,	Quay,
Allison,	Gallinger,	Mitchell, Oreg.	Sherman,
Berry,	Gear,	Mitchell, Wis.	Smith,
Burrows,	George,	Morgan,	Turpie,
Cannon,	Gorman,	Nelson,	Vest,
Carter,	Hale,	Pasco,	Walthall,
Chandler,	Hill,	Peffer,	White,
Cullom,	Jones, Ark.	Perkins,	Wolcott.
Davis,	Lindsay,	Platt,	
Dubois,	Lodge.	Pugh,	

NAYS—10.

Bate,	Harris,	Pettigrew,	Vilas.
Brown,	Morrill,	Pritchard,	
Chilton,	Palmer,	Teller,	

NOT VOTING—41.

Allen,	Cockrell,	Jones, Nev.	Squire,
Bacon,	Daniel,	Kyle,	Stewart,
Baker,	Elkins,	McMillan,	Thurston,
Blackburn,	Frye,	Mantle,	Tillman,
Blanchard,	Gibson,	Martin,	Voorhees,
Brice,	Gordon,	Mills,	Warren,
Butler,	Gray,	Murphy,	Wetmore,
Caffery,	Hansbrough,	Proctor,	Wilson.
Call,	Hawley,	Roach,	
Cameron,	Hoar,	Sewell,	
Clark,	Irby,	Shoup,	

So the motion was agreed to; and the Senate proceeded to reconsider the bill (H. R. 7977) making appropriations for the

construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

The VICE-PRESIDENT. The Chair lays before the Senate the veto message of the President, which will be read.

Mr. GEAR. I understood that the Senator from Missouri agreed to yield to me to call up a private bill.

Mr. HALE. I call for the regular order.

The VICE-PRESIDENT. Objection is interposed. The message will be read.

The Secretary read the message, as follows:

To the House of Representatives:

I return herewith without approval House bill No. 7977, entitled "An act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes."

There are 417 items of appropriation contained in this bill, and every part of the country is represented in the distribution of its favors.

It directly appropriates or provides for the immediate expenditure of nearly $14,000,000 for river and harbor work. This sum is in addition to appropriations contained in another bill for similar purposes amounting to a little more than $3,000,000, which have already been favorably considered at the present session of Congress.

The result is that the contemplated immediate expenditures for the objects mentioned amount to about $17,000,000.

A more startling feature of this bill is its authorization of contracts for river and harbor work amounting to more than $62,000,000. Though the payments on these contracts are in most cases so distributed that they are to be met by future appropriations, more than $3,000,000 on their account are included in the direct appropriations above mentioned. Of the remainder, nearly $20,000,000 will fall due during the fiscal year ending June 30, 1898, and amounts somewhat less in the years immediately succeeding. A few contracts of a like character, authorized under previous statutes, are still outstanding, and to meet payments on these more than $4,000,000 must be appropriated in the immediate future.

If, therefore, this bill becomes a law, the obligations which will be imposed on the Government, together with the appropriations made for immediate expenditure on account of rivers and harbors, will amount to about $80,000,000. Nor is this all. The bill directs numerous surveys and examinations which contemplate new work and further contracts, and which portend largely increased expenditures and obligations.

There is no ground to hope that in the face of persistent and growing demands the aggregate of appropriations for the smaller schemes not covered by contracts will be reduced or even remain stationary. For the fiscal year ending June 30, 1898, such appropriations, together with the installments on contracts which will fall due in that year, can hardly be less than $30,000,000; and it may reasonably be apprehended that the prevalent tendency toward increased expenditures of this sort and the concealment which postponed payments afford for extravagance will increase the burdens chargeable to this account in succeeding years.

In view of the obligation imposed upon me by the Constitution, it seems to me quite clear that I only discharge a duty to our people when I interpose my disapproval of the legislation proposed.

Many of the objects for which it appropriates public money are not related to the public welfare, and many of them are palpably for the benefit of limited localities or in aid of individual interests.

On the face of the bill it appears that not a few of these alleged improvements have been so improvidently planned and prosecuted that after an unwise expenditure of millions of dollars new experiments for their accomplishment have been entered upon.

While those intrusted with the management of public funds in the interest of all the people can hardly justify questionable expenditures for public work by pleading the opinions of engineers or others as to the practicability of such work, it appears that some of the projects for which appropriations are proposed in this bill have been entered upon without the approval or against the objections of the examining engineers.

I learn from official sources that there are appropriations contained in the bill to pay for work which private parties have actually agreed with the Government to do in consideration of their occupancy of public property.

Whatever items of doubtful propriety may have escaped observation or may have been tolerated in previous Executive approvals of similar bills, I am convinced that the bill now under consideration opens the way to insidious and increasing abuses, and is in itself so extravagant as to be especially unsuited to these times of depressed business and resulting disappointment in Government revenue. This consideration is emphasized by the prospect that the public Treasury will be confronted with other appropriations made at the present session of Congress amounting to more than $500,000,000.

Individual economy and careful expenditure are sterling virtues which lead to thrift and comfort. Economy and the exaction of clear justification for the appropriation of public moneys by the servants of the people are not only virtues but solemn obligations.

To the extent that the appropriations contained in this bill are instigated by private interests and promote local or individual projects, their allowance can not fail to stimulate a vicious paternalism and encourage a sentiment among our people, already too prevalent, that their attachment to our Government may properly rest upon the hope and expectation of direct and especial favors, and that the extent to which they are realized may furnish an estimate of the value of governmental care.

I believe no greater danger confronts us as a nation than the unhappy decadence among our people of genuine and trustworthy love and affection for our Government as the embodiment of the highest and best aspirations of humanity, and not as the giver of gifts, and because its mission is the enforcement of exact justice and equality and not the allowance of unfair favoritism.

I hope I may be permitted to suggest, at a time when the issue of Government bonds to maintain the credit and financial standing of the country is a subject of criticism, that the contracts provided for in this bill would create obligations of the United States amounting to $62,000,000 no less binding than its bonds for that sum.

GROVER CLEVELAND.

EXECUTIVE MANSION, *May 29, 1896.*

The VICE-PRESIDENT. The question is, Shall the bill pass, the objections of the President of the United States to the contrary notwithstanding?

Mr. VEST. Mr. President, there are statements in the President's message, however great may be my respect for him and his high office, that make it absolutely necessary that something should be said in defense of the action of the two Houses of Congress in passing this bill. I shall endeavor to say just as much as I deem necessary, and no more.

While unquestionably the President of the United States has the constitutional power to exercise his veto prerogative as to any measure enacted by Congress, I must be permitted to state that in my judgment the spirit of the Constitution is not consistent with the idea that the veto power should be exercised as one of the ordinary instrumentalities in administering the Government.

The debates of the Convention that framed the Constitution and the practice of the earliest Presidents show beyond question that the intention in giving this power to the President was that it should be exercised only in extraordinary emergencies when Congress had enacted an unconstitutional measure or when, through popular passion or prejudice, there had been hasty and ill-advised legislation.

During the Administrations of Washington, Adams, Jefferson, and Madison, embracing twenty-eight years of our history, the veto power was exercised seven times—twice by Washington and five times by Madison. It was never exercised by John Adams in his four years of administration, nor by Thomas Jefferson during the eight years he presided over the executive department. This convinces me beyond question how the men who were nearest to the Constitution in an era of experimental legislation when great difficulties and dangers confronted the infant Republic understood this grant of power to the Chief Executive.

Mr. President, with great respect for the President and his high office, manifest injustice has been done to the two Houses of Congress. I speak as one familiar with the details of this legislation. I wish to say frankly that there is much in this bill which I do not approve. I agree with the venerable Senator from Ohio [Mr. SHERMAN], who stated some time ago in this Chamber that he had never voted for a river and harbor bill or a tariff bill that met his entire approval.

Without elaborating the idea, the very nature of this legislation prohibits the possibility of all its details being acceptable to every legislator. It must be the result of compromise, or else there is no legislation at all. I have very little respect for the judgment of any man engaged in legislating for a country with such divers interests and immense geographical area as the United States who expects ever to find a river and harbor bill or a tariff bill, with all the conflicting interests that come together in such an enactment, absolutely harmonious and approved by his judgment.

Now, in this veto message, going into particulars, the President states, in the first place, that there is about $14,000,000 of direct appropriations contained in the bill. Without intending to be hypercritical, I submit that with all the official data before him, and the entire Bureau of Engineers at his command, the President of the United States, before criticising the action of Congress in the face of our constituency, should have stated exactly the amount of direct appropriation in the bill. Instead of being about $14,000,000, it is by actual computation $12,608,900, making a difference between the statement of the President and the actual figures in the bill of $1,391,100. Familiarity with large measures and expenditures may have brought the Executive mind to the conclusion that $1,391,100 was too inconsiderable to make him pause; but it is a large amount, and it shows that the message was drawn, not with that accuracy which generally characterizes the emanations from Mr. Cleveland, but that it is rather the result of the general trend of his mind, having never served in a representative body in his life, to minimize the sense of responsibility that rests upon a Representative or Senator as to the relations with his constituency.

Again, the Chief Executive says that the continuing contracts in the bill amount to $62,000,000. As a matter of fact they amount to $59,656,404, being a difference between the statement of the President and the bill itself of $2,343,596.

The President, in general terms, rhetorically charges Congress with extravagance. Mr. President, if he had turned to the river and harbor bills which we have enacted for the last six years he would have discovered that considering the size of the country, considering the demands of the internal commerce of the country, the largest in the world, this bill is comparatively economical. For instance, by the official report—I shall place this table in the RECORD—in 1889 we appropriated $22,397,616.96 for the two years 1889 and 1890. In 1891 we appropriated $25,136,295; and in addition to this there was $1,951,200 in the sundry civil bill, which must be added to the amount I have already given. In 1894 there was appropriated for rivers and harbors $14,166,153. It must be remembered, which was entirely overlooked obviously by the President, that these appropriations are not for one year but for two, and that the direct appropriations which we make in the pending measure must go for the next fiscal year and the year succeeding. So we have actually appropriated, instead of $14,000,000, as the President says, for the next fiscal year a little over $6,000,000, being one-half of the $12,608,900 which I have enumerated already.

RIVER AND HARBOR BILLS.

1877 to 1886, inclusive.		1887 to 1896, inclusive.	
1877	$5,015,000.00	1887	$14,473,900.00
1878	----------	1888	----------
1879	8,201,700.00	1889	22,397,616.90
1880	7,846,600.00	1890	----------
1881	8,951,500.00	1891	25,136,295.00
1882	11,441,300.00	1892	*1,951,200.00
1883	18,738,875.00	1893	*814,000.00
1884	----------		21,154,218.00
1885	13,949,200.00		21,968,218.00
1886	----------	1894	*14,166,153.00
Total	74,144,175.00	1895	11,643,180.00
			*8,400,000.00
			20,043,180.00
		1896	*11,462,115.00
		Total	131,598,677.90

*This amount for rivers and harbors, appropriated in sundry civil bill, is included here under river and harbor bill and deducted from sundry civil bill.

Total amount, 1877 to 1896, inclusive, $205,742,852.90.

Again, it is stated by the President that there is $3,000,000 appropriated in the sundry civil bill at this session, which must be added in addition to the $14,000,000 appropriated, as he said, by the pending bill. This is obviously unjust to the river and harbor bill, because that is the result of legislation already had in 1890. That $3,000,000 is absolutely necessary to preserve the faith of the Government, and this Congress is no more responsible for it than will be the Congress ten or twenty years hence.

The President also says that under this bill there will be appropriated or expended $30,000,000 for the fiscal year 1898, and he states that during that year $20,000,000 will be necessary, under the provisions of this bill, in order to meet these appropriations. As a matter of fact, the amount of continuing appropriations in 1898, instead of being $20,000,000, will be $16,612,873, a difference of $3,387,327 between the estimate of the President and the actual facts. If we add to this $6,000,000 in round numbers, being one-half of the direct appropriations for this year in the bill, we have in the year 1898, which carries the largest of all the expenditures under the continuing contracts, a little over $19,000,000, or, say, $20,000,000 in round numbers, instead of $30,000,000, as stated in the Executive message.

The President states in his message, and I shall not misquote him, that work has been entered upon without the approval of the Board of Engineers. There is no law of the United States which makes the recommendation of the Corps of Engineers imperative or coercive upon Congress. The general statutes of the United States provide that the local engineer shall first make an estimate, which shall be forwarded to the division engineer, who shall revise and pass upon it, and his report shall go to the Chief of Engineers, who shall revise that report and give such recommendations or views—that is the language of the law—such views as he may entertain upon the subject to the Secretary of War, who transmits them to Congress. There is nothing imperative, therefore, and the President so admits in his message.

But I am at a loss to know why the President, when vetoing a bill of this size and importance, did not specify the items of the bill that were obnoxious to the Executive prerogative. I have no disposition to do his excellency injustice, and therefore, upon seeing this veto message, I addressed, as the senior Senator in service upon the Commerce Committee, and in the absence of the chairman [Mr. FRYE], the following communication to the Chief of Engineers, from whom Mr. Cleveland must have obtained the information upon which he based this message. I ask that it be read.

The VICE-PRESIDENT. The Secretary will read as indicated.

The Secretary read as follows:

UNITED STATES SENATE, *Washington, D. C., May 30, 1896.*

MY DEAR SIR: As Senator FRYE has left Washington for the session, I find myself, as the oldest Senator in service upon the Commerce Committee, in charge of the river and harbor bill, and as the President has vetoed the measure I desire to call your attention to certain statements in his message, with a view to ascertaining upon what official information these statements are made, the President alleging in his message that he is officially informed of the facts which he communicates to Congress.

In his message the President says: "It appears that some of the projects for which appropriations are proposed in this bill have been entered upon without the approval or against the objections of the examining engineers." Again he says: "I learn from official sources that there are appropriations contained in the bill to pay for work which private parties have actually agreed with the Government to do in consideration of their occupancy of public property."

As the President must have obtained his information in regard to this bill from the Corps of Engineers, whose duty it is to make recommendations in regard to the improvements of rivers and harbors and superintend the expenditure of appropriations made for that purpose, I have no hesitation in asking from you a statement of the facts upon which the President based his charges.

I was not present in the Committee on Commerce at the time you first appeared before it, but Senator FRYE and other members of the committee informed me that you explained the discrepancy between the estimates of the local engineers and of yourself, as Chief of the Engineer Corps, by saying that you had been requested by the Secretary of War to make your estimates as low as possible, and you had therefore estimated for the smallest possible amount in each case.

Senator FRYE also stated to me, on the eve of leaving Washington, that you had said to him after the bill had passed both Houses of Congress that it was a good measure, and not amenable to the criticism which had been made against it.

I would be very much obliged if you could give me the information requested in this letter at once, as the veto message will probably come up for discussion in the Senate on Tuesday next.

Very respectfully,

G. G. VEST.

Brig. Gen. W. P. CRAIGHILL,
Chief of Engineers, United States Army, Washington, D. C.

Mr. VEST. As the date of that communication shows, it was addressed to the Chief of the Corps of Engineers last Saturday morning. Not receiving any reply to it, upon Monday afternoon late I telephoned just before 4 o'clock, when the Department closed, to the Chief of Engineers, asking him if he had received my communication and if he proposed to answer it. I received from him a telephonic message to the effect that my communication had been referred to the Secretary of War for instruction and that he knew nothing more in regard to it. I have up to this date received no information, and I take it, therefore, that for reasons best known to the Administration it is not considered necessary to enter into details in regard to this bill, but to indulge in general and rhetorical declamation against the extravagance and favoritism that is charged to exist in it.

Mr. President, we are now confronted with one proposition overwhelming in its character. I have already said there are details in the bill to which I did not assent except in order to procure the larger advantages which I thought would come to the whole country from these improvements. As a committeeman I was confronted with the proposition whether there should be no river and harbor bill or one with all the details of which I could not agree. We are now individually and collectively confronted with the same proposition. Are we to stop all the improvements that are so necessary to the internal commerce of this country because a creek here and a branch there have received appropriations which we think should not be made, because the Corps of Engineers have not seen proper, in their discretion, to recommend these appropriations, and because individual Senators and Representatives with local knowledge have brought such facts before the committee and caused them to recommend the appropriations?

If this bill be vetoed the probability is there will be no other enactment in this direction during the present session of Congress. What will be the result? The millions of dollars that we have appropriated heretofore upon continuing improvements will possibly go for nothing. The action of the elements, the wear and tear and decay will obliterate all that has been done heretofore by the watchful care of Congress. Because of the twenty-five or thirty or forty thousand dollars which for the sake of the argument I grant is thrown away, we are to waste millions. The great works of the country which are absolutely necessary to its internal commerce, the Mississippi River, the Baltimore Harbor—all these large improvements are to be stopped now because there are details in the bill which the Executive does not think proper to lay before Congress, but upon which he bases a veto.

I do not know and I would not be authorized to speculate as to what items of the bill are so obnoxious to the President. There is in the message one singular expression. The President says that although private parties have been heretofore permitted to go into possession of public property, we are now paying them large sums in violation of the contract originally made. I have puzzled myself as to what his Excellency refers, and I can in the wildest conjecture think of nothing else than the improvement at Brunswick, in Georgia, which is sui generis and stands upon its own foundation. In 1892 a gentleman named Goodyear, a lawyer by profession, advanced the idea that by the use of dynamite he could destroy the obstructive bar at Brunswick, Ga., a place of the largest commercial importance next to Pensacola in the Southern States. He brought his project before the Bureau of Engineers, who rejected it, as I am informed.

It was then brought by the Senators and Representatives from Georgia before the Congress of the United States. The offer was based on the idea upon which the jetties at the mouth of the Mississippi River were successfully constructed; in homely verbiage, "No cure, no pay." He was to secure 21 feet of water, for which he was to receive $30,000 or nothing. It was a mere experiment. But the bar was there, commerce was obstructed, and Congress was liberal enough, in this age of advance and invention, to give to this man the opportunity to make good what he

believed to be a great idea. He went to work and put all his means into it, borrowed and begged like these inventors generally do, and he secured within a fraction of 21 feet, amidst difficulties unparalleled and the stern, unyielding opposition by the Corps of Engineers, who, like all close corporations, resent invasion from any outsider upon their domain.

He came to Congress in 1894 with an adverse report from the investigating engineers as to the depth of water, and after hearing him, and in consideration of the great misfortune that had come upon Brunswick, financially and otherwise, and believing Goodyear to be an absolutely honest man, who had sacrificed all his estate in this venture, we recommended on the part of the Senate that the $30,000 should be paid to him, and we extended his contract. He was then to obtain 23 feet, for which he was to receive $40,000 at this session of Congress, provided he had achieved that result. He had sold his library, let me mention, to show how earnest his belief was in the idea which he had brought to light.

He came back to this Congress with another adverse report against him. The Senators and Representatives from Georgia appeared before our committee and before that of the House and urged the efficacy of the improvement. They showed 8 feet of water upon the bar in addition to what had been there when the original contract was made; and I stand here to-day, in the face of the Bureau of Engineers, and say that it is the cheapest harbor improvement ever made in the United States, one of the most worthy, done by a private citizen with his own means, done in the face of this professional opposition, as the jetties at the mouth of the Mississippi were built, in face of the criticism and opposition of the entire Bureau of Engineers. Eight feet additional water have been obtained for a cost of $30,000, a thing unheard of before in the engineering of the United States. We extended his contract in the conference committee, making it 200 feet width of channel instead of 100 feet, and paying him in the same proportion for every foot obtained.

I am here to defend this. It was right. I say there should be no monopoly, even of engineering talent, in this free country of ours, and if any private citizen comes to me as a legislator and shows where he can do work better than the Corps of Engineers and more economically I am prepared, for one, to face their criticism and to defend my action. We put that clause in the pending bill, and I stand by it, and I believe the result will be the absolute destruction of the bar at a cost below what has ever been that of any other similar work in the United States.

I shall not go further into the details, because I would enter into the field of conjecture. The result upon the great Mississippi River, in which all the Western States are peculiarly interested, would be most disastrous if the veto should be sustained. There are 16 agricultural States—and I shall not detain the Senate by statistics—immediately tributary to this great river. These 16 States produced in 1895 1,686,000,000 bushels of corn, or 78 per cent of all the corn produced in the entire United States. In 1895 they produced 325,774,000 bushels of wheat, or 68 per cent of all the wheat produced in the United States. In 1895 they produced 629,667,000 bushels of oats, or 78 per cent of all the oats produced in the United States. And I will ask permission of the Senate, without detaining them, to put into my remarks a most interesting statement made by a constituent of mine from St. Louis, Mr. Web. M. Samuel, who has studied the enormous commerce on the Mississippi River, and how it has increased from year to year, even under the partial improvement of that great stream made by Congress:

The sharp competition of other countries to supply the markets of eastern Europe has brought about this era of low prices, and these countries mainly employ their interior waterways, as is evidenced by the great awakening in their improvement in carrying their heavy products to market. A result of the condition of low water prevailing during recent years can be seen by the following statement of tonnage shipped by river from St. Louis since 1882, and it is officially recorded that the river tonnage registered at St. Louis is larger than at any other points on the Mississippi River:

	Tons.		Tons.
1882	769,905	1889	712,930
1883	677,340	1890	601,862
1884	574,910	1891	512,930
1885	534,175	1892	502,215
1886	561,895	1893	436,900
1887	637,060	1894	363,080
1888	510,115	1895	303,358

Shipment of bulk grain St. Louis to New Orleans by river since 1876.

[Reported by Geo. H. Morgan, Secretary Merchants' Exchange, St. Louis, Mo.]

	Bushels.		Bushels.
1876	1,774,379	1886	8,834,924
1877	4,101,353	1887	11,556,799
1878	5,451,603	1888	7,252,578
1879	6,164,838	1889	14,158,046
1880	15,762,664	1890	10,217,244
1881	12,993,947	1891	8,468,546
1882	8,333,417	1892	8,414,940
1883	11,059,508	1893	7,004,168
1884	6,647, 58	1894	3,481,350
1885	8,667,919	1895	1,690,417

A statement of the St. Louis and Mississippi Transportation Company, which has a larger equipment for moving grain than any on the entire river, the tonnage capacity of their 90 model barges exceeding 100,000 tons, gives the movement of grain down the river for five years as follows:

	Bushels.		Bushels.
1891	10,281,083	1894	3,650,954
1892	12,716,735	1895	2,590,045
1893	9,926,796		

For the same period the total bulk-grain tonnage movement of this company has been—

	Tons.		Tons.
1891	413,789	1894	171,229
1892	456,081	1895	161,095
1893	348,825		

No complete record of interior commerce has been collected which I can find since 1890, but the following statement of tonnage business of New Orleans has been compiled with great care by a reliable authority, and is as follows:

Report, January 25, 1894, port of New Orleans.

	Tonnage.	Value.
Sea commerce:		
1876	1,908,114	$137,136,873
1892 *	3,333,658	233,178,068
Railroad commerce:		
1880	878,494	99,761,708
1892 †	3,980,996	245,492,900
River commerce:		
1876	3,313,014	173,826,434
1892 ‡	1,934,925	72,760,956

* Increase, 70 per cent.
† Increase, 350 per cent tonnage; 150 per cent value.
‡ Decrease, 41½ per cent tonnage; 59 per cent value.

These evidences of the rapid decline of the commerce of this great river are certainly not attributable to the abandonment of water transportation, but can only be attributable to the obstacles to navigation which appear at the season of the year when most needed.

In marked contrast with the falling off of tonnage on the Mississippi River, we will state the effects of improvement in water transportation by the lakes since the completion of the St. Marys or Soo Canal, and the removal of obstructions at other points connecting the lakes. In 1886 the deepening of the St. Marys Canal was completed, securing a depth of from 12 to 16 feet. The amount of freight carried through it in 1881 was 1,878,000 tons; it was increased to 3,070,000 tons in 1886, and 9,400,000 tons in 1891. The United States engineer in charge, Major Poe, reported that it reduced the carrying rate on grain 3½ to 4 cents per bushel, and the saving on wheat alone was $2,600,000 for 1886, nearly the entire cost of the improvement.

The further increase of the depth of the locks of this canal to 20 feet has resulted in a further augmentation of tonnage to over 13,000,000 in 1894. A corresponding increase is shown in the movement of freight along the entire length of the lake route. The large reduction from 2.3 mills per ton per mile in 1887 to 0.999 mills per ton per mile in 1895 is shown as the great beneficial result. The freight traffic of the canals, according to the latest official compilation of the whole country, shows an increase from 21,044,296 tons in 1880 to 48,668,325 tons in 1890. It would be impossible to furnish a more effective argument in favor of the economy of improvements to make water carriage safe, easy, and cheap than that afforded by the almost marvelous results that have attended the deepening of the Soo Canal; and as the laws of trade are the same all over the country, on the Mississippi and on the lakes, it is strictly warrantable to assume that the deepening of the low-water channel on the river would be attended by similar results.

It should also be considered that this canal is open only, on an average, seven months in the year.

Previous to 1880 climatic difficulties were urged against grain moved by way of the Gulf; the successful movement of large quantities at all seasons and the large increased movement by rail have long since disproved this illusion. What, therefore, except the existence during the most useful period for navigation of obstacles to its easy navigation, can have produced the results of the past decade? In marked contrast with the falling off in shipment of grain down the river, you will find an astonishing increase of export of corn during the single month of December at New Orleans, carried there by rail. Her exports of corn during this month was 3,175,000 bushels. Contrasted with other leading ports of the United States, the export of corn for that month was as follows:

	Bushels.
New Orleans	3,173,111
Baltimore	2,393,168
New York	1,735,694
Philadelphia	683,000
Boston	202,647

I take these figures from a recent and most elaborate editorial in the Manufacturers' Record, of Baltimore, a paper most reliable in all its statements. Commenting upon the facts, it says:

"It will be seen that New Orleans has steadily advanced as a corn exporting port, and during the past month of December led all the American cities and handled one-third of all the corn shipped out of the country."

There are two explanations of this remarkable turn of the tide southward.

First. While the river channel south of St. Louis during the last fall, when freight engagements were made for the coming season, was blockaded by sand bars, the river from New Orleans to the Gulf, by reason of the great success of the Eads jetties, was open for the steamships of the world.

Second. In the movement of their grain, the producers of the Mississippi Valley, being unable to use their natural cheap waterways, still found the cheapest outlet by rail to tide water at that seaport.

The result is an enormous and unnecessary tax upon the people of the grain-producing States in shape of increased transportation rates.

It has been shown in the memorial of the Merchants' Exchange that, on a fair navigable stage of water, grain has been moved from St. Louis to New Orleans for $1.60 per ton for the distance, or 1.30 mills per ton per mile, while the rail rate for the whole country for last year was 8.30 mills per ton per mile. The present schedule rate of transportation from St. Louis to New Orleans is 12 cents per bushel; the rate per bushel by river, supposing the river channel is in ordinary stage, is 4 cents per bushel; thus you see a difference of 8 cents in favor of the river. The total export of wheat and corn

alone from the United States during the year 1894 was 230,772,658 bushels, the main part of which was produced in the States resting upon the Mississippi and its navigable tributaries. If only one-fourth of this was shipped by New Orleans for export, the annual saving would be $4,615,353; but this is only the direct saving, as you are well aware. Waterways regulate the transportation rate of railways running parallel and across them, as has been demonstrated time and again by the experience of the Erie Canal, the Lakes, etc. If, therefore, the Mississippi reduces directly by 8 cents per bushel the rates of shipments down the valley, it is fair to presume they will reduce the rates at least 4 cents per bushel on the remaining three-fourths of the 230,772,658 bushels transported to the seaboard for export. This would make a saving of $6,900,000 additional. There is, however, at least 200,000,000 bushels of this product that goes into our interior commerce and to consumers in sections where the consumption exceeds the production.

This would add another saving of $8,000,000; the surplus we have to sell for export regulates the price of that which finds a home market, and the amount of saving in freight charges adds to the value of all that remains, and considering this increased value only half of the above, or 2 cents per bushel, on the remaining 2,200,000 bushels, which finds a home market and enters into the production of food products, you can easily see that you would save to the producers of this valley in one year over $25,000,000 on their grain crop alone. This estimate includes but a small portion of the traffic of the vast valley tributary to its navigable rivers, the tonnage of grain referred to being only 25,000,000 tons, while it is estimated that from the combined industries of this valley there is placed annually upon the distributive market of the world 150,000,000 tons freight, and considering a small saving on this whole amount, which would be produced by the active competition of an improved and regular navigable channel, it is certainly safe to assert that the benefit would exceed $50,000,000 annually, and so closely are we bound in commercial relations it would be felt in every portion of our country.

Mr. President, who can overstate the importance of the waterways of the United States? Take the great Soo Canal, for which we commenced appropriating in the years before 1886. The Soo Canal, according to the official reports, was completed in 1886, procuring a depth of from 12 to 16 feet. The amount of freight carried in 1881 was 1,878,000 tons. It was increased to 3,070,000 tons in 1886, and to 9,400,000 tons in 1891. These enormous figures are beyond any logic, beyond any statement in regard to the effect of an improved waterway upon the internal commerce of the country. The amount of freight carried through it in 1881, as I have stated, was 1,878,000 tons, which was increased to 3,070,000 tons in 1886, and to 9,400,000 tons in 1891. The United States officer in charge, Major Poe, reported that it reduced the carrying rate on grain 3½ to 4 cents per bushel, and the saving on wheat alone was $2,600,000 for 1886, nearly the entire cost of the improvement. We went on with this improvement, under appropriations from Congress, to deepen the canal, and the result has been an enormous increase in the tonnage. I could go on until my strength was exhausted proving mathematically that every dollar judiciously expended upon the great waterways of the country comes back tenfold in advantage to the people of this country.

Mr. President, I know it is usual with cheap talk in both Houses of Congress to fill the public press with criticisms of macadamized streams and insignificant creeks and branches that are unworthy of improvement. This has gone on for years; but here in one single item is a mathematical demonstration of the fact that cheap water transportation is absolutely necessary and is becoming more so each day to the people of this country. Go to Europe and look at what those great nations have done and have been compelled to do on account of the necessity for economizing in transportation. We have now brought down railroad transportation to a minimum cost in this country. It can go no lower without placing the railroads in bankruptcy. We must turn now to what nature has given us in the great rivers of the continent. I prophesy—and I hope that "coming events cast their shadows before"—that in a very few years the attention of the legislators of the United States will be drawn to the necessity of improving these waterways in order that we may give to the people of the United States economical and cheaper transportation.

Have Senators noticed the revolution in the grain traffic of the United States as illustrated by the exports from the harbor at New Orleans? In December last—and I shall not detain the Senate longer with statistics—there passed through the harbor of New Orleans outward bound 3,173,111 bushels of grain; in the same month at Baltimore, 2,393,168; at New York, 1,735,694, and at Boston, 202,647 bushels. The grain trade of the United States to Europe has been revolutionized as to transportation. This grain did not go down the Mississippi River to New Orleans. It went by rail, because we have not sufficiently improved that great river to give a uniform depth from Cairo to the mouth. It went by rail. On account of the construction of the jetties below New Orleans, against the opposition of the Bureau of Engineers, New Orleans has been made the nearest point upon tidewater for the outgoing grain of the Northwest.

Mr. President, the Chief Executive alludes in the closing part of his message to the fact that the $62,000,000 of continuing appropriations contained in the bill are just as obligatory upon the people of the United States as the bonds which have been issued by the Government, as he says, to sustain the public credit. If I were disposed to inject a financial proposition into this debate, which I shall not, I would mildly suggest that there is no interest upon the $62,000,000 which we propose to pay for these continuing improvements; that we do not propose to mortgage posterity, to use an expression in one of his messages, but we are simply providing for cheaper and more economical transportation for the people of the United States at this time and in the immediate future.

The President says that these continuing appropriations furnish concealment for extravagance. Upon the other hand, they have the exact opposite effect. Under the old system there was a scramble at each session of Congress for as large appropriations as possible for specific objects. Under the continuing-contract system every dollar to be expended is nominated in the law, and the Bureau of Engineers have no right to expect any other appropriation at the hands of Congress than that already made. The advantage of the system, as known to every intelligent man, is that the Bureau can see ahead exactly upon what they must depend, and their work is graduated and measured according to the means which Congress has put at their disposal. Every engineer officer who has come before our committee or made a report has indorsed in the warmest terms the contract system. The Secretary of War, in his last report, spoke of it in the highest terms, and said it had saved an enormous amount of money to the Treasury of the United States. It has been stated by intelligent engineers that 30 per cent is saved by the continuing contracts. Where is the extravagance in making them? It is safe to assume that of the $62,000,000, taking the estimate of the President as correct, there will be only $42,000,000 expended to finish these projects which are contained in the continuing contracts.

From what quarter comes the assault upon continuing contracts? Not from the Bureau of Engineers; not from the Secretary of War, who has officially indorsed the system. Has it originated with the President of the United States? I will not assume that the President has the slightest idea of opposing the improvement upon these great rivers and waterways. In his first message to Congress, when elected the first time, he warmly, eloquently, enthusiastically indorsed the improvement of the great waterways of the United States. In the platform upon which he was first elected President there was a clause put by the Democratic national convention in our platform specifically indorsing the improvement of the Mississippi River, and Mr. Cleveland accepted the nomination upon that platform, and, as I have always understood, has remained upon it ever since.

This, Mr. President, is all I propose to say in regard to the pending bill. If Congress see proper to sustain the Chief Executive and to stop these improvements, as a matter of course they fully appreciate the responsibility assumed; but I do not believe that any such purpose is entertained.

Mr. SHERMAN. Mr. President, I shall very briefly state, for I do not wish to detain the Senate, the reasons why I shall vote for the passage of the bill, the opinions of the President to the contrary notwithstanding. In fact, I believe no appropriation bill like this ought ever to be vetoed under any circumstances. This bill does not contain mandatory provisions. It is an appropriation by the people of the United States, through their Representatives and Senators, setting aside or designating so much money for the various improvements of rivers and harbors throughout the United States. That the improvements are of vital necessity and great benefit to the people of the United States there can be no doubt.

It is true, as the President states, that sometimes appropriations are made for insignificant objects, but they are generally for small amounts, and even they are very important to the people affected by them. All of these great improvements for the Mississippi and other rivers and the lakes and the Atlantic coast are vitally important. They add to the wealth of our people; they add to our commerce. Without them this country could not have advanced at the enormous rate that it has done within the last fifty or sixty years. In every country in the world, and among the most intelligent countries on earth, much larger sums are expended for this purpose than we spend. The islands of Great Britain, the whole of which could be embraced within a portion of the Atlantic coast, expend vast sums of money on their harbors. They are wonderful works of art; they are of immense advantage to the commerce of that great nation.

Then there is another reason why the President never ought to veto an appropriation bill. These appropriation bills are not mandatory. Let me read the beginning of the pending bill:

> That the following sums of money be, and are hereby, appropriated, to be paid out of any money in the Treasury not otherwise appropriated, to be immediately available, and to be expended under the direction of the Secretary of War and the supervision of the Chief of Engineers, for the construction, completion, repair, and preservation of the public works hereinafter named.

It is not a mandatory appropriation of so much money that must be expended by the Secretary of the Treasury under the direction of the Secretary of War, but it is merely permissive; and in the case of every one of these appropriations, if the Secretary of the Treasury should say he has no money for this purpose that is not otherwise appropriated, as a matter of course he is not bound to expend it. The President of the United States has complete control over all these various subjects. Therefore I can not conceive a case where one of the ordinary regular appropriation bills should

be vetoed by the President, for, after all, it is a mere permission granted by Congress to the executive officers to do certain things. It does not require them to do it, but only permits them to do it, and authorizes the money to be paid out of the common Treasury of the United States for that purpose. But if the officers who are allowed discretion in the matter say, "There is no money in the Treasury for that purpose; it is otherwise appropriated," or if the President of the United States should see proper to say, "That object of appropriation is not a wise one; I do not concur that the money ought to be expended," that is the end of it. There is no occasion for the veto power in a case of that kind.

The provision in regard to contracts is a vitally important one. Every man of business knows that if he were about to build a house or any other structure he would make careful estimates in detail; he would apply to a contractor to build the house or whatever the improvement might be, and the contractor would make his contract and go on and build the work. That is all right. There is a contract, but here there is no demand, no direction, no requirement in the law; there is not a single feature of it that requires the President or the heads of the Departments to make the contracts ahead of time. But the bill says uniformly they may do it. It leaves the entire discretion to the officer, and therefore the Secretary of War, as the officer authorized to make the contracts, is not bound to make them. He is merely authorized to make them. If, in his judgment, the situation of the Treasury or other causes combine to render the improvement important he makes the contract in advance. That recent stipulation and provision put in laws has been very beneficial indeed, not only in this branch of the public service but in every other branch of it where permission is given ahead of time to make complete contracts for any given work.

Under these circumstances it seems to me the House of Representatives and the Senate of the United States ought to stand by their undoubted and exclusive power to appropriate money, leaving it to the President to expend it according to the terms of the law only when there is sufficient money in the Treasury for that purpose, or when the Executive authorities concur with the Congress of the United States as to the appropriation. There is a wide distinction between a mandatory law, which is binding upon the President and all the Departments and all the people of the United States, and the mere permission to expend so much money for a particular object.

I can not imagine a veto of any bill of this kind which I would support, because the veto is rather a dangerous power to confide in anybody. It is confided to the President of the United States, and it is the greatest mark of confidence that the people of the United States could possibly repose in the President of the United States. That power ought never to be abused. It ought never to be exercised except in a clear case where an unconstitutional act has been passed or a mandatory provision has been made which the President of the United States thinks is against the public policy and the good of the people. The veto power ought to be watched. It has been exercised of late years, it seems to me, with too much latitude. As the Senator from Missouri [Mr. VEST] properly says, in the early period of our history it was a rare event to have a veto message come to us, while in modern times we have them almost every week or so or almost every day or two.

We ought to curb or check, if possible, the exercise of this power, unless it is exercised only in those great cases contemplated by the Constitution, when the President may, appealing to the people of the United States, say Congress in this measure has gone wrong; it has required what ought not to be done, and therefore he can interpose his veto. But it should only be applied to cases like that, which come within the plain meaning and object of the grant of the veto power to the President of the United States.

Mr. SMITH. Mr. President, after listening to the speeches of the Senator from Missouri [Mr. VEST] and the Senator from Ohio [Mr. SHERMAN], two of the most able, astute, and adroit Senators in this body, favoring the bill as they do, I hesitate to offer views which differ from theirs. In doing so, however, I feel that I am but carrying out what I believe to be right and proper.

I desire to say at the outset, for the benefit of the Senator from Ohio and the Senator from Missouri, that the question of Executive veto is not new in this Chamber. It is not of recent origin. It dates back to the days of Andrew Jackson, when he vetoed a similar bill, followed by President Tyler, President Polk, and President Pierce, and coming down to the protest of General Grant, which, I think, it would not be amiss for me to read at this time. In 1876, when Congress had passed a bill which did not amount to one-fifth of the present measure, he said:

> There is very great necessity for economy of expenditure at this time growing out of the loss of revenue likely to arise from a deficiency of appropriation to insure a thorough collection of same. The reduction of the revenue districts, diminution of special agents, and total abolition of supervisors may result in great falling off of the revenue. It may be a question to consider whether any expenditure can be authorized under the river and harbor appropriation further than to protect works already done and paid for. Under no circumstances will I allow its expenditure upon works not clearly national.

With Jackson, Tyler, Polk, Pierce, Grant, and coming down to President Arthur, these bills have met Executive disapproval. I do not believe we need any stronger argument than the fact that these men believed it necessary to veto such bills to show that there is something wrong, and has been practically from their inception.

I desire to say, so far as concerns the present veto, that a difference has arisen between the figures of the President and those of the Senator from Missouri. The estimates of one, no doubt, have been computed and compiled by the engineers of the Government, while the Senator from Missouri, who is as efficient as they are, has arrived at figures which differ with them.

But both are entitled to consideration. So far as the continuing-contract system is concerned, no one, so far as I know, undertakes to find fault with that system, provided any is to be followed. I am not opposed to the improvement of the great highways of navigation in the way of river and harbor appropriations; but at a time like this in the history of this country, such as has never been known before, when this committee appears before this body with a bill carrying $10,500,000 for objects concerning the worthiness of which the judgment of the Engineer Corps has not been asked, and when $1,500,000 is appropriated for objects which the engineers have reported to be unworthy, making a total of $12,000,000 which this bill carries which does not meet the approval of the engineers, or as to which their judgment or opinion has not been asked, I say, Mr. President, with these facts before us, and with the present condition of the revenues of this Government, we are not justified in making extraordinary appropriations of this character without providing some means for their payment.

Mr. WHITE. Will the Senator yield to me for a question?

Mr. SMITH. Certainly.

Mr. WHITE. Will the Senator furnish the items constituting the sums to which he has just alluded? He has made a statement that there is a large amount of money appropriated by this bill for objects deemed unworthy, and has summed the whole amount up. I hope he will be more particular than the President in that regard, as the members of the committee are anxious to get some information.

Mr. SMITH. I should suppose that the members of the committee would not want any information regarding the $10,500,000 for improvements for which the engineers have not reported or as to which their opinion has not been asked.

Mr. WHITE. What are the items which constitute those sums?

Mr. SMITH. They no doubt will be furnished by the engineers.

Mr. VEST. The Senator from New Jersey is laboring under a misapprehension, and the Corps of Engineers will so inform him. Under the general statute passed in 1894, after the regular surveys which were authorized by the river and harbor bill, we enacted that no other surveys or reports should be made except under a direct resolution of Congress. During this session a large number of resolutions have been passed by Congress calling for additional surveys and reports. These reports of the Bureau of Engineers, as they themselves will state and have stated, and I can produce the proof, are considered as recommendations, and Congress is entirely authorized to act upon these reports, which are filed and are accessible to the Senator or anybody else. So it is not true, it is an incorrect statement, to say that there were no recommendations by the Bureau of Engineers. They were required to make surveys and to report the condition of the work with the view to improvement, and while they did not say in reponse to those resolutions, "we recommend the appropriation of so much money," they made such reports that the necessity for the improvements was apparent. That is the whole case.

Mr. SMITH. I desire to say, Mr. President, that the statement I have made was made after my personal call at the Department of Engineers of this Government, and the information was furnished me in that way. So I made no mistake in making the statement that $10,500,000 is appropriated in this bill without any warrant of fact or inquiry from the engineers, and $1,500,000 was appropriated for objects which the engineers have reported to be unworthy. That is $12,000,000.

I would not under ordinary circumstances oppose any measure which was likely to benefit the agricultural interests of this country. I recognize the fact that the farmer and the manufacturer must go hand in hand, and that what is for the benefit of one is for the benefit of the other.

Whilst the appropriations contained in this bill are extremely large, under ordinary conditions they would not receive any objection at my hands, nor should my voice be raised or my vote be cast against them; but with the revenues of this Government $30,000,000 less this year than the expenditures, for Senators to vote for the passage of a bill of this character, knowing the facts which surround us, without providing any means whatever for the payment of the expenditures, does not seem to me to be wise, proper, or prudent legislation.

I desire to say, in conclusion, Mr. President, that with the necessity that follows the passage of such laws, with the expenditure of these moneys, which necessitates the issuing of bonds in order to raise the funds wherewith to pay them, it does not seem to me consistent for Senators who criticise the action of the Executive in issuing bonds to make their issuance necessary by voting for appropriation bills of this character.

Mr. VILAS. Mr. President, I desire to say only a few words on this subject. The Committee on Commerce was so considerate of every interest which was connected with the State which I represent in part that if I could have yielded to the sense of obligation which sometimes presses heavily by reason of considerate treatment by the committee, I should have felt myself bound to vote for the passage of this bill. Yet when the direct question was presented to me whether I could lend my vote to the bill, important as were the interests which our State, or some localities in it, possessed in its passage, valuable as I believe the improvements projected in the State would be to the public interests, I could not bring myself to face the conviction, under the present circumstances of our affairs, that an appropriation of such magnitude ought not to be superadded to the weighty obligation already incumbent upon the distressed shoulders of the people of this country.

I do not disagree with the theory of the committee in respect to continuing contracts. I look upon the action of the committee and of Congress, so far as adopting that system of making public improvements is concerned, as wise and prudent. It is the true way beyond all question in which these great public improvements ought to be projected, carried on, and consummated.

Nor, Mr. President, in what I say do I desire to enter into any specific or particular defense of the veto message which has been read. Indeed, I am sure that Senators will recognize that the criticism upon it has been of a somewhat inconsequential nature.

The distinguished Senator from Missouri [Mr. VEST], who addressed us with that sweet captivation of eloquence which he always brings to the support of everything he presents to the Senate, ingeniously suggested a sort of laxity or inexactness in the figures of the President in his message as if it intimated, I suppose, a want of that particular and minute consideration which was to have been expected; yet I venture to say that even the distinguished Senator from Missouri, with that faithful and patient study which he is in the habit of giving to public business intrusted to him, did not himself make the computations and figures from which he presented the summary of results in the bill. More likely it was the work of a clerk, I should suppose.

Mr. VEST. Will my friend permit me?

Mr. VILAS. Certainly.

Mr. VEST. I ought to have stated at the time the Senator from New Jersey [Mr. SMITH] made his remarks upon that portion of what I said that the estimate which I presented to the Senate was the result of the labor of experts, including the clerks of the Committee on Rivers and Harbors of the House of Representatives and of the Commerce Committee of the Senate, and of the absent chairman of the Committee on Commerce and myself. We all made this calculation, compared it, and corrected it; and, without arrogating to myself any especial aptitude for figures, I think I can state I know it to be absolutely correct.

Mr. VILAS. Mr. President, I should be very far from challenging the correctness of the figures of the Senator from Missouri or manifesting any want of confidence in him, but the statement which he has just made corroborates my impression beforehand. He used figures not of his own making, although they had his supervision.

Mr. VEST. Taken out of the bill.

Mr. VILAS. Taken out of the bill by clerks. I have not a question of doubt but that the President must have used figures also taken out of the bill by the engineers; and when you come to apply the figures of the bill to this, that, or the other, or undertake to state in figures what the directions of the bill may require in this or that respect, there is some element of judgment entering into the matter, and there might be very easily a variance of judgment doubtless, which could be reconciled at once if the different bodies of experts were to confer together.

But all that I desire to say on that subject is simply that, of course, the President must have taken—I know nothing of it—the figures which were given by the Engineer Department, and of course he only professes in his message to speak of round numbers by the million. It was not important that he should mention the last particular cent of calculation. I remember well that when this subject incidentally—I do not know whether it was when this bill was under debate or some other—but when this subject incidentally was before the Senate the distinguished Senator from Maryland [Mr. GORMAN] spoke of this bill as carrying $62,000,000 of contracts, using the same figures which we find in the message. So it seems to me it is hardly worth while to introduce to the subject, as if it were a matter of serious complaint or an indication of a want of particular thought, that there is some little difference between the figures of estimated results or estimated aggregates by the committees and by the Engineer Corps.

Mr. President, if we are correctly informed, the amount of money appropriated by this Congress before we come to the river and harbor bill at all, that is, by the other bills, exceeds $500,000,000. The Senator from Missouri will correct me if I am wrong in supposing that it approaches $510,000,000.

Mr. VEST. That includes the appropriations for rivers and harbors.

Mr. VILAS. No; I think the river and harbor bill will carry it to above $520,000. That is my understanding.

Mr. VEST. That was the statement of the Senator from Maryland [Mr. GORMAN]. I never made it.

Mr. VILAS. Since the statement of the Senator from Maryland was made there have been considerable additions put upon the appropriation bills as they passed through the Senate; the amounts have been increased; and if the bills shall finally become laws as they were amended the amounts will be larger.

Now, this is the proposition which I desire to make, and it is the one ground of objection upon which I find myself, I may say, absolutely convinced of the duty which rests upon the representatives of the people of the country to oppose this expenditure. I can not now undertake to criticise, and I shall not go into the items to criticise, particular appropriations in this bill. The practice of throwing all appropriations for the improvement of rivers and harbors into one omnibus appropriation carries with it the aspect of the job; it is trade always when that is done, and it can not be helped; perhaps it could not be helped even if it were done by separate bills, yet I think the practice of Congress would be much more in accordance with its dignity and eventuate in the public interest if each separate and particular public improvement were made the subject of a separate and particular bill, although, in my own judgment, no scheme will ever yield a very good result for the public until the entire system of public improvement, both of rivers and harbors and public buildings, is placed under some competent executive board or bureau which shall have a control over the subject, to which Congress will give respect. However, I am not going to debate that question at this moment. I desire to draw attention to the enormous aggregate of our expenses.

The Senator from Missouri has depicted the value of our improvements. That has been in instances very great, and, with his accustomed judgment, he has selected those in respect to which the value of the improvement has been enormous, but at the same time who here does not know that millions of dollars have been wasted which have been appropriated by river and harbor bills? And millions more will be wasted undoubtedly upon alleged improvements or schemes of improvement which will result in no public benefit, or none at all compared with the public loss.

Now, let me ask the attention of the Senate for one moment to the state of expenditure in this country at this time as compared with what it was a generation ago. We have gone on in the habit of making large appropriations, expending millions where formerly thousands were sufficient, until at last we deal in figures as magnificent as were ever conceived in the brain of an oriental prince who had no sort of regard for the people upon whose shoulders his obligations and burdens were laid. We have come to deal in a spirit of magnificence about our country which has entirely excluded from view the fact that our people are composed simply of individual men, and that the sum of aggregate advantage is but the sum of individual advantage, that the sum of burdens is but a collection of individual responsibilities and liabilities.

We have gone on until now the term which shocked us but five or six years ago, the billion-dollar Congress, has become so familiar to us that we are going beyond the billion-dollar Congress already in a session which was begun under professions of the strictest economy to be observed by that highest of sanctions for Congressional performance—political apprehension; for in this very Congress our appropriations bid fair to outstrip by many millions the appropriations of that Congress which became famous in history, and will doubtless always retain its place, as the billion-dollar Congress.

Sir, let me draw attention but briefly to the extent to which this has gone on, and then I shall withhold further discussion, for I do not care to stand merely breasting the surge, when I know that in all probability but one result can be expected. I draw attention, first, to the receipts of this Government in the years preceding the great civil strife, and I will ask to print a table showing the receipts of the Government for the years from 1845 to 1861, the fiscal years ending June 30. I shall not detain the Senate by going more deeply into the figures than to say, if I may be permitted to print this table in my remarks, that the largest sum of receipts from taxation of the people in any year previous to the war was the year 1854, when the receipts were $64,224,190.27. In no other year but that of 1856–57 afterwards were the receipts from taxation by this Government above $60,000,000.

The table referred to is as follows:

Receipts of the Government.

Fiscal year ended June 30—	Taxation.	Lands.	Miscellaneous.	Loans.	Total.
1845	$27,528,112.70	$2,077,022.30	$163,998.56	----------	$29,769,133.56
1846	26,712,667.87	2,694,452.48	92,126.71	----------	29,499,247.06
1847	23,747,864.66	2,498,355.20	100,570.51	$25,679,199.45	52,025,989.82
1848	31,757,070.96	3,328,642.56	351,037.07	21,256,700.00	56,693,450.59
1849	28,346,738.82	1,688,959.55	1,038,649.13	28,588,750.00	59,663,097.50
1850	39,668,680.42	1,859,894.25	1,847,218.23	4,045,950.00	47,421,748.90
1851	49,017,567.92	2,352,305.30	943,106.65	----------	52,312,979.87
1852	47,339,326.62	2,043,239.58	345,820.69	----------	49,728,386.89
1853	58,931,865.52	1,667,084.99	738,623.89	----------	61,337,574.40
1854	64,224,190.27	8,470,798.39	854,716.54	----------	73,549,705.20
1855	53,025,794.21	11,497,049.07	481,087.27	----------	65,003,930.55
1856	$64,022,863.50	$8,917,644.93	$977,633.03	----------	$73,918,141.46
1857	63,875,905.05	3,829,486.64	926,121.98	----------	68,631,513.67
1858	41,789,620.96	3,513,715.87	1,254,232.76	$23,716,300.00	70,273,869.59
1859	49,565,824.38	1,756,687.30	2,082,559.33	28,287,400.00	81,692,471.01
1860	53,187,511.87	1,778,557.71	1,010,764.31	20,775,200.00	76,752,033.89
1861	39,582,125.64	870,658.54	892,199.64	41,861,709.74	83,206,693.56
Total	762,323,697.37	----------	----------	----------	----------

Mr. VILAS. I add next the following statements of the expenditures during those same years:

Sundry expenditures.

Year ended June 30—	Legislative.	Executive.	Judiciary.	Pensions.	Under Interior Department (omitting pensions).
1845	$713,594.16	$847,342.28	$628,012.17	$2,498,191.06	----------
1846	944,270.84	856,909.44	544,732.30	1,914,763.14	----------
1847	974,324.14	875,718.80	571,377.88	1,841,794.40	----------
1848	953,392.75	953,170.80	593,654.81	1,286,332.06	----------
1849	1,105,421.57	1,065,044.85	595,925.22	1,246,746.46	----------
1850	1,127,309.92	1,120,663.02	635,982.38	1,634,591.80	$1,765,933.07
1851	1,274,348.58	1,209,039.23	772,248.33	2,209,435.19	2,905,899.79
1852	1,248,017.90	1,248,011.91	718,065.44	2,345,223.86	2,853,605.08

1858	7,059,196.75	g 982,676.47	25,485,383.60	13,976,000.59	17,937,217.54	9,684,537.99	81,585,667.76
1859	5,963,795.66	1,035,860.02	23,243,822.38	14,712,610.21	16,636,165.26	17,405,285.44	83,751,511.57
1860	6,148,655.41	1,163,207.15	16,409,767.10	11,513,150.19	20,658,007.92	17,613,628.00	77,462,102.72
1861	6,156,199.25	1,142,973.41	22,981,150.44	12,428,577.09	15,888,030.53	22,221,881.03	84,578,834.47

a $7,629,108.90 paid to Mexico under treaty and act of July 29, 1848, omitted.
b $4,308,866.31 incurred by treaty with Mexico omitted.
c $5,759,091.11 incurred by treaty with Mexico omitted.
d $3,713,480.78 incurred by treaty with Mexico omitted.
e $7,000,000 paid under treaty of 1853 with Mexico omitted.
f $3,050,122.09 paid under treaties of 1848 and 1853 with Mexico omitted.
g $408,731.44 paid under treaty with Denmark omitted.

What were our expenditures? Sir, the entire civil list of the Government in only two years exceeded $7,000,000. Our expenditures, excluding the payment on the public debt, rarely ran as high as $60,000,000, all told, excluding, of course, the Post-Office, which I am not reckoning in the calculation, but including the deficit in the Post-Office Department, which is reckoned. I will add that table of the expenditures of the Government to the receipts for that year.

Let me now draw attention to another point. I have here a table showing the receipts from taxation by the Government during the fiscal years beginning with 1879 and ending with 1894. The highest receipts from taxation of any year of our history were in the year 1890, which was the culmination of our prosperity. In that year the total taxation was $373,576,616.96, of which about $230,000,000 were from customs, the largest of any year, I believe, in the history of our country.

Mr. GEORGE. What year was that?

Mr. VILAS. The fiscal year ending June 30, 1890. I will put that statement of receipts and expenditures into the RECORD, with the permission of the Senate.

The statement referred to is as follows:

Receipts.

Fiscal year ended June 30—	Customs.	Internal revenue.	Bank taxes.	Total by taxation.
1879	$137,250,047.70	$113,561,610.58	$6,747,500.32	$257,559,158.60
1880	186,522,064.60	124,009,373.92	7,014,971.44	317,546,409.96
1881	198,159,676.02	135,264,385.51	8,116,115.72	341,540,177.25
1882	220,410,730.25	146,497,595.45	8,956,794.45	375,865,120.15
1883	214,706,496.93	144,720,368.98	9,111,008.85	368,537,874.76
1884	195,067,489.76	121,586,072.51	3,108,730.13	319,762,292.40
1885	181,471,939.34	112,498,725.54	2,914,222.25	296,884,887.13
1886	192,905,023.44	116,805,936.48	2,693,712.87	312,404,672.79
1887	217,286,893.13	118,823,391.22	2,385,851.18	338,496,135.53
1888	219,091,173.63	124,296,871.98	1,748,566.85	325,136,610.46
1889	223,832,741.69	130,881,513.92	1,536,087.16	356,250,342.77
1890	229,668,584.57	142,606,705.81	1,301,326.58	373,576,616.96
1891	219,522,205.23	145,686,249.44	1,236,042.60	366,444,497.27
1892	177,452,964.15	153,971,072.57	1,261,338.11	332,685,374.83
1893	203,355,016.73	161,027,623.93	1,392,623.63	365,775,264.29
1894	147,111,232.81	131,818,530.62	1,610,867.56	280,540,630.99

Mr. VILAS. Sir, let it be observed, not that we have simply fallen off in our expenditures, but that we have greatly fallen off from our receipts in some portions of this period, and if we are correct in the estimates which have been given to us of the outlays proposed by this Congress in the appropriation bills now to be passed, we have not only to make up the highest measure of taxation ever paid by the people of this country in a single year, but we must put $50,000,000 on top of that before we reach the expenditure in this river and harbor bill at all.

Where is the money to come from? Senators say, as has been said somewhat recklessly in another quarter, too, it seems to me, "We have got the money in the Treasury." That money in the Treasury was borrowed only for the purpose of maintaining the credit of the United States, and while I do not deny that Congress has a right to appropriate it—indeed, two years ago I made an elaborate argument upon the floor to prove the duty of the Secretary of the Treasury to pay it when Congress made the appropriation—yet when you pay it, you must resort to taxation or you must resort again to bonds to get the money to maintain the national integrity and public credit.

The Senator from Missouri says that there is a marked difference between the $62,000,000 of obligations incurred by this bill and the bonds of the United States, because the former bear no interest, and therefore that the President's observations at the conclusion of his message omitted a material circumstance. Ah, but the Senator from Missouri will recognize at once that if we expend by this river and harbor bill the moneys which we have on hand from borrowings already made, we have to follow it by more bonds, or else we have to provide more money by taxation of the people of our country; and if this money could be taken from the Treasury and applied with safety to any obligations of the United States, it seems to me the first should be those which are outstanding undischarged and upon which interest is being paid. We can save the interest by using the money to pay upon the public debt instead of using it for expenditures, if we are not to keep it in the Treasury. I think, therefore, that the observation of the President is not much out of the way.

The Senator from Ohio says also that this appropriation bill is not a mandatory bill, and he adopts the theory that all that is

necessary is for the President and Secretary of the Treasury to say, "We will not pay out the appropriation." I doubt if Senators upon this floor will agree to the proposition which he made, that it is within the discretion of executive officers to refuse to pay out appropriations which they have been commanded to discharge by Congress, if there be money in the Treasury.

But the Senator from Ohio says they need not pay these appropriations when there is no money in the Treasury. Which appropriation will the Secretary of the Treasury first be called upon to pay if you command him to pay $100,000,000 more than there is money in the Treasury? Shall he discharge the river and harbor appropriations and leave the legislative, executive, and judicial appropriations to go undischarged? Shall he pay money out upon the river and harbor improvements and leave the ordinary forces of the Government to go without their pecuniary nutriment? Of course the Secretary of the Treasury will be obliged to stop paying when he has no money to pay with, but is it the desire of this Congress to drive the Treasury to bankruptcy?

Mr. SHERMAN. Will the Senator from Wisconsin allow me to call his attention to the difference between such an appropriation and an appropriation made to carry into effect existing contracts, as salaries and the like? Nearly all our expenditures are in the form of salaries, pay to the Army, pay to the Navy, all of which are fixed by law, and therefore until they are disposed of the Secretary of the Treasury would have no right to pay under any merely contingent or permissive authority granted by law. I think that distinction has been marked all through our history, from the beginning down.

Mr. VILAS. Suppose the Secretary of the Treasury has discharged the last one of those appropriations due for the last quarter, if you please, and he has a certain sum of money in the Treasury which Congress has appropriated for improvement of some harbors or rivers, shall he refuse to go on because by and by he will come short of money? The appropriation has been made, the obligation and mandate are there, and unless you are to set up the Secretary of the Treasury and the President of the United States in a general superintending authority, with such a discretionary power over the appropriations of Congress as that would imply, to make choice between them, not according to the words of the act of appropriation, you will find that if you appropriate more than the moneys in the Treasury you soon make your Treasury bankrupt. I do not believe that Senators upon this floor can for a moment agree to that theory of the administrative function of the Secretary of the Treasury that he may exercise a discretionary superintendence over the appropriations which Congress shall see fit to make. When there is money in the Treasury his duty, beyond all question, is to observe the law as it is given to him by Congress.

Mr. President, I have pointed out summarily the extent of the obligations upon the Government, the enormous increase of revenue which must be taken from the people in some way if we are to pile up this mass of appropriations. I have pointed it out only in general figures, referring to these tables to show what our history was in the past. But, sir, when we had but 30,000,000 people we were not obliged to spend more than $2 a head. Now, when we have more than twice that number of people, our appropriations are running up to six or seven dollars a head. What is the necessity? With our increase of population are taxation and obligation of the Government expenditures to be increased in some arithmetical ratio, not in the ratio of increased numbers, when even a less ratio would seem to be the natural one?

We are going too recklessly on, Mr. President. It is for that reason that, interested though my State may be, I can not bring myself to support this measure, which will thus impose such great additional burdens upon the people of this country at a time when a period of distress has left them less capable of sustaining them.

The Senator from Ohio has argued that all the difficulty the country is under is the lack of revenue, as if revenue were something that it is a trick of party skill to provide. Let us understand that revenue comes from taxation of our own people.

Mr. GEORGE. And in no other way.

Mr. VILAS. And in no other way. All the substantial revenue which this Government derives or receives to meet its expenditures and obligations is sucked with the tremendous force of law from the produce of daily labor in this country. It comes from the produce of toil, and it marks its shoulders with new stripes and new galls when increased force is applied to them by the Government. Revenue is not something which is produced by mere party manipulation or party skill. Revenue must come from payment by the people of what they are obliged to yield in one form and another for the support of their Government.

Much complaint has been made of the Government deriving money from the sale of bonds. Oh, but there is one thing that ought to be said with reference to that, and it is that in a period of great public distress, when labor has been more harmed and has suffered more than in any other period for a considerable time, whatever we gained by borrowing was not, at least, for the moment extracted from the produce of overburdened toil. We have not lost it, and when we have thus in a certain sense aided the present condition by borrowing money, we ought not to waste it.

Mr. President, I have said already more and have occupied the time of the Senate longer than I meant to under the circumstances; and as I have indicated the general ground upon which I voted against this bill, so I have indicated the ground upon which I must adhere to that conclusion and vote to sustain the veto which the President has sent to Congress.

Mr. BERRY. Mr. President, I do not propose to discuss this bill at any length. I wish, however, to reply to a statement made by the Senator from New Jersey [Mr. SMITH], in which he stated that there were $10,000,000 in this bill not approved by the Engineer Department and a million and a half to which they were opposed. I take issue with the Senator from New Jersey and say that that statement is not correct. The estimates made by the local engineers amounted, I will not be specific, but I think to more than double the amount of the appropriations in this bill, including all the continuing appropriations. The estimate made by the Chief of Engineers was far less than that made by the local engineers, but the Chief of Engineers stated to the committee that the Secretary of War had directed him to make the estimates the very least upon which it was possible to continue and do the work that was proper to be done.

With very few exceptions there is no appropriation in the bill which is an increase over and above the amount estimated by the Chief of Engineers, while large numbers of the appropriations are far less than the recommendation made by the Chief, and which he himself said that the Secretary of War had directed him to make the very least possible upon which they could proceed with these important works.

The Senator from New Jersey states that these amounts were put in the bill without the estimates of the engineers, and refuses to specify the items named in the bill. The Senator from Missouri [Mr. VEST] called upon the Chief of Engineers to name these items, and he has refused to name them. Then I take issue with him and say the facts are not as stated, and the appropriations are not $10,000,000 over and above the estimate made by the Chief of Engineers.

Now, I want to say one word in regard to the statement made by the Senator from Wisconsin [Mr. VILAS]. The Senator from Wisconsin says that the appropriations for the State of Wisconsin are all right and proper appropriations to be made, but that there are some others, which he fails and refuses to name, that ought not to be made that make the bill too large. I state that the Senator from Wisconsin himself came before the Committee on Commerce and urged an increase of the appropriations for the State of Wisconsin, and the increase that was made by the Senate committee was made at his earnest solicitation, and because he said it was absolutely necessary to preserve the public works there.

I call upon him or some one else who opposes this bill to name the State where appropriations have been improperly made. If it be true that it be not in Wisconsin, then in what State is it?

This much I have felt that it was my duty to say, being a member of that committee.

I agree with much that the Senator from Wisconsin has said in regard to extravagant appropriations. I have stood here year after year since the time I have been in the Senate and opposed extravagant appropriations; but they have gone on. He speaks of the immense amount appropriated this year. We appropriated largely for naval vessels. I did not hear the Senator from Wisconsin oppose that and speak against that immense appropriation.

Mr. VILAS. It is because the Senator from Arkansas must have been absent at the time, because I think no naval bill has gone by without my opposing it.

Mr. BERRY. I am glad to know he did oppose it, but it is remarkable to me that he should pick out this particular appropriation in which the farmers and agricultural classes of this country are more interested than all others. I regret that he has selected this bill when, if there be no appropriation for the Mississippi River, works that have cost the Government millions of dollars will go to absolute destruction before two years, unless the appropriations are made to continue the work. The failure to pass this bill may mean destruction to the homes of thousands of people in the Mississippi Valley. I regret that he has urged this as being extravagant when the river transportation is the only protection that the farming class of this country has against the exorbitant charges of the railroads of the country.

Mr. President, if there be extravagant appropriations this is not the one upon which we should begin to economize. I do not wish to say anything that may sound sectional, but this is the only appropriation that ever comes from Congress when one large section of this Union, the South, receives any benefit whatever, and yet it is that particular appropriation in which the farmers of the Mississippi Valley—16 States, as shown by the Senator from Missouri—are deeply and vitally interested, which is their sole protection against confiscation by the railroads of the country. It is

an appropriation that the Senator selects and expends his eloquence upon to show that extravagance prevails in Congress.

The VICE-PRESIDENT. The Senator from Arkansas will suspend. The hour of 1 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated.

The SECRETARY. A bill (H. R. 8008) defining cheese, and also imposing a tax upon and regulating the manufacture, sale, importation, and exportation of filled cheese.

Mr. VEST. I ask that the unfinished business be laid aside temporarily in order to finish the river and harbor bill.

The VICE-PRESIDENT. Is there objection?

Mr. SHERMAN. Let the unfinished business be laid aside temporarily without losing its place.

The VICE-PRESIDENT. Is there objection? The Chair hears none. The Senator from Arkansas will proceed.

Mr. BERRY. Mr. President, I have said all that I desire to say. I state frankly to the Senator from Wisconsin that there are some items in the bill to which I was opposed and against which I voted, but it is this bill or no appropriation for rivers and harbors. This matter is of most vital consequence to the people of the Mississippi Valley. If there be no appropriation, the work that has gone on there for years and years, and which now approaches a state of completion, will in all probability be swept from the face of the earth, and all protection gone. It is those people and that farming community who are so vitally interested; and while there are items in this bill for which I would not vote as a separate measure, I will not strike down the interests of so many agricultural people of the country because a few objectionable items may have slipped into it.

The Senator from Wisconsin says again that these great works ought to be appropriated for, but it is the small works upon which millions of dollars he said had been appropriated. I state that the people in the Southern States, those who live on the small rivers in that country, on the bayous, if you will, where it is their only means to transport their products to market, have as much right to an appropriation for that stream as the Senator has for the waterways in Wisconsin, Michigan, or Minnesota. If we get $5,000 or $10,000 for the small river and Wisconsin and Minnesota or Michigan get $200,000, in proportion it benefits as many citizens on the small bayous and the rivers as it does on the great works of which he speaks. They have got as much right to have this means of protecting themselves from railroads, and we have as much right to appropriate for these smaller streams in proportion as you have to provide for the harbors on the coast of New York or the great rivers and lakes in the Northwestern States.

Mr. PETTIGREW. Mr. President, if I were opposed to the river and harbor bill I should yet feel bound to vote against sustaining the President's veto, because I believe it is based upon wrong principles and a violation of the Constitution.

I believe the time has come when Congress should propose an amendment to the Constitution of the United States limiting the veto of the President to those rightful subjects contemplated by the Constitution itself, or by proposing an amendment to annul a veto by a majority vote of both Houses of Congress. The veto is a relic of despotism, and was incorporated into the European constitutions to protect the monarch's prerogative from legislative encroachment, and was never intended to serve any other purpose; and therefore has no place in a free government based on the fundamental principle that the will of the majority is supreme.

I am of the opinion that the Constitution as it now stands does not confer any power upon the President to defeat with the veto the will of the majority of Congress when properly expressed upon any rightful subject of legislation. The President has no legislative discretion conferred upon him by the Constitution, for if he has, then legislative responsibility is also imposed. If the President has legislative discretion and responsibility, he has no right to sign any bill without that care and attention, investigation, and knowledge which are exercised by and incumbent upon the two Houses of Congress—a duty which it would be physically impossible for him to perform.

If it is urged that the President has the right and that it is his prerogative to veto any bill Congress may pass, a usurping President, having secured one vote over one-third of one House of Congress, could veto all measures, and representative government would be at an end and the Constitution overturned. As well might it be argued that the two Houses of Congress have a right under the Constitution to refuse to pass any act appropriating money for the courts or the Department of Justice or the Army, thus making it impossible for the decree of the court to be enforced, and so destroy a coordinate branch of the Government created by the Constitution. The power exists in Congress to do so, but to exercise it would be unconstitutional and destructive of the Constitution itself. So if the President shall undertake to exercise legislative discretion in the use of the veto. The power may exist, but the Constitution would be violated and the will of the majority defeated. Section 1 of Article I of the Constitution provides that "all legislative powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and a House of Representatives."

The framers of the Constitution only intended to confer the veto power upon the President for the purpose of protecting the executive office from encroachment by the legislative power, or to protect the Constitution. Any other use of the veto is unconstitutional and should be resisted.

Senator DAVIS, of Minnesota, for the majority of the Senate Committee on Pensions, on April 28, 1888, in a report to the Senate on some recent vetoes, took this view of the matter, as will be seen from the following extracts from this report:

The right to so use the power of executive disapproval as to change the ordinary methods of legislative action by a majority vote upon proper subjects of legislation, merely because the Executive differs from Congress upon the sufficiency of proof or the expediency of relief, does not, in the opinion of your committee, exist. Such a misconception of the extent of executive power, making it limitless, is fraught with dangers to the independence and to the constitutional powers of Congress, and it clearly implies that a factious or usurping President, who proposes to subordinate to his will that department to which the Constitution has confided the principal powers of Government, can rightfully do this, and prevent the will of the people from taking statutory form, except by two-thirds vote of each House of Congress.

Senator PLATT, of Connecticut, in an able speech on this subject, delivered in the Senate on August 3, 1888, used the following language:

All legislative power is vested in Congress, and if it be established that the President of the United States may properly veto any and every bill which is submitted to him for approval which as a legislator he might not "approve," then the legislative power which is declared to be vested in Congress is a snare and a delusion. If it be established that the President can veto any and every bill which is passed by the two Houses, having at his back a faction of one-third of each House, prevent legislation, then the day of majority rule in this Government is over with us and the day of minority legislation has been ushered in.

At about the same time Mr. GEAR, now a Senator from Iowa, but at that time a Representative in Congress, took the same position in a speech in the House of Representatives. In fact, this is the doctrine of the Republican party, as opposed to the usurping policy of Grover Cleveland as represented in his numerous vetoes, exceeding in number that of all other Presidents.

This view of the Constitution in relation to the veto power is well sustained by the various Presidents previous to Grover Cleveland, only 109 acts of Congress having been vetoed from 1789 to 1885. It is also sustained by the opinions of the ablest men in all times. Mr. Jefferson, when Secretary of State, in an official opinion delivered to President Washington, said:

It must be added, however, that unless the President's mind, on a view of everything which is urged for and against the bill, is tolerably clear that it is unauthorized by the Constitution, if pro and con hang so as to balance his judgment, a just respect for the wisdom of the legislature would naturally decide the balance in favor of their opinion. It is chiefly for cases where they are clearly misled by error, ambition, or interest that the Constitution has placed a check in the negative of the President.

Mr. Madison says:

The primary inducement, in conferring the veto power upon the President, is to enable him to defend himself. Indeed, even in England, where the King is considered a part of Parliament, and therefore possessing a share of legislative power, the royal negative would only be permitted in cases where encroachments were attempted upon the royal prerogative.

Daniel Webster, in a speech at Worcester, Mass., October 12, 1832, said:

The power of the veto is exercised—

Speaking of Jackson's veto of the bank bill—

not as an extraordinary, but as an ordinary power, as a common mode of defeating acts of Congress not acceptable to the Executive. This practical innovation on the mode of administering the Government so much at variance with its general principles, and so capable of defeating the most useful acts, deserve public consideration. Its tendency is to disturb the harmony which ought always to exist between Congress and the Executive, and to turn that which the Constitution intended only as an extraordinary remedy for extraordinary cases into a common means of making executive discretion paramount to the discretion of Congress in the enactment of laws.

Again, Webster, in his speech in the Senate on the veto of the bank bill, referring to question of expediency and of policy, says:

This power, if constitutional at all, is only constitutional in the hands of Congress. Anywhere else its exercise would be plain usurpation. If, then, the authority to decide what power ought to be granted to a bank belongs to Congress, and Congress shall have exercised that power, it would seem little better than absurd to say that its acts nevertheless would be unconstitutional and invalid if, in the opinion of a third party, it had misjudged on a question of expediency in the arrangements of details. If Congress decides right its decision may stand: if it decides wrong its decision is nugatory, and whether its decision be right or wrong, another is to judge, although the original power of making the decision must be allowed to be exclusively in Congress. This is the end to which the argument of the message will conduct its followers.

Von Holst, in his Constitutional History of the United States, volume 2, pages 46 and 47, in speaking of the veto of the bank bill by Jackson, says:

Since the President, as already said, is not to be considered as a power coordinate with Congress in the matter of legislation, we may call it running counter to the spirit of the Constitution that the President should think himself, the moment any provision in the details of a bill did not entirely suit him, to exercise his veto power. The President, if he were consistently to carry out this new doctrine, should endeavor to prevent all legislation which did not in every particular entirely correspond with his views, and he might do it in all instances in which he could count on one-third of the members of both Houses of Congress.

Mr. Clay, in discussing the veto power in 1832, said:

The veto is an extraordinary power which, though tolerated by the Constitution, was not expected by the convention to be used in ordinary cases. It was designed for instances of precipitate legislation in unguarded moments. Thus restricted, and it has been thus restricted by all former Presidents, it might not be mischievous. During Mr. Madison's Administration of eight years there occurred but two or three cases of its exercise. In a period of little upward of three years the present Chief Magistrate has employed the veto four times.

What would have been Clay's thoughts and comments if instead of four times it was four hundred times in the space of three years, as in the case of the present occupant of the White House during his first Administration?

Kent, in his Commentaries, says:

This qualified negative of the President has become a very grave power and applied in a way not anticipated by the generation which adopted the Constitution.

Two Democratic Presidents of the Republic at least have expressed their opinion on this question—Pierce and Polk. These Presidents far surpassed the present Executive in character and ability.

President Pierce said:

The power of the executive veto was exercised by the first and most illustrious of my predecessors and by four of his successors who preceded me in the administration of the Government, and it is believed in no instance prejudicial to the public interests. It has never been and there is but little danger that it ever can be abused. No President will ever desire unnecessarily to place his opinion in opposition to that of Congress. He must always exercise the power reluctantly, and only in cases where his convictions make it a matter of stern duty which he can not escape. Indeed, there is more danger that the President, from the repugnance he must always feel to come in collision with Congress, may fail to exercise it in cases where the preservation of the Constitution from infraction or the public good may demand it than that he will ever exercise it unnecessarily or wantonly. It is apparent, therefore, that the circumstances must be extraordinary which would induce the President to withhold his approval from a bill involving no violation of the Constitution.

Justice Miller, on the Constitution of the United States, page 174, says:

It has been contended that the only proper occasion for the President to deny his approval by message to Congress refusing to sign a bill is when the bill is not in his judgment within the constitutional power of the legislature. In such cases it has been thought to be his duty to interpose his objection, and the doctrine has been advanced with much earnestness that on no other account is he justified in setting up his opposition to the more popular legislative branch of the Government.

President Polk said:

He must always exercise the power reluctantly, and only in cases where his convictions make it a matter of stern duty which he can not escape.

Neither Mr. Polk nor Mr. Pierce, who knew and defined the limitations of the veto power, ever conceived that from the sin-engendering loins of a prostituted Democracy could spring such a monstrosity of Presidential despotism as Grover Cleveland.

While the Constitution of the United States empowered the President to veto any act of Congress, under the restriction that all legislative authority was vested in Congress, in all of the earlier constitutions of the various States of the Union except Massachusetts the veto was not conferred upon the governor. In the following States no veto power exists to this day: Delaware, North Carolina, Ohio, and Rhode Island. The veto is annulled by a majority vote of the legislatures in the following States: Alabama, Arkansas, Connecticut, Indiana, Kentucky, New Jersey, Tennessee, West Virginia, and Vermont.

In Nebraska and Maryland the veto of the governor is sustained unless three-fifths of a quorum of the legislature votes to annul it. In the remaining States of the Union it requires two-thirds of the votes of each house to pass a bill over the veto of the governor. The convention that framed the constitution conferred the veto power with great reluctance, and it was finally agreed to for the reason that, as it was pointed out, there was no danger of its abuse, as no English monarch had used the veto since Queen Anne in 1707, who refused her assent to a bill for settling the militia in Scotland (1 Cooley's Bl., third edition, page 185), and that there was no danger of the president of a free republic doing that which a king dare not do.

As this veto of Queen Anne's in 1707 is the last in English history, and as it is now nearly two centuries since any monarch has dared to thwart the people's will in England, it can safely be presumed that the English constitution is changed in this respect and that the power to veto is forever abandoned.

The unusual and unconstitutional exercise of the veto power by Grover Cleveland should receive the attention of Congress; for, during his two Administrations up to May 1, 1896, he had vetoed 542 pension bills alone. Washington, in his two full terms, vetoed but two bills, and the veto power was not exercised by Adams and Jefferson at all. It was exercised by Monroe but once. John Quincy Adams, Van Buren, Taylor, and Fillmore did not veto any measure passed by Congress; while Lincoln vetoed but one act of Congress during the exciting epoch through which that great statesman conducted this country in safety.

The average number of vetoes since the adoption of the Constitution has been about one a year up to the time Grover Cleveland became President of the United States.

I insert a table showing the number of vetoes by each President since the adoption of the Constitution:

Vetoes.

Administration of—	Period.	Years.	No.
Washington	1789 to 1797	8	2
Adams, J.	1797 to 1801	4	----
Jefferson	1801 to 1809	8	----
Madison	1809 to 1817	8	6
Monroe	1817 to 1825	8	1
Adams, J. Q.	1825 to 1829	4	----
Jackson	1829 to 1837	8	11
Van Buren	1837 to 1841	4	----
Harrison and Tyler	1841 to 1845	4	9
Polk	1845 to 1849	4	3
Taylor and Fillmore	1849 to 1853	4	----
Pierce	1853 to 1857	4	9
Buchanan	1857 to 1861	4	4
Lincoln	1861 to 1865	4	1
Lincoln and Johnson	1865 to 1869	4	20
Grant	1869 to 1877	8	27
Hayes	1877 to 1881	4	12
Garfield and Arthur	1881 to 1885	4	4
Harrison	1889 to 1893	4	----
			109
Cleveland	1885 to May 1, 1896	----	551

If it were not for this usurpation on the part of the President, regarded with such indifference by our people, the question of finance, which is not and should not be a party question, would not enter into and vex our contests for the election of a President. If the people could feel that the President would execute the laws—would obey the Constitution, so that the majority should rule—the financial questions which now tear asunder and threaten to destroy the great political parties of this country would be determined by the two Houses of Congress untrammeled by Executive interference. The people of this country would embrace with great satisfaction the assurance in the platforms of both political parties that the judgment of Congress in relation to all questions of finance shall be accepted as conclusive and binding, and that the exercise of the veto by the President to overturn the will of the majority is a violation of the Constitution.

Mr. President, the present occupant of the White House is not content with the violation of the Constitution by the exercise of the veto power alone, but with an utter disregard of his sacred oath of office, as well as the Constitution, he overrides the laws, influences Congressmen with patronage, enriches his favorites at the public expense—in fact, permits no restraint but his imperial will. I think he might fairly be charged with high crimes and misdemeanors. He has exercised the veto power in direct violation of the Constitution. He has appointed men to office without the advice and consent of the Senate. He has defied the Senate and the Constitution alike by appointing men to official positions after the Senate had twice refused its consent, and still retains them in office.

During his first term he openly used his appointing power to intimidate members of Congress, and during his second term he has given appointments to members of Congress for the purpose of securing their votes upon measures pending in the two Houses.

On his own motion he has undertaken to overthrow the Hawaiian Government, doing acts in direct violation of the Constitution. He has borrowed money in violation of law for the ordinary expenses of the Government, and then falsified the facts in relation thereto in a message to Congress. He has refused to remit taxes as required by law, and has collected taxes unlawfully. He has refused to enforce the laws of Congress so often that the list of violations is next only to the list of his vetoes. He has sold bonds at private sale to his favorites and former associates upon terms and at a price many millions of dollars below the market price of the bonds on the day of such private sale. In view of these facts it is time for Congress to give some attention to these usurpations. If this Government is to survive we can no longer look with indifference upon the shameful autocracy of Grover Cleveland.

Mr. BATE. Mr. President, it is not my purpose to go to much extent into this question, but I voted against the bill, and it is one of the occasions when I differed with a large majority of the party with which I cooperate. My convictions of constitutional right, as well as with reference to the policy of the country, run in line with the Democratic party. I have been endeavoring the best I could, in my representative capacity, to carry out those principles which have been enunciated by our party in its various platforms, beginning with 1876, and every convention since that time has enunciated the doctrine of economy and has laid especial stress upon the fact that there should be an economical and honest administration of the Federal Government.

Having been guided by those principles and cooperating with the party that has enunciated them in its various platforms, I

am here to-day not to depart from those teachings or from the course which I have pursued in following the declarations made by the party to which I belong and which have been engrafted in the platforms as a part of the principles of the Democratic party.

I do not purpose now to enter into a small criticism, or a large one either, for that matter, in regard to the exercise of the veto power. It belongs to the Executive of the United States by virtue of the Constitution of our country. Whenever in his judgment he sees fit, as President, to exercise that power it is proper that he should do it; and he would not be an honest man, and he would be unfit to represent the people of this country as Chief Executive, unless he did it. It has been exercised in this case, and while I differ with the President upon his policy, especially his fiscal policy, almost in every iota, yet when the President of the United States, in the exercise of his constitutional right, seeks to carry out those principles of economy and honesty which the Democratic party have been adhering to and enunciating in their platform I will sustain him.

I am one of the few who voted against the bill, and it was with regret that I differed with Senators for whose opinions I have the highest respect; men of vast experience and ability, who have studied the Constitution and laws of the country and who have been here as exemplars, in a representative capacity, of the people who sent them, and have made national reputations. I felt and knew, sir, that it was a hopeless effort so far as defeat of the bill was concerned, because, if for no other reason, of the character of the committee that had it in charge, and for whom I have the highest respect. It is a committee of picked Senators, among the very first who belong in this Chamber, and who have charge to a great extent of the commercial interests of this country. When that committee deliberately pass judgment upon a matter and bring it before the Senate it is almost a conclusion that it will pass. It would ordinarily be so with me, for I have such regard for them that I would feel assured that they have done the best they could. But the Democratic party at least, and I think many of the Republicans, are self-thinkers and self-actors. They think for themselves and act for themselves as men and Senators. There is an individuality of character which belongs to the party with which I cooperate that is peculiar. We bind ourselves to no committee and no influence, and act and vote independently if our judgment dictates such a course. Mine does in this instance, and I voted among those, only nine of us, who opposed the bill, because I regard it as an extravagant appropriation of the public money at a most inopportune moment.

Independent of the platforms of the Democratic party, which would to some extent influence me touching matters of this kind, independent of my purpose to be as economical in appropriations for the support of the Government as existing circumstances will permit, the sentiment of the State which I in part represent has within the last three or four weeks been expressed in convention of the party to which I belong. At that convention, on the 8th of May last, expression was given upon this very question of economy by the Federal Government, which would guide me as a faithful representative and exponent of the doctrines they laid down in their platform. The Democratic party, through its chosen delegates, assembled in a convention, such as perhaps was never surpassed in our State, more than a thousand delegates being present. Every county was represented. It was really the voice of the Democratic party of Tennessee, which has spoken in no uncertain terms sentiments in regard to the administration of the Federal Government in a few chosen and emphatic words. I will read it:

> We demand that all Federal taxation shall be strictly and only for revenue for the support of an economically administered Government, and we condemn the policy of the Republican party in prostituting the taxing power to enrich the few at the expense of the many.
>
> We demand—
>
> Not recommend—
>
> We demand that all Federal taxation shall be strictly and only for revenue for the support of an economical administration of the Government.

They demand that taxation shall be strictly and only for the economical administration of the Government. That would guide me, as I have no doubt it would guide my colleague in this matter. It is the most recent expression of the people of the State which I have the honor in part to represent, and if I were to vote for sixty or eighty million dollars appropriated by this bill I would feel that I had violated those declarations which are semi-instructions, to say the least, and which have so recently fallen from the people of my State as expressed at our convention not a month since.

I voted against the bill. I shall vote against it still. I am against it upon conviction. I have no criticism to make here in regard to its constitutionality—none whatever. I omit any expression upon that point. But those who have gone before me, men who helped to mold the Constitution and to establish the principles which now guide us, have denied the constitutionality of such appropriations—notably Presidents Jackson and Polk of my State. But I think that the time has come, under changed conditions, if there is no question in regard to the constitutionality, when something ought to be done in this regard. I am not here to oppose appropriations for the purpose of improving navigable rivers and those large estuaries and grand waterways like the Mississippi River or the Ohio and their tributaries, as well as others of a similar character.

I believe in the policy as laid down in the Democratic platform of 1884, but there is a time for all things. This is not the time for that to be done. You see, sir, what character of extravagance this Congress has indulged in. More than $500,000,000 has been appropriated. Mr. President, we were shocked a few years ago, at least the party to which I belong was, and we raised the battle cry in our campaign against the "billion-dollar Congress," then, as now, under the control of the Republican party. But here at this session, although we are not in power, we are giving our assent, to a certain extent, to appropriations which already exceed $500,000,000 and which will be perhaps $520,000,000 or more. Here, now, is a proposition to add seventy or eighty million dollars more, not, as laid down in the platform of my State, for the support of the Government, but for benefits which could at least be postponed to a more propitious condition of the Federal Treasury, and especially as many of the enterprises have unexpended balances for continuing the works of improvement.

With these expenditures staring us in the face, and with the fact, which has been stated here time and again, and which is an undeniable one, that there is an actual deficit of more than $20,000,000 in the present year, I ask, Where is the money to come from to carry out the provisions of these appropriation bills? Where is the money to come from that is to meet the appropriations proposed in the pending bill, not $20,000,000, but nearly $80,000,000, as is shown and admitted? Sixty million dollars of it is for continuing contracts. I do not know that to be the correct policy. I am not clear upon that, for experience has not shown to my satisfaction whether the continuing-contract system is best or not. I am against the principle of the Government entering into contracts with individuals for so large an amount of money unless it makes provision at the time for the payment of it by a sinking fund or by some other course which may properly be pursued.

Yet here we have the fact before us that, independent of the appropriations to carry on these works during the ensuing year, for which about $20,000,000 will be required, there is $60,000,000 in this bill. That $60,000,000 can be dispensed with. You know it, Mr. President. The Democrats around me who profess the policy of economy in the administration of the Government know it. And we ought to stand by our guns. In 1892 "economy" was the battle cry, and a declaration was placed in the platform for economy in the administration of the Government.

Mr. BERRY. Will the Senator yield to me for a question?

Mr. BATE. Yes, sir.

Mr. BERRY. Do I understand that the Senator from Tennessee is opposing the continuing contracts in the bill?

Mr. BATE. I was questioning the wisdom of it, because of the want of experience.

Mr. BERRY. I want to ask the Senator——

Mr. BATE. Very well.

Mr. BERRY. Will the Senator answer?

Mr. BATE. I understand the Senator from Arkansas does favor that system.

Mr. BERRY. I wish to ask the Senator whether Tennessee has not one continuing contract, and if the Senator did not urge the committee to put another continuing contract in the bill?

Mr. BATE. I am glad the Senator has brought that point out. I have this to say in regard to it: When the committee have up a bill and they are making appropriation and my State is involved, it is my duty, whether I am going to vote for the bill or not, to see that the State of Tennessee is properly represented before the committee, and if the committee conclude that the contract system is best, and go on and do it in that way, let it be so.

But I have not examined the question of the effect of continuing contracts. I heard no testimony in regard thereto. Therefore I hold my judgment in abeyance on that question. I did, and I am glad the Senator has called attention to it, go before the committee with the Representative in Congress, Mr. WASHINGTON, from my home. Mr. WASHINGTON made a statement to the committee, and I indorsed what he said in regard to the Cumberland River, where I live. I did that. If I said anything in regard to continuing contracts other than to indorse what Mr. WASHINGTON said, I do not recall it. But I think that the propriety of continuing contracts depends a good deal upon the manner in which they are managed and guarded. They are as yet but experiments. That is all I mean to say about them.

If there is one inducement which more than another would influence me to favor the bill—personally, I mean—of course it would be the advantage that would be obtained by my State. The committee have been liberal in one sense to the place where

I live and the river upon which I was born and reared and where I now live—the Cumberland River. As has been said here by the chairman of the committee, $600.000 has been given for a continuing contract for how many years I do not know. Neither dc I know how much that will be each year. The other project was refused, and I have no complaint to make. If that was the judgment of the Senate, I bow to it as gracefully as the refusal will permit. But whether I can get all I want is no reason why I shall forego my conviction and vote for the bill. I rise, I think, above those personal considerations, and although my State did get, in one sense, a moderate share, yet I hope that in my representative capacity I have strength of character and moral courage enough to rise above any personal interest and consider what is best for the common country.

That particular place is only one part of Tennessee. I represent in part the entire State, and I want to act upon it as a whole and not as to the individual locality where I live—a place I love most dearly. It would be ungenerous to do so, and I hope I am generous enough not only to take in my own State in all its borders, but that I am morally strong enough to look to the good of our whole State and country.

Mr. President, there are objects behind these things which are far-reaching. We can not see exactly the ulterior objects, but we know they exist. The issuance of bonds is behind this proposition, and if there is any one thing above another which the people I have the honor in part to represent dislike in the administration of the General Government it is the issuance of bonds by the Federal Government, especially in time of peace. I see in the distance and predicated upon those bonds a firmer foundation and a longer continuance of the national-banking system, against which the Democratic party of Tennessee, in its last platform, emphatically expressed itself.

Many of the speeches which have been made, especially by those on the other side of the Chamber, look to further taxation by the tariff. There is a tariff bill now lurking behind this bill that in point of amount of duties upon articles that may be taxed will overtop even the McKinley Act, and when we vote for this bill we put an additional demand to carry out existing laws upon the Government of the United States which has to be met, for these continuing contracts are obligations. Is not one obligation of this country as sacred as another? Is not the obligation to pay a debt where you have made a contract and the services of poor men and laborers have been performed in carrying out that contract as high and binding upon this Government as it is to meet the bonds that bear interest upon their face? These contracts are continually growing, because they are not without profit. No man is going to contract to do work for the Government unless he sees profit in it. So these continuing contracts have profit in them, as bonds have, in the shape of interest.

Therefore I say there is something behind all this. There is a tariff bill in the distance. There is, as I believe, the issuance of bonds in the near future and a prolonging of the life of the national banks beyond their legal limitation, growing out of the condition which this bill will create.

I do not oppose appropriations for improving our great highways. The Senator from Missouri referred to the platform of the Democratic party in 1884, mentioning the name of the Mississippi River. I am for giving aid to it, as I am for those of like character in the East and the West. I would do that because I believe that the making of those improvements would relieve to some extent those who grow the products of this country, the laborers upon the farm lands, who want to send their products to market in competition with railroad transportation lines. That is why I would do it, but not at the expense of $80,000,000. This is a potent argument with me.

Why, then, I may be asked, do you not vote for the bill, especially when it helps your own home and your own State? I say, because there are distempered times upon us. When the platform of 1892 calls for reform from the Democratic party, I want to adhere to it. It is the last national platform we have. The last State platform we have had in Tennessee I have read to the Senate, and you see the very strong terms it uses in regard to the matter of public economy. I want to follow that; and I say that the times forbid such expenditures now. The great expenditures of the last session, and those already made at this session, the unhappy condition of our people now, whether oppressed by gold bonds or not, are upon us, a fact we can not deny.

I am one of those who believe that the gold standard has had much to do with it, and I want to rectify it by the substitution of the two metals of equal value and both alike—money of redemption. That is not the question of which we are now speaking, however. It is a question as to the condition of our country—a question as to whether we can afford, in the condition of our Treasury, to appropriate seventy or eighty million dollars for purposes of this kind, especially, as I stated, when our revenues are not sufficient to meet the appropriation. That is the question. How are you going to meet it? It has been well stated by the Senator from Wisconsin [Mr. VILAS] who has just taken his seat, that there is no money in the Treasury by which it can be met. Therefore if you are to keep up the credit of your Government and to pay your obligations to the laborers who do the work, you will have to issue bonds in time of peace. The bonds bear interest and weigh like a mortgage upon the people of this country, poor and impoverished as they are, and as much as they are ground to powder with the onerous taxation upon them.

I say because of that it is ill timed. We should postpone it until times are better, or have less and more reasonable amounts appropriated. In 1884, when this declaration came from my party in its platform in regard to the Mississippi River, the Treasury was in a comparatively easy condition. The products of your farms were worth much more than they are now. The trouble of 1893, the bank panic, came upon us like a crash, and it did crash the monetary condition of this country, and it dragged down many of the commercial men, and with them those upon whom they relied, and the farmer and laborer felt it more acutely than anyone else.

This being true, I can not reconcile myself, in view of the record I have tried to make in regard to economy, to vote for the bill. But I must be frank and say that while I would approve under different circumstances a river and harbor bill, one that improves the means of transportation and enables competition in the matter of transportation, yet I beg to say that the present unhappy financial condition of our country and the oppressed condition of our people, together with the vast amount already appropriated, admonish that we put no greater burden upon them now.

I heard the Senator from Maryland [Mr. GORMAN], who is now sitting just to my right, talk about this matter in discussing the condition of the finances of the country, when he spoke clearly, specifically, and conclusively as to the condition of the Treasury, and showed that it was improper for us to make extravagant appropriations, or even any that could be dispensed with. I became satisfied that we ought to make no more appropriations than were absolutely necessary—in the language of the platform of my State, "than are necessary to support the Government." The Senator from Maryland was right in what he then said, but I do not know how he will vote upon this question.

Whatever may have been the influence, or the reason, or the excuse which prompted the enormous appropriations in this bill, it can not be denied that there has been a desertion of the principles of reform and economy as laid down in the Democratic platforms—a desertion which now superadds nearly $80,000,000 in this bill to the $500,000,000 in the other appropriation bills.

I regret to differ with Senators and others with whom I have always cooperated upon Democratic principles. I have no foolish pride of opinion in regard to being with the majority; but I mean to stand by the principles, to stand by the platform of the party, State and national, whether in victory or in defeat. I mean to stand by the principles of my party and to follow the instructions of my State, regardless of the fact that appropriations, as is said, for the South are, I regret to say, disproportioned to her necessities and to her rightful share. The South needs more appropriations; but the South does not want appropriations, Mr. President, at the expense of the laboring classes of this country, who have to be taxed in order to pay them. The appropriations desired must come from a surplus, and not from a deficit in the revenues.

I have nothing further I care to say, Mr. President. I shall content myself with voting to sustain the veto of the President, which is a vote, of course, against the original appropriation bill.

Mr. STEWART. Mr. President, I have three very strong reasons for voting to pass this bill ever the veto of the President. The first is because I am opposed to the use of the veto power to control legislation. Such use of it was condemned when the Constitution was framed. It was claimed by the friends of the veto power that it never would be used to obstruct legislation; that it never would be used except in cases of great emergency. Alexander Hamilton was the principal advocate of the veto power. He said that it had not been used in England since the revolution in that country, and of course would not be used here to interfere with the legislative department. Benjamin Franklin warned the convention of the great danger in the veto power, and cited the abuses of it in Pennsylvania. He said it had become the practice of the governors in that State to demand a fee for the signing of every bill; that it had gone to such an extent that when the savages were murdering the citizens on the frontier, and it was necessary to raise money to support the militia, they had to make up a purse for the governor before he would sign the bill; and Benjamin Franklin said then that if the veto power was continued in a few generations we should find the same abuses of it in this form of our Government; that the Executive would grasp all the power he could, and that the veto power was a weapon to break up the harmony of the coordinate departments of the Government.

We now know that the shadow of the veto constantly hangs over the deliberations of both Houses of Congress. Other things being equal, I should always vote to pass a bill over the Presidential

veto; in fact, I shall do it on all occasions whether I like the bill or not, unless I believe it to be unconstitutional. If a bill has been passed by the two Houses which, in my judgment, is constitutional, I should, whether I liked it or not, vote to pass it over the veto, because I think the veto power is one of the dangerous powers, is one of the agencies which are subverting our Government and destroying the equilibrium of its coordinate departments.

My next reason is that I believe that the river and harbor bill is good and beneficial legislation. I believe it will do more good to the people than any other bill which has been passed during the present session of Congress. All the other bills are to take money out of the Treasury without making any visible sign or show of benefit to the people; they are to pay salaries or to pay money out of the Treasury for various other purposes. This bill provides that the money shall go back to the people, so that labor may be employed in these dull times, and that work shall go on. It also makes provision for the people in benefiting commerce and transportation, and I believe it is the most meritorious legislation of the session.

My third reason is that this is the time, of all others, that this bill should be passed, because we have in the Treasury an unhealthy surplus. We have in the Treasury $270,000,000 cash balance, which has been taken from the people and locked up where it does no good. Money is exceedingly scarce with the people, and the impounding of money in the Treasury at this time is cruel and unjust. Some suggest that we must not take this money out of the Treasury because it may endanger the gold standard. Not at all. There is plenty of money outside of gold coin. There is $160,000,000 outside of the gold coin held in reserve.

Mr. LINDSAY. I wish to ask the Senator a question.

The VICE-PRESIDENT. Does the Senator from Nevada yield?

Mr. STEWART. In a moment.

The paying out of that surplus would certainly not affect the operations of the Treasury so far as gold is concerned. In fact the President of the United States has informed us in his annual message and in other messages that there is plenty of money to carry on the Government, that he did not sell bonds to obtain money for that purpose, but that the bonds were sold exclusively for the purpose of obtaining gold. Paying the money out for needful improvements will not trench upon your gold reserves at all. It will simply take out of the Treasury that idle money which has been taken from the people and put it in circulation and give labor employment.

I will now yield to the Senator from Kentucky.

Mr. LINDSAY. I wish to ask the Senator from Nevada whether he agrees with the junior Senator from Tennessee [Mr. BATE] that the purpose of this bill is to promote the further issue of bonds?

Mr. STEWART. I do not believe that any honest man could have such a purpose under the circumstances. With an overflowing Treasury; with abundant coin for redemption; with silver flowing into the Treasury in the shape of silver certificates every day; with abundant means of meeting all the obligations of the Government, and with $270,000,000 impounded and taken from the people, I do not see how any honest man who loves his country could suggest the issuance of more bonds now to take more money from the people and impound it.

Mr. BUTLER. Will the Senator from Nevada pardon me just there?

Mr. STEWART. Certainly.

Mr. BUTLER. If the other House passes the very meritorious bill which we passed yesterday evening, which, of course, it is bound to do in duty to the country, then there can not be any more bond issues for this purpose or any other without the consent of Congress, and if the other House does not pass the bill, then the responsibility rests on that House and not on this body. This body is not responsible for what that one does or does not.

Mr. STEWART. This body has done its duty in that regard and the people will approve it. The responsibility is now on the other House; but the passage of the river and harbor bill will not affect the question of issuing bonds to buy gold, for it will take no gold out of the Treasury. It will simply liberate the money of the people which is impounded and lying idle, when it is so much needed for circulation. It has nothing whatever to do with the gold reserve. I want to draw out a portion of that reserve, which is there accomplishing no other purpose except to deprive the people of a circulating medium.

Mr. HAWLEY. Mr. President, I shall vote to override the veto, and I shall do so deliberately, satisfied that I am doing what is right.

I do not find, upon recurrence to the facts and upon a search among the papers in the rooms of the Committee on Appropriations, that the figures involved here are so large as some Senators are claiming. I do not speak of the continuing contracts which run over four or five or six years all together, but only taking into account the estimates for the next two years. I am told by the veteran clerk of that committee that the appropriations provided for in this bill are $12,609,800; that there are in the sundry civil bill certain other appropriations relating to contracts upon which the Government is already bound to the amount of $3,284,597. There was a remnant in the urgent deficiency bill, and as a matter of economy there was appropriated $300,000. The total is $16,692,397. There will probably be no river and harbor appropriation bill for the fiscal year 1897–98, as the rule now seems to be only to pass a river and harbor bill every two years. The pending bill is for 1896–97. Under that rule we have been going on with a bill every other year for some time, and are frequently in the habit of skipping a year. The money appropriated for the succeeding fiscal year would be about $13,000,000, making, in round numbers, $30,000,000 for two years, or an average of $15,000,000 a year.

As to the general usefulness of this bill and its appropriations I have no shadow of doubt. The constitutional scruples indulged by some of our fathers have gone. The work is recognized as important and as useful. It is obviously so to those who live near the works that are being done and are familiar with the trade and commerce in the various localities.

The President speaks of many of these improvements being for the benefit of limited localities. Why, Mr. President, there are some bills of greater importance than others, some bills that touch infinitely a greater multitude than others do; but there is no such thing as an improvement of commerce that belongs, fairly speaking, to a limited locality. We might as well talk about legislating for individuals, when we mean the individuals constituting the 70,000,000 of our population. Sometimes a measure will help 1,000,000 people, and sometimes another will help 10,000,000; but the aggregate is an advantage to the whole of our 70,000,000 people.

The President says:

> There is no ground to hope that in the face of persistent and growing demands the aggregate of appropriations for the smaller schemes not covered by contracts will be reduced or even remain stationary.

I agree with the President that there is no hope that they will remain stationary. They will probably increase. As the population grows a greater multitude of people will be working toward the coast and the rivers to establish their business and save transportation. The people and their wants are increasing. There was a humorous member of the other House from Alabama many years ago who offered two resolutions, which contained propositions that nobody could dispute. They were as follows:

1. *Resolved*, That this country is a great country.
2. *Resolved*, That it is getting bigger.

That has been the rule of all our legislation, appropriation bills included, from the beginning.

Again the President says:

> Some of the projects for which appropriations are proposed in this bill have been entered upon without the approval or against the objections of the examining engineers.

I have seen nothing of that myself in my limited examination of the bill; but if such a thing has been done by that committee, it has been done in obedience to the weight of scientific and other testimony which convinced it, without being obliged to rely solely upon the Department. I have known cases of that sort.

I am very sorry to find in a message from the head of our great Government the following expression in one of the last two paragraphs:

> I believe no greater danger confronts us as a nation than the unhappy decadence among our people of genuine and trustworthy love and affection for our Government as the embodiment of the highest and best aspirations of humanity.

That reminds me of a very unhappy remark the President made in New York concerning the people of the West. I am sorry to find the President dominated by this spirit of pessimism. I think all of us believe, and all the people of intelligence and sense that I know of believe, that there is no decadence of love for the country or its institutions. There is no great war, no awful emergency to test it just now. We are controverting a great deal with each other on some great and important questions; sometimes we get very angry about them and we charge each other with fighting against the best interests of the country. That is all right. It is from debate that is evolved the judgment of the people, and in the long run it is a sound judgment. When great national calamities or awful emergencies come upon the people—more often of Europe, thank God, than upon us—who can imagine, who can estimate the enormous elasticity, the tremendous will, and the crushing power of this people? Who does not know that millions of men can be found ready to die—not only to offer themselves for death, but to die—for the good of their country and of the flag and the prosperity of republican government. I do not think the President of the United States ought lightly to make such a remark.

Mr. HILL. Mr. President, before this debate began I labored under the delusion that the President of the United States had the constitutional power to veto legislative bills. The tendency of this debate has been to deny that power. I pick up the Constitution, and I find that my previous recollection in regard to its contents was accurate, that notwithstanding the suggestions which

have been made the Constitution has not been amended in regard to the Presidential veto power. It stands as it has always stood, giving the President the absolute power to withhold his assent to legislation, and providing that no bill shall become a law which does not receive his approval, unless it be passed by a two-thirds vote over his veto; yet I have listened to suggestions that this veto power is limited; that it is restricted; that it is circumscribed by clauses not in the Constitution itself, but which must be contained in the brains of Senators.

It is said that the President has no right to veto legislation of Congress which largely involves questions of discretion. I do not find any such limitation of the power. I do not find anything in the Constitution which requires the President to exercise the veto power moderately. I find nothing in this instrument which says that he can only exercise the veto power upon proper occasion or with propriety. I find that he is vested with the sole power of withholding his approval without limitation, without restriction, without any tribunal to question it, unless it be both Houses of Congress by passing a bill over his veto. Therefore, I do not concur in the argument of the distinguished Senator from South Dakota [Mr. PETTIGREW]—a second Daniel come to judgment—in which he said that it is unconstitutional for the President to exercise a constitutional power. I can not comprehend that logic—unconstitutional to exercise a constitutional power! It is said the President must exercise it with propriety—he must not abuse it. The power exists, nevertheless. If he has not that power, what are we doing here now? This body expects to pass this bill over the veto. The appropriations have been distributed so that of course the bill is to pass over the veto; but if Senators believe their own arguments, what is the use of this farce? This bill involves merely the exercise of a discretionary power in making appropriations on the part of Congress. Why, in the closing days of this session, are we proceeding to pass it over the veto when absolutely this veto is of itself per se unconstitutional? Why not take the case directly to the Supreme Court, and not proceed deliberately to override the Presidential veto? Those who make this argument do not believe it themselves.

The Constitution stands just as I have stated it, despite the argument of the distinguished gentlemen who have assailed it, who have sought to enlarge it, sought to improve it, sought to attack the wisdom of our fathers; but there it stands, and will stand for years to come. So long as the veto power exists it is useless to enter into any constitutional argument about the propriety of its exercise. The question of propriety is one thing.

I know that the distinguished English author, Prof. James Bryce, who visited this country and immediately thereafter wrote a criticism of its institutions, criticised our Presidents for the very liberal manner in which they exercised this conceded power. I do not share in his criticism. I do not think that Professor Bryce knew enough about American institutions, according as our fathers framed them, to be able to criticise the exercise of the veto power on the part of our Presidents.

Mr. President, there is a certain class of Senators who are going to vote to override the veto, first, upon the ground that it is unconstitutional to veto this bill. There is a second class going to vote for it, like my friend from Nevada [Mr. STEWART], who does not believe in vetoes anyhow and is always against the President. There are others who think that Congress is the sole judge of the propriety of making appropriations, and they propose to override the veto. There are others who think like my friend from Nevada, who says there is an unhealthy surplus in the Treasury, and he is anxious to take it out. If that surplus is unhealthy now, this bill will make it sicker. So we have a conglomeration of different views and ideas upon which Senators are going to aggregate their votes and override this Presidential veto irrespective of its real intrinsic merits.

One would think from listening, as I have patiently done, to all that has been said against the Presidential veto that this was one of the very few instances in the history of the Government when a President had dared to withhold his approval from this class of bills. I heard Senators read from distinguished opponents of Andrew Jackson, criticising Old Hickory because he had the audacity to exercise the veto power. I thought it was unwise for Senators upon the other side to read those criticisms of Andrew Jackson for the purpose of getting Democratic votes against this veto. I had supposed he was one of the patron saints of our party; I had supposed that we in the main thought Andrew Jackson was right, and that we were disposed to follow him in his enunciation of the principles of Democracy; and now we are told that Andrew Jackson was one of those violent, obstructive Presidents who used the veto power harshly and unwisely, and that was the reason urged why Democrats on this side of the Chamber should make haste to override this veto.

That argument reminds me that the vetoing of river and harbor bills originated with Andrew Jackson. The vetoing of river and harbor bills began as early as in the days of Andrew Jackson, who, on December 6, 1832, sent a veto to the House of Representatives of a bill entitled "An act for the improvement of certain harbors and the navigation of certain rivers." Old Hickory himself inaugurated this vicious precedent which President Cleveland is following. The principal objection urged by President Jackson was that the appropriations therein contained involved the sanction of a principle that concedes to the General Government an unlimited power over the subject of internal improvements, to which he could not assent. It was argued then, as it is argued now, that Congress had the supreme power over this question, and to grant appropriations anywhere in any part of this country, whether it related to foreign commerce or internal commerce or whether it related to no commerce at all. He asserted his willingness to approve appropriations for the construction of light-houses, beacons, buoys, public piers, and the removal of sand bars, sawyers, and other temporary or partial impediments in our navigable rivers and harbors, but as the bill contained provisions for works of a different character, depending on principles which extend the power of making appropriations to every object which the discretion of the Government may select, and lost sight of the distinctions between national and local character, he could not consistently approve the bill as a whole.

Mr. President, his veto was not overruled, and there does not appear to have been any effort in that direction.

President Polk, on August 3, 1846, withheld his approval from a similar bill. He, the great Young Hickory, did not have the idea of the Constitution that is held up here, but he deliberately put his seal of condemnation upon a river and harbor bill at that early period. Those men, however, according to these new-fangled notions, did not have that respect for the Constitution which it is now said they ought to have.

What was the bill that President Polk vetoed? It provided for appropriations amounting to $1,378,450, to be applied to more than forty distinct and separate objects of improvement.

If such a bill seemed extravagant and dangerous in its tendencies, what would President Polk have thought of the present measure, which contains 417 distinct items of appropriation, and contemplates the immediate expenditure of $17,000,000, or thereabouts, and authorizes contracts to the extent of $62,000,000 more, or thereabouts.

President Polk's very able and elaborate veto message, following the example of President Jackson, protested against the practical removal of all constitutional restraint upon the power of Congress in the matter of such appropriations, and insisted that they should not embrace works of a local or individual character, but should be confined to those of national benefit and importance. His reasoning was based, and properly so, upon a strict and reasonable construction of the Federal Constitution, which interpretation must commend itself to the judgment of thoughtful men. Among other things he said:

> It will be found also that the bill contains appropriations for rivers upon which there not only exists no foreign commerce, but upon which there has not been established even a paper port of entry, and for the mouths of creeks, denominated harbors, which, if improved, can benefit only the particular neighborhood in which they are situated. It will be found, too, to contain appropriations the expenditure of which will only have the effect of improving one place at the expense of the local, natural advantages of another in its vicinity. Should this bill become a law, the same principle which authorizes the appropriations which it proposes to make would also authorize similar appropriations for the improvement of all the other bays, inlets, and creeks, which may with equal propriety be called harbors, and of all the rivers, important or unimportant, in every part of the Union. To sanction the bill with such provisions would be to concede the principle that the Federal Government possess the power to expend the public money in a general system of internal improvements, limited in its extent only by the ever-varying discretion of successive Congresses and successive Executives. * * * It not only leads to a consolidation of power in the Federal Government at the expense of the rightful authority of the States, but its inevitable tendency is to embrace objects for the expenditure of the public money which are local in their character, benefiting but few at the expense of the common Treasury of the whole. * * * It will produce combinations of local and sectional interests, strong enough when united to carry propositions for appropriations of public money which could not of themselves, and standing alone, succeed, and can not fail to lead to wasteful and extravagant expenditures.

Then, speaking of the spectacle which would be presented if such a system of favoritism was inaugurated, he further most truthfully says:

> It must produce a disrespectable scramble for the public money, by the conflict which is inseparable from such a system, between local and individual interests and the general interests of the whole. * * * Should the system of internal improvements proposed prevail, all these evils will multiply and increase with the increase of the number of the States and the extension of the geographical limits of the settled portions of our country. With the increase of our numbers and the extension of our settlements the local objects demanding appropriations of the public money for their improvement will be proportionately increased. * * * In a country of limited extent, with but few such objects of expenditure (if the form of government permitted it) a common treasury might be used for their improvement with much less inequality and injustice than in one of the vast extent which ours now presents in population and territory.

Then with almost prophetic vision he adds:

> The treasure of the world would hardly be equal to the improvement of every bay, inlet, creek, and river in our country which might be supposed to promote the agricultural, manufacturing, or commercial interests of a neighborhood.

The sound and convincing views of President Polk thus so concisely and felicitously expressed are peculiarly applicable to the

present times and to the present measure. His veto was sustained in the House by a vote of 97 yeas against 91 nays.

President Pierce, another Democratic authority, on August 5, 1854, added his condemnation of the growing tendency toward extravagance in measures of this character, and withheld his approval from a river and harbor bill which was liable to the same criticisms which pertain to the bill now under consideration. The bill had reached him, as all such bills usually do, during the closing days of the Congressional session, and his examination of its provisions was necessarily hurried, but he expressed grave doubts not only of its expediency but of its constitutionality. His veto was sustained in the House, where the bill originated, by a vote of 95 yeas against 80 nays.

President Grant, as already stated, did not actually veto any river and harbor bill, but on August 14, 1876, while formally affixing his signature to such a measure, sent to the House a protest against its provisions. He expressly stated that if he regarded it as obligat ry upon the Executive to expend all the money therein appropriated, he should have returned the bill without his approval. He further said, adopting the course of President Cleveland, in his message:

> Without enumerating, many appropriations are made for works of purely private or local interests, in no sense national. I can not give my sanction to these, and will take care that during my term of office no public money shall be expended upon them.

He then adds something in reference to the necessity for economy, which has been also read by the Senator from New Jersey [Mr. SMITH], and winds up with this statement:

> Under no circumstances will I allow expenditures upon works not clearly national.

If in 1876 there was "very great necessity for economy of expenditures," as asserted by President Grant, a condition which impelled him to protest against unnecessary and unreasonable appropriations and to announce his intention of preventing all "expenditures upon works not clearly national—an announcement which unquestionably met the approval of the country—do not existing financial conditions furnish still greater reasons for the enforcement of rigid economy and for insisting that appropriations shall not be authorized except for works at important places, and so imperative in their nature that they can properly be regarded as clearly national in their character? As in 1876 the country still felt the effects of the panic of 1873, so now the country has not recovered from the panic of 1893.

The next and last veto (except the present) of a river and harbor bill was that of President Arthur, on August 1, 1882. That bill appropriated the sum of $18,743,875. In a brief but comprehensive message he declared, among other things, as follows:

> My principal objection to the bill is that it contains appropriations for purposes not for the common defense or general welfare, and which do not promote commerce among the States. These provisions, on the contrary, are entirely for the benefit of the particular localities in which it is proposed to make the improvements. I regard such appropriations of the public money as beyond the powers given by the Constitution to Congress and the President. I feel the more bound to withhold my signature from the bill because of the peculiar evils which manifestly result from this infraction of the Constitution. Appropriations of this nature, to be devoted purely to local objects, tend to an increase in number and in amount. As the citizens of one State find that money, to raise which they, in common with the whole country, are taxed, is to be expended for local improvements in another State they demand similar benefits for themselves; and it is not unnatural that they should seek to indemnify themselves for such use of the public funds by securing appropriations for similar improvements in their own neighborhood. Thus as the bill becomes more objectionable it secures more support. This result is invariable and necessarily follows a neglect to observe the constitutional limitations imposed upon the lawmaking power. The appropriations for river and harbor improvements have, under the influences to which I have alluded, increased year by year out of proportion to the prog ress of the country, great as that has been. In 1870 the aggregate appropriation was $3,975,900; in 1875, $6,648,517.50; in 1880, $8,976,500, and in 1881, $11,451,000, while by the present act there is appropriated $18,743,875. * * * The extravagant expenditure of public money is an evil not to be measured by the value of that money to the people who are taxed for it. They sustain a greater injury in the demoralizing effect produced upon those who are intrusted with official duty through all the ramifications of government.

President Arthur's veto message was read in the House, and the next day it was called up and the previous question moved on its passage, and the previous question was moved yesterday in the House; and thereupon, without debate, the bill was passed over the veto by a vote of 122 yeas against 59 nays, 108 Representatives not voting; while in the Senate it was repassed by a vote of 41 yeas against 16 nays, 19 Senators not voting, and thus became a law.

An inspection of the RECORD shows that among the Senators who are still members of this body who voted to sustain the President's action were the Senators from Maine, Messrs. HALE and FRYE, both Senators from Connecticut, Messrs. HAWLEY and PLATT, the venerable Senator from Vermont, Mr. MORRILL, and the Senator from Pennsylvania, Mr. CAMERON: and among others who thus voted, but not now members of this body, were Senator Harrison of Indiana, Senators Logan and Davis of Illinois, Senator Pendleton of Ohio, Senator Ingalls of Kansas, and last, but not least, Senator Bayard of Delaware. While this was the only instance in our history where a river and harbor bill has been passed over the veto of a President, it may be safely asserted that the veto increased rather than diminished the confidence of the people of all parties in the wisdom, prudence, and statesmanship of President Arthur.

The message of President Cleveland, which we are now considering, unlike those of his predecessors, does not base his objections upon any violation of constitutional limitations, but rather upon grounds of expediency.

He naturally lays great stress upon the enormous amounts required to be expended now and in the future. It must be conceded that the sum total would be regarded as startling even in prosperous times. After a painstaking consideration of the whole measure—a consideration which, I assume, has been more careful and extensive than any Senator here, aside from those upon the Commerce Committee, has been able to devote to the subject—he finds that "many of the objects for which it appropriates public money are not related to the public welfare, and many of them are palpably for the benefit of limited localities and in aid of individual interests." If that is so his action should be sustained rather than overruled. I am not able to dispute the facts which he asserts, and must accept his statement as substantially correct.

I frankly confess that I do not share his hostility to continuing contracts per se, and am inclined to believe that in many instances such contracts are necessary and extremely beneficial, provided, of course, they are not excessive in amount or unreasonable in number. They have probably been tolerated to an unusual degree in the present measure, and to an extent not warranted by the necessities of the situation. Mortgaging the future by anticipating and pledging revenues not realized, and in the present instance not even provided for, is clearly objectionable.

I prefer to place my opposition to this measure not alone upon the ground of the vastness or extravagance of the appropriations granted, the unprecedented number of continuing contracts authorized, the favoritism manifested in behalf of works designed for the promotion of local or individual interests over those of national and pressing importance, or the stimulation of a vicious system of paternalism which many of its provisions seem to encourage, but largely upon the ground that the present condition of our finances does not warrant the incurring of such vast expenditures. Neither, unless unforeseen events occur, is any material improvement to be expected in that condition in the near future.

No one can safely predict from what fund these immense appropriations are to be paid. The Senate has already refused its assent to the issuing of certificates of indebtedness to supply temporary deficiencies in revenue which may arise. The Senate—a majority of the Senate—is opposed to any further issue of bonds for any purpose whatever. The very surplus in the Treasury today is only about equal to the proceeds of the bonds sold during the present Administration, and that surplus has already been anticipated in all the other appropriation bills which we have passed and are now daily passing. There is no reasonable prospect of an agreement upon any new revenue bills materially increasing our revenues, and under these conditions and in this crisis, when radical changes in our monetary system are being proposed and vigorously pressed, we are asked to authorize appropriations to the extent of about $80,000,000 under the provisions of this bill. Even if this condition of affairs would warrant the expenditure of reasonable sums for the completion of works already in progress, it seems difficult to justify enormous outlays for the commencement of new improvements. It is no answer to suggest that these expenditures which we authorize may be delayed or evaded or largely controlled through the exercise of the discretion vested in the Secretary of War. That is a shifting of responsibility which we ought not to sanction. It is the unloading of a burden upon an executive official which we ourselves should largely bear. Appropriations when made by Congress are expected to be expended and should be expended, unless when unexpected or most difficult emergencies arise which would justify or excuse the interposition of an executive discretion to prevent an appropriation being used as intended by Congress. Under our system of government the propriety of appropriations must continue to be determined by Congress itself, acting in conjunction with the President, and not by a subordinate executive official who, although intrusted with details of management, must in good faith carry out the evident intention of Congress.

If this bill shall become a law, notwithstanding the objections of the President, the responsibility for these expenditures rests mainly upon Congress, and can not be transferred to or imposed upon the Secretary of War, who is not vested with legislative functions. From these premises it necessarily follows that it is our duty to sustain the action of the President. He has exercised his constitutional prerogative in withholding his signature from a bill which he can not conscientiously approve, and in a message admirable in its tone and temper he respectfully asks us to give the measure further consideration. That, at least, we are bound to do. Abuse of the President will not change the facts

which he presents, misconstruction of his motives will not render the bill more acceptable, and unfair reflections upon his patriotism and good judgment add nothing to the argument and will not shake the public confidence in the wisdom of his deliberate conclusions.

More than this I need not say; and less than this I felt I ought not to refrain from saying. As one who voted against the bill on its original passage, the message confirms my convictions of its undesirability as a whole at the present time.

It is evident that the bill contains many unwise provisions and authorizes some wasteful or at least useless expenditures. As much was admitted during the debate. The distinguished chairman of the Commerce Committee [Mr. FRYE], in his eloquent plea for the bill, made just prior to its final passage, admitted that there had been extravagance in the use of money for river and harbor improvements, and that there were items in the bill to which he had been and was still utterly opposed. These admissions could be multiplied from others familiar with the details of the measure, but they are unnecessary.

The President has had a better opportunity than any of us (except possibly the Commerce Committee) to investigate from official and other sources the existing and pressing needs of our rivers and harbors, especially those of national importance, and I should be disposed to accept his conclusions upon the subject, even if I had not otherwise been convinced of the correctness of his position.

The consideration of this matter naturally leads to the suggestion that it is to be regretted that the Constitution does not permit the President to veto distinct items of appropriations in general appropriation bills. It is a necessary and desirable power, and one which, according to my observation, is not liable to abuse. It has existed for many years in the constitution of New York and in that of many other States of the Union, and there has been exhibited no disposition to abandon it anywhere where it has been tested. Its exercise would enable a President to discriminate between good and bad appropriations, between urgent and unnecessary ones, between those in the public interest and those designed for private benefit. It would preserve and save the meritorious appropriations embraced in the present measure and eliminate its objectionable ones.

Believing that until such a remedy shall be adopted the meritorious and the ill-advised items must suffer alike under the general policy, which my experience teaches me is desirable, of sustaining every Executive disapproval where any good reasons exist for its exercise in relation to any portion of a measure, I beg leave to propose a constitutional amendment, designed to confer upon the Chief Executive the power to withhold his approval from distinct items in an appropriation bill while approving others, which measure I shall now introduce, and after its reading shall ask that it may lie upon the table for future consideration.

The joint resolution (S. R. 156) proposing an amendment to section 7 of Article I of the Constitution of the United States was read the first time by its title and the second time at length, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That an amendment to section 7 of Article I of the Constitution of the United States is hereby proposed by adding to said section the following:

"If any bill or joint resolution presented to the President contain several items of appropriation of money he may object to one or more of such items while approving of the other portion of the bill or resolution. In such case he shall append to the bill or resolution, at the time of signing it, a statement of the items to which he objects, and the appropriation so objected to shall not take effect. If the Congress be in session, he shall transmit to the House in which the bill or resolution originated a copy of such statement, and the items objected to shall be separately considered. If, on reconsideration, one or more of such items be approved by two-thirds of each House, the same shall be part of the law, notwithstanding the objections of the President. All the provisions of this section in relation to bills and resolutions not approved by the President shall apply in cases in which he shall withhold his approval from any item or items contained in a bill or resolution appropriating money."

The VICE-PRESIDENT. The joint resolution will lie on the table.

Mr. BUTLER. Mr. President, the amendment to the Constitution just offered by the Senator from New York [Mr. HILL] is a most natural one to be offered by a Senator who opposed the anti-bond bill which passed yesterday afternoon. It is a most natural one to be offered by a Senator who believes that the revenue power of this Government should be taken from Congress and placed in the hands of one man—the Executive. In addition to the power which the President already has to accept or reject a measure on its general merits, he proposes to give him the power to strike out and insert—that is, to legislate in detail.

Mr. President, the veto power as it now stands and is used is a dangerous evil, but the Senator from New York desires to complicate that evil and to make it worse. I wish now to ask to have read an amendment to the Constitution relating to this question which I have already introduced and which is still lying on the table. It strikes at the root of the whole trouble.

The Secretary read the joint resolution introduced April 7 by Mr. BUTLER, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein), That the following amendment to the Constitution of the United States be proposed to the legislatures of the several States, which, when ratified by three-fourths of said legislatures, shall become and be a part of the Constitution, and shall be known as the sixteenth amendment:

"ARTICLE XVI.

"Every bill which shall have passed the House of Representatives and the Senate shall, before it become a law, be presented to the President of the United States. If he approve, he shall sign it; but if not, he shall return it with his objections, to that House in which it shall have originated, who shall enter the objections at large on their Journal and proceed to reconsider it. If after such reconsideration a majority of that House shall agree to pass the bill, it shall be sent, together with the objections, to the other House, by which it shall likewise be reconsidered; and if approved by a majority of that House, it shall become a law.

"Every order, resolution, or vote to which the concurrence of the House of Representatives and Senate may be necessary (except on a question of adjournment) shall be presented to the President of the United States, and before the same shall take effect shall be approved by him; or, being disapproved by him, may be repassed by a majority of the Senate and House of Representatives according to the rules and limitations prescribed in the case of a bill."

Mr. BUTLER. If this is not a Government by legislative action of the people through their representatives, then it is not a Republic. The amendment just read will correct the evils and dangers of the present veto power. Besides, it preserves every idea with reference to safeguards from checks and balances that the forefathers and founders of our Constitution had in framing the Constitution. It preserves the dignity and the importance of the Executive. It defers to the Executive and asks his opinion, it gives him time to investigate any measure passed by these bodies, and awaits respectfully his reply and his approval or his objection. It then refers the whole matter with all the light the Executive can put upon it, if he shall disapprove, to the representatives of the people for final action, who should always be the final arbiters in matters concerning the general welfare.

That is what the founders of our Constitution had largely in mind when the Constitution was framed, and, as I have said before, one of the few mistakes, if I may be pardoned as one man for saying it, of the founders of this Government was in leaning too much to monarchical institutions, in not being able to wrench themselves, as it were, in one effort from all the traditions and from all the associations, from all the early training which they received from the mother country and the institutions that are not republican and democratic in form. They felt the veneration which the people in the Old World feel for the crowned head, the veneration which the people in the Old World feel for rulers who come down from generation to generation by heredity.

It still clung about them, and they were not able to rid themselves of it all. Hence they vested this excessive power in a man—the Executive—who in their minds to some extent took the place of a king. They failed fully to comprehend that in a republic that the king is the people and that the officers are the subjects. There were some among the framers of our Constitution who seemed to think it was necessary to put some check upon the people; they did not seem to realize that it was the officials upon whom it was necessary to place a check. They should have made our President simply an executive officer to carry out the legislative will of the people. If they could have foreseen when they did it that there would grow up, in spite of the Constitution, in spite of the fundamental principles of this Government, and hedge around that Executive the tremendous power of patronage, the tremendous power of party spoils; if they could have foreseen that that Executive would ever abuse his high office, that he would ever use the thousands and tens of thousands of appointments which are lodged in the Executive, and which necessarily must be lodged somewhere, to influence the legislative branch of the Government, that he would ever have used them in elections, that he would ever have used them to thwart the will of the people from the primary and township up to the legislative halls of Congress, they would have taken precautions against all of these dangers instead of putting into the hands of the Executive the dangerous power of veto.

Those two added together, the power of patronage growing greater with each succeeding year, with the power of veto, the power to nullify what does pass in spite of his will and his influence, not to say abuse of influence and power, make him an autocrat, make him more dangerous than a crowned head, who is simply a limited monarch. It makes him more dangerous to the welfare of this people than the King of England can ever be under their constitutional arrangement. Yet, Mr. President, strange to say, within the last few days Senators have stood upon this floor and claimed that there should be added to the excessive powers of the Executive a power greater than the veto power, a power greater than patronage, that he should be given the power to borrow money without limit, the power to levy a tax without limit upon every cent of property and every individual in America.

It is the most astounding proposition that has ever been seriously advanced before any legislative body in the world. Yet we

see Senators to-day standing on this floor and defending the President and the veto power who yesterday advocated placing in his hands the unlimited power to borrow money, to place debt upon the people, to raise revenue, and then expend it without consulting the people. There is not to-day a government on the topside of this earth, whether a republic or a constitutional monarchy, that allows in the hands of its executive, without the will of their legislative branch of the government, the power that is in the hands of ours.

The Senator from New York, however, says that the President of the United States in vetoing the bill does not place it on constitutional grounds. If the forefathers were right, that is the only way he should use it. It never was supposed that it would be used in any other way, except possibly to correct obvious blunders that were made without due deliberation. The Senator says that the President vetoes the bill on the ground of economy. The idea of the Senator from New York—the man who has not stood for economy, the man who has supported and defended the action of the Administration in turning over unwisely, needlessly $27,000,000 as a bonus to the gold ring within the last year—speaking of economy! The idea that an Executive who through folly, if nothing worse, has taken that much money from the people and put that much taxes upon the people and turned it over as a free gift, for that is what it amounts to, to the gold ring of America and Europe, should veto a bill on the ground of economy! Yet the Senator now rises and says that this bill, carrying only the sum of $17,000,000 for this year, must be vetoed on the ground of economy. I should have thought that the Senator from New York would have got somebody else to say that for him.

The $17,000,000 that the bill will carry for this year, according to his own statement, goes where? It goes nearer to the people, it goes nearer to the homes and firesides of our people, than any other money of equal amount that this Congress has appropriated or will appropriate this session. It goes not only to break down the barriers to commerce, it goes not only to open the gates of commerce between the States and other countries, but it goes to open up an avenue for transportation to our farmers and laborers and wealth producers in every section, and peculiarly in those sections where they have no railroad transportation. It opens up an avenue of commerce for the corn farmer, who tills the lowlands along the river banks, and who can not get his corn to market, his only product to raise money, if he must haul it, or if he must depend upon railroad transportation.

The Senator from New York says that President Jackson vetoed a river and harbor bill, and that President Cleveland is simply following Jackson's lead. This is an unfortunate reference, both for the President and for the Senator from New York. He must be ignorant of the fact that Jackson vetoed the bank bill and fought bravely the gold ring. Let the Senator from New York and the President also emulate the example of Jackson in this very important respect. Such action on their part would be both patriotic and timely now.

Mr. President, instead of it being an objection to this bill that improvements are not even in every State, I wish to say the only objection that could possibly be made, and the only regret we should have in making the river and harbor appropriations, is that we have not rivers open for commerce in every State of the Union and to every quarter of the country where the people could be benefited equally by river and harbor improvements. I would that there were water transportation in every State and every neighborhood in this whole country, and that we could spend money judiciously to improve that means of transportation, not only to give the people the benefit of God's highway, but to act as a check and balance upon our great railroad corporations; not to rob them of a living, but to make them live and let live, to make them charge fair rates and fair ones only; to solve, if possible, the problem that railroad commissions have not solved; to solve, if possible, the problem that the Interstate Commerce Commission has not solved and never will solve; to solve, if possible, the problem that never in my opinion can be solved in but one way, and that is for the iron highways to be used as common highways for people, as the rivers and the oceans are used, to be used as a public highway, as a public function for the public good.

My good friend the Senator from Tennessee [Mr. BATE] says that he is afraid there is something behind this bill. He fears our Republican friends are getting ready to manufacture an excuse for a big tariff bill next year. He says he is afraid that we will be giving Mr. Cleveland an excuse for another bond issue. In answer to that I wish to say that this body has done its duty. We passed yesterday a bill to prevent a further issue of bonds. The House of Representatives should do its duty and restore the legislative power of this Government to the people, where it belongs. But shall we stand here, timid and afraid—shall we refuse to make appropriations where they ought to be made because forsooth an Executive who seems to desire to serve the gold ring every chance he gets will borrow gold for that purpose? I say, if there is no way to stop this wrong but by an object lesson, then let us do our duty in improvements; let us do our duty in appropriations; and if the President, who has vetoed the bill, desires to resort to the issuance of bonds to raise money for these improvements out of his delicate, sensitive desire to obey the will of the people as expressed in this bill, then if he can stand it the people will stand it till they have put another House of Representatives in the other end of this Capitol and have elected a different kind of man for President.

During the next campaign this Democratic President of yours [turning to Senator GALLINGER and the Republican side]—you have adopted him—will issue more bonds if your House, which is defending him and helping him in his ruinous policy, does not stop him. When he does, then your men in the other House, who are now defending him, can no longer abuse him, as you did in the last campaign. Half the Republican Congressmen at the other end of the Capitol abused President Cleveland in the last campaign for issuing bonds. They denounced his methods, and they were elected largely on it.

Now, I wish to say to you that if you want to see a Republican House, you had better go and pray with them not to act as you have done here, but get them to pass that antibond bill. Yes, the responsibility rests there, and I say to the Senator from Tennessee, if he stands with me and with others on this question as he did yesterday, let us place that responsibility there; let us allow the people to place it there, as they will next November. Let us draw the issue squarely.

Now, as to our Republican friends having an excuse to frame a big tariff, I want to say that I am in favor of that question and all others being settled by the people and Congress. If the people, before they cast their votes next November, looking the situation in the face, decide that they want so much money for such a purpose and that the way to get it is by a high protective tariff, whether it meets my will or not, I shall bow to the will of the American people. There is no objection to a tariff if it is justly levied and if the resulting benefits are fairly and equitably distributed between the different sections and the different industries in each section. But I want to see the question settled by Congress and not by the Executive. Let Congress come together in special session or in regular session; let it decide how money shall be raised; let it decide whether by bonds, whether by tariff, whether by income taxes, whether by other means; let it decide, also, whether or not it will give the people an opportunity and the ability to pay taxes when it levies them; let the whole situation be before them; and the whole situation will be before them. Men will be in the next Congress who will view both questions together, and before they tax the people more by borrowing money or by tariff they will see that the people have the ability to pay those taxes.

Then, I say to the Senator from Tennessee and those who feel as he does on this question, let us not shirk our duty in this matter for fear the Republicans may have a campaign issue. Let us be merciful toward them, because they have an issue before them greater than the tariff, which they can not dodge. They have an issue before them which they must face squarely; it is the financial question; and the voters of this country from now on will take sides on that dividing line. I am willing to stand with the majority that is opposed to the gold ring. I am willing to help that majority which stands opposed to them in legislation and to bow to the will of that majority on other questions which is opposed to Tory methods and opposed to English rule. If that should mean a higher tariff or a lower tariff, and there is no other solution, it would be the lesser of the evils.

In conclusion, I wish to say that I believe in economy. I would rather, in the condition of our people as a rule, cut down expenses than increase taxes for any purpose, unless it be a case of absolute necessity. But I believe that the measure now before the body is one that will unlock money that is now piled up in the Treasury, which the President himself tells us can not be used for preserving the public credit. The President tells us himself that it makes no difference how much revenue he has, so long as he maintains the gold standard he must borrow money. The Senator from Michigan [Mr. BURROWS] admitted the same thing yesterday evening. Therefore the money that is in the Treasury to-day can not help the people of America, its credit or its prosperity, until it is in circulation. When it is in circulation, provided it goes for a good purpose, provided it goes for a purpose that enables the people to prosper and to pay more taxes, if necessary, they are better off, if it is used judiciously, and then pay taxes to put the same money back, because they will have a profit left to themselves. Yes, I believe in economy in the public service, though not niggardly economy; but I do not consider it economy to refuse to do what is necessary for commerce, what is necessary for a large portion of our people, simply for the fear that the President may issue bonds or that the Republicans may have a campaign issue. It is not statesmanship. It is not wise. I had almost said it is hardly patriotic.

On the ground of economy only, if I could be convinced that it is best, then I should vote against the measure; but I believe it

would be false economy. Therefore I shall vote to sustain the bill. I shall not vote to sustain the veto message, and I believe it is the duty of every Senator, unless he favors the veto power and the way it has been used, whether he is for this bill or against it, to vote to sustain the majority who favor and have passed this bill. Let every Senator here who was fairly beaten on the vote of a majority vote now with the majority, simply because he believes in majority rule; simply because he believes in the rule of the people, and not in the rule of the Executive. I say it is the duty of every American Senator to vote in this case with the majority, to show his faith in the majority of the American people and in the majority of this legislative branch, and to show that he does not approve of legislation by the Executive and by veto messages. . If I had voted against the bill when it passed, I should vote to-day to sustain it, because a majority of the Senate is for it, and I am opposed to sustaining the veto power when so used.

The VICE-PRESIDENT. The question is, Shall the bill pass, the objections of the President to the contrary notwithstanding? The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. BURROWS (when his name was called). I am paired with the senior Senator from Louisiana [Mr. BLANCHARD]. If I could be assured how he would vote——

Mr. FAULKNER. He would vote "yea."

Mr. BURROWS. I am assured that he would vote "yea." I will therefore vote. I vote "yea."

Mr. PASCO (when Mr. CALL'S name was called). My colleague [Mr. CALL] is paired with the Senator from Vermont [Mr. PROCTOR]. If my colleague were present, he would vote "yea."

Mr. QUAY (when Mr. CAMERON'S name was called). I desire to announce that my colleague [Mr. CAMERON], on this question, in conjunction with the Senator from New Jersey [Mr. SEWELL], is paired with the Senator from Tennessee [Mr. HARRIS]. My colleague and the Senator from New Jersey would vote "yea" if present. The Senator from Tennessee, I understand, would vote "nay."

Mr. CULLOM (when his name was called). I have a general pair with the senior Senator from Delaware [Mr. GRAY], but I believe if he were present he would vote "yea" on this question, and I therefore vote "yea."

Mr. ELKINS. I wish to state to the Senator that I was paired with the Senator from Delaware [Mr. GRAY].

Mr. CULLOM. I understand that the Senator from Delaware is paired with the Senator from West Virginia [Mr. ELKINS], and I will therefore let my vote stand.

Mr. ELKINS (when his name was called). I transfer my pair with the Senator from Delaware [Mr. GRAY] to the Senator from Kansas [Mr. BAKER], and I vote "yea." The Senator from Delaware would vote "nay" if present.

Mr. GEAR (when his name was called). I have a general pair with the senior Senator from Georgia [Mr. GORDON], but knowing he would vote as I do on this question, I vote "yea."

Mr. BACON. I will state that if my colleague [Mr. GORDON] were present he would vote "yea."

Mr. HARRIS (when his name was called). On this question I have a pair with the senior Senator from Pennsylvania [Mr. CAMERON] and the junior Senator from New Jersey [Mr. SEWELL], each of whom would vote "yea" if present, I am informed, and I should have voted "nay" if not paired.

Mr. MITCHELL of Wisconsin (when his name was called). I am paired with the Senator from New Jersey [Mr. SEWELL], but as we agree on this question I vote "yea."

Mr. MORRILL (when his name was called). I am paired on this question with the Senator from Kentucky [Mr. BLACKBURN] and the Senator from Louisiana [Mr. BLANCHARD]. If I were not so paired I should vote "nay."

Mr. PERKINS (when his name was called). I have a general pair with the senior Senator from North Dakota [Mr. ROACH], but as he would vote in the affirmative upon this question if present, I vote "yea."

Mr. PROCTOR (when his name was called). I have a general pair with the Senator from Florida [Mr. CALL]. If he were present I should vote "nay."

Mr. PUGH (when his name was called). I am paired with the senior Senator from Massachusetts [Mr. HOAR], who I understand would vote "yea" if present, and I give the same vote.

Mr. SQUIRE (when his name was called). I have a general pair with the Senator from Virginia [Mr. DANIEL]. I feel quite sure that he would vote "yea" if present, but in order to obviate any possible misunderstanding, I will transfer the pair to the Senator from Wyoming [Mr. CLARK], so that the pair will stand between the Senator from Virginia and the Senator from Wyoming, and I vote "yea."

Mr. TILLMAN (when his name was called). Understanding that the Senator from Nebraska [Mr. THURSTON], with whom I am paired, would vote for the passage of the bill over the veto if present, I vote "yea."

The roll call was concluded.

Mr. CULLOM. A few moments ago I stated that the Senator from Delaware [Mr. GRAY] would have supported the bill against the veto. I am now informed that that Senator is opposed to the bill. I make this statement because I was entirely misled as to his position, and I do not want anything to go upon the record that looks as if I were stating his position incorrectly.

Mr. ALLISON. I have a general pair with the Senator from Missouri [Mr. COCKRELL], who is absent, necessarily, but he informed me before leaving the Senate that if here he would vote for the passage of the bill, and that he would have a pair arranged with some other Senator. I do not know whether such a pair has been arranged.

Mr. PASCO. The Senator from Missouri [Mr. COCKRELL] is paired with the Senator from Illinois [Mr. PALMER].

Mr. ALLISON. Very well. Then I vote "yea."

Mr. BROWN. On this question I am paired with the Senator from Maine [Mr. FRYE] and the Senator from Michigan [Mr. MCMILLAN]. If they were here, they would both vote "yea" and I should vote "nay."

Mr. CLARK. I heard a moment ago a Senator making a pair in my name. I desire to say that I wish to vote upon this question, and that I vote "yea."

Mr. SQUIRE. Inasmuch as the Senator from Wyoming [Mr. CLARK] is present, I am requested by those on the Democratic side having charge of the pairs to substitute the Senator from Louisiana [Mr. CAFFERY] for the Senator from Wyoming [Mr. CLARK]; so that the Senator from Louisiana will stand paired with the Senator from Virginia [Mr. DANIEL], and I will let my vote stand. I also wish to state that if the Senator from Louisiana were here I am informed he would vote "yea." He is detained from the Senate by reason of sickness.

Mr. PALMER (after having voted in the negative). Since I have voted the Senator from Florida [Mr. PASCO] reminds me that I made an arrangement with the Senator from Missouri [Mr. COCKRELL] to pair with him. I therefore withdraw my vote. I am very much obliged to the Senator for reminding me of it.

Mr. PASCO. I desire to announce that the Senator from Louisiana [Mr. BLANCHARD] is absent from the city. His pair with the Senator from Vermont [Mr. MORRILL] has already been announced. If the Senator from Louisiana were present, he would vote "yea."

Mr. PEFFER. I ask that the pairs be announced. I want to see that my colleague [Mr. BAKER] is protected.

Mr. HARRIS. Before that is done, I desire to suggest that upon a question like this, where one negative is equal to two affirmative votes, the announcement of a single pair seems to me to fall a little short of the rule that should prevail. Of course the result in this case would not be changed even though the strictest rule should be observed, nor is it a question for the Chair to take any action upon. I simply desire to say that I think upon questions such as this it would be a wise and better policy for the Senate to observe the strict constitutional rule in respect to pairs.

Mr. PASCO. Having charge of the pairs upon this side, I wish to state that this is generally a matter of individual arrangement. Where it has been otherwise, we have arranged it in the way the Senator from Tennessee [Mr. HARRIS] suggests, but there are some six, eight, or ten friends of this measure for whom we have been unable to obtain pairs.

Mr. CHANDLER. This question arose on the 2d of August, 1882, when the President pro tempore of the Senate declared the Chair recognized the pairs as Senators announced them. I dislike to interrupt the Senator, but certainly debate is not in order on this question. That can come afterwards.

Mr. TELLER, Mr. VEST, and others. Regular order.

The VICE-PRESIDENT. The Chair will recognize the request of the Senator from Kansas. Will the Senator again renew his request?

Mr. PEFFER. The request was that the pairs might be announced. My object in making the request is that I want to know whether the Senator from South Dakota [Mr. KYLE] and my colleague [Mr. BAKER] are protected. I do not care myself particularly about the other pairs.

The VICE-PRESIDENT. It can only be done by unanimous consent. If there be no objection, the Reporter will announce the pairs, at the request of the Senator from Kansas.

Mr. FAULKNER. I will state to the Senator from Kansas that his colleague [Mr. BAKER] is paired with the Senator from Delaware [Mr. GRAY].

Mr. PEFFER. I do not know but that the Senator from Delaware would vote the same way.

Mr. ALDRICH. He would vote "nay."

Mr. FAULKNER. The Senator from Delaware would vote "nay" on this proposition and the junior Senator from Kansas [Mr. BAKER] would vote "yea."

The VICE-PRESIDENT. Is that statement satisfactory to the Senator from Kansas?

Mr. PEFFER. It is satisfactory so far as my colleague is concerned. How about the pair of the Senator from South Dakota [Mr. KYLE]?

Mr. BATE. I think the pairs ought to be announced.

The VICE-PRESIDENT. Is there objection?

Mr. WILSON. I object.

Mr. JONES of Arkansas. Let the result of the vote be announced.

The VICE-PRESIDENT. Is there objection to the request of the Senator from Kansas? If there is objection, the announcement of the vote will be made.

Mr. JONES of Arkansas. I object.

The VICE-PRESIDENT. Objection is made. The Chair will announce the result.

The result was announced—yeas 56, nays 5; as follows:

YEAS—56.

Aldrich,	Elkins,	McBride,	Sherman,
Allison,	Faulkner,	Mills,	Shoup,
Bacon,	Gallinger,	Mitchell, Oreg.	Squire,
Berry,	Gear,	Mitchell, Wis.	Stewart,
Brice,	George,	Morgan,	Teller,
Burrows,	Gibson,	Nelson,	Tillman,
Butler,	Gorman,	Pasco,	Turpie,
Cannon,	Hale,	Peffer,	Vest,
Carter,	Hansbrough,	Perkins,	Walthall,
Chandler,	Hawley,	Pettigrew,	Warren,
Clark,	Jones, Ark.	Platt,	Wetmore,
Cullom,	Jones, Nev.	Pritchard,	White,
Davis,	Lindsay,	Pugh,	Wilson,
Dubois,	Lodge,	Quay,	Wolcott.

NAYS—5.

Bate,	Hill,	Smith,	Vilas.
Chilton,			

NOT VOTING—28.

Allen,	Cameron,	Hoar,	Murphy,
Baker,	Cockrell,	Irby,	Palmer,
Blackburn,	Daniel,	Kyle,	Proctor,
Blanchard,	Frye,	McMillan,	Roach,
Brown,	Gordon,	Mantle,	Sewell,
Caffery,	Gray,	Martin,	Thurston,
Call,	Harris,	Morrill,	Voorhees.

So the bill was passed, two-thirds of the Senators present having voted in the affirmative.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had agreed to the report of the second committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 7542) making appropriations for the naval service for the fiscal year ending June 30, 1897, and for other purposes; further insisted upon its disagreement to the amendments to the bill numbered 32, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 51, and 52; asked a further conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. BOUTELLE, Mr. ROBINSON of Pennsylvania, and Mr. CUMMINGS managers at the conference on the part of the House.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 8109) making appropriations for fortifications and other works of defense, for the armament thereof, for the procurement of heavy ordnance for trial and service, and for other purposes.

The message further announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 8293) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1896, and for prior years, and for other purposes; receded from its disagreement to the amendments numbered 27, 207, and 208, and agrees to the same with amendment in which it requested the concurrence of the Senate; further insisted upon its disagreement to the amendments numbered 14, 24, 25, 30, 31, 37, 74, 79, 80, 81, 82, 83, 103, 104, 105, 106, 122, 137, 147, 148, 190, 192, and 200 to the bill; agrees to the further conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. CANNON, Mr. ARNOLD of Rhode Island, and Mr. SAYERS managers at the conference on the part of the House.

The message also announced that the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 5490) to license billiard and pool tables in the District of Columbia, and for other purposes, reported that, having met, after full and free conference were unable to agree; the House insisted upon its disagreement to the amendment of the Senate to the bill, asked a further conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. CURTIS of Iowa, Mr. MILNES, and Mr. HULING managers at the conference on the part of the House.

The message also announced that the House had passed a concurrent resolution to print 10,000 copies each of the majority and minority reports of the Committee on Ways and Means concerning reciprocity and commercial treaties, etc.; in which it requested the concurrence of the Senate.

REGULATIONS CONCERNING FILLED CHEESE.

Mr. SHERMAN. I call for the regular order.

The VICE-PRESIDENT. The Chair lays before the Senate the regular order, the title of which will be stated.

The SECRETARY. A bill (H. R. 8008) defining cheese, and also imposing a tax upon and regulating the manufacture, sale, importation, and exportation of filled cheese.

Mr. SHERMAN. Mr. President, I will ask the unanimous consent of the Senate to take the vote upon the bill—it will require but a single vote—in one hour from this time, or at any particular hour this evening that may be named.

The VICE-PRESIDENT. The Chair will submit to the Senate the request of the Senator from Ohio. The Senator from Ohio asks unanimous consent that the vote be taken on the pending bill one hour from this time. Is there objection?

Mr. VEST. I can not agree to that.

Mr. SHERMAN. Will the Senator fix an hour?

Mr. VEST. I do not want to fix any hour, because the bill is now the regular order, and the Senator will get a vote upon it without any agreement. I will not make any agreement about it.

Mr. HALE. Mr. President, I rise to a privileged report.

The VICE-PRESIDENT. The Chair will recognize the Senator from Maine in a moment.

Mr. SHERMAN. I understood, if others did not, that at the close of the debate upon the bond bill the filled-cheese bill should be disposed of—that one bill should follow the other. It may be that the Senator from Missouri did not so understand it.

Mr. VEST. The Senator from Iowa [Mr. ALLISON] is present and can state. He made the motion yesterday evening that the filled-cheese bill be made the special order and carried that vote.

Mr. VILAS. I ask the Senator from Ohio to observe that the Senator from Missouri [Mr. VEST] says there will be a vote on the bill.

Mr. VEST. Of course there will be a vote. We are not filibustering against the bill. We could beat it if we chose by filibustering, but we do not intend to do so.

NAVAL APPROPRIATION BILL.

Mr. HALE. I present the report of the conference committee on the naval appropriation bill.

The VICE-PRESIDENT. The report will be read.

The Secretary read as follows:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 7542) making appropriations for the naval service for the fiscal year ending June 30, 1897, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 53.

That the House recede from its disagreement to the amendments of the Senate numbered 33, 34, 35, 36, 37, and 38, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment as follows: Restore the matter stricken out by said Senate amendment; and the Senate agree to the same.

On the amendments of the Senate numbered 32, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 51, and 52 the committee of conference have been unable to agree.

EUGENE HALE,
M. S. QUAY,
A. P. GORMAN,
Managers on the part of the Senate.

C. A. BOUTELLE,
JOHN B. ROBINSON,
AMOS J. CUMMINGS,
Managers on the part of the House.

Mr. HALE. The Senator from New Hampshire [Mr. CHANDLER] desires to submit some remarks.

Mr. CHANDLER. Mr. President, I desire to take the floor upon the pending subject, but before speaking I should like to have the Senator from Maine state explicitly, so that the subject of debate may be understood, what matters have been adjusted and what matters are still in controversy between the Senate and House committees.

Mr. HALE. The only subjects-matter that are in controversy are in relation to the number of new ships and certain provisions with reference to their construction, the places where they shall be built, and the limitations, all involved in the one question of how many ships shall be built. The other question which remains open is upon the price of armor plate for the contemplated ships. All other subjects-matter have been adjusted and agreed to and are in the report, which I ask may be adopted, and then the matters in controversy will stand open.

The PRESIDING OFFICER (Mr. PLATT in the chair). The question is on concurring in the report of the conference committee.

The report was concurred in.

Mr. PRITCHARD. I ask leave at this time to make a report from a committee.

Mr. HALE. Let us have the regular order, Mr. President.

The PRESIDING OFFICER. The Senator from Maine demands the regular order.

Mr. SHERMAN. The regular order is the filled-cheese bill.

Mr. HALE. Not at present. The conference report is privileged.

Mr. NELSON. I rise to a point of order. When the Senator from Ohio [Mr. SHERMAN] had the floor and called up the filled-cheese bill, can anybody take him off the floor by a conference report or any other report?

The PRESIDING OFFICER. The present occupant of the chair was not in the chair at the time the bill was called up.

Mr. SHERMAN. The Senate can not take up the conference report except upon motion.

Mr. CHANDLER. I wish to make a suggestion to the Senator from Ohio.

Mr. HALE. A conference report is in order at any time.

Mr. SHERMAN. It is in order to move to take it up, but not to take it up.

Mr. HALE. It is in order to present it at any time. If the question of consideration is raised by anybody opposing it, that question can be submitted to the Senate; but a conference report can be made at any time, and can only be displaced or got out of the way on the question of consideration being made against it. I suppose the Chair recognizes that.

Mr. CHANDLER. If the Senator from Ohio will listen to me one moment, I hope that we may avoid either a vote or a decision of the Chair on the question of order. There are two members of the Naval Committee who wish to speak upon this conference report, who are obliged to leave the city this afternoon, and it was my intention to ask the Senator from South Dakota with reference to the Indian appropriation conference report, and the Senator from Ohio with reference to the filled-cheese bill, that debate upon this conference report might be allowed to go on this afternoon for the convenience of those two Senators. Of course the filled-cheese bill will not be displaced, as it is the regular order.

Mr. SHERMAN. According to my view, at least, it seems not to have been so considered by others. It was understood that after the bond bill was disposed of the filled-cheese bill should next be disposed of. The accommodation of two Senators at this period of time who want to go out of the city does not weigh with me a feather. I think every member of the Senate at this stage of the session ought to be here, and therefore that is not a good ground for the postponement of the bill.

Mr. CHANDLER. I took an active interest myself yesterday afternoon, as the Senator from Iowa [Mr. ALLISON] knows—when the Senator from Ohio was not here, and had gone away when he ought to have been in his place, as he says of other Senators—to get up the filled-cheese bill. The Senator from Iowa only asked that it might be taken up and made the unfinished business. The Senator from Ohio is accommodated every afternoon when he goes away, and he ought to be willing to accommodate two other Senators who want to go away for a day or two.

Mr. SHERMAN. The filled-cheese bill has been debated to some extent, and I do not understand that anyone wishes to speak upon it except the Senator from Missouri [Mr. VEST], who has a right to be heard, and I think he ought to be heard now. It does seem to me now that we ought to proceed regularly. Last evening the filled-cheese bill was made the order of business, and the unfinished business coming over to-day. I intended to call it up this morning before the hour of 1 o'clock, but was unable to do so.

Mr. CHANDLER. The Senator knows that a conference report has precedence over the unfinished business.

Mr. SHERMAN. That depends on the vote of the Senate.

Mr. CHANDLER. Undoubtedly.

Mr. ALLISON. Mr. President, I am very anxious that the filled-cheese bill should be passed, and I think it ought to pass at the earliest moment; yet I do think that where there are conference reports on appropriation bills they ought to be considered, especially where there are no agreements, in order that we may get them in position for further agreements. I had hoped, as the Senator from Ohio hopes, that there would be no further debate upon the filled-cheese bill, at least no prolonged debate, and I do not see how there can be. I was anxious that that bill should be made the unfinished business, so that nothing could intervene except conference reports. That is my desire now, and I should be glad if the Senator from Ohio would give way, as he can give way from time to time, to conference reports. I do not wish to endanger the bill.

Mr. VEST. Allow me to say a word.

Mr. SHERMAN. Upon the statement of the Senator from Iowa, I will be very glad to carry out his wishes, as the filled-cheese bill was upon his motion made the unfinished business. Therefore I have no objection to his proposition so far as the naval appropriation bill is concerned. Then I hope the filled-cheese bill will be taken up, retaining its place as the unfinished business.

Mr. ALLISON. It will retain its place.

Mr. VEST. I want to say one word. I have been sitting here listening rather impatiently to these statements about the absolute necessity of rushing the filled-cheese bill through the Senate. The bill came here with a majority of the Finance Committee against it. Two of the Senators on the committee—if I may be permitted to speak of what happened in committee—after an adverse vote on the bill, agreed rather reluctantly, as they stated, to allow the bill to be reported; but there was a majority of the Finance Committee who declared themselves against it. There are more than twenty of us, without speaking accurately, who believe the bill to be unconstitutional. I have myself fought that sort of legislation for fifteen years in the shape of the oleomargarine bill and all kindred bills. I have no more doubt about its unconstitutionality than that I am here now a member of this body. With those convictions we could defeat the bill, as every intelligent man knows, under the rules of the Senate, but we have decided not to filibuster against it, but to allow a fair vote to be taken; and whilst I have spoken without any unnecessary prolixity, simply stating my position and that of the Senators who agree with me, and whilst I have spoken a very short time, less than a half hour, then the morning hour expired and took me off the floor, to which I did not object, and we have not made the slightest attempt to delay action upon the bill, it is thrust upon us now at every moment, it seems to me, during the day. "The filled-cheese bill." "The filled-cheese bill must be passed." It seems that it is enough for us to state that we are willing, after a fair discussion and after stating our position, which we have a right to do and will do, as a matter of course, to allow a vote to be taken under the rules of the Senate as the regular order; that that should be enough; and I am a little tired of having this thing thrust on me every hour in the day and the demand made that the filled-cheese bill shall take the place of all other legislation, when I believe it is rather the worst bill we have had here this session.

Mr. CHANDLER and Mr. PETTIGREW addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from New Hampshire.

Mr. CHANDLER. I yield to the Senator from South Dakota, who desires to make a statement in reference to the order of business.

Mr. PETTIGREW. I think that as soon as the pending conference report is disposed of I shall ask the Senate to take up the other conference report in regard to the Indian appropriation bill. I can see plainly that the filled-cheese bill will occupy a good deal of time, and it is important before we adjourn to dispose of the Indian appropriation bill.

Mr. HALE. I make the formal motion, customary in such cases, the conference report on the naval appropriation bill having been concurred in, that the Senate further insist upon its amendments disagreed to by the House and agree to the conference asked for by the House, the conferees to be appointed by the Chair.

The PRESIDING OFFICER. The question is before the Senate.

Mr. CHANDLER. Mr. President, it is not my intention, as the Senator from Ohio [Mr. SHERMAN] kindly assents to allow the consideration of this conference report to proceed, to take up the time of the Senate at any great length. I hope to state very briefly my position with reference to the remaining points of disagreement between the Senate and the House of Representatives, and I believe that the debate upon the conference report can be kept within reasonable limits.

As to the first question, whether there shall be four battle ships or two, I do not regard it as of great importance. There has been a disposition to make the authorization of four battle ships or of two battle ships at this session a matter of great public moment. I desire to call the attention of my friend from Maryland [Mr. GORMAN] to my statement. I do not consider that the naval appropriation bill involves the whole financial policy of the Government; neither do I think that questions of patriotism are to be decided according as we vote for two or four battle ships at the present session.

There has been a disposition to make this question something more than a mere matter of business details. For instance, I have heard elsewhere the Senator from Texas [Mr. MILLS] criticised because he is an ardent friend of Cuba, almost willing, perhaps entirely willing, that the United States should recognize the independence of Cuba, and yet voted for two battle ships at this session instead of four, as if the Senator was inconsistent in so doing. I did not so regard the Senator from Texas.

Mr. MILLS. If the Senator from New Hampshire can give me any guaranty that these vessels shall be used in aid of the independence of Cuba I will vote for four, five, or six or them.

Mr. CHANDLER. I will say to the Senator that I think myself it will not make any difference in the settlement of the pending Cuban question whether we authorize four battle ships or two battle ships at this time, and therefore the Senator from Texas did not abate any of his sympathy with Cuba by voting for two battle ships instead of four battle ships.

Mr. President, I did not vote for two battle ships. My vote counted in favor of four battle ships, as I was paired on the question. But I do not see myself, as a mere business proposition,

what difference it makes whether we authorize four battle ships now, or whether we authorize two now and two next winter. The facts are that the Secretary of the Navy has only within a few days made a contract for the *Kentucky* and *Kearsarge*. I have the contract for the armor for those vessels in my hand. It appears that the Government has nine months in which to prepare the specifications for the armor. After that the contractor is to furnish the armor at the rate of 300 tons a month, provided that the final detailed drawings are furnished within six months. So the armor for the *Kentucky* and the *Kearsarge* doubtless will not be furnished before one year from the 1st day of July of this year. If two more battle ships are authorized, and the same kind of a contract is made, the armor for those ships is not likely to be furnished until two years from the 1st day of July; and if we authorize two more battle ships next winter the contractors for the armor are likely to furnish that armor just as expeditiously as if we authorize the four battle ships at this time.

Now, I object to having this mere question of detail made a test of the patriotism of Senators or made a test of their disposition to continue the reconstruction of the Navy.

Mr. President, I am in favor of the construction of two battle ships a year for the next ten years. As I now view the subject, in the light of the debate that has taken place, I am not in favor of the construction of four battle ships in any one year. Therefore I am content with the vote of the Senate and shall be entirely satisfied if the Senate insists upon that vote, and more than satisfied if the conference committee insists in its conferences with the Representatives of the House upon two battle ships rather than four battle ships. I resist the argument that anything more is involved in the question of the authorization of two or four battle ships at this time than a mere business question, to be settled according to ordinary business principles, and I repeat it need make, and in all probability will make, no difference whatever as to the time in which the third pair of battle ships shall be finished whether they are authorized now or authorized next winter.

Next, Mr. President, as to the limitation which the Senate has put upon the cost of armor for the battle ships. The provision is that unless the Secretary of the Navy can make a contract for the armor for an average price of $350 per ton he shall make no contract, but shall report the bids to Congress. I am confirmed by the lapse of time in the judgment that that is a wise provision which the Senate has inserted in the bill. I hope that the Senate will insist upon that provision. I hope that the Senate conferees will not consent to recede from that provision.

The Senate Committee on Naval Affairs made quite a careful but not exhaustive examination of the question of the cost of armor. According to the testimony before the committee the cost of armor is not over $300 per ton. It appeared before the committee that the Bethlehem Iron Company had made a contract with the Russian Government to furnish them armor at $300 per ton. It was the testimony of the experts who appeared before the committee, who were willing to testify as to the cost of armor, that $300 a ton was a full price, so far as the material and the labor were concerned, for such armor as is placed upon these vessels. In view of the testimony, which stood uncontradicted before the committee, it was the opinion of the committee that we ought not to go on any longer paying $500 and $550 per ton for armor.

Mr. HAWLEY. If the Senator from New Hampshire will allow me to interrupt him, I should like a little explanation. It is well known, of course, that it makes a very great difference whether a concern of that sort has continuous work, for it has very costly machinery and many very skillful workmen, whom it is not easy to collect at wide intervals. Did the committee take into consideration or did the company make representation that they are not certain of continuous employment for a series of years? It would make quite a difference, I know, with ordinary manufacturing concerns if that should not be the case.

Mr. CHANDLER. The suggestions made by the Senator from Connecticut are quite pertinent to the issue. The fact of the uncertainty as to the quantity of armor to be furnished was called to the attention of the committee; was considered by the committee. The representatives of the two concerns made, I will say, a fair appearance before the committee. They said that if they could have a guaranty for continuous work for a considerable number of years they would make a large reduction in the price. The committee were not able to give them any assurance on that point. I suppose the Government is not willing at this time to make a large contract for armor. I would myself be willing that the Government should make a ten-year contract for armor at the rate of 3,000 tons a year, which would be, speaking generally, what I have suggested, the armor for two battle ships a year. Reckoning about 3,000 tons of armor for the battle ships, with 30,000 tons we could go on for ten years. Congress has authorized no contract of that kind, but we were impressed with certain facts in reference to the past which I will state to the Senate as to the prices that have been hitherto paid.

Mr. HAWLEY rose.

Mr. CHANDLER. I yield to the Senator from Connecticut.

Mr. HAWLEY. I want to suggest that I hardly think it safe to make a contract for ten years for anything known to mechanics, because with the ingenuity of the American workman he is always getting out something new. We may want to change our style of armor in less than ten years. Five years would be long enough.

Mr. CHANDLER. I will say to the Senator a contract would be made which would cover all those points. I would have been willing myself to make contracts with these two establishments extending over a period of ten years, the contract subject to change according to circumstances; but nothing of the kind seemed likely to be consented to by Congress. The facts that appeared to the committee were that the Bethlehem Company has received, or will have received when the existing contracts are fulfilled, $6,423,156.27 for 10,086 tons of armor. The Carnegie Company will have received for 8,865 tons of armor $5,353,614.29. Taking that quantity of armor, the 10,000 tons furnished by Bethlehem, estimated at $300 a ton, which is $50 a ton less than the limitation proposed by the Naval Committee, and the cost of the armor was $3,000,000. Estimate the value of the plant of the Bethlehem Company at three and a half million dollars—and, as will be seen, that is a million dollars more than the cost of the Carnegie plant—the total expenditure of the Bethlehem Company to produce the 10,000 tons of armor and for that plant was $6,500,000, while they will have received $6,423,156.27. In other words, dealing in round numbers, we have already paid to the Bethlehem Company the cost of producing 10,000 tons of armor, and we have paid them all the money which the whole plant for making the armor has cost them.

And so with the Carnegie Company. The 8,800 tons of armor at $300 a ton is $2,640,000. The cost of the plant, as stated by Mr. Carnegie—the amount charged to construction—was $2,500,000. That makes $5,100,000, and they have already received $5,353,614,29. In other words, we have paid them all the armor has cost them and we have paid them every dollar which their plant has cost them.

While this investigation has been going on the Secretary of the Navy has made new contracts with the Carnegie Company and the Bethlehem Company for 3,000 tons more of armor at about $500 a ton.

Under these circumstances, with the facts clearly before us and not denied that armor does not cost more than $300 a ton, in view of the fact that the Bethlehem Company have made foreign contracts of $300 a ton, and in view of the further fact, which appears in the testimony before the committee, that even the foreign armor manufacturers, who are in a combine with the armor manufacturers in this country to keep the price of armor up to $500 a ton, make a price for armor at $300 a ton for the foreign trade, the committee felt that they were called upon to put some limitation upon the cost of the armor. Therefore they said, not that these contracts should not go forward at a greater price than $350 a ton, but that unless the Secretary could make a contract for the armor for these two or four ships at an average price of $350 a ton he should make no contract prior to the first Monday in December next, but should report the bids to Congress.

Mr. GORMAN. Would it interrupt the Senator from New Hampshire for me to ask him a question?

Mr. CHANDLER. Not at all. I desire to be interrupted.

Mr. GORMAN. The Senator is perfectly familiar with the testimony taken by the Committee on Naval Affairs, and he states very positively that $300 a ton is a fair price for this armor. I should like to have the Senator enlighten me and the Senate as well by telling us upon what information that statement is based, upon whose testimony, or is it admitted by the manufacturers as well as the experts? In other words, I should like, before the Senator leaves the question——

Mr. CHANDLER. The manufacturers tell us nothing about it. The testimony before us is this: First, the foreign bid at $300 a ton or thereabouts. Secretary Herbert said that he understood the price was as low as $250 a ton. The manufacturers themselves were not pressed to show us the cost of the armor. We felt delicate about pressing it, and we felt especially delicate, as the Senator knows, about pressing the retired naval officers upon the list of the Navy who were in the employ of these manufacturers. But we did take the testimony of our two experts, Commander Horace Elmer and Lieutenant-Commander Rodgers. I will read from the testimony taken by the committee on page 309 as to the price of armor for naval vessels:

Mr. ELMER. I can not see how that armor can cost the Carnegie Steel Company more than $250 a ton anyway—that is, leaving out all interest in the plant, or how much the plant cost, or how much there is of wear and tear. I merely take the basis of the metal to begin with, and go through the whole process to the end.

Senator SMITH. Outside of the question of capital invested and the wear and tear of machinery?

Mr. ELMER. Outside the question of wear and tear.

Senator TILLMAN. To make that fuller, let me ask you, in the event of the Government establishing its own plant where there was another plant equally as well equipped in existence, do you think that the Government itself or

the proprietors of the other plant could make for $250 a ton the armor for which we are now paying $500 a ton?

Mr. ELMER. Do you mean to exclude the idea of the cost of the plant?

Senator TILLMAN. I am speaking about a plant duplicating the one which now exists at Carnegie's works. Would the necessary skilled labor and the material and the supervision entail a cost in producing armor of more than $250 a ton?

Mr. ELMER. I do not think so.

That is the testimony of Commander Horace Elmer. On page 325 the Senator from Maryland will find the testimony of Lieutenant-Commander Rodgers.

Mr. GORMAN. I merely wanted to understand the question. Has Commander Elmer, in the opinion of the Senator, sufficient information as to the cost of producing the armor to give his opinion the slightest weight?

Mr. CHANDLER. The Senator from Maryland will allow me first to state the testimony of Lieutenant-Commander Rodgers, and then I will answer that question. I read on page 325:

Mr. RODGERS. I have no knowledge about the cost of manufacture of the armor, hearsay or otherwise, except from estimates I have made of the cost of labor and material. These estimates were made from a slight amount of information received from sources outside of the Bethlehem Iron Company's works, from the records of my office, from personal observation, and guesswork. The estimates probably lack accuracy in nearly every essential feature, and I am unable to make up my mind as to the probable error; but assuming that my estimates are correct, I am of the opinion that the average cost of labor and material will not be more than $250 per ton of armor.

Now, the Senator asks me whether I think——

Mr. LINDSAY. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Kentucky?

Mr. CHANDLER. Certainly.

Mr. LINDSAY. I ask the Senator from New Hampshire if the committee has any information as to what similar armor costs the French and British Governments?

Mr. CHANDLER. I will say to the Senator from Kentucky that we have, and that, as I stated a little while ago, they keep up the price to $500 a ton and make the price for the foreign trade $300 a ton. I say further to the Senator, what other members of the Naval Committee will testify to, that the price is kept up to $500 a ton by reason of a close combine of the foreign manufacturers of armor, into which combine have recently been taken the two armor establishments in this country. So, in my judgment, the establishments abroad and the establishments in this country are charging their respective governments $500 and $550 and $600 a ton for Harveyized armor which costs them for labor and material not over $300 a ton, in all human probability not over $250 a ton, for labor and material.

Mr. President, that is the evidence upon which the committee acted. The manufacturers knew that this question was under investigation and they could have submitted to us any evidence which they had desired to submit. In the face of this combination, in the face of this fact——

Mr. LINDSAY. I will ask the Senator from New Hampshire another question. He states that the home manufacturers export armor and sell it for $300 a ton. To whom do they sell? What foreign market have they if there is a combination between the foreign manufacturers and the home manufacturers?

Mr. CHANDLER. I am very much obliged to the Senator from Kentucky for asking the question, because it requires me to state what I understand to be the exact facts. The Bethlehem Company went abroad in order to break into the foreign market and to secure admission to the foreign combination. They bid for armor for a foreign government at $300 a ton and obtained the contract. Thereupon there was, of course, more or less commotion among the foreign manufacturers abroad, who were in a combination among themselves, but had not anticipated this American inroad into their field. The result was, as the Committee on Naval Affairs believe, a close combination was made between the two American establishments and the foreign establishments, and now the price of armor is again raised to $500 a ton. Have I made the statement so that it is intelligible to the Senator from Kentucky? That is our belief, I will say to the Senator. As long as there was competition or wherever there was competition the price of armor went down to $300 a ton. Whenever competition was destroyed by combination—the Senator is familiar with the principle—the price of armor went up and is now reestablished; and notwithstanding the fact that we have paid to the Bethlehem Company and to the Carnegie Company, over and above the cost of producing their armor, a sum equal to the whole value of their plant, the only reduction that the Secretary of the Navy could obtain from these two concerns, who are in combination now and not in competition, was a reduction of $50 a ton. Under these circumstances, with the evidence satisfactory to our minds that from $250 to $300 a ton was the cost of armor, in the face of the fact that the Secretary of the Navy, as to the *Kentucky* and the *Kearsarge*, had only been able to get a reduction of the price of armor from $550 down to $500 a ton, we felt that we would be derelict in our duty if we did not insist upon the limitation which was proposed by the committee and which went upon the bill without objection from any Senator on this floor.

Now, Mr. President, if we intend to surrender to this foreign and home combination and to pay as much a pound for the armor that goes on the outside of our battle ships as we do for highly and elaborately finished cannon, then we will recede from the amendment.

But if we intend to exercise the power of Congress and to perform the duty of Congress to extricate the Navy Department from the clutches of this great combination, then we will insist upon the limitation which the Senate, without objection, put upon the bill.

Mr. LODGE. Mr. President, I supposed the Senator from Pennsylvania [Mr. QUAY], whom I do not now see in his seat, was going to make a motion in regard to receding from the amendment as to battle ships. I understand there are two subjects, the battle ships and the armor plate, disagreed to.

Mr. HALE. All the other amendments have been adjusted. There are several amendments, as I stated before, connected with the battle ships, as to where they shall be built, the limitations, etc., but they all go with the question of ships. They can easily be adjusted if the number of ships is fixed.

Mr. LODGE. Mr. President, in regard to the matter of fixing the price of armor plate, I have no desire to make any motion. It seems to me wise to fix a price in the bill, although I am inclined to think the price as originally fixed in the Senate is too low. But it can be easily raised and agreed upon in conference.

But in regard to the battle ships, I trust the Senate will now be ready to recede and to accept the bill as it came from the House. The House, or a large portion of it, at the outset of this session, as also a large number in the Senate, desired very strongly to have six ships, and the House accepted four only by the advice of the House Committee on Naval Affairs. It is not an excessive authorization. On the contrary, it is a moderate one, in my judgment. The battle ships are part and parcel of the general system of coast defense. We must have proper coast defenses. We must have a proper Navy if we are to put the United States in a proper position of defense. We need coast defenses to protect our navy-yards as well as our ports, and we need to have battle ships because they can be used to defend the whole range of coast.

I do not think it is necessary to go over all the arguments that have been made in this regard, but when we read, as we may have read within the week, in the British publication the Broad Arrow, which is a military and naval publication of wide circulation, and represents the views of the British army, that a war is sure to come to the United States, when we see that it is proposed in England to add to the immense line of fortifications which they have drawn around our coast, additional fortifications at Newfoundland, it seems to me that these menacing facts ought to awaken in us a very keen sense of the necessity of putting our coasts in a proper condition of defense against any enemy.

There is not the slightest danger of the United States ever getting into any war with anybody if we have a sufficient Navy and proper coast defenses. The only thing that could ever plunge this country into the calamity of war would be the temptation offered to a foreign power by our exposed coasts and our weak naval force. Four battle ships is a trifling authorization. They voted in England this year the largest credit they have ever voted for their navy, and it is not three years since they voted ten millions sterling to build battle ships, and here we are haggling over two ships.

We have passed the great river and harbor bill over the President's veto. We have adopted all the proper and reasonable appropriations for the conduct of the Government. There is absolutely nothing that is so important to the United States, to its peace, prosperity, and welfare, as a proper system of coast defenses, and yet that is the only point which has been selected for economy, as I pointed out before when this bill was up.

I have no desire to detain the Senate by entering at length into this question, but I think it must be obvious to Senators who have followed the drift of foreign discussion during the past winter that the United States must look now, as we always have looked, to her own resources and her own strength for her peace and safety. With the exception of Russia, there is not a country in Europe which is not hostile to the United States whenever she seeks to vindicate a single one of her interests. It has been apparent throughout in the tone of the European press this year. We stand alone, and we stand of necessity alone. As was written many years ago by Dr. Holmes to Mr. Motley, at that time minister to England, we stand alone because our very existence is a menace to the principles on which foreign governments are for the most part founded. It is not our aggressions that anger them, for we make none. It is the fact that they dislike and distrust and hate the principles of free government on which the United States have been built up. They are jealous of our success and fear our rivalry in trade industries and commerce.

If we stand alone in the world, as we necessarily do, it is preeminently our duty to take care of our interests and to see to it

that we are in a position where we can command peace. As I have already said, there never will be the slightest danger of war to the United States except from the temptation which an impotent and weak Navy and a coast naked of defense will offer to the nations of Europe.

I shall not make the motion to recede from the amendment as to battle ships, because I see the Senator from Pennsylvania, who is a member of the Committee on Appropriations and of the conference, has returned, and I will leave it to him.

Mr. QUAY obtained the floor.

Mr. MORGAN. Will the Senator from Pennsylvania yield to me to submit a resolution to go over?

Mr. QUAY. Certainly.

CAPTURE OF THE COMPETITOR.

Mr. MORGAN. I desire to present a resolution for the purpose of having it printed. I ask that it may lie upon the table until to-morrow.

The PRESIDING OFFICER. Does the Senator from Alabama desire to have the resolution read?

Mr. MORGAN. If it is printed, I do not care about its being read.

Mr. HALE. What is the resolution? I do not wish to consent to its being introduced until I can hear it read.

The PRESIDING OFFICER. The Senator from Alabama asks unanimous consent to submit a resolution which will be read for information.

The Secretary read as follows:

Resolved, That the Senate, being informed by common rumor, and by testimony taken by the Committee on Foreign Relations, that a vessel of the United States called the *Competitor* has been captured by a Spanish ship of war, and that one or more citizens of the United States were captured on board said vessel, and have been tried and condemned to death by a military tribunal in Cuba, and are now in prison, at Habana, awaiting the execution of the sentence. And the Senate having instructed said committee to inquire into and make report respecting the rights of said citizens, under the treaties existing between the United States and Spain, and under the laws of nations, the President is requested, in conformity with section 2001 of the Revised Statutes, to inform the Senate whether any such capture has been made by a Spanish war ship, and whether any citizen of the United States has been captured on or near such vessel, and "has been unjustly deprived of his liberty by or under the authority of" the Government of Spain, and whether the President forthwith demanded of Spain the reasons of such imprisonment, and, if such imprisonment is unlawful, and if such sentence to death violates the laws of nations, or the treaties with Spain, whether the President has demanded the release of such citizens.

And that the President communicate to the Senate all the facts and proceedings relative to such capture, sentence, and imprisonment of such citizens, as soon as practicable, in accordance with the statute in such cases made and provided, as follows:

"SEC. 2000. All naturalized citizens of the United States, while in foreign countries, are entitled to and shall receive from the Government the same protection of persons and property which is accorded to native-born citizen.

"SEC. 2001. Whenever it is made known to the President that any citizen of the United States has been unjustly deprived of his liberty, by or under the authority of any foreign government, it shall be the duty of the President forthwith to demand of that government the reasons of such imprisonment; and if it appears to be wrongful and in violation of the rights of American citizenship, the President shall forthwith demand the release of such citizen, and if the release so demanded is unreasonably delayed or refused, the President shall use such means, not amounting to acts of war, as he may think necessary and proper to obtain or effectuate the release; and all the facts and proceedings relative thereto shall, as soon as practicable, be communicated by the President to Congress."

Mr. HALE. I will object for the present. I wish to examine the resolution in order to see if it has the usual clauses.

The PRESIDING OFFICER. The Senator from Maine objects to the presentation of the resolution.

Mr. HALE. I object to its presentation for the present.

The PRESIDING OFFICER. The Chair supposes it requires unanimous consent to present the resolution at this time.

NAVAL APPROPRIATION BILL.

The Senate resumed the consideration of the disagreeing votes of the two Houses upon the bill (H. R. 7542) making appropriations for the naval service for the fiscal year ending June 30, 1897, and for other purposes.

Mr. QUAY. I make the motion indicated by the Senator from Massachusetts, that the Senate recede from its amendment to the bill striking out the word "four," in the section, the number of which I have forgotten, and inserting "two," reducing the number of battle ships to be constructed from four to two. I do that, as probably the Senator from Maine has mentioned, for the reason that the House having twice voted upon this question, its members of our committee conceive themselves to be strictly instructed upon the subject. On the other hand, but one vote has been taken in the Senate, in which a very meager majority was secured for the amendment. I have reason to believe that if the Senate will either one way or the other signify its judgment in relation to the number of battle ships the committee can reach a conclusion.

I understand that the question upon the other amendment relating to armor plate has been discussed during my absence. That depends to a large extent upon the result of the vote as to the battle ships. When the number of battle ships is determined I think the committee can reach a conclusion as to the value of armor plate. The amendment of the Senate limiting it to $350 a ton to my mind means the absolute construction of no battle ships. But I do not care to advert to that question now, unless it is discussed in other quarters. I should like to have a vote testifying the sense of the Senate as to the number of battle ships.

The PRESIDING OFFICER. The Senator from Pennsylvania moves that the Senate recede from its amendment providing for two battle ships instead of four.

Mr. BACON. I understand the suggestion of the Senator from Pennsylvania to be that the debate as to armor plate shall be pretermitted. Am I correct?

Mr. QUAY. I suggest that the amendment as to armor plate shall go back, as it depends to a large extent upon the result of a test vote as to battle ships.

Mr. BACON. I have no objection to that direction, but as I shall probably be absent when the matter comes back I desire to occupy the attention of the Senate for four or five minutes in giving some reasons why I think the amendment should be insisted upon by the Senate, and it is only on account of my prospective absence that I propose now to do so.

Mr. QUAY. If the Senator from Georgia proposes to enter into that subject, I may as well, inasmuch as I have the floor, say a few words upon the point of division between the two Houses.

Mr. BACON. Certainly.

Mr. QUAY. Mr. President, it is eight or ten years since the Government of the United States contracted with the Bethlehem Iron Company for furnishing armor plate for United States vessels. The enterprise was new and experimental. At the solicitation of the then Secretary of the Navy the Bethlehem Iron Company agreed to enter upon the construction of armor plate. The Government is the only customer in this country for that ware. A very expensive plant was necessary, which the corporation proceeded to construct. The testimony taken before the Naval Committee shows that the cost of the plant in 1890 was $2,500,000, and by 1896, when the president of the company appeared before the Naval Committee, it ran up to $4,500,000, or in that neighborhood. The plant is worthless to the company for any use except that of manufacturing armor plate, for which the Government is the only customer.

The Bethlehem Iron Company, under contract with the Government, has furnished since the completion of the plant up to the present time between ten and eleven thousand tons of armor plate. I have not here the average figures of the contract of the Bethlehem Company with the Government. In 1890 or later they failed to supply the demand, and at the request of the then Secretary of the Navy the Carnegie Company established a plant. In its construction they had for their instruction the experience of the Bethlehem Iron Company, and the actual cost, according to the testimony before the Naval Committee, was about $1,000,000 less. I think the testimony showed—and if I am wrong the Senator from New Hampshire [Mr. CHANDLER] will correct me—that the actual cost of the plant was about $3,000,000.

Mr. CHANDLER. The Senator from Pennsylvania will excuse me. Mr. Carnegie said that up to that time they had charged to construction $2,500,000.

Mr. QUAY. I will read in a moment what Mr. Carnegie did actually say. Here is the reply of Mr. Carnegie to a question of the chairman of the Naval Committee upon that point. I read from page 7 of the printed statement of Mr. Carnegie:

The CHAIRMAN. What amount have you estimated that you have spent for this purpose to compare with Bethlehem—

That is, the other company.

Mr. CARNEGIE. About $3,000,000 for such additions as were necessary to our preexisting steel-making plant; we had nothing to spend for making the steel for armor. Our books show $2,500,000 and something over, I think, but we charged nothing for the land, nothing for the connections; we charged nothing for water, for light, or for superintendence, or for anything like that, because we had all those things. Half a million would not cover what we supplied beyond the $2,500,000.

The CHAIRMAN. The actual cost was about $2,500,000?

Mr. CARNEGIE. The actual cash expenditure, and what we ourselves contributed, as just explained, making three millions.

That I estimate as fixing the cost of the Carnegie plant. Under contract with the Government from that day to this the Carnegie Company, according to the testimony taken before the committee, has furnished 8,865 tons of armor. These are the statistics as to the cost of the plant and the quantity of armor furnished.

I understand the question raised here is, what amount of profit has been derived by these corporations from the armor they have delivered? Before the Naval Committee it was testified by the Government inspectors at each of these plants that the actual cost of each ton of armor, taking the labor and material represented, without any profit, was about $250. The total cost, therefore, of the 11,000 tons furnished by the Bethlehem Iron Company would be $2,750,000. That is, the company has actually paid out that much money upon the armor it has furnished for labor and material. Its plant, as I said before, cost $4,000,000, making a total of $6,750,000 for the actual cost of the plant and the armor furnished. To

that interest ought to be added. To show exactly what the Bethlehem Company is out until to-day on its contract with the Government interest should be added upon the plant and upon the labor and material to the extent of the money paid for them. At 5 per cent per annum interest on the plant alone would amount to $2,000,000. But I put it at a low estimate, $1,000,000, making the total cost of the plant and armor furnished $7,750,000. The Bethlehem Company has received from the Government in all up to this date $6,110,314, leaving the corporation actually out of pocket to-day $1,631,686.

The Carnegie Company, as I said before, invested in its plant $3,000,000. The cost of the armor which it furnished, 8,865 tons, at $250 a ton, is $2,216,250, making a total investment by the Carnegie Company in cash of $5,216,250. Estimating interest as in the other case, there is due them on their outlay $750,000, making a total of $5,966,250. They have received from the Government up to date $4,940,021, making a total balance in their favor, for actual cash outlay, of $1,026,229; that is, admitting the actual cost of the armor to be $250 a ton, which the corporations do not admit as the actual cost of material and labor without profit, and allowing nothing for the wear and tear of the plant, which they declare has to be supplied once at least in every ten years. Taking the interest and the loss on the plant, if they are correct, those items alone will amount to $200 a ton upon all the armor they furnish.

The question here is how much these corporations have made, and whether they are making too much on the armor they are now delivering. Instead of having made anything, I have shown they are out over $3,000,000 in cash. As to what the actual profit is upon the armor they are now delivering, I do not know; but it seems to me that the Government and the corporations ought not to be restricted in their contracts until these corporations, which have invested this money at the instance of the Government, have at least gotten it back; and they ought to get it back with a fair profit before we undertake to take from them the right to bid at fair figures. My own belief is that if the amendment is insisted upon there will be no battle ships built. The corporations would be willing to-day to turn over their plants to the Government at cost, with a fair interest on the money they have expended.

Mr. QUAY subsequently said: I omitted at the time I had the floor to ask to have printed the testimony of Mr. Carnegie before the Committee on Naval Affairs as part of my remarks. I now make that request.

The PRESIDING OFFICER. It will be so ordered, in the absence of objection.

The testimony referred to is as follows:

PRICES OF ARMOR FOR NAVAL VESSELS.

Statement of Andrew Carnegie in relation to prices paid for armor for vessels of the Navy before the Committee on Naval Affairs of the United States Senate February 8, 1896.

The CHAIRMAN. Mr. Carnegie, we desire generally the same information from you as to your works that Mr. Wharton has given us in respect to Bethlehem.

Mr. CARNEGIE. Mr. Chairman and gentlemen, then I can only corroborate what Mr. Wharton has said. Our own experience in the manufacture of armor corresponds exactly with his. We were nearer toward making armor than the Bethlehem Iron Company, having very powerful machinery for our own business, but we declined to go into its manufacture when invited by Secretary Whitney. We declined to Secretary Tracy, his successor. My judgment never was in favor of going into the armor business. I knew it could never be a safe, permanent, and profitable business. It has not been as profitable as several departments of our own business, even in proportion to capital invested, and it requires infinite care, skill, and constant attention. That gentleman [pointing to Mr. Tracy] and the President of the United States are responsible for forcing us into the making of armor. If it had not been for a telegram received when I was abroad, stating that Secretary Tracy had requested us to do so, as our duty, to help the United States Government out of its difficulty when its ships were standing in the stocks and it could not get armor, you would never have found the Carnegie Steel Company engaged in the manufacture of armor.

The CHAIRMAN. You did so because of the failure of the Bethlehem Company to fulfill their contract?

Mr. CARNEGIE. It was only a delay, not a failure.

The CHAIRMAN. It was an inability.

Mr. CARNEGIE. No; the Bethlehem Company were too sanguine. They did not know so much about armor making as I think I did. I had often visited the European works, and nothing could have induced me to go into the manufacture of armor plate as a money-making business. If we had put the money we have in the armor plant to-day and the time and skill into our own regular business, we could have made much more money than we have made, and we would have had no trouble.

We sometimes make 150,000 tons of steel per month, and the petty 300 tons of armor that we make gives us more trouble than all the 150,000 tons. It takes the best brains and the unremitting attention of the staff away from our business, and I have never ceased to regret the day that we were called upon to undertake the task.

Senator HALE. Why did you go into it?

Mr. CARNEGIE. Because the President of the United States and the Secretary of the Navy had told us that the United States Government was in a difficulty, and if the President of the United States were to ask me to-day to double our armor plant, I would do it. If he were to ask me to go to Kamchatka for the United States, I would do it. I never went into this business for money. I knew better.

Senator HALE. It was because of your patriotism?

Mr. CARNEGIE. Yes, sir; just, Mr. Senator, as you would obey the wish of the Commander-in-Chief of the United States, the President, if he told you that you were the only person that could serve your country. Mr. Tracy can tell you how often we declined. Secretary Whitney can tell you also. But when we did go into it I personally took up the matter with our partner, Mr. Lander. We visited the tool makers of Europe, contracted for tools nearly completed, paying a bonus to those entitled to get them. Three sets of men began work at our works, eight hours each, never stopping even Sundays or Sunday nights. We rushed everything, and in twelve months—November to November—after the contract was signed we delivered the armor. Had we done what we did for any European Government, a peerage or the Legion of Honor would have been offered to us.

Ex-Secretary TRACY. I have said, Mr. Carnegie, that I did not recall how the first interview between Mr. Abbott and myself came about. Have you any information on the subject? If you have, I wish you would give it to the committee. You know what occurred at the Department.

Senator HALE. What brought you to Washington?

Ex-Secretary TRACY. Do you recollect?

Mr. CARNEGIE. I remember the first time Mr. Secretary Tracy spoke to me in Washington about the matter. You said, "How is it, Carnegie, that we can not get steel that will stand our specifications except from you?" I said, "Mr. Secretary, because nobody in the world has machinery powerful enough to make it except ourselves. We have the most powerful mill in the world."

Ex-Secretary TRACY. I remember that statement.

Mr. CARNEGIE. You then said to me, "We are getting into a hole about armor. I can not get it. If we can not get it you will have to do the best you can to get the Government of the United States out of trouble." Did you not, Mr. Tracy? I left you, and when I was abroad I got a telegram from Mr. Abbott advising me that you had sent for him—he was then our chairman—and wanted us to help the Government out of its trouble and go into the manufacture of armor. Mr. Blaine also spoke to me about it, and said it was feared there would not be a ship finished during the Administration of President Harrison. I believe the Cabinet congratulated Secretary Tracy upon the bargain that he had made which brought us into the armor business.

Mr. Chairman, one reason why armor making is not profitable is that we get only about 3,000 tons a year. We have $3,000,000 invested in the plant. We have to stop that plant every now and then for five or six months, but interest and maintenance run on, and some of our best men we must keep. Our men have just been scattered for six months now. We took a contract from the Russian Government for 1,000 tons of armor, and that has kept them running a few months, but in three weeks from now part of them will be out of work, and all of them will be idle again three months, for it will be three months before we get a chance to make armor plate for any of the new battle ships, and no concern—Senator SMITH, you are a manufacturer and know that this is true—can be successful or make money under such circumstances.

When Secretary Tracy asked us to go into the making of armor and we had reluctantly consented, it was a question of price, and we said that we could take no advantage of the Government's necessities. Whatever was the price paid the Bethlehem Company, which was the lowest bidder in competition, there being three parties in all, was our price. It was exactly the English price, as near as I could figure it.

I was amazed that the Bethlehem Iron Company bid at such a price, for armor making is largely a question of labor, and we ought to have 30 per cent more for armor in this country than they get in England, as skilled labor costs so much more. I think if the Government of the United States gets its armor at the same price as England pays it is to be congratulated. Our armor is superior to any. However, we went on. Requirement after requirement was made by the Government of the United States. The armor we are making at present costs us $105 a ton more than the armor we contracted for; not that the Government does not pay the extra cost, for it does pay it, but it costs us that much more. This causes the cost per ton to seem high, but the armor now furnished is really cheaper than the first, as its resistance is so much greater. I will just give you the items.

We contracted with Secretary Tracy to make common steel, such as Great Britain and France and Germany were getting made. It was afterwards changed to nickel. Nickel is harder. I once heard that the President said Mr. Tracy could make good bargains. He did make a good bargain with us. He allowed us only $10 a ton more to make nickel steel.

Then we go on to the Harvey process. The Secretary of the Navy wanted harveyized armor. He required us to build the furnaces for Harvey armor, which are good for nothing else in the world. We spent over $500,000 on them. Anybody else would have spent $300,000, because we had the ground, the connections, the heat, and the water, and we had our staff. We have harveyized only about 4,000 tons of armor, and if the Government adopts some other process to-morrow the Harvey furnaces are a complete loss to us; they are specially constructed for this process and are good for nothing else. The Secretary allows us $50.80 a ton for that, while the British Government allows $100 a ton for the same.

The CHAIRMAN. Just double.

Mr. CARNEGIE. Yes. They allow it in this manner: The manufacturer divides it. He says, "There is $60 a ton for the armor," for which we get $50.80. Then he charges 2 cents a pound royalty for the Harvey process; that is $40. Secretary Tracy bought the right to use the Harvey process for $100,000, and of course it does not cost the Government the royalty. But in England the manufacturers own five-sixths of the Harvey patent, and therefore, by my figuring, they get $93 net for harveyizing and we get $60. The other $7 goes to the American shareholders in Harvey patents. The British Government pays, as I have said, $100 per ton. They do not harveyize thin plates. They have not been able to do it. We are compelled to do it, and it is very difficult and costly.

Senator HALE. Deck plates, etc.?

Mr. CARNEGIE. Turret plates. It is very hard to do. Now, under the Harvey process, it takes a month to harveyize every plate.

Senator HALE. Thirty days?

Mr. CARNEGIE. Yes, sir; it takes a week to heat it in a great furnace up to the necessary temperature. It takes two weeks to harden it. It takes a week for it to cool. All our operations are delayed one month for every plate we harveyize. We are not paid fairly for this work. Thus nickel costs $10 to work over plain steel; there is $45 per ton patent royalty; total, $55. Harvey costs $50; that is $105. Then we are now required to reforge armor under our own patent. I have just received the London Engineer, which gives its annual review of naval affairs. This is the highest authority. I will not read it all, but I quote its concluding words: "Double forging has come in the United States, and the recent 'record breakers,' as they call them, have chiefly been double-forged plates of Carnegie." That is our record.

Senator HALE. You have a patent upon that process?

Mr. CARNEGIE. Yes, sir.

Senator HALE. The Corey patent?

Mr. CARNEGIE. Yes, sir; but we do not charge the Government any royalty for it. If the Government of the United States would give us what the British Government gives its armor-making plants—steady work—we should be all right. For instance, to-day you see in the papers that it has ordered five more battle ships. The British armor-plate establishments have never been out of work for I do not know how many years; I should say ten. They work night and day. One of them made 6,000 tons last year. What do we get? Scarcely anything this year.

If the Government would keep us in work 6,000 tons a year, it would be a highly profitable business; but as it is now, gentlemen, I assure you that many departments of our works are making more money and have made more

money on the capital. Note Mr. Wharton's figures: Six millions invested means annual interest $360,000. Upon 3,600 tons of armor this means $100 per ton interest cost. Assume that the Government orders armor for ten years, and then its Navy is finished; this means that $400,000 per year depreciation upon plant has to be charged—more than a second hundred dollars per ton. Because some uninformed people only see the high price per ton, and do not calculate properly, they think armor plants are extremely profitable. They are not so. Take the $3,000,000 which we are just now spending for blast furnaces. I know that investment will make more profit than the armor-plate plant, and it costs about the same. It will involve no special care, have few if any stoppages, and be in use as long as we can look ahead. It is a far more desirable investment of capital.

Senator SMITH. What is the capacity of your armor-plate establishment?

Mr. CARNEGIE. It is about the same as that of Bethlehem. The present Secretary of the Navy recently asked me how much we could do. I replied, "It is a question of money." If the Government of the United States give us 20,000 tons of armor to make, we can double the plant and furnish it before they are ready for the plate. Some one has asked to-day, I think it was Senator HALE, why we did not increase the capacity of our plants to fill the Government wants. I will take a contract to deliver all the armor that the Government wants—Bethlehem could close or Bethlehem could continue and we shut up—and make all the armor. Neither establishment can be kept more than half employed at the present rate. Another gentleman asked about the Government erecting an armor plant. Gentlemen, you can not make armor without making steel, can you?

Senator SMITH. Not very well.

Mr. CARNEGIE. I wish the committee would come with me and visit the armor plant and let us show you what we have. In order to make armor plate we sometimes have an ingot weighing 150 tons; that is for the big plates we have to make. We cut off one-third from the top and one-third from the bottom of this ingot. We are not required by the contract to do it; one-third is what we are required to cut off by the contract, but we find we can not make armor plate that will break records without throwing away one-third at bottom and top. The pure, solid steel is in the center of the ingot.

We get five or six of our steel-melting furnaces running into a great pit until 150 tons are there. By an electric crane we lift 150 tons right up. That is all the Government business for two days that the plant will have to do, as a rule. If it is a 40-ton plate, we would not cast another until the third day. If you have other work for the heating furnaces, where you are making steel, it would be all right. As it is with us, we keep the furnaces and the forces busy upon general work and only cast an ingot for armor once in two or three days. That is one reason why no Government has attempted to make armor. It would have to go into the steel business. Armor making is an adjunct to a great steel-making concern. The tonnage for armor is so small, 3,000 tons in a whole year, when we make sometimes in one month 150,000 tons of steel.

The CHAIRMAN. What amount have you estimated that you have spent for this purpose to compare with Bethlehem?

Mr. CARNEGIE. About $3,000,000 for such additions as were necessary to our preexisting steel-making plant; we had nothing to spend for making the steel for armor. Our books show $2,500,000 and something over, I think, but we charged nothing for the land, nothing for the connections; we charged nothing for water, for light, or for superintendence, or for anything like that, because we had all those things. Half a million would not cover what we supplied beyond the $2,500,000.

The CHAIRMAN. The actual cost was about $2,500,000?

Mr. CARNEGIE. The actual cash expenditure, and what we ourselves contributed, as just explained, making three millions. Mr. Wharton's figures in my opinion are right. The Government would spend about $5,000,000 certainly to make a steel-making plant and an armor-plate plant for the Government. We should have to do so if we had to start de novo and were not in the steel-making business——

Senator PERKINS. It would require another million for stock.

Mr. CARNEGIE. You can not do it for $1,000,000. We have to-day in one group nearly half a million of dollars' worth of finished armor waiting test and acceptance by the Government. It takes much more capital now since everything takes one month longer for Harvey process.

The CHAIRMAN. In your judgment, then, to start an establishment for this purpose equal to yours—I do not mean the entire establishment, but simply the armor-plate plant—it would require about $10,000,000 of capital?

Mr. CARNEGIE. Five million dollars.

The CHAIRMAN. For capital and all?

Mr. CARNEGIE. Five million plant and two million capital, as Mr. Wharton says—$7,000,000.

Senator CHANDLER. What did you say about the foreign armor makers having an interest in the Harvey patent?

Mr. CARNEGIE. The continental manufacturers purchased the Harvey patent. They purchased it for $100,000 cash for Great Britain, and a sixth of the stock. Therefore, the British manufacturers have five-sixths of that stock. One hundred thousand dollars for Great Britain in proportion to the armor it makes would be equal to about $15,000 for the patent right for the United States.

Senator CHANDLER. That is the way they disposed of the Harvey patent?

Mr. CARNEGIE. Yes, sir. It is a profit to the manufacturers. They charge the British Government $40 per ton royalty and $60 as cost of the process.

Senator CHANDLER. That is about 2 cents a pound?

Mr. CARNEGIE. Yes, sir.

Senator CHANDLER. The United States, having made a contract at a half cent a pound, may be said to have bought out the patent right?

Mr. CARNEGIE. Yes, sir; the foreign manufacturers bought the patent and the United States Government bought the patent. The United States Government, I think, paid $5, or something, per ton.

Ex-Secretary TRACY. A half cent a pound.

Mr. CARNEGIE. Very well. The British Government pays 2 cents a pound to the manufacturers. We have not anything.

Senator CHANDLER. And they own five-sixths of the stock.

Mr. CARNEGIE. Yes, sir; they pay themselves back. We have no patent for which we charge the Government. We are not interested in the nickel process, or in any other patent other than our own Corey patent, which was invented in our own works.

Senator CHANDLER. How many patents have you?

Mr. CARNEGIE. Only our own patent. The Corey, as far as armor is concerned, and one for nickel.

Senator CHANDLER. How many patents are there, your own and other people's patents, on the armor that you are going to bid for, or have already bid for, to the Secretary of the Navy?

Mr. CARNEGIE. There would be the nickel patent and the Harvey patent.

Senator CHANDLER. What do you mean by nickel reforging?

Mr. CARNEGIE. No. The introduction of nickel into steel.

Senator CHANDLER. What are those patents?

Mr. CARNEGIE. The Schneider patents.

Senator CHANDLER. Then there is the Harvey process, the nickel, and the process of reforging?

Mr. CARNEGIE. Yes, sir.

Senator CHANDLER. What else is patentable, or what other patent do you use or will you use to carry out the new contract with Secretary Herbert, if one is made?

Mr. CARNEGIE. I can not recall any other important patents.

Senator CHANDLER. Those are all the patents that now occur to you?

Mr. CARNEGIE. Yes, sir.

Mr. BACON. Mr. President, I think I am perfectly safe in saying that there is no desire on the part of any member of the Committee on Naval Affairs to defeat the manufacturers of naval armor in the getting of a fair and liberal profit on the work which they do for the Government. The only thing which is desired is to prevent their getting an improper profit. The committee are probably not in a position to state what profit these gentlemen are making, but there is very grave reason for believing that the Government is being made to pay very much too high a price for this armor, and the purpose of this amendment is not to fix arbitrarily a rate at which this armor shall be paid for, but to put such an amendment on the bill as will bring to the knowledge of the Congress of the United States at the proper time and in due time the fact of what is a proper price for this armor.

The two battle ships, the *Kearsarge* and the *Kentucky*, required their armor to be furnished immediately, and therefore no delay was permissible for the purpose of gaining this information. This amendment does not apply to them. On the contrary, the committee, before this amendment was introduced into the Senate, notified the Secretary of the Navy that they did not propose to take any action which would in any manner delay his making of the contracts for the armor of these two battle ships, and the contracts have been made. The whole scope of this amendment is that the Secretary of the Navy shall not make any contracts for this armor at a rate exceeding $350 per ton, which I presume means an average. I have forgotten whether the word "average" is used.

Mr. CHANDLER. The word "average" is used.

Mr. BACON. It says an average for the battle ships to be authorized by the pending bill, and if he can not make contracts within that figure he shall report to the next session of this Congress.

The point is that it is not necessary that any contract should be made prior to that date. If contracts can be made at that figure, well and good. If not, the matter is to be reported to Congress, so that additional information, if possible, can be procured as to whether this is a proper price; and if found to be an improper price, then that such steps shall be taken by Congress as may be deemed proper to see that the Government is not required to pay an exorbitant price for this material.

The armor which the Government has heretofore bought has cost over $600 per ton. That is an enormous price to pay for iron in any shape. It is in evidence that the steel—not simply crude iron, but the steel after it has been cast into an ingot—is only worth to these people $17 per ton. Seventeen dollars a ton is what the steel is worth after it has been cast into an ingot, which is subsequently forged into armor. Now, let Senators for a moment think of the processes there must be which will raise a ton of iron or of steel from the value of $17 a ton to over $600 a ton, for that is exactly the problem that is here. The committee struggled in vain to get from anyone interested in this manufacture such information as would enable the committee to determine from their testimony whether or not the Government was paying the proper price for this material.

Now, Mr. President, it is perfectly competent for these manufacturers to ascertain within reasonable proximity to the exact truth what is the cost of this armor. I am informed, for instance, by the Senator from California [Mr. PERKINS], who is interested in large shipbuilding operations, etc., that contracts are frequently made with large manufacturers by which 10 per cent is agreed to be paid upon the actual cost for a ship that is constructed, in which is taken into consideration the value of the plant, the interest upon the money invested in the plant, the wear and tear on machinery, the actual expenditure for wages, and the cost of material. A man is selected who is put in the establishment, who keeps the time of all the laborers and mechanics who are engaged in the construction of the ship.

Mr. QUAY. Will the Senator permit me to interrupt him a moment?

Mr. BACON. Certainly.

Mr. QUAY. The Senator will remember that the Government inspectors, I think, at the Bethlehem plant and the Carnegie plant testified that the actual cost of labor and material was $250 per ton; so that the Senator can take that for a starting point as to the price.

Mr. BACON. I think if the Senator will examine the testimony he will find that he does not state it with exact accuracy; and if the Senator had been present when the testimony was given, he would have known that these officers did not intend to be understood as estimating that it would cost that sum, but they put it as an outside limit, if I recollect aright. I think they used the word "possibly."

Mr. QUAY. I have here their testimony.

Mr. BACON. Having been present when these witnesses were examined, I know that they did not assume to give with any degree of accuracy the cost. They said they had not the information that was necessary, and they did not assume to give with any degree of accuracy what the cost would be. But it is impossible, Mr. President, from any statements made by any of the officials, to add up any such amount as $250 per ton; it is impossible to calculate from any statement they gave as to the cost of material, the cost of labor, and any of these various processes, to come anywhere in the neighborhood of $250 per ton, and I do not believe it can be shown that the actual cost of labor and the actual cost of material will amount to $150. As to the cost of plant and interest upon the investment, I have nothing to say, because that we have not had sufficient information upon. But the design is that there shall be full information gotten.

I was handed by the Senator from South Carolina [Mr. TILLMAN] the testimony of these officers with reference to the cost of this material, and I was quite sure I was correct—although I have not seen the testimony for some time—in the statement that neither of the officers fixed that as the cost, but fixed that as the possible limit. The question was asked by the Senator from New Jersey in the committee of Commander Elmer:

Senator SMITH. I ask you to state the cost approximately?
Mr. ELMER. I can not see how that armor can cost the Carnegie Steel Company more than $250 a ton anyway.

That is simply putting it as an outside estimate.

The distinguished Senator from Pennsylvania [Mr. QUAY] suggests that if this amendment be adopted it will prevent any contracts for ships.

Mr. QUAY. If the Senator will permit me, I did not say that. I said it would prevent it, not that it was intended to prevent it.

Mr. BACON. It would prevent it. I possibly did not catch the exact words of the Senator. In that I think the Senator is mistaken. The contracts for those ships are made by parties who do not themselves make the armor, and that part of the construction of these ships can proceed without any contract for the armor being made. Of course, after the contracts for the construction of ships are made, if there should be more than one, the construction of those ships will be proceeded with; and when Congress meets again in December will be ample time to determine what shall be done with reference to making contracts for the armor, or whether, in case proper contracts for armor can not be made, the bill introduced by the Senator from New Jersey [Mr. SMITH] for the construction of a plant by the Government itself shall be considered. In other words, the whole purpose is to hold this thing in a position where the Government may not be required to go forward if two, three, or four ships shall be authorized, and make contracts at a figure which every member of the committee, so far as I know, who was present at this examination believed to be an exorbitant price for the armor. We may be mistaken. If we are mistaken it can be shown at the proper time, and proper contracts can be made.

The Senator from New Hampshire [Mr. CHANDLER] spoke of the fact that there was an evident combination between the manufacturers of armor plate, not only between those in this country, but between those in this country and European manufacturers. I had noticed in the newspapers some statements as to the contracts which had been made for the armor for the *Kentucky* and the *Kearsarge*, and I was somewhat struck by a fact which indicated to my mind that there was a combination, and I sent to the Navy Department and got a statement as to those two contracts. I ask that the Secretary may read the paper which I send to the desk, as I desire that it shall go into the RECORD. It is a report from the chief of the Bureau of Ordnance to the Secretary of the Navy, which the Secretary of the Navy inclosed to me in a letter from himself.

The PRESIDING OFFICER. The Secretary, without objection, will read as requested.

The Secretary read as follows:

[Memorandum for the honorable Secretary of the Navy.]

WASHINGTON, D. C., *May 26, 1896.*

The Bureau forwards herewith copies of the proposals recently submitted and accepted for armor for the *Kearsarge* and *Kentucky*. The prices are for the armor complete, except the nickel oxide to be supplied by the Department, which will increase the cost of armor by $19.60 per ton.

The Department accepted the lowest bid for each exhibit in all cases, which resulted in awarding to the Carnegie Steel Company 3,007 tons of armor, amounting to $1,660,518.20, an average cost per ton of $552.22, and to the Bethlehem Iron Company 2,653 tons, amounting to $1,462,191.80, an average cost per ton of $551.15.

The difference between the average cost for the two companies is due to the varying rates for Harveyizing thick and thin armor.

W. T. SAMPSON,
Chief of Bureau Ordnance.

Mr. BACON. The point to which I desire especially to call the attention of the Senate is the close correspondence of those two bids. As stated in the public press, one of those bids was for the armor plate for one ship, which had been accepted from the Carnegie Company, and the other was a bid for the armor for the other ship, which had been made by the Bethlehem Company and accepted. I noticed the publication in the press—I do not know whether it is correct or not, but I presume it is—gave fuller information than this memorandum does. It gave the bids. In one case the Carnegie Company bid higher for the armor of one ship than the Bethlehem Company bid for the armor of that ship, and in the other case it was exactly reversed, evidently showing the intention to be that one should get one contract and one the other, and at the same time with such very little difference in the price as that it made no substantial difference in the result to them.

Mr. CHANDLER. Has the Senator any objection to my stating here, in justice to the Secretary of the Navy, that it is not pretended that there was competition? It is admitted that there was not competition. The Secretary admitted it; the companies admitted that they were in combination; and the committee were well aware of the fact that there was no competition. The Secretary of the Navy thought he had done well for the Government under the circumstances in reducing the price of harveyized armor from an average of $600 a ton down to an average of $550. So while what the Senator states may be new to the Senate, it has been openly admitted everywhere else.

Mr. BACON. Mr. President, the Senator from New Hampshire is quite correct. The fact was apparent during the investigation before the committee.

I desire to say, in connection with what the Senator from New Hampshire has said, that I am quite sure the Secretary of the Navy has done everything he could and has accomplished all that could have been accomplished under the circumstances. But here were two battle ships already contracted for, and it was necessary that there should be contracts for the armor. There were but two concerns in this country which could make the armor; they were in combination, and the Secretary of the Navy was absolutely powerless to do more than he did, which was to get a reduction of about $50 per ton as compared with the former price.

I do not desire to go into this in detail. If this were a question as to whether or not we should fix the price, I should do so, because I believe it can be demonstrated, according to the testimony of those gentlemen before the committee, that it is an impossibility that this steel, which was worth only $17 a ton, should, by the processes of manufacture and with the addition thereto of the cost upon the plant and the interest upon it, have been brought to a cost exceeding $600 per ton. They can not specify the items of cost, either of material or of labor, which would bring it to anything in that neighborhood, or even within 50 per cent of it, in my opinion. I may be entirely wrong, but I shall not go into that now, because this amendment does not fix the price. It simply requires the Secretary of the Navy not now to make contracts at these exorbitant prices, but requires that if we can not get contracts within a limit which we think is ample for the profits to which these gentlemen are entitled, then he shall report the fact to Congress, when we shall have ample opportunity to make arrangements by which we can ascertain what is a proper price; and if that can not be done and proper contracts can not be made with them, then the question can be considered and the bill introduced by the Senator from New Jersey for the construction of a plant by the Government itself be considered.

I do not see how any harm can come to anybody by this amendment. It does not prevent a contract being made at a proper time. It simply prevents an improper contract being made now; and there is ample opportunity and will be ample time hereafter to determine whether or not these gentlemen be right or not in saying that this material is worth $600 a ton or $500 a ton, or whether we are right when we say it is an exorbitant price. That is a matter which ought to be determined by Congress before any final action is taken. The whole scope and purpose of the amendment is to prevent action until that information has been had.

Mr. GORMAN. Will the Senator permit me to ask him a question?

Mr. BACON. I yield to the Senator.

Mr. GORMAN. When this amendment was offered by the Senator from Georgia, I think, from the Committee on Naval Affairs, I only heard it read at the desk, and supposed at the time that the amendment provided that no armor or armor plate should be purchased at a rate exceeding $350 per ton of 2,240 pounds, and that it was the intention of the author of the amendment to absolutely prohibit, until the Secretary of the Navy should report to Congress, the payment of a greater price than that being paid for armor.

Mr. BACON. The Senator has the amendment before him, and can doubtless read the exact terms of it.

Mr. GORMAN. I have the amendment, but what I want to get at is whether that is the intention of the amendment. I will read it:

And provided further, That in case the Secretary of the Navy shall make separate contracts for the armor and armor plate for said battle ships, he shall not accept bids at a rate exceeding an average of $350 per ton of 2,240 pounds; and in case the said Secretary can not make contracts for said armor and armor plate within said limit, he shall delay action and report the offers made to the next session of Congress.

The criticism I have to make is that under this phraseology the Secretary of the Navy could contract with Mr. Cramp, or with the yard at Norfolk, or with the yard at San Francisco, for the construction of an entire ship, including the armor, and he would be at liberty to pay any price he saw proper, and the limitation of $350 a ton would only apply if he purchased the armor direct from the manufacturers. Is that the intention of the committee?

Mr. BACON. It is not. I think the criticism of the Senator upon the language is good criticism, and that the amendment ought to go further, and ought to prohibit the Secretary of the Navy making any contract with a party who would contract for the building of an entire ship, including the armor, unless similar estimate was put upon the armor; and I will state——

Mr. CHANDLER. Will the Senator allow me a word on that point?

Mr. BACON. Permit me to finish the sentence.

Mr. CHANDLER. Very well.

Mr. BACON. I will state that I should think it to be the undoubted duty of the Secretary of the Navy, if he were to make a contract with the Cramps or with Mr. Huntington or with anyone else for the construction of an entire ship, including the armor, to observe what is intended there to be a restriction upon him, and he would transcend his duty, or rather he would not be conforming strictly to what I should conceive to be his official duty, if he were to make a contract of that kind and failed to observe that injunction on the part of Congress.

Mr. CHANDLER. Will the Senator now allow me a moment?

Mr. QUAY. I ask the Senator to permit me to say a word.

Mr. BACON. The Senator from New Hampshire asked me to yield to him.

Mr. QUAY. My recollection is that the Secretary of the Navy, in a letter to the chairman of the Committee on Naval Affairs of the House of Representatives, called attention to this very defect in the amendment which has been referred to by the Senator from Maryland [Mr. GORMAN].

Mr. CHANDLER. I am very glad of the statement made by the Senator from Maryland and the Senator from Pennsylvania, because it gives me an opportunity to make an explanation on this point which the Senator from Georgia will recognize as correct.

Mr. BACON. The Senator from New Hampshire will remember that he drew the amendment, although I offered it.

Mr. CHANDLER. The Secretary of the Navy did write to the chairman of the House committee that there was a limitation upon him to $350 a ton if he made a separate contract for the armor, but no limitation if he made a contract for the completed ship for one sum.

The committee in the amendment which they adopted, which was moved by the Senator from Georgia by direction of the committee, adapted themselves as well as they could to the decision of the Secretary of the Navy in the *Kentucky* and *Kearsarge* case. There was brought before the Secretary the question whether he should make a contract for the whole ship for one sum with one person, or whether he should make a contract for the hull of the ship with one person and a separate contract with the armor manufacturers for the armor. After a full discussion of the question, carried on between the Chief of the Bureau of Ordnance, who advocated separate contracts, and the Chief of the Bureau of Construction, who advocated a single contract, the Secretary deliberately decided to make separate contracts for the armor, changing what had been understood to have been his previous decision. So the committee adapted themselves to the Secretary's position as well as they could.

The Secretary wrote the letter to the chairman of the House committee. Thereupon I set myself to see whether the Secretary's views could be met, and I drafted this amendment which I handed to the Senator from Maine in charge of the bill, an added clause suggested by me, as follows:

> And if the Secretary in any case shall decide to make a contract for the completed ship, including armor, and the lowest bid shall exceed a fair estimated price, allowing for the finished armor said average of $350 per ton, he shall accept none of the bids, but shall report the same to Congress on the first day of its next session.

I showed this to the Secretary of the Navy. I asked him if it would be a practicable limitation. He said that it would be, because he said that in giving out the contracts the Department always make their own estimate as to the cost; that they knew the fair value of the hull of the ship, and that by adding to the estimated fair value of the hull of the ship the price of the armor at $350 a ton, they could ascertain the gross amount which would be a fair price for the ship, and could determine whether or not the bid was an exorbitant bid.

So there can be no reasonable objection made to the limitation in the two forms that are now suggested; but the committee did not in the first instance draft this, because they understood it to be the settled policy of the Secretary of the Navy to make separate contracts for armor.

Mr. HALE. And the Senate can put that amendment on the clause in the bill at any time before the bill leaves the Senate.

Mr. CHANDLER. The committee of conference can insert that provision.

Mr. QUAY. Mr. President——

Mr. BACON. If the Senator from Pennsylvania will pardon me, I have just one more sentence to utter and then I will yield the floor to him.

Mr. QUAY. I wish to call attention to another criticism which the Senator will probably deal with before he leaves the floor. The Secretary calls attention to another defect in the amendment. He says:

> It is, perhaps, proper that I should also state that the amendment, as it now reads, is somewhat indefinite in another respect. The Department is forbidden, in the case mentioned, to accept bids for armor and armor plate "at a rate exceeding an average of $350 per ton." Simple steel armor can be manufactured at a very much lower price, say from 35 to 40 per cent lower than the armor which the Government is now procuring. The expense of incorporating nickel in the armor is about $11.20 per ton, exclusive of the cost of nickel oxide, which amounts to about $30 per ton. The expense of face hardening by the Harvey or similar process, or by reforging, averages about $54 per ton.
>
> It is suggested that if the law be passed limiting the price to be paid for armor it might be well to have the law state definitely whether the price mentioned is to include the price to be paid for the armor, finished and complete, according to the requirements of the Government.

That is to say, they can get $350 armor, $250 armor, or $100 armor, but it will not be fit to send a ship into action with.

Mr. BACON. I hold in my hand copies of the bids which were accepted and which were made, the one by the Bethlehem Iron Company and the other by the Carnegie Company. I have also presented to the Senate the report to the Secretary of the Navy by Commander Sampson of the prices at which the contracts have been let. In that report the exact language is used which is used in this amendment, to wit, that they had been let at a certain average. Here are the detailed statements of the different pieces of armor. Of course the general language which was used in the amendment would apply to a condition of affairs exactly similar to that which existed at the time the contract was made for the two battle ships now being built, the *Kentucky* and the *Kearsarge*.

I think, Mr. President, if this amendment should be adopted, the purpose the committee had will be subserved, which was, if the price could not be reduced to this figure, to bring about such an investigation as would put Congress in possession of the facts as to what is a proper price to be paid for the armor.

Now, I have but one more word to say unless some gentleman desires to inquire of me further on the subject. In the progress of the investigation the committee, having this point in view, specially inquired whether it was necessary that the contract for armor for the additional battle ships should be given out prior to the next session of Congress. My recollection is that the general statement was that it would not be necessary to give out the contracts until some time in January or February. So if the matter is delayed, if there are no contracts given out between now and then, it will not delay the construction of the ships, and no hardship that I can see will come to anyone in the matter.

Mr. QUAY. It is fair that these plants, having been established at the instance of the Government, should be kept running, that they should not go to decay, and that the force of skilled laborers there employed should not be scattered. The fact is that they are in such condition that the Carnegie Iron Company can begin the manufacture of this plate at once, as soon as the limitation expires, which under the bill is one hundred and twenty days; and in six months from date the Bethlehem Iron Company can be running.

Mr. SMITH obtained the floor.

Mr. CHANDLER. I should like to say a word on that point. The Navy Department reserve nine months before they are to furnish the drawings of the armor for the *Kentucky* and *Kearsarge*, and then it will take from nine months to a year to furnish that armor. There is not the slightest possibility that within nine months or a year from this time any work will be done upon the armor of either the two or the four ships to be authorized by this bill.

Mr. HAWLEY. Yes; but——

Mr. QUAY. That depends entirely upon the rapidity with which the Navy Department complete the contracts.

The PRESIDING OFFICER. The Chair has recognized the Senator from New Jersey.

Mr. SMITH. I yield to the Senator from Connecticut.

Mr. HAWLEY. I only want to say that every business man knows it is sometimes of immense importance to a large concern like either of these to know that even nine months ahead it is going to have a hundred-thousand-dollar or a five-hundred-thousand-dollar contract.

Mr. BACON. I think it may be very safely assumed that whenever the proper price can be ascertained these parties will not only have a contract, but a contract at a liberal profit. I should favor giving them contracts above all others, and I should favor that they should have a liberal profit which, in general estimation, should exceed ordinary profits, from the fact that they are engaged in this business, in which they can have only the Government as a customer.

Mr. HAWLEY. And, I may add, they went into it at the earnest solicitation of a great mass of patriotic men, who were very much interested in seeing the work of furnishing heavy armor and heavy guns begun. They were encouraged to believe that if they would establish a plant of $2,000,000 or more they should have reasonable contracts that would be a fair return.

Mr. BACON. And I think there is every disposition to give it to them, and to give them the most liberal profit that would be deemed at all reasonable.

Mr. QUAY. I do not think the Senator from Georgia is so far apart from my position on this question. I do not wish the Government to pay exorbitant prices to either of these corporations, neither does the Senator from Georgia. But it does seem to me that before we apply a restrictive provision such as this amendment to the dealings between the Government and a corporation we ought to permit them at least to get out of the concern the money they have actually invested in it. No matter how large the profit is for the time being, the time for restriction and repression is when they are at large and out of the shackles of the Government.

Mr. SMITH. Mr. President, as a member of the Naval Committee I introduced a bill in the Senate providing that the Government should erect its own armor-plate manufactory, and from that has come the measures we are now discussing. My object in presenting the bill for the Government to erect its own armor works arose from the fact that when the Government induced the Bethlehem Iron Works and the Carnegie Iron Company to manufacture armor plate, the understanding, while not specially provided in writing, was that the price then paid to them was practically a subsidy by which the Government paid for their works over and above the actual cost, or even the cost with a fair profit added for their construction. From the figures that we compiled the members of the Naval Committee believe that the Government has carried out its part of the contract and that we have absolutely paid for the money that they have invested in their armor works.

Further proof was furnished by the fact that the Russian Government asked for a contract for armor plate. These same companies who are charging some $600 a ton to the Government of this country, after we had practically supplied the money for the erection of their plants, went abroad and furnished to foreign countries an armor plate, under the evidence we have, which was more costly than ours, at $250 a ton.

I felt that, in justice to our Government and to our people, we should at least make some effort to stop the unwarranted expenditure and the outrageous price that we were paying for this plate. The evidence that we have had furnished us is very conclusive to my mind that the cost of this plate does not exceed $200 per ton, and that when we agree to pay $350 a ton we are very liberal, liberal to such an extent that if we are to build but two ships the profits on the armor plate to these men will amount to between $600,000 and $700,000.

Mr. President, with these facts before us and with the very liberal proposition that we make of $350 a ton (because I do not want to stand on the floor of the Senate and advocate any manufacturer supplying the Government with any material at cost or without a profit), I think that we are liberal far beyond the necessities of the case.

But I recognize another fact, and the evidence is pretty conclusive, which makes me believe that we shall still be obliged to erect an armor-plate concern in this country. I am reliably informed that after the gentlemen here went abroad and broke into the combination on the other side and received a contract for them, they made a combination that not only covers the continent but covers this country, and from the bids we have just received and that have been read by the Senator from Georgia it is evident that the gentlemen here have an understanding and that perhaps it reaches abroad. But no matter whether it does or not, we owe it to ourselves to insist on this amendment as being fair and just and right. If we can not build these ships by the purchase of plate at this price then we will have ample time to order it at the fairest price at which we can obtain it. I hope that the Senate will be prepared and ready, in case these gentlemen propose to ask extortionate prices, to commence the construction of our own armor plate.

Mr. HAWLEY. Mr. President, I remember so well the discussions and the negotiations among these private parties, and investigations conducted by the Government before they began this work, that I can not help feeling very considerable interest in this debate and in these propositions.

There was a great deal of hesitation as to whether it was worth while to undertake to contract with the Government anyhow involving so heavy an investment. A contract with the Government is not an unusual thing in my part of the country for Hotchkiss guns, or Colt's pistols, or a great variety of other guns, and I am familiar with the facts and with the feelings of manufacturers. There are some of them who say they will never make another contract with the Government anyway. One reason is the annoying and small inspection, if you choose to call it so. A spit or blowhole somewhere is made the excuse for throwing away a fine piece of iron. Young men just out of the Academy go there to pass judgment upon the work of men who have been for fifty years engaged in making steel and the other processes that relate to it. The Government, in my judgment, ought to be as fair, honorable, and square with all these men as private parties are among themselves, and not take advantage of its greater power to oppress, and not insist upon unjust and illiberal terms.

When I first saw in the papers that the Bethlehem Works had made a contract with Russia I was aware that it was likely to make them some trouble, They made it at $259 a ton, made it at a loss, as it proved, and no one, I think, acquainted with the subject doubts it; but their object was twofold. One was to break into a foreign market, to get a field for their goods. The other was the common one among manufacturers, to keep good workmen together, reaching over a chasm when there was no work to be done. They then afterwards entered into competition before the Russian Government with English and French makers and got contracts at $259 a ton. That, I understand, is easily susceptible of proof.

Mr. CHANDLER. The Senator wants to understand that transaction just it was. They not only wanted to break into the foreign markets but they wanted to break into the foreign combination, and when the combination was made of foreign and American manufacturers, then they were able to force up the price on the foreign Governments, and that is the reason why the prices went back to $550 a ton. There is no doubt about that.

Mr. HAWLEY. The Senator's idea, then, is that there was a combination of Carnegie and Bethlehem with foreign makers?

Mr. CHANDLER. Undoubtedly.

Mr. HAWLEY. To force up the price?

Mr. CHANDLER. Undoubtedly there was such a combination.

Mr. QUAY. Where is the evidence of it?

Mr. HAWLEY. I do not know whether that has been proved or not. The Senator perhaps believes it, but can he prove it?

Mr. CHANDLER. I said I thought every member of the Naval Committee was convinced that there was. That is the basis upon which we have been arguing this case. So when the Senator says the price went up again to $550 a ton after they had broken into the foreign market, it went up again when they had broken into the combination and made a newer and a larger combination. That is the way we understand it. If any member of the committee understands it differently from myself he will so state.

Mr. HAWLEY. I do not understand it in that way at all. I understand it as I have stated.

Mr. QUAY. Let me ask what convinced the committee?

Mr. HAWLEY. It can not be proved, I think.

Mr. QUAY. Was there evidence of such a combination before the committee or not? I have not examined the report on that point.

Mr. CHANDLER. There was evidence before the committee that the foreign companies had taken nine-tenths of the stock in the Harvey patents. They had obtained that, I think, in connection with the American companies; and we were informed (I do not know whether it is on record or not) that the new contract with a foreign government, at about $500 a ton, which the Bethlehem Company have since received, was a contract given to them or assigned to them as a part of their share of the combine business of the armor trust.

Mr. QUAY. Who was giving this outside information to the committee?

The PRESIDING OFFICER. The question is upon the motion of the Senator from Pennsylvania that the Senate recede from amendment numbered 32, striking out "four battle ships" and inserting "two battle ships."

Mr. QUAY. Of course I make the motion for the purpose of taking the yeas and nays on this question. I ask that the vote be taken by yeas and nays.

The yeas and nays were ordered.

Mr. TILLMAN. Mr. President, as a member of the Naval Committee I have followed the investigations by which we sought to arrive at the facts and the true inwardness of this armor and its cost, and I have some very strong opinions about it. Perhaps I am so constituted that I can not have any other kind of opinions except positive ones. It is doubtless a fact that I sometimes arrive at erroneous conclusions, all of which I am willing to acknowledge.

As I understand the situation, we have a monopoly in the United States created by the Government, paid for by the Government, and yet the men who make this armor plate and who have the monopoly in the business paid for by the Government are robbing the Government to-day unmercifully.

In the first place, we have a law forbidding contracts by the Secretary of the Navy for any vessel which shall use armor not

manufactured in this country. I agree that that is patriotic and right and just. We ought to manufacture everything that we consume in this country. I am protectionist enough to go that far. It may astonish somebody to hear me say so, but I am honestly in favor of this country manufacturing everything that it consumes. But I do say that this Government ought not to be robbed by those whom it protects, and that the benefits to be derived should not go alone to the capital invested, but to the labor as well; that when they have had a reasonable protection and get a reasonable income on the capital and reasonable wages for the skilled labor that is far enough, and when we go further by our laws we just simply provide a means by which a certain class of men who are special favorites of the Government become millionaires at the expense of the taxpayers.

We are face to face with the fact that there are two armor manufactories in the United States—Carnegie and Bethlehem—and that you can not get any armor from any other factory than those two, either in the country or out of the country. The evidence is clear enough, and if anybody disputes it I want somebody to dispute the proposition which I now lay down, and which the Senator from New Jersey [Mr. SMITH] just enunciated, that the Government in making the original contracts with these armor manufacturers paid enough bonus over and above the reasonable price to pay for the factories. Does anybody dispute it?

Mr. HAWLEY. We do not know.

Mr. TILLMAN. You do not know? Well, I will let the former Secretary of the Navy, Mr. Tracy, have a word to say on that point. I ask that the Secretary read the part marked in the testimony given by him before the committee.

The PRESIDING OFFICER. The Secretary will read, without objection.

The Secretary read as follows:

Senator TILLMAN. I was absent for a few minutes, having been called out of the room unavoidably, and you may have touched upon the point; but let me ask on what, in making your contracts with the Carnegies, you based your action as to price?

Ex-Secretary TRACY. You were out, Senator. I said when I came to negotiate with Mr. Carnegie the negotiation began with Mr. Abbott, the manager of their works; and when Mr. Carnegie came into it later I started by insisting that they should reduce the price that was paid to Bethlehem. I thought that was an excessive price, and I wanted them to reduce that price.

Senator TILLMAN. Did they mention as a reason why they could not reduce the price that they would be at a great expense?

Ex-Secretary TRACY. Of course.

Senator TILLMAN. Which would have to be considered in undertaking the contract?

Ex-Secretary TRACY. Yes.

Senator TILLMAN. Did they give you any estimates?

Ex-Secretary TRACY. Oh, yes; verbally. No estimates in detail.

Senator TILLMAN. Can you recall the amount roughly, generally?

Ex-Secretary TRACY. I think it was more than $2,000,000 that they would have to expend.

Senator TILLMAN. That they would have to expend over and above their existing outlay?

Ex-Secretary TRACY. Yes.

Senator TILLMAN. Before they could make the armor?

Ex-Secretary TRACY. Yes. I will not be positive about the precise figure. However, it was a very large sum.

Senator HALE. They had a large plant for other purposes?

Ex-Secretary TRACY. They had a large plant.

Senator TILLMAN. I knew they had a large plant. I am trying to get at what ought to be the present price of armor after the Government has practically paid for these plants in the original contracts. That is the point I want to strike.

Ex-Secretary TRACY. As I stated, Mr. Carnegie said flatly, "I will make no contract unless I can have the same terms that are accorded to Bethlehem, at the same prices and substantially the same quantity of armor. If you will give me that, I will found the plant; if you do not, I will not."

Senator TILLMAN. Did your experts, those who reported to you in regard to the delay in furnishing the armor and complying with the original contract of the Bethlehem Company, ever lead you to suppose that there was any intentional procrastination?

Ex-Secretary TRACY. No; not willful.

Senator TILLMAN. Was it necessary?

Ex-Secretary TRACY. Necessary in one sense. In the founding of that plant Bethlehem sought very largely to make its own tools instead of purchasing them. Then they had made great mistakes with their hammer. No; I am not willing to charge Bethlehem at all with any willful delay. The delay was very great; but I think the Senator was out when I stated that one of the controlling factors which led me to think it desirable to found a second plant was because the experience of the English armor makers is that in their largest establishments they turn out only about 300 tons a month each, and at 300 tons a month two establishments could manufacture armor for only about two battle ships a year the size of the *Indiana*.

Senator TILLMAN. This is merely a question as to your opinion, but let me ask you whether from your intimate knowledge of the matter you have any reason to believe that those two companies are in collusion or that they at that time had an understanding with each other?

Ex-Secretary TRACY. No; not at the time of making the contract, of course. I do not want to pass upon that question. I have no evidence sufficient to justify me in saying that they were in collusion. We were required to advertise for the materials.

Senator TILLMAN. Did any other steel makers make any propositions or come to you?

Ex-Secretary TRACY. There is no one else in the country who has a plant, and so others could not compete.

Senator TILLMAN. None except Carnegie and the Bethlehem Company.

Ex-Secretary TRACY. They are the only two plants in the country that can compete.

Senator TILLMAN. Are we then to-day practically forced to buy from those two or none?

Ex-Secretary TRACY. We are.

Senator HALE. Unless we build a plant of our own?

Senator TILLMAN. Or unless there are others who would go to the expense those firms have gone to?

Ex-Secretary TRACY. Yes, sir; that is it, unless you found another plant.

Senator TILLMAN. I just want to get the idea of a monopoly or of a combine between those companies brought out prominently in the investigation.

Senator CHANDLER. Without reference to a combine, it is admitted that those two companies are the only ones now that can compete?

Senator TILLMAN. I am not speaking of the present time.

Ex-Secretary TRACY. You do not understand me as saying that there is any combine.

Senator TILLMAN. I am trying to bring out the facts that will prove that, however.

Senator HALE. At the time when, under the circumstances you have stated, you made the arrangement which resulted in the establishment of the second plant, was there anything that indicated any collusion or sympathy or correspondence between the Carnegies and the Bethlehem Company, or do you believe now that there was anything of the kind?

Ex-Secretary TRACY. No; there was nothing at the time.

Senator HALE. On the other hand, was it not considered by you that you could create an additional and rival establishment to the Bethlehem Company?

Ex-Secretary TRACY. Yes, sir. I have assumed that if this Government had followed the practice of England and appropriated $100,000,000, or even $75,000,000, to a building scheme, to be expended so much per year during a series of years, the cost of our ships in every respect could have been greatly reduced, because more people would have gone into the business of furnishing the frames of ships, the plates of ships, the decking; more men would have gone into the projectile business; more armor men would have gone into the armor business. We could really have got up an active competition under a guaranty of constant and continuous employment for a series of years. But where you ask a man to found an expensive plant, costing millions of dollars, on a very small contract, with nothing more than a mere probability that something may afterwards follow, of course he is likely to exact a much higher price for that one contract.

Senator HALE. That is true.

Ex-Secretary TRACY. I assume now that if the present Congress should authorize the building of four more battle ships in addition to the two being built, the present Secretary of the Navy could negotiate a contract for armor at considerably less than the present prices.

Mr. TILLMAN. From the statement made by the Secretary of the Navy it is very clear that when he took upon himself the responsibility of founding or attempting to found a new armor plant at Carnegie's, he hoped to get competition. We have seen that the competition is not in existence; that these people are together. We have seen that after the Government has paid an enormous price for the first contracts, aggregating something like twelve or fourteen million dollars, in which was included the cost of the factory or the additional expenditure to which they were put in order to be able to create the armor and make it, they still hold up and say, "You must now pay us just what you originally paid us. We will not reduce it." "Why?" "We have you by the throat. We have your Congress by the throat. We have men in the Senate and in the House who will stand by us. We propose to steal from this country or to take it vi et armis, by votes." That is what they say in plain English.

We will see by the vote here this evening whether the entire Naval Committee, all of us who have examined this question, four of whom have gone up to Bethlehem and seen the process, going from the creation of the Bessemer steel right on through until we came out with the finished armor plate, are to be turned down at the instigation of—I will not say who. That is it. I see that Congress is run by its committees. I have been here long enough to find that out. It seems that here is one committee which is not going to run its Department. While we are put in charge of naval matters, and are supposed to be looking after the interests of the Government and trying to protect it, we are to be overslaughed, and a committee of conference is to legislate us out, so to speak, and let the job, for it is nothing but a job, go through.

I have heard a little something about the way it was done. I am not complaining of the committee of conference, except that the proposition is made here that we shall now recede from the amendment which we passed here, and to allow the armor robbers just simply to put their hands into the pocket of the Government and steal another million or two or three or four or five. The armor for the four battle ships will cost—what is it, I ask the Senator from New Hampshire?

Mr. CHANDLER. About $3,000,000 for each pair.

Mr. TILLMAN. Three million dollars for each pair. That is $6,000,000 which we are proposing to give now by contract.

Mr. BACON. For the four vessels.

Mr. TILLMAN. At our price or their price?

Mr. BACON. The present prices.

Mr. CHANDLER. A million and a half for each battle ship.

Mr. TILLMAN. That is $6,000,000 for the four.

I contend, as a practical man—I do think I have a little common sense about how much it takes even to make steel, although I never saw a steel factory until I went to Bethlehem—and there I agree with the Senator from Georgia [Mr. BACON] that you can not possibly suggest any scheme of figuring which will make the armor cost four or five hundred dollars a ton. It is impossible. They handle great blocks of steel, 20 to 30 feet long, with the same facility and ease that a woman cuts out a dress lying on a table with a pair of scissors.

There is another aspect to this case. I have here a volume

entitled Violation of Armor Contracts—Report and Evidence before the Committee on Naval Affairs of the House for 1894. The report is too long to read, but I will ask that an extract be incorporated in my remarks:

CRIMINALITY.

If the criminality of a wrongful act is to be measured by the deliberation with which it is committed, the magnitude of the evils likely to result from its perpetration, and the want of provocation with which it is done, the frauds which your committee have found are worthy to be called crimes. The servants of the Carnegie Steel Company (whether with or without the knowledge of the company), to increase their gains, deliberately continued for many months to commit acts whose natural and probable consequence would be the sacrifice of the lives of our seamen in time of war, and with them, perhaps, the dearest interests of the nation.

The company were hired to make the best possible armor plate and paid an enormous price for so doing. They were hired to make an armor that would stand the shots of an enemy and upon which the nation might rely in time of need. They were paid between $500 and $700 a ton and thousands of dollars a plate for so doing. Resting under these obligations, the company or its servants have perpetrated manifold frauds, the natural tendency of which was to palm off upon the Government an inferior armor, whose inferiority might perchance appear only in the shock of battle, and with incalculable damage to the country.

No fine or mere money compensation is an adequate atonement for such wrongs. The commission of such frauds is a moral crime of the gravest character. Your committee do not consider it as within their province to draft a criminal statute; but they do feel under obligation to call the attention of the House to the importance of protecting in the future the interests of the Treasury, the lives of our seamen, and the safety of the nation by appropriate legislation, denouncing as crimes all such acts of fraud and deception practiced upon the Government in connection with armor plate and other material of war, and making such acts severely punishable in all persons who commit them or aid and abet their commission.

THE PLATES MUST BE TESTED.

Notwithstanding all the admissions made by the superintendents employed by the Carnegie Company, they claim that all the plates paid for by the Government are up to the specifications of the contracts. They allege that they not only made the best plate that could be made at that time, but that the plates will all surpass the minimum acceptance test required by the Government without regard to the alleged false treatment, plugging of blowholes or manipulation of tensile tests.

Paragraph 92 of the contract of February 28, 1893, states that the obligation is imposed upon the contractor to satisfy the inspector that everything has been done in strict accordance with the terms of the contract. It has been conclusively shown that the inspectors have been satisfied and the armor plates passed by the most notorious frauds. The efforts of the company, and of its superintendents, Cline, Corey, and Schwab, have been to satisfy your committee that the armor is up to the requirements of the contract, notwithstanding the false reports to inspectors, doctoring of specimens, plugging of plates, fraudulent re-treating of test plates, and "jockeying" of the testing machine. The unblushing character of the frauds to which these men have been parties, and the disregard of truth and honesty which they have shown in testifying before your committee, render them unworthy of credence.

And everything bears against their contention. It is not to be supposed that such manifold frauds were continued for so long a time without an important object to be gained. As the individual plates and the groups of plates passed in many cases by fraud, the fair conclusion is that without the frauds they would not have passed.

Two questions remain, however; first, whether, notwithstanding the frauds and the failure to attain the high standard required by the contracts, the armor is not still good steel and fair armor; and second, the extent to which the Government has been damaged by the frauds and irregularities practiced upon it.

The terms of the resolution under which your committee is acting require them to ascertain the amount of damages. It is impossible, however, for them to do this with their present powers. The only way to determine the actual condition and strength of the armor is by subjecting certain plates of the groups passed by fraud to ballistic tests. This your committee has no power to do. For the information of the House, in relation to the question of further continuing this investigation by making such ballistic tests, your committee have ascertained the whereabouts of 59 representative plates, alleged to have been falsely treated. The following table shows their weight, cost, and defects, and the ships upon which they can be found:

List of most important alleged defective plates.

MONTEREY.

Size.	Location.	No.	Weight.	Cost.	Defect.
13 inches	Belt. K. L. starboard.	X8	17.5 tons	$9,138.45	Pipe 4 feet long, page 87.
13 inches	Belt. No. 4, H. G. port.	X13	16.74 tons	8,728.94	Bad holes, page 88.
7.5 inches	After-turret (porthole).	214	6.7 tons	3,929.38	Oil burnt off.
7.5 inches	do	225	9.2 tons	5,414.50	Do.

MONADNOCK.

11.5 inches	Barbette	702		$10,596.15	Changed colors; not heated; test pieces stretched, page 105.
11.5 inches		661		15,507.05	Fake treatment after bending.
11.5 inches		985		10,875.00	Test pieces stretched, page 105.
11.5 inches		669		10,727.00	Tempered, no annealing.
9 inches	Belt	448	No. 10, starboard.	7,643.00	Scrap ends only in furnace tested.
9 inches	do	473	No. 13, port	6,826.86	Heated to cherry for rectification after treatment.
		452	No. 8, port	7,855.00	
		486	No. 12, starboard.	8,010.00	

NEW YORK.

10 inches	Barbette	490		$9,134.00	Test pieces substituted, page 109.
10 inches	do	X56	15.491 tons	9,080.00	Annealing heat, five minutes.
10 inches	do	X57		8,992.00	Not heated for treatment.
10 inches	do	X47		9,108.00	Heated eleven hours to cherry red after tests.
10 inches		248	15.492 tons	9,081.00	In pit from bending; no other heat.
5.5 inches	Turret	2939	5.279 tons	3,094.00	Heated one end thirty minutes; forty-eight hours in pit.
5.5 inches	do	2952	6.399 tons	3,749.00	Do.
4 inches	Side	X18a, X22a, X19b	No. 9, starboard sponson.	2,410.00	Ends only, oil burnt off.

AMPHITRITE.

9 inches	136, belt	410	No. 13, starboard.	$6,890.00	Dipped in oil, burnt off.
9 inches	11 P, belt	397		7,662.00	Do.
9 inches	12 P, belt	420		7,758.00	Dipped in oil, ends changed.
5 inches	Belt	218		1,834.00	Dipped in oil, burnt off.

TERROR.

7 inches	Belt	492	No. 7, starboard.	$8,741.00	Ends only treated.
7 inches	do	705	No. 12, starboard.	8,023.00	Edges only heated.
7 inches	do	678	No. 6, starboard.	7,830.00	Do.

OREGON.

8 inches	Barbette	586		$8,231.00	Tempered O. K.; no annealing.
8 inches	do	583		8,214.00	One end only Bot.; other end blackened.
8 inches	do	587		8,008.00	Irregular treatment.

OLYMPIA.

Size.	Location.	No.	Weight.	Cost.	Defect.
4.5 inches	Barbette	370		$4,830.00	No treatment. Oil burnt off.
4.5 inches	do	400		4,667.00	Do.
4.5 inches	do	403		4,836.00	Do.

Four-inch casemate.

INDIANA.

Plates.	No.	Location.	Cost.	Defect.
Diagonal	222	No. 13, starboard	$2,172.00	Insufficiently heated before annealing.
Do	224	No. 15, port	2,530.00	Do.
Do	226		419.00	Fourth treatment same.
Do	233	No. 14, port	2,540.00	Edges only.
Do	237	No. 12, port	2,162.00	Ten minutes heat, thirty-six hours pit.
Side	240	No. 4, port	3,235.00	Blue heat annealed.
Do	241	No. 4, starboard	3,419.00	Do.

MASSACHUSETTS.

Diagonal	253	No. 13, starboard	$2,157.00	Not oil-tempered.
	324	No. 5, starboard	3,394.00	On fourth and fifth heat top ends only heated.
	332	No. 4, port	3,414.00	
Door	379½	do	720.00	No treatment at all.

OREGON.

The resolution of investigation directs your committee to inquire into the condition and character of all armor plate, bolts, and other appurtenances delivered to the Government by the Carnegie Steel Company and to investigate and inquire as to what amount of inferior or damaged plate, bolts, and other appurtenances had been delivered to the Government by said company, and the amount of compensation which should be paid to the Government in settlement for such damaged or inferior armor plate, bolts, and appurtenances. The committee can go no further into this investigation without knowing the actual ballistic resistance of groups of plates passed by a test of plates that did not really represent these groups. The company has admitted this charge. If the Government is precluded from making these tests at their expense by the settlement made January 18, 1894 (see House Executive Document, Fifty-third Congress, pages 37 and 38), they must be made at the expense of the Government. Believing that a test of these plates should be made, your committee have selected the plates which, in their opinion, ought to be tested. They recommend that the money necessary for such a test be taken from any moneys heretofore appropriated for the increase of the Navy under the head of "Armor and armament." They therefore recommend the adoption of the accompanying joint resolution (H. Res. 226):

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Navy be, and he is hereby, authorized and directed to remove from the ships hereinafter mentioned the armor plates hereinafter mentioned, and subject said armor plates to the same ballistic tests, in every respect, as were given to the plates upon the ballistic tests of which the respective groups of armor plate containing the hereinafter mentioned plates were accepted. The armor plates to be tested, with the ships from which they are to be removed, are as follows, to wit:

From the ship *Monadnock*, the 9-inch belt plate, No. 10, starboard, manufacturing number 448;

From the monitor *Terror*, the 7-inch belt plate, No. 6, starboard, manufacturing number 678;

From the ship *Oregon*, the 8-inch barbette plate, No. 587;

From the ship *Indiana*, the 4-inch casemate diagonal plate, No. 14, port, manufacturing number 233;

From the ship *Massachusetts*, the 4-inch casemate door, No. 379½.

Be it further resolved, That the Secretary of the Navy be, and he is hereby, authorized and directed to remove the 13-inch belt plate KL, starboard, No. X8, from the ship *Monterey*, and ascertain whether said plate contains a pipe-hole 4 feet long; and if such pipe-hole be found, the Secretary of the Navy is hereby further authorized and directed to subject the said plate to a ballistic test identical in every particular with that which was given to the plate upon the test of which the group containing the said plate, X8, was accepted, and that the first shot be placed in that part of the plate containing the pipe-hole.

The Secretary of the Navy is further requested and directed to send to the Congress a full and detailed report of the hereinbefore-directed tests as soon as may be.

The members of the Committee on Naval Affairs of the House of Representatives heretofore engaged in investigating the armor-plate frauds are hereby directed to witness, as far as possible, each of the hereinbefore-mentioned tests; and said tests are to be made at the Indian Head proving ground.

The Secretary of the Navy is authorized and directed to pay from any moneys heretofore appropriated for the increase of the Navy, under the head of armor and armament, such sums as may be necessary for the carrying out of the hereinbefore-directed tests, and for placing on the ships before mentioned other armor plates, in place of the plates removed for the purpose of being tested, as hereinbefore directed.

I will simply read a brief extract from the summing up of the Committee on Naval Affairs of the House of Representatives as to one of the armor-plate factories. Charges were made as to frauds in the manufacture of armor; that they were putting up shoddy, so to speak, if you can have shoddy steel; and the committee of the House formulated charges and sent for the experts and the employees and the bosses of the Carnegie Company, and upon their admitted statements, not denied, admitted in open court, so to speak, before the committee, the report was made. They confessed that they had put off fraudulent armor on the Government. The committee summed up in this way:

If the criminality of a wrongful act is to be measured by the deliberation with which it is committed, the magnitude of the evils likely to result from its perpetration, and the want of provocation with which it is done, the frauds which your committee have found are worthy to be called crimes. The servants of the Carnegie Steel Company (whether with or without the knowledge of the company), to increase their gains, deliberately continued for many months to commit acts whose natural and probable consequence would be the sacrifice of the lives of our seamen in time of war, and with them, perhaps, the dearest interests of the nation.

Then the committee goes on, as will be seen, and sums up, giving a list of 10 or 12 battle ships upon which this fraudulent, spongy, plugged-up armor has been put. The ships are in New York Harbor now, and when the House committee asked to have the armor taken off and tested, so as to determine whether it would stand the ballistic test, the thing died somewhere. I was told by the chairman of the committee of the House this evening that it got here at this end and died. So it died in this body, like this other thing is to die, I suppose. They admit their fraud. Yet they have so much influence with the Senate, so much influence with the Secretary of the Navy and the President, that you can not get the test made as to whether the rotten steel that they have put on those vessels will stand the test which they contracted to have it stand.

Now we are asked to give them $6,000,000 more of contracts under that system. First, it is a monopoly; secondly, that the Government pay for the plant in the first contract. Then we say, "We will let you put your fraudulent armor on us; we will let you charge what you please; we will not reduce the price." The Naval Committee is to be laughed out of court by these—shall I say attorneys? Have we a lobby here? Have we Senators who are interested in seeing these contracts given out? I only ask. I do not know.

There is another aspect to the case which I have heard since I have been in Washington, and that is in reference to the question whether we shall have four or two battle ships. I look for it, and I have been looking for it for two months—that they would settle down on three ships. Why? Because there are three shipyards, and they want another job. Each one would agree to take one ship, and they would fix up a price which would give them a handsome profit. There would be no competition, and the Government would be robbed of several millions more. If we can hold on to two ships there will be at least a struggle between the three shipyards as to which shall have them. One of them will have to go lacking, and the likelihood is that there will be actual and honest competition between them, and the Government will get some benefit from it. I have been told that if we put in four the big Philadelphia yard will take two, and the two little yards—one at San Francisco, and the other at Newport News—will take the other two. There will be no competition in that case, and there will be some more happy millionaires.

However, aside of the question whether or not there is any job in this business and whether the Government is to be robbed right here in broad daylight, while we as Senators sit and submit to it or act as though we were in collusion with somebody, is this question which appeals to me as a practical one. I went to New York last Saturday at the invitation of the zealous chairman of the Committee on Coast Defenses, to see what had been done there to protect our Manhattan gold bugs from their friends in Europe if they should get a notion to come over here and levy tribute. I spent the whole day there. I went down to Sandy Hook, where the outer line of defenses is, and what did I see? Now, pity my ignorance and my innocence. But I went into a mortar battery—16 mortars, in groups of four, down in a hole. The man who aims the mortar has to have an officer upon an eminence, who will tell him what angle to set it as regards compass, what angle to set it as to altitude, so as to try to reach a certain point, and after it has been loaded all of the cannoneers actually have to go around into a hole 50 yards away, while a man touches a button to fire these guns aimed in the dark.

That is the kind of defenses we have there. Our Army engineers say that is the modern method of defending harbors. The fact of the business is that for thirty years the United States and every other Government in the world has been spending millions and hundreds of millions of dollars on theories of war. When they come down to practical tests, as to whether their theories will pan out, I think they will find that people who go to war hereafter will have to go in sight of each other, and men will put guns up to their shoulders and do some shooting like the Confederates and the bluecoats used to do about thirty years ago.

To come back to New York, I saw a battery of five steel guns mounted at Fort Wadsworth, and there are two down at Sandy Hook. Lots of them are lying there in the sand, but there are no carriages. It will take ten or fifteen million dollars, at the lowest calculation, to put New York harbor in a defensive position. You can not protect it otherwise with England having four times the vessels you have, with guns of the caliber and four or five times the strength that you ever expect to get even. Your Navy would be the prey of the overpowering English navy, and they would steam right in and take your vessels unless you fortify some one harbor by coast defenses sufficiently to protect your Navy from the navy of England. That is your condition, and yet you want more big ships, more five and six million dollar ironclads.

We are not going to undertake to compete with England in the matter of a navy. Her vitality, her life, her existence depend upon the preservation of her supremacy on the sea, because she

would starve to death inside of two years if she could be kept from supplies from the outside. We are not in that condition. All we want is navy enough to make our flag respected wherever it may go, and if we want to defend our seacoast, as I think we ought to do; if we want something to take care of the cities which are unprotected, it ought to be by preparing batteries and steel cannon and such other appliances, even though they be mortar batteries, which will aim out of sight and shoot out of sight, and whatever modern science shall dictate as being the best system of defense. Let us spend our money on that; but to go and put out a whole pile of money is entirely wrong.

Here is $25,000,000 to be spent on these four battle ships which we are now discussing. If we are to continue that sort of thing, if we are to continue to pay these exorbitant prices to protected and monopolizing concerns, our Navy will cost twice what it ought to cost, and will be of no account when we get it. So far as defending New York is concerned, you will have to depend upon torpedoes and upon the use of dynamite to keep foreign vessels out, because we could never build vessels enough to prevent the English navy from overpowering our Navy, unless it were in a place where there would be some equality. We have no harbor now to shelter a navy; there is no place where one can hide; there is no place into which one can poke its head for safety. It is a question of practical statesmanship as to whether the Senate will spend more money for more vessels to be unprotected, or whether it will protect some one city, even though it be New York, which I do not think deserves much protection, owing to the way it is stealing from the rest of us. I am willing, however, to protect even New York, and I hope some day to see those fellows loosen their grip on the throat of this country and keep them from robbing us so badly. But it is a question of practical statesmanship as to whether we want to protect and defend our cities or whether we are going to spend the money to create a big navy which will be helpless when we have created it; helpless to protect our coast cities and helpless to protect itself.

Mr. HALE. Mr. President, it is evident that no vote can be taken to-night, as so many Senators have left the Chamber, and I move that when the Senate adjourn it be to meet at 11 o'clock to-morrow morning.

The PRESIDING OFFICER. The question is on the motion of the Senator from Maine.

The motion was agreed to.

Mr. CULLOM. I ask leave to have a little bill taken up, which I have been solicited to have passed.

Mr. BACON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Georgia wish to speak to the question before the Senate?

Mr. BACON. I did not know that there was a question before the Senate.

Mr. CULLOM. I hope the Senator from Georgia will allow me to have the bill to which I refer passed.

Mr. BACON. If the Senator from Illinois wants to proceed to another matter, I wish to state that I am compelled to leave here to-night, and there is a matter as to which I am very anxious to have an executive session. It will occupy but a very few moments, and I wish to move that the Senate proceed to the consideration of executive business.

Mr. HALE. Before departing from the subject-matter before the Senate, I ask unanimous consent that the conference report on the naval appropriation bill be taken up to-morrow, immediately after the routine morning business, that the debate proceed under the five-minute rule, and that the final vote be taken at half past 12, or, I will say, 12 o'clock.

Mr. STEWART and others. Say half past 12 o'clock.

Mr. HALE. I will say half past 12. That will give ample opportunity.

Mr. PASCO. Say not later than half past 12.

Mr. GORMAN. Do I understand that the Senator from Maine asks that this matter may be considered under the five-minute rule?

Mr. HALE. I incorporated that as part of my request in order that the time might not be used too much by one or two Senators, so as to give all Senators an opportunity to participate in the debate.

Mr. GORMAN. I doubt very much whether we can discuss this important question in that time.

Mr. HILL. We have discussed it pretty thoroughly, have we not, so that every Senator understands how to vote? It is time, I think, that the five-minute rule ought to be applied if we are going to get away from here this summer. It is simply a question of whether we are to have two or four battle ships. I think we can easily decide that question.

Mr. HALE. The request will apply to each amendment, and there are several. Each Senator can speak upon each amendment.

The PRESIDING OFFICER. The Chair will state the request of the Senator from Maine, which is that immediately after the routine morning business to-morrow the conference report on the naval appropriation bill shall be taken up and proceeded with under the five-minute rule, and that the final vote shall be taken not later than half past 12 o'clock.

Mr. GORMAN. I have no desire to delay the consideration of this measure, as the Senator from Maine knows perfectly well, but I doubt very much whether we can dispose of this question under the five-minute rule.

Mr. ALLISON. I suggest that the ten-minute rule be substituted.

Mr. HALE. I will accept that suggestion, and ask that the debate shall proceed under the ten-minute rule.

Mr. GORMAN. I have no objection to that.

The PRESIDING OFFICER. Is there objection?

Mr. MORGAN. I object, Mr. President.

Mr. HALE. I will name the hour of 1 o'clock instead of half past 12. That substantially gives two hours, and I think everybody will concur in that proposition.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Maine?

Mr. MORGAN. I object to it.

The PRESIDING OFFICER. There is objection.

LICENSING OF BILLIARD AND POOL TABLES.

Mr. CULLOM. Mr. President——

Mr. HARRIS. Will the Senator from Illinois permit me a moment that I may ask to have laid before the Senate a conference report, which has come over from the House of Representatives, on House bill 5490? It will take but half a minute to dispose of it.

Mr. CULLOM. I yield for a conference report.

The PRESIDING OFFICER. The Chair lays before the Senate the conference report referred to by the Senator from Tennessee [Mr. HARRIS], which will be read.

The Secretary read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 5490) to license billiard and pool tables in the District of Columbia, and for other purposes, having met, after full and free conference have been unable to agree.

ISHAM G. HARRIS,
GEORGE PEABODY WETMORE,
Managers on the part of the Senate.

JOSEPH W. BABCOCK,
JAMES H. HULING,
ALFRED MILNES,
Managers on the part of the House.

Mr. HARRIS. I move that the Senate further insist upon its amendments, and agree to the further conference asked for by the House of Representatives.

The motion was agreed to.

By unanimous consent, the Presiding Officer was authorized to appoint the conferees on the part of the Senate; and Mr. HARRIS, Mr. WETMORE, and Mr. PROCTOR were appointed.

DONATION OF CONDEMNED CANNON.

Mr. MORGAN. Mr. President——

Mr. CULLOM. I have the floor, I believe. I ask unanimous consent to call up House bill 7171, which is a small bill donating condemned cannon.

Mr. MORGAN. I appeal to the Senator to yield to me for a moment until I can get a matter printed. That is all I desire.

Mr. CULLOM. I hope the Senator will wait a minute until I can get the bill to which I have referred out of the way.

The PRESIDING OFFICER. The Senator from Illinois asks unanimous consent for the present consideration of a bill, the title of which will be stated.

The SECRETARY. A bill (H. R. 7171) authorizing and directing the Secretary of the Navy to donate 4 condemned cannon and 4 pyramids of condemned cannon balls to James T. Shields Post, No. 45, Grand Army of the Republic, of Galesburg, Knox County, Ill., and for other purposes.

Mr. CULLOM. I hope that bill may now be considered and passed.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

EXECUTIVE COMMUNICATION.

The PRESIDING OFFICER laid before the Senate a communication from the Attorney-General, in response to a resolution of the 2d instant, relative to judgments rendered in favor of claimants in Indian depredation cases by the Court of Clalms, transmitting the judgment rendered in the claim of T. R. and T. P. Gossett; which was ordered to lie on the table and be printed.

REPORTS OF COMMITTEES.

Mr. HAWLEY. I have an item of morning business which I should like to get off my hands. I desire to present two favorable reports from the Committee on Naval Affairs.

The PRESIDING OFFICER. The reports will be received at this time, if there be no objection.

Mr. HAWLEY, from the Committee on Military Affairs, to whom was referred the bill (S. 2355) to correct the military record of Peter Buckley, reported it with an amendment, and submitted a report thereon.

He also, from the same committee, to whom was referred the bill (S. 3206) to grant a right of way through the new Fort Bliss Military Reservation to the El Paso and Northeastern Railroad Company, reported it without amendment, and submitted a report thereon.

Mr. CHILTON. I should be glad if the Senate would give me permission to have considered at this time Senate bill 3206, to grant a right of way through the Fort Bliss Military Reservation, which has just been reported by the Senator from Connecticut [Mr. HAWLEY].

Mr. MORGAN. I can not consent to that. I have been on the floor for half an hour, and the Chair has once recognized me.

The PRESIDING OFFICER. Objection is made to the present consideration of the bill referred to by the Senator from Texas [Mr. CHILTON].

Mr. PRITCHARD, from the Committee on Pensions, to whom was referred the bill (H. R. 3755) to increase the pension of Mary C. Thompson, reported it without amendment, and submitted a report thereon.

Mr. PERKINS, from the Committee on Naval Affairs, to whom was referred the bill (S. 3150) authorizing the President to appoint Lieut. Robert Platt, United States Navy, to the rank of commander, reported it without amendment, and submitted a report thereon.

Mr. PERKINS. I am instructed by the Committee on Education and Labor, to whom was referred the bill (H. R. 9188) authorizing the appointment of a nonpartisan commission to collate information and to consider and recommend legislation to meet the problems presented by labor, agriculture, and capital, to report it favorably, and without amendment.

I ask that the bill which I have just reported may be substituted for Order of Business 628, being Senate bill 293, on the same subject.

The PRESIDING OFFICER. The bill reported by the Senator from California will be substituted on the Calendar for Senate bill 293, which will be indefinitely postponed, if there be no objection.

CAPTURE OF THE COMPETITOR.

Mr. MORGAN. I offer the resolution which I send to the desk, and ask that it be printed and laid on the table.

Mr. HALE. It has been already read.

Mr. MORGAN. Yes; it has been read.

The PRESIDING OFFICER. The resolution will be printed and laid on the table, in the absence of objection.

ENROLLED BILLS SIGNED.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the Speaker of the House had signed the following enrolled bills:

A bill (S. 1342) granting a pension to Lena D. Smith;

A bill (H. R. 3582) to remove the charge of desertion now standing against Henry H. Bailey;

A bill (H. R. 5946) granting an increase of pension to Abraham H. Parker;

A bill (H. R. 6221) granting an increase of pension to Mary E. Chamberlin;

A bill (H. R. 6994) relating to the sale of gas in the District of Columbia; and

A bill (H. R. 8109) making appropriations for fortifications and other works of defense, for the armament thereof, for the procurement of heavy ordnance for trial and service, and for other purposes.

NAVAL APPROPRIATION BILL.

Mr. HALE. I rise to the order of business. I renew the proposition I made with reference to disposing of the conference report on the naval appropriation bill, that the report be taken up on the termination of the routine morning business to-morrow, and that the debate be continued under the five-minute rule.

Several SENATORS. Say ten minutes.

Mr. HALE. Well, I will say ten minutes to each Senator upon the general proposition, and that the final vote be taken not later than 1 o'clock.

Mr. ALDRICH. I hope the Senator will make it half past 12 o'clock. It seems to me, if we are expecting to adjourn this Congress at any time within a reasonable period, we should dispose of some of these pending matters.

Mr. HALE. If we do not get an agreement for 1 o'clock, we are likely to run to 3 o'clock. I think there will be abundant time for debate if we agree that the final vote shall be taken at 1 o'clock.

Mr. GORMAN. I think there should be an opportunity for full debate upon the proposition.

Mr. HALE. I have named 1 o'clock as the time for taking the vote.

Mr. GORMAN. I suppose we may be able to get through by 1 o'clock.

The PRESIDING OFFICER. The Chair will state the proposition of the Senator from Maine, which is, that the conference report on the naval appropriation bill be taken up immediately after the routine business to-morrow morning, that debate shall proceed under the five-minute rule, and that the vote be taken on the conference report not later than 1 o'clock. Is there objection?

Mr. ALLISON. And all questions connected with it.

Mr. NELSON. I object to it, because the filled-cheese bill is the unfinished business, and that should come up to-morrow and be disposed of.

Mr. HALE. The filled-cheese bill does not come up until 1 o'clock, and my proposition is to vote at 1 o'clock.

Mr. NELSON. The voting may take some time.

Mr. HALE. It will not take five minutes.

Mr. NELSON. It is most important that the filled-cheese bill should be disposed of, and I hope that nothing will be allowed to interfere with it.

The PRESIDING OFFICER. Does the Chair understand the Senator from Minnesota to object to the agreement suggested by the Senator from Maine?

Mr. HALE. The Senator withdraws his objection.

The PRESIDING OFFICER. The objection is withdrawn. The Chair hears no further objection, and the request of the Senator from Maine [Mr. HALE] is agreed to.

STRATTON H. BENSCOTER.

Mr. GEAR. I ask unanimous consent for the present consideration of the bill (S. 3771) for the relief of Stratton H. Benscoter.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Military Affairs with an amendment, in line 4, after the words "directed to," to strike out "set aside and annul the sentence of court-martial against Stratton H. Benscoter, of Company I, Ninth Iowa Cavalry Volunteers," and insert "revoke the order approving the proceedings, findings, and sentence of the general court-martial at Fort Smith, Ark., dishonorably discharging Stratton H. Benscoter, late private in Company I, Ninth Regiment Iowa Cavalry, from the service, with loss of pay and confinement in the penitentiary"; so as to make the bill read:

Be it enacted, etc., That the Secretary of War is hereby empowered and directed to revoke the order approving the proceedings, findings, and sentence of the general court-martial at Fort Smith, Ark., dishonorably discharging Stratton H. Benscoter, late private in Company I, Ninth Regiment Iowa Cavalry, from the service with loss of pay and confinement in the penitentiary, and to grant him an honorable discharge from the said service, said discharge to date December 5, 1865.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time, and passed.

DELIVERY OF IMPORTED PARCELS AND PACKAGES.

Mr. ALDRICH. I ask unanimous consent for the present consideration of the bill (H. R. 6259) to expedite the delivery of imported parcels and packages not exceeding $500 in value.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Rhode Island for the consideration of the bill named by him?

Mr. TELLER. I object to the consideration of that bill.

The PRESIDING OFFICER. Objection is made to the consideration of the bill.

DONATION OF CONDEMNED CANNON.

Mr. WARREN. I ask the Senate to take up the bill (S. 3216) donating condemned cannon and condemned cannon balls to the Wyoming State Soldiers' Home, at Cheyenne, Wyo.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CHARLES D. HANSCOM.

Mr. GALLINGER. I ask unanimous consent for the present consideration of the bill (S. 3218) granting an increase of pension to Charles D. Hanscom.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to place on the pension roll the name of Charles D. Hanscom, late of Company I, Second Regiment Massachusetts Infantry Volunteers, and to pay him a pension at the rate of $50 per month in lieu of the pension he is now receiving.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

ORDER OF PROCEEDING.

Mr. CHANDLER. Mr. President——

The PRESIDING OFFICER. The Senator from California [Mr. PERKINS] is recognized.

Mr. CHANDLER. If there is a list I wish to have my name placed on it.

Mr. CHILTON. I ask unanimous consent to call up the bill reported a few moments ago from the Committee on Military Affairs.

Mr. TELLER. Mr. President, I am not going to interfere with the present arrangement, but I want to protest against a system which has grown up that does not belong here, and is not necessary in this body. It is, I think, against the sentiment of the great majority of the Senate that the Presiding Officer shall make a list of Senators who are to be recognized and shall decline to recognize those who rise and address him first. If that is repeated I shall take the liberty myself simply to object, and there shall be no unanimous consent.

Mr. CHILTON. So far as I am concerned——

Mr. TELLER. Wait a minute; I am not going to object now.

Mr. CHILTON. I want to yield my place to the Senator from Colorado, because I recognize——

Mr. TELLER. There is no measure that I want to call up. I am protesting against this practice in the interest of the Senate and the decent way of doing business.

Mr. CHANDLER. How would the Senator from Colorado have the business done?

Mr. TELLER. I would have it done just as it has been done at all times here, by Senators rising and getting the eye of the Chair.

Mr. CHANDLER. Does not the Senator see that that gives Senators who sit right in front of the desk, or take a position boldly in the center aisle, as the Senator from Colorado has done, an advantage over Senators who sit away off to the right or left?

Mr. TELLER. There has been no complaint of it in the twenty years that I have been acquainted with the Senate.

Mr. CHANDLER. There has always been a list.

Mr. TELLER. No; there never has been a list.

Mr. HAWLEY. Oh, yes.

Mr. TELLER. I will not say never. A few years ago an effort was made, but it was broken up. I understood yesterday when the bond question was before the Senate that certain Senators had to go and get their names put on a list. Senators who had been here twenty years and more were compelled to go up and put their names down on the list or the Chair ignored them. I did not put my name on the list yesterday. I declined to do it. I should decline to do it. I do not want to interfere with anything that has been done to-day, and I do not object to it. I want to enter my protest against this system, no matter who is in the chair or no matter who does it. Having said this, I shall not interfere further with the Senator from Texas.

Mr. HAWLEY. May I make a suggestion that might help out of the difficulty? It is to call the roll alphabetically.

Mr. TELLER. That would do very well.

The PRESIDING OFFICER. The Chair would like to have an opportunity to make a suggestion. The Senator from Colorado is quite right, and the Chair would not have indulged in the practice at this time if it had not become apparently the settled practice of the Senate.

Mr. TELLER. I should like to say that I did not know that it was a settled practice. I remember when Mr. Ingalls was Presiding Officer it was attempted, and an objection was made then just as it is made now, and he declared, as the Chair has now declared, that it ought not to be done, and it was abandoned. I did not know until yesterday that it had ever been repeated.

Mr. ALDRICH. Mr. President——

The PRESIDING OFFICER. The Chair recognizes the Senator from Texas [Mr. CHILTON].

Mr. CHILTON. I ask unanimous consent to call up a bill just reported from the Committee on Military Affairs to grant a right of way through a military reservation to a railroad company.

Mr. ALDRICH. I move that the Senate adjourn.

Mr. BACON. I hope the Senator will not insist upon that motion.

The PRESIDING OFFICER. The Senator from Rhode Island moves——

Mr. BRICE. I do not often ask the indulgence of the Senate, but those of us who are here for the purpose of attending to the business of our constituents ought not to be cut off simply because we are not importunate in our demands for place. I will withdraw my request to be heard to-night if the Senator from Rhode Island moves to adjourn, but I feel that it is not the proper thing to do.

The PRESIDING OFFICER. Does the Senator from Rhode Island insist on his motion to adjourn?

Mr. ALDRICH. I am willing to yield for a motion to go into executive session.

Mr. BACON. I will thank the Senator if he will allow——

Mr. CHILTON. I hope the Senator from Rhode Island will not insist upon his motion, as I had already been recognized to call up a bill.

Mr. BACON. Two or three Senators here want to get some bills through to-night, if possible.

Mr. ALDRICH. It seems possible for two or three Senators to get bills through, but not anyone else.

The PRESIDING OFFICER. The motion to adjourn is not debatable.

Mr. QUAY. If the Senator from Rhode Island will yield for a motion to proceed to the consideration of executive business I will make that motion. There is some executive business that ought to be disposed of.

Mr. HARRIS. I hope the Senator from Texas will not be taken off the floor in this way. I appeal to the Senators to withdraw their motions for the present. The Senator from Texas has made his request for the consideration of a bill.

Mr. HAWLEY. The Senator from Texas got the floor and made his request. I hope he will be given a minute.

Mr. HARRIS. I hope he will be heard.

Mr. QUAY. So far as I am concerned I do not desire to take the Senator from Texas off the floor, but the Senator from Rhode Island having declined to yield for any purpose except a motion to proceed to the consideration of executive business, I shall make that motion.

Mr. ALDRICH. I have no objection to withdrawing the motion to adjourn for the purpose of having a motion made to go into executive session. If that motion is not made, I insist on my motion to adjourn.

Mr. QUAY. If the Senator from Rhode Island is going to insist upon his motion, I insist upon my motion to go into executive session.

The PRESIDING OFFICER. That motion is in order. The question is on the motion of the Senator from Pennsylvania to proceed to the consideration of executive business. [Putting the question.] The noes seem to have it. The noes have it.

Mr. ALDRICH. I beg pardon. What is the decision?

The PRESIDING OFFICER. The motion is not agreed to. The Chair recognizes the Senator from Texas.

Mr. ALDRICH. I ask for a division on the motion to proceed to the consideration of executive business.

The question being put, there were on a division—ayes 1, noes 18; no quorum voting.

Mr. MITCHELL of Oregon. I move that the Senate adjourn.

Mr. BACON. I hope the Senator from Oregon will permit me to call up a bill. I am compelled to leave to-night and I have a little matter in charge that I am extremely anxious to have disposed of.

Mr. MITCHELL of Oregon. I yield to the Senator from Georgia.

The PRESIDING OFFICER. The Senator from Oregon moves that the Senate do now adjourn.

Mr. MITCHELL of Oregon. I yield to the Senator from Georgia, as he states that he is about to go away.

The PRESIDING OFFICER. The Senator from Oregon can not yield. There being no quorum, no motion is in order except a motion to adjourn or to send for absentees.

Mr. HARRIS. A call of the Senate would be in order.

Mr. HAWLEY. A call of the Senate is in order; but I would not call the Senate. Let us adjourn.

The PRESIDING OFFICER. The question is on the motion of the Senator from Oregon that the Senate adjourn.

The motion was not agreed to.

The PRESIDING OFFICER. There being no quorum, the Secretary will call the roll of the Senate.

The Secretary called the roll, and the following Senators answered to their names:

Aldrich,	Carter,	Hill,	Shoup,
Bacon,	Chandler,	Mitchell, Oreg.	Smith,
Bate,	Chilton,	Nelson,	Squire,
Berry,	Dubois,	Pasco,	Stewart,
Brice,	Gallinger,	Perkins,	Teller,
Brown,	Hansbrough,	Pettigrew,	Tillman,
Butler,	Harris,	Platt,	Turpie,
Cannon,	Hawley,	Quay,	Warren.

The PRESIDING OFFICER. Thirty-two Senators have answered to their names.

Mr. QUAY. I move that the Senate adjourn.

The motion was agreed to; and (at 6 o'clock and 13 minutes p. m.) the Senate adjourned until to-morrow, Thursday, June 4, 1896, at 11 o'clock a. m.

HOUSE OF REPRESENTATIVES.

WEDNESDAY, *June 3, 1896.*

The House met at 11 o'clock a. m. Prayer by the Chaplain, Rev. HENRY N. COUDEN.

Mr. KEM. Mr. Speaker, I make the point of no quorum.

The SPEAKER (at 11 o'clock and 16 minutes a. m., having counted the House). A quorum being present, the Journal will be read.

The Journal was read and approved.

PERSONAL EXPLANATION.

Mr. CURTIS of Iowa. Mr. Speaker, I was informed by a prominent member of the River and Harbor Committee that the river and harbor bill would in all probability be debated and a vote thereon would not be reached in all likelihood before 4 o'clock in the afternoon. Having important business matters to which I desired to give some attention, I was detained from the House until after that vote was taken. I desire to state that had I been present I would upon that bill have voted aye.

Mr. DOCKERY. I am glad the gentleman had an opportunity to say that much. [Laughter.]

PRINT OF VETO MESSAGE AND REPORT ON RIVER AND HARBOR BILL.

Mr. CHICKERING. Mr. Speaker, I am directed by the Committee on Printing to submit the following report:

The Clerk read as follows:

Your committee having had under consideration the resolution (No. 401) providing for the printing of 10,000 copies of the message of the President and the report of the committee on the river and harbor bill recommend that the same be passed.

The SPEAKER. The Clerk will read the resolution.

The resolution was read, as follows:

Resolved, That there be printed for the use of the members of the House 10,000 copies of the message of the President and the report of the committee on the river and harbor bill.

The resolution was agreed to.

On motion of Mr. CHICKERING, a motion to reconsider the last vote was laid on the table.

LEAVES OF ABSENCE.

Mr. DINGLEY. Mr. Speaker, I desire to give notice to the House that I shall be compelled hereafter to object to all leaves of absence of members, except on account of personal sickness or sickness in family, so important is the necessity of the presence of a quorum at this stage of the session.

FORTIFICATION APPROPRIATION BILL.

Mr. HAINER of Nebraska. Mr. Speaker, I believe the first business in order before the House is the consideration of the conference report, which was presented on yesterday afternoon, on the fortification appropriation bill.

The SPEAKER. The first motion is on the adoption of the conference report, which was pending when the House adjourned.

The question was taken; and the conference report was agreed to.

On motion of Mr. HAINER of Nebraska, a motion to reconsider the last vote was laid on the table.

CONTESTED-ELECTION CASE—MURRAY VS. ELLIOTT.

Mr. OVERSTREET. Mr. Speaker, I call up for present consideration the contested election of Murray against Elliott, and ask the reading of the resolutions submitted by the committee.

The Clerk read as follows:

Resolved, That William Elliott was not elected and is not entitled to a seat in the Fifty-fourth Congress from the First Congressional district of South Carolina.

Resolved, That George W. Murray was elected and is entitled to a seat in the Fifty-fourth Congress from the First Congressional district of South Carolina.

RECIPROCITY AND COMMERCIAL TREATIES.

Mr. RICHARDSON. Mr. Speaker, I ask the gentleman if he will not yield to me for a moment to report a resolution from the Committee on Printing, authorizing the printing of certain statistics which the Committee on Ways and Means desire? It will take but a minute or two.

Mr. OVERSTREET. I yield.

Mr. RICHARDSON. This is a concurrent resolution, and if not passed now it will be too late at this session.

The Clerk read as follows:

Resolved by the House of Representatives (the Senate concurring), That there be printed 10,000 copies each of the majority and minority reports of the Committee on Ways and Means concerning reciprocity and commercial treaties, and also 10,000 copies of the hearings before the subcommittee of said Committee on Ways and Means on reciprocity and commercial treaties.

Three thousand copies of said reports and hearings for the use of the Senate and 7,000 copies for the use of the House of Representatives.

Mr. RICHARDSON. I ask that the report of the committee accompanying the resolution be read.

The report (by Mr. RICHARDSON) is as follows:

Your committee having had under consideration concurrent resolution 53 (by Mr. HOPKINS), providing for the printing of 10,000 copies each of the majority and minority reports of the Committee on Ways and Means concerning reciprocity and commercial treaties, and also 10,000 copies of the hearings before the subcommittee of said Committee on Ways and Means on reciprocity and commercial treaties, recommend that the same do pass.

Three thousand copies of said reports and hearings are for the use of the Senate and 7,000 copies for the use of the House of Representatives.

The Public Printer estimates the cost of printing the same at $2,410.

The resolution was agreed to.

On motion of Mr. RICHARDSON, a motion to reconsider the last vote was laid on the table.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had passed the bill (S. 1341) to prohibit the further issuance of interest-bearing bonds without the consent of Congress; in which the concurrence of the House was requested.

SENATE BILL REFERRED.

Under clause 2 of Rule XXIV, the following Senate bill was taken from the Speaker's table and referred by the Speaker as follows:

A bill (S. 1341) to prohibit the further issuance of interest-bearing bonds without the consent of Congress—to the Committee on Ways and Means.

DEFICIENCY APPROPRIATION BILL.

Mr. CANNON. Mr. Speaker, I submit a privileged report from the committee of conference on the deficiency appropriation bill.

The Clerk proceeded to read the report.

Mr. CANNON. I ask that the statement of the conferees be read, which fully sets forth the action of the conference.

The statement was read, as follows:

The managers on the part of the House of the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 8293) making appropriations to supply deficiencies on account of the fiscal year 1896 and prior years submit the following written statement in explanation of the agreements reached by the conference committee and submitted in the accompanying conference report, namely:

The Senate by its amendments added to the bill $6,266,456.10. Of this sum $1,761,996.66 was carried in the amendment numbered 233, which was agreed to by a vote of the House. Of the remaining sum added by the Senate amendments the conference committee recommend that the House agree to $3,536,998.30, the same being to supply deficiencies in appropriations for the support of the different branches of the Government which have been ascertained and certified to Congress since the passage of the bill by the House, including judgments of the United States courts and the Court of Claims, the conference committee agreeing to recommend that the Senate recede from amendments involving $22,073.58.

The conference committee have been unable to agree upon the following amendments, namely:

On No. 14, increasing the amount for collecting the revenue from customs from $850,000 to $1,150,000;

On No. 24, to pay claim of B. B. Bouldin, $205.15;

On No. 25, to pay claim of W. L. Hall, $178;

On No. 27, appropriating $162,300 to pay for injuries on account of the Ford's Theater disaster;

On No. 30, to pay claim of W. H. Crook, $4,000;

On No. 31, to pay claim of Calvin Gunn, $700;

On No. 37, to pay claim of Stout, Hall & Bangs, $31,802.52;

On No. 74, to pay claim of Emmart, Dunbar & Co., $14,548.22;

On No. 79, to pay certain claims for barracks and quarters, $38,512;

On No. 80, to pay claim of George Baber, $1,092.50;

On No. 81, to pay claims certified in Senate Miscellaneous Document No. 57, last Congress, $8,000;

On No. 82, to pay claims in Senate Executive Document No. 33, last Congress, $19,000;

On No. 83, to pay claims in Senate Executive Document No. 98, last Congress, $35,791.67, and to pay claims in House Miscellaneous Document No. 56, last Congress, $37,313.54;

On No. 103, to pay claim of Richmond Locomotive and Machine Works, $69,558.39;

On No. 104, to pay claim of Portland Company, $80,867.46;

On No. 105, to pay claim of William S. Grant, $77,989.38;

On No. 106, to pay claim of Nancy E. Day, $3,041.66;

On No. 122, regulating the payment of interest due the Sisseton and Wahpeton Indians;

On No. 137, authorizing credit in accounts of William M. Masi, late postmaster at Cheyenne, Wyo., of $2,624.14;

On No. 147, to pay claim of Winslow Warren, $500;

On No. 148, to pay claim of R. D. Benedict, $500;

On No. 190, to pay Francis M. Cox, a Senate employee, $300;

On No. 192, to pay Benjamin Durfee, a Senate employee, $2,500;

On No. 200, authorizing payment of one month's salary to discharged employees of the Senate and House; and

On Nos. 207 and 208, appropriating $54,698.95 on account of expenses in contested election cases in the House of Representatives.

J. G. CANNON,
S. A. NORTHWAY,
JOSEPH D. SAYERS,
Managers on the part of the House.

The conference report was agreed to.

On motion of Mr. CANNON, a motion to reconsider the last vote was laid on the table.

Mr. SAYERS. Mr. Speaker, I ask the gentleman from Illinois [Mr. CANNON] to have read at the Clerk's desk or inserted in the RECORD the communication received from the Acting Secretary of the Treasury respecting the item of $1,500,000 for services of the Southern Pacific Company.

Mr. CANNON. I forward to the desk, to have printed in the RECORD, a letter from Mr. C. S. Hamlin, Acting Secretary of the Treasury.

Mr. SAYERS. Let it be read.

Mr. CANNON. All right.

The Clerk read as follows:

JUNE 1, 1896.

The item in the general deficiency appropriation bill of $1,542,979.44 is to pay for services of the Southern Pacific Company over nonbond-aided lines. None of this amount is for services over Central Pacific nonbond-aided lines, and the whole of said amount is entirely distinct from and in addition to the $2,409,818.20 incorporated in the Pacific Railroad funding bill, as reported to both Houses this session, which latter amount stands credited on the books of the Treasury Department and is due from the Government to the Central Pacific Railroad Company for nonbond-aided service.

C. S. HAMLIN, *Acting Secretary.*

Hon. J. G. CANNON,
Chairman Committee on Appropriations,
House of Representatives.

Mr. CANNON. Mr. Speaker, I desire to move that the House concur in Senate amendments numbered 207 and 208, with two amendments, and as one of the amendments merely affects the total, I ask that they be considered together. I will explain them after they are read.

The Clerk read as follows:

That the House recede from its disagreement to the amendment of the Senate numbered 207, and agree to the same with an amendment as follows: After the last line of said amendment insert the following: "George Denny, jr., $2,000; Henry C. Miner, $2,000."

Mr. CANNON. I ask the Clerk to read the next amendment.

The Clerk read as follows:

That the House recede from its disagreement to the amendment of the Senate numbered 208, and agree to the same with an amendment as follows: In lieu of the sum proposed, insert "$108,861.82."

Mr. CANNON. The effect of these amendments, if adopted by the House, will be to provide for two election contestees, certified by the Election Committees, $2,000 to each. That is the only way it can be done. The last amendment merely corrects the total.

Mr. McMILLIN. They are contests for this year, are they?

Mr. CANNON. Oh, yes.

Mr. GROSVENOR. I want to ask the gentleman if these allowances for the expenses of contests are based upon actual expenditures, or whether they are a sort of bounty that is paid, regardless of any expenditure? I ask that in the light of the fact that I think in one of these contests just mentioned, the case of Mr. MINER, there was no testimony, or practically no testimony, taken. There was no question in the case; there was nothing in the case to justify a moment's consideration. It was never heard of in the House here, except on a report of the committee. I want to protest against paying a bounty to men who see fit, as in that case, to get up a contest which has not a thing in it, when everybody knows there is not a thing in it, coming in here to get $4,000 or $2,000 on a side.

Mr. CANNON. In reply to the gentleman, I have to say that I know nothing, from any investigation that I have made, of any of the allowances to twenty or thirty contestants and contestees contained in this Senate amendment, or in these two amendments. I do know that the law limits the allowances to $2,000.

Mr. GROSVENOR. That is the maximum.

Mr. CANNON. That is the maximum. I do know further that Election Committees Nos. 1, 2, and 3, respectively, in pursuance of law, have certified to the Committee on Appropriations these various allowances, and I may say that in many of the cases they have certified three, four, five, and six thousand dollars; and that the Committee on Appropriations, in making these recommendations, have had regard to the law, and have in no case exceeded $2,000. Therefore I leave my friend from Ohio [Mr. GROSVENOR] with his protest to quarrel it out with the proper Elections Committee that forwards this certificate.

Mr. HENDERSON. And the law itself.

Mr. SAYERS. If the gentleman will yield for a moment, I will state to my friend from Ohio [Mr. GROSVENOR] that if I understand the law aright under which these claims are paid the Committee on Appropriations have no jurisdiction to inquire into them.

Mr. GROSVENOR. That is what I supposed.

Mr. SAYERS. The inquiry is made the duty of the Committee on Elections. They certify these claims to the Committee on Appropriations. The amount is recommended by them. The Committee on Appropriations have reserved this right, and have exercised this right, that in no instance would they recommend for appropriation an amount exceeding $2,000, which is the maximum limit allowed by law.

Mr. CANNON. I yield to the gentleman from Massachusetts, the chairman of Committee on Elections No. 3.

Mr. McCALL of Massachusetts. Mr. Speaker, I simply desire to say, in regard to the question of the gentleman from Ohio, that the Committee on Elections with which I am connected have not granted or have not recommended any larger sum in any case than they thought the party was entitled to. In some cases we have only recommended $350; in one case, I think, as low as $175; and in no case have we recommended more than $2,000, although we had no question whatever that in some cases justice and equity would have required that the parties be allowed more than $2,000. I think all the committees have followed the rule of allowing only fair and reasonable expenses; certainly the Committee on Elections No. 3 has.

Mr. GROSVENOR. If the gentleman will allow me, I had no doubt but that the committee was governed by what it thought to be just and right; but I was asking if the allowance to each party in the case of Campbell *vs.* Miner was too much. I would like to be undeceived if I am in error concerning it; but there are a great many members of this House who thought that there was no evidence of a struggle in that case.

Mr. CANNON. I will say to the gentleman that the law requires the Committee on Elections to have vouchers, to pass upon the claims sworn to, and that they are fully considered and sent by that committee to the Committee on Appropriations. Now, whether that committee has performed its duty or not I do not know, but the certificate came to the Committee on Appropriations, and upon that certificate we make the amendment.

Mr. McCALL of Massachusetts. That was not before my committee.

Mr. TAYLER. Will the gentleman allow me to make a statement?

Mr. CANNON. Certainly.

Mr. TAYLER. I desire to say, for the information of the gentleman from Ohio and the House, that the services performed in the Campbell-Miner case were fully worth the sum of $2,000. There was a large amount of work done which did not come to the surface on the floor of the House, but was apparent to the committee in the several arguments made before the committee and in the record which was presented to it. There is no doubt whatever about the propriety of the allowance in the Miner case.

Mr. CANNON. And the gentleman is a member of that committee?

Mr. TAYLER. I am a member of that committee.

Mr. CANNON. Then the certificate is praiseworthy and trustworthy, and it otherwise complies with the law, so that this $2,000 seems quite proper. I ask for a vote on this particular amendment.

The SPEAKER. The question is on agreeing to the Senate amendment as proposed to be amended by the amendment read by the Clerk.

The question was taken; and the amendment of the Senate was concurred in with an amendment.

Mr. CANNON. Now, Mr. Speaker, I move that the House further insist upon its disagreement to the remaining Senate amendments referred to in the report and agree to the conference asked.

Mr. SAYERS. Mr. Speaker, I desire——

Mr. HENDERSON. I would like to ask the gentleman from Illinois to state what are the main amendments on which an agreement has not been reached.

Mr. CANNON. Well, there are a number of claims. There is a claim of the Richmond Iron Works, and various claims, aggregating about $9,000,000. Then there is the Ford's Theater disaster claim, so-called. These are the principal items.

Mr. HENDERSON. All right.

Mr. SAYERS. Mr. Speaker, I ask a separate vote on amendment numbered 27.

Mr. HENDERSON. What is that amendment that you ask a vote on?

Mr. SAYERS. It is the Ford's Theater matter.

Mr. ELLETT of Virginia. Mr. Speaker, I ask a separate vote on amendment numbered 103.

The SPEAKER. There are two amendments gentlemen ask for separate votes upon. What are their numbers?

Mr. ELLETT of Virginia. One hundred and three.

Mr. SAYERS. And 27.

The SPEAKER. On the other amendments the gentleman from Illinois moves that the House further insist on its disagreeing votes and agree to the conference requested.

The motion was agreed to.

Mr. SAYERS. I will ask the Clerk to read amendment 27. It is quite a long one, and is what is known as the Ford's Theater disaster amendment.

Mr. CANNON. Let it be considered as reported, and let the gentleman make his motion.

There was no objection.

The Clerk read as follows:

That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with amendments as follows:

"Strike out of said amendment, where the same occurs, the following:

"'Thomas D. Anderson, $200;
"'Ethelbert Baier, $2,500;
"'Edward C. Carroll, $300.
"'George R. Garnett, $1,500;
"'Thomas Morley, $2,250;
"'Charles R. Miller, $3,500;
"'George W. Smoot, $1,200;
"'Smith Thompson, $2,000;
"'Nathan F. White, $1,500;
"'H. P. Willey, $300;
"'James A. White, $500;

"'Nina A. Kime, sole legatee of Arthur J. Kime, $5,000;

"'Mrs. Georgie R. Baldwin, sole legatee of David Henry Porter Brown, $5,000;

"'Julia Miller, sole legatee of William Schrieber, $5,000.'

"And strike out all of the concluding paragraph of said amendment after the words 'eighteen hundred and ninety-three,' where the same occur in said concluding paragraph, and insert in lieu thereof the following:

"'And the claims of Thomas D. Anderson, Ethelbert Baier, Edward C. Carroll, George R. Garnett, Thomas Morley, Charles R. Miller, George W. Smoot, Smith Thompson, Nathan F. White, H. P. Willey, James A. White, Nina A. Kime, Mrs. Georgie R. Baldwin, and Julia Miller be, and the same are hereby, referred back to the joint commission authorized in the sundry civil appropriation act approved August 18, 1894, to investigate and report upon the Ford's Theater disaster, with instructions to reexamine and report thereon.'

"And in lieu of the sums named in lines 5 and 6 of said amendment insert '$131,550.'"

Mr. SAYERS. Mr. Speaker, if I can get the attention of the House I will have read a statement in reference to the parties named in the pending resolution.

The statement was read, as follows:

RECORD AND PENSION OFFICE, WAR DEPARTMENT,
Washington City, May 21, 1896.

SIR: In returning herewith Senate Report No. 984, and the letter from the Committee on Appropriations of the House of Representatives calling for information "respecting the awards to the sufferers in the Ford Theater disaster," I beg to say that in my opinion, and in the opinion of section chiefs and others who were in position to be fully advised as to the nature and extent of the injuries received by the clerks who were employed in the Ford Theater building at the time of the disaster, some of the persons for whom awards are recommended in the accompanying report either sustained no injuries whatever or were but slightly injured, and it is believed that their cases are absolutely without merit. No one of these persons whose names are given below fell with the floors, and no one of them reported himself to the office at or near the time of the accident as being more than slightly injured, and most of them did not report any injury whatever.

The accident occurred on Friday, June 9, 1893, and on the following Monday, June 12, all clerks who were able to report at the office were called upon to register their names and to state what injuries, if any, they had sustained. The record made at the time shows that most of those whose names are given below reported and registered on June 12 without claiming any injury whatever, while the remainder claimed to have received only very slight injuries. The condition of all of them after the disaster was well known throughout the office, and it was and still is generally understood that not one of them incurred any material or permanent disability.

It will be observed that, as shown by the accompanying report, the medical board, composed of a medical officer from the Army, one from the Navy, and one from the Marine-Hospital Service, which was appointed for the purpose of examining all the claimants, reported to the joint committee that it did not find any one of the men whose cases are now under consideration to be permanently disabled.

* * * * * * *

ANDERSON, THOMAS D.: Reported on June 12 and registered without remark. Was on duty continuously after the accident and so far as known claimed no injury.

BAIER, ETHELBERT: Reported June 12 and registered without remark. He was seen on the streets daily after the accident and was conspicuous at the coroner's inquest. He presented no evidence whatever of having been injured. Was able to report for duty as soon as work was resumed, and at no time reported to the office that he had received any injury.

BROWN, D. H. P.: Reported on June 12 and registered without remark. He was daily seen on the streets and in attendance on the coroner's jury after the accident, and usually under the influence of liquor. He claimed at one time that his left wrist was sprained and his right leg injured, but in a later communication he declared that he sprained his "right wrist and right ankle jumping from one house to the other and suffered for a month or so." He was able to return to duty as soon as work was resumed in the office, and at no time presented any appearance of having been injured at all. He was retained in the office for about ten months after the accident, and was finally discharged for misconduct. His death did not take place until about eighteen months after his discharge, or more than two years after the accident. He was a man of notoriously intemperate habits, and it is not believed that the accident was in the remotest degree the cause of his death.

CARROLL, E. C.: After the accident reported that he sprained his ankle in getting out of the building. Spent some time in Baltimore and filed a medical certificate to the effect that he was suffering from diarrhea, and that after this was checked he had "complete nervous prostration * * * caused by Ford Theater disaster."

GARNETT, GEORGE R.: Reported that he was slightly injured in getting out of the building. He was around the building immediately after the accident, evidently uninjured, and was frequently seen on the streets, apparently in perfect health, prior to his return to duty.

MORLEY, THOMAS: Reported on June 12, and registered without remark, and was on duty continuously thereafter. His duty was that of local mail carrier, which required constant walking and the use of his arms. He performed this duty without difficulty, and at no time reported to the office that he had received any injury whatever. So far as known, he never set up the claim of having been injured until after his discharge, which was ordered on December 12, 1893, because of misconduct on his part.

SMOOT, GEORGE W.: Reported that he received a slight injury in getting out of the building, but was seen on the streets continuously after the accident and showed no evidence of any injury. Reported for duty on June 26, soon after work was resumed, and not on January 20 following, as is erroneously stated in the accompanying report.

THOMPSON, SMITH: Reported on June 12 and registered without remark. During the week succeeding the accident he was conspicuous on the streets and at the coroner's inquest, and presented no evidence of having received any injury. He never reported to the office at any time that he had been injured, and it is well known that he received no injury whatever. When work was resumed on June 19 he received an ordinary leave of absence for four days, and at the expiration of this leave he reported for duty without claiming or mentioning any disability. His statement, as shown in the accompanying report, to the effect that he suffered a fracture of the rib at the time of the accident, is believed to be wholly without foundation.

WILLEY, HAL. P.: Reported on June 12 and registered without remark. During the week succeeding the accident he was seen daily on the streets and was conspicuous at the coroner's jury, to all appearances entirely free from any injuries. Reported for duty when work was resumed on June 19, was continuously on duty thereafter, and at no time reported to the office that he suffered any injury or other ill effects from the accident.

WHITE, N. F.: Reported on June 12 and registered without remark. Was present when work was resumed on June 19, and at no time presented any evidence of having been injured. A fellow clerk, who assisted him in getting to the ground from the second story at the time of the accident, reports that he was apparently uninjured.

* * * * * * *

Attention is invited to the case of Charles R. Miller, to whom the accompanying report proposes to award $3,500. It is true that he fell with the floors, but long before this accident he was pensioned at the rate of $72 a month for total disability. In view of this fact, and in the light of the report of the medical board to the effect that he did not receive any permanent injury in the disaster except to a finger joint, and that there was no evidence of any severe wounds received by him at that time, it is believed that his present condition is chiefly, if not wholly, the result of the disability for which he was pensioned long before the accident, and has no connection with that accident.

* * * * * * *

There are other cases embraced in the accompanying report which are of a doubtful character, but no mention is made of them here because it is desired to avoid even the possibility of doing injustice to anyone, and because it is proposed to confine this report to those cases concerning whose lack of merit there is no doubt. It may not be out of place, however, in this connection to call attention to the fact that of the 104 survivors' cases embraced in the accompanying report there were only 17 in which the medical board reported any present or permanent disability.

Very respectfully,

O. B. BROWN,
Chief of Division,
In charge of Tenth Street Branch (Old Ford's Theater Building).

We, the undersigned, were employed in the Old Ford's Theater Building at the time of the disaster and afterwards. We fully concur in the statements made in the foregoing communication, and from our own personal knowledge and observation we are of the opinion that the cases cited above are not meritorious.

ERNST SCHMID,
Assistant to Chief, Tenth Street Branch.
J. D. LEONARD,
In charge of Daily Reports and Time Clerk.
J. R. IMBRIE,
Section Chief.
J. W. WEBB,
Section Chief.
W. E. COVERT,
Superintendent of Building.

The honorable SECRETARY OF WAR,
Through the Chief of the Record and Pension Office.

Mr. SAYERS. Mr. Speaker, I know nothing of the facts which are set forth in that statement, but I have felt it my duty to call the attention of the House to this communication, so as to afford the House an opportunity of determining whether, in the face of the facts therein presented, it will vote an appropriation of about $30,000 out of the Treasury into the hands of undeserving people, if they be undeserving, as would appear from the statement just read. I have nothing further to say. This statement speaks for itself. It has been read in the presence of the House and each member can now vote upon the proposition understandingly. I desire to yield to the gentleman from New York [Mr. BARTLETT].

Mr. CANNON. The gentleman from New York [Mr. DANIELS], a member of the Commission that investigated these claims, desires to make a brief statement, after which I will yield to the gentleman from New York [Mr. BARTLETT].

Mr. DANIELS. Mr. Speaker, I can say in reference to the investigations that were made of claims against the Government for injuries sustained by the falling of Ford's Theater that they were most carefully pursued, and every possible avenue that seemed to be open to the committee for the purpose of obtaining evidence was explored, so that when doubtful cases came up, or cases as to which, upon the evidence that had been already taken, doubts were entertained, the proceedings were immediately suspended and other parties were brought in to give their evidence. The evidence was taken as fully and completely as it was in the power of the committee to obtain it during the course of the investigation.

In reference to the claims referred to in the letter of Mr. Brown just read, they were among those that were most carefully investigated, but now it seems from the statement which comes to us from the War Department that certain of these claims are alleged to have been unfounded, and that the persons making them were not injured in the least degree. As to one of the claims mentioned there, perhaps the largest claim among those objected to, according to my recollection, the evidence was of the most satisfactory character, but as to the others I am not able to speak from memory. It struck me, however, when I read the letter coming from the War Department, that it would be prudent to allow the claims thus objected to to stand over for the present and send them back to the Commission for further investigation, so that these persons who claim to have knowledge relative to the merits of the claims may be brought before the Commission and examined as witnesses in view of the statements which they have made. It certainly was not creditable to the War Department that while these investigations were going on—and they were made publicly and progressed through a long period of time—the evidence that is now alleged to exist should not have been brought in any way to the attention of the Commission.

There was clearly a grave fault on the part of the officers of the War Department in that respect, but at the same time if it is true that any of these claims are unfounded, then I for one, as a member of the Commission, am in favor of those claims going

back, so that the Commission may take the evidence of these persons and ascertain whether there is any foundation for the statements they make that these claimants were not injured by the disaster. That is, perhaps, all that I ought to say upon the subject at this time. Even though the persons who join in this letter were negligent and grossly at fault in not having brought to the attention of the Commission the fact that they could give this evidence, at the same time, if it is true that they are able to show that these claims are unfounded, the claims certainly should not be sanctioned here, and for that reason I have been disposed to agree, on the basis of this letter, that we should make further investigation and bring these witnesses before us and oblige them to give their testimony under oath, in order that it may be ascertained whether these claims were exaggerated or were without foundation. To that extent, therefore, it strikes me that some half dozen claims, amounting to about $20,000, should be excluded from the provision contained in the deficiency bill, in order that the Commission may ascertain what is just and right in those cases, and it was to make this suggestion that I desired for a few minutes the attention of the House.

Mr. CANNON. Before the gentleman takes his seat I would like to ask him a question. I know nothing of these claims, but the gentleman speaks of the evidence embodied or referred to in the letter which has just been read. Now, does the gentleman know whether the War Department or the parties signing this letter were called upon to testify before the Commission making the investigation?

Mr. DANIELS. There was no direct application to the War Department for evidence, but the claimants were all brought before the Commission and their testimony was taken, as well as the testimony of the physicians who had been in charge of their cases.

Mr. CANNON. I mean the parties who write this letter or who indorse it; were they applied to by the Commission?

Mr. DANIELS. No; we never heard a syllable about these alleged facts.

Mr. CANNON. Was anybody from the War Department called except the claimants?

Mr. DANIELS. I think not. We had the record of the Department, made immediately after the occurrence of the disaster, containing memoranda of these cases.

Mr. CANNON. One other question. There are claims of this character in the bill amounting to $162,000. Now, the amendment of the gentleman from Texas [Mr. SAYERS] proposes to re-refer claims aggregating about $30,000, which would leave an appropriation of one hundred and thirty or one hundred and thirty-two thousand dollars for the balance. I understand that the proposition to re-refer these claims aggregating twenty or thirty thousand dollars meets with the approval of the gentleman from New York, as he has indicated.

Mr. DANIELS. Oh, I should say so; for the purpose of determining whether these claims are fictitious or whether they have been grossly exaggerated by the parties or by the witnesses, so as to call for payments from the Government which ought not to be made. I think that justice ought to be the end in view.

Mr. CANNON. In other words, the gentleman regards the challenge of the correctness of the claims as of sufficient importance to require in fairness to the Government that they be referred back to the Commission so that substantial justice may be done—that claims if ill founded may be turned down and if well founded be paid.

Mr. DANIELS. Undoubtedly.

Mr. CANNON. There is one other question I want to ask the gentleman. The motion of the gentleman from Texas covers three items of $5,000 each which it is proposed to send back to the Commission, and which I will read:

Nina A. Kime, sole legatee of Arthur J. Kime, $5,000; Mrs. Georgie R. Baldwin, sole legatee of David Henry Porter Brown, $5,000, and Julia Müller, sole legatee of William Schrieber, $5,000.

These parties who have died appear to have named certain persons as their legatees. In one case, as I understand, the legatee is a third cousin of the deceased, possibly and probably not a member of his family. As to the other legatees I am not informed. As I understand, this appropriation would give the $5,000 in each case to the legatee to the exclusion of creditors.

Mr. DANIELS. Yes, sir.

Mr. CANNON. So that if this be a legal claim of these injured parties against the Government, the creditors might well be entitled to $5,000 more in each case.

Mr. DANIELS. As to that matter, I will say there were no claims of creditors appearing at all except the claims of physicians whose services were rendered after the occurrence of the accident. These physicians desired that some order or decision should be made by which their charges should be paid out of the proceeds of the claims against the United States. But it was concluded on the part of the Commission that we had no authority to adopt such a provision, because there had not been in any case any agreement relied upon by the physicians that they were to be paid out of the awards; hence they were left to take the ordinary course for the collection of their debts.

Mr. CANNON. Following the gentleman's opinion, I favor the reference of these cases, aggregating $30,000, back to the Commission, for the reason indicated, including these three claims to which I have just referred. And I suggest that in my judgment if any of these sums are to be paid to legal representatives or legatees of the deceased, the Commission ought to inquire whether there are in fact debts against the respective estates of the deceased parties that might constitute claims in fairness and justice which the Government would be called on to pay; and also whether these appropriations are not in the nature of a gratuity, like our appropriations to the widows of deceased Representatives—a gratuity which the Government in fairness and justice may well pay to the injured parties or those dependent upon them, but which there would be no equity in paying to a legatee unless such legatee was a member of the family of the deceased or in some way entitled to be taken care of by him as a dependent.

Mr. POWERS. Why not make these appropriations payable severally to the estates of the injured parties who are dead? If there are no creditors, the appropriation would go to the legatee under a will or to the legal representative.

Mr. DANIELS. My impression is that these amounts go into the hands of executors or executrixes.

Mr. POWERS. But the provision as read by the gentleman from Illinois [Mr. CANNON] is that the appropriations shall go to the legatees—not the executors.

Mr. DANIELS. If the law gives creditors a prior claim, then the money must be devoted to the payment of debts.

Mr. POWERS. That might be so but for the particular form in which the appropriation is proposed. Under the provision as it now stands a legatee might come into court and say, "This is a gratuity to me; it does not go to the estate of the deceased."

Mr. DANIELS. The matter might be made certain by a provision that payment should be made to the legal representatives.

Mr. POWERS. Very well; let it be amended in that way.

Mr. CANNON. In my judgment the three claims to which I have called attention ought to be referred back to the Commission to be looked at from every standpoint; and I wish to suggest that the United States Government is not called upon, where the injured parties are dead, to make a gift to anybody upon their request, unless in fairness and justice the person designated would have been entitled to the nurture or care of the deceased—for instance, a widow, a child, or some such dependent person.

Mr. DANIELS. In this matter there is no pride of opinion on the part of members of the Commission. What was desired and aimed at was to reach a conclusion morally and equitably just in reference to these claimants. If it is thought that additional testimony may show in any case that the United States should not pay this money, then there should be a further investigation for the purpose of discovering whether such is the case.

Mr. BARTLETT of New York. Do I understand the gentleman to advocate the payment of these claims?

Mr. DANIELS. I do not, if it is thought desirable on the part of the House that there should be further investigation; and if investigation is to be had it should be broad enough to make clear the justice or injustice of these respective claims.

Mr. BARTLETT of New York. Does the gentleman from Illinois yield to me now?

Mr. CANNON. How much time; five minutes?

Mr. BARTLETT of New York. Only a few minutes.

Mr. CANNON. I yield five minutes to my colleague from New York [Mr. BARTLETT].

Mr. BARTLETT of New York. Mr. Speaker, I wish to say a word against the payment of these claims; in other words, in opposition to concurring in the amendment of the Senate to this bill.

It seems to me it matters not when the letter which has been read came from the War Department. We have a letter from the proper Department of the Government substantially covering all of the points, it being a statement from the chief of this division, the Tenth-street division of the Department, the section chiefs under him, the superintendent of the building, and all of the employees of the Government who could be or are supposed to be familiar with the facts in connection with the disaster which was the origin of the claims in question. Their report is unanimous against the allowance of the claims, and it seems to me that it would be an extraordinary proceeding if the House should approve them under such circumstances.

Consider for a moment the fact that the Committee on Claims of this House take the position that they are inclined to report against any claim sounding in tort against the Government on the theory that the employee takes the risk of the employment when he enters upon the discharge of the duties to which he is assigned and assumes the responsibility for accidents to himself, differentiating the risk of Government employment from the employment by labor employers in ordinary life. And so the Committee on

Claims, with reference to ordinary claims sounding in tort, do not report any such bills.

Mr. DANIELS. Will the gentleman allow me a single interruption just there, to state that that principle was acknowledged by the Commission in its investigation? But the evidence shows that this work was done under the authority of the United States in such manner as to charge the United States officers with negligence, actual, positive negligence; so if it had been an accident that occurred in the business of an individual or a corporation, it was such a character of negligence that would make the party liable, where the law has charged such liability in the different States.

Mr. BARTLETT of New York. I do not agree with the views of the Committee on Claims; and I think that they have made an exception in the present session in one instance, where they made a report in favor of a Mr. Williams, who was injured in the folding room; but they fail to report in other cases before them.

I repeat, I do not concur in the views of the Committee on Claims with reference to that question. I think a Government should be held liable for torts. But here we have an extraordinary condition of affairs. We have a development of facts here which we can not ignore. We have an official report from Government employees familiar with the facts—or in a position to be familiar with them—against the allowance of the claims in question.

It is impossible in the limited time at my disposal to go through this report and analyze it in full, but in the case of Ethelbert Baier, to whom an allowance of $2,500 is made, and Smith Thompson, who is awarded $2,000, it is in evidence that both reported on the 12th day of June, just three days after the accident, and registered without remark. The evidence seems clear that they were not injured at all. Examine all of the other claims and the same condition exists——

Mr. DANIELS. If my colleague will permit me, in these claims, particularly the Smith Thompson claim, the evidence is clear and full as to the injury, the time when received, and the amount of injury.

Mr. BARTLETT of New York. Now, as to the other class of claims, providing for the allowance of $5,000 each, not to the next of kin, not to the creditor, not to anyone having any legal or equitable claim on them, but to their alleged legatees, I agree with the gentleman from Illinois [Mr. CANNON] that there is grave doubt about allowing such sums to legatees. I go further and say that we should not do it. We should not refer the claims to this Commission. We should not decide at once, or provide that the allowance, being a gratuity or a bounty, is for the purpose of paying for the injury which these people who suffered in that accident received and that it dies with the party injured. If not rejected on that ground it should be allowed to the next of kin on the theory that the party could not dispose of an inchoate gratuity by will and testament.

So, Mr. Speaker, it seems to me, in view of all the facts connected with the case, and in view of the able argument of Judge DANIELS, that the amendment should not be allowed and that the Government should not be mulcted to the extent of $32,000 for claims that have not any justice or equity.

Mr. CANNON. I yield ten minutes to the gentleman from Iowa [Mr. UPDEGRAFF].

Mr. UPDEGRAFF. Mr. Speaker, the accurate knowledge of the gentleman from New York [Mr. BARTLETT] with respect to the subject-matter he talks of is evidenced by the fact that he thinks this comes from the Committee on Claims.

Mr. BARTLETT of New York. Will you allow me——

Mr. UPDEGRAFF (continuing). The Committee on Claims has nothing to do with it, never had anything to do with it, and never heard of it perhaps except in the newspapers.

Mr. BARTLETT of New York. Will the gentleman permit an interruption?

Mr. UPDEGRAFF. I can not be interrupted——

Mr. BARTLETT of New York. I only wish to say that I did not state that this came from the Committee on Claims.

Mr. UPDEGRAFF. Well, the RECORD will show.

This is the report of a commission created by an act of Congress. It is proposed to refer it back to the Commission; but the Commission is extinct. This very act extinguishes the Commission, and there is no commission left now to refer anything back to, for, if I am correctly informed, that part of the bill is already agreed to.

Now, a word or two about the claims. I have been over every syllable of testimony relative to every one of these claims. I have reduced that testimony to the lowest denomination and made abstracts of it. My impression is that justice would not be done the sufferers and victims of that disaster until 50 per cent is added to the allowances that have been made to them. I speak of what I know, and I have had some experience in those matters.

Now, I have no time to go over these claims that have been referred to here in this communication from some unknown source, God knows what—a communication not signed by the Secretary of War, but signed, possibly, by some of the authors of that dire disaster. Daniel S. Lamont will never affix his signature to that instrument, or I mistake the man.

Now, let us take the case of Captain Miller, which in that document is supposed to be the worst one. I am familiar with the facts. He now resides in Michigan. He was a soldier of the Republic. He was shot through the knee, and his knee was anchylosed, so that he could not dress himself. Under a perhaps too liberal ruling of the Pension Office, being obliged to have an attendant, he was allowed a pension of $72 a month, on appeal to the Secretary of the Interior of the United States. Otherwise he was a sound man in every way, except that he had at one time had a urinary or bladder trouble, but nothing that incapacitated him from his duties and nothing but what yielded to treatment readily. That was his condition when this building was pulled down upon him by the officers of the United States, with a negligence so gross as to go to the very verge of the criminal. That was his condition then. He is now, as he himself says, an object of disgust. He is unable to appear in the society of his fellowmen most of the time owing to the injuries he received in that disaster. His bladder is paralyzed, and he has to wear continually a rubber urinal.

He received a nervous shock which has caused an inability to use a pen, and he is utterly unfit for any occupation. That man incurred $2,662 expense for medical attendance and for appliances, and has paid all of it but $140, which the poor man yet owes, and will pay whenever he has an opportunity. He was allowed $3,500 by that Commission, and that is the case upon which the principal complaint was made. I only wish I had time to read the testimony in his case in full. Three medical men in Michigan of high character say:

We, the undersigned physicians and surgeons, residents of the city of Flint, Mich., have carefully and thoroughly examined Charles R. Miller, of Washington, D. C., a victim of the disaster in the Government building known as the Old Ford's Theater, on this 28th day of July, at the request of himself and friends, and find him to be very badly disabled; in fact, a physical wreck.

In describing his case more in detail we shall endeavor to clothe our ideas in language that can readily be understood by nonprofessionals and hope to present a pen picture that will intelligently represent his present physical condition and future prospects.

Charles R. Miller is 5 feet 7 inches in height, weighs 175 pounds (says he weighed at time of accident 190 pounds), age 46 years, married, and a pensioner of the United States Government for injuries received in the war of the rebellion.

General appearance: The face is purplish red, suffused, and has a bloated appearance, with a constant trembling or shaking of the head; in fact, the whole body and limbs partake of this muscular tremor; he hobbles about on crutches, but his powers of locomotion are very deficient and limited.

Scars: We find a long red tender cicatrix or scar on the right temple extending from near the center of the arch of the eye backward and outward over the scalp about 4 inches long. This is evidently of recent origin and of considerable severity. We also find evidences of many flesh wounds on various parts of the scalp, as well as the whole body, recently healed, but yet tender.

The most severe external injury we find on the left leg, below the knee, extending nearly the length of the tibia. The soft tissues are red and swollen, and pit on pressure, showing a dropsical condition.

The deeper tissues show evidences of periostitis or chronic inflammation of the membrane that surrounds and nourishes the bone, a condition that will probably result in the death of all or a portion of the bone, if not in the loss of the limb itself. This is the leg that was injured in the war and has on it many old umbilicated scars which adhere closely to the bone. The knee and ankle joints are completely anchylosed or stiffened, with the large tendon contracted, drawing the foot out of shape. There is great atrophy or wasting of muscles of this leg and thigh, which may be seen by the following comparative measurements:

Left thigh, 19½ inches circumference; right, 23½.
Left thigh, middle, 17 inches circumference; right, 21.
Left, above knee joint, 13½ inches circumference; right, 19.
Left, over knee joint, 13½ inches circumference; right, 14.
Left leg, below knee joint, 11½ inches circumference; right, 12½.
Left leg, calf, 12 inches circumference; right, 14.
Left leg, ankle, 7½ inches circumference; right, 8½.

The circulation in this leg is very poor, and in all probability will never be of much service to him; in fact, it would be far more serviceable if it was off, and an artificial leg substituted.

There is a dark, bruised surface on the knee joint not yet healed. The left index finger is stiffened and sore, showing evidences of severe injury. A steel pen was removed from this finger seventeen days after the accident.

Internal injuries: The heart is enlarged, with a very nervous, jerky beat, much too fast in its action—120 per minute instead of 72, normal. The rhythm is abnormal, showing a severe nervous shock. The muscular and nervous system, including the spine, has received a severe shock and injury, which we think is of a permanent character. The lower half of the spine is very tender on pressure, causing severe pains. The lower end of the spine has an external injury of the bone, as well as the soft tissues. Spicula of dead bones has been removed. There is a curvature of the spine. The muscles of the back over the kidneys and the lumbar regions are very tender, showing injury of these parts.

The bladder has evidently been injured, and there is paralysis of the walls. As he is unable to void his urine, this has to be drawn several times a day with a catheter. There is a loathsome condition of the urinary organs—a constant dribbling, which soils the clothing. This will necessitate the wearing of a urinal to catch the dripping of the injured bladder. The penis is very much shrunken and retracted; has passed blood quite often.

From the above it can be readily seen this man is totally disabled from all manual or mental labor, and in our opinion his injuries are of a permanent character and of such a nature that it will require the aid of an attendant to care for him the rest of his life.

BELA COGSHALL, M. D.,
G. V. CHAMBERLAIN, M. D.,
HIRAM H. BARDWELL, M. D.

He himself swears—and nobody contradicts him—that when that building fell upon him an iron girder fell upon his abdomen and he received severe injuries. I have not time to read the testimony. I have it here by me, and know what it is. I undertake to say that the allowance of only $3,500 to that crippled soldier is a gross mistake, and I should be very glad, indeed, to double it, and then he would not be compensated.

It may be that to me there is something sacred in that wound which that man had on his knee, which he incurred in the salvation of these institutions of ours. It may be there is some sentiment in it. Every grain of that wound is to my mind more sacred than a Kohinoor "of the purest ray serene." But, apart from that, he has been maimed for life, and maimed by the wrong of the agents of this Government. I am glad that they singled out this case as the worst injustice to the Government that they could find.

One of the signers of this document is a man named Covert. I have a sample of his evidence that he gave before the coroner's jury. He was the superintendent of the building at the time of this disaster, and I give you just one sample of his evidence.

He says:

I was looking on a good part of my time—

That is, while the work was going on—

never thought about the work being done safely or unsafely; got my orders from Colonel Ainsworth, and was not to instruct the contractor, but if anything threatened the building I was to telephone Colonel Ainsworth; he was there every day.

He was the superintendent of the building, and had not brains enough to think whether there was danger in undermining the center piers which supported a building of that immense weight containing 500 human souls. He is one of the men who signs this letter, which is a disgrace to the signers. They speak of what they know nothing. I know——

[Here the hammer fell.]

Mr. UPDEGRAFF. I should like a minute or two more.

Mr. CANNON. I yield two or three minutes more to the gentleman from Iowa.

Mr. UPDEGRAFF. The Commission has before it all the records from which the facts stated there were taken, if they may be called records. That was the statement of the men who reported, when they reported, after the disaster; but what they claim, God knows who it was that took it, and God knows whether they took it down rightly or not. Nobody knows who made it. We had that, whatever it is. The Commission had that before it, and consulted it in every case. What difference does it make if a man did report on the 12th of June if his disabilities increased afterwards? And many of them did. Many of them were able to go down there and report who were just able to crawl down there. Whether they made complaint or not I do not know, and I do not care; and the Commission, perhaps, does not. I only speak for myself. I considered the sworn testimony that we had before us. This testimony that I have read in the Miller case is corroborated by physician after physician. There was a medical board; I do not know who they were. I know this: They reported one man with one-quarter disability; and he was dying when they examined him and is dead now. That is Charles H. Test. The autopsy showed that his broken ribs had extended into his liver, and they were there when that examination was made, and yet these men did not report it. He was no doubt dying at the time the examination was made. But here is doctor after doctor who examined Mr. Miller. Anybody can see his condition; and it is an especially bad case.

I want to say just one word more. It is better for all parties that this report of the Commission be approved and paid now and not left so as to come up here in special bills in other Congresses. It will be cheaper for the Government if the amount is allowed in the aggregate given by this Commission; but I think that the amount to be allowed should be 50 per cent greater than the Commission has allowed.

Now, if it be parliamentary, I would like to move an amendment to the motion of the gentleman from Texas, which is to strike out a part of the amendment.

Mr. HENDERSON. Agree to the report of the Commission.

Mr. CANNON. To concur in the report of the Commission.

Mr. HENDERSON. As provided in the Senate amendment.

Mr. UPDEGRAFF. Would not the Clerk read that again?

Mr. CANNON. The gentleman moves to recede with an amendment.

Mr. UPDEGRAFF. That is it.

Mr. SAYERS. I would suggest to the gentleman from Iowa that if my amendment is voted down by the House he may move to recede and concur in the Senate amendment.

Mr. HENDERSON. That is right. I want to ask the gentleman from Illinois one or two questions about this, and also my colleague from Iowa. I understand that the Commission was appointed, of which my colleague is one, and I know he has been giving a great deal of time to it in vacation and during Congress to investigate into all these claims of what is known as the Ford's Theater disaster. The House on the final report made no appropriation. The Senate put on an amendment appropriating the money for each man, as allowed by the Commission.

Mr. UPDEGRAFF. That is it, exactly.

Mr. HENDERSON. The amendment appropriates $160,000 in round numbers. The conference committees have agreed to $130,000 in round numbers.

Mr. CANNON. I will correct the gentleman's statement. The House has not agreed, by conference report or otherwise, to the Senate amendment; but the gentleman from Texas now moves that the House concur in the Senate amendment—striking out these claims, aggregating $30,000—and that the $30,000 be referred to the Commission, striking out also the Senate provision, which abolishes the Commission.

Mr. HENDERSON. And to appropriate about $130,000?

Mr. CANNON. That is correct.

Mr. HENDERSON. Now, I want to ask my colleague from Iowa [Mr. UPDEGRAFF] a question. Was the Commission unanimous in its report in favor of an appropriation of $160,000?

Mr. UPDEGRAFF. Yes; it was unanimous; although I was unwilling to sign the report, owing to the insufficiency of the compensation agreed upon by the Commission.

Mr. HENDERSON. Then the only conflict among the members of the Commission was that you represented a class who believed that not enough compensation had been allowed?

Mr. UPDEGRAFF. I think I may say that without violating the etiquette of the occasion.

Mr. HENDERSON. Confound the etiquette! [Laughter.] Now, if my friend from Illinois will allow me, I want to add just a word. This Ford's Theater disaster shocked not only the people of this country, but the civilized world. A Commission of able and earnest men have investigated the matter and fixed the amount of compensation. I do not believe that the American Congress should split up and haggle over this appropriation. I believe that the motion of my friend from Texas [Mr. SAYERS] should be voted down and the whole sum of $160,000 appropriated here and now by the instruction suggested by my colleague [Mr. UPDEGRAFF] that the committee of conference recede and agree to the Senate amendment. [Loud applause.]

Mr. SAYERS. Mr. Speaker, the motion which I have made does not assail the integrity of the Commission, nor does it impugn in the least the honesty or proper conduct of any one of its members. I especially disavow any such intention. The resolution provides for the payment of $130,000, in round numbers, upon these claims. But the attention of the House has been called in an official manner to certain allowances which have been made by the Commission, and if information which has reached me independent of this statement is to be believed—information given by parties who say that they are willing to go before the Commission or before any court in the land and show that certain beneficiaries embraced in this appropriation are not entitled to the beneficence of the Government—then I say that, in my opinion, it is the duty of the House to allow these doubtful cases, amounting to about $30,000, to go back to the Commission to be again inquired into. I join with the gentleman from Iowa [Mr. HENDERSON] in his statement that the Ford Theater disaster awakened a feeling of horror throughout the country. We all regretted it. We all regret it now. But, Mr. Speaker, is that any reason why we should not say that the cases of men who are not entitled to the beneficence of the Government—men who can be shown by testimony as competent and reliable as ever was produced in any court of justice to be undeserving of this compensation—is that any reason, I ask, why we should hesitate to say that the claims of such men should be sent back to the Commission for further investigation? I have been told by a gentleman of high standing in this city that on the day of the disaster a telegram was sent to him from Zanesville, Ohio, by the father of a man employed there—one of those mentioned in the statement which has been read from the desk—asking him to ascertain whether his son had been injured or not. This gentleman went and found the son. He was not injured at all. He had not even fallen with the floor. There was not even a pin scratch on him, and yet he is to be allowed payment for his suffering—mental suffering—I suppose. Now, Mr. Speaker, that is all I have to say. It is for the House to vote just as it pleases on this question.

Mr. FARIS. Will the gentleman tell us why these persons to whom he has referred as competent witnesses to prove the unworthiness of these claims were not before the committee during the examination?

Mr. SAYERS. I do not know. I knew nothing about this matter until this session of Congress, after the report of the Commission had been made. I know nothing at all about the subject myself.

Mr. FARIS. Another question. Why is not this communication which you had read signed by some official at the head of the Department?

Mr. SAYERS. It is signed by gentlemen who were present at the time of the disaster.

Mr. CANNON. I want to ask the gentleman a question for my own information. Who transmitted this statement which the gentleman has had read here?

Mr. SAYERS. I will answer the gentleman if he wishes me to speak fully. I was informed that if I would write to the Secretary of War—but not by the Secretary—that if I would write to the Secretary of War I could get some information respecting these claims. The gentleman from Illinois, the chairman of the Committee on Appropriations, will recollect that I spoke to him about it, and said to him that if he had no objection I would address a letter to the Secretary of War on this subject.

Mr. CANNON. That is correct.

Mr. SAYERS. But I assume all responsibility in the matter. If there is any blame let it rest on my shoulders.

Mr. CANNON. The gentleman from Texas did speak to me about it, and I assented to the suggestion that he should write to the Secretary, as the information had come to him. I assented, not knowing whether the information was true or false, but I indorsed the writing of the letter.

Mr. SAYERS. I am not criticising or referring to my friend from Illinois at all.

Mr. CANNON. What I want to ask the gentleman is whether, in fact, this reply was transmitted to him from the Secretary of War?

Mr. SAYERS. It was. Now, Mr. Speaker, one word more and I am done. It is true that I am a member of the minority on this floor, and of a very small minority at that. It is true that I am a member of the minority in the Committee on Appropriations. But, Mr. Speaker, that does not exempt me from the duty of endeavoring, so far as I can, by any information that I can bring before this House, to enable it to act properly and understandingly upon any question that may come up for consideration. Minorities have duties to perform as well as majorities. No member of the minority on the Committee on Appropriations can refuse to accord to the majority of the House such information as he may be able to secure touching any item of appropriation.

Mr. FARIS. I should like to ask the gentleman another question.

Mr. SAYERS. I yield with pleasure.

Mr. FARIS. A moment ago the gentleman from Iowa [Mr. UPDEGRAFF], a member of this Commission, assailed this communication as coming from one of the men connected with the War Department who might be chargeable with responsibility, to some extent at least, for this disaster. Now, the gentleman from Texas has just said that the intimation came to him that if he would address the Secretary of War information would be forthcoming——

Mr. SAYERS. Not from the Secretary of War.

Mr. FARIS. What I was attempting to get at by my inquiry was this: The suggestion having been made to you to address the War Department, whether the communication which followed came from anybody who was in such a relation to this great disaster that he might want to cover up the facts relative to it.

Mr. SAYERS. Mr. Speaker, of course I can not give the name, but the suggestion came to me from a witness of the disaster. It came from a gentleman who said he knew certain parties who were to be the beneficiaries under the report of the Commission—a gentleman of such character that I felt it my duty to write a letter of inquiry to the Secretary of War. The Secretary had sent no message to me, either in writing or verbally. He is not responsible for this statement being before the House. I am responsible for calling for it; and it was his duty, as an officer of the executive branch of this Government, to give the information when called for by me.

Mr. HOPKINS. I was not here when this discussion began, and I wish to inquire what officer it was that gave the information.

Mr. SAYERS. It was not any officer. It was a citizen who gave it to me.

Mr. HOPKINS. What officer made the answer?

Mr. SAYERS. The answer was transmitted by the Secretary of War.

Mr. HOPKINS. Who wrote the letter? Who gave the information from the War Department?

Mr. SAYERS. Three chiefs of division and the superintendent of the building. If the gentleman will go to the Clerk's desk he can he see the paper, with the names attached.

Mr. HOPKINS. Is the paper signed by any of the men who were indicted as being responsible for the disaster by which so many Government employees were killed or injured?

Mr. SAYERS. I do not know whether Colonel Ainsworth's name is attached to the paper. He was indicted; the others, I understand, were not.

Mr. BARTLETT of New York (to Mr. SAYERS). Colonel Ainsworth's name is not signed to the paper.

Mr. SAYERS. The gentleman from New York [Mr. BARTLETT] tells me that the name of Colonel Ainsworth is not signed to the paper. The other three officials, as I understand, were not indicted.

Mr. HOPKINS. They were charged, were they not, with culpable negligence?

Mr. SAYERS. The gentleman knows as much about the disaster as I do. All I know is what appeared in the newspapers.

Mr. Speaker, I have no personal feeling in this matter. At the last Congress, when I had the honor to be chairman of the Committee on Appropriations and in charge of the sundry civil appropriation bill, an amendment similar to this for the relief of other parties was put on that bill and was passed without any trouble. My only purpose now in bringing this matter before the House is to call attention to the facts embraced in the statement coming from sworn officers of the Government. Now the House can do as it pleases.

Mr. WILLIS. Let me ask the gentleman from Texas a single question. As I understand, certain letters have been written to this House disputing the right of these persons to receive any part of this appropriation?

Mr. SAYERS. No, sir; the only communication is the statement which has been read.

Mr. WILLIS. In rebuttal of the statements contained in these letters, we have the declaration of a member of the Commission, who himself tells us that with reference to one of these cases he knows that those statements are incorrect; that the man referred to has been crippled by that accident and is now a wreck. What is the gentleman going to do about such a case as that?

Mr. SAYERS. The gentleman can do as he pleases. I have no feeling about it. If gentlemen here wish to vote money out of the Treasury for this purpose, let them do so. I will give the names signed to this paper, as they were called for a few moments ago: O. B. Brown, chief of division, in charge of Tenth street branch, Old Ford Theater building; Ernst Schmid, assistant to chief, Tenth street branch; J. D. Leonard, in charge of daily report and time clerk; J. R. Imbrie, section chief; J. W. Webb, section chief; W. E. Covert, superintendent of building.

Mr. UPDEGRAFF. Is W. E. Covert one of the signers of that paper?

Mr. SAYERS. Yes, sir; W. E. Covert, superintendent of building.

Mr. UPDEGRAFF. The man who superintended the work that brought about the disaster.

Mr. SAYERS. I will not detain the House any longer. I felt that I had a public duty to discharge, a duty which I owe to members of the majority as well as the minority of this House. I have discharged that duty as well as I could. I have no personal knowledge of the facts of this case. I was not an eyewitness of the occurrence. Only two persons have come to me since this statement was printed and spoken to me in regard to it. I am perfectly willing to vote and shall vote for the appropriation of $130,000 for the payment of the findings under the Senate amendments, but I think the House, in the discharge of its duty, ought to refer these other findings back to the Commission. If upon further examination it be found that these parties named are entitled to compensation, let the Commission so report, and no man will be more willing than myself to vote for their payment.

Mr. CANNON. I yield now three minutes to the gentleman from Iowa [Mr. HENDERSON].

Mr. HENDERSON. I just want to say one or two more words, and that is all.

We have here, Mr. Speaker, in this amendment of the Senate, a total sum for payment of the sufferers by this catastrophe, unanimously reported by a commission of which honest TOM UPDEGRAFF, whom I have known from my boyhood, is a member, one of the ablest lawyers of my State, and a man that no power in the world can browbeat. They have approved, under oath and with testimony, every dollar of this $162,000. For one I do not intend that any secret hissings, coming from men who were here when this Commission was in session, when they could have come forward and given their testimony, shall keep me from giving every dollar of this appropriation at the first opportunity [applause] and clearing my heart and soul, as far as I can clear them, of this blot that is on the escutcheon of my country. [Applause.]

Mr. CANNON. I yield now two minutes to the gentleman from Indiana [Mr. HARDY], who wishes to be heard on this question.

Mr. HARDY. Mr. Speaker, something has been said in this small debate that a man seeking employment must accept the risks of that employment. While that may be true in certain cases, it is also true in law that where a man accepts employment and his employer shows himself to be guilty of gross and willful negligence he must respond in damages for any injury inflicted upon the employee.

The greatest tragedy this world has ever known since the God Man was taken up the hill and crucified on Calvary was enacted

at Ford's Theater, when the life of Lincoln went out by the bullet of a crazed assassin. I am not a fatalist, but I am willing to be so much of a fatalist as to say to-day that I believe that building stands accursed of God, and on that April day thirty-one years ago it should have been shrouded in black and had inscribed on its portals, "Abandon hope, all ye who enter here."

These Senate amendments in this bill have been reported by a Commission duly authorized by Congress, and the gentleman from Texas [Mr. SAYERS] and others would have us set aside the report of that Commission, made upon evidence taken under the solemnity of the oaths of witnesses, and substitute in its stead the ex parte statements of some Government officials, evidence which would not be accepted as legal testimony in any court of justice in the United States. And I hope the House will stand by the judgment and opinion of the honest gentleman from Iowa [Mr. UPDEGRAFF] and vote against the amendment of the gentleman from Texas [Mr. SAYERS]. [Applause.]

Mr. CANNON. Mr. Speaker, I crave the attention of the House for a very brief period.

I know nothing whatever of these claims. The Congress of the United States organized a Commission under the law, and the gentleman from Iowa [Mr. UPDEGRAFF] was a member. The gentleman from New York, Judge DANIELS, was a member of it, and certain members of the Senate were members, and with others outside constituted the Commission. That Commission performed its functions and reported a year ago damages to certain people who were injured, and that report was adopted and appropriation made.

Mr. DANIELS. That was in reference to those who were killed.

Mr. CANNON. Those who were on the death list. The amount of that award I do not recollect. Now the report comes in covering claims put into this bill, as it comes to us from the Senate, aggregating $162,000. The Senate placed the amendment upon the bill. The House would have put it on cheerfully if it had been presented to the House for consideration before the bill passed from its hands. The Senate put the amendment on.

Now, then, after the Senate put the amendment on and it came to the House there was a publication made that a part of these claims were improperly or improvidently allowed. Information came to my colleague on the committee [Mr. SAYERS]; a letter was written by him to the Secretary of War, which brought the response which has been read. In that statement, or the response of the Secretary of War, are suggestions that challenge $15,000, in round numbers, of these claims; it gives the names and gives the facts and circumstances connected with it. I do not know whether they are correctly challenged or not. The gentleman from New York [Mr. DANIELS], who is on the Commission—equally as worthy as my excellent friend from Iowa [Mr. UPDEGRAFF], but no more worthy; both honest and accomplished men—the gentleman from New York says that in his opinion the appropriation ought to be made for the $130,000 or $145,000, and that the $15,000 challenged ought to be referred back to the Commission for further inquiry, to either demonstrate that this communication transmitted by the Secretary of War is without foundation, or to demonstrate, on the other hand, that the claims are not well founded. Now, that is the opinion of the gentleman from New York, and, as I judge from what he said, the gentleman from New York is of opinion that the claims are well founded, but that there comes the challenge with reference to them.

Now, I want to say a word in reply to the gentleman from Iowa [Mr. UPDEGRAFF], a member of the committee, and in reply to my friend the gentleman from Iowa [Mr. HENDERSON]. These men who are allowed these claims, aggregating $15,000, can not afford, with this challenge, to take this appropriation, if they have good claims. That is my judgment about it. Ah, but, says my friend from Iowa, one of these men was a soldier, disabled in defense of the country, for years receiving $72 a month, and now receiving $72 a month, and he says he can not find it in his heart to send this man, thus wounded, back to the Commission for a rehearing. I can not find it in my heart, when that man, with an honorable record, totally disabled and getting $72 a month for years, is challenged as a fraud in this communication transmitted from the Secretary of War. I can not find it in my heart to refuse that man a chance for vindication. In my judgment, the gentleman from New York [Mr. DANIELS] is right. We ought to appropriate this $130,000, and we ought to send the remaining claimants back to my friend from Iowa [Mr. UPDEGRAFF] on the Commission, and the other Commissioners, for reexamination and report on the first Monday in next December. So much for that.

Now, independent of this report from the Secretary of War, there are three claims here of three legatees. That ought to be amended so that the money, instead of going to the three legatees, who are not, so far as I am informed, members of the family, shall go to the personal representatives of the deceased. In other words, we do not want to be called upon to pay again.

Having said that much, I am ready to vote, and ask a vote on the amendment of the gentleman from Texas [Mr. SAYERS].

The SPEAKER pro tempore. The question is on the motion of the gentleman from Texas [Mr. SAYERS] that the House recede from its disagreement to amendment numbered 27, and agree to the same with the amendment or amendments which have been read.

Mr. UPDEGRAFF. Mr. Speaker, I rise to a parliamentary inquiry. Will not a motion to recede and concur take precedence of the motion pending? If so, I desire to make that motion. The motion of the gentleman from Texas [Mr. SAYERS] is to concur with an amendment. This motion of mine is in the interest of agreement and therefore has precedence.

Mr. CANNON. In reply to that matter, I want to be heard just for a minute. This is a motion to recede and concur with an amendment. There can be but one motion to recede pending at a time, and therefore another motion to recede is not in order.

Mr. UPDEGRAFF. My motion is a motion to recede and concur. It is in the interest of agreement and in the interest of perfecting legislation.

Mr. CANNON. This is a motion to recede and concur, with an amendment.

Mr. UPDEGRAFF. My motion makes an agreement. The other motion has a tail to it.

Mr. GROSVENOR. The motion of the gentleman from Iowa [Mr. UPDEGRAFF] is a motion to go forward. The other is a motion to go backward. The motion of the gentleman from Iowa [Mr. UPDEGRAFF], if agreed to, would end the controversy. The other is a motion which keeps the controversy open. I have no doubt about what the rule is.

The SPEAKER pro tempore. The Chair is of the opinion that at the present period of the disagreement between the two Houses a motion to recede and concur takes precedence of a motion to recede and concur with an amendment. That has been the ruling on previous occasions. The motion to recede brings the two Houses together.

Mr. UPDEGRAFF. I move to recede.

The SPEAKER pro tempore. The motion to concur, before this stage, would have been in order; but a motion to recede with an amendment can only come up now after the motion to recede and concur shall have been voted down.

Mr. UPDEGRAFF. My motion is to recede and concur.

Mr. CANNON. Does the Chair hold that motion to be in order.

The SPEAKER pro tempore. The Chair holds that motion in order.

Mr. CANNON. I want to be heard just a moment before the vote is taken, and I want the attention of the gentleman from Iowa [Mr. UPDEGRAFF] and of the House. The motion to recede with an amendment, made by the gentleman from Texas [Mr. SAYERS], if adopted, excepts these claims, aggregating $30,000. If it is voted down, then the motion of the gentleman is in order; but if the motion of the gentleman is put and carried, it shuts off the amendment that ought to prevail and that I shall offer if the motion of the gentleman from Texas [Mr. SAYERS] is voted down, although I think the motion of the gentleman from Texas [Mr. SAYERS] is the correct one; that is, I will offer an amendment to except these legatees who are appropriated for by name, $5,000 each. So far as I know and believe, they are not members of the families of the deceased. They ought to be omitted. If we pay that $15,000 it ought to be paid to the executors or administrators, so that it may be distributed after the debts are paid, perchance debts that were incurred during the last sickness of the deceased.

Now, if the amendment of the gentleman from Iowa [Mr. UPDEGRAFF] is adopted, that means that we go back on the whole thing, and that these three legatees take the $5,000 apiece.

Now I am ready to vote, Mr. Speaker.

The SPEAKER pro tempore. The question is on the motion of the gentleman from Iowa [Mr. UPDEGRAFF].

Mr. DOCKERY. I rise simply to express the hope that my good friend from Iowa [Mr. UPDEGRAFF] will not press his motion to recede. I do not think, under the circumstances, he would desire to include the three legatees.

Mr. UPDEGRAFF. I certainly would, and if I am allowed the time I will state my reasons, and they are good reasons.

Mr. CANNON. I ask for a vote.

The SPEAKER pro tempore. The question is on the motion of the gentleman from Iowa [Mr. UPDEGRAFF], that the House recede from its disagreement to amendment numbered 27, and agree to the same.

The question being taken, the Speaker pro tempore announced that the ayes seemed to have it.

Mr. SAYERS demanded a division.

The House divided; and there were—ayes 67, noes 76.

Mr. UPDEGRAFF. The yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 96, nays 123, not voting 135; as follows:

YEAS—96.

Acheson,	Fischer,	Howell,	Russell, Conn.
Aldrich, Ala.	Fowler,	Huling,	Sauerhering,

Denny,	Lockhart,	Perkins,	

So the motion to recede and concur was not agreed to.

The following pairs were announced:

Until further notice:

Mr. DALZELL with Mr. CRISP.

Mr. STEPHENSON with Mr. NEILL.

Mr. MAHON with Mr. PATTERSON.

Mr. BLACK of New York with Mr. LAWSON.

Mr. SMITH of Michigan with Mr. BERRY.

Mr. GILLETT of Massachusetts with Mr. COWEN.

Mr. DRAPER with Mr. SPENCER.

Mr. LOUD with Mr. SWANSON.

Mr. BURRELL with Mr. COCKRELL.

Mr. COLSON with Mr. KENDALL.

Mr. FOOTE with Mr. HUTCHESON.

Mr. MEIKLEJOHN with Mr. CROWLEY.

Mr. PICKLER with Mr. MILES.

Mr. JOHNSON of Indiana with Mr. COX.

Mr. CORLISS with Mr. MOSES.

Mr. SNOVER with Mr. MADDOX.

Mr. BOWERS with Mr. MINER of New York.

Mr. COUSINS with Mr. LIVINGSTON.

Mr. NORTHWAY with Mr. PRICE.

Mr. FOSS with Mr. MCLAURIN.

Mr. MCCALL of Massachusetts with Mr. DE ARMOND.

Mr. BARHAM with Mr. KYLE.

Mr. HITT with Mr. OTEY.

Mr. BARTHOLDT with Mr. DENNY.

Mr. ROYSE with Mr. TURNER of Virginia, except on Tucker-Yost election case.

For this day:

Mr. WILLIAM A. STONE with Mr. SHAW.

Mr. PERKINS with Mr. MEYER.

Mr. MORSE with Mr. MCCULLOCH.

Mr. MOODY with Mr. LOCKHART.

Mr. LEONARD with Mr. LITTLE.

Mr. HICKS with Mr. COOPER of Texas.

Mr. BROMWELL with Mr. BELL of Texas.

Mr. LEWIS with Mr. BARTLETT of Georgia.

Mr. RANEY with Mr. WASHINGTON.

Mr. STEELE with Mr. MCCREARY of Kentucky.

Mr. MCCLEARY of Minnesota with Mr. RUSK.

Mr. BROSIUS with Mr. BAILEY.

Mr. WADSWORTH with Mr. TUCKER.

Mr. WOOMER with Mr. YOAKUM.

Mr. SPALDING with Mr. WOODARD, on this question.

Mr. HEINER of Pennsylvania with Mr. FITZGERALD, on this vote.

Mr. KYLE. Mr. Speaker, I am paired with the gentleman from California, Mr. BARHAM, and inadvertently voted. I desire to withdraw my vote.

Mr. LOUD. Mr. Speaker, I think I am paired with the gentleman from Virginia, Mr. SWANSON. If so, I withdraw my vote.

The result of the vote was then announced as above recorded.

The SPEAKER pro tempore. The question recurs on the motion of the gentleman from Texas to agree to the Senate amendment with an amendment which has been read.

The motion was agreed to.

On motion of Mr. SAYERS, a motion to reconsider the vote by which the House agreed to the Senate amendment with an amendment was laid on the table.

Mr. CANNON. Mr. Speaker, I now move to reconsider the action of the House on agreeing to amendments numbered 207 and 208, with an amendment. This is touching the allowance of election expenses. I make the motion for the reason that on examination the gentleman from Maryland [Mr. RUSK] finds that the amendment, by mistake, leaves his name out, although he has a certificate from the committee, and the certificate was sent to the Senate when the amendment was put on.

The SPEAKER pro tempore. The gentleman from Illinois moves to reconsider the vote by which the amendments of the Senate numbered 207 and 208 were agreed to with an amendment. Without objection, it will be so ordered.

There was no objection, and it was so ordered.

Mr. CANNON. Now, Mr. Speaker, I offer the following amendment.

The Clerk read as follows:

That the House recede from its disagreement to the amendment of the Senate numbered 207, and agree to the same with an amendment as follows:

"At the end of the matter inserted by said amendment insert:

"'To Henry C. Miner, $2,000.

"'To Harry W. Rusk, $2,000.

"'To George Denny, jr., $2,000.'"

That the House recede from its disagreement to the amendment of the Senate numbered 208, and agree to the same with an amendment as follows:

"In lieu of the sum proposed insert '$110,861.82.'"

The SPEAKER pro tempore. The question is on the motion of the gentleman from Illinois.

The question was taken; and the amendment was agreed to.

Mr. CANNON. Now, Mr. Speaker, the gentleman from Virginia [Mr. ELLETT] desires a separate vote on an amendment—I think he has the number.

Mr. ELLETT of Virginia. It is amendment numbered 103.

Mr. CANNON. Does the gentleman desire to move that the House concur?

The SPEAKER pro tempore. The Clerk will report the amendment.

The Clerk read as follows:

Award of Secretary of the Navy: For payment in full to the Richmond Locomotive and Machine Works its audited and adjusted claim for damages and losses incurred in the construction of the armored battle ship *Texas*, $89,558.39.

The SPEAKER pro tempore. The gentleman from Virginia moves that the House recede and concur in the Senate amendment which has just been read.

Mr. ELLETT of Virginia rose.

Mr. CANNON. Mr. Speaker, I believe I am entitled to the floor. I understand this is a subsidiary motion.

The SPEAKER pro tempore. The gentleman is entitled to the floor.

Mr. CANNON. How much time does the gentleman from Virginia desire?

Mr. ELLETT of Virginia. Ten or fifteen minutes.

Mr. CANNON. I will yield the gentleman ten minutes, and if he finds that he needs five minutes more I will yield him the time.

Mr. ELLETT of Virginia. I thank the gentleman.

Mr. Speaker, in the absence of nearly all of my colleagues from Virginia to-day, I desire, in a few brief minutes, to call the attention of the House to two things in relation to this claim. The first is the absolute justness of the claim and the fact that it has been audited and adjusted; and the second is the urgent reasons for its immediate payment. By an act of Congress this claim was referred to the Secretary of the Navy, and he was directed to audit and adjust it. He did so, and under that audit he reported that $80,049.29 was due.

Since that time the claim has been before four committees. Three of them confirmed the action of the Secretary of the Navy. The fourth committee, in the Senate a few days ago, reported that they thought certain items allowed by the Secretary ought not to be paid, those items being interest, insurance, and security, and upon that report the claim was reduced to $69,000. The proprietors of the Richmond Locomotive and Machine Works accepted that award, although they thought the audit by the Secretary of the Navy was equivalent to a judgment. They accepted it because it is absolutely essential to them that this claim be speedily paid in order that their works may go on.

I maintain, Mr. Speaker, that a general audit by the Auditor of any one of the Departments of the Government is equivalent to a judgment, and that when there is a special act of Congress directing the Secretary of the Navy to audit, through the proper bureaus in his Department, any special claim, and he does so, that audit should in law occupy the same dignified position and become equivalent to a judgment. Certainly this position can be attacked only on technical grounds. Morally the claim stands as an adjudicated claim. That being the case, let me now call attention to the urgency of this case. Mark you, the claim at $80,000 had been passed upon and audited by the Secretary of the Navy and by four committees, one in this House and three in the Senate.

As I have already said, it was reduced in the Senate to $69,000, which the claimants agreed to accept under the circumstances I have stated. The Richmond Locomotive Works undertook to construct the machinery for the battle ship *Texas* on the suggestion of Mr. Tracy, then Secretary of the Navy. His reason for having the work done there was that in case of war or trouble with foreign countries he desired to have strategic points throughout the country where naval armament, or ships, or torpedo boats might be constructed with safety, and, to use the words of Secretary Tracy to me at the time, he was well aware that it was a very difficult undertaking to capture the city of Richmond; that it was almost an impregnable point, and it being easy of access to the Atlantic Seaboard, he thought it would be of great advantage to the Government to have works established there competent to construct naval vessels, torpedo boats, and naval armament.

Under that suggestion of Secretary Tracy certain gentlemen in Richmond, not with large means, but with a good deal of nerve, undertook the construction of the machinery for the battle ship *Texas*, while the Government undertook the construction of the hull. There has been a good deal of criticism of the hull of that vessel, but there has never been any criticism of the machinery; and no longer ago than the day before yesterday we received a letter from Captain Glass, the gallant commander of the *Texas*, in which he stated that with a few changes in the hull of the vessel he expected to command one of the finest ships in the Navy—that he would have a battle ship with the speed of a cruiser.

Now, gentlemen, I am here to frankly concede that the Richmond Locomotive Works are in great need of this money. If they get it without delay, 2,000 workingmen will continue to receive employment in those works. If they fail to get it, the works will be shut down and 2,000 men will be thrown out of employment. It is conceded on every hand that this is a just claim. It will be seen, therefore, from what I have stated how urgent the necessity is for the immediate payment of this claim, and I appeal to you, gentlemen, to bear in mind what I have said about these workingmen and their families, and to vote to concur in the Senate amendment and let this just claim due to the Richmond Locomotive and Machine Works be paid. I yield now to my colleague from Virginia [Mr. WALKER].

The SPEAKER pro tempore. The gentleman from Illinois [Mr. CANNON] has the floor.

Mr. ELLETT of Virginia. The gentleman yielded me fifteen minutes, and I desire to yield some of the time to my colleague.

Mr. CANNON. No; I yielded the gentleman ten minutes.

Mr. ELLETT of Virginia. Well, there are two gentlemen who want to say something about this claim. My colleague [Mr. WALKER of Virginia] desires a minute.

Mr. CANNON. Very well. I yield a minute to the gentleman from Virginia [Mr. WALKER].

Mr. WALKER of Virginia. Mr. Speaker, I can add nothing to the very clear statement that has been made by my colleague from Virginia [Mr. ELLETT]. This is conceded to be a just claim. I am not aware that there is any objection to it upon the ground that the Government does not honestly owe the money. I will ask the gentleman from Illinois whether there is any objection to the claim on the ground that it is not just? I have never heard of any.

Mr. CANNON. I will answer that in my own time.

Mr. WALKER of Virginia. Then, Mr. Speaker, this being a just claim, conceded to be so, having been reported favorably by four committees, one of them a special committee, and previously audited by the Navy Department, I trust that the House will vote to concur in the Senate amendment and let this money be paid. From what I have heard I think the only objection to the amendment is that it is not in its proper place upon this bill, but I hope that no mere technical consideration will induce members to vote here against a just claim like this, but rather that they will vote to pay it and not to put this company, which is struggling with hard times, in a position of great financial stress for want of money which is justly due to them.

Mr. MCMILLIN rose.

Mr. CANNON. Does the gentleman desire one or two minutes?

Mr. MCMILLIN. Yes, sir.

Mr. CANNON. I yield two minutes to the gentleman.

Mr. MCMILLIN. Mr. Speaker, I have had occasion to examine this claim, but I do not know that I can add anything to the very clear statement which has been made by the gentleman representing the district in which these works are located [Mr. ELLETT of Virginia], who has addressed you. It is not denied, I believe, that the Government owes a debt to these parties. The question to be determined now is whether the amount sought to be appropriated is in excess of the amount due. Upon that subject it is sufficient to say that the auditing officer to whom the matter was referred by act of Congress found not simply what is reported here as due—sixty-nine thousand and odd dollars—but above $80,000. Three or four different committees of Congress have also found that the debt due was about that amount. The Senate committee left out some items that it considered not proper charges against the Government, although they were items of expenditure that had been incurred by the parties. In that way the claim was reduced from eighty thousand and odd dollars to $69,000, and the question is, will we appropriate and pay this amount?

It strikes me that it is proper the Government should pay this debt, which, as I believe, it owes. I think the preponderance of evidence is largely to the effect that this amount at least is due, and it is very questionable in my mind whether or not the item of insurance, and possibly other items which have been left out by the Senate, would not also be a proper charge against the Government. But the portion which is included is, it seems to me, justly due and ought to be paid to these parties. Here are enterprising citizens who built one of our greatest war vessels. She fulfilled every requirement. Her speed and strength were all the Government required. A balance remains due them. Every consideration of honor, honesty, fair dealing, and good faith demands that we keep our contract and pay what we owe.

Mr. BENNETT. I should like to occupy one minute.

Mr. CANNON. I yield to the gentleman.

Mr. BENNETT. I do not wish to take much of the time of the House in the discussion of this question, but I want to call the attention of the House to the fact that this amount, $69,558.39, is within the contract price.

Mr. CANNON. What is the gentleman's statement?

Mr. BENNETT. I say that this amount, as I understand, is within the contract price, and is a legal obligation of the Government, which should be paid.

Mr. CANNON. Oh, no, it is not a legal obligation. The gentleman is mistaken.

Mr. BENNETT. Well, that is my understanding.

Mr. CANNON. I do not doubt that such is the gentleman's understanding, but——

Mr. ELLETT of Virginia. That is correct in this way—by allowing for the additional time granted by the Government to the Richmond Locomotive Works the same rate of compensation that was allowed under the contract.

Mr. CANNON. I will say to the gentleman that this is not a legal claim at all, and will not be regarded as such by anybody who has read the report.

Mr. ELLETT of Virginia. I have explained that matter in the remarks I have just made. Technically it is not as strong as a

claim audited by any Department, but morally it is stronger, because audited by special act and direction of Congress.

Mr. BENNETT. Mr. Speaker, I want to quote a word or two from the statement of the captain of the *Texas*, Capt. Henry Glass, for whom I have the greatest possible respect; and I am sure any member of this House acquainted with him would allow to his statement very great weight and consideration. He says: "The *Texas*, when completed—when the repairs are made to the hull that are now under way—will be a battle ship with the speed of a cruiser." I commend this statement to the consideration of gentlemen of the House. I trust that the amendment of the Senate will be concurred in.

Mr. BRUMM. I should like to ask the gentleman from Illinois a question.

Mr. CANNON. I yield for a question.

Mr. BRUMM. I understand that this is a claim which should properly have been referred for examination to the Committee on Claims of this House. As chairman of that committee I say that this claim has never been before our committee, but as I understand it has been placed on this bill by a committee of the Senate. I want to know whether that is correct?

Mr. CANNON. According to my examination, the gentleman is correct, and I have made a pretty thorough examination.

Mr. BRUMM. Then I wish simply to say, with the gentleman's permission, that I think this House ought to put a stop to this system of legislation. We have our committees here for the purpose of investigating cases of this kind and reporting upon them. The Committee on Claims is made up largely of lawyers. The members of that committee are competent to investigate the law as well as the facts governing these cases. This case not having been before our committee, it would be a bad precedent for us to permit the Senate to add to appropriation bills claims of this sort that have never gone through the proper committee of this House.

Mr. ELLETT of Virginia. This claim was before the Naval Committee of the House.

Mr. BRUMM. But that was not the proper committee. The Committee on Claims should have examined it.

Mr. ELLETT of Virginia. It was referred by the Speaker of the House to the Naval Committee, and by that committee reported favorably.

Mr. CANNON. Mr. Speaker, a very few words will inform the House in regard to this matter. This is a claim pure and simple. It may have merit. I have read the report of the facts within the last twenty-four hours. I doubt whether the claim has merit to the amount represented. I rather think that if the claim were being considered in Committee of the Whole, where it would be open to amendment, I might say that a portion of this amount might well be granted by legislation. But how much I am not prepared to say. I repeat, it is a claim pure and simple—as much so as any to be found on the Private Calendar. Now, then, how does this claim come here? Does it come here upon an estimate transmitted through the Secretary of the Treasury? No. Gentlemen know how the estimates on which we frame our general appropriation bills are made up. Does this claim come here in that way? No. There has never been a line of an estimate sent to the House covering this claim. Does it come here even upon the report of the committee of the gentleman from Pennsylvania [Mr. BRUMM]—the Committee on Claims? No; his committee has not investigated the case. Does it come here upon a report from the Committee on Naval Affairs? No. There was a communication addressed to Congress by the Secretary of the Navy, and referred to the Committee on Naval Affairs, and there it stays without any action.

Now, how did it come? It came by a man getting up in the Senate of the United States, when this general deficiency bill was being considered in that body, and offering this amendment as an amendment to the bill. Now it is said—I do not say it is so—it is said that courtesy has much to do with these matters. Well, I think the plain way, the safer way, for us is to go by rule. That is what we have got to do on this side.

But by the grace of God, and the Senate of the United States, we are permitted in this House to consider claims here, separate claims—I am not now speaking of the spoliation claims or the claims under the Bowman Act, for we have disposed of them—but we are permitted to consider claims here, sent over by the Senate, aggregating some $900,000—claims, hundreds of items, that come to us on this bill. We can consider and adopt them if we choose. But, Mr. Speaker, if you adopt this one amendment now under consideration you want to adopt every other one, for so far as I know the others have just as much merit as this has.

Now, whether my friend from Pennsylvania, with his business, with his calendar, might have gone to another body and got his entire calendar put on as an amendment to this bill I do not know.

Mr. BRUMM. I never did and never would. I never tried it.

Mr. CANNON. The gentleman says he never tried it.

Mr. BRUMM. And never would.

Mr. CANNON. I am very glad to hear it. In my judgment we could not, in the five minutes we have for the consideration of these matters, safely undertake any such policy. This question ought to be considered in Committee of the Whole on its own merits on a report from the committee of the gentleman from Pennsylvania, and after full consideration. It should "walk on its own legs" and not fasten itself, like a senatorial leech, on this general deficiency bill, which must pass or the Government stop.

Mr. MCMILLIN. Is it not a fact, I would suggest to the gentleman from Illinois—is it not a fact that the gentleman himself opposed the consideration of these amendments in Committee of the Whole?

Mr. CANNON. Not at all.

Mr. MCMILLIN (continuing). Was there not a proposition to consider these amendments in Committee of the Whole when they came from the Senate, and the gentleman himself resisted it?

Mr. CANNON. Oh, no; not at all.

Mr. MCMILLIN. I think the gentleman will find, on examination of the RECORD, that his memory is a little at fault. I know the proposition was suggested and it was resisted, and I was thinking that the gentleman himself opposed it.

Mr. RICHARDSON. I made the point myself that they should be so considered.

Mr. CANNON. Ah, but it was too late then. The gentlemen can not muddy the waters here in this way——

Mr. ELLETT of Virginia. Will the gentleman allow me?

Mr. CANNON. I do not yield. I have been entirely courteous to the gentleman, and have yielded him time to present his case.

Mr. ELLETT of Virginia. But the gentleman does not desire to do an injustice to anybody.

Mr. CANNON. Certainly not; and I yield to the gentleman, on that suggestion, for a question.

Mr. ELLETT of Virginia. You stated that this should have been passed on by a Committee of the House?

Mr. CANNON. Yes.

Mr. ELLETT of Virginia. I say it has already been passed on by a committee of the House.

Mr. CANNON. What committee? Just send it to me, please.

Mr. ELLETT of Virginia. By Mr. Clancy, in the Fifty-third Congress.

Mr. CANNON. Ah, but I am not talking of the Fifty-third Congress. I am speaking of a committee of this Congress.

Mr. ELLETT of Virginia. Just let me say that you stated that it was not a legal claim——

Mr. CANNON. I do.

Mr. ELLETT of Virginia. And yet that committee reported a bill which the House passed, directing the Secretary of the Navy to audit and adjust the claim. And I say when he did it it has the same moral effect as a judgment, if it is not technically a judgment against the United States.

Mr. CANNON. Ah, Mr. Speaker, there is no heresy but what somebody stands ready to bless it with a text. There are the simple, plain facts about it; and now, after yielding a minute or two to my colleague from Illinois [Mr. HOPKINS], I will ask a vote.

Mr. HOPKINS. Mr. Speaker, I think my colleague is entitled to great credit in resisting the payment of this claim.

The contract price entered into between the Government and the Richmond Locomotive Works for building the engines for the *Texas* was in round numbers $634,000. According to their statement, the cost of labor and material was $522,039.08. They have added to this, as cost of the engine, contingent (which is 30 per cent of the cost of material and labor that went into the construction of the engine), $151,940.39. They have also added an item of interest amounting to $59,612.66, and then they have added an item of profit, over labor and material, of $52,203.91. These three items, aggregating $263,756.96, were not included in the contract at all. Now, this company entered into this contract with a full knowledge of what they were required to do. They were to build these engines for the *Texas* under plans that were purchased by Secretary Whitney in Europe several years ago, and in making their estimates they were in competition with other parties, and they made their contract under such conditions that they believed they could make money by it. Now, without any fault whatever on the part of the Government, these people claim that they should be allowed additional money. Over $52,000 of this amount they charge for tools that they claim they were required to purchase or to build in order to construct these engines. Now, is there any person in the world who will make a contract with the Cramps up here at Philadelphia for the building of a ship and then allow them extras for the tools and machinery necessary for the building of that ship? That is precisely what this Richmond company has asked.

Mr. ELLETT of Virginia. You are mistaken.

Mr. HOPKINS. Not at all.

Mr. ELLETT of Virginia. I know the gentleman from Illinois does not desire to misrepresent.

The SPEAKER pro tempore. Does the gentleman from Illinois [Mr. CANNON] yield?

Mr. CANNON. I can not yield for a controversy about the merits of this matter.

Mr. HOPKINS. Let me have a word or two further. This is one of the items that were publicly charged; and then they have also charged an item of 30 per cent profit on this entire sum, in order to make up the total that was presented to the Secretary of the Navy. Now, this is done, not upon an investigation, but simply upon an affidavit that was filed by a representative of this company with the Navy Department. The Navy Department has not sent out experts to go and investigate this thing in the way that an investigation ought to be made before money is voted away by this House——

Mr. ELLETT of Virginia. May I interrupt the gentleman?

Mr. HOPKINS. An investigation should be made by the proper Department, and this question should be considered; and I say, under the facts as presented here——

Mr. ELLETT of Virginia. Will the gentleman yield to me? I know he does not wish to make a misstatement.

Mr. CANNON. I will yield two minutes more, and then I will ask for a vote.

Mr. ELLETT of Virginia. Experts have been sent out by the Navy Department. The Chiefs of the Bureau of Construction and Repair and the Bureau of Steam Engineering passed upon the claim of the Richmond Locomotive and Machine Works and reported the damages due to said company by the Government as follows, namely:

Direct damage	$56,179.73
Interest	8,740.24
Insurance	1,150.72
Dock trial	12,778.66
Damage to schooner	600.00
Security	600.00
Total	80,049.35

This sum is entirely due to the default of the Government by the admission of its own experts after investigation.

The report of these experts was passed upon by a committee of this House, and by four committees of the Senate. In all, $80,000 was admitted and conceded by these four committees and audited by the Secretary of the Navy.

Mr. HOPKINS. Now, Mr. Chairman, I deny——

Mr. ELLETT of Virginia. One moment. Then, three items—interest, insurance, and surety—were stricken out by the last committee, making the fifth committee that has reported upon this matter.

Mr. HOPKINS. I can not yield any further. The items as presented by the gentleman are not the items the Richmond Locomotive Company have made their claim upon at all. Their items are: Contingent, $151,940.39; interest, $59,612.66; profit over labor and material, $52,203.91. And I am credibly informed that the $52,000 represents what they claim for extra tools and machinery to construct these engines.

Mr. ELLETT of Virginia. That is a mistake. There is no claim against the Government for tools, but merely a statement of the fact that that sum was expended by the company in tools in order to equip themselves to do the work in a creditable manner, which they did. The entire amount is due to confessed failure upon the part of the Government to carry out its contract, the statement of the gentleman from Illinois notwithstanding.

Mr. HOPKINS. When the gentleman talks about investigation, I undertake to say that it was no investigation at all, and that it was a disgrace to the Government. I undertake to say, further, that if this claim is rejected by this House, as I trust it will be, and the conferees of the House succeed in striking that from the bill, if we can have a proper examination, not a dollar of this money will be allowed to this company. They ought not to have it. They were paid the contract price, and I know of no reason, either in morals or in law, why this company should be paid an immense amount of money, as claimed here, when it has been denied to such shipbuilders as the Cramps, of Philadelphia, and to old John Roach, who was driven to his grave by the class of men who now seek to foist this bill upon Congress.

Mr. CANNON. Mr. Speaker, a word only in conclusion. The speech of the gentleman from Virginia [Mr. ELLETT] and the speech of my colleague from Illinois [Mr. HOPKINS], equally strong and equally honest, show that there is a difference of opinion about this claim, and it demonstrates better than I could by a ten hours' speech the impropriety of having this thing upon a general appropriation bill. I ask for a vote.

The SPEAKER pro tempore. The question is on the motion that the House recede from its disagreement to Senate amendment numbered 103, and agree to the same.

The question being taken, on a division (demanded by Mr. ELLETT of Virginia) there were—ayes 44, noes 76.

Mr. ELLETT of Virginia. I call for the yeas and nays.

Mr. CANNON. I hope not. The House is clearly the other way.

Mr. ELLETT of Virginia. I withdraw the demand for the yeas and nays.

Accordingly, the motion was rejected.

Mr. CANNON. The action of the House just taken is a non-concurrence. I move that the House further insist on its disagreement to amendment numbered 103, and agree to the conference asked for by the Senate.

The motion was agreed to.

The SPEAKER pro tempore. The Chair will announce as conferees on this bill Mr. CANNON, Mr. ARNOLD of Rhode Island, and Mr. SAYERS.

APPOINTMENT OF CONFEREES.

The SPEAKER pro tempore. The Chair announces the appointment of the conferees on the bill (H. R. 5490) to license billiard and pool tables in the District of Columbia, and for other purposes, Mr. CURTIS of Iowa, Mr. MILNES, and Mr. HULING.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had disagreed to the amendment of the House of Representatives to the bill (S. 1511) granting a pension to Mrs. Jane Stewart Whiting; asked a conference with the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. GALLINGER, Mr. CANNON; and Mr. MITCHELL of Wisconsin as the conferees on the part of the Senate.

The message also announced that the Senate had passed the following resolution:

Resolved, That the Secretary be directed to request the House of Representatives to return to the Senate the bill (S. 1420) granting an increase of pension to Elizabeth W. Sutherland.

A further message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate having proceeded in pursuance of the Constitution to reconsider the bill entitled "An act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes," returned to the House of Representatives by the President of the United States with his objections, and sent by the House of Representatives to the Senate with the message of the President returning the bill:

Resolved, That the bill do pass, two-thirds of the Senate agreeing to pass the same.

MESSAGE FROM THE PRESIDENT.

A message in writing from the President of the United States was communicated to the House of Representatives by Mr. PRUDEN, who also announced the action of the President on bills of the following titles:

On June 3, 1896:

An act (H. R. 886) to amend section 3255 of the Revised Statutes of the United States concerning the distilling of brandy from fruits;

An act (H. R. 3282) to repeal section 61 of an act to reduce taxation, to provide revenue for the Government, and for other purposes, which became a law August 28, 1894; and

An act (H. R. 5675) authorizing the construction of a wagon and motor bridge over the Missouri River at St. Charles, Mo.

NOTE.—The following bills were presented to the President May 19, 1896, and not having been returned by him to the House of Congress in which they originated within the ten days prescribed by the Constitution, have become laws without his approval:

An act (H. R. 4528) granting a pension to Katherine S. McCartney, widow of William H. McCartney; and

An act (H. R. 3607) to increase the pension of Kate Grant.

CONTESTED-ELECTION CASE—MURRAY VS. ELLIOTT.

Mr. OVERSTREET. Mr. Speaker, before proceeding I desire to yield to the gentleman from Virginia.

Mr. JONES. Mr. Speaker, I desire on the part of the minority of Election Committee No. 3 to offer the following resolutions as a substitute for those offered by the committee.

The SPEAKER pro tempore. The gentleman from Indiana calls up the contested-election case——

Mr. OVERSTREET. The resolutions have already been read.

The SPEAKER pro tempore (continuing). The Clerk will report the resolutions.

The Clerk read as follows:

Resolved, That William Elliott was not elected and is not entitled to a seat in the Fifty-fourth Congress from the First Congressional district of South Carolina.

Resolved, That George W. Murray was elected and is entitled to a seat in the Fifty-fourth Congress from the First Congressional district of South Carolina.

The SPEAKER pro tempore. The gentleman from Virginia offers the resolutions which the Clerk will read as a substitute.

The Clerk read as follows:

Resolved, That George W. Murray was not elected as a Representative to the Fifty-fourth Congress from the First Congressional district in the State of South Carolina.

Resolved, That William Elliott was duly elected, and is entitled to retain his seat.

Mr. OVERSTREET. Mr. Speaker, so many gentlemen have made the inquiry of me concerning the time of taking a vote upon this question that I think it is due to them, as well as to myself, to say that the probabilities are, the strong probabilities are, that no vote will be reached this afternoon. I feel, however, that I can safely say that the vote will occur immediately after the reading of the Journal to-morrow morning.

Mr. HOPKINS. Will not two hours and a half be enough time for the discussion of this case?

Mr. OVERSTREET. I make this statement in deference to the minority of the committee, which felt that it should have ample time to present its case.

Mr. HOPKINS. I think the gentleman ought in justice to the House to say that he will take a vote not later than 5 o'clock.

Mr. BARTLETT of New York. Will the gentleman permit me to ask him a question?

Mr. OVERSTREET. I will.

Mr. BARTLETT of New York. Is there any doubt as to the result without reference to argument? Why not vote at once? Why have any argument on either side?

Mr. OVERSTREET. I think that is a question hardly worthy an answer.

Mr. DOCKERY. The gentleman from Indiana ought to control this matter.

Mr. HULICK. I would like to ask the gentleman a question.

The SPEAKER pro tempore. Does the gentleman from Indiana yield to the gentleman from Ohio?

Mr. OVERSTREET. I do.

Mr. HULICK. The question I desire to ask is, whether you have left the impression on the minds of so many members that no vote would be taken to-day that it would affect the result in this case? Upon your suggestion that there would not be a vote, have not members left the House; and if so, would it not be best to have your suggestion carried out?

Mr. OVERSTREET. My statement was made for the reason that the minority decided that they should have ample time in which to present their side of the case, and the hour was so late before calling up this case that I do not believe they can get through this afternoon.

Mr. DOCKERY. You make this suggestion in the interest of fair play?

Mr. PAYNE. The matter is entirely within the control of the gentleman from Indiana, and I do not see why further time should be wasted. We can not come to any agreement by unanimous consent.

Mr. OVERSTREET. Mr. Speaker, I will ask unanimous consent that the vote be taken upon this question the first thing after the reading of the Journal to-morrow morning, and that debate be closed at 5 o'clock.

The SPEAKER pro tempore. The gentleman from Indiana asks unanimous consent that the discussion of this case be closed at 5 o'clock, the vote to be taken immediately after the reading of the Journal to-morrow morning. Is there objection?

Mr. KEM. There is objection, Mr. Speaker.

Mr. OVERSTREET. Mr. Speaker, before proceeding I will state that at 5 o'clock I shall move the previous question upon this question.

Mr. Speaker, this case comes from the First Congressional district of South Carolina. The experience of the House a few days ago satisfied us of the peculiar political conditions existent in that State. The question that is brought up this morning for your consideration comes from the same section of the State of South Carolina from which the case of Johnston *vs.* Stokes hailed. I shall not for that reason enter into a detailed statement of the peculiar political conditions existing in that State. The same election law prevails in this district that prevailed in the former. One change only do I care to note, and that is concerning the registration law. The law that by the report in the Johnston and Stokes case was declared unconstitutional is not the registration law that pertains to the city of Charleston, which is located in the First South Carolina district.

A registration law was passed in December, 1890, applying to the city of Charleston only, so that in the remaining portion of the First Congressional district of South Carolina the registration law that we the other day declared to be unconstitutional was in force, while the new registration law, enacted in 1890, was in force in the city of Charleston, which is in this district. The First South Carolina district is situated on the eastern coast of the State and its eastern border coincides with the coast line of the State, with the exception of Horry County, located in the extreme northeast corner of the State.

As I stated in the discussion in the Johnston-Stokes case, in 1893, immediately preceding the election of 1894, an apportionment law was passed which fixed a new boundary for the Seventh Congressional district and also for the First. It was only a regrouping or reorganization of the same counties and parts of counties that prevailed under the old apportionment law, excepting a small portion of Colleton County, which went into the Second district; so that whatever conditions existed prior to the passage of that apportionment law of 1893 existed after its enactment, except so far as the registration law pertaining to the city of Charleston is concerned.

The irregularities that prevailed at this election outside of the city of Charleston will not be considered in this discussion, for the reason that in the judgment of the committee a sufficient ground exists in the vote in the city of Charleston upon which to base the action that we recommend. At some of the precincts in these outer counties no polls had been opened for several years, and none were opened at this election at three or four of the precincts. It is a notorious fact that the precincts at which polls were not opened in 1894 contain a large Republican majority.

I mention one only, that of Haut Gap, in Berkeley County, because there the voters, having discovered the failure of the managers to open the poll regularly, organized a board of their own, improvised managers, and conducted the election in the same detailed manner that the law prescribed, the only difference being that the managers who conducted the election at Haut Gap were not the managers regularly appointed for that purpose. Two hundred and seventeen votes were cast at that precinct for the contestant, Mr. Murray, and the entire committee counts those 217 votes. There is no difference between us and the minority concerning that finding. In the other precincts where polls were not opened and votes were not received the evidence, in our judgment, is not sufficient to warrant us in counting the votes that were sought to be counted there, and the entire committee agree that no consideration should be given them.

Permit me to say, Mr. Speaker, that the allegations concerning all the precincts foreign to the city of Charleston show a demoralized condition politically, where the lack of proper operation of the registry laws evidently deprived a large number of colored men of the opportunity of casting their votes. But while it appears that a large number of voters were at the polls, the evidence, in our judgment, is not sufficient to count all of the votes that were there present. There is some ground upon which to count a portion of those votes, but it would only tend to increase the plurality of the contestant, and for the sake of saving time and to expedite the determination of the case we do not discuss those votes.

Let me say at this point that the mere fact of a large number of voters being present at a poll might show some doubt to exist as to whether the majority had had a proper expression of their vote if those votes are not counted, but where the voters are of a given class, like the colored voters in that district, and where all the evidence tends to show that they are members of one party, namely, the Republican party, no doubt exists; because had they been permitted to vote and had those votes been counted by the committee it would simply have tended to increase the plurality of the contestant. For these reasons we pass from the consideration of these counties and precincts not within the city of Charleston, and I shall direct my argument entirely to that locality.

The registration law of 1882, which was in force up to December, 1890, was discussed here in the case of Johnston *vs.* Stokes. The hindrances imposed upon the voters, the delays occasioned by the supervisors, the lack of proper administration of the law are all facts with which you are now familiar, so it is clear that the conduct of the supervisors of election in the First South Carolina district, in undertaking to operate under the registration law of 1882, denied the right of registration to all who had failed to ask for it in 1882, unless they became of age subsequent to that time, or unless they moved into the State subsequent to that date.

When the law of 1890 went into effect as to the city of Charleston it did not change the details, it did not change the minutiæ of the registration office. It changed only the names of the supervisors, and instead of one provided for three supervisors, the clerk of the board being also required to sign the certificate. The same rules governed the new registration in Charleston that controlled under the first registration law. The same interpretation was given the new law that had obtained under the old law, and when they came to organize the registration board in 1890 they held that no one was entitled to a certificate unless he had been registered under the law of 1882, conditioned only upon his having become of age subsequent to that time. Furthermore, by the notice for the issuing of the registration certificates, that new board under the law of 1890 announced that none would receive certificates except such as would surrender their old certificates or would prove their lack of ability to produce those old certificates.

Mr. JONES. I understand the gentleman to say that although there was a new registration in Charleston the new board of three commissioners held they could register no person unless he was entitled to registration under the law of 1882.

Mr. OVERSTREET. I most certainly said that.

Mr. JONES. Well, I should be glad if the gentleman would point out a particle of testimony in the record which shows that

Mr. OVERSTREET. I will do so. I have said that the new registration board under the law of 1890 held that no one was entitled to a certificate in the city of Charleston unless he had a certificate under the law of 1882 or had come of age since that time.

Mr. JONES. I should be glad if the gentleman would show the evidence that they held any such thing.

Mr. OVERSTREET. The notice which was published by this board of supervisors in the daily prints of the city of Charleston announced the purpose for which they would meet and under what conditions they would issue certificates. Having announced that at a certain time and at a particular place they would be prepared to issue certificates, they say this—and I quote from the notice:

For the purpose of calling in and canceling all registration tickets—

Mr. JONES. Is that in the record?

Mr. OVERSTREET. It is the notice issued by the board of supervisors. Does the gentleman deny that it is the notice?

Mr. JONES. I do not know what the gentleman is reading from.

Mr. OVERSTREET. I am reading from the notice of the supervisors of registration of the city of Charleston, published in the Charleston News and Courier March 3, 1891.

Mr. JONES. Is that in the record?

Mr. OVERSTREET. What difference does it make? It is the published notice.

Mr. JONES. If not in the record, it is no part of the case. I never heard of it before.

Mr. OVERSTREET. I will pay attention to this part of the argument:

For the purpose of calling in and canceling all registration tickets in the name of the electors residing in the precincts and issuing new certificates in lieu thereof; and for the further purpose of registering and issuing certificates to all electors in the said precincts who have become entitled to such since the closing of the books of registration in July, 1890, those electors of the wards who have lost their certificates, and desire to make proof of such loss, can obtain new certificates and will be herewith notified of the day fixed for them to make such applications.

This notice was signed by the registration commissioners—George W. Williams, Bernard O'Neill, and Jacob Small.

In the evidence of J. N. Robson, on page 380 of the record, this question and answer are found:

What persons were allowedto register by the commissioners?

Referring to this registration.

A. Those that brought their old certificates. We took them in and gave them a new one.

This man was the clerk of the board of registration. When that law first went into effect, acting under the old registration law, one supervisor was in charge, and he continued to issue certificates over his own signature. I refer to the supervisor by the name of Cantwell. Mr. Cantwell pursued that course for a time. Injunction proceedings were brought against him. The books were subsequently taken from him. He undertook to issue certificates under the law of 1890, and did issue a large number of them. Not a certificate issued by Cantwell was admitted by the managers of any election precinct in the city of Charleston.

After the injunction proceedings had been determined, and the three commissioners whose names I have read from the notice were put in charge, they began to issue new certificates, and for a while all three of these supervisors subscribed their names to the certificates of registration. By and by, for some reason known only to them—possibly from negligence or carelessness—two of the members of the commission withheld their presence from the sittings of the board, and the certificates were signed by George W. Williams only, as deputy for all. I have no word of criticism to pass upon Mr. Williams. He possibly thought he was acting right. He signed those certificates as deputy for all. But not a certificate issued by Mr. Williams alone was received at a solitary precinct in the city of Charleston.

These supervisors of registration kept a clerk who aided them, doubtless, in the transaction of their business, and in order, perhaps, to give authenticity to their signatures, it was required that the name of the clerk should be added to the certificates. I have said that Robson was the clerk. But not a certificate bearing Robson's name was received at a precinct in the city of Charleston. Meyer was one of the clerks for a while, and Mr. Meyer signed certificates bearing the name of George W. Williams. Not a certificate signed by those two was received at a precinct in the city of Charleston.

I simply mention that to show how a new burden was put upon these voters at Charleston, in addition to the millstone that already hung from their necks under the operation of the infamous and unconstitutional law of 1882. Let me say that the constitutionality of the law of 1890 is not in question here; neither is that of 1882, because it is not raised by the pleadings. Possibly some may claim that the House of Representatives, being the sole judge of the election of its members, should take cognizance of an unconstitutional law, and having so found in the Johnston-Stokes case, should hold also in this case that the law is unconstitutional.

But we have not seen fit to raise that issue. I do not believe it makes a bit of difference in this case. If the law of 1882 was unconstitutional and there could be no evidence upon which to base an election, as shown by the returns, because of the unconstitutionality of that law, still I undertake to say that the election held at the little precinct of Haut Gap in Berkeley County, where the honest voters were deprived of their rights under the action of the managers who refused to serve, would be sufficient basis to find that an honest election was held in that district. And if all of the other precincts were rejected, and no election should obtain in any, because of the finding of the unconstitutionality of the law of 1882, and if the vote of Charleston was thrown out by reason of the misconduct that obtained in that city, still I insist, without fear of doing violence to any lawyer's opinion, that the election in the First Congressional district of the State of South Carolina, conveying the seat to Mr. Murray, the contestant, would be based on the vote at the Haut Gap precinct in Berkeley County alone, and on that vote all are agreed.

Not only did the supervisors of registration of Charleston make the mistakes that I have referred to, which are not contradicted, but possibly by virtue of other mistakes of law or by carelessness, or by other reasons which are unnecessary to mention, resulting in irregularity, the contestant was deprived of votes and rights to which he was clearly entitled under the law. These discrepancies, defects, and irregularities have been conceded in this case. And remember that the certificate held by the voter on the day of the election would not correspond with the number of the certificate that appeared on the books; hence his vote was rejected. Sometimes the ward or the precinct number would not correspond with that of the residence of the voter. Mark you, now, whenever a voter moved he was entitled to a renewal. But I challenge the inspection of the record, that anywhere can you find that a challenge of the voter was made because he had moved from the place where he resided at the time the certificate was issued in any instance where I have called your attention to the irregularity of the certificate.

The evidence shows that the number of the certificate did not correspond to the number on the books; that the certificate did not call for the residence of the voter, nor that the man did not live where he said he lived when he asked for the certificate; but that the certificate itself did not correspond with the residence. I submit that whenever a voter lived at a certain place at the time he obtained his registration certificate, and an effort is made to keep him from voting because of the change of residence, the evidence must show that there was a change of residence and not that there was a discrepancy between the certificate and the place of residence.

Sometimes the certificate would not contain the name of the township, because you will understand that it is customary in printing such blanks that they print the registration certificates for the entire district; and under the law of 1882, which obtained in this district at that election, there were townships which constituted registration groups, or parishes, as they call them there; and so if they had a blank in Charleston calling for a township, and the certificate was issued for a certain precinct, and contained the names of the ward and the precinct, but not the name of the township, it was considered as an irregularity that would not permit the vote to be cast; and yet there is not a fair-minded man who would hold that that was an irregularity that was fatal to the certificate. Hence a large number of certificates issued by the proper board of supervisors of the election in Charleston had these irregularities borne on their face, and were therefore rejected when presented at the polls by the voter.

I stated, Mr. Speaker, in my argument in the Johnston-Stokes case, that there was nothing in the law of South Carolina that compelled the party in power to give representation on the board of elections to another party. The Democratic party in power there refused representation upon any of these boards in the First South Carolina Congressional district to the Republican party. An effort was made to obtain representation—an effort that, in my judgment, was based on the constitutional right of a party that is second, if not first, in the lead of votes in the district, to have that representation. That, I undertake to say, was their right; and yet I venture the assertion that there was not a solitary election board in the First South Carolina Congressional district except in the little precinct of Haut Gap that contained a Republican representative, excepting in the county of Georgetown, in which county there is no point raised as to the irregularity of the election.

Every member of the Democratic organization in that State, from the governor down to a usurping challenger at the polls, was a member of the Democratic party. They appointed the registration commissioners; they appointed the commissioners of election; they appointed the boards of election for the county; the

boards of election appointed the managers of election for the precincts, and the managers of elections appointed the clerks; and so, from top to bottom, every mother's son of them was a partisan of the Democratic party, following the same idea, which was to seat the contestee in this case. I submit that that principle is not contrary to the law of South Carolina; but I submit also that it is a right that they have to demand, and when it is refused on request, we have a right here to challenge the fairness of the election even though that action on their part might not be sufficient upon which to base the action of the House to seat the contestant.

But in addition to the regularly appointed members of the election board, there was a challenger at almost all of the precincts. Now, that challenger is unknown to the law of South Carolina.

It will not do, Mr. Speaker, for gentlemen to say that it is right to keep out fraudulent votes, that it is the duty of a party to exclude men from the polls who are not entitled to cast votes, and that a challenger is a peace officer for the sole purpose of expediting the election and guaranteeing its fairness; because these challengers possessed the information of the irregularities and defects that existed upon the registration certificates to which I have referred. There is the rub, on the challenger question. When an illiterate man came to the polling place—and nearly all these poor fellows were illiterate—bearing a defective certificate, the challenger knew before he came in that that defect existed in his certificate, and his vote was challenged. I undertake to say that there is not an instance in this record from beginning to end where a challenger challenged a vote, but what that vote was excluded.

Now, Mr. Speaker, the evidence shows, first, the irregularities of these supervisors themselves in the issuing of certificates that were not valid; second, that they issued certificates containing defects on their face; third, that the challenger, familiar with those defects, carried out the operation of that irregular conduct and challenged the vote and kept it from being recorded.

The evidence shows that every Monday in the month when the supervisors held their offices open for the issuing of certificates, colored men failed to obtain certificates, from various causes. I refer to the simple fact that the record contains the names of 25 witnesses who testified upon that point alone.

Now, I submit, Mr. Speaker, that because you can not seat this contestant upon the evidence of those 25 men alone, therefore it does not follow that he has no case. That is but one point in the case. These witnesses testified to the fact of their hindrances in obtaining certificates, to the fact of crowds of men at the registration offices, to the fact of their failure to obtain certificates—all pointing to one fact, namely, the misconduct or the irregularities of the action of the board of registration commissioners. So that when I refer to those witnesses it is not for the purpose of basing this case solely upon their evidence, but to say that they prove the second step in this argument, namely, that there were hindrances of the colored men to obtain certificates under the law of 1890.

So that, first, there was the misconduct of the board of registration commissioners because they issued invalid certificates, not enough of their number signing them; and, second, that they did not permit the colored voters of that city to register, as they had a right to register.

Now, Mr. Speaker, not only that. Not only does the challenger come upon the scene and carry out his part in the programme, but the board of managers at these precincts in the city of Charleston recognized the challenger as the authority upon that day, and in every instance where he pointed out a defect, regardless of what the defect was, they denied the voter the right to vote. Then these managers further failed, in many instances, to conform to the law that directs their part of the conduct of the election.

The law provided that before the opening of the poll, or immediately upon opening the poll, they should exhibit the interior of the ballot box, that they should count the vote in public, and not in private; but the record teems with evidence of the failure of these boards in the city of Charleston to exhibit the interior of the ballot box upon the opening of the polls, and the fact that they counted the vote in private instead of in public.

Couple these three things together, Mr. Speaker, the failure of the colored men to obtain certificates in the first instance, the fact that they received defective certificates in the second instance, the fact that the challenger stood like a stone wall between them and the ballot box in many instances, and to that add the misconduct, or irregular conduct, if nothing worse, of the board of managers, and you will have the conduct that permeates the entire election in the city of Charleston. The law is plain, that wherever you can show by circumstances that the irregular conduct of the board of election officers connected with the election tends to show a fraudulent intent, wherever they have interpreted the law wrongly, by reason of which interpretation voters are denied the right to vote, that is sufficient ground upon which to base the charge that the returns are properly and fully impeached.

I wish to call attention briefly to a little of this evidence, in order to show the character of it. I have said that 25 witnesses testified to the fact of the irregular conduct or the misconduct of the registration supervisors. I wish to quote from some of those witnesses to show you the manner in which these registration supervisors conducted their part in this election. I read from the evidence of Alexander McNeill, page 427 of the record:

Q. Give your name, age, and residence.
A. Alexander McNeill; aged 39 years; reside at No. 63 King street.
Q. State where you were on the 6th day of November last.
A. At Federal poll, Ward 5, precinct 2.
Q. At what time did you arrive and how long did you remain at that poll?
A. I got there between 3.30 and 4 o'clock and remained until the poll closed.
Q. Did you vote there that day?
A. No, sir; they would not allow me.
Q. Did you have a registration certificate?
A. Yes, sir.
Q. The registration certificate that you had, did you try to have it changed?
A. I did, every Monday in the month until they finished and closed the office.
Q. Did you see the supervisor at any of the times you went there?
A. Yes, sir; and when it came on late the police would drive us away.

Cross-examination:

Q. Why did you try to have your certificate changed?
A. Because I had moved from the place I lived when I got it.
Q. Then, when you tried to vote that day you were living at a different place from that upon your certificate?
A. Yes, sir.
Q. Was there four or five Mondays in the month that you tried to get your certificate?
A. Well, I don't know; I tried to get it as long as the office was opened.
Q. Did you go there as often as four times during the month?
A. I went there four days during the month and two times each day.
Q. Was the supervisor's office opened each time you went there?
A. Yes, sir; each time.
Q. Was the place crowded every time you went there?
A. No, not crowded; about a dozen people.

This man failed to obtain a certificate. Scipio Brown, page 409, says:

Q. Give your name, age, occupation, and residence.
A. Scipio Brown; aged 50; laborer; reside at No. 10 Smith street, Charleston, S. C.
Q. At what poll did you present yourself to vote on the 6th day of last November?
A. At Ward 6, precinct 1, the Federal poll, city of Charleston.
Q. Did you try to vote; and if so, for whom did you desire to vote?
A. Yes; and was registered. I desired to vote for George W. Murray.
Q. Did you have a registration certificate?
A. Yes, sir.
Q. Did you ever attempt to have that certificate changed?
A. Yes, sir; I went to the supervisor of registration twice to have it changed, but did not get to him but once. I presented my certificate, the one I have now, and told him I had moved and wanted to get a renewal of it. He simply said to me that he did not have time to do it. Both times I went to him it was on the regular registration days.

Edward Grant, page 409, testifies as follows:

Q. Give your name, age, and residence.
A. Edward Grant; aged 42; reside at 67 Drake street, city of Charleston.
Q. At what poll did you try to vote on the election day in last November?
A. At the Federal poll in Ward 9, precinct at the corner of America and Amherst.
Q. Did you have a registration certificate?
A. None since 1888.

And the gentleman from Virginia [Mr. JONES] thinks it is startling for me to announce that they did not issue certificates under the law of 1890 except where they had been issued under the law of 1882.

Mr. JONES. What is the name of the witness whose testimony you are quoting?

Mr. OVERSTREET. Edward Grant, page 409:

Q. How often have you tried to get a renewal?
A. Every time the office was opened for registration. The first time I went there he told me I could not get a renewal because I must have sold the original one I had—

Under the law of 1882, if they sold their registration certificates they were denied a renewal; but there was no such provision in the law of 1890—

The next time I went I remained there from 11:30 until the office closed at 2 o'clock. The policeman was there and drove us off. The next time I went he told me this was not my day—

Every dog has his day, but it seems that some of the colored voters of the First South Carolina district did not even have their day—

it was only opened to those who had moved, and become of age. They always had some excuse to turn me away, and never gave me a certificate.

James Carter, whose testimony appears on page 30, was asked:

Q. Was the registration officer fast or slow in his work of registering voters?
A. He was slow.
Q. How many lines—if there were more than one—of persons applying for registration certificates at the office at the time that you were there?
A. Two lines.
Q. State the character of those lines.
A. One was white, the other colored.
Q. Did those in the white line have any difficulty in getting registered?
A. No difficulty.

But again, the challenger, when he came to inspect the voter at the time he sought to deposit his vote, showed his familiarity with the defects that appear upon these registration certificates, and the Democratic managers, recognizing his authority, excluded the vote. I wish to read some samples of evidence concerning the

conduct of the challenger and the board of managers in some of these precincts. I read from Austern McFall, on page 407:

Q. State what you know of the general conduct of the managers during the progress of the election.

A. They had two bottles of liquor in there, and became very lively and noisy. Democratic voters were brought to the poll by one of the managers and allowed to vote. The tickets were given to the Democratic voters to vote by the managers inside of the booth.

Q. Did you hear any of the managers say anything concerning the election after the closing of the poll?

A. Yes; I heard O'Donald, who came out, saying that he didn't care a damn, he got $3, his meals, and all the rum he could drink, and that was a great deal more than we got. At one time during the day one of the policemen went into the booth and drank with the managers.

I think the statement true. O'Donald is not called by the contestee to dispute that statement.

There is the plain statement of this witness that during the whole day they were drinking, and their misconduct is stated plainly in words that you must accept as plain; and they were not called, or if called, did not dispute it. These managers consisted of Eaton and Brodie, and I forget the name of the other. Eaton and Brodie were called and testified in their testimony, as found on pages 209 and 301, respectively; and yet neither one of them denies the statement of McFall. This O'Donald was the challenger. The witness says he was a "manager"; but he is simply mistaken that far, and is not to be criticised for that misstatement, because his conduct as "challenger" was such as to give anybody the impression that he had a right equal to that of a "manager." O'Donald does not deny that statement, and yet he states he does not care anything about it. "He got his $3 a day and all the rum he could drink."

I call attention to the testimony of Duncan Frazer on page 461. He calls attention to the fact that a man by the name of Police went out and got liquor and brought it into the polling booths, where the managers drank it; yet Mr. Police is not called to deny that statement. He said that there was another man who knew of that, and that was Sammie Matthews. The evidence shows that he stated:

They were drinking all during the day. As fast as they emptied one flask they would go out and fill another one.

He was asked the question, "How many persons were inside the booth during the progress of the election, and who were they?" and he answered:

About fifteen or sixteen. I only know two of them, Frank Police and Sammie Matthews.

And yet neither Sammie Matthews nor Frank Police was called to dispute that statement. The contestee called a man named L. E. Williams to dispute all that this witness testified to as to the irregularity of the registration. He is the man who denied the statement of these 25 witnesses, and yet he is not a registration supervisor. It was George W. Williams. But they did not have the heart to put either Police or Sammie Matthews on the stand and deny the statement of misconduct of these managers. I wish to say, Mr. Speaker, that all the way through this evidence is to be found statements concerning the conduct of these managers equal to that from which I have read.

One more I desire to call attention to, and that is the evidence of Clark, on page 443 of the record. Clark testifies that he was at precinct 2 of the Seventh Ward, and he testified, as did this other witness, to the failure to exhibit in public the ballot box at the opening of the polls, and to the counting of the vote in private instead of in public. He testified that the election managers closed the poll, took the ballot box down into the basement of the building where the polls had been opened, and there counted the ballots privately. When he undertook to obtain an entrance he was refused. They said to him "they would see him later." In answer to the question:

At the closing of the poll, state what the managers did, if they did any thing.

He says:

They said the poll was closed. They took the box, brought it downstairs, carried it in the yard, and went into the basement and shut the door. I then asked could I come in. One of the managers replied, saying that "I'll see you later."

And he could not get in.

Now, Mr. Speaker, it is sought by the minority members of the committee to dispute that statement.

On page 33 of their report they undertake to say that this evidence is contradicted by the evidence of Churchhill, whose evidence is on page 328 of the record. And I quote from the minority report, which undertakes to quote Churchhill's evidence. He says, "The count was open, public, and above board, as going into the basement was impossible." It was very adroit, if not careless, on the part of the writer of this report to use the word "into" in this extract, and not follow the evidence of Churchhill.

I state, Mr. Speaker, that an examination of the record will not show that that was the statement of Churchhill, because he says, on page 328 of the record, "As going under the basement was impossible." There is quite a difference between the meaning of the word "into" and the meaning of the word "under." They undertook to set aside the evidence of a party who spoke of going into the basement by saying, not that they did not go into the basement, but that it was impossible to go under the basement. Nobody has contended that they did go under the basement.

Now, the evidence is that in that precinct there were two booths, one for the State poll and one for the Federal poll; and that they were held upon an open piazza, an open porch; that it was not exceeding 10 by 12 feet in size; and one of the witnesses testifies that when they came to count one board gave way, and that this board went into the basement.

Now, Mr. Speaker, I wish to call attention to the returns from these election precincts. The city of Charleston, as contended by the Charleston News and Courier on the day following the election, was a city of 65,000 people, with a voting population of at least 11,000, and yet the total vote for Congress in that city was only 3,208. It must be remembered that the return for Murray was only 397 in a county where the colored population exceeded the white population and the colored vote exceeded the white vote, while Elliott received 2,811. This First South Carolina district is the black district of the State. Nearly 22,000 more colored Republicans than white Democrats live in that district, yet Mr. Elliott was given 5,650 votes in the district and Murray only 3,913, leaving a plurality for the contestee of 1,737. In the city of Charleston the vote for Murray was 397 and for Elliott 2,811.

I ask the House to bear in mind also that other officers were voted for at this same election. The governor was to be voted for, and further than that, the greatest importance was attached to the vote on the constitutional convention to be held in South Carolina. The evidence shows, and it is undenied—it is a matter of history, known to every reader of the current events—that the question of a constitutional convention or no convention in South Carolina divided one race from the other. The colored vote was unanimous against the convention, and the Tillmanites, who supported Evans for governor, were in favor of a constitutional convention.

Now, I want to point out a few things that may open gentlemen's eyes in relation to the vote in the city of Charleston and largely explain the misconduct of the challengers, the supervisors, and the managers at the election in that city. I have said that Evans was the Democratic candidate for governor. He was the candidate who was entitled to the support, and who did receive the support throughout the State of the men who were in favor of holding the constitutional convention. Pope was the candidate opposing Evans and was in favor of no convention, though he was an independent candidate. The colored men, or Republicans, did not have any candidate for governor, but concentrated their vote against the constitutional convention, but wherever the colored Republicans supported any candidate for governor, they supported Pope.

At this election where Murray received only 397 votes and Elliott 2,811 in the city of Charleston, the total vote for governor was only 1,823—988 votes less than Elliott received there. The total vote on Congress in the city was 3,208, while the total vote on the question of the constitutional convention, both yea and nay, was only 2,176. In other words, Mr. Elliott was 988 votes stronger than all the candidates for governor, and 635 votes stronger than all the votes on the constitutional convention.

Now, Mr. Speaker, I submit that an analysis of these returns discloses the fact that the failure to expose the interior of the ballot boxes in the city of Charleston and the failure to make a public count explain in large measure the return for Elliott in that city. If Pope was supported by all the no-convention voters, then his vote ought to conform reasonably to that vote; but the return was—Pope 1,259, no-convention 1,707. But Murray was on that side of the house, too. He was for Pope, so far as his voters supported any candidate for governor, and he was against the convention, yet Pope received 1,259 votes and the no-convention party 1,707 votes, while poor Murray had only 397. Evans was the candidate for governor of the party that supported Elliott. Evans was the candidate for governor of the party that supported the constitutional convention. Evans received 564 votes. The vote for the convention was 469, so there was a reasonable conformity between the two votes. Elliott, who was on the same side as Evans, received 2,811 votes. You can not explain this difference save upon the theory that the men who were undertaking to deprive the colored voter of his registration right, who did not allow him to cast his vote because of irregularities in his certificate for which he was not responsible, that the challengers and managers who resorted to those methods did it in the interest of the Democratic candidate for Congress in that district.

There is another thing to be explained; that is, that the 2,811 votes returned for Elliott did not all happen to be alike. It seems that they have in that district a method of politics which gives them clubs, and when a man belongs to a club he is presumed to belong to a given party. But I call attention briefly to certain facts relating to certain precincts, where the evidence shows beyond doubt that certain voters were recorded who never cast their votes—another reason for the failure to expose the interior of the ballot boxes and to render a private count.

At some of these precincts, notably in the Seventh and Tenth wards, the names of voters appeared upon the poll lists who never voted. These voters whose names so appeared either came upon the witness stand and testified that they did not vote or witnesses testified that the persons whose names so appeared were either dead or absent.

There are not many of these names, but quite enough to expose the practice resorted to to swell the poll list.

The minority of the committee seeks to discredit the statement I have made in this report by alluding to the fact that we have said, what I still repeat, that in no instance where a voter went upon the stand and testified that he did not vote or that a certain other individual did not vote is anyone called to deny that statement; and they refer to the evidence of Craddick, who came upon the stand and testified that he had not voted. It is true that a Mr. Craddick went upon the stand and so testified; but, Mr. Speaker, there seems to have been two Craddicks in this precinct. This man to whom the gentleman from Virginia in his report has referred did go upon the stand and testify that he voted; but he did not deny that there was another Craddick in that same precinct. I want to call attention to a discrepancy in the evidence concerning this report, showing that the Craddick who says he did not vote was just as reliable a man and as much entitled to credit at the hands of the House as the Craddick who testifies that he did vote.

The SPEAKER pro tempore (Mr. HOPKINS). The time of the gentleman has expired.

Mr. MCCALL of Massachusetts. If I can be recognized I will yield to the gentleman.

The SPEAKER pro tempore. The gentleman from Massachusetts yields to the gentleman from Indiana [Mr. OVERSTREET].

Mr. OVERSTREET. Mr. Speaker, this man Craddick who testifies that he lived in that precinct, but did not vote, testified that he lived at a certain number on Jackson street. When the other Craddick is brought on the witness stand to disprove the statement that we have made, he was asked the question whether or not he lived on Gadsden street, and he said he did not. Then they go out and bring a man in who testified that he lived at 23 Gadsden street. Well, I do not care if half the population live at 23 Gadsden street. We have made no effort to prove that anybody lived there. The first Craddick testified that he lived at 23 Jackson street—not Gadsden street. Yet they have directed their attack upon some resident in Gadsden street.

Now, Mr. Speaker, I have but a few more statements to make. There is only one thing that can be brought up against the facts I have stated, and that is the effort to show that the colored vote of the First South Carolina district was divided upon this candidate. Some evidence is introduced in the record to show that a colored barbers' association adopted resolutions against the contestant, and that he was unpopular among the colored barbers. There is other evidence in the record, Mr. Speaker, to show that a large number of the barbers of that city supported this contestant. Perrin is a barber; Jameson, Dudman, and Johnson are barbers; yet they all testified that Mr. Murray received their support. The witness who testified that the barbers' association was against Mr. Murray admitted that he was in the employ of a white Democrat at a barber shop where they did not permit black men to enter.

Another colored man testified that he was connected with the State militia and that Murray was not the choice of all the colored men of that city. But the evidence shows that he is a suppliant for favors at the hands of the governor of that State. I submit, Mr. Speaker, you can not point to the evidence of a witness who undertakes to say that there was objection among the colored voters to Mr. Murray, unless the witness is some man who was associated with men who did not allow colored men around them, or else was a recipient of favors from the managers of the election and the officers of the State.

Mr. Speaker, this man was the choice of his party at the polls. It is notorious, as was admitted by the opposition in the Johnston-Stokes case recently, that colored voters of that State generally and practically are members of the Republican party. This contestant was not a stranger in their midst. He had held the position of member of Congress before. He had been the accepted nominee in two campaigns. What was there connected with him to alienate the colored vote?

Mr. Speaker, this city of Charleston is located upon an historic spot. It is the birthplace of secession and treason. It was within the confines of Charleston that the first gun directed against the flag of this Union belched rebellion from its treasonous throat. Many of the colored men of that city and district who are now alive heard the report of that gun, whose echo resounded around the world. The memory of that day when the men who had sought to deprive them of their right of suffrage inaugurated a war against the Union for the purpose of holding them in bondage is still fresh. This man not only was one of them, but he had been associated with them; he was one of their own color; and yet forsooth, because Mr. Elliott seeks recognition in this House by the votes of the city of Charleston, they must necessarily prove that there was a division among the colored voters of that State. The records of this House show that in three Congresses Mr. Elliott has been a contestee, and in each instance an effort has been made to show a division among the colored voters of the district. I undertake to say that the evidence showing the conduct of the nominating convention which placed Mr. Murray before the people, showing the fact that his opponents in that convention gave him support in the canvass and at the polls, showing the fact that these colored men were out in force on that day, disproves the allegation that there was any difference of opinion among the colored voters.

Mr. Speaker, the morning after this election the News and Courier of Charleston made this statement, speaking of the election in the city of Charleston:

> The day was devoid of any incident of a startling nature. A striking feature of the election was the presence at many polls of groups of colored voters, a sight that has not been seen here in many years, and which recalled to many of the old voters the days of Bowen and MacKay and the Hunkidori.

Ah, Mr. Speaker, it was in the days of the "Hunkidori," from 1876 to 1880, when the colored people undertook to exercise the right of suffrage, that the efforts were inaugurated by their opponents to deprive them of that right. And yet the organ of that very party on the day after this election says that the conduct of the colored men recalled to many of the old voters the days of the Hunkidori. Was there a difference of opinion amongst the colored voters then? Could it be possible that Mr. Elliott's vote could be accounted for in that way? Why were these colored men there? It is stated in the record in many places that they were there in the interest of their candidate, the contestant in this case.

The returns of the election show, Mr. Speaker, that the total vote in the city of Charleston gives to Mr. Murray but 4 per cent of the entire colored vote in the city, while it gives to Mr. Elliott 43 per cent of the white vote alone. The city of Charleston contains 1,945 more colored voters than white voters; and yet the returns for Mr. Elliott are 2811 and Mr. Murray but 397, which was in the ratio of 10 to 1.

It is a fallacy to assert in view of the fact of the overwhelmingly majority—the colored majority—the overwhelming interest in Mr. Murray and in the election that it was possible for Mr. Elliott to have received that number, 2811, and Mr. Murray only 397.

Mr. Speaker, it is the opinion of the committee, ratified by the majority of the members, that in the city of Charleston all of the precincts should be thrown out excepting precinct 1, in ward 2; precincts 1 and 2, in ward 6; and precinct 1, in ward No. 10. The law on this subject is clear and explicit. I quote from McCrary on Elections. In speaking of the subject of the incompetency, the inefficiency, or reckless disregard of essential requirements of the law, on the part of officers conducting an election, so that their acts become unreliable and of necessity work the same result as actual fraud, this writer says:

> No doubt this is so, for it may be regarded as a fundamental principle of the law of elections that whatever renders the returns or certificates of election officers unreliable, or which, in other words, destroys their value as evidence, is sufficient to set them aside, and to make it necessary to prove the fairness and legality of the election by other evidence.

And I quote again from section 483:

> To set aside the return of an election is one thing; to set aside the election is another and very different thing. The return from a given precinct being set aside, the duty still remains to let the election stand and to ascertain from other evidence the true state of the vote. The return is only to be set aside, as we have seen, when it is so tainted with fraud or with the misconduct of the election officers that the truth can not be deduced from it. The election is only to be set aside when it is impossible from any evidence within reach to ascertain the true result, when neither from the return nor from other proof nor from all together can the truth be determined. It is important to keep this distinction in mind.

I submit that when we have rejected the precincts in Charleston that I have mentioned, for the reasons given, other evidence is to be found in the remaining parts of the district to insure the contestant his right to the seat. By adding to the remaining vote for Mr. Murray the 217 votes from Haupt Gap, and leaving the Charleston precincts out, it gives the aggregate vote for Mr. Murray as 3,866 and Mr. Elliott 3,432, leaving Murray a plurality of 434 votes. I submit, sir, that the findings of this committee, under the evidence and law that I have outlined, should be recognized by the House by giving this colored man the seat to which he was fairly and clearly elected. [Applause.]

I reserve the remainder of my time.

[Mr. JONES addressed the House. See Appendix.]

ENROLLED BILLS SIGNED.

Mr. HAGER, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles; when the Speaker signed the same:

A bill (S. 1342) granting a pension to Lena D. Smith;

A bill (H. R. 8109) making appropriations for fortifications and other works of defense, for the armament thereof, for the procurement of heavy ordnance for trial and service, and for other purposes;

A bill (H. R. 6221) granting an increase of pension to Mary E. Chamberlin;

A bill (H. R. 6994) relating to the sale of gas in the District of Columbia;

A bill (H. R. 3582) to remove the charge of desertion now standing against Henry W. Bailey; and

A bill (H. R. 5946) granting an increase of pension to Abraham H. Parker.

WITHDRAWAL OF PAPERS.

Mr. QUIGG, by unanimous consent, obtained leave to withdraw from the files, without leaving copies, papers in the case of William H. Sloan (Forty-sixth Congress), no adverse report having been made.

LEAVE OF ABSENCE.

The following requests for leave of absence were submitted:

By Mr. CURTIS of Iowa, for three days, on account of important business.

By Mr. SMITH of Michigan, for one week, on account of important business.

By Mr. LORIMER, for five days, on account of important business.

By Mr. SPENCER, for ten days, on account of important business.

By Mr. CROWLEY, for ten days, on account of important business.

By Mr. CATRON, for ten days, on account of important business.

By Mr. COLSON, indefinitely, on account of important business.

By Mr. BARHAM, indefinitely, on account of sickness.

By Mr. MCLAURIN, indefinitely, on account of sickness in his family.

By Mr. WILLIAMS, for the rest of this day, on account of sickness.

By Mr. MAHON, for four days, on account of sickness in his family.

Mr. DINGLEY. I must object to all these requests for leave of absence except those which are asked on account of sickness of the member or of some of his family.

The SPEAKER. Without objection, the requests made on account of sickness will be considered as granted.

There was no objection.

CHANGE OF REFERENCE.

By unanimous consent, the Committee on Claims was discharged from the further consideration of the bill (S. 2540) to provide compensation for a bridge and for buildings and other improvements constructed by certain persons upon public lands afterwards set apart and reserved as the Yellowstone National Park; and the same was referred to the Committee on the Public Lands.

WATER-MAIN ASSESSMENTS—RETURN OF BILL FROM PRESIDENT.

The SPEAKER laid before the House the following message from the President of the United States; which was read, and, with the accompanying bill, was referred to the Committee on the District of Columbia:

To the House of Representatives:

In compliance with a resolution of the House of Representatives of the 2d instant (the Senate concurring) I return herewith the bill (H. R. 3279) entitled "An act to authorize the reassessment of water-main taxes or assessments in the District of Columbia, and for other purposes."

GROVER CLEVELAND.

EXECUTIVE MANSION, *June 3, 1896.*

CONTESTED ELECTION—MURRAY VS. ELLIOTT.

Mr. OVERSTREET. Mr. Speaker, I shall detain the House but very briefly, for the purpose of closing the debate this afternoon, by calling attention to one or two remarks which the gentleman from Virginia [Mr. JONES] has made in the course of his argument.

I stated when I was on the floor before that 25 witnesses testified concerning the impediment to registration and the irregularities, as shown by the registration supervisors in the city of Charleston, S. C. I anticipated the gentleman's argument, who seeks to impress the House with the idea that upon this evidence alone depends the action in this case.

I stated then, as I state now, that their evidence was directed to but one point, and that the evidence was but one class of evidence upon which we relied. All of the evidence concerning the action of the supervisors themselves, in issuing not fraudulent but absolutely worthless certificates, was not testified to by any of these 25 men. The supervisors of registration undertook honestly, possibly, to conform to the law, but erroneously issued worthless certificates, which were refused by the managers of the election when they were presented by the voters at the polls, and hence the holders of them lost the privilege of voting.

He has by some form of mathematics undertaken to demonstrate to the House by a calculation the number of registered colored voters in the city of Charleston, S. C., and ascertained that it was about 4,000, by enumerating the highest registration certificate offered at something over 11,000, and subtracting therefrom the entire Democratic vote of the city. Now, in answer to that I call your attention to the evidence of Henry Smalls, which is found on page 413 of the record, who offered a certificate signed by the full board of supervisors under date of March 31, 1891, and bearing the certificate number 15217.

I have already said, sir, that under the operation of that law of 1890 the supervisors of registration who issued the certificates issued them to none save those who had the certificates under the law of 1882; and that they issued the certificates under the law of 1890, conforming their numbers to the certificates formerly issued under the law of 1882. I call your attention also to the evidence of Scipio E. Dentzler, found on page 418 of the record, who presented a certificate signed by the entire board of registration officers and bearing the certificate number 11213, and dated the 24th of March, 1891. These two instances exemplify all of the evidence that is necessary to present at this time to disprove the allegation the gentleman from Virginia made concerning the number of registered colored voters in the city of Charleston. His calculation was made upon a basis that did not exist.

When you read the evidence not only of the 25 witnesses referred to concerning the action of the registration officers, the irregularity in the certificates, of the failure to permit them to obtain certificates, and when you study the evidence of the worthless certificates issued by the three different boards of supervisors, and the evidence of challengers and the boards of managers concerning their misconduct, the entire conduct of all the election officers, from the supervisors to the challengers, goes to make up a conspiracy under the law which was established by unimpeachable testimony.

He would have you believe that a spirit of pure sentiment is the basis of the action proposed here in the report of the committee. I repudiate the assertion absolutely. I believe I have been approached by lobbyists as much as any member on the floor, and I undertake to say that no man has ever approached me concerning this case until after the report was submitted to the House, and if the gentleman from Virginia undertakes to stigmatize the colored people of this district by saying they petition to seat a representative of that race upon the floor without a proper right to the seat, he does it without evidence. They have the right, as the contestant has, to urge a consideration of the case when it is placed on the Calendar. It is true, sir, that he, with other contestants in this House, has sought hearings at the hands of the House after the cases were submitted and passed beyond the scope of the committee and onto the Calendar; but when the gentleman from Virginia undertakes to say that this action is based upon sentiment alone he is simply begging the question.

The gentleman from Virginia has brought into view the record as made up in the contested-election case of Johnston *vs.* Stokes. I made no illusion to that, save and except to show the relation between the two districts under the one apportionment.

Mr. JONES. I will say to the gentleman that his colleague from Indiana [Mr. HARDY] asked about that.

Mr. OVERSTREET. I certainly did not bring it up.

Mr. JONES. Your colleague from Indiana asked about it. I did not bring it in.

Mr. OVERSTREET. Permit me to say, in reply to his charge that I had stultified the statements of men on this floor, that not a Republican on this floor changed his position upon the vote in the case of Johnston *vs.* Stokes, save the men who signed the original committee report. The vote of every other gentleman was consistent, and while I failed in my effort to seat the contestant, it was not because members of my own party had changed their positions, but because the Democratic members of this House, driven either to accept the situation as I had outlined and urged it or do as they did, were forced from their position, voted against the members of their own party, and repudiated the report of their own members and voted solidly against the position they had first taken.

Now, Mr. Speaker, the record of every Democratic national convention recites something to which their party can point with pride; but in the wreck of industries in this country, in the humiliation of the administration of the foreign office under the present Democratic rule, in the records of their own party, split from one end to the other upon the currency question, they will have little to which to point with pride except that in the Fifty-fourth Congress, having abandoned the position they first assumed in the Johnston-Stokes case, they declared as one man that there was not a valid election in the Seventh Congressional district of South Carolina. I would urge them, as one other spasm of virtue, that in this case, which teems with justice and equity, they turn from the same men whose report they repudiated in the case of Johnston *vs.* Stokes and vote to seat this contestant, Mr. Murray.

Mr. Speaker, it being evident that no quorum is present, I desire to give notice that immediately after the reading of the Journal to-morrow I shall move the previous question on this case. [Applause.]

Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to.

Accordingly (at 5 o'clock and 54 minutes p. m.), the House adjourned until to-morrow at 11 o'clock a. m.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several Calendars therein named, as follows:

Mr. CONNOLLY, from the Committee on the Judiciary, to which was referred the joint resolution of the House (H. Res. 190) to facilitate the reorganization of the Northern Pacific Railroad Company; to secure to actual settlers the right to purchase at a price not exceeding $2.50 per acre the agricultural lands within its grant, and to prohibit said company or any successor company from giving by consolidation, sale, or other corporate action control of its railroad to any corporation, company, person, or association of persons owning, operating, or controlling a parallel or competing railroad, reported the same with amendment, accompanied by a report (No. 2181); which said bill and report were referred to the House Calendar.

Mr. GIBSON, from the Committee on War Claims, to which was referred House bill No. 1247, reported in lieu thereof a bill (H. R. 9324) to provide for the adjudication and payment of damages sustained by citizens of the United States in the State of Kansas by the invasion of Confederate troops, bands of guerrillas, and marauders during the late war of the rebellion, accompanied by a report (No. 2182); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. QUIGG, from the Committee on the Library, to which was referred the bill of the House (H. R. 882) for the erection of an equestrian statue of Maj. Gen. John Stark in the city of Manchester, N. H., reported the same without amendment, accompanied by a report (No. 2183); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

He also, from the same committee, to which was referred the joint resolution of the Senate (S. R. 135) providing for the appointment of a commission to report upon the practicability of establishing near Washington, D. C., a ground map of the United States, reported the same without amendment, accompanied by a report (No. 2184); which said bill and report were referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

By Mr. SHAFROTH, from the Committee on the Public Lands: The bill (H. R. 3222) for the relief of James H. Wimpey, of McDonald County, Mo., authorizing him or his legal representatives to select 160 acres of unoccupied and unappropriated land of the United States (not mineral), and subject to homestead entry, and directing the issue of scrip therefor, in legal subdivisions. (Report No. 2168.)

By Mr. PUGH, from the Committee on War Claims: The bill (H. R. 3767) for the relief of Joel A. King. (Report No. 2169.)

By Mr. FENTON, from the Committee on Military Affairs: The bill (H. R. 5090) to correct and amend the military record of Capt. Alexander McDonald, of Company I, Seventeenth Wisconsin Volunteer Infantry. (Report No. 2170.)

By Mr. MARSH, from the Committee on Military Affairs: The bill (H. R. 9063) to relieve James M. Wilson, late private Company C, First Mississippi Marine Brigade, from the charge of desertion. (Report No. 2171.)

By Mr. ANDREWS, from the Committee on Invalid Pensions: The bill (H. R. 5307) granting a pension to Anna M. Sweet, of Newport, Ky. (Report No. 2172.)

The bill (H. R. 6671) for the relief of Charles A. Nazro. (Report No. 2173.)

By Mr. CROWTHER, from the Committee on Invalid Pensions: The bill (H. R. 6757) granting a pension to Andrew J. Molder. (Report No. 2174.)

The bill (H. R. 6231) to restore Jonathan Hess to the pension roll and pay him $12 per month. (Report No. 2186.)

By Mr. KIRKPATRICK, from the Committee on Invalid Pensions:

The bill (H. R. 6965) granting a pension to T. B. Limbocker. (Report No. 2175.)

The bill (H. R. 4518) granting an increase of pension to Joseph Thompson. (Report No. 2176.)

The bill (H. R. 7884) granting a pension to Isaac N. Cisson. (Report No. 2177.)

The bill (H. R. 8756) granting a pension to C. A. Howke. (Report No. 2178.)

The bill (H. R. 6967) granting a pension to William T. Buckner. (Report No. 2179.)

By Mr. WOOD, from the Committee on Invalid Pensions: The bill (H. R. 1946) to increase the pension of Harrison Kilburn, Company H, Thirty-eighth Illinois Volunteer Infantry. (Report No. 2180.)

By Mr. BAKER of Kansas, from the Committee on Invalid Pensions: The bill (H. R. 2235) to pension John F. Foster. (Report No. 2185.)

By Mr. SULLOWAY, from the Committee on Invalid Pensions: The bill (H. R. 3658) granting an increase of pension to Woodbury Day, alias John White. (Report No. 2187.)

The bill (H. R. 4648) granting a pension to Cyrus S. Bailey. (Report No. 2188.)

PUBLIC BILLS, MEMORIALS, AND RESOLUTIONS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials of the following titles were introduced and severally referred as follows:

By Mr. PAYNE: A bill (H. R. 9321) to provide for repairing damages to the trees, foliage, and planting of the United States Capitol Grounds made necessary by recent violent storms—to the Committee on Appropriations.

By Mr. SHAFROTH: A bill (H. R. 9322) concerning the election of Representatives to Congress—to the Committee on Election of President, Vice-President, and Representatives in Congress.

By Mr. BABCOCK: A bill (H. R. 9323) to amend the provision of the act of February 25, 1885, creating the policemen's fund—to the Committee on the District of Columbia.

By Mr. ALDRICH of Illinois: A joint resolution (H. Res. 195) to pay officers and employees of the Senate and House of Representatives on the day following adjournment—to the Committee on Accounts.

By Mr. SHAFROTH: A joint resolution (H. R. 1867) proposing an amendment to the Constitution of the United States.

By Mr. PHILLIPS: A resolution (House Res. No. 403) authorizing the Committee on Labor to have printed such arguments, briefs, etc., as have been or may be submitted to its consideration relative to bills pending before it—to the Committee on Printing.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Invalid Pensions was discharged from the consideration of the bill (H. R. 9306) granting a pension to Amanda Woodcock; and the same was referred to the Committee on Pensions.

PRIVATE BILLS, ETC.

Under clause 1 of Rule XXII, private bills of the following titles were presented and referred as follows:

By Mr. ARNOLD of Pennsylvania: A bill (H. R. 9325) to correct the military record of W. J. Miller—to the Committee on Military Affairs.

By Mr. BURRELL: A bill (H. R. 9326) to grant a pension to James Chapman—to the Committee on Invalid Pensions.

By Mr. FENTON: A bill (H. R. 9327) to correct the military record of Charles K. Dawson—to the Committee on Military Affairs.

By Mr. HERMANN: A bill (H. R. 9328) to increase the pension of Charles T. Blumenrother—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9329) to pension Isaac Grier for services in Oregon Indian wars—to the Committee on Pensions.

Also, a bill (H. R. 9330) for the relief of B. H. Cammann—to the Committee on Claims.

Also, a bill (H. R. 9331) to increase the pension of Louis Alexander Dunlop, alias Alexander Dunlop—to the Committee on Invalid Pensions.

By Mr. KULP: A bill (H. R. 9332) granting a pension to Isaac Kobel—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9333) granting a pension to Michael O'Brien—to the Committee on Invalid Pensions.

By Mr. SKINNER: A bill (H. R. 9334) granting a pension to Dorcus F. Murphy, widow of Rufus D. K. Murphy—to the Committee on Invalid Pensions.

By Mr. TRELOAR: A bill (H. R. 9335) granting a pension to William A. Benton—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9336) granting an increase of pension to Jefferson A. Mayhall—to the Committee on Invalid Pensions.

By Mr. WOOD: A bill (H. R. 9337) granting an increase of pension to Mazie V. Sullivan—to the Committee on Invalid Pensions.

By Mr. MILLIKEN: A bill (H. R. 9338) to remove the charge of desertion against Charles Abbott—to the Committee on Military Affairs.

By Mr. GRAFF: A bill (H. R. 9339) to remove the charge of desertion from the military record of Robert White—to the Committee on Military Affairs.

Also, a bill (H. R. 9340) to remove the charge of desertion from the military record of Joseph Moll—to the Committee on Military Affairs.

Also, a bill (H. R. 9341) granting a pension to Lemuel Shook—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9342) granting a pension to Elizabeth Tinksham—to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, the following petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. BARRETT: Resolutions of the Board of Trade of Revere, Mass., protesting against the adoption of the so-called Pasco amendment to the Post-Office appropriation bill—to the Committee on the Post-Office and Post-Roads.

By Mr. FARIS: Paper to accompany House bill No. 4723, relating to the claim of George W. Higer—to the Committee on Invalid Pensions.

By Mr. STEWART of Wisconsin: Resolution of the Superior Commercial Club, relative to the Maritime Canal of North America—to the Committee on Railways and Canals.

SENATE.

THURSDAY, *June 4, 1896.*

The Senate met at 11 o'clock a. m.

NAMING A PRESIDING OFFICER.

Mr. PLATT called the Senate to order, and the Chief Clerk, Mr. JOHN S. MCEWAN, read the following letter:

JUNE 3, 1896.

To the Senate:

In the absence of the Vice-President and President pro tempore of the Senate, by authority of Rule I, I hereby name O. H. PLATT, Senator from Connecticut, to perform the duties of the Chair during the 4th day of June, 1896.

WM. P. FRYE,
President pro tempore.

Thereupon Mr. PLATT took the chair as Presiding Officer for to-day.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on motion of Mr. WALTHALL, and by unanimous consent, the further reading was dispensed with.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, returned to the Senate, in compliance with its request, the bill (S. 1420) granting an increase of pension to Elizabeth W. Sutherland.

ENROLLED BILLS SIGNED.

The signature of the Vice-President was announced to the following enrolled bills; which had previously been signed by the Speaker of the House of Representatives:

A bill (S. 1342) granting a pension to Lena D. Smith;

A bill (H. R. 3582) to remove the charge of desertion now standing against Henry H. Bailey;

A bill (H. R. 5946) granting an increase of pension to Abraham H. Parker;

A bill (H. R. 6221) granting an increase of pension to Mary E. Chamberlin;

A bill (H. R. 6994) relating to the sale of gas in the District of Columbia; and

A bill (H. R. 8109) making appropriations for fortifications and other works of defense, for the armament thereof, for the procurement of heavy ordnance for trial and service, and for other purposes.

DEFICIENCY APPROPRIATION BILL.

Mr. HALE. I ask the Chair to lay before the Senate the action of the House of Representatives on the deficiency appropriation bill.

The PRESIDING OFFICER laid before the Senate the message of the House of Representatives announcing its agreement to the amendments of the Senate numbered 27, 207, and 208, with certain amendments, to the bill (H. R. 8293) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1896, and for prior years, and for other purposes; and its further disagreement to the amendments numbered 14, 24, 25, 30, 31, 37, 74, 79, 80, 81, 82, 83, 103, 104, 105, 106, 122, 137, 147, 148, 190, 192, and 200 to the bill.

Mr. HALE. I move that the Senate disagree to the amendments of the House to certain Senate amendments and also insist further upon its own amendments, and request a further conference with the House on the disagreeing votes of the two Houses.

The motion was agreed to.

By unanimous consent, the Presiding Officer was authorized to appoint the conferees on the part of the Senate; and Mr. HALE, Mr. ALLISON, and Mr. COCKRELL were appointed.

PETITIONS AND MEMORIALS.

The PRESIDING OFFICER presented a petition of General Assembly, Order of the Knights of Labor, of Washington, D. C., praying for the passage of the so-called Phillips bill, providing for the appointment of a nonpartisan commission to collate information and to consider and recommend legislation to meet the problems presented by labor, agriculture, and capital; which was ordered to lie on the table.

Mr. PEFFER presented the petition of James Seldon Cowdon and 100 other citizens of the United States, praying for the passage of Senate bill No. 3246, to promote aerial navigation for military purposes; which was referred to the Committee on Military Affairs.

Mr. CHANDLER presented the petition of Rev. Albert E. Hall and 17 other citizens of Canterbury, N. H.; the petition of E. S. Coller and 118 other citizens of East Rochester, N. H., and the petition of Deacon J. D. Martin and 38 other citizens of Piermont, N. H., praying for the passage of Senate resolution No. 28, proposing an amendment to the Constitution of the United States acknowledging Almighty God as the source of all power and authority in civil government, etc.; which were referred to the Committee on the Judiciary.

Mr. LODGE presented a petition of the Old South Methodist Episcopal Church, of Reading, Mass., praying for the enactment of a Sunday-rest law in the District of Columbia; which was referred to the Committee on the District of Columbia.

REPORTS OF COMMITTEES.

Mr. GALLINGER. I am directed by the Committee on Pensions, to whom was referred the bill (H. R. 1892) granting a pension to Catharine Darragh, to report it favorably without amendment and submit a report thereon. In behalf of the Senator from Pennsylvania [Mr. QUAY], who is greatly interested in the bill, I ask that it be now considered. It will take but a moment.

Mr. BATE. I object to the consideration of the bill until the morning business is over.

The PRESIDING OFFICER. Objection to the consideration of the bill being made, it will be placed on the Calendar.

Mr. SHOUP, from the Committee on Pensions, to whom was referred the bill (S. 3094) granting an increase of pension to George W. Palmer, reported it without amendment, and submitted a report thereon.

Mr. WALTHALL, from the Committee on Military Affairs, to whom was referred the bill (H. R. 5127) for the relief of Abraham O. Waucop, reported it without amendment, and submitted a report thereon.

Mr. WARREN, from the Committee on Military Affairs, to whom was referred the bill (S. 540) to correct the military record of and grant an honorable discharge to Isaac H. Fitzmorris, he having served in the Army of the United States three years six months and six days, reported adversely thereon, and the bill was postponed indefinitely.

Mr. MITCHELL of Wisconsin, from the Committee on Pensions, to whom was referred the bill (H. R. 4405) granting a pension to Augustus G. Cary, reported it without amendment, and submitted a report thereon.

Mr. CHANDLER, from the Committee on Naval Affairs, submitted a report to accompany the bill (S. 2630) authorizing and directing the Secretary of the Navy to donate condemned cannon to the Londonderry Soldiers' Monument Association, of Londonderry, N. H.; which was ordered to be printed.

Mr. SHERMAN. In the absence of the Senator from South Dakota [Mr. KYLE], I present certain papers to accompany the report on the bill (S. 1202) to establish a university of the United States. I move that the papers be printed to accompany the report.

The motion was agreed to.

Mr. SHOUP, from the Committee on Pensions, to whom was referred the bill (S. 877) granting an increase of pension to Oliver P. Silvey, reported it without amendment, and submitted a report thereon.

BILLS INTRODUCED.

Mr. SHOUP introduced a bill (S. 3257) donating condemned cannon and cannon balls to the Idaho Soldiers' Home, Boise City, Idaho; which was read twice by its title, and referred to the Committee on Naval Affairs.

Mr. GALLINGER introduced a bill (S. 3258) to amend the provision in the act of February 25, 1885, creating the policemen's fund; which was read twice by its title, and referred to the Committee on the District of Columbia.

Mr. CHANDLER (for Mr. PROCTOR) introduced a joint resolution (S. R. 157) extending the scope of the investigations by the Agricultural Department in the matter of the improvement of public roads; which was read twice by its title, and referred to the Committee on Agriculture and Forestry.

Mr. CARTER introduced a joint resolution (S. R. 159) to authorize the further retention of certain money in the Treasury; which was read twice by its title, and referred to the Committee on Indian Affairs.

DISTILLED SPIRITS IN BOND.

Mr. CARTER submitted an amendment intended to be proposed by him to the bill (H. R. 8582) to allow the bottling of distilled spirits in bond; which was referred to the Committee on Finance, and ordered to be printed.

ELIZA SANDFORD.

Mr. SEWELL submitted the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That the Secretary be directed to request the House of Representatives to return to the Senate the bill (S. 1189) granting a pension to Eliza Sandford.

ISSUE OF BONDS IN NEW MEXICO.

Mr. DAVIS. I ask that House bill 9275 be laid before the Senate.

The bill (H. R. 9275) approving certain acts of the legislative assembly of the Territory of New Mexico, authorizing the issue of certain bonds of said Territory, was read twice by its title.

Mr. DAVIS. I wish to make a statement about the bill. It is rather a peculiar situation. It is a House bill. It was passed by the Senate with an amendment. It was sent to the House and passed by the House with a House amendment and was sent over here as a passed bill by the House. There has been some question as to whether a motion to concur would be sufficient. I think not. I report the bill favorably from the Committee on Territories, and ask that it be now considered, which will close all question in regard to it.

Mr. HALE. Not to give rise to any debate?

Mr. DAVIS. Oh, no.

The PRESIDING OFFICER. The Senator from Minnesota asks for the present consideration of the bill.

Mr. BATE. It is a bill of considerable importance. I am a member of the Committee on Territories, and——

Mr. DAVIS. I will say to the Senator from Tennessee that it is the bill I spoke to him about yesterday.

Mr. BATE. Is that the one?

Mr. DAVIS. It is the one.

Mr. BATE. I opposed it in committee. I want that understood.

Mr. DAVIS. That is understood.

Mr. GALLINGER. Before consent is given, I should like to make simply one inquiry of the honorable Senator from Minnesota. I noticed when the bill was before the House recently it was there sharply antagonized, and the statement was there made pretty broadly that the bonds it is proposed to validate were questionable bonds. I should like simply a statement from the Senator on that point. I think there are certain parties in my own section of the country holding other bonds who are very strongly opposed to the passage of this bill, and yet I shall not interpose any factious opposition to it.

Mr. DAVIS. No objection has been made before the Committee on Territories. There was laid before the House of Representatives a letter from the Delegate from New Mexico stating that the validation of the bonds was all right.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill? The Chair hears none, and the bill will be read as in Committee of the Whole.

The Secretary read the bill.

Mr. SHERMAN. I should like to have the last clause read again. I want to know from the Senator whether the United States is at all liable?

Mr. DAVIS. Not in the least.

Mr. HALE. If the bill is to give rise to debate I must object.

The PRESIDING OFFICER. The Chair understood the Senator from Maine to reserve that right.

Mr. SHERMAN. Were the bonds issued for good consideration?

Mr. DAVIS. They were issued for good consideration.

Mr. SHERMAN. At par?

Mr. DAVIS. I do not know what they were sold for, but the Delegate from the Territory——

Mr. BATE. Mr. President, we can not hear the colloquy on this side, and it is a very important question. There are several issues of bonds proposed to be validated and I do not indorse the proposition exactly.

Mr. HALE. I must object if it gives rise to debate. I am in this position: Last night the Senate agreed to take up the naval appropriation bill at the end of the routine morning business. Several Senators desire to debate it. The Senate agreed to take the final vote at 1 o'clock. Every minute now is not encroaching upon me but encroaching upon Senators who desire to speak upon that measure, as the time for a vote has already been fixed.

The PRESIDING OFFICER. The bill is before the Senate as in Committee of the Whole. If there is no amendment and no objection, the bill will be reported to the Senate.

Mr. BATE. I desire to state that I am not prepared to debate the bill, neither do I care to delay its consideration. I know there was controversy in the committee room in regard to it, though I am not familiar with the exact details. I understand that it elicited a sharp debate in the other House. I do not know, but I may be mistaken about that.

Mr. DAVIS. Let it go over.

Mr. BATE. I do not propose to debate it, and I would not delay the action of the Senate upon it.

The PRESIDING OFFICER. Objection is made, and the bill will go over.

Mr. BATE. I do not desire to debate it, and I do not propose to delay action if the Senate desire to dispose of it now, although I shall enter my objection to the measure.

Mr. CULLOM. I hope if it goes over the Senator from Tennessee will look at the bill, so that when it comes up again it can be disposed of. It is a very important measure to the people of that Territory.

Mr. BATE. I will do so.

Mr. HALE. I call for the regular order.

Mr. CHILTON. I hope the Senator from Maine will let me call up a bill which must be passed to-day if it is to do the parties any good, and I do not suppose there is a human being in the United States who objects to it.

The PRESIDING OFFICER. It is not in order at this time.

Mr. CHILTON. I rose to ask unanimous consent for that purpose.

The PRESIDING OFFICER. Concurrent and other resolutions are in order.

CAPTURE OF THE COMPETITOR.

Mr. MORGAN. I ask that the resolution I offered yesterday, requesting the President to send information to the Senate in regard to the *Competitor* case, may be taken up and postponed until to-morrow without prejudice.

The PRESIDING OFFICER. The Senator from Alabama asks that the resolution which he introduced yesterday, and which was laid on the table and printed, be postponed until to-morrow without losing any right it may have at the present time.

Mr. HALE. I hope that will be done.

The PRESIDING OFFICER. If there be no objection, it will be so ordered.

NAVAL APPROPRIATION BILL.

Mr. HALE. Now, Mr. President, if the morning business is concluded, let the naval appropriation bill be proceeded with.

The PRESIDING OFFICER. If there are no further resolutions, the morning business is closed.

Mr. HALE. I ask that the naval appropriation bill, about which there was an agreement last night to vote at 1 o'clock, be laid before the Senate, and then, if no one objects, I will yield to the Senator from Texas [Mr. CHILTON] on a matter which will give rise to no debate.

The PRESIDING OFFICER. The Chair lays the naval appropriation bill before the Senate. The pending question is on the motion of the Senator from Pennsylvania [Mr. QUAY] that the Senate recede from its amendment numbered 32, disagreed to by the House of Representatives.

Mr. HALE. I now yield to the Senator from Texas for a moment.

EL PASO AND NORTHEASTERN RAILROAD.

Mr. CHILTON. I ask unanimous consent for the present consideration of the bill (S. 3206) to grant a right of way through the new Fort Bliss Military Reservation to the El Paso and Northeastern Railroad Company. It is a very short bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

INVESTIGATION OF FUR-SEAL FISHERIES.

Mr. MORRILL. I am unanimously directed by the Committee on Finance to report back without amendment the joint resolution (S. R. 155) to authorize a scientific investigation of the fur-seal fisheries, and to ask for its present consideration. It is a measure of considerable importance, and I think the Senator from Maine will not object to its consideration at this time.

Mr. HALE. If it will give rise to no debate I shall not object, provided it is not a long resolution; but, as I have just stated, I am under constraint. Senators who wish to debate the naval appropriation bill are limited by the agreement that a final vote shall be taken at 1 o'clock, and yielding to anything takes away their right to debate.

Mr. MORRILL. I do not think this measure will excite a moment of debate, but in order to have it explained I will ask that a communication received from the Assistant Secretary of the Treasury be read.

Mr. HALE. I must object. I call for the regular order.

The PRESIDING OFFICER. Objection is made, and the joint resolution will be placed upon the Calendar.

PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. PRUDEN, one of his secretaries, announced that the President had on the 3d instant approved and signed the following acts:

An act (S. 2499) to amend an act entitled "An act to incorporate the Washington and Great Falls Electric Railway Company";

An act (S. 1247) to establish and provide for the maintenance of a free public library and reading room in the District of Columbia; and

An act (S. 2221) for the relief of settlers on the Northern Pacific Railroad indemnity lands.

The message also announced that the following bills were presented to the President May 20, 1896, and not having been returned

by him to the House of Congress in which they originated within the ten days prescribed by the Constitution have become laws without his approval:

An act (S. 1100) granting a pension to Russel N. Reynolds;

An act (S. 1522) granting a pension to Catherine Smith; and

An act (S. 2514) granting an increase of pension to Mrs. Annie E. Colwell.

The message further announced that the bill (S. 1837) granting a pension to Ellen C. Ewing, widow of Bvt. Maj. Gen. Thomas Ewing, was presented to the President on May 21, 1896, and not having been returned by him to the House of Congress in which it originated within the ten days prescribed by the Constitution, has become a law without his approval.

NAVAL APPROPRIATION BILL.

The Senate resumed the consideration of the disagreeing votes of the two Houses upon the bill (H. R. 7542) making appropriations for the naval service for the fiscal year ending June 30, 1897, and for other purposes.

The PRESIDING OFFICER. The pending question is on the motion made by the Senator from Pennsylvania [Mr. QUAY], that the Senate recede from its amendment numbered 32, by which the Senate reduced the number of battle ships from four to two.

Mr. GORMAN. I take it that the Senator from Maine does not intend to have the vote taken on this question until about 1 o'clock. I understand that that agreement was made yesterday, so that we might have a full vote of the Senate on the proposition.

Mr. HALE. The agreement was that the final vote should be taken not later than 1 o'clock, and that was done for the purpose of enabling Senators who desire to take part in the debate. I have been able to keep the regular order before the Senate and it is now open, of course, to debate on any of the subjects-matter that are in the bill. I shall not call for a vote prior to 1 o'clock unless the debate ends before that time.

Mr. ALDRICH. I suggest, if no one is ready to go on upon this question, that there is another conference report and some other business before the Senate which might be taken up in the meantime. I take it for granted there is no use in keeping this question before the Senate until 1 o'clock simply because we made an agreement to vote at that time. Why not take up some other measure?

Mr. GORMAN. I do not know that there is to be any extended debate upon this proposition, but it seems to me very important that we should have a vote of the Senate upon it, and I should like very much to see a full vote. As the case stands now between the two Houses, the Senate voted for two battle ships and the House refused by a very large vote to concur in the Senate amendment. Necessarily that leaves the conferees on the part of the House in a position to insist that they are practically instructed for four. The Senate voted upon the question only when the bill was being considered as in Committee of the Whole, and voted for two. We ought now to have a full and decisive vote of the Senate. It is a perfectly plain proposition and one that does not require very much discussion. The only question is whether it is wise for us to recede.

Mr. CULLOM. Is there any reason why we can not have a full vote to-day?

Mr. GORMAN. Oh, no. On the contrary, I suppose by our agreement yesterday we are to vote at a fixed hour, at 1 o'clock, so as to have all Senators present. That is the only object I had in suggesting that hour to the Senator.

Mr. CULLOM. That is the time fixed.

Mr. GORMAN. I only want the vote taken promptly at that time. So far as the debate is concerned, I do not know how far it is desired. I do not wish to go into any extended discussion of the question. I said all I desire to say when the bill was before the Senate.

There are only two propositions involved. One is whether it is wise to attempt to authorize the construction of more than two great war vessels at this time, at a time when it is ascertained in reference to those which have heretofore been ordered and are now being constructed by the Government that, if there are not defects in them, it is believed that great improvement can be made in the structure of the vessels themselves. There is a board now in session to determine that question. So they have been improving from year to year and will continue to make improvements in the structure of the vessels. Therefore, in my judgment, we ought not to proceed more rapidly than we have heretofore gone, and should not order more than two vessels.

As to the matter of the expenditure of money, that is a question with which the Senate is entirely familiar and with which Congress is familiar. It would seem as if we do not take that matter into account very much about anything. At the same time, if the Senate on reflection desires to recede from its amendment and adopt the House provision we ought to have a full vote of the Senate upon the proposition. So far as I am concerned, I shall not change my mind upon the subject. I believe, however, that with the provision the Senate inserted, after mature consideration by the Committee on Naval Affairs, limiting the cost of the armor to $350 a ton, probably we shall not have any of these vessels built.

Mr. FAULKNER. If the Senator from Maryland will permit me, I should like to ask him a question. I voted for the amendment limiting the cost of armor to $350 a ton with the understanding from the members of the Committee on Naval Affairs that that was above the price at which armor had been sold by our manufacturers to foreign countries. If that is true, I feel like adhering to my vote; but if it is not true I should like the Senator to explain in what respect the facts differ from that statement.

Mr. GORMAN. Two years ago, I think, the Bethlehem Company contracted with the Russian Government for a small amount of armor at two hundred and fifty-odd dollars a ton. I believe $259 was the exact amount. When we had the naval appropriation bill under consideration a year ago that matter was brought to the attention of Congress, and the House of Representatives inserted a clause in that bill providing that no armor should be purchased at a higher rate per ton than was paid by any foreign government for like armor purchased in the United States. It referred to a single contract with the Bethlehem Company. I do not believe the matter was considered at that time by the Naval Committee. It was, however, brought to the attention of the Appropriations Committee. The Bethlehem Company made a very frank statement, as I remember, to the effect that they were without work, or probably had not enough work to continue the operations of their factory, and this offer was made to the Russian Government for two reasons, first, to keep their factory in operation, and secondly, to introduce American armor on the other side; and being a small order, and not a very great amount of money involved in it, they closed it at $259 a ton, about one-half of the price at which the French makers offered it to the Russian Government and about one-half of the price the Government of the United States has been paying. But during the last year in competition with the English and French manufacturers they have secured another contract from the Russian Government at about $515 or $529 per ton, I have forgotten which, but about the same price they are charging the United States. They claimed that it was a movement on the part of the American manufacturers which they could afford to make at a loss for the purpose of introducing our armor, which is confessedly better than the English or the French armor.

The Senate at that time struck out the provision prohibiting a greater amount to be paid for armor than they had charged to foreign governments, because the testimony of all the manufacturers was that it was impossible to make it for that price. Since then the Committee on Naval Affairs have made their investigation. The Senator from New Hampshire [Mr. CHANDLER], the Senator from Georgia [Mr. BACON], and the Senator from South Carolina [Mr. TILLMAN] yesterday made very full statements to the Senate, which are before us to-day in the RECORD. I know nothing of that testimony except what I heard yesterday; I have not had time to read it. It was taken by a committee of this body, and they believe that we ought to adhere to our amendment. If the Senate agrees to it, I say frankly, from the investigations that I have given to the subject in the last two or three years, I do not believe it will be possible to procure the armor for such a price, and therefore the construction of the ships will be delayed, for in the construction of all the vessels made to this time the delay has been not in the frame, not in the general work of the shipbuilders, but in the supply of the armor itself. Therefore I take it that the Department will not think of making a contract at all for any portion of the ships unless they can get the armor at the price named in the amendment.

Mr. HALE. Let me suggest to the Senator from Maryland and also to the Senator from West Virginia that if the Senate does not insist on the amendment then the whole matter ends; but if the Senate does insist upon the amendment which fixed $350 as the limitation upon the Secretary of the Navy the matter goes into conference, and there will be an opportunity in conference, if it is believed that the limitation is too low, to fix it at $375 or $400. By the Senate insisting on its amendment it gives the conferees an opportunity to do that. If the Senate does not insist the whole subject, of course, passes away, and there will be no limitation whatever. Is not that the parliamentary situation?

Mr. GORMAN. That is unquestionably the case. I want to say to the Senate frankly that after the positive statements made by the distinguished Senator from New Hampshire, who has had probably more personal experience in this matter than any other member of the body, was a most distinguished Secretary of the Navy, and is a member of the Naval Committee (and I listened attentively to the statements made yesterday), I should feel as one of the conferees on the bill that we ought not to surrender except by a vote of the Senate. Honorable members of the Naval Committee yesterday intimated, indeed they stated broadly, that there was a combination among these manufacturers. It was intimated that there were lobbies in Washington in the interest of the manufacturers, in Congress and near it, and the price had been kept

up to a point where high officials of the Government had intimated that it was an extortion upon the Government of the United States. Under the circumstances it does not seem to me that the responsibility alone of changing this amount from $350 a ton to $450 ought to be placed upon the conferees. As one of the conferees I would not feel at liberty to make such an adjustment after an honorable committee of this body has been supported by the Senate and when the Naval Committee were practically unanimous in making this broad statement to the Senate of the United States.

Mr. HALE. Is it not peculiarly a matter for adjustment in conference? Because the Senate will not give up its proposition of some limitation, when the conferees of this body meet the conferees of the other House, who are not willing to consent to so narrow a limitation but will consent to some other limitation, does the Senator think that such an adjustment would be in any way a breach of the privileges of a conference? Is not that done on matters of amount every day in conference committees?

Mr. GORMAN. Yes, unquestionably; and in all ordinary cases that must, of necessity, be the rule. Otherwise the two Houses could never come to an adjustment. But this is a unique case. This is a case where the Committee on Naval Affairs of this body have unanimously determined, as I understand it, that $350 should be the outside limit of the cost of the armor.

Mr. HALE. The committee unanimously agreed that there should be some limitation. As was stated in the debate yesterday by the Senator from Georgia [Mr. BACON], who presented the case very clearly and who offered this amendment, it is difficult to fix with any accuracy just the amount of the limitation. That being the case, for one, while the feature of a limitation is insisted upon, it being difficult except upon full conference to finally fix it, I should not consider that I am estopped from an agreement at some other figure when we get into conference unless the House conferees accept our proposition. I think the limitation of $350 is large enough, but I am not so set and determined as a member of the Appropriations Committee or of the Naval Committee upon that figure that I could not agree to some other figure.

Mr. GORMAN. There is one peculiar phase of this case. From the beginning of the construction of these great vessels of war Congress has left with the Secretary of the Navy unlimited power as to the price of all materials that enter into a ship, and no price has been fixed for armor. The Department has been under the control of two great political parties, the Democratic and the Republican, and their action heretofore in the contracts that were made with the armor-plate people up to within the last year has not been criticised, so far as I know. So far as I know, to-day no officer of the Government who is responsible in making these contracts or whose duty it is to make them has suggested to Congress that there ought to be a limit by law as to the price of armor. I have not been able to secure from the officers in charge of this particular branch, in either the War Department or the Navy Department, any suggestion whatever as to a limitation. In the matter of annealed steel for the guns to be used in the fortifications, we absolutely failed to get the ordnance officers to agree to any limitation whatever. I think it is true that they are opposed to a limitation. But in that matter we did reduce the price from 27.3 cents a pound to 24 cents, making the price $550 a ton for the steel for the guns, and it has been said, not officially, that even that limitation may embarrass the Department.

I am as much in favor of a proper limitation as to the price in all of these things as any Senator upon this floor. I am unalterably opposed to the great increase proposed by the House of Representatives in the number of ships and the amount of armor which is to be purchased, because I do not believe the condition of the Treasury warrants it. I do not believe that the condition of the construction of these ships warrants the entering upon it on so large a scale as is proposed in this bill; but I am, on the other hand now, as I always have been, in favor of a fair increase of the Navy. I am in favor of making liberal appropriations for it, and not of placing in the appropriation bill any provision which would nullify the action of Congress when we have determined as to the number of ships to be constructed.

The PRESIDING OFFICER. It is the duty of the Chair to remind Senators that debate was to proceed by agreement under the five-minute rule, though something was said when the arrangement was proposed about ten minutes.

Mr. CULLOM. I suggest that by unanimous consent the Senator from Maryland, who is familiar with this subject, be allowed to proceed, as there seems to be nobody else who desires to speak now.

Mr. CHANDLER. What was the agreement?

The PRESIDING OFFICER. The agreement, as stated by the Chair, was that debate should proceed under the five-minute rule; but, on examining the RECORD, the Chair thinks the understanding was that debate was to proceed under the ten-minute rule.

Mr. CULLOM. Under the ten-minute rule?

Mr. HALE. I so made the proposition.

Mr. CULLOM. I make the suggestion that the Senator from Maryland be allowed to complete his remarks.

Mr. CHANDLER. I should like to have the Senator from Maryland made an exception to the ten-minute rule, because he wished to speak yesterday and was prevented from doing so.

The PRESIDING OFFICER. No objection is made, and the Senator from Maryland will proceed.

Mr. GORMAN. I am grateful to Senators for their courtesy, but I do not desire to detain the Senate very long.

Mr. President, going back to armor, two distinguished members of the Committee on Naval Affairs stated yesterday that, as they understood the situation, we have a monopoly in the United States created by the Government and paid for by the Government, yet the men who make this armor plate, who have a monopoly of the business paid for by the Government, are robbing the Government to-day unmercifully. That is practically the statement, in language a little different, of the Senator from New Hampshire [Mr. CHANDLER], the Senator from Georgia [Mr. BACON], the Senator from New Jersey [Mr. SMITH], and the Senator from South Carolina [Mr. TILLMAN], that these two armor-plate manufacturers have made a combine, not only between themselves, but with foreign manufacturers. The fact stands out perfectly plain that the English Government, the French Government, and the Russian Government, as well as the Government of the United States, are paying $500 a ton for this material, and it would look on the face of it as if that combination had been entered into. If it has, if the price we are compelled to pay is robbery, as suggested by the Committee on Naval Affairs, who have examined this matter, then I say we ought to cease the construction of ships. That is the way to meet the question. We ought not to order four great battle ships and let their constructors who make the hulls and the machinery get them ready and have them on the dry docks waiting until we can adjust this armor matter. If it be true, as said by this honorable committee of this body, that this combination exists and this robbery goes on, then the executive officers of the Government have been derelict in their duty. It was their business and it is their business to inform Congress if that be true, and if it be true we ought to suspend all operations until we either establish a factory, as proposed by the bill introduced by the distinguished Senator from New Jersey [Mr. SMITH], or else compel these manufacturers to fix the price within a reasonable limit.

While the Senator from Maine [Mr. HALE] suggests the rule that is always adopted, the only rule in ordinary cases, where differences occur between the two Houses they must be adjusted by the conferees, I again say to the Senate that, so far as I am concerned, I can not accept the responsibility which is usually given to conferees, to increase this price beyond the report of the Committee on Naval Affairs. The Senate ought to take the responsibility; the Committee on Naval Affairs ought to assume the responsibility. They are aware that the Secretary of the Navy and the Chief of Ordnance of the Navy do not believe that they can proceed under this limitation. After all the extreme statements which have been made, I do not feel, as one of the conferees, that I can agree to the usual method suggested by the distinguished Senator from Maine. I believe we ought to have a vote of the Senate first upon the number of ships. If the majority of the Senate say it shall be four, so be it, let us recede; if the majority of this body insist upon two, as I believe they ought, then the Senate conferees will stand upon an equality with those of the other House, who believe they are instructed for the four battle ships by a vote in the other House since this bill passed the Senate.

When it comes to the other proposition as to armor and armor plate, after full debate in this body I trust the Senate itself will decide whether the price shall remain at $350, $450, or $500 a ton,

Mr. President, one other word. I have never believed, and I do not believe now, that there is any fact which has been brought out by any investigation anywhere on the face of the earth which would warrant the intimation that Secretary Whitney or Secretary Tracy, the two great Secretaries who made the contracts with the Bethlehem and the Carnegie companies, made improvident contracts for the Government. I think there never was a wiser action on the part of executive officers than that by those two gentlemen. We had not within the confines of our country a single establishment which could make a shaft for a great steamer. We had to buy such shafts from England, from Germany, and from France. There was not a steamer in the merchant marine or one in the Navy which could be furnished with a piece of steel or iron at that time suitable for a shaft; there was not a single forge which could turn out a pound of armor for any of our vessels.

Congress made a liberal provision to establish such a plant and the Bethlehem Company was the only concern in the whole country that would undertake that enterprise. Their contract was for 6,000 or 8,000 tons of armor, but the price which the Government paid for it was not sufficient to reimburse them for their expenditure. There was no other customer for that work except the Government. In their statements, made frankly before the committees, they said, as they have said to the Navy Department, that

their understanding was, though it was not named in the bond, that they were to continue to furnish armor for these ships; but when Secretary Tracy came into office the Bethlehem Company was not able to furnish the armor in the time required by the builders of the ships, and he was anxious for competition, anxious for more speedy delivery, and so he made a contract with Mr. Carnegie for a given amount of armor at the same price which had been paid the Bethlehem Company.

I believe from a thorough examination of these contracts and the result which has been produced that they were wise contracts. They were liberal in amount, unquestionably liberal, but they have created these great works, which have not only been able to furnish the Navy but have been able to go on with the construction of great vessels of commerce, two or three of which are now afloat on the ocean, equal to any that are constructed on the Clyde, and we are confessedly ahead of every other nation in the world in the character of the armor we have made, the ships we have constructed, and even in the speed of the boats which are used as torpedo-destroyer boats, and also in the machinery.

I would not, Mr. President, for one, embarrass either of these great works. If we can not arrange this matter by fair adjustment, any action that is taken ought to be taken only after the most careful consideration by the executive officers of the Government, as well as by the committees of Congress, to reduce the price of this armor as we go on, which is natural and right, and I should like to see the price cut down to the lowest possible figure at which it can be done with safety. But when it is proposed to be done in this way I want the Senate to take the responsibility and not thrust it upon three conferees.

Mr. CHANDLER. Mr. President, I speak only because of the inquiry made by the Senator from West Virginia [Mr. FAULKNER] as to the evidence as to the price of armor, and I omitted in speaking yesterday to put in a table, which is found on page 83 of the testimony taken by the committee. It comes from Commodore Sampson, Chief of the Bureau of Ordnance, and was submitted by Secretary Herbert to the committee. I desire that the table may be printed exactly as it is found in this book. The table is as follows:

The following table of prices of armor is submitted with full reservation as to the accuracy of those asked by foreign makers:

Grade.	England.			France.		
	Plain.	Nickel.	Harvey-ized.	Plain.	Nickel.	Harvey-ized.
Lower limit	[1]$413.00				[2]$449.00	[3]$521.00
Upper limit	[1]438.00				[2]463.00	[3]540.00
Special			[4]			
Foreign trade	[5]312.00	[6]$358.00	[7]302-341.00	[8]$312.00	[9]311.46	389.92

[1] Vickers, makers for H. M. S. *Centurion*.
[2] Acier special for the *Bouvet*.
[3] For the *Charlemagne* and *St. Louis*.
[4] Said to be $88 more than for plain steel; hence $501 to $526.
[5] Vicker's bid.
[6] Cammell's bid for armor of Russian *Three Saints*.
[7] Cammell's bid.
[8] Le Creuzot bid.
[9] Le Creuzot bid for Russian *Three Saints*.

Mr. President, I was able myself to come to no other conclusion than this, that the cost of armor to the foreign manufacturers and also to the Bethlehem Company and the Carnegie Company was less than $300 a ton, and that by a combination only were the prices kept up to $550 and $600. The two contracts made in this country, the first with the Bethlehem Company and the second, at the same rate, with the Carnegie Company, at about $600 a ton, not reckoning interest, as the Senator from Pennsylvania [Mr. QUAY] has reckoned, gave in dollars to the two concerns all that they paid out for the production of the armor and all that they paid out for establishing the plant; and in addition to those contracts, there have come this year the contracts for the *Kentucky* and the *Kearsarge*, which are reduced only $50 a ton; so that these two concerns are to receive about $3,000,000 more at the price of $550 a ton; and the question was, what was the duty of the Congress of the United States in reference to the two or to the four new ships that are to be now authorized?

The committee came to the conclusion—they may be mistaken, and it may be that there ought to be further investigation—that unless the contracts should be made before the first Monday in December at $350 a ton, allowing at least $50 a ton profit, the bids ought to be reported to Congress. That is the position of the committee.

I again call the attention of the Senate to the fact that no possible harm is done. The drawings for the armor for the *Kentucky* and the *Kearsarge* are not, by the contract, to be furnished to the manufacturers before next winter, although, as a matter of fact, the Department may furnish them sooner; but it will take them all next year to furnish the armor for the *Kentucky* and the *Kearsarge*, and there is not the slightest need, as I said yesterday, as a business proposition to make these armor contracts until next winter.

Mr. HALE. Now let us have a vote, Mr. President.

Mr. CHANDLER. I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum being suggested, the Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Aldrich,	Cullom,	McBride,	Quay,
Allison,	Dubois,	Mills,	Sewell,
Bate,	Faulkner,	Mitchell, Oreg.	Sherman,
Berry,	Gallinger,	Morgan,	Shoup,
Brown,	Gear,	Morrill,	Smith,
Burrows,	Gorman,	Palmer,	Teller,
Butler,	Hale,	Pasco,	Turpie,
Carter,	Harris,	Peffer,	Vest,
Chandler,	Hawley,	Pettigrew,	Vilas,
Chilton,	Hill,	Platt,	Walthall,
Clark,	Lindsay,	Pritchard,	Warren,
Cockrell,	Lodge,	Pugh,	White.

The PRESIDING OFFICER. Forty-eight Senators having responded to their names, a quorum is present. The question is on the motion of the Senator from Pennsylvania [Mr. QUAY], that the Senate recede from its amendment providing for two battle ships instead of four, upon which the yeas and nays have been ordered.

Mr. GORMAN. A vote "yea" on this question means four battle ships, and "nay" two battle ships. That is the condition of the question, I understand.

Mr. HALE. To recede from the Senate amendment leaves the number of battle ships at four, and not to recede leaves it open to conference.

Mr. GORMAN. A vote "yea" means four battle ships, and "nay" means two.

The Secretary proceeded to call the roll.

Mr. CARTER (when his name was called). I am paired usually with the Senator from Maryland [Mr. GIBSON], and I therefore withhold my vote.

Mr. CULLOM (when his name was called). I am paired with the senior Senator from Delaware [Mr. GRAY]. Not knowing how he would vote on this question, I shall withhold my vote.

Mr. FAULKNER (when Mr. ELKINS's name was called). My colleague [Mr. ELKINS] is paired on this question with the junior Senator from Maryland [Mr. GIBSON].

The PRESIDING OFFICER. The Chair thinks the Senator from Montana [Mr. CARTER] announced a pair with the junior Senator from Maryland. The Chair inquires of the Senator from Montana if such is not the case?

Mr. CARTER. I was not informed of any pair of the Senator from Maryland on this particular vote. I announced a general pair with him, but if he is otherwise paired on this question I will vote. I vote "yea."

Mr. FAULKNER (when his name was called). On this question I am paired with the senior Senator from Indiana [Mr. VOORHEES]. If he were present, he would vote "nay" and I should vote "yea."

Mr. GEAR (when his name was called). I am paired with the Senator from Georgia [Mr. GORDON], but knowing how he would vote on this question if present, I vote "yea."

Mr. PERKINS (when his name was called). I have a general pair with the Senator from North Dakota [Mr. ROACH]. I will transfer that pair to the senior Senator from Montana [Mr. MANTLE] and vote "yea."

Mr. PUGH (when his name was called). I am paired with the senior Senator from Massachusetts [Mr. HOAR], but I transfer that pair to the Senator from Louisiana [Mr. BLANCHARD] and vote "nay."

Mr. SEWELL (when his name was called). I am paired with the Senator from Wisconsin [Mr. MITCHELL]. If he were here, I should vote "yea."

Mr. WALTHALL (when his name was called). On this question I have a pair with the senior Senator from Pennsylvania [Mr. CAMERON], which I transfer to the Senator from South Dakota [Mr. KYLE] and vote "nay."

The roll call was concluded.

Mr. BURROWS (after having voted in the negative). I withdraw my vote. I am paired with the Senator from Louisiana [Mr. CAFFERY]. I desire to say that my colleague [Mr. MCMILLAN] is absent from the Senate, and is paired with the Senator from Kentucky [Mr. BLACKBURN].

Mr. DUBOIS. I will announce on this vote the pair of the Senator from Utah [Mr. CANNON] with the Senator from Nebraska [Mr. ALLEN]. The Senator from Utah, if present, would vote "yea."

The result was announced—yeas 17, nays 33; as follows:

YEAS—17.

Aldrich,	Gear,	Mitchell, Oreg.	Shoup,
Brown,	Hansbrough,	Morgan,	Wilson.
Carter,	Hawley,	Perkins,	
Davis,	Lodge,	Platt,	
Dubois,	McBride,	Quay,	

NAYS—33.

Allison,	George,	Nelson,	Teller,
Bate,	Gorman,	Palmer,	Vest,
Berry,	Hale,	Pasco,	Vilas,
Butler,	Harris,	Peffer,	Walthall,
Chandler,	Hill,	Pettigrew,	Warren,
Chilton,	Jones, Ark.	Pritchard,	White.
Clark,	Lindsay,	Pugh,	
Cockrell,	Mills,	Sherman,	
Gallinger,	Morrill,	Smith,	

NOT VOTING—39.

Allen,	Cannon,	Irby,	Sewell,
Bacon,	Cullom,	Jones, Nev.	Squire,
Baker,	Daniel,	Kyle,	Stewart,
Blackburn,	Elkins,	McMillan,	Thurston,
Blanchard,	Faulkner,	Mantle,	Tillman,
Brice,	Frye,	Martin,	Turpie,
Burrows,	Gibson,	Mitchell, Wis.	Voorhees,
Caffery,	Gordon,	Murphy,	Wetmore,
Call,	Gray,	Proctor,	Wolcott.
Cameron,	Hoar,	Roach,	

So the Senate refused to recede from its amendment numbered 32.

The PRESIDING OFFICER. The question recurs on the motion of the Senator from Maine [Mr. HALE], that the Senate further insist upon its amendments and agree to the conference asked for by the House of Representatives.

Mr. HALE. Amendment numbered 49 is not included in the report which has been agreed to. It is an amendment left open which is subject to the action of the Senate. Before taking a vote upon the pending question, I move an amendment to amendment numbered 49.

Mr. SHERMAN. Let the amendment be read, and then the amendment as proposed to be amended.

The PRESIDING OFFICER. The Chair doubts——

Mr. ALDRICH. I suggest that the amendment is not in order. We can not amend the amendment at this stage.

Mr. HALE. Let me state the case.

Mr. QUAY. It seems to me the amendment had better go to the committee of conference.

Mr. HARRIS. If the Senator from Maine will allow me, I will suggest to him that the bill has passed beyond the amendment stage except in one way, and that is through the report of a committee of conference.

Mr. HALE. I will not insist upon it.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Maine, that the Senate further insist upon its amendments still in disagreement and agree to the conference asked by the House of Representatives.

The motion was agreed to.

By unanimous consent, the Presiding Officer was authorized to appoint the conferees on the part of the Senate at the further conference; and Mr. HALE, Mr. QUAY, and Mr. GORMAN were appointed.

INDIAN APPROPRIATION BILL.

Mr. PETTIGREW. I ask that the conference report on the Indian appropriation bill may be laid before the Senate.

The Senate resumed the consideration of the conference report on the bill (H. R. 6249) making appropriations for current and contingent expenses of the Indian Department and fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1897, and for other purposes.

The PRESIDING OFFICER. The question is upon concurring in the report of the committee of conference.

Mr. PETTIGREW. I think the Senator from Mississippi [Mr. GEORGE] had the floor when we were last considering the report. I do not desire to take the floor from him.

Mr. ALDRICH. I hope we may have a vote.

The PRESIDING OFFICER. The question is on concurring in the report of the committee of conference.

Mr. CHANDLER and Mr. MILLS called for the yeas and nays; and they were ordered.

Mr. WALTHALL. What is the question upon which we are about to vote?

The PRESIDING OFFICER. The question is upon concurring in the report of the committee of conference on the Indian appropriation bill.

Mr. BATE. It involves the question which has been discussed here for two or three days?

Mr. BURROWS. What has become——

Mr. ALDRICH. Debate is not in order.

The PRESIDING OFFICER. Debate is not in order. The Chair in reply to the Senator from Tennessee will state that this involves the question which has been discussed.

Mr. PASCO. What about the point of order in this case? It has not yet been decided.

The PRESIDING OFFICER. The present occupant of the chair is not advised of any point of order.

Mr. ALDRICH. Regular order.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. BURROWS (when his name was called). I am paired with the senior Senator from Louisiana [Mr. CAFFERY].

Mr. DUBOIS (when Mr. CANNON'S name was called). I announce the pair of the Senator from Utah [Mr. CANNON] with the Senator from Nebraska [Mr. ALLEN].

Mr. CHANDLER (when his name was called). At the request of the Senator from Arkansas I am paired on this question with the junior Senator from Virginia [Mr. MARTIN]. If he were present, I should vote "nay."

Mr. CULLOM (when his name was called). I have a general pair with the senior Senator from Delaware [Mr. GRAY]. He not being present, I withhold my vote.

Mr. FAULKNER (when Mr. ELKINS'S name was called). I desire to announce a pair between the Senator from West Virginia [Mr. ELKINS] and the Senator from Indiana [Mr. VOORHEES].

Mr. FAULKNER (when his name was called). I desire to state that I am paired on this question with the Senator from Georgia [Mr. BACON]. If he were present, I should vote "nay." He would vote "yea."

Mr. GEAR (when his name was called). I have a general pair with the senior Senator from Georgia [Mr. GORDON]. I therefore withhold my vote.

Mr. PERKINS (when his name was called). I have a general pair with the junior Senator from North Dakota [Mr. ROACH]. If he were present, he would vote "yea" and I should vote "nay."

Mr. PRITCHARD (when his name was called). I am paired with the Senator from Louisiana [Mr. BLANCHARD].

Mr. PROCTOR (when his name was called). I have a general pair with the Senator from Florida [Mr. CALL]. He gave me a generous discretion, and I am satisfied that if he did not fully agree with me he would not object to my voting. I will therefore vote. I vote "nay."

Mr. PUGH (when his name was called). I am paired with the senior Senator from Massachusetts [Mr. HOAR].

Mr. SEWELL (when his name was called). I announce my pair with the Senator from Wisconsin [Mr. MITCHELL].

The roll call was concluded.

Mr. HALE. I announce the pair of my colleague [Mr. FRYE] with the Senator from West Virginia [Mr. ELKINS].

Mr. CULLOM. I am informed that the senior Senator from Delaware [Mr. GRAY] has spoken against the report. I will therefore take the liberty of voting. I vote "nay."

Mr. BURROWS. I withheld my vote because I am paired with the senior Senator from Louisiana [Mr. CAFFERY]; but I am advised that he would vote the same as I will vote, in the negative. I therefore desire to vote. I wish to state that if my colleague [Mr. MCMILLAN] were present, he would vote "nay."

The result was announced—yeas 27, nays 20; as follows:

YEAS—27.

Berry,	Jones, Ark.	Nelson,	Smith,
Carter,	Jones, Nev.	Palmer,	Teller,
Clark,	Lindsay,	Pettigrew,	Vest,
Cockrell,	McBride,	Platt,	Warren,
Davis,	Mills,	Quay,	White,
Dubois,	Mitchell, Oreg.	Sherman,	Wilson.
Hansbrough,	Morgan,	Shoup,	

NAYS—20.

Allison,	Chilton,	Hawley,	Peffer,
Bate,	Cullom,	Hill,	Proctor,
Brown,	Gallinger,	Lodge,	Turpie,
Burrows,	George,	Morrill,	Vilas,
Butler,	Hale,	Pasco,	Walthall.

NOT VOTING—42.

Aldrich,	Chandler,	Hoar,	Roach,
Allen,	Daniel,	Irby,	Sewell,
Bacon,	Elkins,	Kyle,	Squire,
Baker,	Faulkner,	McMillan,	Stewart,
Blackburn,	Frye,	Mantle,	Thurston,
Blanchard,	Gear,	Martin,	Tillman,
Brice,	Gibson,	Mitchell, Wis.	Voorhees,
Caffery,	Gordon,	Murphy,	Wetmore,
Call,	Gorman,	Perkins,	Wolcott.
Cameron,	Gray,	Pritchard,	
Cannon,	Harris,	Pugh,	

So the report was concurred in.

Mr. TELLER. I ask that we may take up the conference report on the District of Columbia appropriation bill.

Mr. LODGE. I do not understand that the Indian bill is yet disposed of. There are three amendments still in disagreement, on which it is possible to move to recede.

Mr. HILL. Is there any more general legislation?

Mr. TELLER. The motion was to agree to the conference report, and that being agreed to, it takes the matter out of the Senate.

Mr. LODGE. It does not dispose of the three amendments still in disagreement.

Mr. BERRY. Not those disagreed to.

Mr. LODGE. The motion, I understood, was to agree as to this particular amendment.

Mr. CULLOM. No: to the report.

Mr. BERRY. It was to agree to the conference report.

Mr. TELLER. Either to adopt or reject the conference report. We have adopted it, and that is the end of it.

Mr. LODGE. We will see whether it is the end of it.

The PRESIDING OFFICER. The conference report will be read.

The Secretary read as follows:

On amendments 64, 69, and 70 the committee of conference has been unable to agree.

Mr. HILL. Of course it leaves those three items open.

Mr. LODGE. Certainly it does.

Mr. HILL. The Senator from Massachusetts is right.

Mr. LODGE. I spoke to the Senator in charge of the bill while the amendment just voted on was pending——

The PRESIDING OFFICER. The Chair thinks the agreement to the conference report leaves open those amendments as to which the conferees have been unable to agree.

Mr. TELLER. Certainly; nobody doubts that.

Mr. LODGE. We were told only a moment ago that it was all disposed of.

Mr. TELLER. It is disposed of so far as we are now concerned.

Mr. LODGE. It leaves it open to a motion which I propose to make.

Mr. PETTIGREW. I move that the Senate further insist upon its amendments in disagreement, and agree to the request for a further conference.

The PRESIDING OFFICER. The Senator from South Dakota moves that the Senate insist upon its amendments as to which agreement has not been had, and accede to the request of the House of Representatives for a further conference.

Mr. LODGE. There are three amendments in disagreement. One is the amendment relating to the Old Settlers' claim. The other two relate to the amendments to the House paragraph in regard to sectarian schools. I desire to make a motion that the Senate recede from its amendments numbered 69 and 70, relating to sectarian schools; and I now make that motion, which I think has precedence.

Mr. HALE. It has precedence.

The PRESIDING OFFICER. The Senator from Massachusetts moves that the Senate recede from its amendments numbered 69 and 70, as to sectarian schools.

Mr. PETTIGREW. I trust the Senate will not recede in regard to these amendments, but will send them back for further conference. I do not believe we ought to abandon those schools at the request of the House. I think the Senate amendment is entirely fair and just, and I still have hopes of results from a further conference upon the subject.

Mr. HARRIS. Let amendments 69 and 70 be read.

The PRESIDING OFFICER. The amendments will be stated.

The SECRETARY. On page 46, line 24, the Senate struck out all after the word "Alaska" down to and including the word "school," in line 7, on page 47, and inserted:

And it is hereby declared to be the settled policy of the Government to make no appropriation whatever for the education of Indian children in any sectarian school, just as soon as it is possible for provision to be made for their education otherwise, and the Secretary of the Interior is hereby authorized and directed to make such provision at the earliest practicable day, not later than July 1, 1898: *Provided*, That the Secretary of the Interior may make contracts with present contract schools for the education of Indian pupils during fiscal year 1897, but shall only make such contracts at places where nonsectarian schools can not be provided for such Indian children and to an amount not exceeding 50 per cent of the amount so used for the fiscal year 1895.

On page 47, line 7, after the word "*Provided*," the Senate inserted the word "*further*"; so as to read: "*Provided further*," etc.

The PRESIDING OFFICER. The question is on agreeing to the motion to recede from the amendments of the Senate which have just been stated.

Mr. LODGE. On that I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. PETTIGREW. As I understand it, a vote "yea" is to recede from the Senate amendments in regard to the schools.

Mr. LODGE. It affects only the schools. It does not relate to the amendment as to the Old Settlers' claim.

The PRESIDING OFFICER. The Chair will state that Senators in favor of receding from the amendments will vote "yea" and those opposed to receding will vote "nay." The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. DUBOIS (when Mr. CANNON'S name was called). I desire to announce the pair of the Senator from Utah [Mr. CANNON] with the Senator from Nebraska [Mr. ALLEN].

Mr. FAULKNER (when Mr. ELKINS'S name was called). My colleague [Mr. ELKINS] is paired on this question with the Senator from Indiana [Mr. VOORHEES].

Mr. GEAR (when his name was called). I announce my pair with the senior Senator from Georgia [Mr. GORDON]. If he were here, I should vote "yea."

Mr. PERKINS (when his name was called). I again announce my pair with the junior Senator from North Dakota [Mr. ROACH]. If he were present, he would vote "nay" and I should vote "yea."

Mr. PRITCHARD (when his name was called). I am paired on this question with the Senator from Louisiana [Mr. BLANCHARD]. If he were present, I should vote "yea."

Mr. PUGH (when his name was called). I am paired with the senior Senator from Massachusetts [Mr. HOAR]. I transfer my pair to the junior Senator from New York [Mr. MURPHY] and vote. I vote "nay."

Mr. WALTHALL (when his name was called). I am paired with the senior Senator from Pennsylvania [Mr. CAMERON]. I transfer my pair to the senior Senator from South Carolina [Mr. IRBY] and vote "nay."

The roll call was concluded.

Mr. CULLOM. I have a general pair with the senior Senator from Delaware [Mr. GRAY]. He being absent, I withhold my vote.

Mr. BURROWS. I am paired with the senior Senator from Louisiana [Mr. CAFFERY], and this announcement will apply to all votes taken to-day. I shall not repeat it. If he were present, I should vote "yea."

The result was announced—yeas 17, nays 31; as follows:

YEAS—17.

Brown,	Gallinger,	Peffer,	Warren,
Butler,	George,	Platt,	Wilson.
Chandler,	Lodge,	Quay,	
Clark,	Mitchell, Oreg.	Sewell,	
Dubois,	Morrill,	Teller,	

NAYS—31.

Allison,	Gorman,	Mills,	Shoup,
Bate,	Hansbrough,	Mitchell, Wis.	Smith,
Berry,	Harris,	Morgan,	Turpie,
Carter,	Hawley,	Palmer,	Vest,
Chilton,	Hill,	Pasco,	Vilas,
Cockrell,	Jones, Ark.	Pettigrew,	Walthall,
Davis,	Lindsay,	Pugh,	White.
Faulkner,	McBride,	Sherman,	

NOT VOTING—41.

Aldrich,	Cannon,	Irby,	Roach,
Allen,	Cullom,	Jones, Nev.	Squire,
Bacon,	Daniel,	Kyle,	Stewart,
Baker,	Elkins,	McMillan,	Thurston,
Blackburn,	Frye,	Mantle,	Tillman,
Blanchard,	Gear,	Martin,	Voorhees,
Brice,	Gibson,	Murphy,	Wetmore,
Burrows,	Gordon,	Nelson,	Wolcott.
Caffery,	Gray,	Perkins,	
Call,	Hale,	Pritchard,	
Cameron,	Hoar,	Proctor,	

So the Senate refused to recede from its amendments numbered 69 and 70.

The PRESIDING OFFICER. The question recurs on agreeing to the motion of the Senator from South Dakota [Mr. PETTIGREW], that the Senate further insist upon its amendments, and agree to the conference asked for by the House of Representatives.

The motion was agreed to.

By unanimous consent, the Presiding Officer was authorized to appoint the conferees on the part of the Senate at the further conference; and Mr. PETTIGREW, Mr. TELLER, and Mr. COCKRELL were appointed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had agreed to the amendments of the Senate to the following bills:

A bill (H. R. 2006) to increase the pension of Harriet C. Gregg, widow of Col. John Irvin Gregg, from $30 to $50 per month; and

A bill (H. R. 6739) for the relief of John N. Quackenbush, late a commander in the United States Navy.

The message also announced that the House had disagreed to the amendment of the Senate to the bill (H. R. 2143) granting a pension to Mrs. Emily Van Derveer, widow of the late Brig. Gen. Ferdinand Van Derveer, agreed to the conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. SULLOWAY, Mr. WOOD, and Mr. BAKER managers at the conference on the part of the House.

The message further announced that the House had disagreed to the amendment of the Senate to the bill (H. R. 4020) granting an increase of pension to Mrs. William Loring Spencer, agreed to the conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. ANDERSON, Mr. KERR, and Mr. MCCLELLAN managers at the conference on the part of the House.

The message also announced that the House had disagreed to the amendment of the Senate to the bill (H. R. 4354) granting a pension to Mrs. Mary Gould Carr, widow of the late Brig. and Bvt. Maj. Gen. Joseph B. Carr, agreed to the conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. POOLE, Mr. KERR, and Mr. MCCLELLAN managers at the conference on the part of the House.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. TELLER. I ask that the conference report on the District of Columbia appropriation bill may be taken up.

The Senate proceeded to consider the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 5210) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1897, and for other purposes.

The PRESIDING OFFICER. Does the Senator from Colorado desire that the report shall be read? It has been printed.

Mr. TELLER. No; it is not necessary to read the report, as it has been printed.

[For report see Senate proceedings of June 1.]

The PRESIDING OFFICER. The question is on concurring in the report of the committee of conference.

The report was concurred in.

Mr. TELLER. I move that the Senate further insist on its amendments and request a further conference with the House of Representatives on the disagreeing votes of the two Houses thereon.

The motion was agreed to.

By unanimous consent, the Presiding Officer was authorized to appoint the conferees on the part of the Senate at the further conference; and Mr. TELLER, Mr. ALLISON, and Mr. COCKRELL were appointed.

REASSESSMENT OF WATER-MAIN TAXES.

Mr. FAULKNER. A few days ago a bill passed the Senate, reported from the District of Columbia Committee, in reference to the reassessment of water taxes, and there was an error found in it after it was passed. I report from the Committee on the District of Columbia a joint resolution to correct the error. It is a very trifling one, but still important, and I ask unanimous consent that the joint resolution, which is short, may be now considered, so that the error may be corrected.

The joint resolution (S. R. 158) to amend an act to authorize the reassessment of water-main taxes in the District of Columbia, and for other purposes, was read the first time by its title, and the second time at length, as follows:

Resolved by the Senate and House of Representatives, etc., That an act entitled "An act to authorize the reassessment of water-main taxes in the District of Columbia, and for other purposes," be, and the same is hereby, amended in section 2, so that the said section shall read as follows:

"SEC. 2. That where outside the city of Washington Potomac water shall hereafter be introduced said reassessment shall be levied or assessed within thirty days after such introduction, and where Potomac water has been heretofore introduced the reassessment shall be made within ninety days after the passage of this act, and any levy, assessment, or reassessment on land not subdivided into blocks and lots shall be made on a frontage not exceeding 100 feet for each lot or parcel of land or premises into which Potomac water has been or shall be introduced, and shall be considered in any subsequent subdivision of such property as having extended to a depth of not exceeding 100 feet from the front of said lot or parcel of land: *Provided, however*, That said water-main tax or assessment or reassessment on land not subdivided into blocks and lots shall be due, payable, and collectible on each lot or parcel of land or premises on and after the date on which the connection is made from the water main to said lot or parcel of land or premises."

The PRESIDING OFFICER. The Senator from West Virginia asks unanimous consent for the present consideration of the joint resolution. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

INVESTIGATION OF FUR-SEAL FISHERIES.

Mr. MORRILL. I now ask leave to call up the joint resolution (S. R. 155) to authorize a scientific investigation of the fur-seal fisheries, reported from the Committee on Finance this morning, and in order to have it fully understood by the Senate I will ask to have read a note received from the Treasury Department.

The PRESIDING OFFICER. The Senator from Vermont asks for the present consideration of the joint resolution which will be read, and before considering it he asks for the reading of a letter from the Treasury Department. The letter will be read, in the absence of objection.

The Secretary read as follows:

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY,
Washington, D. C., June 3, 1896.

SIR: I have the honor to inform you that at the request of Her Majesty's Government two scientists have been given permission to visit the Pribilof Islands during the present season to examine into the condition of the fur-seal herds thereon. I believe it is of the utmost importance that authority be given for the appointment of an eminent zoologist to visit said islands this season in behalf of the United States Government. A resolution granting such authority has already been favorably reported by the Ways and Means Committee of the House of Representatives. Inasmuch as the representatives of the British Government are now in this city on their way to the Pribilof Islands, it will be apparent that there is urgent need of granting this authority at the earliest practicable moment.

Respectfully, yours,

C. S. HAMLIN, *Acting Secretary.*

The Hon. JUSTIN S. MORRILL,
Chairman Finance Committee, United States Senate.

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution; which was read, as follows:

Resolved by the Senate, etc., That the Secretary of the Treasury be, and is hereby, authorized to expend, from any moneys in the Treasury not otherwise appropriated, a sum sufficient to provide for the employment of persons to conduct a scientific investigation, during the fiscal years 1896 and 1897, of the present condition of the fur-seal herds of the Pribilof, Commander, and Kurile Islands in the North Pacific Ocean and Bering Sea, said amount not to exceed for both said years the sum of $5,000.

The Secretary is also authorized to employ a stenographer in connection with this investigation at a rate of compensation not exceeding $1,500 per annum, and to pay his compensation and expenses out of any moneys in the Treasury not otherwise appropriated.

The President is authorized to detail, for the purposes of assisting in this investigation, any officer or officers or employees of the United States Government, their actual expenses and the expenses of the person or persons employed under the preceding paragraph to be paid by the Secretary of the Treasury out of any moneys in the Treasury not otherwise appropriated.

The President may detail a vessel of the United States for the purpose of carrying out this investigation.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PACIFIC RAILROADS.

Mr. GEAR. I wish to make a motion regarding the funding bill, pertaining to the Union and Central Pacific roads. In explanation of the motion, I will briefly state, with the consent of the Senate, that there are $115,000,000 due from these two roads to the United States Government, a portion of it falling due early in the beginning of the coming year. The Union Pacific road has defaulted on its first-mortgage bonds, and suit is now being brought to foreclose the mortgage. Therefore, it seems to me, it is incumbent on Congress that some action should be take in regard to this matter for the purpose of protecting the interests of the Government.

In regard to the bill which I had the honor to report in behalf of the Pacific Railroads Committee, there is some difference among the members of the committee. The honorable Senator from Alabama [Mr. MORGAN] made a dissenting minority report. The honorable Senator from Colorado [Mr. WOLCOTT] reserved the right also to make a minority report to that part pertaining to the Union Pacific road. In view of this fact, after consultation with Senators on both sides, I move that on the eighth legislative day of the next session, at the conclusion of the morning business, Senate bill 2894 shall be taken up and made the continuing order from day to day until some disposition is had in regard to these matters. I do this after consultation with the Senator from Alabama and other Senators, and I ask for a vote on my motion.

Mr. MORGAN. If I can have permission to say a word, I will state that the subject-matter which is included in the bill reported by the committee ought to be disposed of at the December session. It is a matter of very great national importance. While I am opposed to the bill that is reported here and have made an adverse report upon it, I think the subject ought to come up for consideration. The fact is that we can not safely postpone the consideration of the bill after the next session of Congress. Therefore, I am cordially in favor of setting a time for the hearing of the bill. I think, though, that the chairman of the committee ought to move in this connection for the printing of all the hearings that took place before the committee in reference to the bill.

Mr. GEAR. I will state in reply to the Senator that there is a large amount of hearings in the room of the Committee on Pacific Railroads, but if he thinks that is not enough matter I will add——

Mr. MORGAN. No, I think that what we have gathered on that subject ought to be printed for the use of the Senate.

Mr. GEAR. I will modify my motion to this extent, that the bill be taken up at 2 o'clock on the eighth legislative day of the next session, and that it shall be the continuing order from day to day until the measure is disposed of. And in addition I will ask an order to print, for the use of the Senate, 500 copies of the bill and the evidence taken before the committee.

The PRESIDING OFFICER. The Senator from Iowa moves that Senate bill 2894, reported by the Committee on Pacific Railroads, be postponed until the eighth legislative day of the next session, when it shall be taken up at 2 o'clock, and that its consideration shall be continued from day to day until disposed of.

Mr. GEAR. That it shall be considered the unfinished business.

The PRESIDING OFFICER. Is there objection?

Mr. TELLER. I am not going to object that the bill shall be set down, but I am going to object that it shall have any special privileges. If the Senator from Iowa insists that the bill shall not take its chances with the ordinary methods of doing business, I shall object.

Mr. CHANDLER. The Senator from Iowa modifies his request.

Mr. GEAR. I modify my request, that it shall be considered the unfinished business.

Mr. TELLER. If the Senator asks that the bill shall be set down and that is all, I shall not object, but I shall object to any special privileges being secured for the bill.

Mr. CHANDLER. That makes it the unfinished business.

Mr. GEAR. I want a clear understanding. If fixing it for consideration at that time will make it the unfinished business, that is all right.

Mr. FAULKNER. That will be the result.

Mr. BERRY. What is the bill?

Mr. FAULKNER. It is the Pacific railroads funding bill.

Mr. TELLER. It can be made the unfinished business, but it must be subject to any motion to postpone or to do whatever the Senate may choose with it, like any other bill.

Mr. BERRY. I object to the proposition.

Mr. GEAR. I have made a motion, I will say to the Senator from Arkansas.

The PRESIDING OFFICER. The Senator from Iowa submits a motion, and one objection is not sufficient.

Mr. HILL. What is the motion?

Mr. GEAR. The motion is that Senate bill 2894 be taken up at 2 o'clock on the eighth legislative day of the next session of Congress for consideration, and that in addition 500 copies of the evidence and of the bill be printed for the use of the Senate.

Mr. TELLER. I suggest to the Senator to make the printing a separate motion.

Mr. GEAR. All right; I will make that a separate motion.

Mr. CHANDLER. I hope the Senator from Arkansas will not object, as the bill is only to be the unfinished business, subject to be displaced on motion, as the Senator from Colorado says.

Mr. BERRY. I could not hear the Senator from New Hampshire.

Mr. CHANDLER. As the bill is to come up as the unfinished business, subject to be displaced on motion, the Senator will hardly care to object to having this important matter set down for that day.

Mr. BERRY. The Senator from Iowa informed me that he did not ask unanimous consent. He has made a motion.

Mr. GEAR. I have made a motion, and I ask that the question be put.

The PRESIDING OFFICER. Is the Senate ready for the question?

Mr. JONES of Arkansas. I should like to ask if a motion to make a bill the unfinished business at a day in the future is in order? I think it is not.

Mr. GALLINGER. If the Senator raises that point, I quite agree with him that it is not in order.

Mr. VILAS. I suggest that Rule X be read.

Mr. SHERMAN. I suggest that the proper way is to get the bill before the Senate and then to move to postpone it until the eighth legislative day of the next session.

Mr. JONES of Arkansas. If the Senator from Iowa can have it taken up he can then move to postpone it, I imagine, if he chooses.

Mr. GEAR. I will change my motion. I will move that the bill be taken up for consideration for that purpose.

Mr. FAULKNER. I understand that if the motion to take up is carried it will be followed by a motion to postpone the bill until the eighth legislative day of the next session.

Mr. GEAR. That is it.

Mr. FAULKNER. That was the understanding of the committee. The committee are unanimous on that question, the Senator from Alabama and all the other members.

Mr. HILL. It makes it a special order. That is the only effect, and that requires a two-thirds vote.

Mr. SHERMAN. Not at all.

The PRESIDING OFFICER. The bill will be read by title.

The SECRETARY. A bill (S. 2894) to amend an act entitled "An act to aid in the construction of a railroad and telegraph line from the Missouri River to the Pacific Ocean, and to secure to the Government the use of the same for postal, military, and other purposes," approved July 1, 1862; and also to amend an act approved July 2, 1864, and also an act approved May 7, 1878, both in amendment of said first-mentioned act, and other acts amendatory thereof and supplemental thereto, and to provide for the settlement of claims growing out of the issue of bonds to aid in the construction of certain railroads, and to secure the payment of all indebtedness to the United States of certain companies therein mentioned.

Mr. HARRIS. I rise to a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Iowa moves that the further consideration of the bill be postponed until the eighth legislative day of the next session.

Mr. GEAR. At 2 o'clock.

The PRESIDING OFFICER. At 2 o'clock.

Mr. JONES of Arkansas. The bill has not been taken up.

Mr. HARRIS. The motion, as I understand it, is that the Senate proceed to the consideration of the bill the title of which has just been read.

The PRESIDING OFFICER. The Chair thought that had been assented to.

Mr. GEAR. That is correct.

Mr. HARRIS. That being the motion, if it carries it displaces the unfinished business, and the Pacific Railroad bill becomes the unfinished business.

Mr. FAULKNER. It is not yet 1 o'clock.

Mr. HARRIS. That is true. It would be the case after 1 o'clock.

Mr. GEAR. I will state to the Senator from Tennessee that if the bill is taken up I am going to follow it by a motion to postpone its consideration until the next session.

The PRESIDING OFFICER. The question is on the motion of the Senator from Iowa to take up the bill.

Mr. VILAS. I wish to make an inquiry.

Mr. ALDRICH and Mr. LODGE. Debate is not in order.

Mr. VILAS. After it is taken up for consideration, can it be postponed to a future day so as to stand as the unfinished business of that day? Rule X——

Mr. FAULKNER. I rise to a question of order.

The PRESIDING OFFICER. Debate is not in order.

Mr. VILAS. I am not debating. I make a parliamentary inquiry.

Mr. FAULKNER. The question is not before the Senate at all.

Mr. VILAS. The inquiry is before the Senate.

Mr. LODGE. I call for the regular order.

Mr. BERRY. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Aldrich,	Gallinger,	Morgan,	Shoup,
Allison,	Gear,	Morrill,	Smith,
Bate,	Gorman,	Nelson,	Stewart,
Berry,	Hale,	Palmer,	Teller,
Brown,	Hansbrough,	Pasco,	Turpie,
Butler,	Harris,	Peffer,	Vest,
Carter,	Hawley,	Perkins,	Vilas,
Chandler,	Hill,	Pettigrew,	Walthall,
Chilton,	Jones, Ark.	Platt,	Wetmore,
Clark,	Lindsay,	Pritchard,	White,
Cockrell,	Lodge,	Pugh,	Wilson.
Davis,	Mills,	Quay,	
Dubois,	Mitchell, Oreg.	Sewell,	
Faulkner,	Mitchell, Wis.	Sherman,	

The PRESIDING OFFICER. Fifty-three Senators have responded to their names. A quorum is present. The hour of 1 o'clock having arrived, the Chair lays before the Senate the unfinished business, being House bill 8008.

Mr. GEAR. I do not wish to interfere with the regular order, but I give notice that I shall renew my motion to-morrow morning.

Mr. WHITE. I was unable to hear the Senator from Iowa.

Mr. GEAR. I stated that I do not wish to interfere with the regular order and that I would not endeavor to have it laid temporarily aside, but that I shall renew my motion to-morrow morning.

Mr. WHITE. At what time? After the routine business?

Mr. GEAR. After the regular order of morning business.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House insisted upon its amendments to the amendments of the Senate numbered 27, 207, and 208 to the bill (H. R. 8293) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1896, and for prior years, and for other purposes, disagreed to by the Senate; further insisted upon its disagreement to the amendments of the Senate numbered 14, 24, 25, 30, 31, 37, 74, 79, 80, 81, 82, 83, 103, 104, 105, 106, 122, 137, 147, 148, 190, 192, and 200 to the bill; agrees to the further conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. CANNON, Mr. ARNOLD of Rhode Island, and Mr. SAYERS managers at the conference on the part of the House.

REGULATIONS CONCERNING FILLED CHEESE.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 8008) defining cheese, and also imposing a tax upon and regulating the manufacture, sale, importation, and exportation of filled cheese.

Mr. SHERMAN. The bill was read, I believe, in full on a former day.

The PRESIDING OFFICER. It has been read. The Senator from Missouri [Mr. VEST] is entitled to the floor.

Mr. VEST. Mr. President, I have very little more to say in regard to the pending measure. I am very well aware from the votes which have been had that the majority of the Senate seem determined to pass the bill, and, I may say most respectfully, without pretending to answer the arguments that are made against it. There is an old Latin maxim, Inter arma silent leges; and it

seems in this country now, when large interests are involved, the Constitution is generally silent.

When I left the floor before when discussing this measure the Secretary had just read the testimony of Colonel Hatch, a distinguished citizen of my State and a former member of Congress, the author of the oleomargarine law, and now the president of the National Dairy Association. I have great respect for Colonel Hatch personally and we agree politically, but I think his enthusiasm and zeal in behalf of this class of legislation have caused him to make certain misstatements, not intentionally of course, as to legislation that has been had and as to the facts involved in this discussion. In his testimony which was read by the Secretary he congratulates himself upon the authorship of the oleomargarine law and states that the result of that law has been to secure a cheap and a pure article of food to the people of the United States.

The argument made in behalf of the oleomargarine law by Colonel Hatch, its author, and by Hon. Warner Miller, who was then chairman of the Agricultural Committee of the Senate, was that oleomargarine was an impure, unhealthy, deleterious product, dangerous to human life, and we had an array of horrors as to the ingredients of oleomargarine that rivaled the description of the witch's caldron in Macbeth. It was said to be made of rotten bones, hair, diseased meat, refuse of all sorts, and that the human stomach was absolutely inflamed to a degree that amounted almost to death by taking that compound into it.

Now, what has been the result of that legislation? I predicted it. I can refer in the RECORD to a speech which I made here, which fell, as this does, upon ears that refused to hear. I predicted then that the only result of the oleomargarine law would be to put a tax upon the poor people of the United States who were unable to buy Elgin butter at 35 and 40 cents a pound; that it would collect a small revenue, which would be paid by the consumers of oleomargarine; that the production of oleomargarine would go on in the hands of a few large dealers, and the small factories, if there were any (and nobody knows how many there were), would be wiped out and Mr. Armour and Mr. Nels. Morris would control the entire trade. Colonel Hatch says in his evidence that that has been the absolute result.

There are 24 manufacturers of oleomargarine now in the United States. Those 24 firms have a monopoly. They paid last year to the Government $1,750,000. They sell, according to Colonel Hatch, an absolutely pure product, and the whole of that $1,750,000 is paid by the poorer classes of consumers in the United States. Mr. Armour congratulates himself that Congress passed that law. He says it has given him control of the trade. Every cent that is paid in the shape of taxation upon oleomargarine was paid by the mechanics and the poor people of the United States, who were unable to buy Elgin butter at 30, 35, and 40 cents a pound. Colonel Hatch says you can go down to the market here in Washington and see piles of oleomargarine openly sold. Of course you can. And to whom is it sold? It is sold to the poor. Mr. Oyster, who testified against oleomargarine at the same time with Mr. Hatch, sells at his stall just across the hall Elgin and dairy butter at 30, 35, and 40 cents a pound. In the winter time it goes up to 40 cents. All of us have paid that price who keep house here. In the summer time it falls with the approach of grass to 35 and 30 cents. But the mechanics and the poor people—the wage earners—are compelled to buy oleomargarine at 15 and 20 cents a pound.

Mr. Armour and Mr. Nels. Morris immediately paid the Government tax upon the cost of oleomargarine and collected it from the consumer. That has been the result of your oleomargarine legislation. It was passed notoriously for the purpose of legislating out of existence an impure and unhealthy product. Instead of legislating it out of existence you have simply put another tax upon the poor people of this country in behalf of a lot of manufacturers. That has been the only result; and that will be the result of this legislation in regard to filled cheese, which is a kindred law and copied almost exactly from the oleomargarine law.

If any Senator here wishes to know whether this is a revenue law or a police regulation, let him turn to the fifteenth section of the bill. I am perfectly aware that I am beating the empty air upon this question. The Constitution amounts to nothing when you come to a great interest that has a large number of votes, and which is now sending to each Senator and Representative threatening letters and circulars, "Vote for the bill to stamp out filled cheese or you will hear from us at the election." I receive by every mail a half dozen or more of these missives from my own State, telling me, "Your election is coming on, and if you want to go back to the Senate stamp out filled cheese or we will stamp you out." I have been here long enough not to be frightened. Without boasting, I do not propose to violate the Constitution, as much as I may need votes at the next election.

I want the Secretary to read the fifteenth section of the bill, and I will ask any man here, whether lawyer or layman, to tell me if that does not show the nature of the pending measure. The fifteenth section is a copy of the oleomargarine law.

The Secretary read as follows:

SEC. 15. That the Commissioner of Internal Revenue is authorized to have applied scientific tests, and to decide whether any substances used in the manufacture of filled cheese contain ingredients deleterious to health. But in case of doubt or contest his decision in this class of cases may be appealed from to a board hereby constituted for the purpose, and composed of the Surgeon-General of the Army, the Surgeon-General of the Navy, and the Secretary of Agriculture, and the decision of this board shall be final in the premises.

Mr. VEST. The next section provides, as the oleomargarine law provided, that if they find any deleterious substances the compound shall be confiscated by the Government. Will any Senator tell me that that is a revenue provision? It is a naked inspection police law. What has the collection of revenue to do with the deleterious nature of the compound called filled cheese? What is that but an absolute surrender of any pretense that this is a revenue bill? Yet Senators vote for it and pretend not to see the nature of this proposed legislation, as they pretended on the oleomargarine law to be entirely oblivious as to its character. When you talk to them about the Constitution all they say is, it is the fraud that is in this bill.

Mr. President, the makers of the Constitution divided the jurisdiction of the Federal Government and of the Constitution as to fraud. The States have entire control of the question of fraudulent or counterfeit products. The Government of the United States has nothing to do with anything of the kind unless it be necessary absolutely to carry out some grant of power to the Federal Government made by the Constitution. In other words, it must be an auxiliary power to one expressly granted by the Constitution itself. If any Senator has any doubt upon this subject I refer him to one decision of the Supreme Court of the United States, which is absolutely conclusive and which is found in 9 Wallace, page 11, the case of The United States *vs.* De Witt.

1. The twenty-ninth section—

Says the headnotes—

of the internal-revenue act of March 2, 1867 (14 Stat. L., 484), which makes it a misdemeanor, punishable by fine and imprisonment, to mix for sale naphtha and illuminating oils, or to sell or offer such mixture for sale, or to sell or offer for sale oil made of petroleum for illuminating purposes inflammable at less temperature or fire test than 110° F., is in fact a police regulation, relating exclusively to the internal trade of the States.

Now, says the Supreme Court:

2. Accordingly, it can only have effect where the legislative authority of Congress excludes, territorially, all State legislation—

Now, mark the language—

all State legislation, as, for example, in the District of Columbia. Within State limits it can have no constitutional operation.

In other words, the Supreme Court, in the body of the decision delivered by the Chief Justice, carries it out fully, deciding that Congress could not go into a State except to exercise an auxiliary power, and one specially granted to Congress by the Constitution, in order to pass a police regulation of any sort. What are we proposing to do here? Under this law, if it shall be enacted, the officers of the United States Government can go inside of my State as to filled cheese made in the State not to be exported from the State, and under the pretense of collection of revenue exercise the police power which is given by the Constitution exclusively to the State of Missouri. Senators may be able to meet the clamor in some sections for this legislation successfully, but they will never be able to meet the results of such legislation upon the people of the United States when they strike down and obliterate the limitations of the Constitution, put there by the framers of that instrument.

But, Mr. President, what makes this matter clear beyond any sort of question is the fact that even if this pretense be true, even if it is fairly and honestly attempted here to do away with a deleterious and unhealthful compound, why is it that skimmed cheese is not also included within the provisions of this proposed law? Colonel Hatch states in his evidence, as do all the other witnesses, that of all the compounds of cheese skimmed cheese is the most deleterious to the human system. Skimmed cheese has no fat in it of any sort. It is made out of skimmed milk; there is no lard in it. The butter element is all eliminated. It is the blue milk that we hear of in the country, without any oleaginous qualities whatever, and therefore entirely indigestible, the most villainous compound in the shape of cheese or pretended cheese that was ever made. You can see it anywhere in the cheap groceries down in the purlieus of the large cities. It is deleterious to human life because there is no fat in it. Yet that is permitted to go without taxation by this very bill. The attack here is made upon filled cheese, which has 8 pounds of leaf lard to every hundred pounds of milk. Why is it that skimmed cheese is not struck at by this proposed law by those gentlemen who are so solicitous in regard to the stomachs and the lives of the people of the United States?

I have here a number of petitions from cheese manufacturers in St. Louis, Chicago, and other cities of the United States, some of which I shall incorporate in my remarks, which I have not

formally offered to the Senate, in which they ask that skimmed cheese be included within the provision of this proposed law.

The petitions referred to are as follows:

To the Congress of the United States:

We, the undersigned, cheese merchants of Chicago, most respectfully urge that the manufacture and sale of skim cheese of all descriptions be made subject to the same conditions as "filled cheese," as embodied in the bill (H. R. 8008) defining cheese, and imposing a tax upon and regulating the manufacture, sale, importation, and exportation of "filled cheese."

Signed—

John Muir, 69 South Water street, Chicago; G. N. Easton & Co., 61 South Water street, Chicago; E. I. Piggott & Co., 43 South Water street, Chicago; Elgin Creamery Co., 34 Clark street, Chicago; S. R. Udell & Co., 71 South Water street, Chicago; T. W. Brennan, 167 South Water street, Chicago; Geo. Braunling & Co., 193 South Water street, Chicago; A. H. Barber, 229 South Water street, Chicago; Orris Uhlmann & Co., 231 South Water street, Chicago; Merrill & Elaudge, 126 South Water street, Chicago; Price & Keith, 137 South Water street, Chicago; Geo. W. Linn & Son, 87 South Water street, Chicago; Lepman & Heggie, 108, 110 South Water street, Chicago; R. L. Larimore, South Water street, Chicago; Coyne Brothers, 161 South Water street, Chicago; Henry Boehmer, South Water street, Chicago.

—

To the honorable Senate and House of Representatives of the United States:

We, the wholesale grocers of Chicago, most respectfully urge that the manufacture of and sale of "skimmed cheese" of all descriptions be made subject to the same conditions as "filled cheese," as embodied in the bill (H. R. 8008) defining cheese and imposing a tax upon and regulating the manufacture, sale, exportation, and importation of "filled cheese."

Signed—

Franklin MacVeagh & Co.; John A. Tolman Co.; W. M. Hoyt Co.; Merriam, Collins & Co.; Reed, Walsh & Lange; Corbin, May & Co.; N. A. Coble & Co.; McNeil & Higgins Co.; W. J. Quan & Co.; Deane Bros. & Lincoln; L. A. Talcott Co.; Steele, Wedele & Co.; Sprague, Warner & Co.; Reid, Murdock & Co.; Strassheim, Yaeger & Co.; Reiss & Brady (per Chas. Treieblinger, manager).

—

To the honorable Senate and House of Representatives of the United States:

We, the wholesale grocers, cheese dealers, and commission merchants of St. Louis, Mo., most respectfully urge that the manufacture of and sale of "skimmed cheese" of all descriptions be made subject to the same conditions as "filled cheese," as embodied in the bill H. R. 8008, "defining cheese and imposing a tax upon and regulating the manufacture, sale, exportation, and importation of 'filled cheese.'"

Signed—

Scudder-Gale Grocery Company (per E. G. Scudder, president); Goddard, Peck Grocery Company (Joseph W. Goddard, president); Alkire Grocery Company (by F. H. Bemiss, president); James W. Scudder & Co.; Adam Roth Grocery Company, (Geo. A. Roth, vice-president); Bauer Grocery Company (Wm. S. Hofman, vice-president); Schwepp Grocery Company (W. E. Schwepp, president); F. Smith & Son Grocery Company (A. H. Smith); Jno. L. Furth Grocery Company (per Jno. L. Furth, president); Meeks-West Grocery Company (Jno. C. Meeks, president); C. E. Udell & Co.; Thompson & Cooke Cheese Company; Hudson Brothers Commercial Company (B. F. Hudson, president); D. G. Tutt Grocery Company (per D. G. Tutt, president).

Mr. VEST. The testimony before the committee showed that this skimmed cheese was not only far inferior to the filled cheese, but was absolutely without one single ingredient that assisted digestion; not only that, but that it was absolutely antagonistic to digestion in the human stomach. That is passed over in silence, and the attack is made upon filled cheese, because filled cheese has come in competition with the dairies of the United States, and this legislation is intended to stamp out one food product in behalf of another, just as the oleomargarine law was passed for the same purpose—openly and avowedly for the purpose of stamping out of existence, if possible, and putting the brand of Congressional disapproval upon a food product that to-day is as legitimate as the dairy products made in New York or in any other State of the Union.

I shall never consent to legislation which says to the people of the United States, "You shall not be the judge of what you will eat and drink." In my judgment it is unadulterated tyranny; it is a mockery of free government to pass any such law as this. Senators say, "Oh, but it is the element of deceit; if they would only brand their product it would be all right."

Mr. President, under whose jurisdiction are the inspection laws of the United States? When were they given to Congress to go into my State and inspect food products which are not to go out of that State? If Senators care nothing for the Constitution, let them say so, but not indirectly attack it and tear it to pieces by such pretended beneficial legislation as this.

I propose—and I do not intend to extend my remarks much further—to offer an amendment to this bill at the proper time including skimmed cheese within its provisions. I then propose to offer another amendment, that nothing in this bill shall be held to mean an extension of the police power by the General Government to products within a State where the police power is granted exclusively to the State government.

That is all I propose to say now upon the subject.

The PRESIDING OFFICER (Mr. CHANDLER in the chair). The bill is in Committee of the Whole and open to amendment. If there be no amendment proposed the bill will be reported to the Senate.

Mr. VEST. I now propose, after the words "filled cheese," in line 2, on page 2, of the copy of the bill I have before me, to insert the words "and skimmed cheese"; and to insert the words "and skimmed cheese" after the words "filled cheese" wherever they occur in the bill, so as to make the same enactment apply to skimmed cheese as to filled cheese; and to make such other amendments as may be necessary to apply to all the provisions of the proposed law.

The PRESIDING OFFICER. The amendment proposed by the Senator from Missouri will be stated.

Mr. ALDRICH. I think it is understood by the Senate.

The SECRETARY. After the word "cheese," in line 11, section 2, it is proposed to insert the words "and skimmed cheese."

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Missouri [Mr. VEST].

Mr. MILLS. I call for the yeas and nays.

The yeas and nays were ordered.

Mr. SHERMAN. Mr. President, I desire to make a few remarks, but I do not wish to detain the Senate, for I hope a good deal of business will be done to-day.

This amendment seems to me entirely unnecessary, because, as I understand it, all milk which is converted into cheese, and nearly all the cheese made in the country before this new kind of filled cheese was manufactured, was made out of both skimmed milk and cream. Both the skimmed milk and cream contain articles making a healthful food in the form of cheese, and I think, therefore, in all the chief dairies of the country, where cheese is an article of great importance to the farmers of the country, milk and cream are used in the manufacture of cheese. I do not myself know that any cheese is made out of skimmed milk alone. Indeed, I think that would be very difficult to do. I am not, as a matter of course, an expert in such matters, but I never heard of cheese being made out of skimmed milk alone. It is always made in connection with cream, which forms the chief part of it. I think that is enough to say in regard to that point.

There is no complaint made by anybody in regard to cheese made out of skimmed milk; but the complaint is—and the Senator ought to take this view of it—that where manufacturing establishments are started in a community they take the milk which is not consumed by the farmers. One of these establishments sends its wagons about the country for a distance of 2, 3, or 4 miles, according to the nature of the business. Those wagons gather in the milk generally in as early a stage as possible. If you will go through the Western Reserve of Ohio you will see early in the morning in front of many of the houses a bucket or tin can of large dimensions to receive the milk. The agent of the manufacturer comes along, takes it, and carries it to the cheese factory, where butter is made. In some cases they make butter alone and do not use the skimmed milk. In other cases they make the skimmed milk into cheese, using both the skimmed milk and the cream for that purpose.

Now, it is complained recently that in order to get a cheaper form of cheese they take the skimmed milk only. So far as the milk is concerned, they take the cream and convert it into butter and sell the butter. They then take the skimmed milk, which my friend from Missouri says is so unwholesome—although I suppose we have drunk a good deal of it in our lifetime without being very dangerously injured—and add to it not cream, or the product of cream, but they add to it lard—the lard of the hog—and they take this lard, reduced, or rendered, as they call it, melted by a heat of probably 120, 130, or 140 degrees, and they mix that lard with the milk and make what is called filled cheese. That is, it is skimmed-milk cheese, filled with lard instead of with butter, or butterine, or cream, which is the foundation of butter. That is all there is in this case.

The manufacture and sale of filled cheese have grown to be an abuse so great as to destroy a large industry in many of the agricultural States of the Union, North, South, East, and West. It has become so great an evil that the farmers in their meetings and conferences have denounced it, and they claim that it is injurious to their business.

This filled cheese, which is manufactured not of cream and milk but manufactured of skimmed milk, the cream which is taken out of it and made into butter being superseded by lard, is believed by many to be unhealthy. Certainly it is not what is called cheese, which is a product always of the cow and not of the hog. The distinction there is marked.

The business amounts to a fraud. It is true that a person who did not have some mode of testing this cheese might not distinguish it from ordinary cheese, but most persons could tell the difference between it and the genuine cheese; but still it is colored precisely like the genuine cheese. Not only is it a fraud, but it is not sold at the ordinary price of such a compound; for, while tallow may be worth 10 cents a pound, lard may be worth only 2 or 3 cents a pound, and all the difference in cost between cream and lard, as a matter of course, goes into the hands of the manufacturer; and yet this filled cheese, so called, is sold in all the markets of the world, and has been sold in this very building, as cream cheese. Here is the testimony of witnesses without number.

I might go over the testimony, but it is not necessary to do so to show you that in all parts of the country there is a general denunciation of this fraud upon the people. This cheese, manufactured not out of the ordinary articles of which cheese is made, is sold and labeled in large letters as "Wisconsin cream cheese," or "Ohio cream cheese." It is true the manufacturers who make this article do not put these labels upon it; they do not label their product at all; but when it goes into the hands of the dealers who sell it to the consumers they put on this stamp, and there is no way to prevent it. It is not done by the manufacturer, and therefore he can not be called to account. That is sold as a merchantable article by the dealers. That is a fraud which ought to be corrected or punished, if possible.

The bill is but a copy, as the Senator from Missouri says, of the oleomargarine law, which has worked well and beneficially in every respect. The people, when they buy oleomargarine, know what they get. Probably it will make it popular. I have no doubt but that this bill will be beneficial.

The Senator from Missouri says it is a charge upon the poor. It is not intended to be charged upon the poor. It is intended to protect the poor against a fraud. That is the object of it. Why should not every man stamp his production truly? Then the consumer will be able to find out exactly whether he ought to buy the article or not. That is what is required here, and this legislation is generally demanded. I have received a great many letters and communications from Missouri and from other parts of the country, from people who are pressing this measure upon us. Therefore, perhaps I have shown a little impatience in getting it before the Senate, but it is my desire, if possible, to secure the passage of the bill at the earliest possible moment.

Mr. WHITE. Mr. President, as I understand, there are several amendments pending to the filled-cheese bill. I think when the measure was under discussion three or four days ago that a member of the Senate proposed as an amendment the Dingley bill, so-called, and I also remember that an amendment was proposed with reference to a tariff upon wool.

Mr. ALDRICH. There is no amendment pending except the one which has been stated.

Mr. WHITE. I am informed that those amendments have not yet been proposed, and therefore they are not now, perhaps, subject to discussion. I think notice was given, however, that such amendments would be proposed.

Mr. MITCHELL of Oregon. I will say to the Senator from California that I gave notice of an amendment, and I propose to offer it.

Mr. WHITE. If I understand the Senator from Oregon, or if my recollection is correct, he proposes to offer the Dingley bill as an amendment.

Mr. MITCHELL of Oregon. I propose to offer as an amendment to the pending bill the Dingley bill, pure and simple, without the change of a word, the dotting of an "i" or the crossing of a "t."

Mr. WHITE. I call the attention of the Senator from Ohio to that subject. I do not know how he desires us to vote upon the Dingley bill in this connection.

Mr. President, so far as the filled-cheese bill, pure and simple—if it can be called either pure or simple—is concerned, I am opposed to it, because I do not believe that the Congress of the United States has any right to engage in legislation of this character. We might just as well legislate regarding every article that is manufactured or sold within the borders of a State, and pressing this subject to its logical conclusion, we might take charge of all the domestic affairs of the States, almost infinite in variety and importance.

There is unquestionably much fraud in connection with the sale of filled cheese. There is no doubt that this article is sold—and all the evidence before the Committee on Finance demonstrates that fact—as true cream cheese, but a corresponding statement might be made with reference to a thousand or ten thousand other food products. It seems to me that there are other topics legitimately and fairly committed to the care of Congress adequate to command our patient attention without entering into such numerous subjects as those suggested by this bill.

I have been requested by citizens in my own State, persons for whom I have a great deal of respect, and who are engaged in legitimate dairy business, to vote for this measure; but I can not do so with my view of my duty under the organic law, much as I should like to please personal or political friends.

I have opposed anything in the nature of a filibuster on this bill. I think it is proper and right that those who favor this measure and who represent the sentiments of a very large and respectable number of the American people should have an opportunity for a final vote, but I shall not support any amendment except such as is strictly germane to the measure itself. I shall vote for the amendment advocated by the Senator from Missouri [Mr. VEST] by which he designs to restrict the operation of the bill to cheese exported from the State where manufactured, for I do not think it a legitimate matter of national legislation to enter upon the State domain for the purpose of enforcing police regulations regarding property which never has been and never can be used for any purpose without that State's jurisdiction.

Mr. President, I will not extend the discussion of this matter. The amendment intended to be proposed by the Senator from Oregon [Mr. MITCHELL] is legitimate, if this be a revenue measure. We know, Mr. President, that the name given to this bill indicates that it is a revenue measure. But this name is merely a cunning method of obtaining jurisdiction by the use of the revenue power given to Congress, when, as a matter of fact, we are not legislating for the collection of revenue at all. The object of this bill is shown by those who have spoken concerning it, and by every advocate before the committees and out of the committees, is to prevent the perpetration of a fraud upon those who consume cheese food and upon those who manufacture it. We are informed—and such is the fact—that several of the State legislatures have absolutely prohibited the manufacture of filled cheese upon the ground that it is not fit to eat; and yet we are about to place ourselves in a position where we must say to the people of the United States: "We hereby authorize the manufacture of this article under the restrictions contained in this bill." This is not the language of the bill, but it is fairly inferable from it. Senators in whose States this prohibitive legislation has been enacted, and who themselves have advocated it, are here in direct contradiction to their home theories, seeking to legalize by process of national legislation that which locally they declare should be inhibited.

Mr. VEST. If the Senator from California will permit me, the State of Maryland, the State of Minnesota, the State of Michigan, and, I believe, the State of New York—though I am not certain about New York, but I have so heard—have absolutely prohibited the sale or introduction into those States of what is known as filled cheese.

Mr. WHITE. The Senator from Ohio [Mr. SHERMAN], in his very able remarks, has sought to convince us that the use of filled cheese is injurious to health. This is a matter upon which I do not feel myself competent to pass. The Secretary of Agriculture, whose authority has been doubted heretofore by some of the participants in debate upon other subjects, tells us in a report made by him that it is not injurious to health, but he thinks it ought to be stamped "lard cheese," so as to show its actual composition as nearly as possible. But the Senator from Ohio rests his case, so far as his appeal to us is concerned, upon the theory that filled cheese is injurious to health and that its manufacture is detrimental to the dairy business. He rests his case, so far as the constitutionality of this enactment is involved, upon the idea that it is a revenue measure.

Mr. NELSON. Mr. President——

The PRESIDING OFFICER (Mr. PLATT in the chair). Does the Senator from California yield to the Senator from Minnesota?

Mr. WHITE. Certainly.

Mr. NELSON. I supposed the Senator from California was through. I do not desire to interrupt him.

Mr. WHITE. I shall retain the floor but a moment longer, Mr. President.

The Supreme Court, it is said, has sustained this kind of legislation. That is true enough, but it is because the Supreme Court of the United States has not been able, owing to its limited power, to penetrate the cloak covering such enactments. In several of the States there are constitutional provisions prohibiting the legislature from making any appropriations of money except for labor performed or for contracts executed in pursuance of law; and yet there are cases where money has been absolutely appropriated by the State legislatures without any consideration at all; and such laws have been upheld, because the several courts of those States have decided that they are conclusively bound to assume that the legislature enacting such bills found that there had been labor performed, service rendered, or work done pursuant to contracts legally made; and so when we pass a bill declaring it to be a revenue measure and provide for the collection of some revenue, however small it may be, that the Supreme Court will sustain us upon the theory that we have acted in good faith, and will not assume that we have done that which the Senator from Ohio advises us here to do as a means of evading the terms of the Constitution. The court will presume that we have not done that which we have in fact done.

Mr. TELLER. Will the Senator permit me to ask him a question?

Mr. WHITE. Yes, sir.

Mr. TELLER. Does the Senator think if we pass this bill it will specifically repeal acts of the State legislatures by which they have interdicted this kind of business?

Mr. WHITE. I have made no such intimation whatever. I know it will not.

Mr. TELLER. I supposed it would not; but I did not quite understand the Senator.

Mr. WHITE. There is no question about that. I made reference to such State legislatures, not because I assumed this bill

would overturn the action of the State legislatures in prohibiting the manufacture of filled cheese, any more than it could be said that because the United States issue licenses for the sale of liquors there can not be any prohibitory legislation by the States. I referred to the fact that gentlemen who assisted in the enactment of State laws absolutely prohibiting the vending of this article were, it seemed to me, personally inconsistent in attempting to license it by national legislation. A compound dangerous to health should not be tolerated anywhere. But this bill comes here under the false pretense made to sustain its validity that it is a revenue measure.

As I before stated, I shall interpose no obstacle to the obtaining of a final vote upon this measure on its merits. On the contrary, I will endeavor to facilitate action upon it.

Mr. GEAR. Mr. President, I have here a letter from the Chief of the Chemical Division of the Agricultural Department in reference to this subject, which I should like to have the Secretary read.

The PRESIDING OFFICER. The Secretary will read as requested, in the absence of objection.

The Secretary read as follows:

UNITED STATES DEPARTMENT OF AGRICULTURE,
DIVISION OF CHEMISTRY,
Washington, D. C., April 13, 1896.

SIR: "Filled cheese" is a trade term given to cheese which is made from skim milk. The deficiency in fat is usually supplied by the addition of lard. In all the samples which have been examined in this laboratory the added fat has been found to be lard. It is said that only the purest leaf lard of a neutral reaction is used for filling, but this, of course, can not be confirmed by our own investigations, which have extended to only a few samples. The lard found in the samples examined by us has apparently been of a high grade of purity.

The casein, or cheese-making property, of filled cheese and full cream cheese does not differ greatly in amount, and from an ordinary analysis the two kinds of cheese might be easily confounded, as they may have the same quantities of water, of casein, and of fat. If, however, the fat be examined the difference between the two cheeses is readily appreciated; in the full milk cheese the fat present being butter fat, while in the filled cheese nearly the whole of the fat present is lard or some fat foreign to milk. I inclose a table giving some data of analyses which have lately been made in this Division.

The fraud which is practiced in the case of filled cheese is in the abstraction of a more valuable and the insertion of a less valuable fat, the price of lard being, as a rule, much less than the price of good butter. Thus the skim milk which is left after the separation of the cream, by setting or by mechanical appliances, and which is of very little value, can be turned into a cheese which in appearance and general properties resembles very nearly that made from full milk. It is not difficult to discriminate, however, between the taste of a full milk cheese and that of filled cheese, and especially for cooking purposes. When the cheese is to be cooked as a whole or where it enters as an ingredient in other foods the difference is most marked. As an illustration of this it may be said that it is quite impossible to make a presentable Welsh rabbit from a filled cheese.

The fraud in filled cheese can not properly be said to be a nutritive one, inasmuch as the nutritive value of the lard which is added is probably nearly the same as the fat which is abstracted. In my opinion there would be no objection to the manufacture and sale of filled cheese as such if it were clearly labeled, sold, and bought as filled cheese. The fraud as in the case of oleomargarine, consists in selling this adulterated article for the genuine, and it is for the prevention of such fraud as this that legislation would be especially valuable. You will pardon me if I suggest, however, that special legislation directed against a single article of food can never secure the approbation of the community to the degree which would be accorded to general legislation against food adulteration. All these cases should be covered by a general law, easily enforced, and which would command the undivided support of the public.

I shall be glad at any time to offer any suggestions which you may ask for in regard to this subject.

Respectfully, H. W. WILEY, *Chief of Division.*

Hon. JOHN H. GEAR,
United States Senate, Washington, D. C.

[Inclosure.]

Results of analyses of samples of filled cheese sent to this Division by the House Committee on Agriculture.

In the analyses represented below the samples are designated by serial numbers which were given to them on their arrival at the laboratory. The substances whose percentages were determined directly were water, fat, ash, casein or nitrogenous matters, and the Reichert number. The data calculated from the results of analyses are the pounds of fat for 1 pound of casein, pounds of fat per pound of solids not fat, percentage of cream removed before the cheese was made, and sugar and undetermined bodies. The Reichert number represents the total proportion of volatile acids in the fat. For a pure butter this number is 28, while the low numbers obtained show the extent to which the butter fat had been removed in the cream. The other data need no further explanation.

Serial No.	Pounds fat for pounds casein.	Pounds fat for 1 pound solids not fat.	Water.	Fat.	Ash.	Casein.	Reichert number.	Cream removed (per cent).	Sugar and undetermined.
14432	0.97	0.80	29.81	31.13	3.93	32.13	7.29	65–75	3.00
14662	1.21	.87	12.20	40.82	4.85	28.21	5.00	75–85	13.92
14686	1.53	.98	31.09	34.02	5.44	22.25	1.80	85–95	7.20

The average ratio of fat to casein in full milk cheese is 1 pound of casein to 1.46 pounds of fat. The average ratio of fat to solids not fat in full milk cheese is 1 pound solids not fat to 1.17 pounds fat. No. 14662, the second in the above samples, was in an abnormally dry condition when received.

H. W. WILEY.

Mr. GEAR. Mr. President, I am certain in my own mind that the article of filled cheese is not so nutritive and healthful as the genuine article of dairy cheese. It is a serious damage to the people of the State which I in part represent. There are a million people in Iowa engaged in farming. They own in round numbers 1,500,000 dairy cows. The value of a large amount of cheese manufactured in that State is seriously endangered by the permission to ship into it from other States the article called filled cheese.

The Senator from Ohio [Mr. SHERMAN] has stated that he does not understand that filled cheese is falsely branded by the persons who manufacture it. I beg to differ with him. It is in evidence, given to me by the dairy commissioner of my State, that filled cheese is shipped into Iowa marked "First-class Iowa cheese," "Full cream cheese," "Dairy cheese," and so on, and as such it is sold and has been sold in numerous and numberless instances to the people whom I in part represent.

Mr. GALLINGER. And it is going on all over the country.

Mr. GEAR. And, as the Senator from New Hampshire says, it is going on all over the country. Yes; that is so.

Now, I hold myself that when filled cheese comes in conflict with and is sold for the genuine article, as oleomargarine was sold for pure butter, it is wrong. The people who make it have a perfect right to manufacture it if they wish to, but they should be compelled not only by State but by national law to brand it exactly what it is.

The farmers in my State suffer each and every year to the extent of nearly $3,000,000 by the adulteration of lard by the introduction into the manufacture of lard of cotton-seed oil produced in the South. I do not doubt that lard manufactured or adulterated in that way is healthful. I know it is. I know that cotton-seed oil properly prepared is a healthful product; but the fraud comes in in marking it as first-class leaf lard and pure family lard.

It is an evil which my people will not stand if they can prevent it. The result of the manufacture of filled cheese on the farmers of this country is very damaging. A few years ago we exported an immense amount of cheese to Europe, especially to England. Let me call the attention of the Senate to a table prepared by a friend in the other House regarding the exportation of dairy cheese. Early in the fifties, sixties, and seventies the United States constantly increased the amount of her dairy products and their exportation. Canada at that time, our neighbor on the north, had but a small export trade in this article. From 1881 to 1885 we exported each year on the average 118,831,685 pounds, while Canada exported 61,502,949 pounds. The export trade from the United States has gone on declining each and every year until 1895, when we exported only 60,448,421 pounds, while Canada exported 146,004,650 pounds. That, it seems to me, shows that it is a damage to the American farmer, and if we can prevent it by legislation we certainly ought to do so, in my judgment.

The result has been that we are falling off constantly in our exports, and the reason why Canada gains is that she prohibits by enactment of her Parliament the manufacture of filled cheese or any product of that kind. I think we owe it to the farmers of this country, who are getting so little legislation in these days, and who have got so little in the past, that we should protect them by all means that we can, and should pass the pending bill without amendment.

It is simply, in my opinion, a bill to regulate this industry, not so much for revenue, for revenue is an incident, and I am frank to say that we take advantage of that clause of the Constitution which gives us the police regulation of these matters to impose a small revenue, so that Congress can control it. I think we should exercise that power in every way we can to protect the farmers. It makes a vast difference to the people of this country. The oleomargarine act has been a great measure for Iowa and a great measure for this country. The value of dairy products in my State one year with another amounts to nearly as much as the silver product of this country, and in one year exceeded the value of silver.

Congress has no right, in my judgment, to strike a blow at the farmers of Iowa and of this country by the nonpassage of an act of this kind. The sale of filled cheese has been prohibited by stringent regulations in Iowa, and you can not now buy a pound of filled cheese in that State, notwithstanding it has been shipped into the State in the past and came in competition with our own dairy products, being branded as "Cream cheese" and "Iowa dairy cheese," etc.

Mr. VILAS. Mr. President, I have great respect for the opinions of gentlemen who oppose a bill because they feel they will exceed by its passage the constitutional authority which is vested in them as Representatives or Senators, and if I could agree with that opinion in reference to the pending bill I should be compelled to vote against it, however important I might think it to the interests of the country, and especially to the agricultural interests, which have been sorely injured by the invention of this fraudulent manner of dealing with the particular product in question.

I wish, therefore, to make a few remarks from the standpoint

of the Constitution, as it seems to me, and most considerately of the opinions of those who differ. As I recognize the objection, there is no pretense that the bill, when it shall be enacted into law, will not be supported by the courts as strictly within the constitutional authority of Congress. It is framed upon the exact lines of the oleomargarine bill as it passed Congress and as it has been sustained by the Supreme Court.

Mr. VEST. What decision, may I ask the Senator from Wisconsin, sustained that law?

Mr. VILAS. I have not the decision at hand, but I understand that the act has been passed upon by the Supreme Court.

Mr. VEST. I beg the Senator's pardon.

Mr. VILAS. I may be mistaken in reference to it, for I did not take the pains to look up the decision, but I was informed that it has been passed upon.

Mr. VEST. If the Senator will permit me, without breaking into the line of his argument, I will be obliged to any Senator who will find me or point me to a decision of the Supreme Court of the United States which declares that the oleomargarine law is constitutional. In the case of Eaton, reported in 144 U. S., the Supreme Court passed upon a regulation of the Interior Department which was required by the oleomargarine act, and said that a dealer in oleomargarine could not be fined and imprisoned for a violation of that regulation. But there is not one word in that decision which says that the oleomargarine law is constitutional or a proper exercise of the taxing power.

In the case of Plumley *vs.* Commonwealth of Massachusetts, which I have before me in pamphlet form from the clerk's office of the Supreme Court, the Supreme Court passed upon a law of Massachusetts and upon that law alone. It declared that when coloring matter was put in oleomargarine for a fraudulent purpose, in order to pass it off for creamery butter, the legislature of Massachusetts had the right to make it a misdemeanor under the recognized and palpable police power of the respective States. But there is no decision by the Supreme Court of the United States directly affirming the constitutionality of the oleomargarine law.

Mr. VILAS. The Senator from Missouri may be right in respect to it. I will not affirm that the constitutionality of the eleomargarine law has been, in its entirety, passed upon by the Supreme Court, certainly not in view of what the Senator has stated on the subject. The circuit court of appeals in the Eighth circuit has passed upon it. The supreme court of the District of Columbia has passed upon it within a few days, and the decision of the Supreme Court of the United States in one or two cases, incidentally, and in some other cases, I think, has practically covered the ground.

Mr. VEST. If the Senator will permit me, I will concede this much, to help his argument, whatever my opinion as a lawyer may be worth. I have not the slightest doubt that the Supreme Court would, upon the face of the oleomargarine law, unless they take into consideration the fifteenth section of that law, like the fifteenth section of the pending bill, assume that individual legislators had not violated their oaths to support the Constitution and had passed the law in order to collect taxes. But if the real meaning and intent of the law were put on the face of it, the Supreme Court would declare it to be null and void. And what I complain of in this legislation is that it is a pretext, a fraud upon the face of the proposed law to say it is an exercise of the taxing power.

Mr. VILAS. The Senator from Missouri practically admits what I say about that, and puts himself upon the very ground upon which I was about to place the opposition, as I understand it. That this bill when enacted will be regarded as a constitutional law whenever it is presented to the court, I apprehend nobody here is likely to deny. The oleomargarine law has been upon the statute books now for nearly ten years, has it not? I have forgotten the exact date of its passage.

Mr. VEST. It was passed in 1886.

Mr. VILAS. It has been upon the statute books about ten years, but nobody has yet challenged the constitutionality of it in such way as to bring it before the Supreme Court, at least.

Mr. VEST. If the Senator will permit me again, I will state that it is nobody's interest to challenge it, because the men who have a monopoly of making oleomargarine want the law to stay as it is. If you apply to Mr. Armour and to Mr. Nels. Morris they will tell you there never was a law which put so much money into their pockets as the oleomargarine law.

Mr. VILAS. I do not know what Mr. Nelson Morris and Mr. Armour may say on the subject. We do know they resisted the passage of the law with all the power they could bring to bear on the subject, and with the aid of all the constitutional lawyers they could get impressed with the idea that it ought not to be adopted. If they have changed their opinion, I am aware of no public expression to justify us in that belief.

Mr. VEST. They have not attacked the law.

Mr. VILAS. They have not attacked the law, because they have been advised, undoubtedly by every lawyer they have consulted, that there is no chance of its being declared unconstitutional.

Mr. VEST. If the Senator will permit me—and I will not interrupt him again——

Mr. VILAS. I do not object to the interruptions.

Mr. VEST. I should like him to state as a lawyer whether he believes that the fifteenth section of the proposed law, which provides for the inspection of the article of filled cheese (it is the same section copied in haec verba from the oleomargarine law, providing for an inspection of oleomargarine by officers of the Government to determine whether or not it is a deleterious product) is a part of the taxing power of the United States?

Mr. VILAS. I do not have any difficulty with the question of constitutionality, for although it may not be a part of the taxing power yet it may be incidentally necessary to the exertion of the taxing power, as we have provided in revenue laws a great many stringent inspections in order to collect the revenue upon liquors. But nobody can doubt for an instant that the provisions are constitutional for the most part. There may be now and then some unconstitutional excess.

Mr. GEORGE. Will the Senator allow me to call his attention to the last half of section 16?

Mr. VILAS. I have not that section before me.

Mr. GEORGE. It supplements section 15.

Mr. VEST. It is the confiscation clause.

Mr. GEORGE. It uses these words:

> And all filled cheese intended for human consumption which contains ingredients adjudged as hereinbefore provided—

That is, by the commission—

> to be deleterious to the public health, shall be forfeited to the United States.

Does the Senator think that is constitutional? It provides for forfeiture without trial by jury upon a mere declaration of one of the bureaus of the Departments of the Government.

Mr. VILAS. If you were to separate the latter part from the first, there would be a very different question raised in respect to it from what perhaps would be raised upon the whole section.

Mr. GEORGE. Take the whole section.

Mr. VILAS. But I take it that there is no difficulty at all with the section which provides for forfeiture of property which is required by law to pay a tax by stamp and the tax is not paid.

Mr. GEORGE. That is not the provision of the last half of the section. It is forfeiture upon the finding by the Surgeon-General of the Army that it contains a deleterious ingredient.

Mr. VILAS. I desire to take up this argument from a little different standpoint, and afterwards, when we have the foundation of the argument upon which I am presenting the case before the Senate, if any Senator desires to ask questions with reference to a particular matter, it will certainly be my pleasure to answer him as well as I can.

Mr. GEORGE. I will postpone the question until that time.

Mr. VILAS. To start again, I recur to the proposal which I made as the basis of the argument I was about to submit and which the Senator from Missouri finally, as I understand him, agrees to as a matter of law; that is, not limited to some particular provision in the bill, but with reference to the general structure and principle upon which the bill is based, that it is constitutional in a judicial sense, so that the courts would enforce it as they find it on the statute books.

Mr. VEST. Of course the Senator does not want to misquote me.

Mr. VILAS. Certainly not.

Mr. VEST. I never would admit that the proposed act is constitutional, judicially or extrajudicially, or in any other way. I simply mean to say that the Supreme Court of the United States, finding that we had passed a law which ostensibly upon its face is to collect taxes, would say, "It is to be presumed that every legislator voted for the bill as a revenue measure, and we can not go outside of the text of the law to ascertain what is the object of the bill." If you were to put the real object upon the face of the bill and show that it is a police power, as it is, which is to be conferred, and that the revenue, as all Senators admit, amounts to nothing, then the Supreme Court would declare it to be unconstitutional; and I am called upon, and every other Senator, knowing distinctly that this is an invasion of the Constitution, to vote for a bill which the Supreme Court possibly can not reach because of their courteous conclusion that we had not violated the Constitution, but had passed a law for legitimate purposes.

Mr. VILAS. The Senator from Missouri is stating again precisely what I understood before, and I think I correctly characterized it in a single adjective when I said that it is constitutional in a judicial sense; that is, from the point from which courts must view it, which is what I meant, for I intended then to address the argument I am about to make to the point of the objection which the Senator from Missouri now insists upon, namely, that the motive which he understands to underlie it renders the bill an unconstitutional exercise of power by Senators or Representatives

in passing it, although the courts would be obliged to find it constitutional.

I wish first, therefore, to call distinct attention to the proposition that this is the exercise of the constitutional power of taxation, and that the right to exercise it is given by the Constitution. Now, have we the right to exercise that power in this particular case? Senators say no, because we are exercising it inspired by the motive of regulating a subject of interstate and foreign commerce.

Mr. VEST. Oh, no! Within the States.

Mr. VILAS. I will come to that point in a moment. I want first to draw attention, not to what we are wrongfully accused of desiring to do, but to the true governing motive which actuates this legislation.

We are not seeking by this legislation to exert a police power in the States, or to intrude upon or in any way to dispossess the States of any internal police power. I recognize what the Senator from Missouri has shown by the decision of the Supreme Court; that just so far as the proposed act shall be the assertion of a mere police power within the several States, it will be held void, because as the State can not intrude upon the power of Congress to regulate interstate and foreign commerce, so Congress can not intrude upon the power of the State to exert within its own borders the true police power.

So I desire to call attention first to the motive which does actuate Senators who do favor the legislation. I wish to point out that we are governed by the desire to regulate interstate and foreign commerce, and that so far as I am concerned I find the right to regulate interstate and foreign commerce ample and sufficient to justify the exertion of every particle of the power which is exerted in this bill, unless there may be some particular instance to which I have not given attention that is a mere speck on the general effect, purpose, and scope of the bill.

In other words, I say no object which the Constitution has authorized Congress to pursue is an unconstitutional object, and that Congress may properly address to its accomplishment whatever power the Constitution has invested it with. That is the proposition. We can not be accused of dealing unconstitutionally when we are seeking only to enforce a power which the Constitution has given us to exercise, and which it has made it our duty to exercise.

Mr. President, this is the third of the enumerated powers in the Constitution. It follows after the power to levy taxes, which is the first, and the power to borrow money, which is the second. Thus really the very first of the duties laid down in the Constitution for Congress to discharge for the general welfare of the country is the power and duty to regulate commerce.

Mr. VEST. The general welfare?

Mr. VILAS. The general welfare is not prescribed as one of the powers of Congress. It is given power to levy taxes in order to promote the general welfare, but the power given is to levy taxes. As we have often argued (and I agree with my friend on that subject and I do not think he means to assert a different principle now), the general welfare is to be accomplished by the exertion of the other powers which are given in the Constitution, not that the power to levy taxes to promote the general welfare meant that whatever Congress saw fit to do was to be regarded as a promotion of the general welfare, and taxes might therefore be levied for that end; but the power to levy taxes to promote the general welfare is simply to levy taxes to be expended in the exercise of the other powers thereafter enumerated in the Constitution as those with which Congress was invested; and first of all those enumerated, first in the scale of importance in the estimation of the Constitution makers, was the power to regulate commerce between the States of the Union and with foreign nations and with the Indian tribes.

Well might it be said to be so. The free commerce on this continent among the numerous States between the Atlantic and the Pacific is the greatest illustration of the beneficial influence of free trade that has ever been presented anywhere. No other area on this globe begins to enjoy so much of prosperity from enlarged and free intercourse as that part of the American continent which constitutes the dominion of the United States. The exclusive superintendence and control of that commerce was necessarily vested in the Federal Government, if there was to be the realized future which we have come to see in part. No duty can be superior to that which is thus imposed upon Congress by the Constitution, the duty to regulate commerce between the States and with foreign nations.

Let us observe the next important fact, which is that the States are powerless to do this for themselves. The Supreme Court have repeatedly determined that it is a dominion of legislation from which the legislatures of the States are utterly excluded.

Let me draw attention for a moment to the opinion of the court in the Head Money Cases. In that case a tax of 50 cents per head levied by Congress upon immigrants from foreign countries, with the design only of promoting the good order of immigration, was under consideration. It was said that the court had never yet declared the power of Congress to pass such a tax law. The court says on it briefly that, though the previous cases in this court on that subject related to State statutes only, they held those statutes void, on the ground that authority to enact them was vested exclusively in Congress by the Constitution, and necessarily they decided that when Congress did pass such a statute, which it had done in the case then at bar, it would be valid.

I can not understand how any honest-minded man, however scrupulously observant of his oath of fidelity to the Constitution or tender of every phase of that obligation, need hesitate about the exertion of any power committed to Congress for the purpose of accomplishing any rightful end which Congress is bound under the Constitution to seek, because, the end being a constitutional one, the duty to attain it most perfectly is of the highest constitutional import and obligation, and the exertion of that power which will most efficiently accomplish the desired and constitutional result is the most faithful execution of the duty imposed upon Congress.

So the court in the Head Money Cases say that the tax was levied to accomplish a humane and proper regulation of commerce, commerce by immigration; and therefore, though it was called a tax, and perhaps could be supported as a tax, its true and proper constitutional motive and its constitutional support lay in the fact that it was levied as a regulation of commerce.

Mr. GEORGE. I should like to ask the Senator from Wisconsin a question, to see if I understand his position.

Mr. VILAS. I yield with pleasure.

Mr. GEORGE. Does the Senator wish to be understood as defending the constitutionality of this proposed tax upon the ground that it is a regulation of interstate and foreign commerce?

Mr. VILAS. I am saying that, so far as any other motive intervenes to secure the passage of this law than the motive of raising revenue, it is the motive of regulating interstate and foreign commerce.

Mr. GEORGE. That being the end, and the other the means of accomplishing it?

Mr. VILAS. Yes. So far as that is the end, so far the other is the means. That is precisely the argument I am making.

Mr. GEORGE. I merely wished to understand the Senator; that is all.

Mr. VILAS. Now, understanding that basis of our legal, constitutional power, let us just see for a moment where we are.

Within a few years an absolutely new manufacture has sprung up, the making of what is called filled cheese, a new invention. After all that has been said here it does not need to be added that it is a gross fraud in the manner of its manufacture and sale. A thing worse than skimmed-milk cheese (which the Senator from Missouri animadverted upon perhaps with remembrance of some time in early youth when he had more particular reason to dislike it) is made and put upon the market as if it were the very best product of cheese from dairy milk. It has not only been skimmed, so to speak, but by machinery very much more perfect in its accomplishment than the old skimming dish of the dairywoman; by machinery so perfect that by its use the last particle of oleaginous matter is expelled from the milk, and therefore the machinery-skimmed milk is more deleterious than that skimmed in the dairy.

An oil made of lard, lard not heated enough even to destroy the trichinæ, if they happen to be there, is injected into the milk by the use of steam in such a way as to simulate the restoration of the natural butter properties of fresh milk; and out of such a substance something called cheese is manufactured by flavoring and coloring, and so made into the likeness of cheese that for a time after its manufacture it is incapable of being distinguished, at least by any ordinary person. I suppose it requires a chemist to tell the difference for the time being. But after a while, and no very long while, this new substance, so I am informed, by chemical action in the counterfeit fat which has been put into it, becomes changed. Chemical action changes the oils so that the cheese will appear spotted when it is cut. But that does not take place for some time after it is made, as I am informed.

Now, such a product as that costs only 4½ cents a pound to make. It is put upon the market bearing such a perfect resemblance to cream cheese as that it can not be distinguished from it, and cream cheese can not be made and sold for less than 12 or 14 cents a pound. What is the result? This miserable product of fraudulent ingenuity is sold to the people of our country at the price of cream cheese. The Senator from Texas [Mr. MILLS] spoke the other day about our interfering with the price of cheap food to the poor. This very act will put the price of that product down to where it ought to be, if the poor are obliged to eat filled cheese instead of honest cheese. We want to distinguish the article so that the poor will not be cheated, nor anybody else who buys cheese.

The Senator from Missouri [Mr. VEST] said in his argument this morning that this tax will be a tax upon the poor people. If

the poor people desire to buy filled cheese because it is cheaper this tax will be welcomed as a boon by them, for instead of their paying twice the price they ought to pay for a fraudulent article they will at least buy that article knowing what it is, and with competition in it, which will put the price down to where it belongs. It can not be held up to the price of cream cheese after it has had the fraudulent cover stripped off from it, and the tax which will be paid of a cent a pound will be accompanied by several cents a pound of relief in price to those who will pay it.

Mr. VEST. If the Senator from Wisconsin will permit me, I do not propose to be put in the attitude of defending any sort of fraud in branding or otherwise. Mr. Sherwin, one of the principal manufacturers, or the attorney for the principal manufacturer of filled cheese, appeared before our Finance Committee, and here is his testimony. He said that they desired a law to be passed by Congress which would require the filled-cheese manufacturers to brand their filled cheese what it is, and that they had no objection whatever to inspection laws being passed by Congress; that, on the contrary, they desired them. I am just as much opposed to Mr. Sherwin as I am to the views of the Senator from Wisconsin. Without any reference to the fraud, with which I have nothing to do and which does not touch my position at all in the case, my position is that Congress has not the constitutional power to go into my State and inspect products of that State which are not intended for foreign or interstate commerce. When the Senator says that he is voting for this law because it applies to interstate and foreign commerce, he ignores the fact that there is not one word in the bill that confines it to those objects. If you will put such an amendment on it I will vote for it.

Mr. VILAS. I am going to deal directly with every aspect of the case, for I recognize the Senator's position, I think, with clearness and distinction. I wish to make another step or two of progress before I reach it.

So far as the testimony of the attorney of the manufacturers of filled cheese is concerned, I do not think we ought to give much time to that. If they were so anxious to have their product branded as filled cheese they probably would not have stamped over every cheese they made the fraudulent lie that it is the best Ohio cream cheese or the best Wisconsin cream cheese.

Mr. VEST. He denied that. He said it was not true that they did so.

Mr. VILAS. The Senator from Missouri will not doubt one thing, and that is that the testimony before the Committee on Finance showed that this cheese was invariably sold to the customer under a brand of some such character.

Mr. VEST. No, Mr. President, that was not the testimony. I heard every word of it and paid very close attention to it. There was a difference in regard to the testimony, as there always is in such cases.

Mr. VILAS. That was the weight of the testimony.

Mr. VEST. There were witnesses who testified that they had known such instances, and then these manufacturers swore that they never had done anything of the kind. The principal witness in that regard was an officer of the Internal Revenue Department, who said he had tracked certain filled cheese and that the boxes had come back branded "Elgin cheese," or something of that sort. That was the testimony. There was not a concurrence of testimony about it. I do not care anything about that part of it.

Mr. VILAS. Without stopping to read testimony, which I did not intend to do at the moment, and I will not, I had supposed there was nothing better established before the Committee on Finance than the fact that this cheese found its way to customers under a fraudulent brand.

Mr. VEST. They claimed that the retailers did it.

Mr. VILAS. It is the "other fellow" who does it always, of course. But the fact is that the cheese finds its sale by reason of its fraudulent brand.

Now, I wish to note another thing. This whole business is practically interstate and foreign trade. Our distinguished friend from Missouri speaks of it as if a great portion of it were infrastate trade. It is not. This whole scheme of rascally invention is for interstate and foreign commerce. Within the State there is very little opportunity for the trickster; within the State the people are on their guard against it; and the fraudulent manufacturers of filled cheese about Elgin, Ill., do not sell their products to the people of Illinois except in the course of interstate and foreign trade. They sell directly or indirectly to the Southern States and foreign countries, and it goes off by the ton, marked "Best Wisconsin cream cheese," "Best Iowa cream cheese," etc.

Now, Mr. President, that being the nature of the trade, it is against it, as interstate and foreign commerce, that we are objecting and seeking to interpose regulation. As the Supreme Court said in the Head Money Cases, speaking of the tax imposed there:

> That the purpose of these statutes is humane, is highly beneficial to the poor and helpless immigrant, and is essential to the protection of the people in whose midst they are deposited by the steamships is beyond dispute. That the power to pass such laws should exist in some legislative body in this country is equally clear. This court has decided distinctly and frequently, and always after a full hearing from able counsel, that it does not belong to the States. That decision did not rest in any case on the ground that the State and its people were not deeply interested in the existence and enforcement of such laws, and were not capable of enforcing them after they had enacted them, but upon the ground that the Constitution, in the division of powers which it declares between the States and the General Government, has conferred this power upon the latter, to the exclusion of the former. We are now asked to decide that it does not exist in Congress, which is to hold that it does not exist at all—that the framers of the Constitution have so worded that remarkable instrument that the ships of all nations, including our own, can, without restraint or regulation, deposit here, if they find it to their interest to do so, the entire European population of criminals, paupers, and diseased persons without making any provision to preserve them from starvation and its concomitant sufferings, even for the first few days after they have left the vessel.

In like manner it is to be observed that the purpose of this act is humane; is highly beneficial to the interests of our countrymen; is essential to the protection of the people who are engaged in the great agricultural pursuits upon which the prosperity of the country must depend, and to the protection of consumers who can hardly otherwise escape the consequences of successful fraud and imposition. That the power to pass such a law should exist somewhere is so obvious as to require no argument. That it does not exist in the States the Supreme Court has decided. That it does exist in this Congress under the power to regulate commerce is as reasonable and perfectly satisfactory as it is that the power to purify and regulate immigration is a part of the power to regulate commerce given by the Constitution. Therefore the end which is sought by this bill, so far from being a fraudulent and unconstitutional end, is one of strictest constitutionality as of the highest importance; and it is strange, indeed, that able and excellent gentlemen, incited by a preconception in respect to the strict construction of the Constitution, which never has been observed as they would observe it, not even by themselves, and never could be in government, are found throwing themselves like a Swiss bodyguard in desperate phalanx around some fraud when they are seeking to insist upon the dignity of the Constitution.

Now, let me pass to one other point. I desire to ask, in answer to the only question which the Senator from Missouri puts, upon which he stands distinctively, can anybody devise a more satisfactory regulation than this bill proposes to deal with the evil against which it is aimed? The case is just the same as that of oleomargarine, and the bill which was passed with reference to oleomargarine had most beneficial results. It raised considerable revenue for the Government, a million and three-quarters a year. That article is sold upon the market for less than it was sold before, and instead of being a tax by which a food product is increased in price to those who buy it, it is a tax by which the price of a food product has been lessened to those who buy it. It is put under regulation, so that it is made pure, and the manufacture of it is conducted on much safer principles than before. As a food product, if it is one, it has been very much improved by the inspections under that law. At the same time its fraudulent competition with butter, to the injury of the dairy interests of this country, has been done away with.

This is a most considerate and fair bill in every respect. It does not interfere with the right to make this article of food, to vend it, to get anybody to buy it who will prefer the stuff at a cheaper price than good cheese is worth. There is no interference with the liberty of trade, even the liberty to trade in a deleterious food product, in respect to which it might be thought that Congress could well abridge individual liberty without peril to the principles upon which it rests. But the article is to be put under regulation merely. Its manufacture is to be subject to inspection, reported upon, and understood, and the thing itself so put upon the market that whoever buys it will do so with his eyes open and understandingly. That is the end of it, except that a tax is imposed upon it.

This tax is imposed primarily to maintain the expense of the enforcement of the regulations themselves. It is in that respect precisely like the duty put upon oleomargarine by a law of Congress, and supported primarily as a tax, but also as an expedient regulation of commerce, like the tax under discussion in the Head Money Cases already referred to. But it goes beyond that. It seeks also to raise whatever revenue may be derived from this article which is thus produced in such a manner as that it can fairly afford to pay a tax. It is not laid as a protective tax at all. The amount is not 20 per cent of the difference between the cost of filled cheese and honest cheese. It will undoubtedly produce considerable revenue, and in the same way as the tax upon oleomargarine produces revenue. It is therefore a just and proper measure.

But the Senator from Missouri and other Senators say there may be some of this filled cheese sold and consumed in the State in which it is made. Of course there may be. But it is less likely to be; because there the nature of the product will be better known, and consumers will be less likely to be deceived. But that is a mere incidental circumstance and, indeed, an insignificant one in comparison. It is shown that this whole trade is substantially interstate trade and foreign trade, to an inconsiderable

degree infrastate. It is for traffic beyond the lines of the State where it is made that the product itself is manufactured.

It may happen, it is true, that this tax will be laid upon some of the cheese made and sold in the State. But that in no wise goes to its constitutionality, even in spirit, for the reason that it is but an inevitable and necessary incident of the proper use of this power for a proper end, and because it is strictly necessary to its employment for that rightful and constitutional end. The motive and the power are to be judged by the substance of the effect sought and produced, not by the inescapable but accidental incidents.

I should say at once that the bill was open to the objection which the Senator from Missouri makes if it were true that we were seeking by this legislation to interfere in the State; but if we are pursuing a strictly constitutional and just end, and we are employing a power unquestionably given us, then the mere fact that incidentally the tax may happen to fall upon some cheese within a State in no manner goes to the rightfulness or the justifiableness of the motives with which we seek to impose the tax. The object is not to interfere with the intrastate dealing nor with the police power of the State. The object is simply to tax this article with a view to a regulation of commerce for the common benefit of the people of the United States.

Mr. GEORGE. Will the Senator allow me to ask him a question there?

Mr. VILAS. Certainly.

Mr. GEORGE. Then, why do you tax the manufacturer?

Mr. VILAS. Because that is the only way in which you can reach the object; that is the only way in which you can effectually deal with this article of interstate commerce.

Mr. GEORGE. Why should you not require the manufacturer to brand it as an article of food? Why levy a tax upon his business?

Mr. VILAS. We are levying the tax because he is engaged in a business which requires us to provide a regulation of commerce; and therefore we have a right to make that article pay the expense of the regulation and inspection.

Mr. GEORGE. Therefore you have a right to tax any manufacturer who makes goods which enter into interstate commerce?

Mr. VILAS. Certainly, if we confine ourselves to an article of foreign commerce by reason of frauds which the system of manufacture has imposed upon us. We may charge that article with a tax to cover the expenses of the regulation. I suppose nobody would object to a rebate or to any provision which would meet an objection of this kind. But these amendments, which are offered for the mere purpose of interposing an obstacle to the passage of the bill and not with a view of accomplishing the end apparently on the surface of the amendments, of course the friends of the bill must vote against.

Now, let me call attention to one point more, and I shall detain the Senate no longer. I was asked in reference to this clause in the sixteenth section. I happen to have in my hand what the Supreme Court said in respect to the oleomargarine law in the case of Plumley *vs.* Massachusetts, in 155 United States Reports. The decision of the court answers the whole force of the argument of the Senator from California [Mr. WHITE], which hardly needed answer, for he said he himself recognized that the proposition was erroneous and that this bill does not license the manufacturer of filled cheese at all; but here is the point of the decision.

Mr. GEORGE. Was not that decision as to an act of Congress?

Mr. VILAS. The oleomargarine law. Here is the decision:

> The act of August 2, 1886, chapter 840, 24 Statutes, 209, does not give authority to those who pay the taxes prescribed by it to engage in the manufacture or sale of oleomargarine in any State which lawfully forbids such manufacture or sale, or to disregard any regulations which a State may lawfully prescribe in reference to that article; and that act is not intended to be and is not a regulation of commerce among the States.

It stands as a taxing act before the judicial power. Then the court say another thing. Here is the statute of Massachusetts which was under discussion:

> "To prevent deception in the manufacture and sale of imitation butter," in its application to the sales of oleomargarine artificially colored so as to cause it to look like yellow butter and brought into Massachusetts, is not in conflict with the clause of the Constitution of the United States investing Congress with power to regulate commerce among the several States.

Let me read two or three sentences in reference to the question of deleterious food which the Senator from Mississippi [Mr. GEORGE] asked, showing what Justice Harlan said upon that subject in rendering the opinion of the court:

> The statute seeks to suppress false pretenses——

Mr. GEORGE. That is a State statute.

Mr. VEST. Yes; a statute of the State of Massachusetts.

Mr. VILAS. The court says:

> The statute seeks to suppress false pretenses and to promote fair dealing in the sale of an article of food.

Mr. GEORGE. That is exactly what the State has a right to do.

Mr. VILAS. I understand, but I want to draw attention to the words I am about to read. Let us see:

> It compels the sale of oleomargarine for what it really is, by preventing its sale for what it is not. Can it be that the Constitution of the United States secures to anyone the privilege of manufacturing and selling an article of food in such manner as to induce the mass of people to believe that they are buying something which in fact is wholly different from that which is offered for sale?

Mr. GEORGE. Against the State regulation on that subject.

Mr. VILAS. Of course. The court is speaking of the State statute, but it is equally applicable in spirit to the question of a statute of the United States.

Mr. President, I shall not detain the Senate longer.

Mr. CHANDLER. Mr. President——

Mr. VEST. Just a word, and I will yield to the Senator from New Hampshire with pleasure. I simply want to notice the quotation from the decision of Justice Harlan in Plumley *vs.* Massachusetts.

Justice Harlan pertinently asked the question, Is it possible that the Constitution of the United States interferes as to the prevention of the sale of a fraudulent product? No; because the Constitution of the United States gives the power to the respective States to prevent any such sale. If the Constitution of the United States destroyed that power and prohibited it to the States, then the criticism would justly lie as to such a provision. But what we contend for here is that this bill ignores the distinction between Federal and State power, and is a fraud upon the Constitution, because it perverts the taxing power to police purposes, not as to interstate commerce and foreign commerce, but, as the Senator himself admits, as to the product in a State, made in a State, sold in a State, and not intended to go outside of a State.

The Senator quotes from the Head Money Cases. His own quotation shows that Justice Miller made his decision upon the distinct ground that the power to regulate immigration was a part of the power given to Congress under the foreign-commerce clause of the Constitution, and no State has a right to interfere with it. It is an exclusive grant of power to Congress to regulate immigration; and if imposing the head-money tax upon immigrants was necessary, says Justice Miller, to perfect the execution of that power by Congress, then it was a legitimate exercise of power on the part of Congress to pass the head-money-tax statute. So the Senator is driven in his extremity to sustain this dairy interest to instituting a parallel between this miserable bill and the excise power of taxing whisky.

What is the whisky tax for? In all civilized nations of the world it is the principal object of excise taxation. In this country we have a large tax upon whisky to raise revenue to support the Government; and the advocates of this bill stand here and, with damnable iteration, repeat again and again that they do not want the revenue. I saw to-day upon this floor the projector of this bill in the other House, who appeared before the Finance Committee in order to press this bill, and I put the question to him distinctly, "Was this bill passed by the House of Representatives to raise revenue?" "No," he said, "we want to get hold of this filled cheese in order to inspect it." I said, "Do your States not prohibit it? You have done so in Michigan, in Minnesota, in Wisconsin, in Maryland, in New York." "Oh," he said, "so long as one single State fails to pass a law against filled cheese, they can export it from that State to the balance of the States of the country." See what a proposition that is. If every State in this Union does not pass a law prohibiting the sale or providing for the inspection of a certain article, then Congress must necessarily intervene, wrest the Constitution from its moorings, and usurp a power that was never given to it.

The police power is reserved to the States; and I charge here that it is being exercised fraudulently under the guise of the taxing power—in the face of the declaration by every Senator who has spoken, except the Senator from Wisconsin [Mr. VILAS], who has ingeniously endeavored to avoid it—for the sole purpose of exercising an inspection power, and not to raise revenue to support the Government.

Mr. CHANDLER. Mr. President, I am glad to hear the Senator from Missouri [Mr. VEST] restate his constitutional objection to this bill, because I rose to ask him to explain his views more distinctly upon that point. I recognize the Senator from Missouri as a great constitutional lawyer.

Mr. VEST. Oh, no.

Mr. CHANDLER. Almost, if not quite, as great as the Senator from Mississippi [Mr. GEORGE]; and I think I should be influenced, if I desired to be guided in voting upon constitutional questions by the advice of the constitutional lawyers upon the other side of the Chamber, rather by the Senator from Missouri and the Senator from Mississippi than by the Senator from Wisconsin [Mr. VILAS].

I do not exactly comprehend the full force of the argument of the Senator from Wisconsin. I shall vote for this bill as the legitimate use of the taxing power of the Government under the Constitution. The Senator from Missouri says that if we were to

put upon the face of this bill the exact motive which influences the legislators in passing it the Supreme Court would decide it to be unconstitutional. If I am mistaken in this statement, the Senator will correct me. I think he said that the decision that the law is unconstitutional will not be made, because the Legislature evades the Supreme Court by not putting upon the face of the statute the reason why the bill was passed. Now, I want to ask the Senator whether this is a correct statement of the object of passing the bill: Suppose the bill on the face of it or somewhere in the body of it contained the following:

"This bill raises public revenue by the taxation of cheese in various forms. It also regulates the manufacture of cheese so as to secure pure food and honest trade. The purpose of the Legislature is to do both those things. Both motives influenced the legislators. The strongest motive is to secure pure cheese and honest trade." There, I think, is as strong a case against this bill as the Senator from Missouri can make; that is to say, that the strongest motive, the principal motive, is to secure pure cheese and honest trade, and the desire to collect revenue is a minor and an incidental purpose. If this statement was right upon the face of this bill, I ask the Senator from Missouri whether the Supreme Court would declare it to be unconstitutional? If it would not, then I ask the Senator where there is anything in the Constitution which forbids the legislator from having two motives in voting for the passage of a bill—one a motive to raise revenue, the other a motive, by making regulations concerning the manufacture of the article taxed, to secure pure food and honest trade? Where in the Constitution am I forbidden to have both these motives, I ask the Senator?

Mr. VEST. Mr. President, the question has been asked again and again, in committee and out of it, of the projectors and promoters of this measure, "Would you have put the provision for a tax on filled cheese in the bill except for the purpose of obtaining the power of inspection over it?" and they have invariably answered, "No." That shows the object of this bill.

Mr. CHANDLER. No Senator or Representative, I undertake to say, has disclaimed the purpose of raising revenue in the passage of this bill.

Mr. VEST. They have stated distinctly that they would not have put that provision in the bill except to have the power to put the police clause in it.

Mr. CHANDLER. That is not the question. I supposed that we put upon the face of the law the statement that the principal motive is pure food and honest trade; but there still remains the motive of raising revenue, and where, I say, is there any constitutional prohibition against having this additional motive in exercising the taxing power? I say—but I am not going to detain the Senate by arguing this case—that it is perfectly legitimate to have this other motive, this principal motive, if the Senator will have it, this larger motive, standing side by side with the constitutional motive of raising revenue by taxation for the support of the Government.

Mr. MITCHELL of Oregon. May I ask the Senator a question?

Mr. CHANDLER. Certainly.

Mr. MITCHELL of Oregon. Suppose this bill recited in a preamble on its face that the principal purpose of the bill was to provide proper food for the people, and then incidentally went on to levy a tax, would the Supreme Court sustain it?

Mr. CHANDLER. I do not think the Supreme Court would declare it to be void then.

But, Mr. President, I have supposed and have put on record—if the Senator from Oregon will read what I have said—an exact statement of the whole case in the passage of the bill, that the purpose of it is to raise revenue; and when there is this purpose to raise revenue, and revenue is raised, it is no argument against a bill, so far as its constitutionality is concerned, to say that there exists the other, and, if you please, the principal and the larger motive, of getting pure food and honest trade.

Mr. SHERMAN. I wish simply to remind my friend from New Hampshire that the first tariff law passed, and which was approved by George Washington and framed by James Madison, expressly declared in the title of it that it was a bill to raise revenue and to build up American manufactures. I am not giving the exact language, but that is the substance.

Mr. CHANDLER. Certainly. Protection of American industries was the object of the first tariff bill, so stated in the title of the bill, and yet the opponents of protection for a hundred years have been barking at us, down to 1892, that protection was contrary to the Constitution. They will not take that ground now. This year they are going in for free silver, with incidental protection to American manufactures by tariff legislation.

To come back again to the proposition which I made, so long as there is a purpose, and an honest purpose, to raise revenue, it does not make any difference if there is an additional and a further motive, such as I have supposed. I call the attention of the Senator of Missouri, in all good faith and with perfect respect, to the fact that if there ever was a time when the Congress of the United States should seek methods of raising revenue it is now. I do not know how much revenue this tax will bring in, perhaps a million dollars, perhaps $2,000,000. I do not know how much the oleomargarine tax has brought in; but I do know this, that we all ought to be seeking by every fair means to put upon the statute books laws which will give us money. The Senator from Missouri within the last twenty-four hours has put through this Senate, by the aid of my vote and the votes of all but five Senators, a bill that will take a dozen or fifteen million dollars out of the Treasury this year and will take $60,000,000 out of the Treasury within two or three years. It is wise; it is for the public interest; it is for the general welfare of the United States that the Senator should have put that bill through with the same zeal and energy that he is showing in trying to defeat this bill; but it puts a duty upon him and upon me of searching everywhere to find sources of revenue with which to pay for the river and harbor improvements.

Mr. VEST. If the object of this bill is to raise revenue, why have the majority of the Finance Committee reported to cut down the tax in the bill one-half of what it was as it came from the other House?

Mr. HILL. I am going to move to restore that tax as it came from the House of Representatives when the bill comes into the Senate.

Mr. VEST. I am not talking about what the Senator from New York is going to do. I am talking about what has been done by a majority who are clamoring for revenue, and now cut down the tax proposed in this bill one-half.

Mr. CHANDLER. The Finance Committee has not been satisfactory to me for the last four years.

Mr. VEST. Nor to me.

Mr. HILL. Nor to anybody else.

Mr. CHANDLER. It is no more satisfactory to me now than it was in the last Congress, when the Senator from Tennessee [Mr. HARRIS], the Senator from Missouri [Mr. VEST], the Senator from Texas [Mr. MILLS], and the Senator from Arkansas [Mr. JONES] undertook to make a tariff bill which raised the mischief with the industries of this country. [Laughter.]

Mr. MILLS. I ask the Senator will he agree to put some tax on clothing and other objects of that kind in order to get revenue?

Mr. CHANDLER. I am for seeking out every legitimate subject of revenue; and I want to keep in mind the incidental protection of American manufactures. The plank which the Democratic convention of 1892 came very near laying down in its platform, the plank which the Senator from Wisconsin advocated, but which was voted down, and the plank of unconstitutionality substituted by the aid of the friends of the Senator from New York [Mr. HILL], and also the friends of the Senator from Ohio [Mr. BRICE]——

Mr. VILAS. The Senator from New Hampshire does me an injustice.

Mr. CHANDLER. I am for the plank of the Senator from Wisconsin which was voted down in the last Democratic national convention.

Mr. VILAS. The Senator will not do me the injustice of saying that I advocated that plank. I was opposed to it.

Mr. CHANDLER. I get a little confused about what goes on in Democratic conventions [laughter], but I had an idea that President Cleveland in 1892 wanted to run on the plank that was reported by the majority of the committee, but the unconstitutionality plank was put in by a vote of the convention. I thought the Senator from Wisconsin was in favor of the plank which I have understood President Cleveland wanted to run upon; but really I have forgotten which side the Senator did speak on.

Mr. President, I say that with the great drain upon the Treasury which will be made by the river and harbor bill, it is the duty of the Senate to pass all the laws it can for the raising of revenue. If we can not pass one law, let us pass another law. If we are so hamstrung here by our Populist friends, who do not know what they do want, who vote one day with the Republicans, the next day with the Democrats, and the next day sit still and do not vote at all [laughter]; if this Senate is paralyzed by such extraordinary Senators as these, let us pass the best revenue laws we can get and put them upon the statute books. If the Senator from Ohio [Mr. SHERMAN] and the Senator from Vermont [Mr. MORRILL] have been unable to report to this body any greater revenue-producing measure than this, we ought to be thankful for this. If we can not get $30,000,000 or $60,000,000 and can get $1,000,000, then I say let us get that million dollars; and I say in all good faith to the Senator from Missouri that, having aided in imposing a sixty-million-dollar burden upon the United States Treasury, he ought now to take hold and help the Treasury to the extent of the $1,000,000 or the $2,000,000 that this constitutional measure will put into the Treasury.

Mr. SMITH. May I ask the Senator a question?

Mr. CHANDLER. Certainly.

Mr. SMITH. I want to ask, if there be no objection, whether this revenue bill has the united support of the Republican side of the Chamber?

Mr. CHANDLER. Mr. President, I do not know. The Republican party is somewhat dilapidated, but nothing like so dilapidated, I assure my friend, as the Democratic party is on his side of the Chamber. [Laughter.] We do not flock together quite so harmoniously as we should and we are continually deranged by the presence of these half dozen Populists. [Laughter.] How the vote will be I do not know. I do not keep the score on this side of the Chamber. I do not know whether or not the Senator from New Jersey keeps the score on his side.

Mr. VEST. I have been so thoroughly converted by the logical and eloquent remarks of the Senator from New Hampshire that I offer an amendment which, in view of what he has said, I have no doubt will be unanimously adopted by both sides.

The PRESIDING OFFICER. The Senator from Missouri has an amendment pending.

Mr. VEST. I withdraw that amendment, if there be no objection.

The PRESIDING OFFICER. The amendment is withdrawn. The amendment now offered by the Senator from Missouri will be stated.

The SECRETARY. It is proposed to add the following as an additional section:

SEC. 20. It is hereby declared that the special taxes imposed by this act are levied and collected to furnish revenue for the United States, and not to enable the Federal authority to make inspection of the article known as filled cheese or to prevent its sale and consumption when sold as such.

Mr. SHERMAN. I wish now to give notice, as the bill has been discussed at some little length, and as its object is very clear on its face, that I shall feel it my duty, having reported the bill from the committee, to move to lay upon the table all amendments which do not really relate to the subject-matter of the bill. I have no objection at all to any amendment that tends to improve the bill in any way or to change it, but any amendment extraneous in character, having no connection with the subject, I shall feel justified in moving to lay upon the table. I will vote for those motions if nobody else does. I will vote to lay such amendments upon the table whether right or wrong in themselves, because I think this bill should be confined to the subject-matter involved and should not be loaded down with extraneous questions that may be presented. I therefore move to lay on the table the amendment proposed by the Senator from Missouri. I should like to have it read first.

Mr. VEST. Let the amendment be again read. Several Senators have asked me what it is, and that is the easiest way to answer.

The PRESIDING OFFICER. The amendment will again be read.

The Secretary again read the amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Ohio, to lay on the table the amendment offered by the Senator from Missouri.

Mr. VEST. On that I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. GEORGE. I ask permission to say one word.

The PRESIDING OFFICER. Debate is not in order except by unanimous consent.

Mr. GEORGE. I shall occupy but a moment. Are we compelled to vote against the amendment on the ground that it contains a false statement as to the object of the bill?

The PRESIDING OFFICER. The roll will be called.

The Secretary proceeded to call the roll.

Mr. DUBOIS (when Mr. CANNON'S name was called). I announce the pair of the Senator from Utah [Mr. CANNON] with the Senator from Nebraska [Mr. ALLEN]. I will make this announcement for the day.

Mr. GEAR (when his name was called). I announce my pair with the senior Senator from Georgia [Mr. GORDON]. If he were present, I should vote "yea."

Mr. PALMER (when his name was called). I am paired with the Senator from North Dakota [Mr. HANSBROUGH]. I believe he has not voted. I therefore withhold my vote.

Mr. PRITCHARD (when his name was called). I am paired with the Senator from Louisiana [Mr. BLANCHARD]. If he were present, I should vote "yea."

Mr. PUGH (when his name was called). I am paired with the senior Senator from Massachusetts [Mr. HOAR]. If he were present, I should vote "nay."

Mr. WETMORE (when his name was called). I am paired with the junior Senator from Georgia [Mr. BACON]. If he were present, I should vote "yea."

The roll call was concluded.

Mr. MITCHELL of Oregon. I desire to state that my colleague [Mr. MCBRIDE] is detained from the Senate. He is paired with the Senator from Mississippi [Mr. GEORGE]. If my colleague were here, he would vote to lay the amendment on the table.

Mr. CULLOM. I am paired with the Senator from Delaware [Mr. GRAY]. I therefore withhold my vote.

Mr. BURROWS. I am paired with the senior Senator from Louisiana [Mr. CAFFERY], and the Senator from Alabama [Mr. PUGH] is paired with the Senator from Massachusetts [Mr. HOAR]. We will transfer the pairs, and the Senator from Massachusetts [Mr. HOAR] and the Senator from Louisiana [Mr. CAFFERY] will be paired. That will permit the Senator from Alabama and myself to vote.

Mr. BRICE. I am paired with the junior Senator from Colorado [Mr. WOLCOTT].

Mr. HANSBROUGH (after having voted in the affirmative). I inquire if the junior Senator from Illinois [Mr. PALMER] has voted.

The PRESIDING OFFICER. He has not voted.

Mr. HANSBROUGH. I withdraw my vote, being paired with that Senator.

Mr. BATE. I desire to announce that the Senator from Maryland [Mr. GIBSON] is paired with the Senator from Montana [Mr. CARTER].

Mr. PERKINS (after having voted in the affirmative). I desire to announce that I am paired with the junior Senator from North Dakota [Mr. ROACH]. But as he and I are in accord on this bill, I have voted.

The result was announced—yeas 32, nays 14; as follows:

YEAS—32.

Aldrich,	Dubois,	Morrill,	Sherman,
Allison,	Gallinger,	Nelson,	Shoup,
Brown,	Hale,	Peffer,	Smith,
Burrows,	Hawley,	Perkins,	Stewart,
Butler,	Jones, Nev.	Pettigrew,	Teller,
Chandler,	Lodge,	Platt,	Vilas,
Clark,	Mitchell, Oreg.	Quay,	Warren,
Davis,	Mitchell, Wis.	Sewell,	Wilson.

NAYS—14.

Bate,	Hill,	Morgan,	Walthall,
Berry,	Jones, Ark.	Pasco,	White.
Chilton,	Lindsay,	Pugh,	
Harris,	Mills,	Vest,	

NOT VOTING—43.

Allen,	Cockrell,	Gray,	Pritchard,
Bacon,	Cullom,	Hansbrough,	Proctor,
Baker,	Daniel,	Hoar,	Roach,
Blackburn,	Elkins,	Irby,	Squire,
Blanchard,	Faulkner,	Kyle,	Thurston,
Brice,	Frye,	McBride,	Tillman,
Caffery,	Gear,	McMillan,	Turpie,
Call,	George,	Mantle,	Voorhees,
Cameron,	Gibson,	Martin,	Wetmore,
Cannon,	Gordon,	Murphy,	Wolcott.
Carter,	Gorman,	Palmer,	

So the amendment was laid on the table.

Mr. STEWART. I desire to offer an amendment, which is as follows:

That on and after the 1st day of August, 1896, there shall be levied, collected, and paid 10 cents a pound upon all wools imported into the United States from any foreign country.

Inasmuch as this is a revenue bill and there has been so much said with regard to revenue, I offer the amendment, believing, as I do, that it will be a mode of raising revenue entirely agreeable to the people whom I represent. I offer it simply as a method of raising revenue which will benefit the Treasury and be agreeable to the people of the West and Middle States, and I think to the entire farming community.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. It is proposed to add the following:

That on and after the 1st day of August, 1896, there shall be levied, collected, and paid 10 cents a pound upon all wools imported into the United States from any foreign country.

Mr. SHERMAN. I know that the effect of the amendment is to defeat the bill, and I move to lay it upon the table. Otherwise I should support the proposition with great pleasure.

Mr. STEWART and Mr. TELLER called for the yeas and nays; and they were ordered.

The Secretary proceeded to call the roll.

Mr. CULLOM (when his name was called). I am paired with the Senator from Delaware [Mr. GRAY]. If he were present, I should vote "yea."

Mr. MORGAN (when his name was called). I am paired with the Senator from Pennsylvania [Mr. QUAY].

Mr. PALMER (when his name was called). I am paired with the Senator from North Dakota [Mr. HANSBROUGH]. I should vote "yea" if he were present.

Mr. PRITCHARD (when his name was called). I am paired with the Senator from Louisiana [Mr. BLANCHARD]. If he were present, I should vote "nay."

Mr. WETMORE (when his name was called). I am paired

with the junior Senator from Georgia [Mr. BACON]. If he were present, I should vote "yea."

The roll call was concluded.

Mr. PRITCHARD. On this vote I will transfer my pair to the Senator from Maine [Mr. FRYE] and vote "nay."

Mr. BRICE. I again announce my pair with the junior Senator from Colorado [Mr. WOLCOTT].

Mr. GEAR. I again announce my pair with the Senator from Georgia [Mr. GORDON]. I should vote "yea," if he were present.

The result was announced—yeas 32, nays 17; as follows:

YEAS—32.

Aldrich,	Davis,	Nelson,	Sherman,
Allison,	Gallinger,	Palmer,	Smith,
Bate,	Hale,	Pasco,	Turpie,
Berry,	Hawley,	Perkins,	Vest,
Burrows,	Hill,	Pettigrew,	Vilas,
Chandler,	Lodge,	Platt,	Walthall,
Chilton,	Mitchell, Wis.	Quay,	White,
Clark,	Morrill,	Sewell,	Wilson.

NAYS—17.

Brown,	Harris,	Mitchell, Oreg.	Teller,
Butler,	Jones, Nev.	Peffer,	Warren.
Dubois,	Lindsay,	Pritchard,	
George,	McBride,	Pugh,	
Hansbrough,	Mills,	Stewart,	

NOT VOTING—40.

Allen,	Carter,	Gorman,	Murphy,
Bacon,	Cockrell,	Gray,	Proctor,
Baker,	Cullom,	Hoar,	Roach,
Blackburn,	Daniel,	Irby,	Shoup,
Blanchard,	Elkins,	Jones, Ark.	Squire,
Brice,	Faulkner,	Kyle,	Thurston,
Caffery,	Frye,	McMillan,	Tillman.
Call,	Gear,	Mantle,	Voorhees,
Cameron,	Gibson,	Martin,	Wetmore,
Cannon,	Gordon,	Morgan,	Wolcott.

So the amendment was laid on the table.

Mr. LINDSAY. I offer an amendment to see if we can ascertain exactly what the purpose of the bill is.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. It is proposed to amend the bill by inserting, in line 4, section 3, page 2, between the word "that" and the word "special," the following:

For the protection of manufacturers and dealers in cheese against unfair and fraudulent competition and to protect the public against fraudulent practices by the manufacturers, vendors, and retailers of filled cheese in vending, selling, and retailing the same as and for cheese and for the incidental and collateral purpose of raising revenue.

So as to read:

That, for the protection of manufacturers and dealers in cheese against unfair and fraudulent competition, and to protect the public against fraudulent practices by the manufacturers, vendors, and retailers of filled cheese in vending, selling, and retailing the same as and for cheese, and for the incidental and collateral purpose of raising revenue, special taxes are imposed as follows.

Mr. SHERMAN. I move to lay the amendment on the table.

Mr. HILL. Mr. President——

The PRESIDING OFFICER. The question is on agreeing to the motion to lay the amendment on the table.

Mr. HILL. Has a motion been made to lay the amendment on the table?

The PRESIDING OFFICER. The Senator from Ohio made the motion to lay the amendment upon the table, which is not debatable. The question is on agreeing to that motion.

Mr. LINDSAY. On that I ask for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. BRICE (when his name was called). I again announce my pair with the junior Senator from Colorado [Mr. WOLCOTT].

Mr. CARTER (when his name was called). On this question and on all questions relating to the pending bill for the day I am paired with the junior Senator from Maryland [Mr. GIBSON].

Mr. CULLOM (when his name was called). I am paired with the Senator from Delaware [Mr. GRAY].

Mr. GEAR (when his name was called). I am paired with the senior Senator from Georgia [Mr. GORDON].

Mr. PRITCHARD (when his name was called). I am paired with the Senator from Louisiana [Mr. BLANCHARD]. If he were present, I should vote "yea."

Mr. WETMORE (when his name was called). I am paired with the junior Senator from Georgia [Mr. BACON]. If he were present, I should vote "yea."

The roll call having been concluded, the result was announced—yeas 35, nays 13; as follows:

YEAS—35.

Aldrich,	Gallinger,	Mitchell, Wis.	Sherman,
Allison,	Hale,	Morrill,	Shoup,
Brown,	Hansbrough,	Nelson,	Smith,
Burrows,	Hawley,	Palmer,	Stewart,
Butler,	Hill,	Peffer,	Teller,
Chandler,	Jones, Nev.	Perkins,	Vilas,
Clark,	Lodge,	Pettigrew,	Warren,
Davis,	McBride,	Platt,	Wilson.
Dubois,	Mitchell, Oreg.	Sewell,	

NAYS—13.

Bate,	Jones, Ark.	Pasco,	White.
Berry,	Lindsay,	Pugh,	
George,	Mills,	Vest,	
Harris,	Morgan,	Walthall,	

NOT VOTING—41.

Allen,	Chilton,	Gray,	Roach,
Bacon,	Cockrell,	Hoar,	Squire,
Baker,	Cullom,	Irby,	Thurston,
Blackburn,	Daniel,	Kyle,	Tillman,
Blanchard,	Elkins,	McMillan,	Turpie,
Brice,	Faulkner,	Mantle,	Voorhees,
Caffery,	Frye,	Martin,	Wetmore,
Call,	Gear,	Murphy,	Wolcott.
Cameron,	Gibson,	Pritchard,	
Cannon,	Gordon,	Proctor,	
Carter,	Gorman,	Quay,	

So the amendment was laid on the table.

Mr. MITCHELL of Oregon. Mr. President, I am in favor of the pending bill. I earnestly desire to see it become a law. I gave notice a few days since, this being a revenue bill, that at the proper time I should offer an amendment. I submitted the amendment at the time, and it has been printed and is on the desks of Senators. The amendment is what is known in the Senate and in the country as the Dingley tariff bill. That bill passed the national House of Representatives on the 26th of last December. It did not purport to be very much of a protective tariff bill. On the contrary, it was said to be more a bill to supply revenue than anything else. It was accompanied by a report made by the chairman of the Ways and Means Committee of the House of Representatives, in which it was stated that the revenues were falling short every month $3,000,000 or more of being sufficient to meet the ordinary expenses of the Government. The bill was passed by a large majority and sent to the Senate. It was referred here to the Committee on Finance, and it was amended in the committee by striking out the tariff provision and inserting a free-coinage amendment, and it was so reported to the Senate.

I had voted previously, and only a few days prior to the day when the bill was reported to the Senate, for an amendment to what was known as the bond bill, providing for the free and unlimited coinage of silver, and that amendment being adopted, I then voted for the bill as amended, as did a large majority of the Senate, including, I believe, 18 Republicans. I was opposed then and am opposed now to complicating the question of revenue or interfering in any manner with a proper revenue bill by putting on an amendment relating to coinage. Therefore I was one who was earnestly in favor of trying to get up that tariff bill in the Senate, not for the purpose of voting for the amendment placed upon it by the Committee on Finance, but with a view and in the hope that the Senate might vote down the amendment and pass the bill as it came from the other House. I was not opposed then nor am I now to legislation such as was incorporated in the amendment, but, on the contrary, favored it; but the Senate had expressed itself on that subject, as I have said, but a few days before, and sent the bill to the House of Representatives. Therefore I was opposed, as I have said, to putting upon the tariff bill an amendment relating to coinage of any kind or character.

Hence, when the venerable Senator from Vermont [Mr. MORRILL], chairman of the Committee on Finance, moved on two different occasions to take up the bill in the Senate, for the purpose of endeavoring to bring it to a vote and to get an expression of the Senate upon the two propositions, the free-coinage amendment and the tariff bill, I voted with him. I have been misrepresented in some of the papers in my own State in regard to my action in reference to that matter, and that is why I am now making the statement I make.

Mr. President, as I said before, I desire to see this bill passed; but I thought in all good faith that we might with propriety, and without endangering the passage of the bill, take this tariff bill that the House has already expressed itself on, put it on this bill as a proper amendment, send it to the House, let the House readopt it, and send the bill to the President. We were given to understand (I do not know by what authority, but it was a current rumor at the time the bill passed the House and at the time it was pending in the committee of the Senate) that inasmuch as it was a bill mild in its protective features, and a bill that would raise some $40,000,000 of revenue annually, it would in all probability receive Executive approval. If that were so then it is so now, I take it, inasmuch as Congress has made no provision whatever for the revenues of the Government.

Therefore it occurred to me that it was not only a proper thing, but a most appropriate thing for the Republicans of the Senate, and as many Democrats and Populists as might be willing, for the sake of providing this much revenue, that we should place this amendment upon the pending bill. Notice, however, has been served on me by some of my Republican friends and leaders in the Senate that they will not vote for the amendment in the event I offered it, fearing it might defeat the bill, and I hesitate

as to whether under the circumstances I ought to offer the amendment. I want it distinctly understood that it is not by reason of any opposition whatever to the bill that I have given notice of the proposed amendment, but solely in the hope of in this way accomplishing two purposes; first, in giving some measure of protection to wool and other farm products, lumber, coal, etc.; and second, by providing some $40,000,000 revenue, and thus avoid a further issue of bonds.

Mr. NELSON. Will the Senator from Oregon allow me to make a statement?

Mr. MITCHELL of Oregon. Certainly.

Mr. NELSON. The farmers of the Northwest, the farmers of the country, and the people of the country come here and want this little piece of relief. The Senate has already expressed itself heretofore on the tariff bill. Why complicate this simple measure of relief with a tariff bill? We have all made a record on the tariff bill, and what is the use of going over the ground again? I appeal to the Senator, being friendly to the bill, to withdraw the amendment.

Mr. MITCHELL of Oregon. If the Senator from Minnesota will allow me, I will state that the Senate has not expressed itself on the tariff bill except as the mere failure to take up the bill has been an expression. I admit that there have been two efforts made by the chairman of the Committee on Finance to take up the bill, and he failed to get enough votes to take it up. The Senate has as yet had no opportunity to express itself on that bill by voting either for it or against it.

Mr. STEWART. Will the Senator from Oregon allow me to make a suggestion?

Mr. MITCHELL of Oregon. Certainly.

Mr. STEWART. I have a little amendment in my hand which, if added to his amendment, will help it. It reads as follows:

The owner of silver bullion may take the same to any mint of the United States, and the same shall be coined into standard dollars for his benefit, upon the terms and conditions which are provided by law for the coinage of gold.

I offer that as an amendment to the Senator's amendment, and I think it will help it through.

Mr. MITCHELL of Oregon. That is all very well as separate legislation, but it has nothing to do with a tariff bill. I have already voted for that proposition at this present session, and the bill has passed the Senate.

Mr. WHITE. Will the Senator from Oregon permit me a question?

The PRESIDING OFFICER (Mr. CHANDLER in the chair). Does the Senator from Oregon yield to the Senator from California?

Mr. MITCHELL of Oregon. Certainly.

Mr. WHITE. I desire to ask the Senator from Oregon, as he has no doubt informed himself carefully upon this subject, if the Senate should add the Dingley bill as an amendment and we should thereupon desist from further ornamentation, has he any doubt of the passage of the measure elsewhere?

Mr. MITCHELL of Oregon. I do not see why I should have any doubt, as the House of Representatives has already passed upon both measures.

Mr. DUBOIS. May I ask the Senator from Oregon a question?

Mr. MITCHELL of Oregon. Certainly.

Mr. DUBOIS. Did I understand the Senator to say that he did not wish to consider a free-coinage measure in connection with a tariff proposition; that he thought they should be considered separately and independently?

Mr. MITCHELL of Oregon. I said in substance that I did not propose to embarrass the passage of a proper tariff bill by putting on it an amendment relating to the coinage of money, for the reason that I think each subject should stand by itself; one should not embarrass the other.

Mr. DUBOIS. I thought I understood the Senator correctly, and I regard him as a strong and able advocate of free coinage; but owing to some strictures which were made here a day or two ago by the Senator from Utah [Mr. BROWN] it is proper to state, after this very candid answer of the Senator, that it had come to the knowledge of other silver Republican Senators who differ with him as to the best method of advocating free coinage and who place silver above tariff that a great many free-coinage men besides himself would not vote for a free-coinage substitute for the Dingley tariff bill, and when we were unable to substitute, on that account, the free-coinage bill for the tariff bill then they would vote for the tariff bill and it would pass and become a law without anything being accomplished for silver. Owing to the very technical argument of the Senator from Utah [Mr. BROWN], which made no impression upon the Senate, of course, but was designed and intended to mislead people in parts of the country remote from here in regard to the effect of the votes of the five silver Senators on this side of the Chamber who voted against taking up the Dingley bill, I am very glad that their position and the effect of their vote has been made so plain by the frank statement of the Senator from Oregon.

The Senator from Oregon, the Senator from Utah [Mr. BROWN], and all other free-coinage Republican Senators who voted to take up the Dingley bill intended to pass that bill, without regard to free coinage, while the five Senators who refused by their votes to take up the Dingley bill intended that the Dingley bill should not pass without free coinage being joined with it. I hope each Senator will stand squarely by the record and effect of his vote at that time, and that no further effort will be made to pervert the record.

Mr. MITCHELL of Oregon. I simply speak for myself, and no one else. I have stated my position. I think it was pretty well understood in the Senate, however, before, so far as that is concerned. I desire it should be understood elsewhere.

Mr. VILAS. I should like to ask the Senator from Oregon if he thinks, for the reason he has just given, we ought to embarrass one bill with another.

Mr. MITCHELL of Oregon. Upon reflection, in view of the appeals made to me by my friend from Minnesota, in view of other appeals that have been made to me by leaders of the Senate on this side of the Chamber, I will not offer the amendment, although I should be very glad to have an opportunity to vote some relief to the woolgrowers of this country. I voted with great pleasure against laying on the table the amendment of the Senator from Nevada providing for a tariff of 10 cents a pound on wool, and whenever I get an opportunity hereafter to vote for a proper tariff bill I propose to do it; and I do not propose to embarrass it with any other subject. When the question of free coinage comes up all know where I stand on that, and it is not necessary to make any statement in regard to it.

Mr. TELLER. I should like to inquire of the Senator from Oregon, no matter what might be the action of this or the other body, if the Dingley bill should be attached to the pending bill, whether he has any reason in the world to suppose it would become a law?

Mr. MITCHELL of Oregon. I know nothing about it at all. I should hope that the President, in view of the deficiency in the revenues, would sign the bill. Of course I have no knowledge upon the subject.

Mr. STEWART. I shall not offer my amendment now, since the Senator from Oregon has withdrawn his, although it would benefit the filled-cheese bill very much. It would be very appropriate on this or any other bill to have silver coined upon the terms and conditions applied to gold. I thought it germane to the Senator's amendment, and a very necessary amendment, to make it successful in the Senate. But inasmuch as he has not offered his amendment, I do not propose to embarrass the bill with my amendment. I am in favor of the filled-cheese bill.

Mr. TELLER. Mr. President, I do not want to debate the tariff bill when it is not before the Senate, but with the freedom we have here I want to read an extract from a letter written by the President of the United States July 2, 1894, to a member of the House. I heard the Senator from Michigan [Mr. BURROWS] talk about great faith the other day, and I want to suggest that the Senator from Oregon must be a man of great faith. The President said:

It must be admitted that no tariff measure can accord with Democratic principles and promises or bear a genuine Democratic badge that does not provide for free raw material. In the circumstances, it may well excite our wonder that Democrats are willing to depart from this the most Democratic of all tariff principles, and that the inconsistent absurdity of such a proposed departure should be emphasized by the suggestion that the wool of the farmer be put on the free list and the protection of tariff taxation be placed around the iron ore and coal of corporations and capitalists. How can we face the people after indulging in such outrageous discriminations and violations of principles?

It is quite apparent that this question of free raw materials does not admit of adjustment on any middle ground, since their subjection to any rate of tariff taxation, great or small, is alike violative of Democratic principle and Democratic good faith.

If anybody after that thinks there is a chance for a duty on wool, he must have wonderful faith.

Mr. HAWLEY. Mr. President, the record of Democratic opinion is not quite complete without this extract from the tariff plank of 1888, when Mr. Cleveland and Mr. Thurman were the candidates. It is a protective tariff:

Our established domestic industries and enterprises should not and need not be endangered by the reduction and correction of the burdens of taxation. On the contrary, a fair and careful revision of our tax laws, with due allowance for the difference between the wages of American and foreign labor, must promote and encourage every branch of such industries and enterprises by giving them assurance of an extended market and steady and continuous operations.

Mr. MILLS. The Senator is reading from a repealed law. That was repealed in 1892.

Mr. HAWLEY. I read from the Democratic platform of 1888.

Mr. TELLER. Mr. President, the present Executive did not make that platform, although he ran on it. But we all understand how easy it is for a man to run on a platform and fail to

adhere to it after he is elected. The President, in his annual message to Congress December 6, 1893, I think likely uttered his true sentiments on this question. He said:

I think it may be fairly assumed that a large proportion of the sheep owned by the farmers throughout the country are found in small flocks numbering from 25 to 50. * * * When the number of farmers engaged in wool raising is compared with all the farmers in the country and the small proportion they bear to our population is considered; when it is made apparent that, in the case of a large part of those who own sheep, the benefit of the present tariff on wool is illusory. etc.

I think probably that expresses his opinion on the wool tariff.

Mr. PALMER. I desire to know whether it is the purpose of the Senator from Connecticut [Mr. HAWLEY] and the Senator from Colorado [Mr. TELLER] to prove that the President would not be likely to sign the Dingley bill if passed? Is that the purpose?

Mr. TELLER. I should like to say to the Senator that I think it would be entirely out of order for me to suggest that he would not. I have not suggested that he would not sign it. I heard some such suggestion here that he would. I shall not violate the rules of the Senate by suggesting that he would not. I simply wanted the Senate to understand his sentiments on the subject.

Mr. PALMER. I wish to say to the Senator from Colorado and the Senator from Connecticut that I am fully convinced he would not.

Mr. HALE. The Senator read first from the President's letter of 1894?

Mr. TELLER. I read from the letter of President Cleveland to the chairman of the Committee on Ways and Means of the House, Mr. Wilson, dated the 2d of July, 1894.

Mr. HALE. Did not the President allow that bill to become a law, notwithstanding the protest the Senator has read?

Mr. TELLER. But there was not any provision for a duty on wool in it.

Mr. LINDSAY. Mr. President, there has been a good deal of discussion here this morning of the present tariff bill and its defects. It seems that the Senators on the other side of the Chamber are not willing to put a tariff on wool, although they declare that such a tariff tax ought to be levied. There is one provision of the existing tariff law which I think we all agree ought to be changed. Senators on the other side of the Chamber voted against it when it was incorporated into the present law, and most of the Senators on this side who voted for it were in the position of the distinguished senior Senator from Ohio [Mr. SHERMAN] when he voted for what is known as the Sherman silver bill. He voted for it under stress of circumstances in order to defeat some other measure which he regarded as more objectionable, and he was ready to vote to repeal it the next day. A number of Senators on this side voted for the differential tax on sugar in order to secure the passage of a tariff bill at all, and were willing the day after the bill became a law to vote to repeal that tax. For the purpose of having it repealed I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment proposed by the Senator from Kentucky will be read.

The SECRETARY. Add the following as an additional section:

SEC. 20. That so much of section 182½ of Schedule E of the act which became a law August 27, 1894, entitled "An act to reduce taxation and to provide revenue for the Government, and for other purposes," which provides as follows: "And upon all sugars above No. 16, Dutch standard, in color, and upon all sugars which have been discolored, there shall be levied, collected, and paid a duty of one-eighth of 1 cent per pound, in addition to the said duty of 40 per cent ad valorem," be, and the same is hereby, repealed, and the collection of said additional duty, from and after the passage of this act, is hereby discontinued.

The PRESIDING OFFICER. The question is on the adoption of the amendment proposed by the Senator from Kentucky.

Mr. SHERMAN. It does seem to me unfair that in a body like the Senate of the United States, when a measure has been framed and carefully considered, debated in both Houses of Congress, it should be attempted to be loaded down with extraneous subjects. It seems to me it is not exactly a fair mode of legislation. I do not believe I have ever tried it myself. I do not think I would do it. Here is a simple bill for the relief of the farmers from what they regard as a fraud. It is not a measure of great magnitude, involving large sums of money, although it will yield probably half a million or a million dollars of revenue. Under the circumstances I appeal to my friend from Kentucky not to delay the pending measure. I move to lay the amendment upon the table.

Mr. MILLS. On that let us have the yeas and nays.

Mr. SHERMAN. I will vote for a duty on sugar; I will vote for a duty on tea; I will vote for a hundred duties I might name; but it is not exactly a fair thing to attempt it here as an amendment to a bill like the one pending. When we take up the question of revenue we shall have ample time to consider it. Besides, whatever may be the intention of the Senator from Kentucky, the amendment would tend to prolong the session. It would open up new subjects of controversy and defeat this bill. If it is the object to defeat the bill, let it be done by a direct vote. I move that the amendment lie on the table.

Mr. TELLER. I wish to make an inquiry before the motion is put. Do I understand this to be a proposed repeal of all duties on sugar?

Mr. MILLS. Only the differential duty.

Mr. LINDSAY. It is a repeal of only the one-eighth differential duty. It leaves the 40 per cent duty to remain as it is.

The PRESIDING OFFICER. The question is on the motion of the Senator from Ohio, to lay on the table the amendment proposed by the Senator from Kentucky, upon which the yeas and nays are demanded.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. BRICE (when his name was called). I am paired with the junior Senator from Colorado [Mr. WOLCOTT].

Mr. CARTER (when his name was called). I am paired with the junior Senator from Maryland [Mr. GIBSON].

Mr. CULLOM (when his name was called). I am paired with the Senator from Delaware [Mr. GRAY].

Mr. FAULKNER (when his name was called). I am paired with the Senator from West Virginia [Mr. ELKINS]. I should vote "nay" if he were present.

Mr. GEAR (when his name was called). I am paired with the senior Senator from Georgia [Mr. GORDON].

Mr. GORMAN (when his name was called). I am paired with the Senator from Maine [Mr. FRYE].

Mr. PASCO (when his name was called). I am paired for the rest of the afternoon with the Senator from Missouri [Mr. COCKRELL]. In his absence, I withhold my vote.

Mr. PERKINS (when his name was called). On this political question I am paired with the Senator from North Dakota [Mr. ROACH].

Mr. PRITCHARD (when his name was called). I am paired with the Senator from Louisiana [Mr. BLANCHARD]. If he were present, I should vote "nay."

Mr. WALTHALL (when his name was called). I am paired with the senior Senator from Pennsylvania [Mr. CAMERON].

Mr. WETMORE (when his name was called). I am paired with the junior Senator from Georgia [Mr. BACON]. If he were present, I should vote "yea."

The roll call was concluded.

Mr. CARTER. I desire to announce a general pair of my colleague [Mr. MANTLE] with the junior Senator from Virginia [Mr. MARTIN].

The result was announced—yeas 31, nays 16; as follows:

YEAS—31.

Aldrich,	Hale,	Morrill,	Shoup,
Allison,	Hansbrough,	Nelson,	Smith,
Brown,	Hawley,	Palmer,	Stewart,
Burrows,	Jones, Nev.	Pettigrew,	Vilas,
Chandler,	Lodge,	Platt,	Warren,
Clark,	McBride,	Quay,	White,
Davis,	Mitchell, Oreg.	Sewell,	Wilson.
Gallinger,	Mitchell, Wis.	Sherman,	

NAYS—16.

Bate,	George,	Lindsay,	Pugh,
Berry,	Harris,	Mills,	Teller,
Chilton,	Hill,	Morgan,	Turpie,
Dubois,	Jones, Ark.	Peffer,	Vest.

NOT VOTING—42.

Allen,	Carter,	Gray,	Proctor,
Bacon,	Cockrell,	Hoar,	Roach,
Baker,	Cullom,	Irby,	Squire,
Blackburn,	Daniel,	Kyle,	Thurston,
Blanchard,	Elkins,	McMillan,	Tillman,
Brice,	Faulkner,	Mantle,	Voorhees,
Butler,	Frye,	Martin,	Walthall,
Caffery,	Gear,	Murphy,	Wetmore,
Call,	Gibson,	Pasco,	Wolcott.
Cameron,	Gordon,	Perkins,	
Cannon,	Gorman,	Pritchard,	

So the amendment was laid on the table.

Mr. MORGAN. Mr. President, it is apparent that no amendment at all is to be allowed of this bill, it makes no difference how proper it may be, and as I am opposed to the bill I rather congratulate myself that that is the fact, and that that fact is established, not only by all the votes which have been cast upon the bill here to-day and heretofore, but I understand it has been decreed by a caucus that no amendment is to go on this bill. So my objections to it will be stated in the form of objections to the text of the bill. I shall not engage in the discussion of the constitutional question, which has been so fully and so clearly presented by the Senator from Missouri [Mr. VEST], but it seems to me that this bill is drawn very inartistically, and that upon the definition that is given here Senators will find that, if passed into a law, it will be extremely difficult of execution.

Mr. ALLISON. Will the Senator allow me to correct one misapprehension under which he labors?

Mr. MORGAN. Yes.

Mr. ALLISON. I wish to say that I know of no decree of a Republican caucus respecting what this bill should contain or should not contain. Therefore, whatever may be the truth upon

this subject, it does not apply to any Republican caucus, for we have had none.

Mr. MORGAN. I gather my information from the public prints here in the city. That is all I know about it.

Now I will read section 2. It provides—

That for the purposes of this act certain substances and compounds shall be known and designated as "filled cheese," namely: All substances made of milk or skimmed milk, with the admixture of butter, animal oils or fats, vegetable or any other oils, or compounds foreign to such milk, and made in imitation or semblance of cheese.

If any compound or any substance foreign to milk is put into cheese, it is filled cheese, according to this definition. Well, salt is a substance that is foreign to milk. The excellent Edam cheeses that come from New York are very heavily salted. So if you put any salt in your cheese, under this definition, it is filled cheese; and if you put any of those nice herbs in your cheese that the Germans are so fond of putting in for the purpose of enriching it and giving it a flavor, of course they would be substances foreign to milk, and then it would be filled cheese; or if in the manufacture of it you would undertake to imitate the Rochefort cheese, or the Neuchatel, or even the Limburger, you would find yourself in a very great strait by putting in foreign substances that are evidently necessary to get the flavor of Rochefort or Neuchatel cheese or to get the odor of Limburger. In fact, I do not know how you would ever get the odor of Limburger unless you put asafetida or something of that kind in it, and your law and your definition compels you to have nothing in it at all except milk or skimmed milk; you must not add butter to it; you must not add any admixture of butter or animal oils or fats or vegetable or other oils or compounds if they are foreign to milk. I think the inventor of that definition must have been very hard put to it to find out some means of ascertaining what he did not intend to do.

Is it not on its face absolutely absurd that a definition of filled cheese should exclude from that cheese every substance that is foreign to milk? If you want to put in coloring matter, that is foreign to milk; flavoring matter is foreign to milk. But the test of whether cheese is filled cheese or not filled cheese is whether or not the substance incorporated with it is foreign to milk. That is your definition. I am glad that you have got it screwed down so tight that you can not get away from it without amending it yourselves, because I suppose somewhere else this bill is to be scrutinized; and the object of this bill, as declared in this definition of filled cheese, must be to exclude from it every substance that is foreign to milk; and unless it does not exclude every substance that is foreign to milk it is not filled cheese. Enough on that point in the case.

This bill seems to be designed also not merely to destroy the industry of making a preparation of cheese by putting lard in it, or butter, or fat, or oils, or vegetables, but it also strikes very heavily, I think, at some other species of manufactures. Section 6 provides—

That filled cheese shall be packed by the manufacturers in wooden packages only—

Why not put it in tin packages? Why not in paper packages? Why do you confine the packages in which this cheese shall be put to wood only? And it must be wood—

not before used for that purpose.

When you manufacture cheese and put any substance in it that is foreign to milk, you must then put it into a wooden package, and not only a wooden package, but a wooden package that has never been used before. It makes no difference if you have a package on hand and it cost you a dollar or a half dollar, and you scoured it up so as to get every mark off of it, you could not put cheese in that package. That is giving a very decided advantage to the manufacturers of wood over the manufacturers of paper poxes and tin boxes and other material which might be found suitable for packing cheese. That is not a very slight circumstance in the effort to prop up the dairymen of the Northwest against those who manufacture filled cheese.

There seems to be a general strike at everybody and everything that comes in reach. After you have got the cheese in a wooden box it must be marked:

In black-faced letters not less than 2 inches in length—

How wide they are to be we do not know. I have seen letters 2 inches in length that were so narrow that you could scarcely read them; and it would take a very fine reader to understand printed letters 2 inches long. No width is prescribed, but the "black-faced letters" must be made; and how must they be put on? Put on—

in a circle in the center of the top and bottom of the cheese.

It must be put on the cheese first, and that is in a wooden box. I do not know how you are going to put the "black-faced letters" on the bottom of a cheese in a wooden box so that the words will be readable, or how you can do it without spoiling the material. It must be—

Marked, stamped, and branded with the words "filled cheese" in black-faced letters not less than 2 inches in length, in a circle in the center of the top and bottom of the cheese; and in black-faced letters of not less than 2 inches in length in line from the top to the bottom of the cheese, on the side in four places equidistant from each other.

Why, Mr. President, that is closer work than we have in this ballot printing with which we intend to prevent fraudulent elections.

But is it not impossible to conceive that anyone drawing a bill that was intended to be intelligently designed to convey correct ideas and that was capable of execution should require "black-faced letters" to be put on cheese inside the box and then that the box itself should be painted with "black-faced letters" on the outside?

This looks like a small matter, but it shows, in the eagerness to pass this bill, which is simply a bonus to the makers of cheese out of cream or milk that is not skimmed, that the person who drafted the bill and the committees who have passed upon it have gone entirely out of line and have put provisions in it which make it an odious measure, not merely to the persons engaged in the manufacture of filled cheese, but to several other very important industries of the country.

We come now to another feature of this bill, which I confess that I find difficulty in understanding:

Every person, firm, or corporation who manufactures filled cheese for sale shall be deemed a manufacturer of filled cheese.

The preceding paragraph, which aids in defining, reads thus:

Manufacturers of filled cheese shall pay $240 for each and every factory per annum.

Whether you work in your factory or not. You may have established a factory for three or four years without having worked it at all. It is the factory that is taxed; it is not the manufacture. You tax the establishment. The factory, of course, must consist of a piece of real estate with some houses upon it, some structures; but this bill taxes the factory, without reference to the question of whether the men who own the factory are actually engaged in the manufacture of cheese.

Having pointed out these matters in this bill. I am content to let it pass into the hands of any part or department of this Government that has the scrutiny of law, to see whether or not such a bill as this can find its way to the statute book.

The bill was reported to the Senate as amended.

The PRESIDING OFFICER (Mr. PLATT). The question is, Shall the amendments made as in Committee of the Whole be concurred in?

Mr. NELSON. I think there are some committee amendments to the bill which have not yet been acted upon.

The PRESIDING OFFICER. The Chair is informed that all the committee amendments have been acted upon.

Mr. HILL. Mr. President, I do not know that any motion is necessary, but when the bill is in the Senate I wish to reserve the question as to concurring in the amendments reported by the Committee on Finance.

Mr. ALDRICH. The bill is in the Senate now.

Mr. SHERMAN. The bill has been reported to the Senate, and it is in order to ask for a separate vote on any of the amendments which have been agreed to.

The PRESIDING OFFICER. The bill is in the Senate, and the question is on concurring in the amendments which have been made as in Committee of the Whole.

Mr. HILL. I trust the amendments made as in Committee of the Whole, which were made pro forma and without discussion, will not be adopted. They were adopted as a mere matter of form. The Senate committee has seen fit to reduce the tax from the amount fixed by the House of Representatives.

Mr. SHERMAN. Mr. President, it is true that there were two amendments reported by the Committee on Finance, which were adopted as in Committee of the Whole, as to the amount of the tax on the manufacturers and wholesale dealers. There was no change made in the tax on the retail dealer. So far as those two amendments are concerned there was some difference of opinion about the reduction of the amount in the committee. My honored colleague on the committee to my right, the chairman of the committee [Mr. MORRILL], thinks we ought to nonconcur in those amendments. It is a matter of indifference to me, as it is only a question whether the tax shall be $400 or $240.

Mr. HILL. The bill as it passed the House of Representatives made the tax on manufacturers $400.

Mr. SHERMAN. Yes.

Mr. HILL. I think the tax should be made exactly as the House passed it upon the manufacturers. The amount to be paid by the wholesale dealer, as the bill passed the House, was $250, and the amendment of the Senate was to reduce it to $200.

Mr. President, I favor the passage of the bill, not upon the grounds stated by the distinguished Senator from Ohio [Mr. SHERMAN], who has the bill in charge, but I favor it as a revenue measure, and therefore I am anxious that it shall produce as much revenue as it is capable of producing. For that reason I favor leaving the bill exactly as the other House passed it.

There are some features of the measure which I do not very cordially approve, but in the present exigency of the Treasury I am in favor of the passage of this bill to relieve the Treasury as much as possible. I regret that there has not been any estimate produced here from any source as to the precise amount of revenue which this measure, if it become a law, is likely to produce. I do not favor the bill upon any ground other than the raising of revenue. The very object of the bill, as stated in one of the amendments offered, was correctly detailed, according to the statement of some of the Senators who have favored the bill. I place my support of the bill entirely upon the ground of its revenue provisions, and upon those only. The States have ample power to regulate this question for themselves.

So far as the protection features of the bill are concerned, the National Government has the right to take this fraud by the throat and to tax it, and it is not an abuse of the taxing power so to do. The oleomargarine bill was subject to the same objection, but it is upon the statute book and nobody has proposed its repeal from the time it was passed to the present; there is no effort to repeal it, nobody is asking for its repeal. It is bringing revenue for the support of the Government, and it is a precedent for the enactment of this bill into law. As the oleomargarine law has produced nearly $2,000,000 annually, in the present exigency of the Treasury I think we might well supplement it by the passage of this measure, but I do not believe in minimizing this tax. Therefore I think it is wise not to concur in the amendments of the committee, but to leave the tax as the other House left it, and I trust the distinguished Senator from Ohio will see the propriety of this action.

Mr. SHERMAN. So far as the committee are concerned, after consulting with the members around me, I have no objection to disagreeing to the amendments and letting the bill stand just as it came from the House of Representatives.

The PRESIDING OFFICER. The question is on concurring in the amendments made as in Committee of the Whole. Is it desired that the vote shall be taken in gross or separately?

Mr. MORRILL, Mr. SHERMAN, and others. In gross.

The PRESIDING OFFICER. The question is on concurring in the amendments made as in Committee of the Whole.

The amendments were nonconcurred in.

The bill was ordered to a third reading, and read the third time.

The PRESIDING OFFICER. The question is, Shall the bill pass?

Mr. VEST. I call for the yeas and nays on the passage of the bill.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CARTER (when his name was called). I am paired with the Senator from Maryland [Mr. GIBSON], and therefore withhold my vote.

Mr. CULLOM (when his name was called). I have had a general pair with the Senator from Delaware [Mr. GRAY]. The Senator from Florida [Mr. PASCO] has had a pair with the Senator from Missouri [Mr. COCKRELL]——

Mr. PASCO. On this question.

Mr. CULLOM. On this question. We have paired the Senator from Missouri with the Senator from Delaware, and therefore are at liberty to vote. I vote "yea."

Mr. FAULKNER (when his name was called). I am paired with my colleague from West Virginia [Mr. ELKINS].

Mr. GEAR (when his name was called). I am paired with the Senator from Georgia [Mr. GORDON]. If he were here, I should vote "yea."

Mr. GORMAN (when his name was called). I am paired with the Senator from Maine [Mr. FRYE].

Mr. PASCO (when his name was called). Under the arrangement announced by the Senator from Illinois [Mr. CULLOM] I am at liberty to vote. I vote "nay."

Mr. PERKINS (when his name was called). I have a general pair with the junior Senator from North Dakota [Mr. ROACH]. If he were present, he would vote in the affirmative. I therefore vote "yea."

Mr. WALTHALL (when his name was called). On the passage of this bill I am paired with the Senator from Pennsylvania [Mr. CAMERON]. If he were present, I should vote "nay."

Mr. WETMORE (when his name was called). I am paired with the junior Senator from Georgia [Mr. BACON]. If he were present, I should vote "yea."

The roll call was concluded.

Mr. PRITCHARD. I am paired with the Senator from Louisiana [Mr. BLANCHARD], but for the purpose of this vote I transfer that pair to the Senator from Maine [Mr. FRYE], who is paired with the Senator from Maryland [Mr. GORMAN], and vote "yea."

Mr. GORMAN. Under that transfer of pairs I am at liberty to vote. I vote "nay."

Mr. HANSBROUGH. I desire to announce that the Senator from Utah [Mr. CANNON], who is absent, would vote for this bill were he present.

Mr. BRICE. I am paired with the Senator from Colorado [Mr. WOLCOTT].

The result was announced—yeas 37, nays 13; as follows:

YEAS—37.

Aldrich,	Hale,	Nelson,	Shoup,
Allison,	Hansbrough,	Palmer,	Smith,
Brown,	Hawley,	Peffer,	Stewart,
Butler,	Hill,	Perkins,	Teller,
Chandler,	Jones, Nev.	Pettigrew,	Turpie,
Clark,	Lodge,	Platt,	Vilas,
Cullom,	McBride,	Pritchard,	Warren.
Davis,	Mitchell, Oreg.	Quay,	
Dubois,	Mitchell, Wis.	Sewell,	
Gallinger,	Morrill,	Sherman,	

NAYS—13.

Bate,	Gorman,	Mills,	White.
Berry,	Harris,	Morgan,	
Chilton,	Jones, Ark.	Pasco,	
George,	Lindsay,	Vest,	

NOT VOTING—39.

Allen,	Cannon,	Gray,	Roach,
Bacon,	Carter,	Hoar,	Squire,
Baker,	Cockrell,	Irby,	Thurston,
Blackburn,	Daniel,	Kyle,	Tillman,
Blanchard,	Elkins,	McMillan,	Voorhees,
Brice,	Faulkner,	Mantle,	Walthall,
Burrows,	Frye,	Martin,	Wetmore,
Caffery,	Gear,	Murphy,	Wilson,
Call,	Gibson,	Proctor,	Wolcott.
Cameron,	Gordon,	Pugh,	

So the bill was passed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 8293) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1896, and for prior years, and for other purposes.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 5210) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1897, and for other purposes; further insisted upon its disagreement to the amendments of the Senate numbered 40, 61, 69, 87, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 105, 154, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 193, 194, 195, and 201, upon which the committee were unable to agree; agreed to the further conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. GROUT, Mr. PITNEY, and Mr. DOCKERY managers at the conference on the part of the House.

ELIZABETH W. SUTHERLAND.

The PRESIDING OFFICER laid before the Senate the bill (S. 1420) granting a pension to Elizabeth W. Sutherland, returned from the House of Representatives at the request of the Senate.

Mr. GALLINGER. I move that the Senate reconsider the votes whereby it nonconcurred in the House amendments and requested a conference with the House of Representatives on the bill and amendments.

The motion to reconsider was agreed to.

Mr. GALLINGER. The Senate passed the bill granting a pension at the rate of $75 a month. The House amended it by making the sum $50 a month. The Senate appointed a committee of conference. We have been waiting on the House for more than two weeks to do us the courtesy of appointing a committee of conference on their part. They have failed to do so. Wishing that Mrs. Sutherland may get some relief during the present Congress, I, with her consent, requested the recall of the bill from the House for the purpose of concurring in the House amendments.

I move that the Senate concur in the amendments of the House of Representatives. It is the best we can do.

The amendments were concurred in.

RECIPROCITY AND COMMERCIAL TREATIES.

The PRESIDING OFFICER laid before the Senate the following concurrent resolution of the House of Representatives; which was referred to the Committee on Printing:

Resolved by the House of Representatives (the Senate concurring), That there be printed 10,000 copies each of the majority and minority reports of the Committee on Ways and Means concerning reciprocity and commercial treaties, and also 10,000 copies of the hearings before the subcommittee of said Committee on Ways and Means on reciprocity and commercial treaties; 3,000 copies of said reports and hearings for the use of the Senate and 7,000 copies for the use of the House of Representatives.

HOUR OF MEETING ON FRIDAY.

Mr. ALLISON. I ask unanimous consent that when the Senate adjourn to-day it be to meet at 11 o'clock a. m. to-morrow.

The PRESIDING OFFICER. The Senator from Iowa asks unanimous consent that when the Senate adjourn to-day it be to meet at 11 o'clock a. m. to-morrow. Is there objection? The Chair hears none, and it is so ordered.

DESIGNATION OF PRESIDING OFFICER.

Mr. GORMAN. I ask the indulgence of the Senate to make a request. The Vice-President and the President pro tempore both being away, no designation of a Presiding Officer can be made over one day except by unanimous consent. I ask unanimous consent that the Senator from Connecticut [Mr. PLATT], who now occupies the chair, may act in that capacity until the adjournment to-morrow afternoon.

The PRESIDING OFFICER. If there is no objection, that order will be considered as made.

PROPOSED RESTRICTION OF IMMIGRATION.

Mr. LODGE. I move that the Senate take up the bill (H. R. 7864) to amend the immigration laws of the United States.

Mr. MILLS and Mr. HILL addressed the Chair.

Mr. ALDRICH. Debate is not in order.

The PRESIDING OFFICER. The Chair will state that the question is on agreeing to the motion to proceed to the consideration of the bill indicated by the Senator from Massachusetts.

Mr. HILL. Mr. President——

Mr. GALLINGER. Debate is not in order.

Mr. HILL. I know the question is not debatable, but I desire simply to say that I gave notice some time ago that I desired to move to take up the bill reported by the Judiciary Committee in relation to contempts of court. I was cut off on several occasions by other business, and I wish now to move that we proceed to the consideration of the bill, not necessarily to antagonize the immigration bill, but my bill, if I may use that expression, the contempt bill, has not passed the other House, and there is more propriety in taking up that bill, in order that it may go to the other House, than there is in taking up a bill which has already passed the House and which can be acted upon very quickly. Therefore I shall have to call for the yeas and nays on the motion of the Senator from Massachusetts, because I can not amend the motion, and I wish to have the contempt bill taken up and disposed of.

Mr. HARRIS. I wish to say a word to the Senator from Massachusetts before the question is taken, if I can get permission of the Senate so to do.

The PRESIDING OFFICER. The Senator from Tennessee can proceed by unanimous consent. The motion is not debatable.

Mr. HARRIS. I am quite aware of the fact that it is not debatable.

I want to suggest that the junior Senator from Maryland [Mr. GIBSON] before leaving for Annapolis, where he is now performing an official duty, especially requested me to ask that the bill should not be considered until he should return.

Mr. LODGE. I will say to the Senator from Tennessee that I merely desire to have the bill taken up and made the unfinished business, and I shall then give way for conference reports which the Senator from Maine [Mr. HALE] and the Senator from Iowa [Mr. ALLISON] desire to present. I do not intend to press the bill in the absence of the Senator from Maryland.

Mr. HARRIS. I have no desire to antagonize. I simply want to perform a duty to an absent Senator.

Mr. HILL. Mr. President——

Mr. TELLER. Let us have the regular order.

Mr. ALDRICH. Regular order.

Mr. HILL. I do not understand how the Senator from Massachusetts can control the bill in that way.

The PRESIDING OFFICER. The motion is not debatable.

Mr. HILL. I should think a Democrat would have the right once in a while to make a motion.

The PRESIDING OFFICER. The question is, Will the Senate proceed to the consideration of the bill?

Mr. HILL. On that question I ask for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CARTER (when his name was called). I am paired with the junior Senator from Maryland [Mr. GIBSON]. I therefore withhold my vote.

Mr. CULLOM (when his name was called). I have a general pair with the Senator from Delaware [Mr. GRAY]. If he were present, I would vote "yea."

Mr. FAULKNER (when his name was called). I am paired with the Senator from West Virginia [Mr. ELKINS].

Mr. GEAR (when his name was called). I am paired with the senior Senator from Georgia [Mr. GORDON].

Mr. PASCO (when his name was called). I am paired with the Senator from Missouri [Mr. COCKRELL]. In his absence I withhold my vote.

Mr. PERKINS (when his name was called). I am paired with the junior Senator from North Dakota [Mr. ROACH].

Mr. PUGH (when his name was called). I am paired with the Senator from Massachusetts [Mr. HOAR].

Mr. WALTHALL (when his name was called). I am paired with the Senator from Pennsylvania [Mr. CAMERON].

Mr. WETMORE (when his name was called). I am paired with the junior Senator from Georgia [Mr. BACON]. If he were present, I should vote "yea."

The roll call was concluded.

Mr. PUGH. I was requested by the Senator from Michigan [Mr. BURROWS] to state that he has a general pair with the Senator from Louisiana [Mr. CAFFERY].

Mr. SHOUP (after having voted in the affirmative). I am paired with the Senator from California [Mr. WHITE], and therefore withdraw my vote.

Mr. BRICE (after having voted in the negative). I have a general pair with the Senator from Colorado [Mr. WOLCOTT]. I withdraw my vote.

The result was announced—yeas 24, nays 6; as follows:

YEAS—24.

Aldrich,	Dubois,	Lodge,	Pettigrew,
Allison,	Gallinger,	McBride,	Platt,
Brown,	Hale,	Mitchell, Oreg.	Quay,
Butler,	Hansbrough,	Morrill,	Sewell,
Chandler,	Hawley,	Nelson,	Sherman,
Davis,	Jones, Nev.	Peffer,	Teller.

NAYS—6.

Bate,	Clark,	Lindsay,	Palmer.
Chilton,	Harris,		

NOT VOTING—59.

Allen,	Daniel,	McMillan,	Squire,
Bacon,	Elkins,	Mantle,	Stewart,
Baker,	Faulkner,	Martin,	Thurston,
Berry,	Frye,	Mills,	Tillman,
Blackburn,	Gear,	Mitchell, Wis.	Turpie,
Blanchard,	George,	Morgan,	Vest,
Brice,	Gibson,	Murphy,	Vilas,
Burrows,	Gordon,	Pasco,	Voorhees,
Caffery,	Gorman,	Perkins,	Walthall,
Call,	Gray,	Pritchard,	Warren,
Cameron,	Hill,	Proctor,	Wetmore,
Cannon,	Hoar,	Pugh,	White,
Carter,	Irby,	Roach,	Wilson,
Cockrell,	Jones, Ark.	Shoup,	Wolcott.
Cullom,	Kyle,	Smith,	

The PRESIDING OFFICER. No quorum having voted, the Secretary will call the roll.

The Secretary called the roll; and the following Senators answered to their names:

Aldrich,	Dubois,	McBride,	Pugh,
Allison,	Faulkner,	Mills,	Quay,
Bate,	Gallinger,	Mitchell, Oreg.	Sewell,
Berry,	Gear,	Morgan,	Sherman,
Brice,	George,	Morrill,	Shoup,
Butler,	Gorman,	Nelson,	Teller,
Carter,	Hale,	Palmer,	Vest,
Chandler,	Hansbrough,	Pasco,	Walthall,
Chilton,	Harris,	Peffer,	Wetmore.
Clark,	Hawley,	Perkins,	
Cullom,	Lindsay,	Pettigrew,	
Davis,	Lodge,	Platt,	

The PRESIDING OFFICER. Forty-five Senators have responded to their names. A quorum is present. The question recurs upon the motion of the Senator from Massachusetts [Mr. LODGE] to proceed to the consideration of the bill known as the immigration bill.

Mr. HALE. Allow me to appeal to the Senator from Massachusetts. I sympathize with him about his bill——

Mr. LODGE. I should like to have another yea-and-nay vote on the motion.

Mr. HALE. There will be no quorum, I presume, on a test vote. I should like to get up a conference report.

Mr. LODGE. I should like to develop that fact again.

Mr. GORMAN. I trust the Senator from Massachusetts will withdraw his motion until to-morrow, when it can be renewed, and we shall have a voting quorum present. He can withdraw it now and make it again in the morning.

Mr. HALE. Pending the motion, I present a privileged report and ask for its consideration.

Mr. GORMAN. I suggest that the motion to proceed to the consideration of the immigration bill had better be withdrawn for a moment. We are dividing upon the question, and the Senator from Massachusetts will have to withdraw it if other business is to intervene.

Mr. LODGE. I do not feel like withdrawing the motion. It will come up to-morrow; it is the unfinished business, and it can be voted on.

Mr. GORMAN. Then I shall object to any other business being transacted.

Mr. HALE. I have presented a privileged report which, of course, under the rule I can do at any time when a quorum is present.

Mr. GORMAN. But the Senate is dividing. It is voting on a proposition which can not be debated.

Mr. LODGE. There is nothing else in order.

Mr. GORMAN. We are actually in process of dividing.

Mr. LODGE. Nothing is in order but the call of the roll.

Mr. GORMAN. Absolutely nothing.

Mr. HALE. I understand the roll call has developed the presence of a quorom.

Mr. LODGE. But nothing is in order now except the calling of the roll on the motion to proceed to the consideration of the bill.

Mr. HALE. The Chair has the rule before him.

The PRESIDING OFFICER. The Chair is of opinion that the point of order is well taken. The Secretary will read Rule XXVII.

The Secretary read as follows:

The presentation of reports of committees of conference shall always be in order, except when the Journal is being read or a question of order or a motion to adjourn is pending, or while the Senate is dividing; and when received, the question of proceeding to the consideration of the report, if raised, shall be immediately put, and shall be determined without debate.

The PRESIDING OFFICER. The question was taken on the motion to proceed to the consideration of the immigration bill. It developed the want of a quorum. Then the roll was called, and a quorum appeared. The question, the Chair thinks, recurs upon the original motion, and the Senate is dividing. The question is, Will the Senate proceed to the consideration of the immigration bill? Upon which the yeas and nays have been ordered. The question is not debatable.

Mr. HALE. I ask unanimous consent that the Senate proceed to the consideration of the conference report.

Mr. GORMAN. I must object to that request, and I will state my reason for interposing an objection. I desire to say to the Senator that we have appealed to the Senator from Massachusetts to withdraw his motion until to-morrow morning, when the question can be taken without further debate. In the meantime we can proceed with the conference report and facilitate business in the Senate. There is not the slightest desire to impede the business of the Senate. On the contrary, the purpose has been, and is, to facilitate it in every way. But there are reasons why we do not desire a vote to be taken on this question to-night. I again appeal to the Senator from Massachusetts to withdraw his motion. He can renew it in the morning. Then we can go on with the ordinary business.

Mr. LODGE. The presence of a quorum has been developed by the last roll call. I should like one more vote on the motion to take up the bill.

Mr. GORMAN (at 4 o'clock and 50 minutes p. m.). I move that the Senate adjourn.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Maryland that the Senate adjourn.

Mr. ALDRICH. On that I ask for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CULLOM (when his name was called). I am paired with the Senator from Delaware [Mr. GRAY].

Mr. FAULKNER (when his name was called). I am paired with the Senator from West Virginia [Mr. ELKINS].

Mr. GEAR (when his name was called). I am paired with the Senator from Georgia [Mr. GORDON].

Mr. GORMAN (when his name was called). I am paired with the Senator from Maine [Mr. FRYE].

Mr. HARRIS (when his name was called). I am paired with the Senator from Vermont [Mr. MORRILL].

Mr. PUGH (when his name was called). I am paired with the Senator from Massachusetts [Mr. HOAR].

Mr. SEWELL (when his name was called). I am paired with the Senator from Wisconsin [Mr. MITCHELL].

Mr. SHOUP (when his name was called). I have a standing pair with the Senator from California [Mr. WHITE], and therefore withhold my vote.

Mr. WALTHALL (when his name was called). I am paired with the Senator from Pennsylvania [Mr. CAMERON].

Mr. WETMORE (when his name was called). I am paired with the junior Senator from Georgia [Mr. BACON].

The roll call having been concluded, the result was announced—yeas 9, nays 22; as follows:

YEAS—9.

Bate,	Chilton,	Jones, Nev.	Mills,
Berry,	George,	Lindsay,	Palmer.
Butler,			

NAYS—22.

Aldrich,	Dubois,	McBride,	Quay,
Allison,	Gallinger,	Mitchell, Oreg.	Sherman,
Brown,	Hale,	Peffer,	Teller,
Chandler,	Hansbrough,	Perkins,	Warren.
Clark,	Hawley,	Pettigrew,	
Davis,	Lodge,	Platt,	

NOT VOTING—58.

Allen,	Elkins,	Mantle,	Squire,
Bacon,	Faulkner,	Martin,	Stewart,
Baker,	Frye,	Mitchell, Wis.	Thurston,
Blackburn,	Gear,	Morgan,	Tillman,
Blanchard,	Gibson,	Morrill,	Turpie,
Brice,	Gordon,	Murphy,	Vest,
Burrows,	Gorman,	Nelson,	Vilas,
Caffery,	Gray,	Pasco,	Voorhees,
Call,	Harris,	Pritchard,	Walthall,
Cameron,	Hill,	Proctor,	Wetmore,
Cannon,	Hoar,	Pugh,	White,
Carter,	Irby,	Roach,	Wilson,
Cockrell,	Jones, Ark.	Sewell,	Wolcott.
Cullom,	Kyle,	Shoup,	
Daniel,	McMillan,	Smith,	

The PRESIDING OFFICER. No quorum having voted, the Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Aldrich,	Davis,	Lodge,	Pugh,
Allison,	Dubois,	McBride,	Quay,
Bate,	Faulkner,	Mills,	Sewell,
Berry,	Gallinger,	Mitchell, Oreg.	Sherman,
Brice,	Gear,	Morgan,	Shoup,
Brown,	George,	Nelson,	Teller,
Butler,	Gorman,	Palmer,	Turpie,
Carter,	Hale,	Pasco,	Walthall,
Chandler,	Hansbrough,	Peffer,	Warren,
Chilton,	Harris,	Perkins,	Wetmore,
Clark,	Hawley,	Platt,	White.
Cullom,	Lindsay,	Proctor,	

The PRESIDING OFFICER. Forty-seven Senators having answered to their names, the question recurs on the motion of the Senator from Massachusetts [Mr. LODGE].

Mr. LODGE. I am now entirely satisfied, having developed the character and quality of the opposition to taking up the immigration bill, and I withdraw the motion so that the Senator from Maine can submit the conference report.

DEFICIENCY APPROPRIATION BILL.

Mr. HALE. I ask that the conference report on the deficiency appropriation bill be read.

The report was read, as follows:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 8293) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1897, and for prior years, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 24, 25, 30, 31, 37, 74, 103, 104, 105, 106, 147, 148, and 200.

That the House recede from its disagreement to the amendments of the Senate numbered 14, 79, 80, 81, 82, 137, 190, and 192, and agree to the same.

That the Senate recede from its disagreement to the amendments of the House to the amendments of the Senate numbered 27, 207, and 208, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 83, and agree to the same with an amendment as follows: Strike out all after the word "cents," in line 8, down to and including line 20 of said amendment; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 122, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"That the Secretary of the Treasury is directed, until otherwise provided by law, to pay, after reserving not exceeding $30,000 per annum for educational purposes and expenses of necessary employees, to the Sisseton and Wahpeton Indians of South Dakota all interest money due them up to July 1, 1896; and that thereafter all interest money as it shall accrue shall be paid, except as herein provided, on the 1st day of November annually."

And the Senate agree to the same.

EUGENE HALE,
W. B. ALLISON,
F. M. COCKRELL,
Managers on the part of the Senate.

J. G. CANNON,
W. O. ARNOLD,
JOSEPH D. SAYERS,
Managers on the part of the House.

The PRESIDING OFFICER. The question is on concurring in the report.

Mr. FAULKNER. I ask the Senator who has the bill in charge to give the status of the Ford's Theater question.

Mr. HALE. The amendment of the House was agreed to which directs the Commission to reexamine certain claims. Rather than strike the whole of them out, which was the alternative with which the Senate conferees were confronted, we thought this the most fitting and just thing to all the claimants; and it will only cause a delay extending from the present time until December.

Mr. FAULKNER. I will ask the Senator whether the Senate conferees receded from the amendment which was put on by the Senate repealing the law under which the Commission was created?

Mr. HALE. Oh, the Commission remains intact.

Mr. FAULKNER. I desire, in justice to myself, as a member of that Commission, to make a few remarks in reference to the subject, and yet I will do it in a way as brief as possible, knowing that the Senate is anxious to get away this evening.

The amendment of the House is one to which I can never agree, as the conferees have receded from three death claims in

which the parties are very much in need of the money, and it was done without any comment or criticism whatever as to those three claims, not even from the War Department official who addressed the letter to Mr. SAYERS, a member of the House of Representatives from Texas, in reference to the subject.

I desire to have incorporated, without reading, in the RECORD, in justification of the Commission, the evidence in reference to the case of Ethelbert Baier, on page 3, which I will give the Reporter, with the part marked which I desire to have inserted. It is very short, but it shows the action of the Commission and the reason for that action. Also, the case of Edward C. Carroll, on page 6; also, the case of George R. Garnett, on page 9; the case of Charles R. Miller, on page 17; the case of Thomas Morley, on page 18; the case of George W. Smoot, on page 25; the case of Smith Tompson, on page 26, and the case of Nathan F. White, on page 28.

An examination of the testimony by Senators, if they ever take the trouble to read it in the RECORD (and it is a condensed statement of the evidence in each of the cases commented on), will convince any impartial mind that the judgment reached by the Commission was fair and just.

I desire to say on behalf of the Commission that the memorandum sent by the Department to the Representative from Texas on the Appropriations Committee of the House was laid before the Commision. It was a mere memorandum obtained on or about the time of the disaster by the chiefs of division. It was considered by the Commission as a part of the evidence affecting the rights of the claimants, and was overthrown completely by the testimony that was laid before the Commission by disinterested witnesses heard before them.

With this statement I do not propose to make any objection to concurrence in the conference report, for the reason that I think the others are in such need that it is the duty of Congress to give them this relief as promptly as possible.

Mr. CULLOM. Is the Senator from West Virginia prepared to state how many of the claims have been dropped out of the bill?

Mr. FAULKNER. Eleven claims and three death cases were dropped out; and in the case of all but one of the death cases there is no comment, no criticism made by any Department officer or member of Congress or by anyone else I know or have been able to learn of. Why those claims were stricken from the amendment I do not understand.

The PRESIDING OFFICER. If there be no objection, the matter referred to will be inserted in the RECORD by the Reporter.

The matter referred to is as follows:

ETHELBERT BAIER.—Age, 25; wife; journalist; $1,000 clerk.

Claim.—Doctors, $570; medicine, $15; total, $585.

Claim.—Right arm and back severely strained by descending fire hose hand over hand from third story; acute nervous shock resulting in insomnia and nervous headaches. February, 1894: Easily startled, causing numbness, choking, and palpitation; hands in a semi-numb state; insomnia, getting only from two to five hours' sleep a day; sitting puts hips and thighs asleep; lost one-half physical strength; frequent nervous headaches; was free from any organic trouble before; fell 25 feet from the end of the hose to the ground. May, 1895: Have not recovered; back weak; incapable of manual labor; right arm is affected; was obliged to resign August 24; lost much in weight; complain now of headaches, twitches in chest, nervousness, loss of memory, inability to do any work; never had headache and was sound as a dollar before; hand and ankles are numb now; when I wake up at night I find my whole side paralyzed if I lay on my side.

Dr. Wooster: Claimant was well and strong before; saw him a week after accident; he was suffering from shock and it developed into neurasthenia; found tenderness in dorsal region; found well-marked symptoms of neurasthenia; it was a little early, but was a case of marked depression; found no bruises on back, but a nervous condition.

Dr. Irving C. Ross: Subjective symptoms, mainly neurasthenic; objective facts, heart's action excited and irregular, sounds normal, no appreciable lesion; pupils somewhat dilated; slight muscular tremor, within coordination when motions are unaccompanied by the eyesight. The patella tendon reflexes exaggerated and respond unequally to test. There is apparent lessening of grip of right hand. Evident tenderness exists over the dorsal spine, with disturbance of tactile sensibility; vaso-motor disturbance is shown in the cold and clammy extremities; seems to suffer from impairment of memory and the psychic depression common to such cases. Think it probable the disability was incurred as alleged and is of uncertain duration. (Foregoing statement made April 17, 1894.)

Medical board: No permanent disability.

Dr. Wooster, December 19, 1896, certifies: Treated claimant from and after June 15, 1893. Upon careful examination this day made, found him suffering from a nervous condition, no doubt due to the theater disaster. This condition did not readily yield to treatment, as it developed into neurasthenia. I ordered him to leave the office entirely. While he has somewhat improved, he will, in my opinion, be a sufferer of this injury to his nerves to the end of his days. By a careful and quiet life he may be able to finally recover, but it is doubtful, as his case has resisted treatment.

Ernest Vasmer, of Texas (witness): He was in my employ from May, 1889, until April, 1891, living in my house. He was sound and healthy in every way.

EDWARD C. CARROLL.—Age, 64; one son dependent; $1,200 clerk.

Claim.—Paid hospital $64.

Claim.—Injured sinews of right knee and left ankle; diarrhea; complete nervous prostration February, 1894; still under doctor's care July, 1894. My nerves and stomach are the trouble now, diarrhea gone; claims for indigestion; live on bread and milk; claims for shock also.

Dr. Kolipinski. He has chronic gastritis; the accident aggravated it.

November 18, 1893, United Life Insurance Association, of New York, refused to reinstate lapsed insurance after medical examination, on account of bad health.

Medical board: No present disability.

GEORGE R. GARNETT.—Age, 52; wife; returned to duty July 1; discharged next May; laborer; twenty-four years a soldier.

Claim.—Doctors, drugs, seashore, etc., $140.90.

Claim.—Severe bruises and sprain of back and right hip; internal injuries; nervous shock; persistent vomiting for several days; bloody urine—albumen constantly present. February, 1894: Back is very sore yet; have been completely impotent; stoop with great difficulty; piles continue troublesome; insomnia; constant headache; previous heart disease greatly aggravated; have experienced very little improvement. June, 1894: Spine out of trace; spine hurts all the time; have been discharged; does not mention impotency; before surgical board June, 1894, complained of impotency, shrunken testicles. (Examination by board showed them rather small.)

Dr. Jenner. Had bloody urine several days; spine is tender; was crazy as a loon at times; threatened suicide; don't know how to explain relation of injury to back with testicle troubles; hardly think there is any permanent injury; can't say whether his spine is injured or not; he was pensioned for heart trouble.

Medical board: Find no permanent disability.

CHARLES R. MILLER.—Age, 46 in 1893; wife and two children, and partially supports mother; been clerk in Record and Pension Office since 1882; salary, $1,200, paid to June 30, 1894; efficiency record, 91.9; No. 105 out 465 clerks; has pension of $72 per month on appeal to Secretary of Interior; spinal anchylosis and destruction of spinal nerves; injury to left leg; unable to reach foot with hand by 23 inches, hence needs attendance.

Claim.—Medical attendance, drugs, appliances, nursing, traveling expenses paid, $2,662.65.

Claim.—Loss of ability to earn $100 per month in office; abbreviated expectancy of life; intense and permanently continuing physical suffering; necessity for constant medical attendance and drugs and appliances, and unavoidable offensiveness from bladder injury.

Dr. Darragh, who attended him at and for the first month after the accident, says: "Numerous contusions and abrasions of scalp; hardly a sound spot as big as a dollar on top of head; unable to move his body or lower extremities; passive movements very painful; lacerated wound 2 inches long on right eye; bruise on abdomen from pubes to crest of ilium; spine badly sprained in lumbar region; neighboring tissue much swollen; partial paralysis and intense pain; both hands cut and bruised; the anchylosed knee badly bruised, poor nutrition making it serious; on the leg was an abrasion extending entire length of tibia, ending in a gouge at the ankle; had muscular tremor before the accident when excited."

Dr. Beebe, of Walled Lake, Mich., attended him after August, 1893, and says: "Totally and permanently unfit for manual or mental labor; suffers from shock and permanent injury of spine, paralysis of bladder, and periostitis of the membranes of the left tibia: shock to muscular and nervous system permanent; heart injured by shock; muscles of back and kidneys and lumbar region indicate severe injury; his head and entire body is in constant muscular tremor."

Three other doctors at Flint, Mich., corroborate this.

Normal weight, 190 to 200 pounds; present weight, 179 pounds.

S. H. Dickson, surgeon, and Leonard Wood, assistant surgeon, United States Army, say: "He is well nourished; heart and lungs apparently normal and doing their work perfectly; moderate muscular tremor, which seems to be general; temperature normal; skin healthy. In regard to injuries at Ford's Theater, we find partial loss of motion in joint left finger, due to injury from broken pen point; no evidence of any severe wounds; careful search discloses no cicatrices, but simply slight discoloration; no indications of any severe injuries to left leg could be discovered except old war injuries. Examination of urethra disclosed severe stricture, which existed before accident, for which proper treatment will to a very great extent bring relief. We think he did not receive any permanent injury in the disaster except to finger joint, and find no evidence of any severe wounds received at the time."

THOMAS MORLEY.—Age, 66; mechanical engineer; assistant messenger; wife and four minor children; $6 pension for bronchitis and varicocele; pay, $60 a month; discharged December, 1893.

Claim.—Medicine and attendance paid, $50; bills yet unpaid, $122; total, $172.

Claim.—Right arm greatly bruised from shoulder down; back severely injured. January, 1894: Arm swollen at first, then withered so as to be useless, and is gradually withering; back still painful at times; injury permanent. June, 1894: Tried to run elevator and fell on account of nervousness, and was then discharged; can use arm but little now; before accident could strike a 200-pound blow.

Lizzie Martin (witness): He seems very much shocked and in great pain; he has never been the same since the accident.

Dr. William Ward (swears): Atrophy of the muscles of the arm; thinks there is progressive muscular palsy; in all probability it will terminate in further disability.

Medical board: Find no permanent disability.

May 6, 1896, Dr. William Ward testified before the Commission that claimant has progressive muscular palsy in his arm, is incapacitated for manual labor, and is likely to die suddenly from the effect of the palsy.

Several witnesses testified to the fact that claimant was in the building at the time of the accident.

GEORGE W. SMOOT.—Age, 55; wife and three children; pensioned for heart trouble; discharged July, 1894; clerk.

Claim.—Expenses, $25.

Claim.—Severe injury to back and nervous shock. April, 1894: Have severe pains in back of head and soreness in back and spine, and very nervous. June, 1895: Resumed work 20th of January; could not turn over in bed for a week; was laid up last Monday; numbness and pain in back; have no tender place in back; got heart disease in the Navy in 1863; heart trouble has increased since the accident; did not have much trouble before.

George Morgan (witness): Helped claimant home; he was almost helpless; thought his back was broken; he was completely prostrated.

Dr. N. F. Graham: He was pretty badly shaken up; can not say that his heart is worse now than before the accident; he is more nervous than he used to be.

Medical board: No permanent disability.

May 5, 1896, a pension board of this city, after examination of claimant, state that he has serious injury to the back, that the back is still tender and painful, lumbar region painful on motion, muscular portion of lower limbs moderately diminished, right patellar reflex abolished, left diminished; claimant's gait is slow and cautious; he is very nervous.

SMITH TOMPSON.—Age, 75; $1,000 clerk; wife, requiring constant care and attention; discharged in April, 1894, along with 18 others, who testified before a coroner's inquest; attributes discharge to this fact.

Claim.—Doctors, nursing, and medicine, $90; nursing, $20; forty-nine days' lost time without pay, $133.15; doctors, $48; total, $291.15.

Claim.—Green fracture of rib; no distinct statement of precise character of injuries found; in April, 1894, he refers for this to his doctor, Elmer Southeron, who says, December, 1893, that claimant's nervous system is completely wrecked, and his statement that he passes sleepless nights, waking up at short intervals of fitful slumber and terrible forebodings, is well borne out by his condition; that shattered health is the direct result of the disaster. The doctor fears there is little hope of improvement; thinks it is a bad case. In May, 1895, the claimant says: My standing had been 90, reduction followed, and discharge came; I have little use of this arm; can write, but can not lift my arm; my injury nothing but a broken rib and a general shake up; can not take a full breath without pain where the rib was broken.

Dr. Elmer Southeron: He has gone down from 158 to 121 pounds; has insomnia and hallucinations; he was a man of splendid physique before the

accident; since that his condition has been growing worse; has some symptoms of pleurisy; think he will grow worse; treated him before accident; suffered only from bilious attack.

Medical board. No permanent disability.

NATHAN F. WHITE.—Age, 65; clerk class 1; three invalid sisters and brother dependent entirely; $12 pension; reported to office June 25; unable to work until five days thereafter; was then compelled to leave for six weeks; was under doctor's care until July, 1894; then discharged.

Claim.—Can not furnish itemized statement of expenses.

Claim.—Strangulated hernia in escaping; insomnia; injury permanent; had to use crutches for eight months; had a slight rupture before accident; it had given him no trouble for three years.

Dr. B. D. Adams: Claimant had mild hernia before accident; sometimes wore truss, sometimes not; perhaps he did not wear truss before accident; after accident I saw hernia very much enlarged; had considerable trouble in reducing it; had to give chloroform; he has to be very careful even with truss; slightest exertion brings it out; there is no question but that his hernia is a permanent disability; it was aggravated considerably by the accident.

Medical board find permanent disability and fix its degree at one-eighth.

Mr. HARRIS. May I inquire of the Senator from Maine if this is the final report upon the bill and if it disposes of the disagreement between the two Houses?

Mr. HALE. It is the final report, disposing of the bill.

The report was concurred in.

BALTIMORE AND WASHINGTON TRANSIT COMPANY.

Mr. GALLINGER. I ask the Senate to proceed to the consideration of the bill (H. R. 8469) to authorize the Baltimore and Washington Transit Company, of Maryland, to enter the District of Columbia. It is a measure that ought to be passed before the adjournment of Congress. I ask unanimous consent for its present consideration.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CAROLINE S. BAKER.

Mr. BRICE. I ask unanimous consent to call up for consideration a pension bill which I reported from the Committee on Pensions, being the bill (S. 2989) to increase the pension of Caroline S. Baker.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported from the Committee on Pensions with an amendment, in line 5, before the word "dollars," to strike out "fifty" and insert "thirty"; so as to make the bill read:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension roll, at $30 per month, subject to the provisions and limitations of the pension laws, the name of Caroline S. Baker, widow of John Howard Baker, late assistant engineer, United States Navy, in lieu of the pension she is now receiving.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

GEORGE HAGER.

Mr. BRICE. I should like to have one other pension bill considered, if I can get unanimous consent for that purpose. I ask the Senate to proceed to the consideration of the bill (H. R. 4888) for the relief of George Hager.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to revoke the order of the Commissioner of Pensions of the date of April 10, 1895, to recover from George Hager, late a private of Company B, Ninety-ninth Regiment Ohio Volunteer Infantry, in the late war of the rebellion, by withholding from his current pension the sum of $2 per month from July 29, 1863, to September 14, 1881, inclusive.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CHARITY HOSPITAL AT BILOXI, MISS.

Mr. WALTHALL. I ask the Senate to proceed to the consideration of the bill (H. R. 7919) granting a site for the erection and maintenance of a charity hospital by the city of Biloxi, Miss.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

SOPHIA SPARKS AND JULIA C. SPARKS.

Mr. MITCHELL of Oregon. I ask unanimous consent for the present consideration of the bill (H. R. 956) for the relief of Sophia Sparks and Julia C. Sparks, of Annapolis, Md.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to pay jointly to Sophia Sparks and Julia C. Sparks, of Annapolis, Md., the sole heirs and surviving children of Edward Sparks, deceased, the sum of $670.58, in full payment for sundry supplies furnished by Edward Sparks at various dates between January, 1863, and July, 1866, to the United States Naval Academy.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

SURVIVORS OF LADY FRANKLIN BAY EXPEDITION.

Mr. SHOUP. I ask unanimous consent for the present consideration of the bill (S. 1277) for the appointment as lieutenants on the retired list of certain survivors of the Lady Franklin Bay expedition.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Military Affairs with an amendment to strike out all after the enacting clause, and insert:

That the President be, and he is hereby, authorized to cause Henry Biederbick, Julius R. Frederick, Francis Long, and Maurice Connell, survivors of the Lady Franklin Bay expedition, to be enlisted as sergeants of the Signal Corps of the Army and to place them on the retired list of the Army with the pay and allowances of sergeants of the Signal Corps who have been retired after continuous active service of fifteen years: *Provided*, That said pay and allowances shall be in lieu of any and all pensions that may have heretofore been granted to the persons hereinbefore named.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to place Henry Biederbick, Julius R. Frederick, Francis Long, and Maurice Connell on the retired list of enlisted men of the Army."

CLAIMS OF B. H. HENRY AND OTHERS.

Mr. LODGE. I ask unanimous consent for the present consideration of Calendar No. 1015, being a resolution reported by me from the Committee on Foreign Relations on the 13th of May last.

The resolution was considered by unanimous consent, and agreed to, as follows:

Resolved, That the President is hereby requested to continue the investigation and efforts hitherto made by the United States in the matter of the claims of B. H. Henry and other American citizens against the Government of Great Britain in regard to certain lands in the Fiji Islands, to the end that such an adjustment of such claims may be made as may be warranted by the facts and by the law applicable thereto.

MRS. SELENA M'KAY.

Mr. PASCO. I ask consent of the Senate for the consideration at this time of the bill (S. 1551) granting a pension to Mrs. Selena McKay, of Suwanee County, Fla.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Pensions with an amendment, after the word "war," in line 9, to insert "and rate her at $8 per month"; so as to make the bill read:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place upon the pension rolls, subject to the provisions and limitations of the pension laws, the name of Selena McKay, of Suwannee County, Fla., widow of William McKay, a soldier in Capt. C. C. Coffee's Company of Florida Volunteers, raised for service in the Mexican war, and rate her at $8 per month.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

JOHN B. BESLER.

Mr. HAWLEY. I ask the Senate to permit me to call up at this time for consideration the bill (H. R. 5258) granting an honorable discharge to John B. Besler.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It directs the Secretary of War to correct the military record of, and grant an honorable discharge to, John B. Besler, late a private in Company M, First Regiment Connecticut Heavy Artillery, now a resident of New Haven, Conn.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ADOLPH VON HAAKE.

Mr. WARREN. I ask unanimous consent for the present consideration of the bill (S. 1785) for the correction of muster of Adolph von Haake, late major Sixty-eighth Regiment Veteran Volunteer Infantry.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It directs the Secretary of the Treasury to pay Adolph von Haake the difference of pay and emoluments between major and captain of infantry from October 25, 1863, to November 12, 1863, and from March 4, 1865, to June 10, 1865.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

HELEN LARNED.

Mr. CHANDLER. I ask unanimous consent for the present consideration of the bill (H. R. 6607) for the relief of Helen Larned.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to place on the pension roll, at $25 per month, the name of Helen Larned, widow

of the late Frank H. Larned, major First Regiment United States Artillery.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

SARAH R. DRESSER.

Mr. TELLER. I ask leave to call up for present consideration the bill (S. 915) for the relief of Sarah R. Dresser.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported by the Committee on Indian Affairs with an amendment, in line 21, after the word "from," to insert "the 16th day of April, 1888"; so as to make the bill read:

Be it enacted, etc., That the act entitled "An act to accept and ratify the agreement submitted by the confederated bands of Ute Indians in Colorado for the sale of their reservation in said State, and for other purposes, and to make the necessary appropriations for carrying out the same," approved June 15, 1880, be, and the same is hereby, amended by the substitution of the name of Mrs. Sarah R. Dresser for the name of George Dresser where it occurs in the first section of that act; and the Secretary of the Treasury is hereby directed to pay to the said Sarah R. Dresser, out of the portion of the money going to the White River Utes under this agreement, the sum of $200 per annum during her life, or until the expiration of the term of twenty years from the time the payment of the annuity to the said George Dresser under this agreement was begun; and, further, that the Secretary of the Treasury shall pay the said Sarah R. Dresser, out of the above-described fund, a sum equal in the aggregate to $200 per annum from the 16th day of April, 1888, the time of the said George Dresser's death, until the payment herein provided for shall be begun under the provisions of this act.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

C. M. KIRKPATRICK.

Mr. TURPIE. I ask unanimous consent for the present consideration of the bill (S. 1488) appropriating $6,332.30 in payment of the claim of C. M. Kirkpatrick for paving the street adjacent to the United States arsenal at Indianapolis, Ind.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Claims with amendments.

The first amendment was, in section 1, line 5, after the word "thousand," to strike out "three hundred and thirty-two dollars and thirty" and insert "and forty-four dollars and twenty-two"; so as to make the section read:

That there be, and is hereby, appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $6,044.22 for the payment of the claim of C. M. Kirkpatrick for improving with brick the street known as Clifford avenue from the tracks of the Cleveland, Cincinnati, Chicago and St. Louis Railroad Company to a point 145 feet east of Newman street, including the roadway in front of and adjacent to the ground owned by the United States Government, known and designated as the United States arsenal, at Indianapolis, Ind.

The amendment was agreed to.

The next amendment was to insert as an additional section the following:

SEC. 2. That when this settlement is made the Secretary of the Treasury shall take proper steps to secure for the United States the same benefit that the city of Indianapolis has obtained for other property holders interested in this improvement, to wit: That the said Christian M. Kirkpatrick shall keep in repair the portion of the said Clifford avenue belonging to the United States for five years from the completion of the work, for the payment of which provision is hereinbefore made, without additional cost to the Government.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to provide for the payment of the claim of Christian M. Kirkpatrick for paving the street adjacent to the United States arsenal at Indianapolis, Ind."

GOVERNMENT RESERVATION AT FORT SMITH, ARK.

Mr. BERRY. I ask unanimous consent for the present consideration of the bill (S. 2923) for the better improvement of the Government reservation at the city of Fort Smith, in the State of Arkansas, and for other purposes.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported from the Committee on Public Lands with an amendment, in section 2, line 22, page 3, after the word "flagging," to insert "and maintain the same"; so as to read:

And shall grade, curb, and pave the sidewalks around said block reserved to the United States with good, substantial stone curbing and flagging, and maintain the same, the work to conform to the ordinances of said city.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

JERUSHA H. BROWN.

Mr. PETTIGREW. I ask unanimous consent for the present consideration of the bill (H. R. 5279) granting a pension to Jerusha H. Brown.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to place on the pension roll, at $12 per month, Jerusha H. Brown, of St. Paul, Minn., daughter of Samuel Hayward, a soldier in the American Revolution.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

NORTH GEORGIA AGRICULTURAL COLLEGE.

Mr. CHANDLER. The Senator from Georgia [Mr. BACON], who was called away yesterday afternoon, endeavored to get up a bill, and he requested me to call it up for him. It is a very brief one. It is the bill (H. R. 4921) to relieve the North Georgia Agricultural College from the payment of $450 for damaged gun.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

MRS. LUCY ALEXANDER PAYNE.

Mr. WARREN. I desire to call up the bill (S. 1501) for the relief of Mrs. Lucy Alexander Payne, widow of Capt. J. Scott Payne, Fifth United States Cavalry.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Pensions with an amendment, in line 7, after the words "lieu of," to strike out "any pension to which she may be entitled under existing laws" and insert "the pension she is now receiving"; so as to make the bill read:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to put the name of Mrs. Lucy Alexander Payne, widow of Capt. J. Scott Payne, Fifth United States Cavalry, on the pension roll at $50 per month, in lieu of the pension she is now receiving.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill granting an increase of pension to Mrs. Lucy Alexander Payne, widow of Capt. J. Scott Payne, Fifth United States Cavalry."

CHARLES FLETCHER, ALIAS JAMES H. MITCHELL.

Mr. HAWLEY. I beg leave to call up the bill (S. 2742) for the relief of Charles Fletcher, alias James H. Mitchell.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Military Affairs with an amendment, in line 10, after the word "discharge," to insert:

Provided, That no pay, allowance, or pension shall accrue by reason of this act.

So as to make the bill read:

Be it enacted, etc., That the charge of desertion standing against Charles Fletcher, who served under the name of James H. Mitchell as a private in Company H, Ninety-fifth Regiment of New York State Infantry Volunteers, is hereby removed; and the Secretary of War is hereby authorized and directed to discharge the said soldier as of the date of July 16, 1865, to which said company and regiment were paid on their discharge: *Provided*, That no pay, allowance, or pension shall accrue by reason of this act.

Mr. HAWLEY. I did not know before that the words just read were reported by the committee as an amendment. I do not know whether the beneficiary wants a pension. He is a brother of the Chief Engineer of the Navy, a worthy man, and the circumstances are such that I do not think any penalty ought to attach. He was within a day or two of discharge when he got leave to come from Arlington Heights and spend a night with his friends. He was then afflicted with rheumatism, being taken very ill, and when he got better his regiment had gone to New York City and been discharged. I hope that the amendment will be disagreed to.

Mr. GALLINGER. It is not usual to attach such a clause.

The PRESIDING OFFICER. The question is on agreeing to the amendment reported by the Committee on Military Affairs.

The amendment was rejected.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

DONATION OF CONDEMNED CANNON.

Mr. HILL. I ask unanimous consent to call up a rather unusual bill, relating to condemned cannon. It is the bill (H. R. 8262) authorizing and directing the Secretary of the Navy to furnish condemned cannon to certain Grand Army posts, a monument association, and an army post.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Naval Affairs with an amendment, in line 17, after the word "Vermont," to insert:

Also, to the Sackanosset School for Boys, of Cranston, R. I., one unserviceable or condemned cannon for use by the school.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

The title was amended so as to read: "A bill authorizing and directing the Secretary of the Navy to furnish condemned cannon to certain Grand Army posts, a monument association, an army post, and a school."

Mr. CARTER. During the consideration yesterday afternoon of the bill (S. 3216) donating condemned cannon and condemned cannon balls to the Wyoming State Soldiers' Home, at Cheyenne, Wyo., I endeavored to obtain recognition in order to move an amendment. But I was unfortunate in not being able to do so. I now move that the votes by which the bill was read the third time and passed be reconsidered.

The motion to reconsider was agreed to.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment.

Mr. CARTER. I now offer an amendment to the bill.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. After the word "Wyoming," in line 6, it is proposed to insert:

And four condemned cannon and four pyramids of condemned cannon balls to the Montana State Soldiers' Home, at Columbia Falls, Mont.

The amendment was agreed to.

Mr. DUBOIS. With the consent of the Senator from Wyoming [Mr. WARREN], I should like to move a similar amendment for the Soldiers' Home at Boise City, Idaho. I will say that the amendments have been heretofore agreed to, but we consented to have the amendments go off of the bills on which they were put at the request of other Senators.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. After the amendment just adopted it is proposed to insert:

And four condemned cannon and four pyramids of condemned cannon balls to the Soldiers' Home at Boise City, in the State of Idaho.

Mr. WARREN. I am perfectly agreeable that these two amendments shall go on the bill if it does not go any further, as the three States are closely connected.

The amendment was agreed to.

The bill was ordered to a third reading, read the third time, and passed.

On motion of Mr. CARTER, the title was amended so as to read: "A bill donating condemned cannon and condemned cannon balls to the Wyoming State Soldiers' Home, at Cheyenne, Wyo., and for other purposes."

AWARD OF LIFE-SAVING MEDALS.

Mr. PERKINS. I ask unanimous consent to call up the bill (S. 2334) construing the acts of Congress in relation to the award of life-saving medals.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Commerce with amendments.

The first amendment was, in line 7, after the words "award of," to insert "life-saving"; and in the same line, after the word "medals," to strike out "in certain cases of exceptional bravery"; and in line 9, after the word "bestow," to strike out "life-saving" and insert "such"; so as to read:

That so much of the acts relating to life-saving stations and the Life-Saving Service approved June 20, 1874, June 18, 1878, and May 4, 1882, as provide for the award of life-saving medals shall be construed so as to empower the Secretary of the Treasury to bestow such medals, etc.

The amendment was agreed to.

The next amendment was, in line 10, after the word "persons," to insert the word "hereafter"; so as to read:

Shall be construed so as to empower the Secretary of the Treasury to bestow such medals upon persons hereafter making signal exertions in rescuing and succoring the shipwrecked.

Mr. PERKINS. I hope this amendment will be disagreed to.

The amendment was rejected.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

ENROLLED BILLS SIGNED.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the Speaker of the House had signed the following enrolled bills:

A bill (S. 1420) granting an increase of pension to Elizabeth W. Sutherland;

A bill (H. R. 6739) for the relief of John N. Quackenbush, late a commander in the United States Navy; and

A bill (H. R. 7171) authorizing and directing the Secretary of the Navy to donate four condemned cannon and four pyramids of condemned cannon balls to James T. Shields Post, No. 45, Grand Army of the Republic, of Galesburg, Knox County, Ill., and for other purposes.

JUDICIAL DISTRICTS IN TEXAS.

Mr. PETTIGREW. I move that the Senate adjourn.

Mr. CHILTON. I hope the Senator from South Dakota will withhold that motion for a few moments.

Mr. HILL. I ask the Senator from South Dakota to withdraw the motion for a few moments, so that I may make a report from the Judiciary Committee.

The PRESIDING OFFICER. Does the Senator from South Dakota withdraw the motion for the purpose indicated?

Mr. PETTIGREW. Yes.

Mr. HILL. I am instructed by the Committee on the Judiciary, to whom was referred the bill (H. R. 2708) to constitute a new division of the eastern judicial district of Texas, and to provide for the holding of terms of court at Beaumont, Tex., and for the appointment of a clerk for said court, to report it with amendments.

Mr. PETTIGREW. I move that the Senate adjourn.

Mr. CHILTON. I hope the Senator from South Dakota will yield for just a moment. It will not take long to dispose of the bill just reported. It is very short, and there is no objection to it.

Mr. CHANDLER. It is the bill reported just now from the Judiciary Committee?

Mr. CHILTON. Yes, sir.

Mr. CHANDLER. I object.

Mr. CHILTON. The bill has already passed the other House.

Mr. CHANDLER. I object to its consideration to-night, having just been reported from the committee.

LANDS AT PORT ANGELES, WASH.

Mr. SQUIRE. Mr. President——

The PRESIDING OFFICER. Does the Senator from South Dakota insist upon his motion that the Senate adjourn?

Mr. SQUIRE. I hope the Senator from South Dakota will withdraw the motion.

Mr. PETTIGREW. I withdraw the motion to adjourn, as I understand it is desired to have an executive session.

Mr. SQUIRE. I wish to ask unanimous consent to offer a resolution. I have consulted the Secretary of the Interior about it. It simply directs the Secretary of the Interior to suspend the time of sale of certain lots at Port Angeles, in the State of Washington, when payments are not made. There is no contest whatever about it. I submit the resolution at the request of the Secretary of the Interior, who advises that this action shall be taken, in view of pending legislation.

The resolution was considered by unanimous consent, and agreed to, as follows:

Resolved, That in view of pending legislation the Secretary of the Interior be, and is hereby, directed to suspend the time for the payment to be made by such persons as have heretofore made due proof according to law of residence and improvements upon lots in blocks 103, 104, 105, 97, 134, 136, 137, 138, 146, 147, 111, and 116 in the town site of Port Angeles, in the State of Washington, and who have not yet completed the purchase of the same from the United States, until the 3d day of March, 1897, when payment shall be made to the receiver of the United States land office at Seattle, in the said State of Washington.

Mr. PETTIGREW. Unless there is a desire for an executive session, I shall renew my motion.

Mr. CARTER. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After eight minutes spent in executive session the doors were reopened, and (at 6 o'clock and 9 minutes p. m.) the Senate adjourned until to-morrow, Friday, June 5, 1896, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate June 4, 1896.

CONSULS-GENERAL.

William Churchill, of New York, to be consul-general of the United States at Apia, Samoa, to fill a vacancy.

David N. Burke, of New York, to be consul-general of the United States at Tangier, Morocco, vice John Judson Barclay, recalled.

CONSUL.

George F. Smithers, of Delaware, to be consul of the United States at Chungking, China, to take effect July 1, 1896.

APPOINTMENT IN THE NAVY.

Harry W. Jones, a resident of New Jersey, to be a chaplain in the Navy, to fill a vacancy existing in that grade.

PROMOTIONS IN THE ARMY.

Subsistence Department.

Lieut. Col. Thomas Wilson, assistant commissary-general of subsistence, to be assistant commissary-general of subsistence with the rank of colonel, June 1, 1896, vice Barriger, retired from active service.

Maj. William Anthony Elderkin, commissary of subsistence, to be assistant commissary-general of subsistence with the rank of lieutenant-colonel, June 1, 1896, vice Wilson, promoted.

Capt. Frank Edward Nye, commissary of subsistence, to be

commissary of subsistence with the rank of major, June 1, 1896, vice Elderkin, promoted.

Cavalry arm.

First Lieut. Andrew Goodrich Hammond, Eighth Cavalry, to be captain, May 31, 1896, vice Gillmore, Eighth Cavalry, retired from active service.

Second Lieut. George Edward Stockle, Tenth Cavalry, to be first lieutenant, May 31, 1896, vice Hammond, Eighth Cavalry, promoted.

Infantry arm.

First Lieut. Charles Walter Rowell, Second Infantry, to be captain, May 29, 1896, vice Ulio, Second Infantry, retired from active service.

POSTMASTERS.

Jennie T. Dessert, to be postmaster at Macon, in the county of Macon and State of Missouri, in the place of Frank A. Dessert, deceased.

John M. Vandiver, to be postmaster at Rome, in the county of Floyd and State of Georgia, in place of Mulford M. Pepper, deceased.

Alexander M. Brownley, to be postmaster at Franklin, in the county of Southampton and State of Virginia, in the place of Fulgence De Bordenave, whose commission expired April 8, 1896.

CONFIRMATIONS.

Executive nominations confirmed by the Senate June 4, 1896.

SURVEYOR OF CUSTOMS.

John F. Nash, of New York, to be surveyor of customs for the port of Syracuse, in the State of New York.

CONSUL-GENERAL.

William Churchill, of New York, to be consul-general of the United States at Apia, Samoa, to fill a vacancy.

PROMOTIONS IN THE ARMY.

Subsistence Department.

Lieut. Col. Thomas Wilson, assistant commissary-general of subsistence, to be assistant commissary-general of subsistence with the rank of colonel, June 1, 1896, vice Barriger, retired from active service.

Maj. William Anthony Elderkin, commissary of subsistence, to be assistant commissary-general of subsistence with the rank of lieutenant-colonel, June 1, 1896, vice Wilson, promoted.

Capt. Frank Edward Nye, commissary of subsistence, to be commissary of subsistence with the rank of major, June 1, 1896, vice Elderkin, promoted.

Cavalry arm.

First Lieut. Andrew Goodrich Hammond, Eighth Cavalry, to be captain, May 31, 1896, vice Gillmore, Eighth Cavalry, retired from active service.

Second Lieut. George Edward Stockle, Tenth Cavalry, to be first lieutenant, May 31, 1896, vice Hammond, Eighth Cavalry, promoted.

Infantry arm.

First Lieut. Charles Walter Rowell, Second Infantry, to be captain, May 29, 1896, vice Ulio, Second Infantry, retired from active service.

POSTMASTERS.

Jennie A. Harmon, to be postmaster at Palmyra, in the county of Wayne and State of New York.

John M. Vandiver, to be postmaster at Rome, in the county of Floyd and State of Georgia, in the place of Mulford M. Pepper, deceased.

HOUSE OF REPRESENTATIVES.

THURSDAY, *June 4, 1896.*

The House met at 11 o'clock a. m. Prayer by the Chaplain, Rev. HENRY N. COUDEN.

The Journal of the proceedings of yesterday was read.

The SPEAKER. The question is on the approval of the Journal.

The question was taken; and on a division (demanded by Mr. KEM) there were—ayes 137, noes 0.

Mr. KEM. No quorum, Mr. Speaker.

The SPEAKER. The gentleman makes the point that there is no quorum present. If gentlemen will have the kindness to present themselves in the Hall, so that they can be counted, it will save just so much time and annoyance. [After counting the House.] One hundred and seventy-nine gentlemen are present. The ayes have it, and the Journal is approved.

RETURN OF A BILL TO THE SENATE.

Mr. LOUDENSLAGER. Mr. Speaker, I wish to present a privileged report from the Committee on Pensions.

The Clerk read as follows:

Resolved, That the Committee on Pensions be discharged from the further consideration of the bill (S. 1420) granting an increase of pension to Elizabeth W. Sutherland, and that the said bill be returned to the Senate, in accordance with their request.

Mr. LOUDENSLAGER. Mr. Speaker, this is a bill on which the Senate have appointed conferees.

The resolution was agreed to.

Mr. SHERMAN. Mr. Speaker, I wish to present a privileged resolution.

Mr. OVERSTREET. I call for the regular order.

CONTESTED-ELECTION CASE—MURRAY VS. ELLIOTT, FIRST SOUTH CAROLINA DISTRICT.

The SPEAKER. The regular order is the contested-election case of Murray *vs.* Elliott, from the First district of South Carolina, which is before the House.

Mr. OVERSTREET. I move the previous question, Mr. Speaker.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the substitute.

The question was taken; and on a division (demanded by Mr. JONES) there were—ayes 32, noes 119.

Mr. JONES. Yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 48, nays 144, not voting 162; as follows:

YEAS—48.

So the substitute was rejected.

The following pairs were announced:

Until further notice:

Mr. DALZELL with Mr. CRISP.

Mr. GILLETT with Mr. COWEN.

Mr. SMITH of Michigan with Mr. BERRY.

Mr. DRAPER with Mr. SPENCER.

Mr. LOUD with Mr. SWANSON.

Mr. BURRELL with Mr. COCKRELL.

Mr. STEPHENSON with Mr. NEILL.

Mr. STEELE with Mr. MCCLELLAN.

Mr. HEATWOLE with Mr. DINSMORE.

Mr. BARTHOLDT with Mr. DENNY.

Mr. MCCALL of Massachusetts with Mr. DE ARMOND.

Mr. FOSS with Mr. MCLAURIN.

Mr. NORTHWAY with Mr. PRICE.

Mr. COUSINS with Mr. LIVINGSTON.

Mr. BOWERS with Mr. MINER of New York.

Mr. SNOVER with Mr. MADDOX.

Mr. CORLISS with Mr. MOSES.

Mr. JOHNSON of Indiana with Mr. COX.

Mr. PICKLER with Mr. MILES.

Mr. BARHAM with Mr. KYLE.

Mr. MEIKLEJOHN with Mr. CROWLEY.

Mr. FOOTE with Mr. HUTCHESON.

Mr. COLSON with Mr. KENDALL.

Mr. WILLIAM A. STONE with Mr. LAWSON.

Mr. ELLIS with Mr. OTEY, except Aldrich-Underwood election case.

Mr. ROYSE with Mr. TURNER of Virginia, except on Tucker-Yost election case.

For this day:

Mr. MCCLEARY of Minnesota with Mr. RUSK.

Mr. BROSIUS with Mr. BAILEY.

Mr. RANEY with Mr. WASHINGTON.

Mr. PERKINS with Mr. MEYER.

Mr. MORSE with Mr. ABBOTT.

Mr. WOOMER with Mr. ALLEN of Mississippi.

Mr. HICKS with Mr. STRAIT.

Mr. LEONARD with Mr. DOWNING.

Mr. MCCALL of Tennessee with Mr. ROBERTSON of Louisiana.

Mr. MAHON with Mr. OGDEN.

On this question:

Mr. GROSVENOR with Mr. CUMMINGS.

Mr. LEISENRING with Mr. TUCKER.

Mr. SOUTHARD with Mr. MONEY.

Mr. HOOKER with Mr. MCCREARY of Kentucky.

Mr. JENKINS with Mr. TRELOAR.

Mr. LINTON with Mr. SKINNER.

Mr. FENTON with Mr. STROWD of North Carolina.

Mr. WRIGHT with Mr. BLACK of Georgia.

Mr. KULP with Mr. MAGUIRE.

Mr. LEWIS with Mr. HENDRICK.

Mr. HERMANN with Mr. MEREDITH, on this vote.

Mr. JOHNSON of North Dakota with Mr. MCLAURIN, on the election contest of Murray *vs.* Elliott.

Mr. FOWLER with Mr. BARTLETT of Georgia, on all election cases except Aldrich *vs.* Underwood.

Mr. HULICK with Mr. TYLER, on contested election cases.

Mr. HEATWOLE. Mr. Speaker, I am paired with the gentleman from Arkansas, Mr. DINSMORE. If he were present I would vote "nay."

Mr. DAYTON. My colleague, Mr. HULING, was sick this morning and could not be present and desires me to announce that if he were present he would vote "nay."

Mr. KYLE. Mr. Speaker, I desire to state that I am paired with the gentleman from California, Mr. BARHAM. I therefore withdraw my vote.

The result of the vote was then announced as above recorded.

The SPEAKER. The question is on agreeing to the resolutions.

The question was taken; and the Speaker announced that the ayes seemed to have it.

Mr. JONES. Division.

The House divided; and there were—ayes 114, noes 37.

Mr. JONES. The yeas and nays, Mr. Speaker.

The yeas and nays were ordered.

The question was taken; and there were—yeas 153, nays 33, not voting 168; as follows:

YEAS—153.

Dockery,	Kyle,	Price,	Woomer,
Downing,	Lawson,	Raney,	Wright.

So the resolution was adopted.

The following additional pairs were announced:

Mr. TRACEY with Mr. HALL.

Mr. CURTIS of Iowa with Mr. RICHARDSON, for this day.

Mr. HALL. Mr. Speaker, I am paired with my colleague, Mr. TRACEY. If he were present, I should vote "no."

The result of the vote was then announced as above recorded.

Mr. OVERSTREET. Mr. Speaker, Mr. Murray, who has just been declared entitled to a seat on this floor, is present and desires to take the oath of office.

Mr. Murray on appearing at the bar of the House was greeted with loud applause on the Republican side. The oath of office was administered by the Speaker.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate still further insists upon its amendments to the bill (H. R. 8293) making appropriations for the fiscal year ending June 30, 1896, and for prior years, and for other purposes, numbered 14, 24, 25, 30, 31, 37, 74, 79, 80, 81, 82, 83, 103, 104, 105, 106, 122, 137, 147, 148, 190, 192, and 200, disagreed to by the House of Representatives, had disagreed to the amendments of the House to the amendments of the Senate numbered 27, 207, and 208, had asked a further conference with the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. HALE, Mr. ALLISON, and Mr. COCKRELL as the conferees on the part of the Senate.

SENATE BILLS REFERRED.

Under clause 2 of Rule XXIV, the following Senate bills and joint resolution were taken from the Speaker's table and referred by the Speaker as follows:

Joint resolution (S. R. 147) concerning the improvement of the Kennebec River, Maine—to the Committee on Rivers and Harbors.

A bill (S. 2526) for the relief of Twyman O. Abbott—to the Committee on Claims.

A bill (S. 581) for the relief of the legal representatives of Hiram Somerville—to the Committee on War Claims.

A bill (S. 2859) changing the time for holding circuit court of the United States at Hartford, in the district of Connecticut—to the Committee on the Judiciary.

A bill (S. 2954) to increase the pension of Margaret Custer Calhoun—to the Committee on Pensions.

A bill (S. 206) to provide an American register for the steamer *Kahului*—to the Committee on the Merchant Marine and Fisheries.

A bill (S. 2281) to amend an act entitled "An act granting pensions to the survivors of the Indian wars of 1832 to 1842, inclusive, known as the Black Hawk war, Creek war, Cherokee disturbances, and the Seminole war," approved July 27, 1892—to the Committee on Pensions.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had further insisted upon its amendment to the bill (H. R. 5490) to license billiard and pool tables in the District of Columbia, and for other purposes, disagreed to by the House of Representatives, had agreed to the further conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. HARRIS, Mr. WETMORE, and Mr. PROCTOR as the conferees on the part of the Senate.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 7542) making appropriations for the naval service for the fiscal year ending June 30, 1897, and for other purposes, had still further insisted upon its amendments numbered 32, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 51, and 52, disagreed to by the House of Representatives, had agreed to the further conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. HALE, Mr. QUAY, and Mr. GORMAN as the conferees on the part of the Senate.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 5210) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1897, and for other purposes, had further insisted upon amendments numbered 40, 61, 69, 87, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 105, 154, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189. 190, 191, 193, 194, 195, and 201, disagreed to by the House of Representatives, had asked a further conference with the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. TELLER, Mr. ALLISON, and Mr. COCKRELL as the conferees on the part of the Senate.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6249) making appropriations for current and contingent expenses of the Indian Department and fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1897, and for other purposes, had further insisted upon its amendments numbered 64, 69, and 70, disagreed to by the House of Representatives, had agreed to the further conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. PETTIGREW, Mr. TELLER, and Mr. COCKRELL as the conferees on the part of the Senate.

The message also announced that the Senate had passed without amendment the bill (H. R. 7171) authorizing and directing the Secretary of the Navy to donate four condemned cannon and four pyramids of condemned cannon balls to James T. Shields Post, No. 45, Grand Army of the Republic, of Galesburg, Knox County, Ill., and for other purposes.

GENERAL DEFICIENCY BILL.

Mr. CANNON. Mr. Speaker, I call up from the Speaker's table the general deficiency bill, and move that the House insist upon its amendments to the Senate amendments numbered 37, 207, and 208, and agree to a conference.

The motion was agreed to.

The SPEAKER appointed as conferees on the part of the House Mr. CANNON, Mr. ARNOLD of Rhode Island, and Mr. SAYERS.

MRS. EMILY M. VAN DERVEER.

The SPEAKER laid before the House the bill H. R. 2143, with amendments of the Senate thereto.

The bill and amendments were read.

Mr. THOMAS. Mr. Speaker, I move that the House nonconcur in the Senate amendments and agree to the request for a conference.

The motion was agreed to, and it was so ordered.

The SPEAKER appointed as conferees on the part of the House Mr. SULLOWAY, Mr. WOOD, and Mr. BAKER of Kansas.

JOHN KEHL.

The SPEAKER also laid before the House the bill (H. R. 1261) for the relief of John Kehl, and to restore him to his former rating, with amendments of the Senate thereto.

The bill and amendments were read.

Mr. BROMWELL. Mr. Speaker, that is a bill that was introduced by me, and I ask that it be referred back to the Committee on Invalid Pensions.

There was no objection, and it was so ordered.

MRS. EMILY GOULD CARR.

The SPEAKER laid before the House the bill (H. R. 4354) granting a pension to Mrs. Emily Gould Carr, with amendments of the Senate thereto.

The bill and amendments were read.

Mr. THOMAS. I move that the House nonconcur in the amendments of the Senate and ask for a conference.

The motion was agreed to, and it was so ordered.

The SPEAKER appointed as conferees on the part of the House Mr. POOLE, Mr. KERR, and Mr. MCCLELLAN.

HARRIET C. GREGG.

The SPEAKER also laid before the House the bill (H. R. 2006) to increase the pension of Harriet C. Gregg, with an amendment of the Senate thereto.

The bill and amendment were read.

On motion of Mr. THOMAS, the amendment of the Senate was concurred in.

MRS. WILLIAM LORING SPENCER.

The SPEAKER also laid before the House the bill (H. R. 4020) granting an increase of pension to Mrs. William Loring Spencer with an amendment of the Senate thereto.

The bill and amendment were read.

On motion of Mr. THOMAS, the amendment was nonconcurred in and a conference asked for.

The SPEAKER appointed as conferees on the part of the House Mr. ANDERSON, Mr. KERR, and Mr. MCCLELLAN.

JOHN N. QUACKENBUSH.

The SPEAKER also laid before the House the bill (H. R. 6739) for the relief of John N. Quackenbush, late commander United States Navy, with an amendment of the Senate thereto.

The bill and amendment were read.

Mr. HEPBURN. Mr. Speaker, I move that the House concur in the amendment of the Senate.

The motion was agreed to.

On motion of Mr. HEPBURN, a motion to reconsider the vote by which the amendment of the Senate was concurred in was laid on the table.

MARTIN VS. LOCKHART.

Mr. STRODE of Nebraska. Mr. Speaker, I desire to call up the contested-election case of Martin *vs.* Lockhart, from the Sixth Congressional district of North Carolina.

Mr. BAILEY. Mr. Speaker, against that I desire to raise the question of consideration; and with the permission of the Speaker and of the House, I would like to say that I do this because the views of the minority have not been printed, and they have not been printed because of the objection made by the gentleman from Nebraska [Mr. KEM].

The SPEAKER. The Chair will submit a request for unanimous consent to file the views of the minority, if the gentleman from Texas desires it.

Mr. BAILEY. I do desire it, Mr. Speaker.

The SPEAKER. The Chair will state to the House that the rules require that the views of the minority shall be presented at the same time as the report of the committee, and it is only a question of delay on which the unanimous consent of the House is asked.

Mr. BAILEY. With the permission of the Chair, I will say that the reason the views of the minority were not presented with the report of the committee is that the gentleman who prepared the report told me he would hand it to me as soon as they were prepared, but they were filed and I never saw them until they were in print. I had no opportunity to inspect them, and when we attempted to make a unanimous agreement looking to the filing of the views of the minority after the report of the majority had been filed objection was made. I then prepared the views of the minority, and on Tuesday last I asked consent that they might be filed and printed, but again objection was made.

The SPEAKER. The Chair thinks the proposition is a reasonable one, and will submit it to the House. If there be no objection, the gentleman from Texas [Mr. BAILEY] will be allowed to file the views of the minority.

Mr. KEM. I object, Mr. Speaker.

The SPEAKER. Objection is made by the gentleman from Nebraska [Mr. KEM]. The gentleman from Texas raises the question of consideration. The question is, Will the House consider the resolutions?

The question having been put,

The SPEAKER. The ayes seem to have it.

Mr. BAILEY. I call for a division.

The SPEAKER. The Chair thinks the resolutions have not been read. The Clerk will read them.

The Clerk read as follows:

Resolved, That James A. Lockhart was not elected a Representative to the Fifty-fourth Congress from the Sixth Congressional district of North Carolina and is not entitled to the seat.

Resolved, That Charles H. Martin was elected a Representative to the Fifty-fourth Congress from the Sixth Congressional district of North Carolina and is entitled to the seat.

The SPEAKER. The question is, Will the House consider the resolutions just read?

Mr. BAILEY. Of course, if the House should decide to consider these resolutions, I shall submit a substitute.

The SPEAKER. There will be opportunity to do so.

The question being taken, there were—ayes 90, noes 15.

Mr. BAILEY. No quorum.

The SPEAKER (after counting the House). One hundred and seventy-eight members are present; a quorum. The ayes have it; and the House decides to consider the resolutions.

Mr. BAILEY. I now ask to submit a substitute.

The SPEAKER. The gentleman from Texas desires to present a substitute, which will be read and considered as pending.

The Clerk read as follows:

Resolved, That James A. Lockhart was duly elected a Representative to Congress from the Sixth Congressional district of the State of North Carolina at the election held on the 6th day of November, 1894, and is entitled to the seat which he now holds as such Representative.

Mr. STRODE of Nebraska. Mr. Speaker, this contest comes from the Sixth Congressional district of the State of North Carolina. In the majority report, which is printed as House Report 2002, and which members can obtain by sending to the document room, there is a mistake in the printing of the title of the case. By a typographical error it is entitled "James A. Lockhart *vs.* Charles H. Martin." The names should be reversed and the title should read "Charles H. Martin *vs.* James A. Lockhart," as Mr. Martin is the contestant.

Mr. Speaker, before entering upon a discussion of the case I desire to say, because many members are inquiring of me how long this case will probably occupy the attention of the House, that I shall call for the previous question at as early an hour as possible. I hope to secure a vote upon this case before 3 o'clock this afternoon.

Mr. LOUDENSLAGER. Before 3?

Mr. STRODE of Nebraska. At 3 o'clock, or as soon after 3 o'clock as I can get the floor to move the previous question.

Mr. Speaker, the six Republican members of Elections Committee No. 2, to which this case was referred, have unanimously agreed upon the report finding that the contestant is entitled to his seat in this House. There is no minority report on file; but I understand the three Democratic members of the committee unite in a dissenting report, which has not been filed or printed.

It may not be out of place here to say that the Republican members of this committee—Elections Committee No. 2—have been fair and nonpartisan in the decision of all the cases that have been referred to this committee, and determined by it, during this session of Congress. The Republicans of this committee have voted five times solidly in favor of allowing Democratic contestees to retain their seats in this House. The Democratic members of the committee have always voted with them when they have reported in favor of a Democrat retaining his seat. The Republicans during the session have agreed upon majority reports in favor of seating two Republicans. In one of those reports we were unanimous; in the other there was one Republican who dissented from the majority of the committee.

Mr. BAILEY. As the gentleman from Nebraska wants of course to be accurate, he ought to have stated that there have been three Democrats unseated, instead of two.

Mr. STRODE of Nebraska. I will state the matter correctly if the gentleman from Texas will wait until I can do so. In one case the Republicans of the committee were unanimously in favor of unseating a Democrat and declaring the election void.

The Democratic members of this committee have always voted solidly in favor of the sitting member, and we have disposed of nine cases in which the sitting member was a Democrat. This case makes the tenth one. Our Democratic colleagues have always been solidly with us when we reported in favor of Democrats and always solidly against us when we have reported against Democrats.

In the present case the Republican members of the committee are unanimous in their report in favor of seating the contestant, who is a Populist, but who was indorsed by the Republicans of that Congressional district; and he ran upon what is known in North Carolinia as a Fusionist or cooperative ticket.

Before I commence to deal with the facts of this case, it may be necessary for me to explain some of the provisions of the election law of North Carolina in force in 1894; a law which has since been repealed because of its many odious features; repealed by a legislature in which the Democrats were in the minority.

Mr. GROSVENOR. As I want to be informed about this matter, will the gentleman allow me a question?

Mr. STRODE of Nebraska. Yes, sir.

Mr. GROSVENOR. I understand that the views of the minority of the committee have not been printed?

Mr. STRODE of Nebraska. No, sir.

Mr. GROSVENOR. I understand that some objection was made to the request for filing and printing the minority views?

Mr. STRODE of Nebraska. Yes, sir.

Mr. GROSVENOR. There was a single objection by a Populist Representative from Nebraska?

Mr. STRODE of Nebraska. Well, I suppose the RECORD will show as to that. He is here to answer for himself; or if not, the RECORD will furnish the answer.

Mr. GROSVENOR. And but for that objection, the views of the minority would have been laid before the House upon this question involving a contest between a Democrat and a Populist?

Mr. STRODE of Nebraska. For the information of the gentleman from Ohio [Mr. GROSVENOR] I will say that before I presented the majority report I went to my colleague from Nebraska [Mr. KEM], who had been objecting to everything that required unanimous consent, and informed him that I desired to present the majority report, and that the minority would doubtless ask unanimous consent to present their views. I informed him that the contestant, whom the majority proposed to seat, was a Populist, and I asked him to not object to a unanimous consent for the minority to have their report printed.

He informed me that he could not help it; that if it was his father, or his own brother, he would still raise the objection. So his objection was made with a full knowledge of its effect upon his part. And I will say further, that when the minority of the committee a few days ago again asked unanimous consent to print their views, and the gentleman from Nebraska had objected, I went to him again and asked him to withdraw the objection, for the reason that I feared it would carry the case over this session, and that we desired to present it at the earliest possible moment. But he still refused to withdraw his objection, and the minority have not had their views printed, and assign that as a reason why they do not want to proceed with the hearing of the case at this time. But notwithstanding the objection of my colleague from Nebraska [Mr. KEM] the minority could have had their report printed and on the desks of members at this time, and they knew quite well what course to pursue to procure the printing of their views.

This election law which was in existence in 1894, when this Congressional election was held, was one of the most iniquitous ever enacted by any of the Southern States in some of its features, and particularly so with reference to the appointment of election officers, organization of canvassing boards, and the powers given to canvassing boards, and also with reference to the registration of voters. The election board in each voting precinct consisted of a registrar and four judges, commonly called in North Carolina "poll holders." These election officers were all appointed by the board of county commissioners. The board of county commissioners were appointed by the board of justices of the peace for the county. The boards of justices of the peace in the different counties of the State were appointed by the legislature of the State. This law was enacted by a Democratic legislature. Nearly all of the counties of that State were at the time of its enactment under the control of the Democrats, and of course the Democratic members elected to the legislature having the appointment of the justices of the peace were influenced by the county Democratic committees in their selection of men to fill these offices. Under this law, in 1894, the entire machinery of the election was under the control of the Democratic party.

The registrar was, under this law, a member of the election board. The four judges were to be selected, two from the Democratic party and two from some other party; that is, two were to be from the majority party and two from the minority party; the apparent intention being that both parties should be represented fairly on the election boards. The constitution of the State requires that every voter must be registered before he can vote. There is no limitation, however, on the rights to register and vote, except the usual ones, namely, that the voter shall be a citizen of the United States, a resident of the State and the county for the required time, 21 years of age, and not an idiot or lunatic.

When the county commissioners in some of the counties in this Congressional district, and particularly in those counties where the returns of the votes are in controversy in this case, appointed a Republican or a Populist representative on the precinct election boards they made it a rule to select negroes who were illiterate, or weak and easily influenced, or those whose politics were doubtful; or if they appointed white men they appointed those only who were under the control of the Democratic leaders of the precincts, and if they named any good or representative men for the election boards they would name persons whom they knew would not serve. In one precinct they named a Republican for judge of election who was qualified in every way except that he was hard of hearing—intelligent enough, with sufficient education, but he would not serve because he could not hear well. So they appointed in other precincts negroes under 21 years of age. Such cases as these appear in the record. It was left in the hands of the Democratic registrars to appoint persons to fill vacancies on the election boards, and they always filled such vacancies as existed with Democrats, i. e., vacancies caused by Republicans failing to serve.

When the vote was cast and counted the Democrats, who always had at least three out of five of the members of the election board in every precinct, selected one of their number to convey the official returns of the precinct to the register of county deeds, and there the vote was canvassed by the board of county canvassers. This county canvassing board was made up of the one member from each precinct who had been selected by the precinct election boards to take the returns and file them in the office of the register of deeds. So that the county canvassing boards were always solidly Democratic. The county canvassing boards were given the power and authority to judicially pass upon all the facts relative to the election, and judicially determine and declare the result of the same; they also had the power and authority to send for papers and persons, and examine the latter on oath. They had the power to throw out votes or whole precincts, and to make just such returns or abstracts of votes as they in their judicial capacity saw fit to make; and these abstracts of votes made up by the county canvassing boards were forwarded to the secretary of state. Such power I do not believe has ever been conferred on the county canvassing boards in any other State of this Union. But the precinct election boards had performed their duties so satisfactorily that the Democratic county canvassing board of this Congressional district did not find it necessary to "judicially" throw out any votes or precincts.

Those provisions of the law applicable to questions involved in this case are printed in the report of the majority of the committee.

I desire now to call your attention to the precincts that are attacked by the contestant, and which the majority of the committee have noticed in their report. First, however, I had better, as I have not yet done so, I believe, state what the returns of this district show the vote to have been for the contestant and contestee. There are eight counties in this Congressional district. There were returned by the State canvassing board for the contestee (Mr. Lockhart) 13,996 votes, and for the contestant (Mr. Martin) 13,552 votes, giving to the contestee a majority of 444 votes. A majority of the committee, six members of it, have agreed upon a majority report, which finds that Mr. Martin should have accredited to him a majority of 330 votes.

Now I shall proceed to discuss the testimony upon which we arrive at that conclusion. And first I will take up Rockingham precinct, in Richmond County. In this precinct there were 479 white and 310 colored voters. There were challenged at this precint 103 colored men who were not allowed to vote, and not a white man was challenged. Seventy-two out of the 103 who were challenged, and whose votes were rejected, were called by the contestee as witnesses in this case, and their testimony is in the record. The list is published in the report so that members desiring to examine it may do so and determine for themselves the peculiarities of registration in the State of North Carolina where Democrats had control of the registration of voters. Rockingham Township contains within its boundary lines the incorporated town of Rockingham. The incorporated town of Rockingham is inside of the township bearing the same name.

Now, bearing these facts in mind, I desire to call your attention to some of the testimony in this case, and before doing so, I want to state that the Democratic registrar in this township, when a colored man would come to register whom he knew to be a Republican or a Fusionist, he would ask him: "Where were you born," and the colored man would reply, "in Rockingham"; and he would register him as if he were born in the incorporated town of Rockingham, when he knew the voter meant the township. If on election day he presented himself to vote he was asked: "Where were you born?" and replied, "I was born in Rockingham Township," the election board would say, "But you are registered as having been born in Rockingham; you can not vote. Get out of here." If he said that he was born in Rockingham Township and happened to have been born in Rockingham, they disfranchised him for that reason. So, in registering his place of residence, the registrar would ask him, "Where do you live?" "I live in Reckingham." The registrar was careful not to add the word township, although he knew full well that Rockingham town was in Rockingham Township, and that the voter lived in the township and not in the town. And on election day the man's vote would be rejected because he was registered as residing in Rockingham, when as a matter of fact he resided in the township.

I desire to call your attention to some of the testimony in support of this. The list of rejected voters is published in the report, and you will see by an examination of that list, which appears on pages 6, 7, and 8 of the report, that the registration book had six headings under which entries were to be made when registering a voter—the name, age, occupation, and place of birth, place of residence, date of registration, and the township or county from whence removed. I call your attention to the fact that in Rockingham Township, out of 103 rejected voters, there is but one entry under the head of the "Township or county from whence removed." On election day some of these voters, as the evidence in this record shows, were refused the right to vote because under the heading "Township or county from whence removed" there was no entry made by the Democratic registrar. How can you account for the fact that in 102 cases there was no entry made in that column upon any other theory than that the registrar himself neglected to ask the voter from what township or county he came into Richmond County, and into Rockingham Township? Ought this House to refuse to count all such votes when they are shown by the evidence to have been offered for contestant? Shall we permit that Democratic registrar, by his neglect of duty toward those who had attempted to register and vote, to disfranchise such voters.

Now, with these peculiarities with reference to this registration list, I call your attention to the following testimony; first to that of Emanuel Cole, jr., which is found on page 21 of the printed record. The printed record in this case contains about 400 pages:

Q. What is your name?
A. Emanuel Cole, jr.
Q. What is your age?
A. Twenty-nine.
Q. Did you register to vote at the election held for Rockingham Township Richmond County, N. C., in November, 1894?
A. Yes, sir.
Q. Did you vote?
A. No, sir.
Q. Why not?
A. I was challenged.
Q. What was you challenged for?
A. The place of residence.
Q. Where did you reside in November, 1894—what township?
A. Rockingham Township, Richmond County, N. C.
Q. How long have you resided in Rockingham Township?
A. Twenty-nine years.

All his lifetime. He was only 29 years old. He was born and raised in that township.

Q. What ticket did you offer to vote?
A. Republican and Populist ticket.
Q. Who did you offer to vote for for Congress?
A. Charles H. Martin.

This voter when he went to register was asked by the registrar, "Where do you reside?" "I reside at my father's place." He was born and raised there. The registrar knew where that was, and knew it was in Rockingham Township. "His father's place" was the only entry made. On election day his vote was challenged, and the challenge sustained, because the registration book did not show that he resided in Rockingham Township.

The next witness to whose testimony I call your attention is Edward Cole. His testimony is found on page 9 of the report and on page 23 of the record:

Q. What is your name?
A. Edward Cole.
Q. How old are you?
A. Twenty-three.
Q. Did you register to vote at the election held for Rockingham Township, in Richmond County, N. C., in November, 1894?
A. Yes, sir.
Q. Did you vote?
A. No, sir.
Q. Why were you not allowed to vote?
A. I was challenged on my place of residence.
Q. What was you told about your place of residence as a challenge?
A. Was told I did not give it in right.

Q. How did they say you had given it in?
A. They didn't say.
Q. Where was your place of residence at that time?
A. Rockingham Township, Richmond County, N. C.
Q. How long have you resided in Rockingham Township?
A. Twenty-three years.

All his lifetime; born and raised there.

Q. What ticket did you offer to vote?
A. Republican and Populist ticket.
Q. Who did you offer to vote for for Congress?
A. Charles H. Martin.

Cross-examination:

* * * * * * *

Q. Did you claim to the judges of election when you offered your vote that you were registered as residing in Rockingham Township, Richmond County, N. C.?
A. Yes, sir.
Q. And they informed you that you were not so registered, did they not?
A. Yes, sir.

Under the heading of "Place of residence" the registrar wrote "with his father," omitting the township, and so he was challenged and the challenge sustained, and his vote rejected, for the same reason that Emanuel Cole's vote was rejected.

I call your attention to some of the testimony of the registrar himself. It is found on page 47 of the record:

Q. Did the judges of election have a division on any challenged voter's vote during the day? And if so, state how many and how you voted on them.
A. My recollection is that there was a division among the judges of election only as to the right of one negro to vote. I cast the deciding vote in his favor, and his vote was received.
Q. In every other case in which the vote was rejected, is it not your recollection that the rejection was made without objection of any judge of election?
A. Yes, sir.

I imagine that gentlemen on the other side of this case will say, when they come to review this testimony, that here was an election board at Rockingham township that had two Republicans upon it. It is true; and they voted with the Democrats every time. The registrar of election here, from whose testimony I have just read, was one of the proprietors of a cotton mill in this township. One of those Republican poll holders, or judges of election, who had been appointed by the county commissioners, was an employee in that mill; the other Republican poll holder had his children working in a mill owned by a company of which this registrar was also the president; and the record in this case shows that the county commissioners appointed these two Republicans to represent the Republicans upon this election board who were, both of them, completely and thoroughly under the control of the Democratic registrar.

I want to call your attention to the testimony of Levi Steele, on page 18 of the record and page 10 of the report:

Q. What is your name?
A. Levi Steele.
Q. How old are you?
A. Twenty-seven.
Q. Were you registered to vote in the election of November, 1894?
A. Yes, sir.
Q. Did you vote?
A. No, sir.
Q. Why were you not allowed to vote?
A. They said I lived in town.
Q. How long have you lived in Rockingham Township, Richmond County, N. C.?
A. Three years in the township; in the county all my life.
Q. What ticket did you offer to vote?
A. The Republican and Populist ticket.
Q. Who did you offer to vote for for Congress?
A. Charley Martin.

Cross-examination:

Q. How far from the town of Rockingham do you live?
A. Four miles.
Q. When you came to vote did you not tell the registrar of election that you lived 4 miles from Rockingham?
A. No, sir.
Q. Didn't you tell the registrar of election when you offered to vote, when asked where you lived, that you lived outside of the town of Rockingham?
A. I told him I lived in Rockingham Township.
Q. Did you tell the poll holders, on the day of election, that you lived inside the town of Rockingham?
A. No, sir.
A. Did they not tell you that the only Levi Steele on the registration books was one registered as living in Rockingham, Richmond County, N. C.?
A. Yes, sir.
Q. You did not claim to them that you lived in the town of Rockingham, did you?
A. No, sir.
Q. Can you read?
A. I can read print a little bit.

The next testimony to which I will refer is that of Wheeler Leak. His testimony appears on page 20 of the record and page 11 of the report:

Q. What is your age?
A. Twenty-seven.
Q. What is your name?
A. Wheeler Leak.
Q. Did you register to vote at the election held for Rockingham Township, in Richmond County, N. C., in November, 1894?
A. Yes, sir.
Q. Did you vote?
A. No, sir.
Q. Why not?
A. I told them I lived in Rockingham Township; then they said I lived in the corporation.
Q. What corporation?
A. Rockingham town.
Q. What ticket did you offer to vote?
A. Populist and Republican.
Q. Who did you offer to vote for for Congress?
A. Charles Martin.

Then the cross-examination comes. Contestee's attorneys bring out the fact, if the contestant's do not, upon which the challenges were based.

Q. You do not live in the town of Rockingham, Richmond County, N. C., do you?
A. I live in Rockingham Township, Richmond County, N. C.
Q. Please answer the question last asked you. Do you live in the town of Rockingham, Richmond County, N. C.; yes or no?
A. I don't live in the town of Rockingham, but I live in Rockingham Township, Richmond County, N. C.
Q. Did you claim before the poll holders, when offering your ballot, that you lived in Rockingham, Richmond County, N. C.?
A. No, sir: I told them I lived in Rockingham Township, Richmond County, N. C.

I now call your attention to the testimony of Joe Neal, found on page 28 of the record and page 11 of the report:

Q. What is your name, age, and residence?
A. Joe Neal; 48 years; residence, Richmond County, N. C., Rockingham Township.
Q. How long have you lived in Rockingham Township?
A. All my life.
Q. Were you registered to vote at the election held for Rockingham Township in November, 1894?
A. Yes, sir.
Q. Did you offer to vote and did you vote?
A. I offered; I did not vote.
Q. Why did you not vote?
A. On account of my birth was the reason they said I could not vote.
Q. Where were you born?
A. Rockingham Township, Richmond County, N. C.
Q. Who did you offer to vote for for Congress?
A. Charlie H. Martin.

Cross-examination:

Q. What part of Rockingham Township were you born in?
A. Outside of the town.

Yet he was registered as having been born in the town, and because so registered, when as a matter of fact he was born outside of the corporation, his vote was rejected; and so were a number of others, for the same defect in registration.

I now call your attention to the testimony of one Louis Wall:

Q. What is your name, age, residence, and how long have you lived there?
A. Louis Wall; 32 years old; Rockingham Township, Richmond County, N. C.; lived there all my life.
Q. Did you register to vote at the election held for Rockingham Township in November, 1894?
A. Yes, sir.
Q. Did you offer to vote; did you vote?
A. I offered; did not vote.
Q. Who did you offer to vote for for Congress?
A. Charles H. Martin.
Q. Was your vote rejected?
A. Yes, sir.

Now, the cross-examination brings out the fact why he was not allowed to vote.

Q. Were you born in Rockingham, N. C.?
A. Not in the town of Rockingham.

The record shows that out of these 72 rejected voters that were called to the witness stand more than 40 of them—I think it is 48, but I am not certain—were actually born and raised in Rockingham Township or in Richmond County. Upon such trivial grounds as I have pointed out in the testimony I have read to you, their votes were challenged and rejected. Of the 103 that were rejected the contestant called 72 of them to the witness stand, and their testimony is similar to that I have quoted.

The committee finds that out of that 72 there was one man who was called to the witness stand who did not offer his vote. He found that he was challenged and did not offer to vote. There was another who was challenged and offered to vote against whom there was a criminal record. He had been convicted of a felony, and there was no evidence that he had been pardoned or restored to citizenship, and so his vote was rejected. And as to the other 70 the testimony shows that they were legal voters, every one of them. All of them swore positively that they went to the polls and offered to vote for this contestant, Charles H. Martin. They were registered; and this Democratic registrar believed them to be voters when they registered or he would not have placed their names on the registration list. On the election day they were all rejected for imperfect registration. I think this contestant has done remarkably well to procure the testimony of 72 of 103 to show why their votes were rejected, and if he could have procured the testimony of all the 103 he would have probably shown anywhere from 90 to 100 entitled to vote whose votes were rejected. But it would doubtless have been an impossibility for the contestant to have found and called to the witness stand all of the 103 voters in the short length of time allowed him for taking testimony. Seventy legal voters, whose names were on the registration list and whose votes were tendered for the contestant and refused, should be counted for him and added to

the number of votes returned for him from Rockingham Township.

I pass now from Rockingham Township to Stewartsville Township. In that township there were registered 307 white and 414 colored voters. Eight white voters and 284 colored voters were challenged. The challenges to the eight white voters were all overruled except one. Every white man challenged was allowed to vote except one, and he was a Populist. One hundred and sixty-seven negroes were prevented from voting by reason of challenges; that is to say, the challenges were sustained and the votes were rejected by the election board. There were 265 whites who voted at this precinct on election day. There were 41 whose names appeared upon the registration list who did not offer to vote. There were 133 colored men who voted on that day, and 112 colored men had registered who did not offer to vote. Mr. Lockhart was given by the returning board in this precinct 295 votes and Mr. Martin 14. The registrar in this precinct was a Democrat. Upon the witness stand he admitted that in registering the names of voters he had put them on the registration list in such form that he knew challenges to such voters could and would be sustained on election day. In other words, he made the same kind of entries in this township as were made by the Democratic registrar in Rockingham Township. I will not stop to go into the details of this registration, but I will call attention to some of the testimony in the record touching it. I read from the testimony of this Democratic registrar, which is found on page 18 of the report:

Q. When a voter, in registering, in answer to the question, "What is your place of residence?" stated John A. McBryde's, as did Jesse W. Graham, did you not know as a fact that John A. McBryde's was in Stewartsville Township, and, notwithstanding such knowledge, register his residence John A. McBryde's, without stating the township you knew John A. McBryde's to be in, and thus leave him incompletely registered?

A. I knew that the registration was incomplete in such cases, and invariably explained that place of residence meant a legal division of the country, such as incorporated towns, townships, counties, and States; except when they were with their coachers, several answered John A. McBryde's, Daniel A. Patterson's, Roper's, and other farms, and I would try to get them to tell where those farms were located without success. I did not register for any of them. Frequently they would find out that they were wrong in their answers, and when they would return I would make such corrections as they wished. Some, in giving the place of birth, would say Richmond. I would explain to them that there was a Richmond, Va., Richmond, Ky., Richmond, N. C., and a Richmond County, Ga., Richmond County, Va., Richmond County, N. C., and asked them what Richmond they wished to put down, the same as the other localities that were not definite. I knew that John A. McBryde's, Daniel A. Patterson's, Roper's, and other plantations mentioned by voters were in Stewartsville Township; but when they would not say so, I would not put it down.

Q. Was there a single white man and Democrat rejected for improper registration?

A. The only white man rejected was for improper registration, and he was a Populist.

If you will turn to the list of rejected voters of this township, printed in the report, you will find that Populist's name first on the list. The difficulty in his case was this: In stating his occupation and place of birth he had said, "Moore County," omitting to add "North Carolina," or, if he did say North Carolina, it was not put down. He was the only white man whose vote was rejected at this precinct, and there were 167 of these imperfect registrations of colored voters whose votes were rejected.

The election board in this precinct was made up of four Democrats and one Republican. The Republican and Populist voters sought representation upon the board. I read an extract from the testimony of Angus Currie, found on page 60 of the record:

Q. Do you know of any effort made either by the Republican or Populist voters to secure a different arrangement of the boxes? If so, state it.

A. I don't know of any with regard to the boxes. I do know we wanted some representation as to judges of election.

Q. State that.

A. We got up a petition of some 400 or 500 names and sent before the county commissioners asking them to give us some representation, and if they would not give us any Populist, to give us some good men. We named three or four Democrats that they could choose from. They did not put any of them on. We were not asking for all of them, but we wanted some of them.

The testimony touching other precincts is to the same effect. The Populists and the Republicans petitioned these Democratic boards to appoint men of their own choice, and it would be satisfactory to them, to represent them upon the election boards, but in not a single instance was any man appointed who was named by the minority party. On the contrary, the men selected were tools that the Democratic managers knew they could make use of, though the men appointed pretended, in most instances, to be Republicans or Populists.

I will call attention to some of the testimony with reference to this precinct. There is testimony in this record tending to prove that the Democratic party there attempted to intimidate negro voters. On this point I call attention to some testimony which is found on page 61 of the record and is cited on page 16 of the report:

Q. If you know anything of guns being stored in the back of this building, back of the ballot boxes, on the day of election, tell it.

A. That day, about 12 o'clock, Mr. Calvin McKinnon went in and got his gun out; said he reckoned they would not need it in there any more. That night, about the time they were done counting the votes, came three or four out of the back end of the house with guns.

This testimony is wholly uncontradicted. This witness also testified as to the marking of the ballot boxes. One thing I forgot to state which enters largely into the consideration of the case touching this and other precincts. In North Carolina they had several ballot boxes at all the precincts. They had one for the State legislative ticket, one for the State judicial ticket, one for the county ticket, one for the Congressional ticket, another for the ticket for constable, etc. The law required that these several ballot boxes should be marked in plain Roman letters. On this point, of the ballot boxes in Stewartsville precinct let me call attention to this bit of testimony:

Q. What time of day did you vote?

A. I voted about 8 o'clock in the morning.

Q. State whether you could easily tell the names of the ballot boxes or not, and whether you had to examine closely to distinguish them.

A. I could not easily tell; the boxes were badly marked. I could tell one box from another, but none was marked what I considered right and proper. I was here on the evening before the election and the boxes was very well labeled in good letters that anybody could read; that was about sundown that evening. When I got back next morning the boxes had all been changed, the letters on them fine, and sorry letters were on in their stead.

One or two others testified to the same state of facts. The voter, if he cast his own vote, was required to read the names upon the ballot boxes and put in his vote. If he did not cast it himself, he handed his tickets to the poll holders and they put them in for him.

I call attention to the testimony of a prominent citizen of this township:

Q. What is your name, age, residence?

A. Daniel A. Patterson; aged 35 years; residence, Stewartsville Township, Richmond County, State of North Carolina.

Q. Were you present at the election held for Stewartsville Township in November, 1894?

A. I was.

Q. Describe the voting place for Stewartsville Township.

A. It was in a two-story brick building with a wall in front of the door, several feet from the door, extending to the ceiling; there was room enough at either end for one person to pass; back of that wall 8 or 10 feet was another wall extending up nearly to the ceiling, I think; higher than a man's head, with an entrance to the back room; between the two walls were two old counters; the judges of election was behind the one facing the front door, with their faces toward the front door; there was a wall rather dividing the front entrance and extending back to the front wall; a voter came in and turned to the right, I think it was; as he voted he went out to the left and came out the same door he came in.

Q. Could the ballot boxes and judges of election be seen from the front of the building?

A. They could not.

Q. Did you see any men who exercised the authority of marshals or constables that day? And if so, tell what was their actions.

A. I saw several acting as special police; did not know them all; they seemed to have charge of the election; acting as though they were running it.

(Answer objected to by contestee for the reason that the witness has sworn not what was, but what seemed to be.)

Q. State how these marshals were placed about the polling place.

A. There were one or two at the entrance all day, and in the space between the counters around the polls I saw two or three.

Q. Did these marshals control the entrance of voters to the polls and their exit from them?

A. They did.

Q. Did any one of these marshals make threats to you? And if so, state what it was and how it happened.

A. That morning when I got to the polling place I went into the bull pen; I noticed the labels on the boxes had been changed; that is, the evening before they were in large, plain letters; two of the regular nominated judges of election were there at the boxes. I said to them, if I were in their places as judges of election, that I would have those boxes plainly labeled; that they had a right to do so. I went in back room, back of this wall, where there was another one of the judges, and was speaking to him about it, when Mr. James P. McRae came up and said I was using incendiary language and ought not to be—or words to that effect—using such language or talking that way to those negroes. I replied that I only advised them as judges of election to do what they had a right to do, or what I would do if I was judge. I left the room and went back to where the boxes were, the polling place, where Mr. Maxcy L. John followed me, and said that I had better mind how I talked around there; that if there was a riot raised there that day that myself and two or three others, I don't think he mentioned their names, will be the first to fall, or suffer; I think fall was the word he used. There was something said about bullets; I don't remember what it was.

Q. Were the ballot boxes fairly and plainly labeled?

A. No, sir; they were not. Some of them were not spelled right; one, at least, the Congressional box; some letters left out and was very poorly written.

Q. Were there any windows in that part of the building which was walled off to keep the ballot boxes in?

A. No windows in that part of it.

Q. Was the light in this walled-off part of the building where the ballot boxes were good or dim?

A. Rather dim; it was not good.

Q. Where was the public and general entrance to the voting place?

A. Front door.

Q. Was there any back entrance to the voting place? And state what you know about it.

A. Judging from the number of Democratic votes, I think there was; very few went in the front door. I don't know of my own personal knowledge, for I did not go back there.

Q. State what you may know or have been informed about guns being stored in the building in which the election was held, in November, 1894, in Stewartsville Township?

A. Personally, I know nothing. It was generally understood that there were guns stored in upper part of the building. I was reliably informed that there was a gun taken from there during the day. One party came out with a gun; there were two or three taken from there after the voting was over. It was talked all during the day that guns were there. I believe there were, from the fact that people told me that there were.

Q. If you know anything about liquor being stored in that building, tell it.

A. Don't know anything about liquor.

Q. Was the election held in Stewartsville Township on November 6, 1894, a fair election?

A. No.
Q. State whether any vote or votes were rejected by the judges of election who were entitled to vote.
A. They were, to my own knowledge, properly registered; had been there all their lives.
Q. State whether the number of marshals present at the election; their acts and manner; the rejection of qualified voters by judges of election; storing of guns in the building, and holding the election in a walled-off space in the building, where the light was dim or not good, and the number of Democratic bystanders who stood around and about the ballot boxes, had the effect to intimidate any of the voters; filled them with indifferent feeling about voting, or caused some of them to leave the polls and go home.
A. It undoubtedly did, of my own personal knowledge.
Q. State whether any effort was made by any class of people to get the election held in an open and fair way; and if so, what was that effort?
A. Yes, sir; Mr. D. O. Cameron and myself went to Mr. A. F. Bizzell and told him that we would furnish lumber, and haul it there, and help build the bull pen or voting place, if they would let us have the saying as to how it should be built, or built according to the Payne election law; that is, rail it off instead of wall it off. His answer was, "We are not broke yet."
Q. State why a great many voters offered to vote only the county ticket.
A. From the fact the conducting and general management of the election was such that a great many of them could not get their tickets in the proper boxes, and they voted one ticket in all the boxes so as to be sure of one.
Q. What class of voters voted this way?
A. They were illiterate. Both white and black; both Republican and Populist voted the Cooperation ticket.
Q. What ticket did those vote who could read?
A. They voted the straight Populist or Cooperation ticket.
Q. You say those who could read voted the Populist or Cooperation ticket. Is that the same ticket; and what do you mean by the Populist or Cooperation ticket?
A. Yes, sir; we gave a full ticket. The Populist and Cooperation ticket was one and the same ticket. We did not have but one ticket. A Populist would call it a Populist ticket, a Republican would call it a Republican ticket, and some would call it Cooperation.
Q. What particular work did you do in connection with the election?
A. I was distributing Cooperation tickets most of the time.
Q. Do you know anything of voters getting money, or orders for money, in the building where the election was held on election day for voting the Democratic ticket? If so, tell it.
A. Not of my own personal knowledge.
Q. If any voter told you so, tell it.
A. Several of them reported that they were not allowed to vote, and after not being allowed to vote were called back and offered money to vote the Democratic ticket.

Now, I call attention to some other testimony in the record. I read from the testimony of the registrar himself, showing how he registered these voters:

Q. State how many of the voters you have named who registered their occupation as farming or farmer were challenged on account of such registering?
A. About 113 so registered were challenged for occupation, and a good many of them for other defective registration.

Now, notice that these voters were challenged for imperfect registration of their occupation. One hundred and thirteen of them, according to the testimony of this Democratic registrar, had given their occupation as "farming" or "farmer." Now, notice this testimony:

Q. Please explain the challenge made to the voter who was challenged for occupation, and who stated his occupation as farming or farmer.
A. None of the cases challenged as farmer or farming reached me for decision, the judges of election deciding all of them on testimony as to whether he was engaged as a farmer or cropper or worked for wages on a farm. My recollection is that the judges decided that where a man worked his own land, rented land for stipulated price or part of the crop, that farmer or farming applied to him, and when he worked for wages on a farm or elsewhere it did not apply to him as a farmer any more than a clerk in a store as a merchant.

In other words, 113 of these negroes who gave their occupation as "farmers" or "farming," and who were only hired hands upon plantations in that precinct, were disfranchised by the election board on the ground that a man working for wages on a farm was not a "farmer," and that his occupation could not be described as "farming."

It was upon such technicalities as these that 167 colored voters were refused the right to vote in Stewartsville Township at the election in November, 1894.

There is evidence of bribery in that township. I read from the testimony of John M. McKennon, found in the record at page 56:

Q. What do you know about money being used to buy votes with on the day of election?
A. There was two voters that brought two checks to Mr. Zack Long and myself for $2 apiece, and stated that they were directed to go to Mr. Charlie Coble and they would be cashed. We then—Mr. Long and myself—walked up street together and told them to go and get the money and bring it back to us across the street opposite the store; each one brought $2 in greenbacks to us; we saw the money; they said they had gotten the checks in the polling place for voting the Democratic ticket. While we were standing there another man came up with $5 which he said he had received for voting the Democratic ticket; we did not see the check.

This testimony is corroborated. I read from the testimony of Angus Currie, at page 61 of the record:

Q. Do you know anything about money being used to buy voters that day? If so, tell it.
A. I saw one darky come out with a little card of pasteboard. Mr. A. F. Bizzell's name was written on the bottom of the card. The darky said they gave it to him for voting the Democratic ticket, and to carry it up to Mr. Charlie Coble's and he would give him $2 for it. There was three names on the card—the name of the voter, the name of the man that carried him in, and Bizzell's. His name was on with pen and ink; the others with lead pencil. There was others, but I did not examine their cards; told me they had them.
Q. State whether A. F. Bizzell and Charlie Coble are Democrats or not.
A. Yes, sir; they are Democrats.
Q. Did these men, who had the tickets for money, come out of the back or front door of the voting place?
A. They come out of the back door.
Q. Did they say they got those tickets in the voting place or not?
A. They said they got them in the voting place for voting the Democratic ticket.

This testimony, gentlemen, stands wholly uncontradicted in this record. There is further testimony of the same kind. Bribery is thus proven by four or five witnesses who saw the evidence of it. It was committed in the polling place in the presence of the election officers. So the majority of the Committee on Elections say that the election in this precinct, by reason of the storing of guns, the presence of marshals, the apparent intention to intimidate the colored voters, the bribery proven, the sustaining of challenges, and the rejection of votes upon trivial and insufficient grounds, should be declared void. There is no way to ascertain what would have been the result had a fair and honest election been held in this precinct. The returns have been thoroughly impeached, by reason of the corruption of the election board, so that we say, "Throw out the precinct," the effect of which is to take away from the contestee 295 votes and from the contestant 14 votes that were returned for them.

I come now to Lumberton precinct, Robeson County; and I shall have to pass on very rapidly, for my time is brief. In order to bring this matter directly to the attention of the House I will read from the testimony of Mr. D. P. Allen (record, page 153), which will bring some of the features of the case distinctly to the minds of those who are giving me attention:

Q. 104. Are you a resident and qualified elector of the county of Robeson and precinct or township of Lumberton, State of North Carolina?
A. I am.
Q. 105. Did you vote at the election held in said precinct or township the 6th day of November, 1894?
A. I did.
Q. 106. Please state, to the best of your recollection, the condition of the ballot boxes and the position occupied by the judges of election at the time you cast your ballot.
A. The ballot boxes, five of them, were on a long table in midway of the court-house hall, and these five were held by Messrs. John Pitman, J. R. Fuller, and —— Roach; I don't know his first name. The other box, "constable's," was on a small table a few paces off and held by Alfred Merrick.
Q. 107. Was there any inscription, and of what nature, to designate what ballots were to be put into each of the several boxes?
A. There were inscriptions on the boxes of small printed type when I when in.
Q. 108. Was it sufficient to inform the elector at ordinary examination to tell in which box to place the ballot?
A. I do not think it was.

[Here the hammer fell.]

Mr. BAILEY. I ask unanimous consent that the gentleman be permitted to proceed.

Mr. MILLER rose.

Mr. STRODE of Nebraska. My colleague on the committee [Mr. MILLER] will yield me a part of his time.

Mr. BAILEY. As a matter of course, two gentlemen would not be entitled to speak in succession on the same side. I therefore ask that the gentleman from Nebraska be permitted to proceed by unanimous consent.

The SPEAKER pro tempore (Mr. DOLLIVER). The gentleman from Texas asks that the gentleman from Nebraska be permitted to proceed with his remarks.

Mr. KEM. I object.

Mr. MILLER. I yield to the gentleman all my time, if he wants it.

Mr. STRODE of Nebraska. I thank the gentleman very much for his courtesy. I was reading from the testimony of D. P. Allen, and I will continue the reading:

Q. 109. Were you in any way intimidated before or at the time you cast your ballot?
A. Well, sir, when I first came in at 7 the two colored poll holders was standing in the middle of the hall and were not holding any boxes. I asked them where were their boxes; they said they had none but the constable's box. I told them they had a right to half of the boxes, as there were six, and to go and get two more; they said the others wouldn't give them any more. I told them I would take some more of them; they said they had asked them for some more boxes, but they would not give them any more. I told these colored men that if I was appointed poll holder I would not be "bullied" in this way; that they had the same right, being appointed by law to hold polls, as the other gentlemen, and I would have some more boxes; they said that they did not want to get in any fuss. One of them, Mosely, said he was not going to have anything more to do with it. About this time the registrar arose and came up to me and said, "Look here, you are disturbing this election, and if you do not stop I will have you arrested and put in the guardhouse." I said to him, "I am doing nothing but contending for what is right. These two men were appointed to hold polls; they have a right to half of these boxes." He said that I had nothing to do with this matter. Seeing that there was no use to argue, I left and went and called Mr. Proctor and Dr. Norment, and told them to come over here and see how the judges were conducting business. Mr. Proctor did not come, but Dr. Norment did, and when we got back to the door the door was shut, so that neither of us could get in except to vote. Dr. Norment stood at the door and talked to the poll holders about not giving the two colored men their share of the boxes, but the poll holders did not do any different.

One of these poll holders left; he was disgusted. The constable's box was placed, as the evidence shows, about 15 or 20 feet away from the other five boxes; and these two colored Republican poll holders were told that they might take care of the constable's box. There was running for constable in that township but one man, and he was a Democrat. Those men were not afraid to trust these two Republicans to take care of his interest, there being but one

candidate. The Democratic poll holders directed these two colored Republicans to take charge of the constable's box, which, as I have said, was placed 15 or 20 feet away from the other boxes. Under those circumstances one of the Republican poll holders got angry and left; the other stayed and remained in charge of the constable's ballot box. The Democratic registrar immediately appointed another man in the place of the one who left. The man appointed was a Democrat. Remember that just a moment before his appointment they would not allow either of the two colored Republicans to be at or have anything to do with the other five boxes.

Now, here is what was sworn to by the Democrat who was substituted for the colored poll holder who left:

Q. 849. What box did you have charge of?
A. I didn't have charge of any particular box. Five of the boxes were setting on the table, and I deposited tickets in all of the five boxes.
Q. 850. What box was on the table by itself, and who had charge of that?
A. The constable box; Merrick had charge of it.

Merrick was the Republican poll holder. I read now from his testimony:

Q. 142. Where were you put to keep the constable's box?
A. About 4 yards from the long table, toward the back door.
Q. 143. What was on the long table?
A. The five boxes.
Q. 144. Did the other poll holders allow you to have anything to do with the other five boxes?
A. No, sir.

Now, this is important, and I hope members will note it carefully:

Q. 145. Did you see anyone who went in to vote and ask the poll holder to put his tickets in the right boxes?
A. Yes, sir.
Q. 146. What did the poll holders do or say at that time?
A. They said, "Which box?" and the voters said, "You ought to know which is the proper box." They refused to take their ticket for about five minutes. Then the poll holders said, "I will put it in this box if you say so;" and so they did.
Q. 147. Did you offer or try to put his tickets in the right boxes?
A. Yes, sir; I made the attempt five times. I was told to "Keep away from these five boxes, for you have nothing to do with them;" and I said, "I think I have something to do with these boxes." Rather than raise any confusion at all I wouldn't say any more to them; but I noticed how the voters voted, and I saw the ticket placing in the wrong box. I said, "You have placed the tickets so far in the wrong boxes, and you said I have nothing to do with those five boxes; therefore I don't think that I have any right to sign the scroll, and I'll leave."
Q. 148. Were you kept from putting those tickets in the right boxes by the other poll holders?
A. Yes, sir.
Q. 149. What did they do to you to keep you from it?
A. They told me to keep away the fourth trial I made; and the fifth attempt I made came up to me and pushed me, and told me to keep away from these five boxes.
Q. 150. Were you afraid to try again?
A. No, sir; but to keep down a fuss I wouldn't attempt.
Q. 151. Do you know whether the poll holders refused to put any other ticket in the right boxes?
A. No, sir.
Q. 152. Do you know whether or not one of the poll holders who stayed at the five boxes did not wish to put the voters' tickets in the boxes?
A. They all refused our men.
Q. 153. Did they refuse to put any Democratic voters' tickets in the right boxes?
A. No, sir; for they reached out their hands before their men got quite to the table.
Q. 154. Did you sign the returns from this precinct as one of the poll holders, or judges of election?
A. No, sir; I did not.
Q. 155. Why?
A. Because I knew it wasn't just; the election wasn't carried on justly.
Q. 156. Why wasn't the election just?
A. Because, sir, I didn't think I was treated right.
Q. 157. How did they treat you?
A. They say that I must keep away from these five boxes, when I know that I had a right to tend to those boxes—as much so as you, when casting the vote therein.
Q. 158. Do you mean to say that you had as much right to be around the other five boxes as the other poll holders did?
A. Yes, sir.

I ask particular attention to this:

Q. 159. Did the poll holders who had charge of the five boxes put the fusionist tickets in the right boxes?
A. No, sir; not all.
Q. 160. Was there any legal fusionist voters denied the privilege of voting?
A. Yes, sir.
Q. 161. Were you selected as one of the Republican, or fusionists, poll holders at said election?
A. Yes, sir.
Q. 162. Who was appointed, besides yourself, to represent the Republicans, or fusionists, at the polls on election day to help hold the election?
A. Charlie Mosely.
Q. 163. Did he serve as poll holder?
A. No, sir.
Q. 164. Why did he not serve?
A. There was but one box for he and him, and it was set well down towards the back door; and myself and Charlie Mosely did not require but one box.
Q. 165. Who did they appoint in Charlie Mosely's place?
A. A young fellow by the name of Roach.
Q. 166. Was Roach a Republican, Populist, or Democrat?
A. He was a Democrat.
Q. 167. Was Roach sworn to act in said election?
A. I noticed from the time Charlie Mosely resigned, Roach was replaced; he was standing inside of the back door; the door was closed the moment that they called for a man; Roach stepped forward; he went behind the table; commenced putting tickets in the box; if he was sworn, he was sworn at the back door before the poll opened.

The testimony shows that these Democratic poll holders refused to take the tickets of the fusionists and put them in the proper boxes. When the fusionists tendered their votes the poll holders asked, "What box do you want us to put these tickets in?" And the illiterate negroes, who could not read, were expected to point out the box each ticket should be put in. There were six boxes. The Congressional ticket, in many cases, was deposited in some other box than the Congressional box. And when the votes were counted, if the officers found a ticket in the wrong box, they threw it away; no record and no count was kept of such tickets. Dr. Norment, a leading man in that community, a prominent man in North Carolina, was present when the count was made. He examined 111 tickets that were taken out of different boxes, having been put there wrongfully by the judges of the election or by mistake of the voters, and which were rejected—thrown away—not counted; and they had printed upon them the name of Charles H. Martin for Representative in the Fifty-fourth Congress.

There are other things with reference to this precinct that ought to be noticed, but in the short time allotted to me I can not take up all the details. I am justified in saying that this election board was corrupt and rotten. We would have been justified in throwing out the entire vote of the precinct. Witnesses testified that they saw the votes purposely put in the wrong boxes. Dr. Norment, who was present when the count was made and took note of the actual number of tickets voted for the contestant and thrown away not counted, because they were found in the wrong boxes, swears positively that there were 111 of these ballots, and his testimony is uncontradicted. So that your committee, instead of throwing out the whole precinct, simply say here are 111 votes, honestly cast for Mr. Martin, but put in the wrong boxes, either by the voters themselves by mistake or by judges of election purposely, which should be counted and added to his vote.

An elector ought not to be deprived of his vote either by the mistake or fraud of an election officer in depositing it in the wrong box, if the intention of the voter can be ascertained with reasonable certainty. Nor should ballots be rejected because of being put in the wrong box by the honest mistake of the voters themselves. Wherever such mistake is shown it may be corrected, if not by the election officers, at least by this House in trying and deciding this contest. I have stated the law as laid down by McCrary on Elections and many other authorities.

The evidence in this case establishes the following facts:

First. The election board consisted of the Democratic registrar, two Democratic poll holders, one Republican poll holder (colored), and one poll holder (colored) who claimed to be a Republican, but about whose politics there is a conflict of testimony. He had been convicted of a felony, sent to the penitentiary, and was pardoned.

And this man was selected to represent the Republican party on that election board by a Democratic board of county commissioners.

Second. The Republican poll holder was placed at the constable's box. There was but one candidate for constable, and he was a Democrat.

Third. The Democratic poll holders placed the tickets of a large number of fusionists in the wrong boxes, and then refused to count them because they were in the wrong boxes.

Fourth. The Republican poll holder refused to sign the returns because of the frauds committed.

Fifth. The fusionists kept a list of those who claimed to have voted the fusionist ticket, which has 169 names upon it, and is printed in the record.

One man sat there at the door of the polling place giving out the tickets and another entered the names on the book or list. They gave out the full fusion ticket to the fusionist voters, so that they entered the place with the full fusion ticket in their hands, declaring their intention to vote it—169 of them. But 44 were counted for contestant in that precinct.

Sixth. There were 29 tickets thrown out of the Congressional box because in the wrong box, 80 out of the legislative box, 81 out of the State box, and an unknown number were thrown out of some of the other boxes. No Democratic tickets were found in the wrong boxes.

Tickets were put in the Congressional box that belonged in the legislative box, or the judiciary box, or some other box, and having been placed in the Congressional box were thrown out and not counted. Likewise Congressional tickets were found in the wrong boxes. But no Democratic tickets, strange to say, were found in the wrong boxes. No Democrat got his ticket in the wrong box, but 200 or more fusionist tickets were found in the wrong boxes. How many of these were Congressional tickets nobody can tell.

Seventh. The name of the contestant appeared upon all the Congressional tickets that were found in the wrong boxes, and not counted.

Eighth. The poll book of this township returned to the office of the register of deeds shows that 239 voted; and the returns show that contestee received 98 and the contestant 44 votes, leaving 97 unaccounted for.

There is some evidence tending to prove that some of the fusionists who entered the polling place with the fusion tickets in their hands changed them and substituted others before voting, and that others scratched their tickets. There is no evidence tending to prove that any voter put in the boxes, or caused to be put in, more than a single vote for Congressman. Not a single Democratic voter, illiterate or otherwise, got any of his ballots in the wrong boxes. There is but one rational conclusion to be reached from a careful examination of the evidence pertaining to this precinct, and that conclusion is that the conduct of the election officers in this precinct was such as to destroy the integrity of their returns. It is impossible to ascertain with certainty the true vote, and the returns of this precinct should be rejected, which takes 44 votes from the contestant and 98 votes from the contestee, returned from this precinct.

I will not stop to discuss Lilesville precinct in detail. A man who saw the votes counted and saw the votes that had been deposited in the wrong boxes by the Democratic members of the board thrown out and not counted declares that there were 40 votes for Mr. Martin thrown out because they were found in the wrong boxes. The majority of the committee find that these 40 votes ought to be added to the returned vote from this precinct for contestant.

In Ansonville precinct another peculiarity arose. The tickets of the contestant as candidate for Congressman disappeared soon after the polls were opened. They were stolen or mysteriously disappeared; so that the fusionist voter deposited written, instead of printed, ballots thereafter. They were correct in form, but they were written with pen and ink and had contestant's name on them as the candidate for Congressman. Fifty-three of these votes were thrown out for the reason that they were written instead of printed. So we say these votes must be counted for the contestant and added to the number of votes returned for him.

Mr. LOCKHART. Did I did not in my brief consent that the 53 votes to which the gentleman refers should be counted?

Mr. STRODE of Nebraska. Yes, sir.

Mr. LOCKHART. Even though they were informally prepared, being written ballots. The only trouble about it was that the judges of election misunderstood their duties. In all other respects the ballots were received as formal, and I conceded that they should be retained and counted.

Mr. STRODE of Nebraska. That is correct; you conceded it. But I desire to call attention to the conduct of this election board. They were unfair and corrupt, and we would have been justified in reporting in favor of throwing out the entire vote of the precinct.

Mr. LOCKHART. They were neither unfair nor corrupt, but men of as high character as the gentleman from Nebraska himself.

Mr. STRODE of Nebraska. The next precinct I shall notice is Red Springs. The evidence shows that the election board was made up of four Democrats and one Republican. The election board returned 110 votes for contestant and 143 votes for contestee.

We believe that the evidence in this case clearly establishes the fact that the contestant received 126 votes in this precinct, which is 16 more than were returned for him. I will read an extract from the testimony of Dr. Rowland, found on page 115 of the printed record:

Q. 527. Were you present when the count took place after the polls were closed on said day?
A. I was.
Q. 528. Did you see the count of the Congressional box?
A. I did.
Q. 529. State how many votes or ballots were counted for Charles H. Martin.
A. The tally sheet numbered for Lockhart 143, Martin 126.
Q. 530. State who counted and kept tally of that box.
A. Calvin Blue, Republican poll holder, called out, and John A. McKay, a Democratic merchant, of Red Springs, kept the tally.

And on cross-examination he testified as follows:

Q. 555. Were you present when Calvin B. Blue and J. A. McKay commenced to count the Congressional box?
A. I was.
Q. 556. Who was with you?
A. I went through the crowd alone, stood by the side of N. A. McQueen after arriving at the table.
Q. 557. Were there any Populists with you at this time?
A. Two or three came during the counting of the vote, but didn't notice that anyone stayed long.
Q. 558. Did you or any other Populist have anything to do with counting the Congressional box?
A. No.
Q. 559. How did you ascertain the number of votes which were cast in the Congressional box?
A. I asked for the tally sheet and counted the score.
Q. 560. When was this, and who gave you the tally sheet?
A. I think we got to the counter where the other boxes were held in the other room. Before I got hold of it, though, I had been helping to look on and make the count with McKay before Winston Buir, I think, handed me the tally sheet.
Q. 561. Was W. F. Buir a poll holder?
A. No.
Q. 562. Who was with you when W. F. Buir handed you this paper?
A. I think J. P. Smith, but not certain.
Q. 563. When you were assisting J. A. McKay did he and Blue, or you and he, add together the number of votes which were counted in the Congressional box? If so, what was the number declared?
A. I don't think there was an entry made of the count, but the score as made by J. A. McKay numbered 143 for Lockhart, and 126 for Martin.
Q. 564. Did you add up at that time the total of the tally, or did you wait until W. F. Buir handed you this sheet?
A. I added up the tally at that time and looked over the score to see that tallies were right, and then set down the result, which was as we had counted it in the room.
Q. 565. Where had you been just before you went to the Congressional box, and what doing, if anything?
A. I had been sitting by the fire in my room for a short while. On going to the street they announced the election closed, on which I went on to the Congressional box.

Redirect:

Q. 566. Was J. A. McKay one of the judges of said election at said precinct?
A. He was not.

I also read an extract from the testimony of John G. Brown, found on page 108 of the record:

Q. 408. Were you present when the count of the votes took place after the close of the polls?
A. I was present at the legislative box.
Q. 409. Did you see the tally sheet which was kept as the votes were called out for the Congressional box at the close of that count that day?
A. I went from the legislative box to the Congressional box and counted the tally with Dr. W. H. Rowland, J. A. McKay, and C. B. Blue, a poll holder.
Q. 410. Who kept the tally of the Congressional box?
A. J. A. McKay; he was not a poll holder; he was a Democrat.
Q. 411. How many votes were counted at said count for Chas. H. Martin, this contestant?
A. One hundred and twenty-six votes.

And on cross-examination he testified as follows:

Q. 433. Of those who counted the Congressional box, how many were Populist-Republican or fusionist and how many Democrats?
A. C. B. Blue, the poll holder, was a Republican, I suppose; J. A. McKay, who kept the tally sheet, was a Democrat; Dr. W. H. Rowland and myself were Populists.
Q. 434. Well, why did you and Rowland, who were not election officers, assist in counting this box; did anyone ask you to do so?
A. C. B. Blue and McKay counted the box. W. H. Rowland and myself assisted them in counting the tally sheet.

These two witnesses, both reputable men, I take it, from the evidence in this record, swore positively that they counted the number of votes tallied for contestant on the tally sheet after the count had been made, and they both swore that the tally sheet showed that contestant had received 126 votes. The man who kept the tally sheet was not an election officer. Contestee did not call him to deny the statement of these two witnesses as to the number of votes he tallied for contestant. The Republican poll holder took the tickets out of the Congressional box and called the name of the person voted for on each ticket, and the Democratic merchant kept the tally. The record shows that this poll holder was present when the contestee was taking testimony touching this precinct, but he was not called to contradict the testimony of Rowland and Brown. The evidence shows that 143 voters called for the full fusionist ticket, and that they entered the polling place with these tickets in their hands, and with no other tickets. This is a circumstance tending to prove that contestant received more than 110 votes.

It appears from the evidence that no election officer took any part in counting the votes in the Congressional box, except the Republican poll holder. He did not keep the tally. The election officers obtain their information as to the number of votes for the candidates for Congress from the keeper of the tally sheet, who was not under oath. Dr. Rowland saw this vote counted and tallied, and he and Mr. Brown afterwards counted the votes tallied for the candidates for Congress, and Dr. Rowland made a memorandum thereof. The tally was not made a part of the returns and does not appear to have been preserved. The poll book was put in evidence, which shows that 275 persons voted at this precinct. If contestee received 143 and contestant 126, it would make but 269. A few tickets were found in the wrong boxes and were not counted, which may account for the other 6 votes.

Doubtless the other side will contend that the sworn returns of the election board are of such high character that they ought not to be overturned or corrected by the evidence of Rowland and Brown. But the testimony of these two witnesses is so positive and so strongly corroborated, and standing wholly uncontradicted except by the return of the election officers, that no reasonable doubt exists in the minds of the majority of the committee but that contestant received 126 votes at this precinct instead of 110, the number returned for him.

I now call your attention to Maxton Township. The election board in this precinct was solidly Democratic. The county commissioners named two Republicans and two Democrats for judges or poll holders, but the two Republicans did not appear on time, on the Saturday prior to the election, when the registration list was to be corrected, and the Democratic registrar appointed two Democrats in their places. One of the witnesses described the place where the election was held as follows:

Q. 272. Describe the place where the polls were held.
A. They were held in a large room 30 by 75 feet, as near as I can guess at; two windows on the front, one on the side near the off end; no windows on the other side, on which was erected a small inclosure in which the voting was conducted; the windows were darkened, if I recollect, to some extent by curtains; I don't say that they were put there then for that purpose; they may have been there before, but couldn't see from the outside what was going on.

Democratic doorkeepers were placed at the entrances to the

building. No one could see from the outside what was going on inside of the building. Fusionists were not allowed inside the voting place while the voting was in progress, except one at a time, as they went in to vote. Democrats, other than the election officers and those who went in to vote, were allowed inside of the polling place while the voting was going on. After the polls closed the election officers called in four Democrats to assist in counting the vote and keeping the tally. No Populist or Republican was permitted to assist in this work. The Democrats who assisted in making up the returns were not under oath.

There were returned by the precinct returning board 160 votes for contestee, 15 votes for contestant, and 12 votes for John L. Matheson.

The Populists of this township, anticipating an attempt to cheat and defraud them at the election, arranged to have one or more of their number at the door of the polling place on the day of election to issue fusion tickets and to keep a list of the fusionist voters to whom tickets were issued as they entered the polling place to vote. They did this with a view of furnishing evidence of the number and character of votes cast—or offered to be cast—by them in the event of any attempt to cheat or defraud them at the election. It appears from the evidence that at this precinct this system was carefully carried out. Intelligent men stood at the door of the polling place and issued contestant's tickets to the voters who came to get them and had their names enrolled on the list, and then, one by one, went straight into the polls to vote them. The persons who kept this list and issued the tickets were sworn as witnesses in this case and testified as to the number of persons who so received tickets and entered the polling place to vote them. It also appears from the evidence that the most of these persons immediately afterwards returned and reported that they had voted or attempted to vote the tickets given them. The list so kept was produced, identified, and incorporated into the evidence, and a copy of it appears at pages 350–353, in the printed record. I give here an extract from the testimony of W. J. Currie, who kept this list and entered nearly all the names upon it:

Q. 280. What do those check marks indicate?
A. First, as to whether the voter was white or colored; second, as to the office the candidate was running for.
Q. 281. Why are check marks placed in both columns; which are for Congress?
A. I don't know that I can tell you that.
Q. 282. Are there any check marks placed in the Congressional column when the voter was going to vote for James A. Lockhart, the contestee?
A. No, sir; there were none placed there only when the voter indicated his intention to vote the fusion ticket.
Q. 283. Who was the Congressional candidate on the fusion ticket?
A. Charles H. Martin.

More than 200 names appear upon this list. About 25 of them appear to have been challenged, but there is no evidence in the record showing how many of the challenges were sustained.

It is evident that the voters in many of the townships in this Congressional district have been entrapped into putting their tickets in the wrong boxes, and have been otherwise cheated out of their votes for years. The voters of Maxton Township were determined to throw the responsibility upon the Democratic election board if tickets were found in the wrong boxes and not counted. Accordingly, the fusionist voters in this township were instructed by their leaders that the poll holders were required, under the law, to take their ballots and deposit them in the proper boxes. I give here an extract from the testimony of J. P. Smith, a Republican who desired to vote the fusionist ticket:

Q. 237. Did you ask the poll holder to take your tickets and put them in the proper boxes?
A. I asked the poll holder to do it; all the one I saw there when I went to vote; I asked him to take my tickets and put them in the proper boxes, and he refused; I then asked him where the other poll holders were, and I looked around over the hall and saw none of the other poll holders; I asked him again to put my ticket in and he refused a second time; asked him the third time to take them and put them in the boxes and he refused to do so; he then told me to get out of the house, and I got out, and that ended it.
Q. 238. What did you then do with your tickets?
A. I laid them down on the table or counter where the boxes were sitting; I did that when he told me to get out.

I quote also from the cross-examination of W. J. Currie:

Q. 324. Did not you and other Populist and Republican leaders, by agreement made before election day, instruct the fusion voters to offer their tickets in mass to the poll holders, and if the poll holders refused to assort the tickets and put each in the proper box, to throw them down and refuse to vote?
A. We were informed by both the Democratic and fusionist nominees for the legislature publicly, on the stump, that it was the duty of the poll holders to place the tickets in the proper boxes when requested so to do by the voter, and we did advise them to offer them, and if refused to lay them down before them.
Q. 325. Are you a Populist or Republican leader?
A. I am the chairman of the township executive Republican committee.

All fusionist voters tendered to the Democratic poll holders all the tickets they desired to vote, and requested the poll holders to deposit each ticket in its proper box. The Democratic poll holders refused in every instance, and after such refusal a large majority of the fusionist voters laid their tickets on the table or on the ballot boxes and left the room without having deposited their ballots. The tickets were brushed from the table or the ballot boxes to the floor by the Democratic poll holders. A few, however, who could read deposited their own ballots after being so refused by the poll holders. All Democratic poll holders demanded that the voters select out their tickets and offer them one at a time. The voters having refused to do this, the poll holders refused to receive and deposit their ballots. I do not believe the voters were bound to select and deliver to the poll holders their tickets separately. The statute of North Carolina in force at that time provides as follows (section 2658):

The polls shall be opened on the day of election, from 7 o'clock in the morning until sunset of the same day, and no longer, and each voter whose name here appears registered, or who shall not be challenged and rejected, shall hand in his ballot to the judges, who shall carefully deposit the ballots in the ballot boxes.

A part of section 2688 reads as follows:

Only one voter shall be allowed to enter such polling place at one time, and no one except the judges of the election shall be allowed to speak to or interfere with the voter while in the polling place casting his vote, which shall be put into the proper box or boxes by said voter, or by the judges at the request of the voter.

It appears from the evidence that there were some Republican voters in this precinct who did not desire to support the contestant as the candidate for Congress, and the returns show 12 votes for Matheson. There were probably a few others who desired to vote the same way, whose ballots the Democratic poll holders refused to deposit, but the exact number of such can not be ascertained from the evidence. Some fusion tickets were found in the wrong boxes and were not counted. No record was kept of these ballots, and the number can not be ascertained. There is no possible way of ascertaining the true state of the vote in this precinct. The return is so tainted with fraud and the misconduct of the election officers that the truth can not be deduced from it. The election in this precinct should be set aside and 160 votes for contestee and 15 votes for contestant should be deducted from the number returned for them, respectively.

There are other precincts which we have noticed in our report, but I have now consumed much more time than I ought to have consumed, and I owe an apology to the House for having detained you so long. I desire to say, however, that the evidence in this record, aside from that to which I have called your attention, shows that there was much corruption, fraud, and some intimidation at the election in this Sixth Congressional district of North Carolina in 1894. In one precinct, the home of the contestee, the fusionist leaders were rotten-egged, and stinking chemicals thrown on them while at the polls working for their ticket.

In another precinct the election officers held the election and refused to count the votes and make any returns. They claimed to have been intimidated and prevented from making the returns. But I do not think that was the reason the vote was not counted and returned. The evidence in the record shows that the fusionists had a large majority of the votes cast, and that, in my opinion, was the reason the vote was not counted. But the committee have not attempted to count that precinct.

In another precinct no Populists or Republicans voted, but they made an effort to count the Democratic voters who entered the polling place during the day. The election board returned 250 votes for contestee from that precinct. The persons who kept a list of the Democrats seen to enter the polling place did not see one-half that number of Democratic voters enter the polling place. We believe the vote was much smaller for contestee than the returns made, but we have allowed it to stand.

It is my opinion, formed from a careful and thorough examination of the evidence in the record of this case, that contestant actually received more than 1,000 majority over contestee. We have been exceedingly conservative in arriving at the result set forth in the majority's report. The members of this committee who have joined in this majority report have performed their duty conscientiously and with no partisan prejudice or feeling. The evidence in this case clearly establishes the contestant's right to his seat in this House and it is our duty to give it to him. The people of his district have declared that he was their choice, and it is our duty to rise above all partisan considerations and prejudices and carry into effect the will of the people of the Sixth Congressional district of North Carolina by seating this contestant. [Applause.]

I reserve the remainder of my time.

The SPEAKER pro tempore. The gentleman has occupied one hour and thirty minutes.

Mr. BAILEY. Mr. Speaker, even if I were in condition to argue this case, I should deem it a waste of time and strength to do so, because it seems to me that a House which will determine to proceed to the decision of a case before that case has been properly made up is ready to decide it without any argument at all.

I am all the more induced to believe that the decision of the House is foregone because the failure to file the views of the minority was due to no negligence on the part of the minority.

Mr. PRINCE. Mr. Speaker——

Mr. BAILEY. Certainly.

Mr. PRINCE. I should like to ask my colleague on the committee if he could not have introduced a resolution similar to the one that was introduced by the gentleman from California [Mr. MAGUIRE] with reference to getting the report in this case printed, as the gentleman from California did in the case of Mitchell *vs.* Walsh? When the gentleman from Nebraska [Mr. KEM] objected to that report being printed, I will ask the gentleman from Texas if he does not recollect that our colleague [Mr. MAGUIRE] had a resolution introduced, referred to the Committee on Printing, and they promptly brought in a report favoring the printing of the minority report in that case, under the rule giving them the privilege to report at any time? Could you not have done so?

Mr. BAILEY. Why waste the time to ask that question? Doubtless I could have obtained recognition on Monday last to move a suspension of the rules and have secured the passage of an order to print the views of the minority; but I have pursued the usual course, so usual that there was no question made about it. When the gentleman from Nebraska came and said to me that his report had been prepared, and asked me whether I would rather see it in the manuscript or in print, I said I would prefer to see it in print. It was then at the Printing Office. He said to me that as soon as it was printed he would bring me a copy. I never saw the report until it had gone to the Printing Office, never saw it until it was filed in this House, and it was absolutely impossible for me to have filed a minority report. I felt, inasmuch as the majority report seated a political friend of the gentleman from Nebraska, that, however much he might feel inclined, and however much he might feel it to be his duty, to object in mere matters of favor to members, in a matter affecting the title to a member's seat, and especially in a matter which seated one who agrees with him politically, he would feel under no obligation to persevere in his objection.

But, sir, whatever might have been the course which ought to have been pursued, or whatever might have been the course which could have been pursued, there has been no negligence on the part of the minority.

I am consoled, however, by the fact that so far as I am personally concerned I can not engage in the discussion of it, even if I could hope for a different or better result; for the House easily perceives now that I am suffering from a throat trouble, which the doctor warns me might result seriously if I were to undertake to make anything like a speech. I told the gentleman from Nebraska so a day or two ago, that it was a physical impossibility for me to make a speech, and I asked that the case go over, as I had been charged by my colleagues of the minority of the committee with the preparation and defense of it so far as it was to be prepared and defended; but neither the physical disability of a colleague nor the fact that the case has not been prepared can deter the majority from its purpose to unseat the gentleman who holds the certificate of a sovereign State that he is entitled to sit here as one of its Representatives.

Despairing of anything like a fair conclusion, I yield the remainder of my time to the gentleman from North Carolina [Mr. LOCKHART].

Mr. LOCKHART. Mr. Speaker, I had no idea that this question would be called up for consideration to-day. Therefore, to me it is a surprise; and I have not my argument arranged in that method which I would like when I come to present it to a body like this. But so strong, Mr. Speaker, are my convictions about this matter and so comprehensive and accurate is my knowledge of the details of this case that I feel that I should present this matter to this House—so much of it as does me the honor and the justice to sit and hear this case discussed. The gentleman from Texas [Mr. BAILEY], who has charge of the minority report on this side, has stated that he has attempted to get this minority report before this House and have it printed and laid upon the desks of members, that they might investigate this matter and see what the truth of it is.

This House has refused to wait until that could be done, and proposes to vote upon this question regardless at the same time of law or testimony. I say, Mr. Speaker, in view of this fact, that while there has not been a printed copy of the minority report in this case presented to this House, which is now about to vote upon this question, there is not one-half of a quorum in this House who are to decide this matter present now in this House to hear this discussion and know what is the truth of the matter. I have been a country practitioner of law for twenty-two years. It is not improper for me to say that perhaps I have appeared in as many cases before juries as any man in this House who has had no longer experience than I. I have appeared before courts, and I have never seen a court anywhere——

Mr. CANNON. Mr. Speaker——

The SPEAKER pro tempore (Mr. DOLLIVER). Does the gentleman from North Carolina yield?

Mr. LOCKHART. I do.

Mr. CANNON. Will the gentleman yield for a very short time, until I can ask the House to adopt the final report in the general deficiency bill?

Mr. LOCKHART. I will.

GENERAL DEFICIENCY BILL.

Mr. CANNON. Mr. Speaker, I present a conference report, submitting a final report and agreement on the part of the conferees of the House and the Senate on the general deficiency bill. I ask to omit the reading of the report and that the statement may be read.

The SPEAKER pro tempore. If there be no objection, the reading of the conference report will be omitted and the statement will be read.

There was no objection, and it was so ordered.

The report of the committee of conference is as follows:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 8293) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1896, and for prior years, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 24, 25, 30, 31, 37, 74, 103, 104, 105, 106, 147, 148, and 200.

That the House recede from its disagreement to the amendments of the Senate numbered 14, 79, 80, 81, 82, 137, 190, and 192, and agree to the same.

That the Senate recede from its disagreement to the amendments of the House to the amendments of the Senate numbered 27, 207, and 208, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 83, and agree to the same with an amendment as follows: Strike out all after the word "cents," in line 8, down to and including line 20 of said amendment; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 122, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"That the Secretary of the Treasury is directed, until otherwise provided by law, to pay, after reserving not exceeding $30,000 per annum for educational purposes and expenses of necessary employees, to the Sisseton and Wahpeton Indians of South Dakota all interest moneys due them up to July 1, 1896; and that thereafter all interest money as it shall accrue shall be paid, except as herein provided, on the 1st day of November annually."

And the Senate agree to the same.

J. G. CANNON,
W. O. ARNOLD,
JOSEPH D. SAYERS,
Managers on the part of the House.

EUGENE HALE,
W. B. ALLISON,
F. M. COCKRELL,
Managers on the part of the Senate.

The statement of the House conferees was read, as follows:

The managers on the part of the House of the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 8293) making appropriations to supply deficiencies, submit the following written statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report, namely:

On amendment numbered 14: Appropriates $1,150,000, as proposed by the Senate, instead of $850,000, as proposed by the House, for expenses of collecting the revenue from customs.

On Nos. 24 and 25: Strikes out the appropriations proposed by the Senate to pay the claims of B. B. Bouldin for $205.15 and W. L. Hall for $198.

On No. 27: Appropriates for payments on account of the Ford's Theater disaster, the conference committee agree to recommend that the Senate agree to the amendment of the House referring back to the Joint Commission certain claims, with instructions to reexamine and report thereon.

On Nos. 30, 31, 37, and 74: Strikes out the appropriations proposed by the Senate to pay claims of W. H. Crook, $4,000; of Calvin Gunn, $700, and of Stout, Hall & Bangs, $31,802.52.

On Nos. 80, 81, 82, and 83: Appropriates, as proposed by the Senate, to pay the audited accounts certified to Congress as follows: In House Executive Document No. 234, Fifty-third Congress, third session, $38,500.12; in Senate Document No. 217, this session, $1,092.50; in Senate Miscellaneous Document No. 57, Fifty-third Congress, third session, $8,000; in Senate Executive Document No. 33, Fifty-third Congress, third session, $19,000; in Senate Executive Document No. 98, Fifty-third Congress, second session, $35,791.67; and in House Miscellaneous Document No. 56, Fifty-third Congress, third session, $37,313.54.

On Nos. 103, 104, 105, and 106: Strikes out the provisions proposed by the Senate to pay the claims of the Richmond Locomotive and Machine Works, $69,558.39; of the Portland Company, $80,867.46; of William S. Grant, $77,989.38; and of Nancy E. Day, $3,041.66.

On No. 122: Inserts the provision proposed by the Senate, regulating the payment of interest money to the Sisseton and Wahpeton Indians of South Dakota, so modified as to require the reservation of not exceeding $30,000 per annum for educational purposes and expenses of necessary employees.

On No. 137: Inserts the provision proposed by the Senate, authorizing a credit in the accounts of William M. Masi, late postmaster at Cheyenne, Wyo., of $2,624.14.

On Nos. 147 and 148: Strikes out the appropriations proposed by the Senate to pay the claims of Winslow Warren, $500, and of R. D. Benedict, $500.

On Nos. 190 and 191: Appropriates, as proposed by the Senate, to pay Francis M. Cox, an employee of the Senate, $900, and Benjamin Durfee, an employee of the Senate, $2,500.

On No. 200: Strikes out the provision proposed by the Senate authorizing the payment of one month's pay to discharged employees of the House and Senate.

On Nos. 207 and 208: It is agreed to recommend that the Senate agree to the amendments of the House inserting $6,000 for payment of expenses in contested-election cases.

The bill as finally agreed upon appropriates $10,639,621.75, being $420,424.80 less than as it passed the Senate, and $5,846,031.30 more than as it passed the House.

J. G. CANNON,
JOSEPH D. SAYERS,
Managers on the part of the House.

Mr. CANNON. Mr. Speaker, if I had an hour in my own right I would submit some remarks touching appropriations and revenue and in explanation of this bill, but as I have not the time, and do not wish to trench upon the courtesy of the gentleman [Mr. LOCKHART] who so kindly yielded the floor in order that I

might call up this conference report, I will not attempt to detain the House at this time, but will, without objection, present in the RECORD a statement covering the subjects that I have mentioned.

Mr. SAYERS. Mr. Speaker, I desire to say that as one of the members of the minority of the Committee on Appropriations I will, under leave of the House (which has always been accorded to members of that committee), submit on behalf of the minority of the committee a statement as to this bill, and also as to other appropriation bills passed by this House.

The SPEAKER. If there be no objection, the gentleman from Illinois and the gentleman from Texas will——

Mr. KEM. I object, Mr. Speaker; I object.

The SPEAKER. Oh, the gentleman from Nebraska [Mr. KEM] objects. [Laughter.]

Mr. SAYERS. Mr. Speaker, I did not ask for unanimous consent, but intimated that I would ask the Committee on Rules to ask the House to accord to the members of the Committee on Appropriations this privilege, which I believe has never been refused on such an occasion.

Mr. CANNON. It is, in my opinion, a very proper privilege to be granted, because the amounts appropriated in these bills can not possibly be ascertained definitely until about the time of the adjournment of this session.

The question being taken on agreeing to the conference report, the Speaker declared that the ayes seemed to have it.

Mr. KEM. Division, Mr. Speaker.

The House divided; and there were—ayes 136, noes 0.

The SPEAKER. The vote seems to be unanimous.

Mr. KEM. No quorum, Mr. Speaker.

The SPEAKER (after a count). There are 179 gentlemen present; a quorum. The ayes have it, and the conference report is agreed to.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. GROUT. Mr. Speaker, I submit a conference report on the bill making appropriations for the District of Columbia, and ask that the statement be read.

The statement of the House conferees was read, as follows:

The managers on the part of the House of the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 5210) making appropriations for the expenses of the government of the District of Columbia for the fiscal year 1897 submit the following written statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report on each of the amendments, namely:

On Nos. 1, 2, 3, 4, and 5: Appropriates for an additional assistant inspector of plumbing, at $1,000; increases the pay of the deputy property clerk from $1,000 to $1,200; inserts the provision proposed by the Senate authorizing the settlement of certain suspended accounts of the ex-Boards of Commissioners, and strikes out the proposed increase of one additional assistant inspector of buildings, at $1,000.

On No. 6: Strikes out the provision proposed by the Senate to repay to the Protestant Episcopal Cathedral Foundation the sum of $1,223.08 for water-main tax.

On Nos. 7 and 8: Strikes out the provision for the special-assessment clerk in the office of the assessor, the same being provided for elsewhere in the bill.

On Nos. 9, 10, and 11: Provides for a deputy collector, at $1,800, instead of at $2,000, as proposed by the Senate, and strikes out the provision for one clerk, at $1,000, in the collector's office.

On Nos. 12 and 13: Increases the pay of the disbursing clerk in the auditor's office from $1,500 to $1,600, as proposed by the Senate.

On Nos. 14, 15, 16, and 17: Appropriates for two market masters, at $1,200 each, as proposed by the Senate, instead of at $1,000 each, as proposed by the House; and appropriates $1,200, as proposed by the Senate, instead of $960, as proposed by the House, for hire of laborers for cleaning the markets.

On Nos. 18 and 19: Provides for one messenger clerk, at $720, as proposed by the Senate, instead of at $600, as proposed by the House, in the engineer's office.

On No. 20: Appropriates $11,900, as proposed by the Senate, for a special-assessment clerk and for nine clerks heretofore paid from the appropriation for assessment and permit work in the special-assessment office.

On No. 21: Appropriates $24,000, as proposed by the Senate, for employees in the street-sweeping office who have heretofore been paid from the appropriation for street sweeping.

On Nos. 22 and 23: Strikes out the increase of $650 proposed by the Senate for employees in the surveyor's office.

On Nos. 24, 25, 26, and 27: Appropriates $22,500, as proposed by the House, instead of $24,000, as proposed by the Senate, for contingent expenses; requires, as proposed by the House, that the whole cost of maintaining and keeping in good order the laboratory and apparatus in the office of the inspector of gas meters shall hereafter be paid by the Washington Gas Light Company; and requires, as proposed by the Senate, that the recorder of deeds shall make no charge for reporting to the assessor transfers of real estate as required by law.

On No. 28: Appropriates $9,000, instead of $7,000 as proposed by the House and $10,000 as proposed by the Senate, for rent of District offices.

On No. 29: Strikes out the appropriation of $12,000 proposed by the Senate for a morgue.

On No. 30: Appropriates $2,500, as proposed by the Senate, instead of $1,900, as proposed by the House, for general advertising.

On No. 31: Appropriates $7,500, instead of $7,000 as proposed by the House and $8,000 as proposed by the Senate, for advertising notice of taxes in arrears.

On Nos. 32 and 33: Appropriates $3,000, instead of $2,000 as proposed by the House and $4,000 as proposed by the Senate, for transcribing the general assessment and preparing the numerical book, with the provision, as proposed by the Senate, that employees in the office of the assessor may be assigned to such work and be allowed a reasonable compensation therefor.

On Nos. 34 and 35: Makes the appropriation for photolithographing plats of subdivisions in Georgetown immediately available, and appropriates $2,000, instead of $1,500 as proposed by the House and $2,500 as proposed by the Senate, for plats of subdivisions outside of Washington and Georgetown.

On No. 36: Appropriates $10,000, instead of $12,500, as proposed by the Senate, for expenses of completing the plan for extension of a permanent system of highways.

On No. 37: Appropriates $10,000, instead of $14,000, as proposed by the Senate, for advertising and court expenses under the act to provide a permanent system of highways.

On No. 38: Appropriates $26,684.09, as proposed by the Senate, for payment to owners of lots and parts of lots on the Potomac River Flats, under decrees of the supreme court of the District.

On No. 39: Strikes out the provision proposed by the Senate, setting aside the Potomac Flats as a public park under the name of Riverside Park.

On No. 41: Appropriates $140,000, instead of $125,000 as proposed by the House and $165,000 as proposed by the Senate, for assessment and permit work.

On Nos. 42, 43, 44, 45, 46, 47, 48, 49, and 50: Appropriates $150,000, instead of $100,000 as proposed by the House and $284,000 as proposed by the Senate, for paving streets and avenues; and $6,000, as proposed by the Senate, for paving Florida avenue south from Connecticut avenue to Eighteenth street, and $7,500 for paving P street northeast from North Capitol street to Florida avenue; and strikes out the appropriation of $15,000 proposed by the Senate for paving Eighteenth street extended and Cincinnati street from Eighteenth street to the east entrance of the Zoological Park.

On Nos. 51 and 52: Limits the price of asphalt paving of the ordinary quality to $1.80 per square yard, instead of $1.75 as proposed by the House and $1.90 as proposed by the Senate; and to $2, as proposed by the House, instead of $2.15, as proposed by the Senate, for asphalt paving of exceptional strength.

On Nos. 53, 54, 55, 56, 57, 58, 59, and 60, relating to sewers: Appropriates $50,000, as proposed by the Senate, instead of $45,000, as proposed by the House, for cleaning and repairing sewers and basins; $75,000, instead of $18,500 as proposed by the House and $121,000 as proposed by the Senate, for surburban sewers; $25,000 for constructing the Fifteenth street and F street portions of the F street and Easbys Point intercepting sewer, with authority to contract for the whole work at a cost not exceeding $87,000, instead of appropriating $87,000 therefor, as proposed by the Senate; $1,000 for sewer in Fifteenth street extended, between Columbia road and Kenesaw avenue, with authority to lay a water main in said street; $60,000, instead of $40,000 as proposed by the House and $190,000 as proposed by the Senate, for continuation of the Rock Creek and B street intercepting sewer; $4,000, as proposed by the House, instead of $5,000, as proposed by the Senate, for completion of the Kenesaw avenue sewer; and $1,000, as proposed by the House, instead of $2,000, as proposed by the Senate, for condemnation of rights of way for public sewers.

On No. 62: Appropriates $40,000, as proposed by the House, instead of $60,000, as proposed by the Senate, for repairs of county roads.

On Nos. 63, 64, 65, 66, 67, 68, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, and 86, relating to the construction of county roads: Appropriates $10,000, as proposed by the House, instead of $12,000, as proposed by the Senate, for grading and regulating Sherman avenue, Roanoke and Irving streets; $7,500 for taking down the brick building at Garfield Memorial Hospital grounds and constructing another building on said premises, made necessary by widening and grading Sherman avenue at that point; $5,000 for grading and regulating Columbia road, Sixteenth street extended, Prospect street, Crescent street, Superior street, and Meridian and Ontario avenues; $10,000 for grading Massachusetts avenue extended; $9,000 for grading and graveling Albemarle street; $5,000 for grading Illinois avenue; $3,000 for grading and graveling Pearce and High streets, Anacostia; $9,000 for court expenses and ground taken to open and extend Thirty-seventh street; $10,000 for improving and protecting Connecticut avenue extended; $5,000 for continuing the macadamizing of the road from the Broad Branch road to Chevy Chase circle; and $17,000, instead of $15,000 as proposed by the House and $25,000 as proposed by the Senate, for grading and regulating Yale, Bismarck, Princeton, Harvard, and Columbia streets; and strikes out the appropriations for county roads proposed by the Senate, as follows: $5,000 for paving Massachusetts avenue extended; $5,000 for grading Michigan avenue; $3,000 for paving Harewood avenue; $4,000 for grading Twenty-second and Twenty-fourth streets, Langdon; $10,000 for grading and regulating Twelfth street extended; $1,000 for grading and regulating Belmont and Kalorama streets; $10,000 for grading and graveling Pennsylvania avenue extended and Branch avenue; $4,500 for grading and regulating Emporia and Frankfort streets; $5,000 for grading and graveling Kenesaw avenue and Park row; and $2,500 for grading and regulating Twentieth street extended.

On No. 88: Makes an increase of $8,500, instead of $34,950, as proposed by the Senate, for sprinkling, sweeping, and cleaning streets.

On No. 89: Appropriates $20,000, instead of $17,000 as proposed by the House and $22,000 as proposed by the Senate, for the parking commission.

On Nos. 101 and 102: Appropriates $1,250, instead of $900, as proposed by the House, for repairs of harbor boat, and strikes out the appropriation of $50,000 proposed by the Senate for a new fire, ice, and wrecking boat.

On No. 103: Appropriates $8,500, instead of $7,000 as proposed by the House and $10,000 as proposed by the Senate, for public pumps, including the drilling of deep wells.

On No. 104: Strikes out the appropriation of $5,000 proposed by the Senate for protecting the inlet to the Aqueduct at Great Falls.

On Nos. 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, and 129, relating to public schools: Strikes out the increase of $200 proposed by the Senate in the salary of the clerk to the superintendent of schools and secretary to the board of trustees; provides for four additional teachers at $1,200 each in lieu of three at $1,000 each and one at $900; strikes out the appropriation of $1,200 for an additional engineer and machinist of the manual training school, and the increase from $500 to $600 proposed by the Senate in the compensation of janitors of 53 school buildings; appropriates $13,100 instead of $12,500, as proposed by the House, for rent of school buildings; $32,000, instead of $31,000 as proposed by the House and $33,000 as proposed by the Senate, for repairs to school buildings; $9,000, instead of $8,000 as proposed by the House and $10,000 as proposed by the Senate, for purchase of tools and material for instruction in manual training; $35,000, as proposed by the House, instead of $36,500, as proposed by the Senate, for fuel; $38,000, instead of $35,000 as proposed by the House and $40,000 as proposed by the Senate, for purchase of text-books and school supplies; $30,000, instead of $32,000, as proposed by the Senate, for reconstructing the Anthony Bowen school building; $8,000, instead of $10,000, as proposed by the Senate, for a four-room school building at Langdon; $8,000, instead of $10,000, as proposed by the Senate, for a two-room building near the line of Connecticut avenue extended; authorizes the purchase of a site out of the appropriation heretofore made for a school building on the Conduit Road; authorizes a contract for the construction of an eight-room building at Giesboro to cost not exceeding $21,000 instead of appropriating $14,000 therefor, as proposed by the Senate; strikes out the appropriations proposed by the Senate of $10,000 for a four-room addition to the Bennings school and of $10,000 for a four-room building at Hillsdale; and authorizes a contract for the new Western High School building, as proposed by the House, instead of appropriating in full therefor, as proposed by the Senate.

On Nos. 130, 131, 132, 133, 134, 135, 136, 137, 138, and 139, relating to the Metropolitan police: Appropriates for 25 additional policemen, instead of 75, as proposed by the Senate, and for two additional drivers, as proposed by the Senate; strikes out the provision for an additional lieutenant of police proposed by the Senate, and the increase in the pay of drivers from $480 to $600 each; authorizes the Commissioners to deposit with the Treasurer of the United States, out of receipts from fines in the police courts, a sufficient sum to meet any deficiency in the police fund or the firemen's relief fund; authorizes the allowance of twenty days' leave of absence each year to the members of the Metropolitan police, as proposed by the Senate; appropriates $19,500, instead of $18,500 as proposed by the House and $20,750 as proposed by the Senate, for miscellaneous and contingent expenses; and appropriates $3,500, as proposed by the Senate, for extending the patrol system.

On Nos. 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, and 152, relating to the fire department: Appropriates for 8 watchmen, instead of 6 as proposed by the House and 10 as proposed by the Senate, at $600 each; inserts the provision proposed by the Senate, regulating the firemen's relief fund; appropriates $3,500, instead of $3,000 as proposed by the House and $4,000 as proposed by the Senate, for repairs to engine houses; $3,000, as proposed by the House, instead of $3,500, as proposed by the Senate, for repairs to apparatus; $7,000, as proposed by the Senate, instead of $6,000, as proposed by the House, for purchase of hose; and $3,000, as proposed by the House, instead of $4,000, as proposed by the Senate, for fuel; appropriates $3,500, instead of $4,000, as proposed by the Senate, for exchange of an engine; $4,200, instead of $4,500, as proposed by the Senate, for a new engine for Mount Pleasant; and $15,900, as proposed by the Senate, for a house and lot in the vicinity of Brightwood, to accommodate chemical engine now at Mount Pleasant; strikes out the appropriations proposed by the Senate of $3,500 for an aerial truck, and of $55,000 for two additional engines, lots, houses, and furniture therefor.

On No. 153: Appropriates $11,000, as proposed by the House, instead of $13,000, as proposed by the Senate, for general supplies for the telegraph and telephone service.

On Nos. 155, 156, 157, and 158, relating to the health department: Appropriates $1,500, instead of $1,200 as proposed by the House and $1,800 as proposed by the Senate, for a chemist; strikes out the appropriation of $15,000 proposed by the Senate for incinerating combustible waste collected in the District of Columbia; and appropriates $5,000, as proposed by the House, instead of $8,000, as proposed by the Senate, for enforcing the act to prevent the spread of scarlet fever and diphtheria.

On Nos. 159 and 160: Appropriates $7,000, as proposed by the Senate, instead of $6,000, as proposed by the House, for witness fees in the police courts, and makes the appropriation for repairs to police-court furniture available for replacing the same.

On Nos. 161, 162, and 163: Requires that the appropriations for employees in the court-house and for salary of the warden of the jail be expended under the direction of the Attorney-General; strikes out the increase of $200 proposed by the Senate in the salary of the warden of the jail, and the appropriation of $20,000 for a wall around the jail grounds.

On Nos. 164, 165, and 166: Appropriates $1,748, as proposed by the Senate, for an additional overseer, night watchman, and carpenter for the Washington Asylum.

On No. 167: Appropriates $1,000, instead of $1,500, as proposed by the Senate, for painting and repairs of the almshouse and workhouse.

On Nos. 168, 169, and 170: Appropriates $5,040, instead of $4,700, as proposed by the House, for teachers and assistants for the Reform School for Boys, and strikes out the appropriation of $2,000 for a new bake oven, including brick building, at the said Reform School.

On No. 192: Makes the appropriation for the municipal lodging house available for the payment of rent.

On Nos. 196 and 197, relating to the militia: Appropriates $3,000, instead of $2,500 as proposed by the House and $3,500 as proposed by the Senate, for expenses of rifle practice and matches, and inserts the provision proposed by the Senate requiring that hereafter all leases and contracts on account of the militia shall be made by the Commissioners, and that appropriations for the militia shall be disbursed only on vouchers authorized by the Commissioners.

On Nos. 198, 199, and 200: Appropriates for an additional inspector at $900, as proposed by the Senate, in the water department, and strikes out the increase of $200 in the salary of the foreman of the distribution branch of the water department, proposed by the Senate.

The committee of conference have been unable to agree on the following amendments, namely:

On No. 40: Appropriating $202,380.56 for payment for property condemned for the extension of Sixteenth street:

On No. 61: Regulating the use of underground electric or cable street railways by other street railway companies:

On Nos. 69 and 87: Appropriating $6,000 for paving Connecticut avenue and Columbia road, and requiring that Connecticut avenue shall be extended straight from Le Roy place to the District line;

On Nos. 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, and 100: Appropriating for and regulating the price of gas and electric lighting;

On No. 105: Appropriating $266,546.38 out of the District revenues and reappropriating out of the general Treasury a like sum for completing the Washington Aqueduct tunnel;

On No. 154: Regulating telephone charges in the District of Columbia;

On Nos. 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 193, 194, and 195: Relating to appropriations for charities in the District of Columbia; and

On No. 201: Requiring that not exceeding $300,000 of the surplus revenues of the District of Columbia be applied in payment of the water debt of the District.

The Senate, by its amendments, added to the bill $1,866,179.03. Of this sum, under the terms of the conference report, the Senate will recede from $870,960; the House will agree to $446,722.09; and $548,496.94 is involved in the amendments on which the conference committee have been unable to agree.

WILLIAM W. GROUT,
MAHLON PITNEY,
ALEX. M. DOCKERY,
Managers on the part of the House.

Mr. GROUT. Mr. Speaker, I do not propose to enter into any explanation of the work of the conference beyond what is submitted in the statement which has just been read and which deals briefly with every item. While most of the items and the largest part of the sum in controversy has been disposed of, there are still several items, among which are those relating to charities, on which the conferees of the two Houses still disagree.

Mr. Speaker, I move the previous question on the adoption of the report.

The previous question was ordered.

The conference report was adopted.

Mr. GROUT. Now, Mr. Speaker, I move that the House further insist upon its disagreement to the Senate amendments and agree to a further conference.

The motion was agreed to; and the Speaker appointed as conferees on the part of the House Mr. GROUT, Mr. PITNEY, and Mr. DOCKERY.

CONTESTED-ELECTION CASE—MARTIN VS. LOCKHART.

Mr. LOCKHART. Mr. Speaker, when I was broken in upon by the chairman of the Committee on Appropriations with his conference report, I was about to say that in all my experience I have never seen the right of a litigant to have all his pleadings and his whole matter of defense or of complaint, as the case might be, placed before the tribunal which was to try his cause unless there had been such gross neglect on his part as to forbid his receiving consideration; and in the present instance it can not be claimed that there has been any such neglect on our part. About nine days ago the majority report in this case was filed. It was filed without opportunity being given the minority to see the report, so as to ascertain on what matters the majority had based their conclusions. It was understood and agreed that the minority should have a definite time in which to prepare and file their views. Those views were prepared within the agreed time and submitted to the House, and the request was made by the minority that they be allowed to file their views and have them printed. Objection was made by the gentleman from Nebraska [Mr. KEM], who is of the same political faith and order (as they say down in my country) as the contestant in this case. He was appealed to by the majority of the committee to withdraw his objection; that he refused to do, and he has persistently objected up to this hour—for what purpose or reason I do not know, but it has had the effect to prevent the triers of this question from having before them the facts in this case as presented by the opposite sides.

Mr. Speaker, I do not know how it may be in a legislative body. I do not know whether men in such a body abandon their sense of right and justice and those methods which they would pursue in dealing with their fellow-men in their private relations or not. I can not say. I have not had sufficient experience or observation to enable me to judge of that.

But my idea has always been that when men came to try a grave and serious matter such as this is, they desired the opportunity to inform themselves on it in all its aspects and reach their conclusions as just, fair, and honest triers. This House is the sole judge of the qualifications and elections of its own members. It weighs the testimony; it adjudicates the law; and I should think that under such conditions it would want the whole matter before it.

I have twice in my life been a member of a legislative body—once in the house of representatives of my State, and once in its senate. In both those bodies I served on the judiciary committee, and in both on the committee on privileges and elections. In both I made reports in behalf of Republicans who were contesting for seats in those respective bodies. At one time (and I am the only man in North Carolina who ever did it) I filed a report in favor of a colored contestant who was opposed by a dear friend of mine—a classmate who had been with me in school. My life has been spent largely in training at the law; I have known but little else. I have never recognized any other rule than to try to do justice and right. And I want to say another thing. Not an election contest has arisen in my section of the State since I became a member of the bar and down to 1894 (none having occurred in my own county) when I have not been called upon by those who differed with me in politics to go and represent them before the courts and before the legislative tribunal.

A large part of the attack made upon the validity and integrity of my election has been based upon the election law of the State of North Carolina. And I want to pause here to say that a large part of it has been based upon the fact that the law of North Carolina requires at each poll several boxes in which shall be deposited the votes for different candidates. That is not anything new in North Carolina. It can not be said that this was resorted to in order to entrap, inveigle, or defraud illiterate voters. Such has been the practice and the law in North Carolina ever since I was born and long before, and for many years prior to the time when there was a colored voter recognized in that State. I will say that colored voters were always recognized in North Carolina prior to 1835, when by constitutional amendment the right to vote was taken from free negroes. But, sir, at our elections in North Carolina we have always had as many boxes as there were classes of officers to be voted for.

Now, as to the policy of the election law of North Carolina, that is not for this body to determine, if the States have any rights whatever remaining as a sisterhood in this Union; and I think they have. Every State regulates its own elections according to such methods as it deems best; and whatever may be said about this election law, under it in the last election the Democratic party had returned against it by Democratic poll holders and judges of election more than 20,000 majority. That does not look

very much as if there were great frauds and abuses committed in North Carolina by the Democratic party, as some people now pretend and claim to have been the case. There have been men of all political parties elected. There sit now in this House three Populists, three Democrats, and three Republicans returned as elected under the election laws of North Carolina. Whatever may have actuated the legislature in passing this law is not now for this House to inquire. Furthermore, I will state that the last general assembly of North Carolina was largely anti-Democratic; and these laws which have been complained of are now repealed: officers in opposition to the Democracy of the State have charge of the election machinery of the State. This has been all consummated, brought about, and perfected under the laws which gentlemen here denounce.

There has been decided by the courts of our State a somewhat celebrated case, in which the supreme court of North Carolina has passed upon the election law of the State as it existed in 1894. I had the honor to be one of the attorneys in that case asking that the provisions of that law be declared simply directory; and, as a lawyer, I took the ground that some of its provisions were unconstitutional. The parties to that case were a Republican against a Democrat; and I represented the Republican in all the courts. That law according to its very letter was sustained by the judicial tribunals that passed upon it.

Sir, in all this testimony there is not a single instance shown in which the election officers violated or disregarded the provisions of that election law. They construed it as the courts had construed it; they pursued it as the courts had directed they should pursue it. Whatever determination they made under it was according to the law of the State as interpreted by the supreme court of the State, the highest tribunal in the land for the settlement of that matter. If there was any fault in this case it is not the fault of the election officers; and this House should not stand here now to pass upon that law and condemn these honorable men (for most of them I know personally and know them to be honorable men) who conducted this election.

The majority report in this case rests its conclusions upon matters arising in the following precincts in the Sixth Congressional district: Wadesboro, Lilesville, Ansonville, and Lanesboro, in Anson County; Rockingham and Stewartsville, in Richmond County; Maxton, Red Springs, Alfordsville, and Lumberton, in the county of Robeson. Considerable is said in the report about Ansonville precinct. That township was discussed at length by the gentleman who has charge of this case for the contestant. As soon as I knew the facts in that case, as soon as I knew that the election officers had made an honest mistake with reference to 53 votes, I conceded that those votes should be counted for the contestant in this case.

In our State the ballots are printed—printed by the parties themselves. The law regulates how they shall be printed and what they shall contain. The printed ballots of contestant in this case, some way or other, were lost on the morning of the election. The contestant in the case charges their loss to the Democratic officers of election or to some of the Democrats. The testimony wholly disproves any such charge, insinuation, or assertion. They were in the possession of an old man, who was a crazy Populist, and who was so much afraid that somebody would do something to his ballots—for there never was a set of men so suspicious as these people are—he was so fearful that somebody would do something to these ballots that he took them and carried them off himself. That is amply proven in the testimony, and if this body will take the trouble to investigate the record of this case it will be seen. After quarreling about the loss until about noon on the election day the tickets were found about his own clothes and restored, and the people went on voting.

Now, pending their loss, or their seeming loss, or secretion by this old gentleman, somebody wrote ballots for the contestant, and he would write them in this way: "For Congress, Mr. Martin," "For Congress, Charles Martin"; "For Representative in Congress," So and So—in an informal and irregular way; and when the election officers came to count the ballots and found them in that condition (they were plain countrymen holding that election)—finding them in that condition, following out the custom and the regulation of elections in that State, they cast them out and made no return of them. When the proof was brought in showing how it happened, my counsel and myself conceded that these 53 ballots should be counted for the contestant and made no question about them.

Then in Lanesboro precinct or township it seems that there were two voters who were denied the right to vote by the judges of election. In this case two of the judges of election were Democrats and two of them were Republicans. They were Republicans whose character is as good as that of anybody—intelligent men—one of them long time a justice of the peace and a member of the board of commissioners of the county in which I live, and they joined with the other judges in excluding the voters in question from voting. The majority count the vote which I refer to, after first looking into it and showing their reasons, and the minority concede that probably the contestant was entitled to these votes and do not make any controversy about them.

At Wadesboro precinct they take two votes from the contestee—myself—on the ground that one was a minor when he voted and one had not been a resident of the State a sufficient length of time to entitle him to vote under our constitution and laws. The minority of the committee make no controversy about them, but yield that point.

In Lilesville precinct they add 40 votes to the returned vote of the contestant in this case; and I want to read to the House the testimony upon which that finding is made. I can not think that the distinguished gentleman who wrote the report weighed that testimony carefully before he arrived at that conclusion. It is a difficult job, a difficult undertaking to wade through a great mass of testimony printed as this is in book form like that which I hold in my hand. It is a matter of great difficulty. And when one has a predisposition in his mind—I do not mean to make any improper reflection on anybody; I do not do that—but when he has it in his mind that certain things have been done, and when his mind is filled with such an impression it is an easy matter to misconstrue or misinterpret the weight, the scope, or the proper construction of testimony.

Here is the testimony on which he asks these 40 votes, and says he is corroborated by other witnesses to the same extent. So, then, if there is other testimony such as this, it is merely corroborative of this state of fact, and whatever testimony there is corroborative of the same is merely circumstantial.

B. K. Jones is called as a witness for the contestant. He witnessed the count and his testimony is as follows:

B. K. Jones, of lawful age, being by us first duly sworn, deposes and says as follows:

Q. 388. What is your age and place of residence?
A. Thirty-nine years old and reside in Lilesville Township.

And the testimony is that on that day when the polls were closed 10 Democrats and 10 Populists were called in by the officers of election to view the count and see that it was correct. All citizens have the right to attend and see the count; but in order that there might be no charge of unfairness these election officers asked 10 men of the opposing parties, the most intelligent they could get on the other side, to come in and view the count; and these men saw the count, all of them. That did not look very much like anybody was trying to rob anybody at that election. This witness is asked:

"Q. 389. Did you vote at Lilesville precinct, Anson County, at the election held on the 6th day of November, 1894? If so, what ticket did you vote?
"A. Yes; the Populist ticket.
"Q. 390. Were you one of the Populists who were called in to witness the count after the close of the polls that day?
"A. I was.
"Q. 391. Did you see any tickets thrown out of the Congressional box and not counted because they were not in the right boxes?
"A. I did.
"Q. 392. About how many?
"A. I did not count the tickets, and can't be positive; but at least 40, I think."

Now, these could not have been the Congressional tickets. They were tickets for other officers, and were thrown out of the Congressional box because they were not in the proper box. The election law of the State requires a ticket to be put into the proper box and the box to be labeled.

One Mr. Smith, a Republican poll holder for that precinct, says he endeavored by all the means in his power to get the voters to put their tickets in the right boxes there; that the Populists on the outside were trying to control the election and domineer and direct it; and when the voter did get in, and had a Populist ticket, he would refuse to be guided by the advice of the election officers or refuse to be aided by them and would go on and vote in his own way.

These were madmen, and the testimony in this case shows it. All men who have experience and observation and knowledgs of people know how individuals who are not of the very highest order of intelligence, and sometimes those of the highest order of intelligence, suffering under real or supposed wrongs in matters of legislation, as these people have been taught, distrust everybody, lose confidence in every human being, repudiate the integrity and sincerity of their own neighbors, fly away and do the most foolish and the maddest of things. That was the conduct and that was the spirit of these men who were attempting to vote the Populist ticket in that election. If members of this House would take the trouble to read this testimony carefully, and weigh it, as judges, impartially, they would see the mad state of wild riot existing among these people who were following after the Populist banner in the Sixth Congressional district. Why, the gentleman from Nebraska [Mr. STRODE] says that the Republicans of the Sixth Congressional district indorsed the nomination of Mr. Martin, my reverend competitor. The testimony in this case is that this is not so. He has simply misread the testimony.

Mr. R. B. Russell, chairman of the Republican executive committee of that district, said that when Colonel Dockery, the Republican nominee, withdrew from that campaign the executive committee met and refused to indorse the Rev. Mr. Martin.

The Rev. J. S. Settle, a Republican member of that executive committee, swears that the committee met and refused to indorse the candidacy of the Rev. Mr. Martin. Mr. R. B. Russell is to-day the chairman of the Republican executive committee of the Sixth Congressional district. He was then. He has been recently re-elected chairman. He is to-day high in the counsels of his party in that district. I want to read you what he says about this election. He was a delegate in the last State convention from his county. At present, by reelection, he is chairman of the Republican committee of his district. The counsel who appeared before the committee undertook to malign and traduce him, and to say he had sold out to the Democrats, and all that sort of thing. I never had heard of that before. I have never heard of it since, except from that source, and I am prepared to believe that it is unqualifiedly false, for I never knew anything about it or heard of it.

It has been shown to be false in this, that he is still the trusted leader of his party in that district, and he says: "If any considerable number of Republicans in that district voted for contestant, he does not really believe they knew what they were doing." That is his testimony in this case. It is shown through all his testimony that at all these precincts on which this contest is based the Populists took charge of the elections, as opposed to the Democrats, and would place tickets in the hands of these people and send them off to vote, and the proof is that in numerous instances, after they would get away from them, they would throw their tickets down and get others. I want to read from the testimony of one of the witnesses for the contestant in this case.

The gentleman from Nebraska [Mr. STRODE] dwells largely upon Stewartsville Township in Richmond County, where he says a large number of voters were prevented from voting by reason of the defective registration of the voters. I read the following as a sample of the kind of men who were controlling the elections there. This is from the testimony of Mr. John McKinnon, who is an aspirant for Congress in that district on the Populist ticket:

Q. Did you not, in a speech at Rockingham last fall, refer to Senator SHERMAN, of Ohio, substantially, as "Old John Sherman, the greatest thief in the United States"?

A. Yes, sir, I did; and I am still of that opinion.

Q. You have made a great many public speeches on the subject of politics within the last three years?

A. Yes, sir.

Q. Did you not in all of them, or nearly all of them, denounce the Republican party as a great enemy of the people?

A. I denounced both the Republican and Democratic parties as enemies of the people, and styled them as twins.

Q. Did you not denounce the leaders of both the Democratic and Republican parties as conspirators against the liberties and prosperity of the people?

A. I denounced both the old parties as conspiring against the liberties and prosperity of the people, especially against the farming and laboring class.

That man was in charge of the Populist tickets at the town of Laurinburg, in the township of Stewartville, in the county of Richmond. Now, what is the evidence in that case? The contestee introduced no testimony from that precinct. His attorneys did not think it necessary that he should, after the abundant testimony which justified the conduct of the election officers and their returns as adduced by the contestant himself.

I will say, furthermore, that I had but little to do with the taking of testimony in my own behalf, and knew but little about it. That was left entirely to attorneys who directed that matter. I was present at scarcely any time when any testimony was being taken. I was present when two or three witnesses, out of two or three hundred, were examined. Beyond that I had nothing at all to do with it, and did not know what the testimony was until after it was all in, and much of it, not until after it was printed.

The registrar at that precinct pursued the law as he understood it. He is introduced and vouched for by the contestant. All of his witnesses who were asked about the matter at all testify that he is a man of good character. His first experience in elections was when he was appointed by General Canby, the military commander of that department, to hold an election in North Carolina in 1868. He testified that from that time to this he had had more or less to do with every election. He was an intelligent man, with the law before him. If you will take his testimony and read it, you will see that in every instance he endeavored to his utmost to get the electors to register their names in accordance with the law. He made all manner of suggestions to them that would lead them up to the subject and cause them to have the proper answers made on the registration books; but those people would decline his offices. They would bring their coachers and prompters with them, and insist that the registration should be made in accordance with the manner in which they directed it to be made.

What was he to do? The supreme court of North Carolina says that when the registrar reads the headings of the registration books in a manner which is suggestive of the proper answers to be given by the voter that that is a sufficient compliance with the law of the State. This man went further than that. These men refused to register according to his directions, and in their madness, in their foolishness, in their distrust, in their lack of confidence, inspired by men whose language was incendiary, they would not hear to anybody, and refused to register as the law prescribes they should.

When they came to vote they were excluded from voting; these were Republicans largely. There were Republican county candidates running in that county, and Mr. Martin, my honorable competitor, was the candidate for Congress. The testimony of McLaurin is that between 8 and 10 o'clock on the day of the election all the Republicans ceased to vote for Mr. Martin and only voted for the Republican county and legislative tickets; and that of those who were rejected on that day for defective registration 95 per cent of them, at least, did not offer to vote the Martin ticket in that election. There were one hundred and sixty-odd; give him the 5 per cent and it only makes a change of about 9. On what ground do the majority say they ceased to vote? Because the election officers were trying to cheat them.

There is no evidence to sustain that. There is no evidence here to sustain that grave charge against these honorable gentlemen. They are as brave and true men as ever lived, as incapable of wrong or injustice as they may see the right as anybody. The testimony here goes to show that the Populists had well-nigh excited the people of that community who were opposed to the Democracy to a spirit of riot on election day. All the testimony comes from the mouths of witnesses introduced and examined by the contestant. There was such conduct on that day, there were such questions asked on that day, such a manner displayed on that day as would indicate to all reasonable beings that those people who proposed to vote against the Democracy were in a state of high excitement, and unwarrantedly so.

Why, it was said they did it because they had a suspicion that the boxes were being changed. No man testifies that the order of the boxes was changed. A Republican judge of election who was there on that day, an intelligent colored man, and present the whole livelong day, was examined by the contestant, and nowhere does he say, or pretend to say, that the boxes were changed under any circumstances, or that the election officers attempted to prevent the voters from putting their ballots into the right box. Men get impressions sometimes and come to conclusions from general knowledge and suspicion which they have in their minds; but when we come to deal with a serious problem of fact and law just men are not to be guided by them, and voters are not to be permitted to act on unwarranted suspicion, abandon their right, and then come to this House, or any other body, and ask, because they have acted foolishly, that those who have acted sensibly shall be deprived of their right of franchise to the exclusion, the total exclusion, of their ballots.

Now, that is the Stewartsville precinct of Richmond County, where I received 295 votes and Mr. Martin 14. These people did not try to vote for him there; made no honest effort to vote for him. They did not want to vote for him. The testimony of Mr. Russell, chairman of the Republican committee of that district, is true—that these people did not desire to vote for him. They had no views in common. He and those who canvassed for him and thought as he did were the critics of the party and its leaders—that party with whom and with which they had been acting ever since they had been given the right to deposit a ballot.

That is Stewartsville precinct. That is to be thrown out and my defeat compassed, and the seat which I am entitled to under the laws and by the certificate which I hold taken from me and another put in it.

Now, as to the Lumberton district in Robeson County. There the testimony is that there were some irregularities, which I very much regret. The minority do not contend for the votes there which the committee give to Mr. Martin, my competitor. They count for him 111 votes in addition to those which he received. I do not believe he is entitled to them. But, however that may be, they have given them to him, and the minority of the committee do not claim them and grant that they take those 111 votes.

In the Red Springs district, in the county of Robeson, where the returned vote of Mr. Martin was 116 and the returned vote of the contestee, myself, some larger, the committee raised his vote from 116 to 126, adding those additional votes on the testimony of two men who were bystanders. The judges of election made their returns, swore to them, and the returns are changed by the majority of the committee here on the testimony of two bystanders. The testimony of the poll holders, who were examined, is this: That after the returns were made up they read aloud the returns to all the bystanders, these two men being among the number, and there was no objection to the returns when made up. These two men say that they counted the tallies. Who is most likely to make a mistake, these judges of election or these two bystanders? It is quite evident the returns are correct and that the 10 votes should not be added to Mr. Martin's vote.

Then at Alfordsville precinct, where I received 98 votes and Mr.

Martin 44 votes, that vote is entirely excluded by the majority. It is excluded on the ground, as they say, that the ballots were put in the wrong box, that the election officers were guilty of fraud, and that one of the election officers, a Republican, had formerly been convicted of crime, and then the distinguished chairman or acting chairman of this committee comments at some length on that matter.

Now, what is the evidence in respect to that? The testimony is that one voter said that he gave his Congressional ticket and his State ticket to one of the judges of election, who reversed them and put each in the wrong box. He says that the tickets were very much alike and very nearly the same size, though there was some difference, and that they were reversed and put in the wrong boxes. The judge of election says that is not true, that he never did any such thing. Still the honorable committee, or the majority of the committee, find that the testimony of this voter, who may have been mistaken, should overthrow that of an honorable man who had charge of the election and who, if he made the mistake, must have done it fraudulently, while the voter could honestly have been mistaken as to what he thought he saw.

Mr. Speaker, that is not fair trying; that is not righteous trying; that is not just trying. It is not such trying as ought to be had in any tribunal where the facts are sought to be arrived at upon proper testimony and after due consideration. One man, a judge of election, says that he saw two or three tickets put in wrong boxes, but he does not pretend to say that the judges of election put them there. He says that he saw two or three legislative tickets put in a county box, but he does not say a word about the Congressional ticket. This judge of election refused to sign the returns. All the returns were made at once. There were votes for Congressmen, for three judges of the supreme court, for county officers, sheriff, clerk, etc., for two members of the house of representatives of the general assembly, and for a State senator.

Elections for all these officers were being carried on at the same time. This man swears that he refused to sign the returns because the judges of election threw out legislative tickets on the ground that they were not written or printed on white paper, as the law directs. That is true. The law of the State requires that all ballots shall be without device and written or printed upon plain white paper. The judges of election did throw out ballots because they were not on white paper; but that did not apply to any other election for any other officer. It seems difficult for gentlemen in other parts of the country to understand the system of having several boxes to vote in at the same election, and I believe the system does not exist in a great many places, but it has existed in North Carolina time out of mind, since long before there was a Republican party in the State. I remember going to elections when I was not more than 6 years of age, a country boy, and sitting on my father's knee and seeing him put his hat down and spread a bandanna handkerchief over it, and the voters would come up and deposit their ballots.

That is the way that we used to hold elections in North Carolina. The system of having different boxes for the candidates of the different offices has prevailed in our State for a great many years. I will add, however, that since I have been grown I have never seen a box of ballots counted in any election; I go to the polls and vote and then go about my business.

Now, take the case of Alfordsville, that is thrown out. It is improperly thrown out. I have not time to go through with all the testimony, but if you would print the report of the minority of the committee, gentlemen, and read it, I should be better satisfied. If you should take that report and read it carefully and take time to investigate, and should then find the case against me, I should have no complaint to make; but I do not feel, and I shall not feel, that I have been treated right, if this House, without availing itself of the opportunity to investigate the whole case, deprives me of my seat in this body. I shall not feel that I have been treated with the justice or with the consideration which every citizen and every man who holds a seat in this body, or in any other, is entitled to at the hands of his fellows who are to pass upon his claim.

All I ask is fair and just treatment. It is easy to pick out extracts from the testimony. All men do not tell the truth. We know that some men tell falsehoods. But there are certain cardinal doctrines, some subtle and some plain, by which to judge of the testimony of individuals. You try these matters at best under disadvantages and difficulties. You have here a little record, printed in small type; it is irksome to examine, and you are deprived of that great advantage, that great aid in the trial of questions depending upon human testimony, the advantage of seeing the witnesses and having an opportunity to judge by observation of their manner, their frankness, their general bearing, and character.

I would be very glad if the witnesses who have testified on the one side and on the other in this case could be brought before this House to give their testimony orally, so that you might have an opportunity to judge of their trustworthiness by personal observation. I would be glad if that could be done, but of course it is impossible. I do ask the poor boon of having the whole of this case presented to you. I do ask the little privilege of having the report of the minority printed and laid upon your desks, that you may read it and judge of the whole case as presented there. All that I ask is a fair and impartial trial. I would not try a dog in this way. I would not try a dog under this rule. I can not believe that, when this House this morning voted to take up this case for consideration, members understood the circumstances. I do not believe they intended to jeopardize their own good name for fairness by proceeding in such a manner. I do not believe it.

Now, Mr. Speaker, I come back to Wadesboro Township, in Anson County, my home, where some things occurred that I would have preferred had not occurred. I was not present at the election myself, except long enough to vote. As I have before remarked, I go to the poll, deposit my vote, and then go about my business and leave other gentlemen to do the same. I never in my life solicited a vote of any man on election day. I have never solicited a voter. The election at that poll was held in an upper room in the court-house, adjoining the court room. The Populists took charge of the court-house. It seems that during the day a gentleman walked up to a Populist who was keeping a book of some kind and asked to be allowed to see it. The man declined to permit him to see it. They had been friends all their lives and the gentleman said that he did not wish to injure the book, but that he would like to see it. He was treated rudely. He remonstrated, and there was a controversy. The testimony of all the witnesses is that it was over in a minute.

The whole testimony goes to show that some boy went into the court room and threw two or three spoiled eggs. I learned of the fact a few minutes afterwards, when somebody came and told me. The sun was just about down when it happened. I expressed the deepest regret that any such foolishness had been carried on. The election officers knew nothing about it, and the testimony is that it did not affect a single vote.

It is charged here that the court room was darkened. It is true that some of the witnesses have so testified; have testified that the blinds of the court room were closed. But there are other witness, and a multitude of them, who say there is no word of truth in that statement; that the sun had disappeared behind the hills and houses, and dusk was coming on in that closed room. There was not a vote affected; nobody attempted to vote after that time.

The SPEAKER. The gentleman's time has expired.

Mr. STRODE of Nebraska. I would like to ask the gentleman a question.

Mr. PRINCE obtained the floor.

Mr. SULZER. I move that the time of the gentleman from North Carolina [Mr. LOCKHART] be extended.

The SPEAKER. For how long?

Mr. SULZER. For twenty minutes.

The SPEAKER. The gentleman from New York asks unanimous consent that the time of the gentleman from North Carolina be extended for twenty minutes. Is there objection?

Mr. KEM. I object.

Mr. BAILEY. Inasmuch as the gentleman from North Carolina has been speaking in the time which I had yielded to him, I submit to the Chair that he should now be recognized in his own right.

Mr. PRINCE. I do not desire to cut the gentleman off from any right he is entitled to. If the House desires to hear him for the remainder of the time allowed to that side, I have no objection.

Mr. MCMILLIN. The time of the gentleman from North Carolina could be extended, and an equal amount of additional time granted to the other side.

The SPEAKER. How much time does the gentleman from North Carolina desire?

Mr. LOCKHART. I think I shall be through in a very few minutes.

Mr. PRINCE. I have not yielded the floor. I am willing to yield the gentleman ten minutes out of my time.

The SPEAKER. The Chair will state that the gentleman from North Carolina has occupied an hour in addition to the seven minutes yielded to him by the gentleman from Texas.

Mr. BAILEY. Why, Mr. Speaker, there must be some misunderstanding. I could not have consumed more than four or five minutes of the hour to which I was entitled when recognized, and I yielded the entire residue of my time to the gentleman from North Carolina.

The SPEAKER. The gentleman from Texas consumed seven minutes. The remainder of that hour has been consumed by the gentleman from North Carolina, and seven minutes more.

Mr. BAILEY. What I intended to suggest to the Chair was whether, after the gentleman had occupied the time in my right, he was not entitled to recognition in his own right.

Mr. PRINCE. I have no objection to giving more time to the sitting member. I think he ought to have a full hearing upon

the case now before the House. I will grant him fifteen or twenty minutes of my time.

A MEMBER. Make it twenty.

Mr. PRINCE. I yield the gentleman twenty minutes if he desires it. If he does not need it, I should like to use it myself.

Mr. LOCKHART. Mr. Speaker, I will not consume much more time. As I stated in the outset, I did not expect this question to be discussed to-day and I did not have any argument arranged for presentation to the House, thinking that the views of the minority would be printed, and then time would be given hereafter for the hearing of this case. I can not, therefore, present this matter as I had wished. Indeed, I could hardly hope to present it effectively.

In the precinct to which I was just now referring it is not shown that the spoiled eggs were thrown by any voter. Among the men who testified was a colored minister of the gospel who said he was present, and he thought it was some foolish, wild boy, in the back part of the court-house, that dropped those eggs upon the bystanders—Democrats, Republicans, and all. That is immaterial. I only refer to it because it has been alluded to by the gentleman who opened the discussion of this case.

That precinct is not thrown out. The committee does not interfere with that precinct. They do deprive me of 2 votes there for reasons which were satisfactory to themselves and which may be entirely correct, 1 vote being that of a minor, the other that of a man who, it is claimed, had not been a resident of the State long enough to acquire citizenship and entitle him to vote. But that does not affect the result.

I must discuss one more precinct, Mr. Speaker, and I only discuss such as are criticised in the report and are made a part of the views of the majority of the committee. At Maxton precinct, which the committee utterly rejected, the minority find that that ought not to have been done. The testimony in this case shows that the men there who were in charge of the contestant's canvass did all they could to provoke and irritate the election officers in charge of the polls.

The law of the State of North Carolina is that the voter shall deposit his ballot himself, or he may hand his ballot to the judges of election, and they shall take the ballots and deposit them in the proper boxes. That is done in order that the illiterate voter may have his ballot put into the proper box. Generally they see fit to vote for themselves, and in their own way. They are educated to a system of lack of confidence and of distrust, and wrongfully so, in my judgment. Judge Ewart, a distinguished Republican judge in North Carolina, wrote an extensive article a year or two ago on the subject of elections in that State; and he said that in that State the elections were as fair and as honest as they were anywhere in the world. He was once a distinguished member of this House; and is to-day a distinguished member of a court in that State, and a Republican—an ardent Republican. I wish I had the article here, so that I could exhibit it to this House. It is a long, exhaustive document treating of the whole subject, and therein he says that there are as honest elections in North Carolina as anywhere else in the country.

In that precinct (Maxton) men who could read or write, intelligent men, Populists who came to the polls to put in their votes, by their conduct accused the election officers of a design to cheat them out of their right, and out of their votes. They would carry all of their tickets in their hands, offer them to one of the judges of election to deposit in the box, and on being tendered in that manner the judge declined to take them. Under the law, I believe the judge did right; that he had a right to decline to take them under such circumstances. But he said to them, "Hand me your tickets one at a time, and I will take them and put them in the proper boxes." That, however, they declined to do. Is there any excuse for this conduct on their part? Will any man say the judge of election was not entirely right in his request? Was it not pure, unadulterated, unmitigated contrariness on the part of these voters? Was it not a reasonable regulation or requirement on the part of the election officer.

He could not tell how many tickets the man had in his hand. He might have had 10, 12, 14, or more. Coming in that way and acting in that manner, it seemed as if the attempt was to lay the foundation for an accusation against him, and the officer of election, believing that it was an effort on the part of the voter to accuse him of wrongdoing, absolutely refused to receive the ballots except one at a time, as he had a perfect right to do. The boxes were labeled in plain roman letters, that anybody could see, that any man who could read at all could read, and yet these men, intelligent men, some of them, would not deposit their ballots, and attempted to make one of the judges take all of the ballots, as I have just suggested, and deposit them in the boxes for them. The judges of election not only refused to receive the ballots in a bunch that way, but pointed out to voters the various boxes, telling them, "There is the constable's box, there is the box for the sheriff, the box for the legislative officers, the box for the judiciary, State treasurer's box, and so on. There is a box for Congressman; put the tickets in yourself."

Mr. Speaker, there is not a witness introduced from this precinct, in respect to this election and the refusal of the judge of election to receive the ballots in that manner, who could not read or write for himself and deposit his own ballot.

When that precinct was counted every citizen who desired to do so was present and saw the count; and the minority and I say that it is wrong to throw out that box.

Now, at the Rockingham precinct, 103 votes were challenged and refused. The supreme court of the State of North Carolina, as I have already said, have construed the election law; and that decision prescribed the proper course for the voter to pursue when he came to register. There is a copy of the registry book in evidence here and filed with the majority report. There is one man counted for the contestant by the majority of the committee whose name does not appear at all on the register's list. He swore, however, that he offered to vote on election day, and is counted by them; Ben Parker, I think, is the name; and the majority in their report attempt to set up a copy of the registry list as testimony, and yet his name is not on the book at all. This only goes to show, Mr. Speaker, how the most careful men and the most scrutinizing may be misled at times in such matters.

Mr. STRODE of Nebraska. If the gentleman will permit me, is it not a fact that the registrar, who put the list in, says that he is not sure that he has given the names of all whose votes were challenged and rejected? And the list that is published is simply the list that he gave, although, as he said when he looked over it, he might have omitted certain names that were rejected.

Mr. LOCKHART. But this purports to be a copy of the registration book.

Mr. STRODE of Nebraska. That is true; but the registrar pointed out in his testimony that he may have omitted some names.

Mr. LOCKHART. Well, that may be so. I may be mistaken in my view of the matter. I am only taking the testimony that appears of record. I am not infallible, and am as liable to make mistakes as any other man. At all events, this man's name does not appear in the copy of the registry book.

Mr. STRODE of Nebraska. That is correct; the name does not appear.

Mr. WILLIAMS. And yet you vote him for the contestant, notwithstanding that his name does not appear on the registry list?

Mr. STRODE of Nebraska. His testimony is that he was registered and offered to vote, but his vote was rejected, and the registrar says he may have left his name off the list of rejected voters.

Mr. WILLIAMS. And on no stronger testimony, although he is not on the list, and not on the copy of the registration book which is offered here, you propose to count him as a voter?

Mr. LOCKHART. That is a copy of the registration book. The registrar copied from the registration book all those who were introduced there, whose names were upon the registration book, as I understand this matter.

Mr. WILLIAMS. And all who are registered are copied?

Mr. LOCKHART. Yes; all who are registered are copied, as I understand the testimony in this case. The majority report says that a list of them is given from the registration book, and this man is not among them.

Mr. STRODE of Nebraska. Will the gentleman allow me to read just a line or two, to correct this?

Mr. LOCKHART. Yes.

Mr. STRODE of Nebraska. This is the testimony of Mr. W. C. Leak:

> From a recent review of the registration book I find that 433 votes were cast by white men; this I believe to be correct, though I may have made an error in the count, or there may have been an error made in checking the registration book on election day.

Mr. LOCKHART. That is an entirely different matter. It just shows how men, in hurriedly looking over a thing of this sort, may misinterpret the meaning of a whole mass of testimony. The reading of that does not bear the construction which the distinguished gentleman seeks to give it.

Mr. OWENS. It does not indicate that his name has been left off. There might have been an error in the count.

Mr. LOCKHART. It does not bear that construction. But a number of these men were brought up there, and they testified on cross-examination that they voted for Mr. Martin for United States Senator, that they voted for him for governor, and for this, that, and the other thing. The truth is they were picked up, and they were prepared to swear to anything, many of them, and when put to the crucial test of a cross-examination they broke down. But let that go, as it does not change the result.

The minority of the committee figure out, after conceding many things in this matter, that I was elected by 256 majority. I want to call your attention to one other thing. So far as has been disclosed, there was but one precinct thrown out. Charges have been made that in North Carolina whole precincts have been thrown out by election officers and returning boards. So far as

appears here—and this is the truth—there was but one precinct thrown out in my entire Congressional district by election officers, and that was a precinct wherein I had, according to the testimony, 54 majority. The evidence is that I received those 54 votes. The contestant was notified to be present to examine the witnesses. The registrar, the poll holders, the judges of election, were examined about that matter, and testified that I received 54 lawful votes, and a majority of the committee declined to count them for me. They give no reason in the world why they decline to do it, but they leave them out. I suppose it is an inadvertence and that they did not see them at all. That escaped their attention. I can not account for it in any other way. So that is the result of the minority figuring up of this matter.

Gentlemen, this matter has two sides at least, and I should like this House to consider it in that view. I should like this House to consider it carefully and not at haphazard. Majorities of committees can be mistaken. The distinguished gentleman who wrote the report in this case did not hear a word of the argument made before the committee by counsel. When it was voted upon in committee, I doubt if he had ever read a line of the evidence. It has been gone over by him, and he has given his view of the matter.

I think I have represented the matter here in such a way as to show you the state of uncertainty there is about this thing, at least, and that the contestee has some rights as well as other people, and that this House can well afford to take up this matter and consider it impartially, and after a full knowledge of all the facts, as they have not been able to get them here at this time. It is impossible to present the case fully. One man can not do it when he feels circumscribed and bound for want of time. Especially is it difficult for the contestee to do so himself, being a party in interest in the matter.

I have endeavored to present the case as plainly as the time and the circumstances would allow, and as impartially as it could be presented under the circumstances, without undue excitement or feeling, without bitterness or ill feeling toward any human being upon the face of the earth. But if this House should not place this matter in such a condition that they could see for themselves how this is I should feel that I had been treated unfairly, and that judgment had been pronounced upon my cause without full opportunity on the part of the triers to know what they were about.

I am very much obliged to those gentlemen of the House who have done me the honor to listen to the rather incoherent presentation which I have necessarily made of this matter. Whatever may be the result, I am able to stand it as a man and as a citizen. I can go to my people conscious of having done no wrong in connection with this matter. I have not sought the favor of anyone in this respect. Since I have been here I have felt cramped, constrained, fettered with chains, by reason of the fact that title to my seat has been brought in question. I have, I hope, demeaned myself with propriety. I have not gone to the committee seeking this or that favor. I barely know the members of the committee. I have purposely abstained from making more than a bare acquaintance with them. I would not have any human being think I would bow or cringe to power or authority. I stand on my rights and my own, and what I have said is in vindication of myself and of those good people who have honored me with their suffrages and their certificate of a seat in this House. [Applause.]

Mr. PRINCE. Mr. Speaker, I can imagine how my fellow-members here in the House may have some hesitancy as to how they should vote on the pending question. I can appreciate the feeling that some of them may have because, they say, they have only one side of this case before them, namely, the report of the majority of the committee. Whose fault is that? Was it the fault of the majority of the committee? Is not that a committee of this House designated to do the work, namely, the Committee on Elections No. 2, and have not they manfully gone forward to do their work and reported their doings to this House? Have they transgressed their rights in that respect? Have they made a false report to this House? Should they be censured by this House in any way? Not in the least. On the 26th of May the chairman of the committee, who had this case in charge, reported the majority views to this House.

A little early history may be well now in reference to this case, to see whether our colleague, the sitting member, has had fair treatment in the matter. This case was presented to the committee at an early day. We gave to it careful investigation, and when the time for its final disposition came it was unanimously reported to this House. As a court we passed upon it, and, with one accord, unanimously agreed to the report of the majority of the committee that is reported to this House. Gentlemen representing the minority asked for two weeks in which to look up the matter, which privilege we accorded them.

Mr. MAGUIRE. Will the gentleman permit me to ask him a question?

Mr. PRINCE. Certainly.

Mr. MAGUIRE. Was the majority report shown to any member of the committee before it was filed?

Mr. PRINCE. I presume so.

Mr. MAGUIRE. I think not.

Mr. PRINCE. The gentleman from Nebraska can answer that question for himself.

Mr. STRODE of Nebraska. It was.

Mr. PRINCE. He says that it was.

Mr. MAGUIRE. Does he say that it was?

Mr. PRINCE. He says so.

Mr. MAGUIRE. I never heard of it, and I certainly did not see it.

Mr. PRINCE. The report was brought to the gentleman from Texas [Mr. BAILEY], and he was asked if he requested to see it, and he said he did not want to examine it until it was printed.

Mr. BAILEY. The fact is, I did not examine it. The gentleman from Nebraska asked me which I would rather do—examine the report in manuscript or examine it in print, and I replied, "In print."

Mr. PRINCE. But be that as it may——

Mr. LACEY. Will the gentleman allow me to ask him a question?

Mr. PRINCE. Certainly.

Mr. LACEY. Is not the contestant in this case a Populist?

Mr. PRINCE. The contestant in this case is a Populist, indorsed by the Republicans of his district.

Mr. LACEY. Well, the minority report could have been printed, could it not, if it had not been for the objection of one Populist? [Applause.]

Mr. KEM. Mr. Speaker, the gentleman——

Mr. PRINCE. I will say to the gentleman from Iowa that we are members of the American Congress, that as men representing freemen we ought not to vent our spite against a man who is elected to a seat because another man interposes an objection.

Mr. LACEY. Is there not some way in which the minority report can be printed?

Mr. MAGUIRE. The Committee on Rules can do it in fifteen minutes.

Mr. QUIGG. I would like to make a suggestion to the gentleman.

Mr. PRINCE. I yield to the gentleman.

Mr. QUIGG. I quite concede the suggestion that as members of the American Congress we ought not to vent our spite on a gentleman, nor are we to deny a man who is entitled to a seat in this House the right to have his place in it because he is a Populist.

Mr. PRINCE. True.

Mr. QUIGG. But does not the gentleman, as a member of the American Congress, think we ought to see both sides of the case before we decide? [Loud applause.]

Mr. PRINCE. I will say this to the gentleman: You can see, and if you will listen to my argument you will find that you have had an opportunity to see; but gentlemen upon the other side have fixed your eyes so that you can not see.

Mr. QUIGG. I beg pardon.

Mr. PRINCE. Well, wait until I get through.

Mr. QUIGG. I know about my own eyes.

Mr. PRINCE. Have you seen the report?

Mr. QUIGG. I can see both sides when I have a chance.

Mr. PRINCE. Have you seen the minority report?

Mr. QUIGG. No, sir; I have not seen it.

Mr. PRINCE. Did you see the report in the case of Mitchell against Walsh at the time it was presented and objected to by the gentleman from Nebraska [Mr. KEM]?

Mr. QUIGG. Let me answer your question. So far as the case of Mitchell against Walsh is concerned, I was very familiar with the facts myself and did not require to see the minority report.

Mr. PRINCE. Answer my question as frankly as I do yours. Did you see that report?

Mr. QUIGG. No, sir; I did not wish to see it.

Mr. WILLIAMS. Did the gentleman have an opportunity to see it?

Mr. PRINCE. If the gentleman will permit me, I will explain that when Mr. MAGUIRE of California, a member of the minority, asked leave that that be printed, it was objected to by the gentleman from Nebraska [Mr. KEM]. He then, knowing the rights that he possessed in this House, moved that it be referred to the Committee on Printing, which committee brought in a resolution, and it was made a privileged matter and laid before this body. Now, what would have prevented the gentleman from Texas, representing the gentleman from North Carolina, from doing the same thing? Will the gentleman from New York answer?

Mr. QUIGG. I do not care anything at all about the machinery by which the report is brought into the House. I choose to see and read the minority report in this case if I can get it. So far as regards the case the gentleman speaks of, that of Mitchell *vs.* Walsh, I knew something about that case. It was a New York City case, and I have studied it from the beginning. I have read

the reports in each of the cases I have voted upon here where there were two sides to the question, where there was anything else than a formal resolution, and I think we ought to have an opportunity of reading the reports in this case.

Mr. PRINCE. I have no objection so far as that is concerned; but I wish to say to the gentleman that as I understand the matter, being only a new member—and I heard it first from the lips of the Speaker, who does know—under the rules of the House, when the majority report is presented is the proper time to present the views of the minority, and unless they are presented at that time they can be presented only by unanimous consent. Now, here was the report in this case presented on the 26th, and in addition to that the gentleman from Nebraska [Mr. STRODE] had gone to the gentleman from Texas [Mr. BAILEY], previous to submitting the report to the House, and notified him that he was about to do so. Now, why could not the gentleman from Texas have presented his report at the time the majority report was presented?

Mr. BAILEY. I desire to say to the gentleman, because I suppose he wants to know, that the theory upon which the majority and the minority reports are required to be presented at the same time is that the majority report shall be read to the whole committee and approved as the report of the committee. In this case the majority report was never laid before the full committee. The committee never had a session from the day that report was ordered until it was filed. The gentleman from Nebraska had more than two weeks in which to prepare the report, but as he was sick the larger part of that time I acquit him of any intention to delay. I knew he would prepare the report as soon as he could, and he tells me that he had it in his hand when he came to me; so I make no question about that. Neither did I make any question that the usual time and opportunity would be given to the minority to file their views, and when the gentleman from Nebraska came to me and asked me about it he said—I believe I repeat his very words—"Would you prefer to read this in manuscript or after it is printed?" I will ask the gentleman if that is correct?

Mr. STRODE of Nebraska. I think so.

Mr. BAILEY. That was the gentleman's question, and I said I would prefer to see it after it was printed. He replied, "Very well," and sent his report to the Printing Office. No doubt if I had had an opportunity to examine that report at that time, and had done so, I could have prepared a reply, but nobody dreamed but that we would have ample time to prepare and file the views of the minority. In my absence the gentleman from California [Mr. MAGUIRE] very kindly tried to arrive at an agreement with the gentleman from Nebraska [Mr. STRODE]——

Mr. PRINCE. Mr. Speaker, I was willing to yield to the gentleman, but I do not want the gentleman's speech made in my time.

Mr. BAILEY. But since you have attempted to impute some degree of negligence to me, I think you can well afford to give me an opportunity to vindicate myself.

Mr. PRINCE. I will yield for any question which my colleague desires to put or for any statement he desires to make, but I do not want him to make a speech in my time.

Mr. BAILEY. When that understanding was presented by the gentleman from Nebraska we proceeded with the preparation of the report. I had it here on Monday, as it had been agreed that it should be filed that day. On Monday afternoon I had it before me ready to be presented to the House, but the House adjourned on the point of no quorum made by the gentleman from Nebraska [Mr. KEM]. I could not present it at that time, according to the agreement between the gentleman from Nebraska [Mr. STRODE] and the gentleman from California [Mr. MAGUIRE]. On Tuesday I again asked consent to file it and again objection was made. To-day is Thursday.

Mr. PRINCE. Why did you not introduce your resolution on Tuesday, the same as was done in the case of Mitchell against Walsh?

Mr. BAILEY. I asked consent right at the heels of the session, and I will be frank with the gentleman. As the majority report proposed to seat a Populist, if a Populist member undertook to prevent the House from making up the case in the usual way, I thought the Populist party ought to suffer for for it.

Mr. KEM. Will the gentleman from Illinois yield to me to ask the gentleman from Texas a question?

Mr. PRINCE. No, I can not.

Mr. KEM. Mr. Speaker, I have been assailed here and I think I have a right to reply.

Mr. PRINCE. I can not yield. The gentleman has objected to everybody else and now we will object to him.

Now, Mr. Speaker, with reference to this case—going on from where I stopped when I was interrupted—two weeks had come and gone before final action was taken on this matter by the committee. After two weeks had passed, we then determined as to what we would do with this question. Then three weeks more intervened, making in all five weeks, during which it was known how the majority would decide this question. It is true the formal report had not been made, but every member of the committee knew what the determination of the committee was. Then it came to the 26th of May; and you have heard in the shape of a running debate, questions asked and answered, the further history of this report.

Now, as to the report itself, let me say to you, fellow-members of this House, that there has been no election contest presented to Election Committee No. 2 in which it has been so clear as in this case that the contestant should be seated. We have had many cases before us. We have permitted five Democratic contestees to remain in their seats. We have declared one seat vacant. We have seated one Republican. We have turned down a Republican in North Carolina, and told a Democrat to keep his seat. We have told a Populist who knocked at the doors of this House, "You can not come in, but the sitting member, a Democrat, shall remain in the seat."

Have we undertaken to say that because a man was a Populist we would so lower ourselves as men as to say that a man who differed from us in political opinions should not have a seat here? The gentleman from Texas has said to you frankly and fairly, "I say to you that I thought because he was a Populist, and because a Populist had objected, therefore he ought not to be seated in this House." Oh, fellow-members, if such were the reasons why a man should not be seated, would the great Republican party ever have had a member on the floors of this House in the days gone by? We were once a minority party; we were once struggling against the party in power. We were right. I do not believe that the Populists are right or that their doctrine is true, but if the people of any district say at the polls that a man of that party shall represent them, it is our duty as members on this floor, having taken an oath to examine the evidence and the law and decide in accordance with them, to find that he is entitled to a seat. It is our duty to say he shall have the seat. [Applause.]

But objection is made on the ground that the views of the minority are not in print before us. Gentlemen, you have heard the evidence; you have heard the statements of the contestee. He has admitted that there was bribery; he has admitted that 53 votes on which the name of C. H. Martin was written should be counted. He has admitted that in his own home city, where the contestant had received a majority, there in the nighttime when the ballots were being counted and the returns were being prepared, rotten eggs were hurled at freemen who had cast their votes and were exercising their rights.

Mr. LOCKHART. That is a mistake.

Mr. PRINCE. Is that a fair ballot and an honest count—a free, fair election? Is it right that in this country of ours, North or South, East or West, men shall not have the right to cast their ballots and have them counted as cast? Gentlemen say that this right has been accorded to voters in this election. Not at all. Let me read the evidence of what occurred in the contestee's home city. I read from page 165:

Q. 54. What reasons, if any, existed to deter or prevent any elector from voting for Martin for Congress?

A. While we were distributing tickets there was a crowd around the table pushing against each other and against me. Some of them had clubs—

These were Federal officers, I suppose, though the law under which such officials could be appointed has been repealed—

I mean walking sticks (with large ends); some one of the crowd, while pushing against me, emptied a vial of stinking chemicals in my pocket; some parties threw several rotten eggs in the crowd, which fell near the table where we were distributing the Fusion tickets. The poll book in which we were recording the names of those who called for Fusion tickets was taken out of the hands of R. M. Flake, who was keeping a record of those names. The person who took the poll book refused to give it to R. M. Flake until I got up, and reached over, and took the book out of the gentleman's hand. I was then abused, cursed; telling me that he was "not going to hurt the durned old book, durn you." During the time the rotten eggs were being thrown the window blinds were closed, or a portion of the blinds on the west side of court room, so as to make the room dark. During the day I was informed while sitting at the table that I was going to be treated to a coat of tar and feathers if I remained here till night. Mr. J. T. Martin, during the time the rotten eggs were being thrown, proposed to leave the court room, stating that he did not wish to be rotten-egged. So we all left the court-house. Just as we were leaving one man wanted to vote; we took his name; gave him some tickets, but never recorded on the book the candidates voted for. After we got on the street a man told me he wanted to vote our ticket. I told him we had done broke up and left; thought perhaps he might be able to find some tickets up here at the table; so we all went home; don't know anything about how the vote was counted.

A nice procedure, is it not? No wonder the sitting member says he regretted exceedingly that little episode occurred in his home town.

Mr. MAGUIRE. Will the gentleman permit me a question?

Mr. PRINCE. I will.

Mr. MAGUIRE. What effect does the committee find all that had on the election, and what weight do they give to it in determining who was entitled to this seat?

Mr. PRINCE. The committee saw that there was no necessity for straining a point; that there was no necessity for taking advantage of the passions and prejudices of this House by playing

upon them in that way, because the evidence was so overwhelming outside of anything of that kind——

Mr. MAGUIRE. Then that constitutes, we understand, no part of the case on which you ask the House to unseat this man. Why, then, appeal to prejudice by going outside of the case to raise such a question?

Mr. PRINCE. I am undertaking to show in this way the character and conduct of these men who it is stated were so fair and honest in conducting the election.

Mr. MAGUIRE. Is there any evidence that a Democrat ever threw a rotten egg there?

Mr. STRODE of Nebraska. Yes, sir.

Mr. PRINCE. Yes, sir; the record shows it; and the names are given.

Mr. LOCKHART. Will the gentleman allow me a moment? I do not think he wants to misstate this case.

Mr. PRINCE. I yield to the gentleman.

Mr. LOCKHART. There is nothing in the evidence as to who threw the eggs.

Mr. PRINCE. It was done by Democrats.

Mr. LOCKHART. No, sir.

Mr. PRINCE. The record shows it.

Mr. LOCKHART. One man says that the parties who did it were Democrats, but he does not know who did it; and there is nobody, so far as I have been able to find out, who, up to this time, does know who did it. A colored preacher, a very respectable man, says that it was done by some boy in the back part of the court-house.

Mr. PRINCE. Very likely!

Mr. LOCKHART. There is another thing about which I wish to correct the gentleman. When the vote was counted there was present one Perry Robinson, a colored man, who was candidate for constable. He testifies there were Republicans in the room, and that nobody who wished was prevented from going there.

Mr. PRINCE. Well, there is enough in this evidence to make it as clear as the noonday sun that the contestant (though you may be prejudiced against him as a Populist) is entitled to the seat in accordance with the rulings of this House. There is no question about it.

But gentlemen say they want to see the minority report; they want to know something more about the case. I do not believe it is the policy of the Republican party, which is in the majority in this House, to take advantage of any man. I believe it has ever been its policy to see that the rights of every human being shall be properly protected before the law, whether at the polling booth or in the Halls of Congress. We have always adhered to that policy. We have succeeded by it. And the great Grant himself said that so long as certain proceedings and practices were carried on with reference to elections in portions of the country, just so long would it be necessary that there should be Republicans and a Republican party to see that men are accorded their legitimate rights under the law.

Our colleague from North Carolina feels perhaps that he has not been properly treated. It is not the fault of the Committee on Elections. He can not charge it to us. He feels perhaps that the House is going to railroad him out of his seat. We do not want to do that. It is not the disposition of the majority of the committee, and, Mr. Speaker, I am willing here and now to have the minority report read in my own time [applause] to avoid the objection of the gentleman from Nebraska [Mr. KEM], which he saw fit to make, and let it go into the RECORD and be laid on the desk of every member of the House, at his home or here in the House, so that he may read it to-morrow morning; and, after reading the Journal at 11 o'clock, if the House sees fit to pass upon it, I assure the House that there will not be a shadow of a question of doubt in the mind of any man that this contestant is entitled to the seat that is now occupied by the sitting member on this floor.

Mr. HENDERSON. If that is done there will be a good many more men acquainted with the report than if it was printed in the usual way, or if it was read in the hearing of the House.

Mr. PRINCE. Well, I do not know about that. That may be. But I imagine the majority of the House, when a committee of the House in whom they have confidence reports, as this committee has always reported, without any partisan bias or prejudice; a committee whose record is as free from such a charge as this one, and which committee has never in any questions on this floor in the discussions of these cases even used the words "Democrat" or "Republican," except when forced upon them—I think that report must command the respect and the confidence of the House. We have forgotten politics when we come to act as members of this committee. If these political questions arise they are forced upon us by gentlemen in discussing the cases. We have sought to do our duty under our oaths; and in our reports to the House we present the best views and our honest views as we understand the cases which we consider. You will find, gentlemen, if there is a member of this House who wears his conscience on the lapel of his coat, or has any doubt of the committee, you will find the case fully set out in our report; and I have no objection now, if the House desires it, to have the Clerk read the minority views in my own time. And I now offer that time and ask to have it done. [Prolonged applause.]

Mr. HENDERSON. That is business.

Mr. TAYLER. I ask unanimous consent that the views of the minority be printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

Mr. KEM. I object.

The SPEAKER. The gentleman from Nebraska [Mr. KEM] objects. [Laughter.]

Mr. PRINCE. In view of the objection, and believing that the right of a member to a seat on this floor presents a question of higher privilege than the objections of an objector, I ask that it be read in my own time. [Applause.]

Mr. BAILEY. I want to admonish the Clerk that there are certain interlineations that must be followed.

A MEMBER. Read it yourself.

Mr. PRINCE. Let the Clerk read it. I will not attempt to read it. It is enough for me to give the time.

The Clerk read as follows:

Mr. BAILEY, from the Committee on Elections No. 2, submitted the following:

VIEWS OF THE MINORITY.

The undersigned members of Election Committee No. 2, being unable to agree with the majority of the committee, respectfully submit their dissenting views.

The majority of the committee rest their view of the final result and conclusion at which they arrive on the townships or precincts of Wadesboro, Ansonville, Lanesboro, and Lilesville in Anson County, Rockingham and Stewartsville in Richmond County, and Lumberton, Maxton, Red Springs, and Alfordsville in Robeson County.

ANSONVILLE.

The majority of the committee discuss at length the vote in Ansonville Township, and conclude that 53 votes should be added to the originally returned vote of the contestant. That was entirely unnecessary, as contestee in his brief conceded that such should be done.

LANESBORO AND WADESBORO.

The majority add 2 votes to the originally returned vote of contestant at Lanesboro and subtract 2 votes from the originally returned vote of contestee in Wadesboro. These findings the minority will not dissent from.

LILESVILLE.

At this precinct 263 votes were returned for contestee and 103 for contestant. The majority propose to add 40 votes for contestant. The majority base this addition on the following testimony of B. K. Jones, a witness for contestant:

"Q. 390. Were you one of the Populists who were called in to witness the count after the close of the polls that day?

"A. I was.

"Q. 391. Did you see any tickets thrown out of the Congressional box and not counted because they were not in the right boxes?

"A. I did.

"Q. 392. About how many?

"A. I did not count the tickets, and can't be positive, but at least 40, I think."

Examination of this testimony will plainly show that the majority entirely misapprehend the meaning of this testimony. The meaning of this testimony is, that the votes thrown out and not counted from the Congressional box were ballots for candidates other than for Congress. If these ballots had been for either of the competing candidates for Congress they would have been counted, as they were in the Congressional box; that is, the right box. This testimony in no sense warrants the conclusion arrived at by the majority.

The testimony of all the judges of election, Democratic and Republican, and the registrar is that the election was fairly and honestly conducted, and that the voters received such proper aid from the election officers as they requested.

Toney Smith, a Republican judge, testifies that some of the voters disregarded his efforts to direct them in a proper manner, so that whatever votes were in wrong boxes were placed there by the willful neglect of the voters themselves.

W. J. Harris, a witness for contestant, testifies that the election was fair and honest.

It is undisputed that 10 Democrats and 10 Populists were specially called in at the close of the polls to witness the count.

VOTES IN WRONG BOXES.

It has been the law in North Carolina for fifty years to have separate ballot boxes for the different classes of offices voted for. This law has given satisfaction to all parties.

A voter can deposit his own ballot, so that one man can put the same ticket folded for the same candidate in each box. In that case, when the judges count the votes at the close, it may happen that one candidate for Congress has 6 ballots from the same individual, one of his tickets having been placed in each box. It will thus be seen that when a ticket for Congress, for instance, is in the wrong box great injustice will follow if such vote is counted. The absurdity of counting tickets found in the wrong box is plainly illustrated by the evidence in this very case. At Stewartsville precinct, in Richmond County, it is proved that a large number of voters voted the same ticket (the legislative) in all the different boxes. If allowed, that would give the candidates voted for 6 votes from each voter.

ALFORDSVILLE.

The vote of this precinct is rejected from the count by the majority, but from the testimony that action is without reason. Daniel McCallum, J. L. Lassiter, Enoch McCallum, Isaac T. McLean, Malloy McPhail, and J. W. McLean were the only witnesses examined by contestant, and there is not a scintilla of evidence that there was any violence, or intimidation, or any wrong upon the part of the election officers, except that Enoch McCallum, a colored voter, testifies that he gave his Congressional and State treasurer's tickets to R. A. Atkinson, one of the poll holders, and that he put each of them in the wrong box by reversing them. Accuser testifies that the tickets were of about the same appearance. Atkinson positively denies the charge. Daniel McCallum (page 118) testifies that he saw the county ticket placed in

the legislative box two or three times, and he does not pretend to state that such was the fault of any election officer. He was a poll holder.

The testimony of all the witnesses examined in relation to this precinct is that where a voter offered his ballots to a poll holder the latter took them and put them in the boxes: that some of the voters deposited their ballots themselves and did not offer them to the poll holders. The evidence is that all persons who desired to do so were present at the count and viewed it. One witness for contestant stated that there were 29 tickets in the Congressional box that did not belong there, so that at the outside there could not have been more than 29 of contestant's tickets in the wrong boxes, but there being no testimony except as to 1 ballot that any of them were so placed by the fault of the election officers, and that one positively denied, it is apparent that none in wrong boxes should be counted for contestant, and if they should be, then Martin's vote at that precinct would be 73 and Lockhart's 98.

One of the judges of election, McCallum, refused to sign the returns on the alleged ground that the county and legislative tickets were excluded entirely from the returns by the judges of election on the ground that the same were not on white paper. The evidence is that none other than the legislative was excluded on that ground. The witnesses for contestee state that McCallum has repeatedly said that he had no other reason for not signing the returns. He is a Populist.

The returns were signed by the registrar and the other three judges, two of whom were Democrats and the other a Republican, all of whom testify to the fairness and freedom of the election. The majority report attacks the Republican judge, Trussie Taylor, who was once convicted in the State of South Carolina while a resident of the State of North Carolina of interfering with an officer in the discharge of his duties in South Carolina, but he was soon pardoned by the governor of the State, because it was made to appear to the governor that he was guilty of no crime. A number of witnesses testify that he is a man of excellent character, by profession a teacher, and not one testified to the contrary. His conviction and imprisonment were some twelve years before this election, and he has in the meantime been a resident of Robeson County. There is nothing in the record which upon careful consideration warrants the rejection of the returns from this precinct. A number of witnesses, who are uncontradicted, testify that voters came to the polling place with Populist tickets in their hands, and after getting in threw them away and got Democratic tickets and voted them. (See testimony of R. A. Atkinson, pages 202 and 204; V. G. Pleasants, pages 205 and 206; A. L. Bullock, pages 207 and 208.)

RED SPRINGS.

The vote of this precinct, as returned by the officers of election, is 110 for contestant and 143 for contestee. The majority propose to add 16 votes to that returned for contestant on the testimony of Brown, page 108, and Rowland, page 116, who state that they were present when the vote was counted, and that Martin's vote was 126. The vote was counted in the presence of many persons. After the returns were made out the vote was announced in the presence and hearing of the persons present, including Rowland and Brown, and there was no objection or protest from them or anyone else. (Record, page 224, questions 691, 692, 693, and 694.) The judges are men of good character, and it is not disputed. The conduct of the election is shown to have been perfectly fair and honest. A Republican judge had control of the Congressional box, and all of the boxes were fastened down so they could not be moved. The arrangement was such that there could be no mistake about the Congressional box, as it was some 10 feet from the others. The sworn and duly signed returns of the election officers, who, before they sealed up the returns, made known to all bystanders the result of the vote, in order that those who witnessed the count might know the result, should not be overthrown on the testimony of two witnesses who were present, and though they now claim they knew there was a discrepancy in the returns as about to be made and the actual count, said nothing about it. Their conduct shows that if such had been the fact they did not fear to speak out. The openness and fairness of the count, and the method pursued by the election officers in respect to the same, render the testimony of those two men ineffectual to discredit the returns. The circumstances, and the testimony of the election officers examined, render the further discussion of this question unnecessary. For a fuller understanding of the respective contentions of the majority and minority with regard to the remaining points of difference, it is necessery to make some reference to the law of North Carolina under which the election was held. It has been the rule of Congress to follow the laws of the State from which the contest comes.

The constitution of North Carolina, Article VI, section 2, provides that "no person shall be allowed to vote without registration," and the supreme court in the case of Harris *vs.* Scarboro (110 N. C. Rep., 232) holds that "invalid registration is no registration at all."

The legislature of the State, under the authority of the constitution, passed a registration law which provides:

"SEC. 2676. No registration shall be valid unless it specifies, as near as may be, the age, occupation, place of birth, and place of residence of the elector, as well as the township or county from whence the elector has removed, in the event of removal, and the full name by which the voter is known."

This provision in the State law, intended to protect the purity of the ballot box and prevent repeating and colonizing of voters, has been sustained by the supreme court in the case referred to supra.

In the construction of this provision of the law the court declared it to be not only constitutional, but mandatory, and in the able opinion rendered uses the following language:

"If the legislature sees fit to enact a reasonable regulation as to the manner of recording the names of voters, and the information which the voter must impart (in order that persons so inclined may inquire into the truth of his statements), and to pronounce the registration of each particular name invalid unless the elector shall comply with the requirements, it is manifest that the same reason exists for rejecting the ballot of each voter whose registration is not valid as for not counting a whole township not registered at all."

And in the same case the court says:

"Where such migratory characters are compelled to state on oath their ages, occupations, place of birth, place of residence, the township from which they have removed, and the full name by which they are known, they give data which, if upon inquiry it prove to be false, it invites further investigation to ascertain the fraudulent purpose that induced the perjury, and if it be a true history of the movements of the voter, affords the means of verifying or contradicting his statements as to age or disqualification for crime.

"In absence of proof to the contrary it is always presumed that the officer has done his duty. Every citizen is presumed to know the law governing his relations with others, as well as the mandatory rules which prescribe how he may secure the enjoyment of his rights. In the absence of any definite information on the subject, the failure to enter upon the registration books such facts connected with the history of an elector as the statute imperatively requires as a prerequisite to the exercise of the elective franchise must be considered due to the carelessness or inexcusable ignorance of such elector. The presumption can be rebutted only by showing that he offered to comply with the requirements of the statute, and was prevented by the neglect or willful act of the registrar. (McCrary, section 101.)

"We concur with the court below that it was the duty of the elector to make the answers as specific as the statutes require them, and that the registrar, if he read the headings calculated to elicit the requisite answers, certainly did all that the law required of him."

Reason, as well as authority, commend the view taken in the court below that the burden of showing a strict compliance with the law was on the relator instead of requiring the registrar to charge his memory with all that occurred, so as to be able to state whether the elector refused, when asked, or simply neglected to state definitely his places of birth and residence.

The electors of Little River Township who caused the name of the county of their birth to be recorded opposite their names and "Montgomery County" to be entered as their place of residence we think complied with the requirements of the statute; but the registration at Beans Mills precinct was fatally defective in stating the elector's place of birth to be "North Carolina."

The election which we are now considering was held under this law, and we must regard its provisions in deciding this case. It is proved in the record that the county commissioners in every precinct in dispute complied with the law in appointing two judges of election of different politics from the registrar. In some cases the Republicans refused to serve and in such cases it was the duty of the registrar to fill the vacancy. In every case where there were not two Republican judges it was because those originally appointed declined to serve.

ROCKINGHAM.

At this precinct the majority add 70 votes to the returned vote of contestant. While there may be ground of dispute as to all of these, there certainly should be none as to 8 of them, who, under the registration laws of the State, were clearly not entitled to vote.

Ben Parker, who, though examined by contestant, does not appear from the registration list to have been registered at all. See page 94 of record.

Ben Little, Thomas Terry, and Datus Wall, who registered their birthplace as "North Carolina," which is held by the supreme court to be insufficient. Therefore they were not legal voters.

Kit Little stated his residence as "North Carolina," and Samuel Ross stated his birthplace as "South Carolina." These are not such specifications as the law requires, and they are not legal voters.

Austin Leak and George McDonald, according to their testimony, had removed to the township since the election preceding that of 1894, and in registering they failed to give the places from which they removed. So that at the most only 62 votes should be added for contestant.

STEWARTSVILLE.

From this precinct there were returned 295 votes for contestee and 14 votes for contestant. The majority of the committee exclude this entire vote, setting forth their reasons at length. We think this vote should be counted as returned; but as there is some doubt raised as to 3 votes, though it does not distinctly appear that they voted for contestee, we assent to their being deducted from his returned vote.

Only the contestant took testimony at this precinct, and we think that contestee was fully warranted in relying upon the testimony of witnesses of contestant to establish his case, and that the whole of it, taken together and weighed by the rules of evidence, will not sustain the contention of contestant that this precinct should be excluded from the count. There is no evidence of violence or intimidation. There is no evidence that any elector was fraudulently deprived of his vote by the election officers.

The witness W. H. McLaurin was the registrar, and he was vouched for as a man of good character by contestant and his witnesses. The ballots of a number of voters were rejected because in the honest judgment of the judges of election they were not entitled to vote. The majority fix the responsibility for defective registration on the registrar. A careful scrutiny of the testimony discloses the fact that the voters at this precinct had been by their leaders rendered suspicious and distrustful; that they came, prompters with them, when they went to register, and insisted on having their registration made in their own way. The registration book contained columns with headings indicating the character of questions to be asked of the voters by the registrar to elicit the proper answer for entry on the register. The supreme court of North Carolina has declared, in construing the law, that if the registrar read over these headings in the form of an interrogatory to the candidate for registration this was a sufficient compliance with the law, and if the voter did not give the proper answers the fault was his, and if proper answer was not given the person should not be allowed to vote.

The testimony of McLaurin shows that he not only went as far as the court said he should, but used all necessary means to suggest the proper answers to the voters. It is to be noted that the contestant did not introduce the rejected voters to show that they endeavored to register properly, or to contradict the registrar, or to explain their conduct, or to show that they were entitled to vote. It is evident from the testimony of McLaurin that the voters excluded would not follow any suggestions made by the registrar nor permit him to aid them in the answers properly to be given. We can not see that the strictures of the majority on McLaurin and other officers of election are justified by the evidence. It is proven that between 8 and 10 o'clock a. m. on the day of election all the so-called fusion voters ceased to make any effort to vote for Martin, and the reason assigned is wholly untenable, there being only a rumor, entirely unfounded, so far as the testimony discloses, that the boxes were being changed. The Republican judge of election, John McLean, testified for contestant. He was present all day, and he nowhere says that any box was changed, and no one else says so. McLaurin testifies that at least 95 per cent of the rejected voters did not offer to vote or attempt to vote for Martin. So that if 5 per cent of the 168 rejected were counted for contestant, his vote at this precinct would be increased by 9 votes.

At this precinct most of the voters opposing the Democratic ticket were Republicans; and we find that one McKinnon, who was a former Democrat, whose testimony appears in the record, was contestant's active manager at the polls that day. He was an active canvasser before the election, and his testimony shows the character of his harangues, and shows that they were not calculated to inspire the confidence of Republicans in his candidate for Congress—Mr. Martin. Here is a sample of his testimony:

"Q. Did you not, in a speech in Rockingham last fall, refer to Senator SHERMAN of Ohio as 'Old John Sherman, the greatest thief in the United States'?

"A. Yes, sir, I did; and I am still of that opinion.

"Q. You have made a great many public speeches on the subject of politics within the last three years?

"A. Yes.

"Q. Did you not in all of them, or nearly all of them, denounce the Republican party as the great enemy of the people?

"A. I denounced both the Republican and Democratic parties as enemies of the people, and styled them as twins."

And, in answer to another question, said:

"I denounced both the old parties as conspiring against the liberties and prosperity of the people, especially against the farming and laboring classes."

While the officers of election owed the electors the duty of properly conducting the election, the voters owed it to themselves and to the officers to treat the election officers fairly and respectfully, and to make for themselves an honest effort to vote their will. This they did not do at this precinct. If they saw fit to govern their conduct by idle and unfounded rumors and

throw away their votes, it should not be assigned as ground for throwing away the ballots of more than 300 citizens who did their duty, asserted their rights, and gave expression to their will by their ballots. Precincts should not be thrown out except on the clearest evidence of willful neglect or other disregard of obligations by the officers. In this precinct the voters themselves abandoned Martin, the contestant, manifestly for the reason that they were not in sympathy with him, or because they were content to act upon idle and false rumors of misconduct on the part of election officers.

The testimony as to any bribery is confined to three persons who possibly voted for contestee, but this testimony is of a vague and shadowy character. The finding of the majority that bribery was carried on in presence of election officers is not supported by the testimony.

To reject this precinct is not only an injustice to the more than 300 voters whose ballots were properly cast and counted, but as well to the sitting member, who has a right to these votes.

Irregularities in election, unless fraudulent, or so gross as to be equivalent in their effects to fraud, should not vitiate an election. In this instance a careful perusal of the testimony will conclusively show that the voters themselves who did not express themselves by ballot are the authors of their own failure to vote. Honorable men conducted the election, and the witnesses award them the highest character.

So important is this precinct in determining the result in this case that we ask the House to carefully examine all of the testimony relating to it. That it may do so, we here set out in full the testimony of the officers of election introduced and examined by contestant.

Our opinion is that in no view of this case should this precinct be thrown out from the count, nor can more than 3 votes be taken from contestee or more than 9 votes be added to those of contestant.

The following is the testimony referred to:

"W. H. MCLAURIN, being duly sworn, says:

"(The contestee objects to the taking of the deposition of W. H. McLaurin for the reason that he has not had notice of the same in time, form, and manner as provided by law; and for the further reason that if any notice, as provided by law, was originally served on this contestee, and that fact is not admitted, but denied, then there has been a discontinuance of said notice, for the reason that said alleged notice of the taking of the deposition of the said W. H. McLaurin was returnable on the 25th day of February, 1895, and any continuance of the same now claimed to have been made was not entered of record until the present hearing, nor was said alleged continuance made by the express authority of this notary.

"This entry is made at the request of contestee's counsel.)

"Q. What is your name and where do you reside?

"A. William H. McLaurin; Stewartsville Township, Richmond County, N. C.

"Q. What position did you hold in connection with the election held in Stewartsville Township in November, 1894?

"A. I was registrar.

"Q. Who were the poll holders at that election?

"A. John Blue, William R. McEachin, John E. McLean, and John C. Davis.

"Q. How did John Blue come to be a poll holder?

"A. He was appointed by the county commissioners, I think.

"Q. Was he originally appointed or appointed to fill a vacancy, and was not Berry Bryant the original appointee?

"A. I don't recollect whether Bryant was originally appointed or not; we tried to get Bryant to serve, and he would not serve; don't know whether he was appointed and resigned or not.

"Q. You say, 'We tried to get Bryant to serve and he would not.' Who do you mean by 'we'?

"A. Those who selected men to recommend them to the county commissioners for appointment.

"Q. Well, who made these selections and who were selected; were they Democrats?

"A. I can not say. They were Democrats.

"Q. Who were selected?

"A. I don't know; all who were recommended.

"Q. Name those you do recollect.

"A. Randolph McEachin, M. H. McBryde, Rod McRae, Berry Bryant, Mack McKinnon, and A. M. McKinnon; they were all spoken of for poll holders; and John Blue. There may have been others. We tried to recommend men from all parts of the township among the Democrats, and John McLean and Jess Graham, Republicans.

"Q. Do you mean to say that Democrats in Stewartsville Township were actually recommending to the commissioners of Richmond County who they should appoint as the Republican judges of election of the township?

"A. We did not wish to be understood as saying that the commissioners should appoint any particular persons of either party as poll holders. These parties are mentioned as representative men of their parties.

"Q. Please give me a direct answer to the above question.

"(The contestee objects to this question for the reason that the party now on the stand is a witness for the contestant, and being asked by him what he meant by his answer to the previous question, and having stated what he meant, it is not competent for him to enter into a cross-examination of his own witness.)

"A. The Democrats of Stewartsville Township never presumed to select men for the Republican judges of election.

"Q. Did Democrats of Stewartsville Township recommend to the commissioners of Richmond County the appointment of John E. McLean and Jess Graham as Republican judges of election for the township, and did not the commissioners appoint these two men Republican judges of election for the township?

"A. They appointed these men judges of their own selection; they were among a number of men spoken of as competent. There was no formal recommendation of their appointment.

"Q. Was their appointment recommended formally or informally?

"A. Not as I know of; they were simply spoken of as competent representatives of their race.

"Q. Were they the equals in intelligence and education to the Democratic judges of election, and were they not obscure men?

"A. They were not as intelligent as the Democratic judges of election, but they are by no means obscure men. John McLean could read and write before the war, and has been a poll holder and judge of election frequently since the war. Jesse Graham is above the average negro in intelligence, and stands well with both races.

"Q. Did not some Democrats of Stewartsville Township decide or talk that they would approve of the appointment of these two men as judges of election before their appointment?

"(Question objected to by contestee.)

"A. As was said before, these and others were mentioned as representative Republicans, and the Democrats of Stewartsville Township do not wish to be understood as intending to act for the opposing party in the selection of judges.

"Q. How did John C. Davis come to be a poll holder?

"A. Jesse Graham did not present himself at the polls to act as judge of election, and as registrar I appointed John C. Davis to act in his stead.

"Q. What are the politics of Graham and of Davis, and did not the appointment of Davis make three Democratic judges of election and one Republican?

"A. Jesse Graham is a Republican; John C. Davis is a Democrat. There were three Democratic and one Republican poll holders.

"Q. Were you advised to appoint Davis?

"A. I can't say that I was. There were several spoken of as good men by Democrats, Republicans, and Populists.

"Q. What position did you hold in your party during last year?

"A. I acted as chairman of the Democratic executive committee of my township.

"Q. Do you hold any office in your county now?

"A. I am justice of the peace.

"Q. Did Berry Bryant attend the election in Stewartsville Township in November, 1894?

"A. He did.

"Q. Was he present at the polls in any capacity other than a voter?

"A. He was. I asked him to take charge of the selecting of men to keep the door and see that there was no obstruction to the voters in going to or away from the polls.

"Q. Did he not challenge some of the voters who offered to vote?

"A. My recollection is that he challenged quite a number of voters.

"Q. Were not the men who kept the door to the polls, and whom Mr. Bryant was in charge of, marshals or constables?

"A. The mayor of the town appointed a number of special constables or police for the town, and some of them may have been also selected by Mr. Bryant during the day for services about the polls. I do not know that he was in charge of them as a town officer or in any connection with the town.

"Q. Whose officer was Mr. Bryant?

"A. So far as I know he was only acting at my request around the polls.

"Q. Did you appoint him marshal or such like officer?

"A. I asked him to select men to guard the entrance and exit of voters. I don't know how to designate his office, but he was acting for me to keep order around the polls and prevent crowding going in and out.

"(The taking of the deposition of W. H. McLaurin was continued from February 27, 1895, to February 28, 1895, at 9 o'clock a. m., when it was again resumed, both parties being present by attorneys.)

"Q. How many colored voters and how many white voters were challenged at the election held for Stewartsville Township in November, 1894?

"A. I have made a hurried examination of the registration book and find 8 white and 284 colored voters challenged.

"Q. How many of these voters were rejected.

"(Question objected to.)

"A. I find 1 white and 167 colored voters marked rejected.

"Q. How many voters of each color voted?

"A. Two hundred and sixty-five whites are marked voted on the registration book; 41 are not marked as voted or being rejected; 133 colored are marked as voting, and 112 colored are not marked as voting or being rejected.

"Q. Give me the number of each color that are registered to vote.

"A. Three hundred and seven whites and 414 colored.

"Q. How many whites did not vote?

"A. Forty-one not marked voted or rejected.

"Q. Tell me the names of such persons as you recollect or made memoranda of as doing the challenging of voters.

"(Question objected to.)

"A. A. F. Bizzell, M. L. John, K. A. Blue, Walter P. Evans, D. McCormack, Berry Bryant, W. H. Neal, W. R. McEachin, John Blue, Peter McRae, J. P. McRae, Rod McRae, A. L. James, W. D. B. McEachin, Alex. Jones.

"Q. Do you know whether all these gentlemen are Democrats or not, except W. P. Evans?

"A. They are all Democrats. Evans is a Republican.

"Q. What became of the challenge of W. P. Evans, and did he challenge more than one man?

"A. My recollection is that he challenged only Charlie McArthur on residence. Charlie McArthur has lived several years on the farm of John Blue, having his residence there. Evans was called when Charlie offered to vote; he did not sustain his challenge and Charlie voted.

"Q. Did these gentlemen whose names you have called stand in and about the polling place when not actually voting?

"A. They were in calling distance, and when a man was reached whoever challenged him would be called for and they would come into the polling place. They were at different times in the voting place, but I can't say how long they stayed there consecutively.

"Q. Give me the names of each voter who was rejected and the particular entries in his registration, stating first his color?

"A. (As answer see book herewith sent, marked Exhibit A.)

"Q. Did you, as registrar of Stewartsville Township, make any record, memoranda, or entry of the causes on which were based the challenges of the voters you have just named?

"A. Some I did and some I did not.

"Q. State how many of the voters you have named who have registered their occupation as farming or farmer were challenged on account of such registering.

"(Question objected to by contestee's counsel as calling for secondary evidence.)

"A. About 113 so registered were challenged for occupation, and a good many of them for other defective registration.

"(Answer objected to by contestee's counsel.

"After the witness had answered the last question, and after the contestee had entered his objection to the answer, the counsel for contestee suggested to the witness 'does he mean of the number 113 that there were additional causes of challenge,' without the witness having been turned over to him for cross-examination, and when remonstrated with by contestant for speaking to or making suggestions to the witness, says that he knew he did wrong, and was just feeding the contestant out of the same spoon he had been fed out of. This entry made at the dictation of contestant's counsel.

"Counsel for contestee denies the occurrences in every material statement in the above entry made at the dictation of contestant's counsel.)

"Q. Please explain the challenge made to the voter who was challenged for occupation, and who stated his occupation as farming or farmer.

"(Question objected to by contestee's counsel as secondary evidence, except as to those cases which the registrar was called upon to vote as to whether voter's vote should be received or rejected.)

"A. None of the cases challenged as farmer or farming reached me for decision, the judges of election deciding all of them on testimony as to whether he was engaged as a farmer or cropper or worked for wages on a farm. My recollection is that the judges decided that where a man worked his own land, rented land for stipulated price or part of the crop that farmer or farming applied to him, and when he worked for wages on a farm or elsewhere it did not apply to him as a farmer any more than a clerk in a store as a merchant.

"(Answer objected to by contestee's counsel because twice while the witness was making his answer counsel for contestant made suggestions to the witness about his answer.

"After the counsel had made the above objection he laughed; whether at

himself or the time he had consumed is not understood. The above entry made at request of contestant.)

"Q. From what did you give the names stated in Exhibit A?

"(Question objected to by contestee's counsel because there is no evidence that the persons named therein as having been refused the right to vote offered to vote for contestant.)

"A. The registration book of Stewartsville Township.

"Q. Did you give their names and registration as shown by the registration book?

"A. We took them off of the registration book, and I think they are approximately correct. There might have been one or two left off or there might have been one or two not checked.

"(Objected to by contestee's counsel as secondary evidence.)

"Q. Did you give the 167 names mentioned in Exhibit A and their manner of registration to the notary as the same appear on the registration books?

"(Question objected to by contestee because it calls for secondary evidence.)

"A. I did.

"Cross-examination:

"Q. When you were appointed registrar for Stewartsville Township did you open the books for the registration of voters at the time required by law and keep the same open in accordance with the laws of North Carolina?

"A. I did.

"Q. How often since the war have you served as an election officer for your township?

"A. I held the election for the adoption of the Canby constitution by appointment of General Canby and have been either registrar or poll holder, either by appointment of the Republican or Democratic commissioners, in half or two-thirds of the elections held since.

"Q. You were appointed an officer of the election by a board of Republican county commissioners some years ago, were you not?

"A. I was.

"Q. Did you propound to each man offering for registration at the last election the questions provided by law, and did you record the answers exactly as each voter whose vote was rejected on the day of election gave them to you?

"A. I did.

"Q. Did you attend on the days provided by law for the books to be open for the inspection of the public, and were the books open to the public at the polling place on that day?

"A. I did; and the books were open.

"Q. Did you remain at the polls on election day as the law required you to do?

"A. I did; was only absent while I was eating dinner and absent for necessary purposes.

"Q. How long were you absent for necessary purposes?

"A. About five minutes.

"Q. Did you leave the registration books in the custody or under the supervision of the judges of election while you were so absent?

"A. I did.

"Q. Did you permit anyone to vote whose name was not on the registration book of your own knowledge?

"A. Not that I know of.

"Q. Whenever a voter was challenged did the poll holders or judges hear the evidence on both sides when it was tendered?

"A. They did, and permitted several of the challenged to bring evidence in their behalf before them more than once.

"Q. Challenged cases in which you were called on to vote, did you vote for or against receiving the ballots of challenged parties out of a partisan spirit, regardless of the law, or did you decide each case presented on the merits as you understood the law of North Carolina to be?

"A. I decided all cases of registration as I understood the law, without regard to the effect upon parties or individuals; the only case that reached me for decision on challenges on the day of election was a Republican; I decided in his favor and he voted.

"Q. Did all of the Republicans and Populists who voted in Stewartsville Township vote for Charles H. Martin for Congress, or did some of them vote the county and legislative ticket alternately in all of the boxes?

"A. They did not; the larger part of those who voted, voted county or leg islative ticket in every box; a large number of those that was rejected had county and legislative tickets in their hands and not Congressional tickets.

"Q. What per cent of those whose votes were rejected did not offer Congressional tickets; give me your best judgment?

"A. I would say 95 per cent did not offer Martin tickets. Some who were rejected early in the day may have had Martin tickets. After 9 or 10 o'clock the negro voters began voting county and legislative tickets in every box.

"Q. How many white voters were rejected on election day?

"A. One.

"Q. Were not most of the colored men whose votes were rejected illiterate?

"A. They were; but some of the most intelligent ones were also rejected.

"Q. How many of the latter do you suppose there were?

"A. Half a dozen.

"Q. Did you see any guns or whisky about the polls on election day?

"A. I did not see any guns nor did I see any whisky or any man take a drink of whisky about the polls on that day.

"Q. Did you and the judges of election and the officers of the election have any rule that discriminated against any party in the use of the entrances to the polling place?

"A. There were none that I know of.

"Q. Did any of the persons who came in at the back door at any time during the day vote or offer to vote the Republican or Populist ticket?

"A. So far as I know there were very few who voted who did not come in at the front door, nor do I know or believe there was any discrimination against any party which for special reasons wished to enter through the back door.

"(Answer objected to by contestant.)

"Q. Did any colored men vote the Democratic ticket at the last election in Stewartsville Township?

"A. There were quite a number of colored men there who are in the habit of voting the Democratic ticket and who voted it in the last election.

"(Answer objected to by contestant.)

"Q. Did you see any effort to bulldoze or intimidate Republican or Populist voters in your township on the day of election by Democrats?

"A. I did not.

"Q. Was the election not quiet and peaceable?

"A. It was as peaceable, quiet, and good-humored an election as I ever saw in the township.

"Q. Was there sufficient light in the inclosure in which the election was held to plainly see the letters and words upon the ballot boxes?

"A. The light was amply sufficient for all purposes. There was no difficulty in reading the marks on the ballot boxes or the smaller type of the printed tickets.

"Q. Were the boxes marked with roman letters?

"A. They were.

"Q. Was any error in the marking of the Congressional box called to your attention? If so, state when, and whether or not you made the correction suggested.

"A. My attention was called to an omission of some letter in the marking of a box—I don't remember what letter or box—before the voting began. The omission was promptly supplied, and satisfactorily; at least I heard no complaint. It may have been at the Congressional box.

"Q. Was any person refused the right to vote within your knowledge because he owed one of the judges of election 15 cents?

"A. I heard nothing of any debt from anyone in the polling place. If I had I would have overruled such objection and permitted the elector to vote unless otherwise disqualified.

"Q. Was any voter's vote rejected because he was too old and had been voting too long, within your knowledge?

"A. There was not, so far as I know. The judges of election excluded none but for legal cause.

"Q. Do you know the general character of W. R. McEachin and John Blue, who acted as judges of election for Stewartsville Township in the election for 1894? If so, state what it is.

"A. I do. Both of them are men of good character.

"Q. One Jesse W. Graham swore that he presented himself to serve as judge of election for Stewartsville Township in the election for 1894, and in your direct examination you testified that Jesse Graham, one of the judges of election appointed by the county commissioners, failed to appear to serve as a poll holder, and thereupon you appointed John C. Davis in his stead. Please explain this whole transaction.

"A. Jesse W. Graham registered October 9, and was particular to have W put in his name. On the day appointed for the judges of election and registrar to be at the polling place with the books open for inspection he appeared there to act as judge of election, and presented a notice he said was served on him as judge of election. I called his attention to the fact of his registering as Jesse W. Graham, and urged him to return the notice to the sheriff that it might be served on Jess Graham. He stayed around the polls the greater part of the day, perhaps all day, but was not sworn in or recognized as a judge of election. He insisted upon striking the W out of his name, that the notice might apply to him. When asked how he would register again after registering once as Jesse W. Graham, and called his attention to the fact that by registering in any other name than the one in which he was generally known he might endanger his chances of voting at all, he did not insist upon reregistration. On the morning of the election he appeared at the polls to act as judge of election, and said that he did not return the notice of election to the sheriff because he had been advised to hold on to it and act as judge. I did not recognize him as Jesse Graham. The judges of election agreed with me that he was not Jesse Graham, and I appointed John C. Davis poll holder and judge in the place of Jess Graham, who was not present at the opening of the polls. Sometime during the day he came in to vote as Jesse W. Graham. He was rejected on account of registration having given his place of residence as John A. McBryde's.

"Q. Is there a Jesse Graham in Stewartsville Township?

"A. There is; and he voted, as he appears as marked on the registration book; he is a colored man.

"Q. When you refused to recognize Jesse W. Graham as a judge of election, was you honestly of the opinion that he was not the man appointed a judge of election by the board of county commissioners?

"A. I was; and my frequent connection with the elections of the township familiarized me with his being familiarly known as Jesse W. Graham; he was formerly a school-teacher, and frequently acted as school committeeman for his school district, and as magistrate; I have approved vouchers for him as Jesse W. Graham.

"Q. Was John C. Davis, the man whom you appointed in Jesse Graham's place, a discreet person, as required by the law of North Carolina, in your judgment?

"A. He is.

"Redirect examination:

"Q. Will you swear the man who offered himself as Jesse Graham, to act as judge of election, was not the man the commissioners thought of when they made the appointment?

"(Question objected to by contestee's counsel as an improper question for contestant's counsel to ask his own witness.)

"A. I did not know who they thought of in appointing judges of election, and acted only upon the name contained in the notice.

"Q. When registering a voter did you not know, at the time of registration, whether his answers to questions were incomplete in point of law or not?

"(Question objected to as irrelevant and immaterial, and because it calls for witness's opinion on a question of law.)

"A. I thought I did, and frequently would ask questions and make suggestions to get them to complete their answers, especially when they come without prompters to register; some appeared to be suspicious that they were going to be tricked and would stick to their wrong registration; when they came in crowds, with prompters, and showed that they had evidently been drilled, I put down what they said, and would even permit those coaching them to suggest to them what to answer.

"Q. When one registered in an incorrect and incomplete way would you tell him he had not made complete answers under the law?

"(Question objected to as irrelevant and immaterial.)

"A. As I said before, when their answers were wrong or incomplete I tried, by questions and suggestions, to get them to complete them without expressing the opinion that the registration was wrong.

"Q. When a voter in registering in answer to the question, 'What is your place of residence,' stated John A. McBryde's, as did Jesse W. Graham, did you not know as a fact that John A. McBryde's was in Stewartsville Township, and notwithstanding such knowledge, register his residence John A. McBryde's, without stating the township you knew John A. McBryde's to be in, and thus leave him incompletely registered?

"(Objected to by contestee.)

"A. I knew that the registration was incomplete in such cases, and invariably explained that place of residence meant a legal division of the country, such as incorporated towns, townships, counties, and States; except when they were with their coachers, several answered John A. McBryde's, Daniel A. Patterson's, Roper's, and other farms, and I would try to get them to tell where those farms were located without success. I did not register for any of them. Frequently they would find out that they were wrong in their answers, and when they would return I would make such corrections as they wished. Some, in giving the place of birth, would say Richmond. I would explain to them that there was a Richmond, Va., Richmond, Ky., Richmond, N. C., and a Richmond County, Ga., Richmond County, Va., Richmond County, N. C., and asked them what Richmond they wished put down, the same as the other localities that were not definite. I knew that John A. McBryde's, Daniel A. Patterson's, Roper's, and other plantations mentioned by voters were in Stewartsville Township; but when they would not say so, I would not put it down.

"Q. Was there a single white man and Democrat rejected for improper registration?

"A. The only white man rejected was for improper registration, and he was a Populist.

"Cross-examination:

"Q. Did you think you had the right under the law to put down as an answer to questions asked the voter when registering anything except his exact final answer?

"(Objected to by contestant.)

"A. I did not; and when several asked me to put down what was right, I told them, whites and blacks, that if I could put down their answers to the different questions as I might know they ought to be, there would be no use to put any of them to the trouble of coming to register, as I would have the same right to do it for all others and thus make the book myself.

"Q. Did you make any discrimination in the manner of asking the white voters and the colored voters the questions which the law required when they were registering?

"A. I did not.

"W. H. McLAURIN.

"JOHN E. McLEAN, being duly sworn, says:

"(The contestee, James A. Lockhart, objects to the taking of said deposition for the reason that he has not had the notice served on him in time and manner as required by law, and waives no right by his appearance and cross-examination of witnesses.)

"Q. What is your name?

"A. John E. McLean.

"Q. How old are you?

"A. About 53.

"Q. What position did you hold at the election held in Stewartsville Township in Richmond County, N. C., in November, 1894?

"A. I was judge of election.

"Q. What box did you have charge of as judge of election?

"A. Township constable's box.

"Q. How did you happen to get charge of that box?

"A. Before the polls were open there was no particular box for anyone, and I taken the county box; did not know anybody had any claim on any box. Mr. Davis came in and said it was his box; he was going to hold it; Mr. John Davis; there was no other box there but what was claimed; and some of the judges told me to take charge of the constable's box; I could not remember which one told me.

"Q. How many judges of election was there?

"A. Four.

"Q. How many of the judges was Republican and how many Democrats?

"A. One Republican and three Democrat.

"Q. Who was the Republican judge of election?

"A. John E. McLean.

"Q. State whether there was regularly nominated candidates for the office of township constable to be voted for at the last election or not.

"A. Not as I know of.

"Q. Was the ballot prepared for the office of township constables as the ballots for other candidates; and state the kind of ballots voted for constables.

"A. No, sir; they were not prepared as the State and county tickets; they were written.

"Q. How was the State and county tickets prepared?

"A. They were printed.

"Q. Do you know where the tickets for the constable's office were written at? If so, state where.

"A. They were written in the room where they were voting.

"Q. When was the constable's tickets written?

"A. On the day of election, 6th day of November, 1894, where we was voting.

"Q. How many men were being voted for for constable?

"A. One.

"Q. State whether he was a Democrat or not.

"A. He was a Democrat.

"Q. State whether there was any cursing by any of the judges of election at the polls on the day of election or not; and if so, who was cursed?

"(The contestee objects to this question for the reason that it is not competent or relevant, and is not responsive to any matter or allegation set forth in the contestant's notice of contest.)

"A. I was cursed; John E. McLean.

"Q. Who cursed you?

"A. Mr. John Davis.

"Q. State whether Mr. John Davis was acting as a judge of election or not and what box he had charge of, if any.

"A. He was judge of election; he had charge of the county box.

"Q. What did he curse you about?

"A. I spoke to him about what I thought was right about the voting.

"Q. State whether any voters offered their tickets to any of the judges of election or not.

"A. Some of them offered them their tickets, and some told them to put them in themselves, and some put them in themselves.

"Q. Was there any persons besides the judges of election and registrar and the voter who was voting around the polls during the day of election?

"A. Yes, sir.

"Q. State how many bystanders there were at the election, what was their politics, and what was their business?

"A. I could not tell exactly how many there were—five or six a great many times. So far as my understanding, they were Democrats. They were looking after the election—the voters as they come in to vote.

"Q. Was any of them marshals?

"A. Yes, sir.

"Q. State how these marshals looked after the voters.

"A. As they come in they would show some how to vote; some they did not.

"Q. What was the politics of those they showed how to vote?

"A. The one that was being showed how to vote was a Democrat.

"Q. What did the marshals do for those who were offering to vote the Republican and Populist tickets? Did they show them how to vote or put them out?

"(Question objected to by the contestee because the form of the question is leading and because it suggests to the witness the kind of an answer which the contestant wishes the witness to make.)

"A. I can't recollect all what was done; they showed some of them; some they did not show.

"Q. Did they put any out?

"A. They did not put anyone particular out. The law was when they could not vote to go right on out; if anyone didn't go they put him out.

"Q. Who appointed these marshals?

"A. I don't know.

"Q. Did you see them appointed or have anything to do with their appointment?

"A. I did not have anything to do with their appointment, nor did not see them appointed.

"Q. Where was the election for Stewartsville Township held?

"A. In the town of Laurinburg, in a brick building called Mrs. Butler's.

"Q. Describe how the building was fixed for the election.

"A. It was a two-story building; it was prepared on the lower story for election.

"Q. State how it was fixed.

"A. Long counter, and the boxes was on the counter; it was walled up in front of the front door. On each side of the wall, just inside of the door, the voters would come in one side and vote and go out the other side.

"Q. What voters came in the front way?

"A. All that wanted to come in, I reckon.

"Q. Did the voters come in from any way except from the front of the house?

"A. Yes, sir.

"Q. Where did they come in at?

"A. They came in the back part of the building.

"Q. How did the voters that came in from the back of the house vote—what ticket?

"A. I don't know, only what they told me.

"Q. State what they told you.

"(Objected to by the contestee for the reason that the evidence proposed by this question is hearsay.)

"A. They told me that they voted the Democratic ticket.

"Q. State whether anyone except Democrats were allowed behind the wall and around the ballot boxes during the election who were not actually voting at the time.

"A. I could not say whether there were or not; I did hear no objection.

"Q. Was there anyone except the Democrats behind the wall at the boxes who was not voting?

"A. Not as I can remember.

"Cross-examination:

"Q. You were at the polls all the day, were you not?

"A. Yes, sir.

"Q. There was no fighting or broiling at the polls that day?

"A. No, sir.

"Q. Everything passed off, did it not, in a peaceful, lawful, and orderly manner?

"A. Except a few cross words me and Mr. Davis had.

"Q. The few word that passed between you and Mr. Davis was just before the polls opened, was it not?

"A. Good while after the polls opened; way along about 10 o'clock.

"Q. Did you see the other judges of election cast their ballots?

"A. I think I did; I think me and Mr. Randolph voted together.

"Q. Did you examine the ballots that the other judges of election cast to see what tickets they voted?

"A. I did not examine the ballots, but I saw the tickets they voted, Democratic tickets, on the table.

"Q. Did you examine all the tickets on the table?

"A. I did not examine all, but I examined some of them.

"Q. If you did not examine the ballots which the other judges of election placed in the box, and also all the ballots on the boxes, please explain how you can swear that the other judges voted the Democratic ticket?

"A. I examined the tickets on the table and saw nothing but Democratic tickets.

"Q. State how many constable's tickets you saw written?

"A. I could not tell how many.

"Q. State whether or not you saw the candidate for constable vote; and if so, what time of day did he vote?

"A. I don't recollect what time.

"Q. Will you swear he did vote that day?

"A. I can't recollect.

"Q. State whether or not you had any talk with that candidate for constable, before the election or since the election. as to whether or not he was a Democrat; and if so, tell the time and place.

"A. I never had any questions with him as to what was his politics.

"Q. How, then, can you swear that he was a Democrat?

"A. I did not swear that he was a Democrat.

"Q. Will you swear that the judges of election did not permit any person in the voting place except Democrats?

"A. No, sir.

"Q. Is it not a fact that during the day and while the voting was going on that the judges of election permitted various voters, irrespective of their political opinions, to be in the voting place while the voting was going on?

"A. Yes, sir.

"Q. After the polls had been closed were not the ballots counted out in the full presence and view of Populists, Republicans, and Democrats?

"A. Yes, sir.

"Q. Do you recollect about a month ago having a conversation with Mr. Randolph McEachin in front of Henry McNair's butcher shop, and did you not state to him that so far as you saw that election was fairly and honestly conducted under the law?

"A. I did not state it that way. I can explain it; he told me—he asked me did I recollect Mr. Dan Patterson bringing up a man to be voted; I told him I did; and the judges of election agreed by their own judgment that he was not a qualified voter, and he did not vote; furthermore, I told him under the law a great many could have voted had they registered right.

"Q. When a man came in to vote, I ask you if the matter was not proceeded with in this way—if he was challenged the judges of election passed upon the challenge, and if it was decided by a majority of them that he was not entitled to vote, he was politely requested to pass out?

"A. They told him to go out.

"Q. Please give the name of any marshal who stood at the polls and showed people how to vote.

"A. I can explain to best of my judgment on that: Mr. Walter McEachin, Mr. John McEachin, and Mr. Copeland, and Mr. Beasley; that was all I can recollect.

"Q. How many voters did you see those four gentlemen show where to place their ballots?

"A. I don't know; never kept an account of them.

"Q. Will you swear that you saw those four gentlemen each direct six men how to vote?

"A. I swear I saw them show more than six how to vote.

"Q. How many more?

"A. I could not tell; but was more than six.

"Q. Did you see any person while the voting was going on refuse information from those four gentlemen in reference to the proper box in which their ballots should be deposited?

"A. I did not.

"Q. You did not see any effort on the part of any person to intimidate or bulldoze?

"A. I did not.

"Q. You did not make any effort, did you, to hold any other box except the county box?

"A. No, sir.

"Q. Will you be kind enough to tell me the names of all the parties for whom you voted in the last election now under discussion?
"A. I can't recollect all their names.
"Q. Give them as near as you can recollect.
"A. Mr. Sheriff Smith, Zack Long, Mr. Dockery; I can't exactly recollect any more; I did not vote a full ticket.
"Q. If I understand you right, John, you voted your own party ticket for the legislature and county officers and did not care anything about the balance?
"A. I didn't say it.
"Q. What ticket did you vote except your county and legislative ticket?
"A. Don't recollect.

"Redirect examination:

"Q. Did you see behind the wall, where the ballot boxes were, Mr. W. H. Cox, M. L. John, Rod McRae, J. C. Ray, Kendall, J. P. McRae, A. F. Bizzell, Berry Bryant, Key Ritch, Archie Roper, Jno. D. Jones, on the day of election?
"(Question objected to by contestee for the reason that the contestant in his direct examination covered the same ground as that indicated by this question, and for the further reason that this question is not necessary or proper in response to any matter developed upon the cross-examination.)
"A. Yes, sir.
"Q. State as near as you can what they were doing.
"A. Mr. W. H. Cox was doing nothing but setting there and challenged one man; M. L. John wasn't doing anything there, but he written some of the tickets for Mr. Ray; Rod McRae was not doing anything but standing in there; J. C. Ray, I can't remember anything he was doing; Kendall was sort of a guard some of the time; did not see J. P. McRae do anything; sometimes A. F. Bizzell would be challenging the voters; Berry Bryant, I don't remember what he was doing; don't remember anything Key Ritch was doing; Archie Roper was there; don't remember anything he was doing; Jno. D. Jones challenged one or two; I don't recollect how many.
"Q. Do you know who was mayor of town of Laurinburg time of election?
"A. My recollection Mr. Fields was.
"Q. Do you know who was constable?
"A. Mr. Beasley was constable.
"Q. What was done with the ballots after they were counted?
"A. They were thrown down on the floor.

"Cross-examined:

"Q. Did you not see Mr. Rod McRae and Mr. M. L. John acting as clerk for the election at different times during the day?
"A. They may; don't recollect now.
"Q. Did you not also see Mr. Jno. D. Shaw, jr., attorney for the contestant, Martin, in the polling place on election day for some time after he had cast his ballot?
"A. If he come back after he voted, I don't remember.
"Q. Will you swear that he left as soon as he cast his ballot?
"A. I think he did, as far as my recollection; I think he did.
"Q. State what your politics are, and state if you can read and write.
"A. My politics are Republican, and I can read and write.

"JOHN E. McLEAN."

MAXTON.

At this precinct 15 votes were returned for contestant and 160 votes for contestee.

The majority reject this whole precinct. We can not agree that this course is proper. It is plain from the testimony that the Populists at this precinct were captious, unreasonable, and offensive in their dealings with the election officers. All of the ballot boxes were plainly labeled, so that anyone who could spell in large Roman letters was able to deposit his ballot for himself. Contestant's witnesses, every one of whom could read and write, testify that they offered their ballots to the election officers, who refused to take them, but told the voters to place them in the boxes themselves; and instead of doing so, the voters threw down their ballots and did not vote at all. The election officers swear that the voters offered them a bundle of ballots, and the officers asked them to pass in one at a time and they would put them in the proper boxes as they were handed in. This the voters refused to do, and refused to put the ballots in the boxes themselves. It may be that the judges of election might very properly have taken the ballots offered in bunches, but to require them to be handed in one at a time was not unreasonable, and a voter who lost his vote by his refusal of so reasonable a request was himself at fault and can not complain. It is doubtful if, where there are several ballot boxes and several officers, an offer to hand in all of the ballots to one officer, accompanied by a refusal to offer the ballots one at a time, is a tender of a ballot at all, and we are inclined to think it is not. These voters had the option to place the ballots in the boxes themselves. This they refused to do, and there being no sufficient testimony that the election officers refused to direct them how to vote properly, those who lost their right to do so of their own wrong can not fairly complain. So, on the whole evidence, the vote of this precinct should be counted as returned.

WELCHS CREEK TOWNSHIP, COLUMBUS COUNTY.

The majority make no reference to this precinct, so we assume that the same escaped their attention. The contestee established by unquestioned testimony that there were returned for him 54 legal votes which were not included in the tabulation made by the board of county canvassers of Columbus County, and returned to the board of State canvassers. The testimony is found on pages 187, 188, and 189 of the record. This vote should be added to the returned vote of contestee.

CONCLUSION.

The majority claim that contestant was elected by 330 majority.

We can not concur with this conclusion. We find according to the evidence in the case and the election laws of North Carolina that contestee was fairly elected.

As to Lilesville precinct, there is no ground for adding 40 votes to contestant. The testimony of B. K. Jones, upon whose testimony the change in the vote is proposed, is entirely misapprehended, and to call attention to the error is sufficient to refute it.

As to Rockingham precinct, of the 70 votes added to contestant, 8 are undoubtedly illegal, as shown in the report.

As to Red Springs, the majority add 16 votes to contestant. There is no good reason for this claim.

As to Alfordsville precinct, the majority propose to reject the entire vote of the precinct, where contestee received 54 majority. This claim is not sustained by the evidence.

As to Stewartsville precinct, where contestee received 281 majority, the majority of the committee propose to reject the entire returns. In this report we have given testimony from contestant's witnesses showing that the election officers did their duty, and that the election was fairly conducted. There is no just ground for rejecting the official returns. Nine rejected votes are conceded to contestant and 3 votes are to be deducted from contestee, leaving the majority at this precinct for contestee 269 instead of 281.

As to Maxton precinct, where contestee received 145 majority, it is proposed to reject the returns upon insufficient evidence.

As to Welch's precinct, it is proven that contestee received 54 votes which were not counted for him.

Our conclusions as to these precincts are that the majority has erroneously made changes against contestee of 40 votes at Lilesville, 8 at Rockingham, 16 at Red Springs, 54 at Alfordsville, 269 at Stewartsville, 145 at Maxton, and 54 at Welch's, making 586 votes. This overcomes the majority of 330 claimed for contestant, and shows that contestee was elected by 256 majority.

We therefore recommend the adoption of the following resolution, as a substitute for the resolution reported by the majority:

Resolved, That James A. Lockhart was duly elected a Representative in Congress from the Sixth Congressional district of the State of North Carolina, at the election held on the 6th day of November, 1894, and is entitled to the seat which he now holds as such Representative.

J. W. BAILEY,
JAMES G. MAGUIRE,
J. C. KYLE.

During the reading of the above report the hammer fell.

The SPEAKER. The time of the gentleman has expired.

Mr. LONG was recognized, and yielded to Mr. PRINCE, who directed the continuation of the reading of the report as above.

Mr. PRINCE. It seems to me, Mr. Speaker, that there is no need to discuss this question further. The majority of the committee have presented their report. They have now, through their members, submitted to the House for its inspection the views of the minority, and I desire to state that while we do not expect to have a vote this evening upon the main question, I now move the previous question.

Mr. BAILEY. I suggest to the gentleman to withhold that motion until to-morrow morning, because it can not be acted upon to-night anyway. I think there will be no disposition for further argument in the morning.

I will say frankly to the gentleman that I have in contemplation the withdrawal of the substitute which I offered, with the view to make a motion to recommit this case to the Committee on Elections. I feel confident, of course, that the motion to recommit would be in order, but there is some question about the withdrawal of the substitute after the previous question is ordered; and, upon thinking over the matter, I am not so clear as to what would be the proper parliamentary procedure.

But I think no good purpose would be served by insisting upon the previous question now, and that no delay will ensue from the House just adjourning and leaving the matter as it is.

Mr. PRINCE. I should prefer, Mr. Speaker, to close the matter up so that the House can act upon it.

Mr. BAILEY. It is perfectly apparent that the previous question can not be ordered if I insist.

The SPEAKER. If the previous question is ordered it would still be in order to move to recommit.

Mr. BAILEY. With the understanding that I have the right to withdraw the substitute if I conclude to take that course, I will agree.

Mr. PRINCE. I have no objection so far as I am concerned.

The SPEAKER. If there be no objection the substitute can be withdrawn.

Mr. KEM. I object.

The SPEAKER. But there is objection.

Mr. PRINCE. I renew my motion for the previous question.

Mr. BAILEY. I will serve fair notice on the gentleman that he can not adopt that motion. There is no use of putting the House in that attitude when the gentleman has a conference report over there.

Mr. PRINCE. Very well. I yield to permit the presentation of a conference report.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had passed with amendment the bill (H. R. 3771) for the relief of Stratton H. Benscoter; in which the concurrence of the House was requested.

The message also announced that the Senate had agreed to the amendments of the House of Representatives to the bill (S. 1420) granting an increase of pension to Elizabeth W. Sutherland.

The message also announced that the Senate had passed bills and joint resolutions of the following titles; in which the concurrence of the House was requested:

A bill (S. 3218) granting an increase of pension to Charles D. Hanscom;

A bill (S. 3206) to grant a right of way through the new Fort Bliss Military Reservation to the El Paso and Northeastern Railroad Company;

Joint resolution (S. R. 155) to authorize a scientific investigation of the fur-seal fisheries; and

Joint resolution (S. R. 158) to amend an act to authorize the reassessment of water-main taxes in the District of Columba, and for other purposes.

A further message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 8293) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1896, and for prior years, and for other purposes.

The message also announced that the Senate had passed without amendment the bill (H. R. 8008) defining cheese, and also imposing a tax upon and regulating the manufacture, sale, importation, and exportation of "filled cheese."

SENATE BILLS REFERRED.

Under clause 2 of Rule XXIV, the following Senate bills and joint resolution were taken from the Speaker's table and referred by the Speaker as follows:

A bill (S. 3218) granting an increase of pension to Charles D. Hanscom—to the Committee on Invalid Pensions.

A bill (S. 3206) to grant a right of way through the new Fort Bliss Military Reservation to the El Paso and Northeastern Railroad Company—to the Committee on Military Affairs.

Joint resolution (S. R. 158) to amend an act to authorize the reassessment of water-main taxes in the District of Columbia, and for other purposes—to the Committee on the District of Columbia.

ENROLLED BILLS SIGNED.

Mr. HAGER, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the folfowing titles; when the Speaker signed the same:

A bill (S. 1420) granting an increase of pension to Elizabeth W. Sutherland;

A bill (H. R. 6739) for the relief of John N. Quackenbush, late a commander in the United States Navy; and

A bill (H. R. 7171) authorizing and directing the Secretary of the Navy to donate four condemned cannon and four pyramids of condemned cannon balls to James T. Shields Post, No. 45, Grand Army of the Republic, of Galesburg, Knox County, Ill., and for other purposes.

MRS. WILLIAM LORING SPENCER.

Mr. ANDERSON. Mr. Speaker, I present a conference report.

The Clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 4020) to increase the pension of Mrs. William Loring Spencer, widow of Gen. George E. Spencer, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House, and agree to the same with an amendment as follows: In lieu of the amount proposed to be inserted insert "fifty"; and the House agree to the same.

W. C. ANDERSON,
W. S. KERR,
Managers on the part of the House.
J. H. GALLINGER,
JOHN M. PALMER,
Managers on the part of the Senate.

The question was taken; and the report of the committee of conference was agreed to.

Mr. PRINCE. Mr. Speaker, I now move that the House adjourn.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted to Mr. MCRAE, indefinitely, on account of sickness.

The motion to adjourn was then agreed to; and accordingly (at 5 o'clock and 40 minutes p. m.) the House adjourned.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, a letter from the assistant clerk of the Court of Claims, transmitting a copy of the findings filed by the court in the case of Mrs. Pamelia H. Chamberlain, administratrix of Jacob Crizer, deceased, against The United States, was taken from the Speaker's table, referred to the Committee on War Claims, and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several Calendars therein named, as follows:

Mr. HOOKER, from the Committee on River and Harbors, to which was referred the concurrent resolution of the House (House Con. Res. No. 54) for the examination and survey of Mormon Channel and Calaveras River, in the State of California, with special reference to a dam at Bellota and cut-offs in the San Joaquin River below the city of Stockton, Cal., reported the same without amendment, accompanied by a report (No. 2189); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. ELLIS, from the Committee on the Public Lands, to which was referred House bill No. 9148, reported in lieu thereof a bill (H. R. 9345) to enable certain persons in the State of Mississippi to procure title to public lands, accompanied by a report (No. 2202); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

By Mr. WOOD, from the Committee on Invalid Pensions:

The bill (H. R. 6321) granting an increase of pension to Cynthia J. Capron. (Report No. 2190.)

The bill (H. R. 7995) granting an increase of pension to Jackson Neace, late a member of Company H, Twenty-seventh Regiment Illinois Volunteers, in the war of the rebellion. (Report No. 2215.)

The bill (H. R. 8114) granting a pension to S. V. Cornish. (Report No. 2216.)

The bill (H. R. 8688) granting a pension to Andrew R. Jones. (Report No. 2217.)

By Mr. CROWTHER, from the Committee on Invalid Pensions:

The bill (H. R. 8896) to increase the pension of George W. Walton. (Report No. 2191.)

The bill (H. R. 8029) granting a pension to Mrs. Jane G. Kelly. (Report No. 2192.)

The bill (H. R. 5143) granting a pension to John Black. (Report No. 2193.)

By Mr. KERR, from the Committee on Invalid Pensions:

The bill (H. R. 8172) granting a pension to Matilda Zimmerman. (Report No. 2194.)

The bill (H. R. 5342) granting a pension to Richard M. Johnson. (Report No. 2207.)

By Mr. KIRKPATRICK, from the Committee on Invalid Pensions:

The bill (H. R. 3253) granting a pension to Jane Dykes. (Report No. 2195.)

The bill (H. R. 6964) granting a pension to Zebediah Robertson. (Report No. 2196.)

The bill (H. R. 8753) granting a pension to Henry Gilham. (Report No. 2208.)

The bill (H. R. 8365) granting a pension to Dr. J. B. Thurman. (Report No. 2209.)

The bill (H. R. 8150) granting a pension to James P. Newton. (Report No. 2210.)

The bill (H. R. 7221) granting a pension to Lafayette Taber, of Fort Dodge, Kans. (Report No. 2211.)

The bill (H. R. 8754) granting a pension to Martin M. Flint. (Report No. 2212.)

The bill (S. 1689) entitled "An act granting a pension to John F. Hathaway." (Report No. 2219.)

By Mr. MILES, from the Committee on Invalid Pensions: The bill (H. R. 7055) increasing the pension of Anna G. Valk. (Report No. 2197.)

By Mr. PICKLER, from the Committee on Invalid Pensions:

The bill (H. R. 9343) for the relief of John A. Courtney, reported in lieu of the bill H. R. 4092. (Report No. 2198.)

The bill (H. R. 9317) granting an increase of pension to George W. Bolster. (Report No. 2199.)

The bill (H. R. 9316) granting an increase of pension to Isaac Smouse. (Report No. 2213.)

The bill (H. R. 9163) granting an increase of pension to W. H. Williams. (Report No. 2218.)

By Mr. THOMAS, from the Committee on Invalid Pensions:

The bill (H. R. 3510) granting a pension to Alexander Purdy. (Report No. 2200.)

The bill (H. R. 3861) granting an increase of pension to Bernard Dunn. (Report No. 2201.)

By Mr. COFFIN, from the Committee on Pensions: The bill (H. R. 5995) granting a pension to Henrietta B. Lee, surviving child of Lieut. Daniel Bedinger, a soldier and officer in the Revolutionary war. (Report No. 2203.)

By Mr. BAKER of Kansas, from the Committee on Pensions: The bill (H. R. 8360) granting a pension to C. S. Alvord. (Report No. 2204.)

By Mr. HARDY, from the Committee on Pensions: The bill (H. R. 9048) granting an increase of pension to Lawyer Sugs. (Report No. 2205.)

By Mr. BRUMM, from the Committee on Claims: The bill (H. R. 8070) for the relief of Theodore F. Swayze, administrator de bonis non of the estate of John S. P. Wheeler, deceased. (Report No. 2206.)

By Mr. SULLOWAY, from the Committee on Invalid Pensions: The bill (H. R. 7392) granting a pension to Ann S. Andrews. (Report No. 2214.)

PUBLIC BILLS, MEMORIALS, AND RESOLUTIONS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials of the following titles were introduced, and severally referred as follows:

By Mr. TRACEY: A bill (H. R. 9346) to establish a department

of commerce and manufactures—to the Committee on Interstate and Foreign Commerce.

By Mr. CUMMINGS: A bill (H. R. 9360) regulating the salaries of printers, bookbinders, and other skilled workmen employed in the Government Printing Office—to the Committee on Printing.

By Mr. LESTER: A joint resolution (H. Res. 197) to correct an error in the river and harbor act—to the Committee on Rivers and Harbors.

By Mr. RICHARDSON: A resolution (House Res. No. 404) authorizing the Public Printer to rebind such of the "original messages" of the Presidents as may require it for their preservation—to the Committee on Printing.

By Mr. HENDERSON: A resolution (House Res. No. 405) for printing 5,000 copies of House bill No. 8110, to establish a uniform law on the subject of bankruptcy throughout the United States—to the Committee on Printing.

By Mr. BLUE: A resolution (House Res. No. 406) for appointment of a committee to investigate the Soldiers' Home at Leavenworth, Kans.—to the Committee on Accounts.

By Mr. WILSON of Idaho: A resolution (House Res. No. 407) authorizing the employment of Albert E. Werner to continue as a messenger in the post-office of the House until December 3, 1896—to the Committee on Accounts.

PRIVATE BILLS, ETC.

Under clause 1 of Rule XXII, private bills of the following titles were presented and referred as follows:

By Mr. HAINER of Nebraska: A bill (H. R. 9344) granting an increase of pension to Charles F. Thorp—to the Committee on Invalid Pensions.

By Mr. CURTIS of Kansas: A bill (H. R. 9347) for the relief of James J. McCool—to the Committee on Military Affairs.

By Mr. EVANS: A bill (H. R. 9348) for the relief of James Trigg—to the Committee on War Claims.

By Mr. KERR: A bill (H. R. 9349) granting an honorable discharge to Wilson S. Lafferty—to the Committee on Military Affairs.

By Mr. PICKLER: A bill (H. R. 9350) granting an increase of pension to Patrick H. Smith—to the Committee on Invalid Pensions.

By Mr. RUSSELL of Connecticut: A bill (H. R. 9351) granting a pension to William H. Burbeck—to the Committee on Pensions.

Also, a bill (H. R. 9352) granting a pension to John C. Burbeck—to the Committee on Pensions.

Also, a bill (H. R. 9353) granting a pension to Charlotte A. Burbeck—to the Committee on Pensions.

By Mr. SOUTHARD: A bill (H. R. 9354) to correct the military record of John T. Glascoe, late private Henderson Guards, Second Battalion, District of Columbia Volunteers—to the Committee on Military Affairs.

Also, a bill (H. R. 9355) to correct the military record of John Sauzenbacher, late private Company B, Thirty-seventh Ohio Volunteer Cavalry—to the Committee on Military Affairs.

By Mr. WHEELER: A bill (H. R. 9356) to pension widow and minor children of W. F. Matheny—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9357) to pension John S. Long—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9358) for the relief of Mrs. Mary S. Thompson—to the Committee on Pensions.

Also, a bill (H. R. 9359) to pension Mrs. Rebecca Wood—to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, the following petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. DALZELL: Four petitions of sundry citizens of Pittsburg, Pa., in favor of House bill No. 260, to increase the pay of letter carriers—to the Committee on the Post-Office and Post-Roads.

By Mr. DOWNING: Petition of citizens of Calhoun County, Ill., remonstrating against the improvement on the Mississippi River at Bulls Landing, Calhoun County, Ill.—to the Committee on Rivers and Harbors.

Also, petitions of citizens of Manchester, Pittsfield, and Jacksonville, Ill., asking for favorable action on House bill No. 838, to reduce letter postage to 1 cent per half ounce, and House bill No. 4566, to amend the postal laws relating to second-class matter—to the Committee on the Post-Office and Post-Roads.

By Mr. HILL: Petition of Warren W. Porter, of Fairfield, Conn., in favor of the metric system—to the Committee on Coinage, Weights, and Measures.

By Mr. MILLER of West Virginia (by request): Petition of E. Ensign, James A. Hughes, and others, citizens of Huntington, W. Va., in favor of bill to increase the pay of letter carriers—to the Committee on the Post-Office and Post-Roads.

By Mr. MILLIKEN: Remonstrance of W. B. Richmond and others, against military training in public schools—to the Committee on Education.

By Mr. OTJEN: Petition of F. F. Ladwig and 11 others, of Milwaukee, Wis., in favor of the metric system—to the Committee on Coinage, Weights, and Measures.

By Mr. POOLE: Petition of citizens of Syracuse, N. Y., praying for the passage of House bill No. 260, to increase the pay of letter carriers—to the Committee on the Post-Office and Post-Roads.

By Mr. RICHARDSON: Papers relating to the claim of James C. Parker, of Carroll County, Tenn.—to the Committee on War Claims.

By Mr. SCRANTON: Petition of the Board of Trade of Scranton, Pa., in favor of Senate bill No. 2447, creating a department of commerce and manufactures—to the Committee on Interstate and Foreign Commerce.

By Mr. STEELE: Resolution of typographical union No. 97, of Peru, Ind., praying for Government ownership of telegraph lines—to the Committee on Interstate and Foreign Commerce.

SENATE.

FRIDAY, *June 5, 1896.*

The Senate met at 11 o'clock a. m.

Prayer by the Chaplain, Rev. W. H. MILBURN, D. D.

Mr. PLATT took the chair as Presiding Officer, under the designation made by the unanimous consent of the Senate yesterday.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on motion of Mr. LODGE, and by unanimous consent, the further reading was dispensed with.

COMMISSION ON FORD'S THEATER DISASTER.

Mr. FAULKNER. I ask to be relieved from further service on the Ford's Theater Commission, and that the President of the Senate be authorized to fill the vacancy.

The PRESIDING OFFICER. The Senator from West Virginia asks to be excused from further service on the Ford's Theater Disaster Commission, and that the President of the Senate be authorized to fill the vacancy. Is there objection? The Chair hears none, and it is so ordered.

REPORTS OF COMMITTEES.

Mr. ROACH, from the Committee on Pensions, to whom was referred the bill (S. 3152) granting an increase of pension to Ransom S. Angell, late private of Company G, First Regiment Wisconsin Cavalry, reported it with an amendment, and submitted a report thereon.

Mr. HANSBROUGH, from the Committee on Pensions, to whom was referred the bill (H. R. 3990) granting a pension to Mrs. Eliza G. Pyne, reported it without amendment, and submitted a report thereon.

Mr. PLATT (Mr. PEFFER in the chair). A few days ago a report was made by a majority of the Committee on Patents upon the bill (S. 1453) for the relief of Daniel Drawbaugh. I now present the views of the minority of the committee, and ask that the views of the minority be printed with the majority report.

The PRESIDING OFFICER. Such will be the order, without objection.

RECIPROCITY AND COMMERCIAL TREATIES.

Mr. HALE, from the Committee on Printing, to whom was referred the following concurrent resolution of the House of Representatives, reported it without amendment; and it was considered by unanimous consent, and agreed to:

Resolved by the House of Representatives (the Senate concurring), That there be printed 10,000 copies each of the majority and minority reports of the Committee on Ways and Means concerning reciprocity and commercial treaties, and also 10,000 copies of the hearings before the subcommittee of said Committee on Ways and Means on reciprocity and commercial treaties; 3,000 copies of said reports and hearings for the use of the Senate and 7,000 copies for the use of the House of Representatives.

FUR SEALS IN BERING SEA.

Mr. HALE, from the Committee on Printing, to whom was referred the concurrent resolution submitted by himself on the 29th ultimo, reported it without amendment; and it was considered by unanimous consent, and agreed to, as follows:

Resolved by the Senate (the House of Representatives concurring), That there be printed 1,000 additional copies of Part II, together with its accompanying atlas, of Senate Document No. 137, of the Fifty-fourth Congress, first session, for the use of the United States Fish Commission.

Mr. HALE. Let the accompanying communication be printed as a report.

The PRESIDING OFFICER It will be so ordered.

REPORT ON RUSSIAN FUR-SEAL ISLANDS.

Mr. HALE, from the Committee on Printing, to whom was referred the resolution submitted by himself on the 29th ultimo, reported it without amendment; and it was considered by unanimous consent, and agreed to, as follows:

Resolved, That the Public Printer is hereby authorized and directed to print 2,200 extra copies of the report of Leonhard Stejneger on the Russian fur-seal islands, being article 1 of the Bulletin of the United States Fish Commission for 1896; of the said number of copies 500 shall be for the use of the Senate, 1,000 for the House, 500 for the use of the Treasury Department, and 200 for the use of the Fish Commission.

The PRESIDING OFFICER. The accompanying letter will be printed.

ABNER D. LEWIS.

Mr. BURROWS, from the Committee on Claims, to whom was referred the bill (S. 1286) for the relief of Abner D. Lewis, of Fayette County, Tenn., reported the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That the bill (S. 1286) entitled "For the relief of Abner D. Lewis, of Fayette County, Tenn.," now pending in the Senate, together with all the accompanying papers, be, and the same is hereby, referred to the Court of Claims, in pursuance of the provisions of an act entitled "An act to provide for the bringing of suits against the Government of the United States," approved March 3, 1887. And the said court shall proceed with the same in accordance with the provisions of section 14 of such act, and report to the Senate in accordance therewith.

ESTATE OF JAMES WARR.

Mr. BURROWS, from the Committee on Claims, to whom was referred the bill (S. 22) for the relief of the estate of James Warr, of Fayette County, Tenn., reported the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That the bill (S. 22) entitled "A bill for the relief of estate of James Warr, of Fayette County, Tenn.," now pending in the Senate, together with all the accompanying papers, be, and the same is hereby, referred to the Court of Claims, in pursuance of the provisions of an act entitled "An act to provide for the bringing of suits against the Government of the United States," approved March 3, 1887. And the said court shall proceed with the same in accordance with the provisions of section 14 of such act, and report to the Senate in accordance therewith.

BILLS INTRODUCED.

Mr. WARREN introduced a bill (S. 3259) granting a pension to Mrs. Maria N. Flint; which was read twice by its title, and referred to the Committee on Pensions.

He also introduced a bill (S. 3260) granting an increase of pension to Arthur Mahar; which was read twice by its title, and referred to the Committee on Pensions.

He also introduced a bill (S. 3261) granting a pension to S. J. Brainard; which was read twice by its title, and referred to the Committee on Pensions.

Mr. CHANDLER introduced a bill (S. 3262) granting a pension to John E. Farrell; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Pensions.

MORMON CHANNEL AND CALAVERAS RIVER.

Mr. PERKINS submitted the following concurrent resolution; which was considered by unanimous consent, and agreed to:

Resolved by the Senate (the House of Representatives concurring), That the local United States engineers in the State of California, under the direction of the Chief of Engineers of the United States, be, and they are hereby, authorized and directed to examine and survey Mormon Channel and Calaveras River, in the State of California, with special reference to a dam at Bellota and cut-offs in the San Joaquin River below the city of Stockton, Cal., and to report the result thereof to the Chief of Engineers of the United States as speedily as possible.

AMENDMENT OF THE RULES.

Mr. PROCTOR submitted the following resolution; which was referred to the Committee on Rules:

Resolved, That paragraph 1 of Rule XVI of the standing rules of the Senate be amended by striking out the words, "All general appropriation bills shall be referred to the Committee on Appropriations, except bills making appropriations for rivers and harbors, which shall be referred to the Committee on Commerce," and inserting the following:

The general appropriation bills shall be referred to committees as follows:

To the Committee on Appropriations: The bills for legislative, executive, and judicial expenses, for sundry civil expenses, and for all deficiencies, and for pensions.

The other appropriation bills shall be referred in the first instance as follows:

To the Committee on Agriculture: The bill for the Agricultural Department.

To the Committee on Foreign Relations: The consular and diplomatic bill.

To the Committee on Military Affairs: The bill for the military establishment, including the Military Academy.

To the Committee on Naval Affairs: The bill for the naval establishment.

To the Committee on Post-Offices and Post-Roads: The Post-Office appropriation bill.

To the Committee on Indian Affairs: The bill for Indians and Indian tribes.

To the Committee on Commerce: The bill for rivers and harbors.

To the Committee on Coast Defenses: The fortifications bill.

To the Committee on the District of Columbia: The bill making appropriations for the District.

And when the bills are reported to the Senate from these several committees, they shall be referred with the accompanying report to the Committee on Appropriations for final report.

In appointing committees of conference on appropriation bills which have been considered by two committees, two members of the committee shall be taken from the Committee on Appropriations, and one from the committee which first considered and reported the bill.

NORTHERN PACIFIC RAILROAD COMPANY.

Mr. MITCHELL of Oregon. On the 21st of April I reported from the Judiciary Committee the joint resolution (S. R. 124) to facilitate the reorganization of the Northern Pacific Railroad Company, to secure to actual settlers the right to purchase at a price not exceeding $2.50 per acre the agricultural lands within its grant, and to prohibit said company or any successor company from giving, by consolidation, sale, or other corporate action, control of its railroad to any corporation, company, person, or association of persons owning, operating, or controlling a parallel or competing railroad.

I now desire to submit a proposed amendment to the joint resolution, to come in at the end of the first section. I ask that the amendment may be printed, and I give notice that either this afternoon, if opportunity should present, or to-morrow, I shall ask the Senate to proceed to the consideration of the joint resolution. I ask that the proposed amendment may be read and go into the RECORD.

The PRESIDING OFFICER. The resolution will be received, read, and printed.

The Secretary read as follows:

Amendment intended to be proposed by Mr. MITCHELL of Oregon to the joint resolution (S. R. 124) to facilitate the reorganization of the Northern Pacific Railroad Company, etc.:

Add to the end of the first section the following:

"*And it is further provided*, That in every case of failure of the title to any lands heretofore conveyed or contracted to be sold by said Northern Pacific Railroad Company, any and all rights of such purchaser or his assigns in respect of such land, or in respect of the failure of such title, or in respect to the liability of said Northern Pacific Railroad Company on said contracts for the sale of lands, and all judgments heretofore or hereafter rendered against said Northern Pacific Railroad Company, or against any of the receivers thereof in any court of the United States, or in any State court on account of any such failure of title, or on any covenants of warranty, or on account of any injury to any person or property, shall survive and may be enforced against such successor company with the same force and effect and in the same manner as against the Northern Pacific Railroad Company; and all debts and liabilities which said Northern Pacific Railroad Company or the receivers thereof may have incurred on account of injuries to person and property, and on any covenants of warranty in any contract or deed for the conveyance of lands, shall, when final judgment thereon has been or may hereafter be obtained, be paid by such reorganized company, and may be enforced by execution or other proper final process directly against such reorganized company and its property, and shall be a prior lien thereon; and this act is upon condition that such successor company shall within thirty days from the passage of this act file in the office of the Secretary of the Interior its assent thereto and all the provisions thereof, and on failure to do so this act shall become ipso facto null and void."

Mr. CHANDLER. I should like to make a suggestion in reference to this proposed amendment. Do I understand the Senator from Oregon to state that it is an amendment to a bill that has been reported by a committee?

Mr. MITCHELL of Oregon. It is an amendment to a joint resolution which has been reported by a committee.

Mr. CHANDLER. I suggest to the Senator that the amendment is so important that before it is considered by the Senate it ought to go to some committee of the Senate. There would be objection, doubtless, to its adoption, unless it was considered by a committee. I suggest to the Senator, therefore, to have it referred.

Mr. MITCHELL of Oregon. I will state to the Senator from New Hampshire that I had intended to consult members of the committee, perhaps all of them, in regard to it. I do not think there will be any objection at all to the amendment; but I ask that it be referred to the Committee on the Judiciary.

Mr. CHANDLER. I would prefer to have it go to the committee.

Mr. MITCHELL of Oregon. I ask to have it referred to the Committee on the Judiciary, and we will endeavor to consult in regard to it.

Mr. NELSON. In connection with that amendment, and as bearing on the same matter, I beg leave to offer an amendment, to take the same course. I ask to have it read.

Mr. MITCHELL of Oregon. All right. I desire to explain in a word the two provisions of the amendment proposed by myself.

Mr. JONES of Arkansas. Let this amendment be read.

Mr. MITCHELL of Oregon. It can first be read.

Mr. NELSON. It is an amendment to the same joint resolution.

The PRESIDING OFFICER. The amendment submitted by the Senator from Oregon will be referred to the Judiciary Committee. The amendment submitted by the Senator from Minnesota will be read.

Mr. NELSON. It is to be added at the end of the joint resolution.

The Secretary read as follows:

And provided further, That such successor company, its successors and assigns, shall succeed to all the rights and be subject to all the liabilities created by any and all contracts for the sale of lands heretofore granted by Congress to the Northern Pacific Railroad Company, which said railroad company or its receiver or receivers have made or shall make prior to the acquisition of said lands by said successor company.

Mr. NELSON. I ask that that amendment may have the same reference as the other amendment.

The PRESIDING OFFICER. It will be so referred.

Mr. NELSON. And that it be printed.

The PRESIDING OFFICER. It will be printed.

Mr. MITCHELL of Oregon. The amendment proposed by the Senator from Minnesota is precisely in one respect the amendment offered by myself. It is intended to make the successor company, if organized, liable on the warranties of the old company for the sale of lands where there was a failure of title. In addition to that, my amendment goes one step further and makes the successor company liable for any damages on account of injuries to person or property by the present Northern Pacific Railroad Company after such liability shall have been merged in judgment. I do not think there ought to be any objection from any source to those two amendments.

Mr. CHANDLER. Mr. President, a word by way of suggestion merely. Here are railroad mortgages, and it is expected that there shall be foreclosures under them. The purchasers take under a foreclosure the rights which the original mortgages provide they shall take. They are subjected to the liabilities which the oirginal mortgages provide shall go with the purchase. I very much doubt (I take the liberty of making the suggestion to the Judiciary Committee) whether any law of Congress can either add to or take from those privileges and liabilities; and acts of Congress which undertake to deal with contracts already made in the mortgages should be scrutinized with care before they are passed.

Mr. MITCHELL of Oregon. Just one word, Mr. President, in reply to the Senator from New Hampshire. This new company, or proposed new company, are before Congress asking for certain rights, asking for the grant of a franchise, to be a corporation, and to exercise all the functions of a national corporation, which they can not exercise at all unless in pursuance of an act of Congress. Congress, therefore, has the right in making that grant, I take it, to impose any reasonable restrictions that may be thought prudent and proper. Those proposed restrictions are not very extensive. They do not go to the extent, by any means, of making the new company liable for all contracts and liabilities of the present Northern Pacific Railroad Company. They do propose, however, to make the new company, if we shall give them this grant, responsible on the warranties of the old company for the sale of lands where there has been a failure of title, where they received the money from purchasers and have failed to deliver the lands, and where in such a case judgment has been heretofore obtained or may hereafter be obtained against the company in any court of the United States or any State court. The other provision is simply to make them responsible for any judgment that may be obtained against the old company on account of injuries to person and property. That is all; nothing more.

Mr. CHANDLER. I still say that we can not impose any such liability by act of Congress. It is possible that we may annex conditions to a new grant which may effectuate the purpose which the Senator from Oregon seeks to carry out, but not otherwise.

Mr. MITCHELL of Oregon. I am a good deal surprised at the statement of the Senator from New Hampshire, I confess, because the Senator from New Hampshire is a most excellent lawyer and a very genial, pleasant gentleman besides, as we all know. That he should assert, however, as a lawyer that we have no right to impose upon this new company the conditions proposed by my amendment is simply amazing to me.

Mr. CHANDLER. The Senator misunderstood me.

Mr. MITCHELL of Oregon. Perhaps so. I hope I did.

Mr. CHANDLER. He is very apt to misunderstand. I said that I was not certain but that they could be imposed.

Mr. MITCHELL of Oregon. Oh, I beg pardon. I am glad I did misunderstand the Senator.

Mr. CHANDLER. I accept the compliment the Senator paid me, nevertheless.

Mr. NELSON. I ask just a minute to make a brief explanation in response to the statement of the Senator from New Hampshire.

The PRESIDING OFFICER. There is no question before the Senate, but the Senator from Minnesota, by unanimous consent, will proceed.

Mr. NELSON. There is as much before the Senate as there was when the Senator from Oregon and the Senator from New Hampshire were speaking.

The PRESIDING OFFICER. The Chair perhaps ought to have suggested that the debate was proceeding by unanimous consent.

Mr. NELSON. I desire simply to say that these railroad companies in connection with mortgaging their franchise also mortgaged their lands. The lands are constantly being sold to actual purchasers in little driblets. The deeds and contracts are signed first of all by the president and secretary of the company. Then they are signed (and I have seen many of them) by the trustees of the mortgage. So it becomes a deed on the part of the company and on the part of the owners of the mortgage. The proceeds of these lands have gone to pay the mortgages in part. By this reorganization the old company is extinguished, the new company steps into the shoes of the old, and why should not the purchasers of these lands, who hold contracts and deeds signed, not only by the officers of the company, the president and the secretary, but also by the trustees of the mortgage, be protected? Is it anything more than just both in law, equity, and morals? That is the entire scope of the amendment which I have proposed.

Mr. CHANDLER. I will say to the Senator that they should be protected if Congress can protect them, but can Congress protect them by altering the existing contract written in the mortgage?

Mr. NELSON. They come in here and ask of us to legalize their organization, and coming in as they do with that request, we have a right to impose conditions.

Mr. MITCHELL of Oregon subsequently reported from the Committee on the Judiciary without amendment an amendment this day submitted by him intended to be proposed to the joint resolution (S. R. 124) to facilitate the reorganization of the Northern Pacific Railroad Company, etc., and moved that it be printed; which was agreed to.

CAPTURE OF THE COMPETITOR.

Mr. MORGAN. I ask the Chair to lay before the Senate the resolution which I offered that came over from yesterday.

The PRESIDING OFFICER. If there are no further concurrent or other resolutions, the Chair lays before the Senate a resolution coming over from a former day.

Mr. MORGAN. I ask that it be read.

The Secretary read the resolution submitted by Mr. MORGAN on the 3d instant, as follows:

Resolved, That the Senate, being informed by common rumor, and by testimony taken by the Committee on Foreign Relations, that a vessel of the United States called the *Competitor* has been captured by a Spanish ship of war, and that one or more citizens of the United States were captured on board said vessel, and have been tried and condemned to death by a military tribunal in Cuba, and are now in prison at Habana awaiting the execution of the sentence. And the Senate having instructed said committee to inquire into and make report respecting the rights of said citizens, under the treaties existing between the United States and Spain, and under the laws of nations, the President is requested, in conformity with section 2001 of the Revised Statutes, to inform the Senate whether any such capture has been made by a Spanish war ship, and whether any citizen of the United States has been captured on or near such vessel, and "has been unjustly deprived of his liberty by or under the authority of" the Government of Spain, and whether the President forthwith demanded of Spain the reasons of such imprisonment, and, if such imprisonment is unlawful, and if such sentence to death violates the laws of nations, or the treaties with Spain, whether the President has demanded the release of such citizens.

And that the President communicate to the Senate all the facts and proceedings relative to such capture, sentence, and imprisonment of such citizens, as soon as practicable, in accordance with the statute in such cases made and provided, as follows:

"SEC. 2000. All naturalized citizens of the United States, while in foreign countries, are entitled to and shall receive from the Government the same protection of persons and property which is accorded to native-born citizens.

"SEC. 2001. Whenever it is made known to the President that any citizen of the United States has been unjustly deprived of his liberty, by or under the authority of any foreign government, it shall be the duty of the President forthwith to demand of that government the reasons of such imprisonment; and if it appears to be wrongful and in violation of the rights of American citizenship, the President shall forthwith demand the release of such citizen, and if the release so demanded is unreasonably delayed or refused, the President shall use such means, not amounting to acts of war, as he may think necessary and proper to obtain or effectuate the release; and all the facts and proceedings relative thereto shall, as soon as practicable, be communicated by the President to Congress."

The PRESIDING OFFICER. The question is on agreeing to the resolution.

Mr. MORGAN. Mr. President, the resolution heretofore adopted by the Senate upon which the resolution under consideration is predicated read as follows:

Resolved, That the Committee on Foreign Relations is directed to inquire and report to the Senate what are the rights of the United States, under our treaties with Spain, as to the trial of our citizens arrested in Cuba and now under condemnation and sentenced to death by the Spanish military tribunals for alleged offenses of a political or other character against the Spanish laws or Government, and to report on that subject by bill or otherwise.

This resolution is dormant and can not be executed, properly at least, until the resolution now before the Senate is acted upon by the President and until he answers it, or again refuses to answer it.

That resolution was adopted on the 16th day of May. The *Competitor* incident had occurred, it appears from information that the Committee on Foreign Relations have derived from the sworn testimony of Mr. Lawrence, some days prior to the offering and passage of that resolution.

The Senate, acting under the statute, section 2001, found it to be its duty to get information in some way or other about the

Competitor affair. We have no information on that subject except as this resolution recites, by public rumor and through the testimony which was taken by the subcommittee of the Committee on Foreign Relations. The subcommittee consisted of the Senator from Minnesota [Mr. DAVIS] and myself. Now, we are here for the purpose of executing that mandate of the Senate without the slightest information from the executive department that there has been any seizure of such a ship, or any capture of an American citizen, or any official information or intimation on the subject of that very grave affair from the executive department of the United States.

For the purpose of trying to get hold of information on this subject, the Senate addressed in the usual form a resolution to the President, the third branch of the same resolution from which I have just been reading, passed on the 16th day of May, as follows:

That the President is requested, if it is not incompatible with the public service, to communicate to the Senate copies of any correspondence that has taken place between the Governments of Spain and the United States respecting the said protocol and its bearing or effect upon the trial and condemnation of citizens of the United States who were recently captured on or near the vessel called the *Competitor*, which was seized under Spanish authority in Cuban waters or near to that island.

The second resolution of that series called for a literal copy, both in the Spanish text and in English, of a protocol which was signed on the 12th of January, 1877, by the Hon. Caleb Cushing, our minister to Spain, and Señor Collantes, minister of the Spanish Government to the United States.

By reference to the language of this statute we will find, I think, a good deal that is worthy of consideration in the action that we propose to take and some reasons for its justification that are absolutely insuperable, it seems to me. I will read that statute again:

SEC. 2001. Whenever it is made known to the President that any citizen of the United States has been unjustly deprived of his liberty by or under the authority of any foreign Government, it shall be the duty of the President forthwith to demand of that Government the reasons of such imprisonment; and if it appears to be wrongful and in violation of the rights of American citizenship, the President shall forthwith demand the release of such citizen, and if the release so demanded is unreasonably delayed or refused the President shall use such means, not amounting to acts of war, as he may think necessary and proper to obtain or effectuate the release; and all the facts and proceedings relative thereto shall, as soon as practicable, be communicated by the President to Congress.

It is a custom of Congress, of both Houses, and it is a very proper one, in regard to diplomatic affairs which are pending and are not completed, that the President should be requested to send any such communications as Congress may desire to examine, if he considers it compatible with the public interest to do so. That evidently relates to such matters as are continuing and are incomplete in themselves, to such matters of diplomatic intercourse between ourselves and a foreign country which have not been entirely completed. This is also simply a courtesy extended by Congress to the President of the United States, for the Constitution does not exempt the President in any case whatever from giving information as to the state of the Union or the state of public affairs to the Congress of the United States. In this case the law requires that he shall communicate all the facts and proceedings relative thereto as soon as practicable. But the mandate of the Constitution is a continuing one and operates upon the President of the United States at all times and under all circumstances so as to require of him to lay before the proper tribunal, either the Senate or the Congress, such information as he may consider important in regard to the state of the Union or in regard to any matter which concerns the foreign relation of the United States.

The construction that was placed upon the constitutional privileges of the President received a very early interpretation in our Government in the fact that President Washington was on some occasions present in the Senate by the invitation of the Senate for the purpose of conferring with that body on treaties and other diplomatic matters, and the confirmation of persons who were appointed to office. That was found to be an extremely inconvenient practice, and thereupon the President resorted very properly to the sending in of messages or his appointments and also of having those messages considered in his absence. But any information that the Senate might desire to gain in regard to the competency or qualifications of an appointee, or any information that they might desire to gain in regard to a negotiation that was being conducted, was something that the President, I suppose until a very late day, never thought of withholding from the Senate of the United States. Thereupon the courtesy arose of sending resolutions of inquiry to the Executive couched in the words which I have mentioned, and qualified so that he might have a discretion in sending in such matters as were not required positively by law to be sent into the Senate, such matters as related to pending negotiations between this Government and a foreign Government on any subject that was in hand.

Now, it is perfectly obvious that in respect to the *Competitor* case, if there is such a case (when we get official information about it from the President we will then know officially that there is such a case), and according to the statement made in the sworn testimony of Mr. Lawrence, which I will ask leave to append to my remarks in order that I may not take up too much time of the Senate just now, official information is indispensable in regard to all of those facts which are essential for the guidance of the committee in the execution of this command of the Senate——

Mr. TURPIE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from Indiana?

Mr. TURPIE. With the permission of the honorable Senator, I should like to ask him what is the paper he has requested to have appended to his remarks?

Mr. MORGAN. It is the testimony of Mr. Lawrence, taken before the Committee on Foreign Relations.

Mr. TURPIE. That testimony was taken in confidence, and has only been printed for the use of the committee.

Mr. MORGAN. I have not so understood it.

Mr. TURPIE. The chairman of the committee is here.

Mr. HALE. We can not hear the colloquy between the two Senators upon the other side.

The PRESIDING OFFICER. The Senator from Alabama asked that some paper might be incorporated in his remarks. The Senator from Indiana rose to inquire what the paper is.

Mr. MORGAN. I was a member of the subcommittee, and I was not at all aware that there was any confidence about it. The committee, when it instructed its subcommittee to make this inquiry and administer oaths to the witnesses, or at least to take their testimony, did not impose upon us any qualification of confidence at all. I would be, I think, as reluctant as anybody could be to violate any rule of the committee, and if I misunderstand it now even, I will not ask that the testimony shall be printed. But I had no information until this moment to the effect that it was printed in confidence for the use of the committee. It is without any confidential marks upon it at all.

Mr. SHERMAN. What paper does the Senator refer to?

Mr. MORGAN. It is the testimony of Mr. Lawrence, taken before the subcommittee by the Senator from Minnesota [Mr. DAVIS] and myself about the trial in the *Competitor* case.

Mr. SHERMAN. I do not recall the paper, but I suppose it is some paper which was sent to the Committee on Foreign Relations.

Mr. MORGAN. The Senator can not fail to remember, I suppose, that he appointed the Senator from Minnesota [Mr. DAVIS] and myself a subcommittee to take the testimony of Mr. Lawrence and Mr. Diaz?

Mr. SHERMAN. Oh, yes; that is true.

Mr. MORGAN. Very good. Now, the question is, was that a confidential communication on the part of these witnesses to the subcommittee?

Mr. SHERMAN. I think it would be until the committee acted upon it. So far as I know, I see no objection at all to its being made public, but at the same time I think it ought not to be made public until the committee say so, because it is evidence taken by the committee. I submit it to the judgment of the Senator.

Mr. MORGAN. I will not make it public, then, until the committee say so.

Mr. SHERMAN. I submit it to the judgment of the Senator.

Mr. MORGAN. If the committee want that sort of delay about the matter by any hiding of facts here and their concealment from the country, very well. I prefer to have it done in a different way.

Mr. SHERMAN. I have no objection to its being printed if the Senator from Alabama thinks it ought to be made public.

Mr. DAVIS. That report has not at all been considered confidential. It has gone out to the country and it is as well known as any document reported to this body.

Mr. TURPIE. The Senator is not heard on this side.

The PRESIDING OFFICER. The Senator from Minnesota is not heard.

Mr. DAVIS. There ought to be no objection to its being incorporated in the RECORD.

The PRESIDING OFFICER. The Senator from Alabama asks that the paper which he has mentioned be incorporated in the RECORD. Is there objection? There being none, it will be put in the RECORD as a part of his remarks.

Mr. MORGAN. Now, I wish to comment a little further upon the legal duty and the legal powers of the President of the United States in the matter of communicating to either House of Congress whatever facts are in the possession of the Executive of an official character respecting any matter that we want to inquire into and feel it our duty to inquire into. I have referred to the courtesy that we have extended to the Executive to enable him to withhold from either House, at least from this body, any communication which he thinks might disturb the public tranquillity or might in any wise compromise the Government; but I contend that those transactions which he has the right thus to withhold

are not completed transactions, but they are transactions that are in fieri. It would be improper, and I think the Senate has always recognized that fact, that we should interfere with the diplomatic correspondence between the President and any foreign government upon a matter touching any vital interest or important question while that correspondence was going on. But here is a case which is covered by a statute, and that statute prescribes certain specific duties to the President of the United States in such a case, and the question arises whether the President is bound to obey the law or whether he may escape through some courtesy extended to him by the Senate. That is the question.

Matters of this kind are regarded by the Congress of the United States as extremely important and extremely critical. In the enactment of this law, which required the President to interpose a demand upon a foreign government under the circumstances that exist, as we are informed, in the *Competitor* case, in precisely the same state of circumstances, if it appears that a citizen of the United States has been wrongfully deprived of his liberty in violation of the rights of American citizenship, the President shall forthwith demand the release of such citizen. That does not give him an option to postpone it to some future time or to some convenience on his part. He must do it at once, if he is satisfied that the imprisonment is illegal, and must at once ascertain if it is illegal. The American statute as well as American honor demands that when its citizen is thus imprisoned, contrary to law, in violation of law, the President of the United States shall forthwith demand his release, "and if the release so demanded is unreasonably delayed or refused, the President shall use such means, not amounting to acts of war, as he may think necessary and proper to obtain or effectuate the release."

Why was the qualification "not amounting to acts of war" put into that statute? It is because the President of the United States does not possess the war power except with the consent of Congress, and here is a plain, palpable declaration of restraint upon him in this statute that is in exact conformity to the Constitution of the United States. He can not go out of this Union, out of our own domain, and make war against any foreign country or perform acts of war, even in a case where one of our own citizens is arrested unlawfully and may be sentenced to death under the decree of a foreign country, without first referring the matter to Congress and obtaining their consent.

It therefore becomes necessary in a matter of this kind that Congress shall cooperate with the President. It is indispensable that Congress shall cooperate with him, or else the citizen must lie there in chains and under condemnation of death until such time as Spain and the President of the United States may concur in agreeing that he may be discharged. Not released from a false imprisonment, but discharged from a rightful imprisonment by a pardon.

We, fortunately for ourselves, have enacted this law to compel the President to prompt action, and Congress has carefully defined a legal status between ourselves and the President of the United States and between our Government and foreign countries which is mandatory and is alike imperative in its requirements upon Congress and upon the President. He shall forthwith demand the release, "And if it is unreasonably delayed, or if it is refused, the President of the United States shall take such steps, not amounting to war, as shall be sufficient to obtain the release." Suppose the steps taken by the President, not amounting to war, fail to secure the release. What then? Congress must act or the citizen must perish. The duty comes right home to us. It comes home to us under our own laws as well as under the impulses of all sympathy and all humanity.

Now, what next? The resolution requires that all the facts and proceedings relative thereto shall as soon as practicable be communicated by the President to Congress. This is done to enable Congress to act so as to save our citizens. When we asked the President, extending the courtesy to him of withholding this information as to correspondence, and nothing else, to send those papers here, he sent a message to us on the 23d day of May, in which he says:

> It being in my judgment incompatible with the public service, I am constrained to refrain from communicating to the Senate at this time copies of the correspondence described in the third paragraph of said resolution.

This resolution now under consideration does not call for copies of any correspondence. It calls for an executive, official statement of the facts, a part of which are the acts of the President alone, not his correspondence with Spain.

Mr. DAVIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from Minnesota?

Mr. MORGAN. Certainly.

Mr. DAVIS. I should like to inquire of the Senator from Alabama if he recollects whether the resolution which called upon the President for information referred to any particular case?

Mr. MORGAN. Yes, sir; it did. I will read it in answer to the Senator from Minnesota.

Mr. DAVIS. I ask the question in order to make the statement of facts complete.

Mr. MORGAN. I have the wrong print here, but I can interpolate the words as the resolution was amended:

> That the President is requested, if it is not incompatible with the public service, to communicate to the Senate copies of any correspondence that has taken place between the Governments of Spain and the United States respecting the said protocol and its bearing or effect upon the trial and condemnation of citizens of the United States who were recently captured on or near the vessel called the *Competitor*, which was seized under Spanish authority in Cuban waters or near to that island.

Mr. DAVIS. I merely asked the question to make the statement of facts complete.

Mr. MORGAN. I want to be definite. The third paragraph of the resolution called for the correspondence in respect to the seizure of the *Competitor* and the bearing and effect of the alleged protocol upon that seizure, and the President declined to furnish it. The pending resolution calls for the facts relating to the capture and condemnation of our citizens.

I wish to ask the Senate whether, without one word of official information from the President of the United States, when we know through the newspapers and through the sworn testimony of Mr. Lawrence, who witnessed the trial, that our citizens have been condemned by Spain, after a pretense of trial by a court-martial, without the assistance of counsel or witnesses, and sentenced to death, and are now in prison in Habana under that sentence, is not the Senate entitled, under this mandatory statute to the President of the United States, again to request him to furnish us with this information? If there had been no more done about it than the act of the Senate instructing its Committee on Foreign Relations to make this inquiry in regard to the rights of American citizens, that would be a sufficient predicate for this request. But in addition to that we have the sworn testimony of Lawrence to show how the trial took place, what sort of trial it was, who the parties were, and the condemnation that was passed upon those American citizens. We have all that here. But the President of the United States has paid no more attention to it or to the Senate's request for information than if it had been a case of the slaughter of some native negro or mulatto in the Cuban army engaged in the war.

The citizen of the United States is entitled to something more than that. The Senate of the United States is entitled to something more than that. The President of the United States, whatever may be his motive—I do not care what it is—has not any right under the statute to withhold from us this information; and I think the action of the Senate will be moderate when, after this long delay and after this request, which has heretofore been made and rejected, we merely request him to make an official statement to us whether there was a seizure of the *Competitor*, whether an American citizen was seized on board of it or near to it, whether that man or those men have been tried by any Spanish tribunal and are held in arrest and in prison, and whether sentence of death has been passed upon them, and whether the President has made a demand for the release of those people. I do not want to leave Washington City, when the Congress shall have adjourned, and commit this matter to the hands of the President, either to make war actual upon Spain or to manufacture stage thunder out of it. I want us to perform our duties to the American citizens who are in chains, under condemnation of death, in a foul Spanish prison. If it requires acts of war to release them, the President is prohibited by this statute from engaging in such acts.

Mr. MILLS. The Senator recollects, too, that the whole proceeding was in the Spanish language, and the man said he did not understand it.

Mr. MORGAN. The testimony which the Senate have kindly permitted me to incorporate in my remarks is here. All of the proceedings before the court-martial were in the Spanish language, and when the accused were required to stand up and to make answer to the accusation after the trial had ended, one of them said, "I know nothing of what you have been saying or doing. None of it has been translated to me. It is all Spanish to me. I can not answer. I do not even know of what I am accused." Thereupon immediately a translation was made by some officer——

Mr. DAVIS. There was no translation.

Mr. MORGAN. That is true.

Mr. DAVIS. There was a short explanation, and he was asked if he wanted to say anything.

Mr. MORGAN. Yes. Thereupon immediately, after some short explanation, sentence of death was pronounced upon that American citizen by that court-martial.

That was done when we have a treaty of 1795 with Spain which forbids absolutely any such proceeding against an American citizen, except in the civil courts, at least in time of peace. The legal attitude between the United States and Spain in respect to war in Cuba is an attitude of recognized peace. It has never been disturbed in the slightest degree, according to Spanish assertion, nor have we recognized that war exists there. So in every view of this question which can possibly be taken the understanding

between the United States and Spain is that a state of peace prevails in Cuba.

Mr. DAVIS. Will the Senator allow me to interpose at this point? Furthermore, Spain has never declared martial law against these belligerents on her own territory.

Mr. MORGAN. I was not aware of that fact.

Mr. DAVIS. I mean in regard to forbidding intercourse from the outside.

Mr. MORGAN. Yes. There has been so much obscurity as to the situation in Cuba imposed upon the whole world by Spain's censorship of the press and the cable and telegraph lines that of course we are in the dark—the whole world is in the dark—in regard to what transpires in Cuba. We hear the groans and the shrieks and the outcries of old men, women, and children as they are borne on the breath of rumor. Occasionally some missive is sent by a private citizen to the outside world to inform us of the revengeful and inhuman butchery that is going on in that terrible place. But so far as authentic information is concerned, either relating to what is transpiring in the massacre of human beings in Cuba or relating to the legal status that exists there, we have in large measure to rely upon mere rumor as we gather it from the press and other sources—private letters. I have received a good many letters, some with the seals broken by the Spaniards before they got out of the mails in Cuba, giving information to me as to what has been going on in the island. But we are thrown upon these precarious sources of information, and therefore the Senate will have to excuse me if I am not so well informed as my colleague on the Committee on Foreign Relations, the Senator from Minnesota [Mr. DAVIS], in respect to the fact that martial law has not been declared in Cuba as to any particular province.

Mr. DAVIS. As to the act of introducing arms into the island and seizure upon the sea.

Mr. MORGAN. Is it an unreasonable request on the part of the Senate of the United States, or is it a request as to which the President of the United States could take the slightest umbrage, respectfully to ask him, under section 2001, to perform his duty immediately, or as soon as practicable, that being the language of the statute, communicating these facts, which are known to him and unknown to us, officially to the Senate? That is the whole purpose of the resolution, to get his declaration and statement of facts. Upon what justifiable ground can this official statement be withheld from us?

The Senate wants to know if there was a *Competitor;* if there were Americans on it; if they were seized; if they were tried; if they were condemned to death. I want to know whether an immediate demand for their release has been made. I want to know the response to it. I want to know why it has been unreasonably delayed; why it is that these American citizens are required to remain in jail in Habana, in a place that is described as being utterly beastly, where as many as a hundred men are confined in a room that is not one-fourth the size of the Senate Chamber, and are not given even enough water to drink. I want to know of the President of the United States what the situation is before Congress shall adjourn and we shall go hence. Are we going to adjourn on Monday or Tuesday and leave these men in jail in Habana without information even as to their condition, and that, too, when the Senate has called for it and suggested to the President the duty that the statute requires him to perform?

I wish to state that I have the utmost reverence and respect for the office of Chief Executive of the United States. That is an American characteristic. It is one in which I really rejoice. At the same time this is a country of law. No man can move in the executive department, the judicial department, or the legislative department except as he is moved by the laws of this country and as he is restrained and directed by those laws. This is a country of laws. It is not a country that is ruled by the private will of the incumbents of any of the departments of this Government.

The President of the United States is enjoined by the Constitution faithfully to execute the laws, and then he swears in his official oath that he will obey the Constitution of the United States, so that he is as much under an obligation to obey that statute as is the Senate and every citizen of the United States. He can not say to us, "It is inconvenient for me, or it might put me in an unpleasant attitude, or it might disturb some diplomatic correspondence that I am conducting with Spain if I should give the Senate information as to facts where the statute requires that I shall do it, and do it as soon as possible."

Now, who supposes that it is too early for the President of the United States to inform us in regard to the state of facts inquired about in the resolution? Who will say so? I am not moving in this matter for any other purpose than merely to execute the laws of the United States and to obey the order of the Senate as a member of the Committee on Foreign Relations.

It is with exceeding regret that I have to bring forward a matter of this kind. It is unpleasant to me in the highest possible degree. At the same time, as a member of the Committee on Foreign Relations and as a Senator on this floor, when the Senate has instructed that committee to make an inquiry and to report by bill or otherwise all the facts relating to the *Competitor* case, I do not see how we can go away from here without requesting the President again to send us this information. When we get it, we will know whether it is necessary as a committee to make any report to this body at this session, whether the exigency is such as to require it. It may turn out—we do not know—that the Spanish Government has receded from the assertion of its right to arrest our citizens under the circumstances and to try them by military court, or it may turn out that we shall be humiliated by having the jurisdiction and power of the Spanish Government over our citizens reasserted, and that we shall have to go as a Government, or that the individual who has been condemned to death will have to go on his own account, and humbly beg pardon of Spain and get a pardon from the supreme authority in that State. I do not know how it will turn out. I would be glad to save the lives of these people in any way at all. At the same time I can not feel very proud if we shall save their lives under an order from Spain for their pardon, when we are demanding and asserting that the Spanish Government had no right to arrest them and no right to condemn them by military court, and that such a court had no jurisdiction to try them.

I do not suppose that in respect to any other Government existing in this world to-day the President of the United States would hesitate for one moment to make a demand for the release of these prisoners. Why does he hesitate to say to the Government of Spain, "You have no power or right to do this thing in time of peace. You can not take these people up and condemn them to death under your municipal laws, as you have done here in time of peace. In time of peace you can not try our citizens by military court-martial." That is an incident of war. That is a court that derives its jurisdiction in time of peace alone from the relation which the party charged holds to the military establishment of the country—necessarily so. Here is a military court-martial assembled in time of peace, and it pronounces summarily sentence of death upon one of our citizens, and, to appear extremely just to Spain, he leaves our citizens to the mercy of that Government. Has the President of the United States made a demand for their release upon the ground that the court had no jurisdiction, and will he consent to accept the pardon of these people? What will be the condition of the next batch of men who go there? We shall have admitted the jurisdiction of Spain to condemn them to death by permitting this sentence to go into execution and by our predicating upon it a plea for pardon. Spain would say, "Your Government, in the case of the *Competitor* and the men there arrested, has admitted the jurisdiction of the courts-martial to try them." Spain will say to us, "You came here and sued for pardon for these men, thereby admitting all the predicate in respect to our jurisdiction to arrest them and try them by a military tribunal." I do not want to leave this question in that shape.

I deprecate—perhaps there are some people in this world who disbelieve what I am stating now—the spirit the American people are now exhibiting in breaking away from our laws and keeping the executive department in hot chase after men who are trying to escape from the United States with arms and munitions of war to put them into the hands of the rebels in Cuba. I deprecate it because it violates the laws of the United States, and so long as there is a law upon the statute books of the United States I am in favor of its being executed. It makes no difference what the consequences may be to anybody. Let the law have its course, because this is a land of law. If we are to set aside the law because of our sympathy or anything like that, of course the whole fabric goes to pieces through the caprice of popular will. But as much as I deprecate that, and as much as I think every man in the United States who is a right-thinking man is bound to deprecate it, do we not know that it is a physical, a political, a moral impossibility to keep individuals from going to Cuba or to keep expeditions from being secretly organized to go to Cuba and carry arms and munitions of war? The people have broken over all bounds in regard to it, and the Government of the United States to-day has no power to prevent its people from going there. The people have so long fretted at the enormities of Spanish barbarity in Cuba that they have become restive and they are unwilling to obey their own laws, and those laws are virtually stricken down by the instincts and sympathies of a common humanity. But that is the situation. We can not prevent it.

It behooves us, Mr. President, to have an understanding with Spain upon this question, and inasmuch as the President is forbidden by the statute to perform any act amounting to war in order to get the release of one of our citizens thus captured and condemned to death—inasmuch as he can not make war for a purpose of that kind, it is the duty of the Congress of the United States to make such declarations now as are necessary to assist him if war has to be made. A joint resolution ought to be passed by this body, if the facts are as I suppose they are, that in the event these American prisoners are not speedily delivered to our consul, or in the event that they are not released within a reasonable time, according

to the language of this statute, the President shall be authorized to send ships to Cuba and there make war that shall be effectual to secure their release. But the President can not do this unless we authorize him to do it. The statute prohibits him. But, to justify such a course, Congress must first determine whether the condemnation of our citizens is just and in accordance with our treaties with Spain.

I wanted to present this subject to the attention of the Senate merely to inquire whether or not we are going away from here and leave this matter in the shape it is in. Let us pass the resolution and get the official facts from the President. He can recommend to us whatever he thinks is necessary to aid his powers in order to obtain the release of these men. They have been there nearly a month and have not been released, and every day that these men are imprisoned in that jail under sentence of death is a day of dark and marked dishonor to the United States of America. We have no right to stay here and have our citizens treated in this way, because we are not able even to get a response to a proper request from the President of the United States as to what the facts actually are. Let us again ask for information from the President, and, failing that, proceed to do our full duty to these men.

I move the adoption of the resolution.

APPENDIX.

CONDITION OF AFFAIRS IN CUBA.

WEDNESDAY, *May 20, 1896.*

Statement of Frederick W. Lawrence.

FREDERICK W. LAWRENCE was duly sworn.

By Senator DAVIS:

Q. What is your full name?
A. Frederick W. Lawrence.
Q. Where do you live?
A. In New York City at present.
Q. What is your employment?
A. Correspondent of the New York Journal.
Q. How long have you been so employed?
A. Since December.
Q. Are you a citizen of the United States?
A. Yes, sir.
Q. Have you visited the Island of Cuba recently?
A. Yes, sir.
Q. When did you arrive there?
A. Nine weeks ago last Saturday.
Q. Until when did you remain?
A. A week ago last Sunday.
Q. In what capacity?
A. As correspondent to the Journal.
Q. In what place in Cuba did you remain?
A. At Habana.
Q. Were you during your stay in Cuba at any time within the lines of the insurgent troops?
A. No, sir; I made no effort to disobey the laws of the Government of Cuba.
Q. Did you make any excursions from Habana?
A. Yes, sir.
Q. How many?
A. Three.
Q. State to what places and the distance to each place.
A. To Guines, a distance of about 40 miles; Guanabacoa, a distance of about 7 miles, and to Marinoa, a distance of about 9 miles.
Q. Were all of these places within the Spanish line?
A. Every one of them; yes, sir; that is to say, the Spanish claimed them, and at the time I went to them they were; but recently the insurgents have gone to at least one of them, that is Marinoa.
Q. Do you mean permanently advanced their line?
A. No, sir; they have no lines; that is, their columns have gone in and got out again; they have broken the Spanish lines.
Q. Under what circumstances did you leave the Island of Cuba?
A. I was expelled by order of the captain-general.
Q. Was that order verbal or in writing?
A. In writing.
Q. Have you a copy of it?
A. I have it in New York.
Q. Will you furnish a copy to the committee?
A. With pleasure.
Q. When was that order delivered to you?
A. It was delivered to me on Thursday before I left Habana.
Q. Does the order allege for what reason it was given?
A. Yes, sir.
Q. What reason was given?
A. It is alleged that both James Creelman and myself, he being named in the same order, were expelled from the Island of Cuba for sending to our papers false notices of cruelties by the Spanish troops, and inventing news of insurgent victories.
Q. Were those statements true?
A. Not a single statement made in the order of deportation is true, except the words that we are the correspondents. I so informed the captain-general in writing before I left there.
Q. Did you receive any response?
A. No, sir.
Q. When you arrived in Habana, which I understood you to say was March 20, 1896, did you place yourself in communication with the Spanish authorities?
A. Yes, sir.
Q. For what purpose did you place yourself in communication with them?
A. For the purpose of gathering information concerning the situation of affairs there and gathering news that would be of interest to the people of this country or to my paper.
Q. Did you state your purpose to them?
A. I made no statement to them, but made no attempt to conceal from them my purpose, and openly and avowedly stated I was there for the purpose of obtaining information.
Q. Did you desire to obtain information from the Spanish authorities as to the condition of affairs in Cuba?
A. Yes, sir.
Q. With what success?
A. Very little; absolutely none as far as the true condition of affairs was concerned.
Q. Did they give you at all their version of current events?
A. Yes, sir.
Q. Did you ascertain whether such information was reliable or unreliable?
A. At the time, having no other information at hand, I was compelled to accept it as reliable, and so sent it, but found afterwards that statements given to me were untrue.
Q. From what source did you find those statements were untrue?
A. From gentlemen who came into Habana and also gentlemen in Habana.
Q. From gentlemen who came from where?
A. From gentlemen who came into Habana from where the scene of action was laid.
Q. From territory occupied by the insurgents?
A. Yes, sir.
Q. In what respects, stating generally, did you find this information to be unreliable?
A. As to battles fought.
Q. Well, in what respect as to them?
A. The military censor is the man who gives out the Government reports of engagements between the Spanish and insurgents. He has hours for doing it, and at those hours all the newspaper men in Habana are supposed to be present. He edits them and the Habana newspapers are compelled to print them. Before they are written up they are compelled to be submitted to the censor, who arranges them as to what he wishes the public to know, and if the published news is changed in the smallest particular from the way it is handed in, the papers are subject to fine and the editors are subject to imprisonment. I found that in the reports of skirmishes the military censor invariably reported that the Spanish had killed from three to a dozen, or perhaps more, men, and had captured so many horses, or had killed so many horses, and had wounded so many, while communication from the ranks of the insurgents to their friends in Habana would be entirely the reverse. The news I received, then, would be entirely different from that given out from the Spanish censor. That was invariably the case.
Q. The result, then, was, you could not know which was nearest the truth?
A. Personally I have no knowledge of it. I did not go outside the lines and did not count the dead and dying or anything of that kind; but the gentlemen who would bring me information—and I did not have to seek for it; they were only too willing to give it to me—were men of the very highest character. They were men whose word is certain to be believed, at least on an equality with that of any man who walks the earth. I found that those gentlemen who brought me such information were conservative; that sometimes they would give the Spanish a victory and sometimes they would give the insurgent side a victory in these little skirmishes, while the news given us by the Spanish censor invariably gave the Spanish a victory.
Q. Were these gentlemen on the side of the insurgents?
A. Yes, sir.
Q. So for that reason you were inclined to give their account greater credit than that of the censor?
A. Yes, sir; and for this reason: I found the sympathizers with the insurgents were more conservative than the other; that is, they were willing to concede a battle now and then to the other side, while the Spanish side of the news was that of a Spanish victory.
Q. Was there anything in the Spanish account about the capture of Pinar del Rio?
A. The censor did not report the capture of Pinar del Rio; and, in fact, when it was reported that it was captured it was vehemently denied by the authorities.
Q. Did the censor give out that Maceo had attacked that town and been repulsed?
A. No, sir.
Q. I see in your report to Secretary Olney you say that "the Government gave out the announcement that Maceo had attacked the town and been repulsed in short order and with great loss, the Spanish loss not being stated."
A. That statement is made upon the statement of William Shaw Bowen, as ardent an admirer of Cuba as ever stepped foot in Habana. He told me that within a week after the account of the capture of Pinar del Rio was printed Weyler had informed him personally that the Cubans had not only attacked Pinar del Rio but had been repulsed.
Q. Did you report that?
A. Yes, sir.
Q. Did you afterwards state that was untrue?
A. From all the information I could gather from people who came in from Pinar del Rio—Cuban sympathizers, it is true, but honorable men—the city of Pinar del Rio was held for nearly two hours, and they created great destruction and were not driven off, but vacated the town of their own accord.
Q. Do you know anything of your own knowledge in regard to the treatment of American citizens by the Spanish authorities during your stay?
A. Do you mean by that was I personally present when ill treatment was inflicted upon them or have I the knowledge from the men themselves?
Q. Just answer that. Did you personally see or know of ill treatment of American citizens?
A. Yes, sir. I found Mr. Walter Grant Dygert, a citizen of the United States, from the State of Illinois, imprisoned at the prison at Guines, in a little cell, probably not half as large as this room, in which there were 22 other men and in which there were no sanitary arrangements worth speaking of.
Q. That would be a room about 16 by 18 feet. How many people were there with him?
A. Twenty-two; he made 23.
Q. Closely confined there all the while?
A. Yes, sir.
Q. What was the condition of the room as to cleanliness?
A. It was simply filthy. The people with him were the dirtiest men I ever looked on in my life, and I have been in a great many American prisons.
Q. How long had he been there?
A. About three months.
Q. How long did he remain there after you discovered him?
A. About two weeks.
Q. What was the charge made against him?
A. The charge made against him was that he was outside the territory designated as that proper to travel in by General Weyler. He was found on the outskirts of the city of Guines. That was one charge against him, and the other charge made against him was that he was William Gold, otherwise known as "Inglesito."
Q. Had there been any investigation made by the Spanish authorities?
A. Yes, sir.
Q. Any investigation at which he was present?
A. Yes, sir; and testimony taken; and Marquis Palmerola told me the Government was thoroughly satisfied of his innocence for two weeks. I saw the Marquis on a Saturday, and he told me they would have released him the day before or the day before that but for the fact that they were holy days—Holy Thursday and Holy Friday—and the Spanish do nothing on those days.

Q. Did you know anything about the kind of food furnished him?
A. Only what Mr. Dygert told me.
Q. What did he say?
A. He told me the food was execrable. He told me that but for the fact that the commandant of the prison, whose name I forget, but it is in my papers, was a pretty decent sort of a fellow, he would have committed suicide long before he saw me.
Q. Did these prisoners take any exercise?
A. I did not ask about that. They were in a cell with iron bars on the side; that is, they could get air, but not sufficient in that cell.
Q. Was it a stone cell?
A. Yes, sir; with the iron bars on one side.
Q. What kind of a floor?
A. Stone floor. Mr. Dygert told me at the time I was conversing with him that at that very moment he was crawling with vermin, and his scratching and conduct generally was pretty good evidence that he was.

By Senator MORGAN:

Q. What were the sleeping arrangements?
A. None. They had to sleep on the floor.
Q. They furnished him blankets, I suppose?
A. No, sir; that was perhaps unnecessary, for I suppose blankets would have been too warm.

By Senator DAVIS:

Q. Did he speak of being allowed a change of clothing?
A. He had not been allowed a change of clothing during his imprisonment.
Q. How long before his release was it that Marquis Palmerola told you that the Government had known his innocence?
A. He told me the Government had known it two weeks absolutely.
Q. That was three weeks before his discharge?
A. The Marquis Palmerola told me that the Government had been absolutely sure of his innocence two weeks prior to the day I saw the marquis.
Q. Then that makes about four weeks after they knew or confessed they knew he was innocent?
A. Yes, sir; and the testimony had been in the possession of Marquis Palmerola over two months.
Q. Did he tell you why he had not examined that testimony until after it had been two months in his hands?
A. It was not his business to examine it.
Q. Do you give that to me as his answer or your reason?
A. My reason——
Q. No; answer my question. Did he tell you why he had not examined that testimony for two months after it had been in his hands?
A. He did not.
Q. State any other instances of maltreatment of American citizens by the Spanish authorities there.
A. If you will permit me to state what the American citizens told me——
Q. I will cover that by a subsequent question.
A. I saw no other ill treatment, unless you consider the expulsion of American citizens from Habana ill treatment.
Q. Did you see any expulsion of American citizens?
A. Yes, sir. Mr. Rapley, correspondent of the New York Mail and Express, was resting in his bed——
Q. Did you see this?
A. No; I did not.
Q. Well, during your stay in Habana did you learn from sources you considered reliable of other instances of ill treatment of citizens of the United States by the Spanish authorities? If so, go on and state them, and give your sources of information.
A. Mr. Rapley, the correspondent of the New York Mail and Express, came to me one day about two or three weeks after I arrived at Habana and told me that upon the night before, between 2 and 3 o'clock in the morning, he had been aroused in his bed by the chief of police and three or four commissioners—police inspectors—and had been served with a notice of deportation. He showed me the notice, but it was in Spanish and I could only guess at its contents. He applied to Consul-General Williams to have his time extended. He was to leave on the first steamer, and the first steamer sailed on the following day and he could not get ready to go on it, so he applied to Consul-General Williams for permission to prolong his stay until the following steamer, and Mr. Williams secured him that permission. He left on the following steamer.
Q. What was the alleged cause?
A. Sending false information to his paper. That has been the reason that General Weyler has alleged for the expulsion of all the correspondents whom he has expelled. There were four of us expelled.
Q. Go on and give the next instance.
A. The case of Mr. Darling, an artist for Harper's Weekly, who has been arrested in territory that is not included in the captain-general's edict, released each time, but detained from one hour to several hours—by several hours I mean eight or ten. I am not certain about the American citizenship of Mr. O'Leary, so I will not state his case. Mr. Creelman, of the New York Herald, was expelled at the same time I was; forbidden to remain longer on the island.
Q. Upon what charge?
A. Upon the charge of sending false information as to the state of affairs in Cuba. I was expelled for the same reason at the same time.
Q. Now, these cases are those of newspaper correspondents. I apply my main question to ill treatment of other American citizens, resident or temporary, of the island.
A. The cases of Alfred Laborde and Milton.
Q. Citizens of the United States?
A. Citizens of the United States.
Q. Is your information derived from what they told you?
A. No, sir.
Q. Who did you get it from?
A. From the testimony produced at the court-martial and from Vice-Consul Joseph Springer.
Q. With what were these two men charged?
A. They were charged with bringing a filibustering expedition into the Island of Cuba.
Q. Is that the case of the *Competitor*?
A. Yes, sir. Those two men, American citizens, were arrested, and, so far as the testimony of the men who captured them goes, had no arms upon their persons. They were brought to Habana, tried by general court-martial, against the energetic protest of the United States consul-general there, condemned to death, and, as I am informed, their sentence delayed by the Madrid Government at the request of the Secretary of State, and still held in jail.
Q. Do you know whether they were assisted by counsel at their trial?
A. From the American point of view, they were not assisted by counsel at their trial; from the Spanish military point of view, they were.
Q. In what way?
A. They had a lieutenant in the navy, who asked no questions, who cross-examined no witnesses. There were none produced except Captain Butron and the other officers of the *Mensajerra*.
Q. Did this lieutenant advance by way of plea that these men were American citizens?
A. He stated in his plea that they were American citizens.
Q. Upon what grounds did he rest their defense?
A. He asked for mercy for Laborde, for the illustrious place his name had borne in the Spanish navy, and on account of the things his people had done for the Spanish Government.
Q. And the other man?
A. He asked for mercy for him, stating that he was not there for the purpose of fighting, but merely in his business as a newspaper correspondent.
Q. Do you know whether it appeared on that trial how far the *Competitor* was from the shore of Cuba when she was captured?
A. I do not remember.
Q. Do you know whether there was any evidence of that given on the trial?
A. At the trial there was no evidence given whatever.
Q. I mean as to the distance.
A. As to the distance or anything else.
Q. Have you any information as to the distance she was from the shore?
A. As to the exact distance, I do not know whether she was within the 3-mile limit or not.
Q. Was this trial secret or public?
A. Public.
Q. Did you attend it?
A. Yes, sir.
Q. Were the men in irons when tried?
A. No, sir.
Q. How long did it last?
A. From a little after 8 o'clock in the morning until afternoon.
Q. How many were tried?
A. Five, at once.
Q. How long was this after their arrest?
A. It was in the neighborhood of a week, more or less.
Q. Was any application made at the trial for postponement until they could communicate with their Government?
A. No, sir. Mr. Williams, however, saw them before the trial commenced and asked the judge-advocate in my presence what sort of a trial it was to be, and the judge-advocate replied, "A summary trial." Mr. Williams then replied, "I refuse to lend any official recognition to this trial. I protest against it"; and left.
Q. So that no officer of the consular service of the United States was present at that trial?
A. No, sir.
Q. In what manner was this lieutenant appointed?
A. I do not know. If you care for presumption, I presume the judge-advocate appointed him.
Q. Was he appointed as deputy judge-advocate?
A. No; he was appointed as what they call "defensor." There was a prosecutor also. He made his plea in about the same way as one of our district attorneys would make a plea in this country.
Q. Well, this person was an officer in the Spanish navy, was he?
A. Oh, yes. He asked no questions, however. Neither the prosecutor nor the counsel for defense asked a single question of anybody. There was not a particle of testimony offered except the officers of the *Mensajerra*.
Q. Was there an interpreter present?
A. There was an interpreter present, but he did not make his presence known to the prisoners until they were asked whether they had anything to say in their own defense. These long statements were read by the judge-advocate in Spanish.
Q. These long statements of the prosecuting officer, you mean; was the evidence given in Spanish and translated in their hearing?
A. No, sir.
Q. Did their defender communicate to them the substance of it?
A. He did not utter one single word to them.
Q. Can he speak English?
A. I did not hear him.
Q. Have you any reason to think he could speak the English language?
A. No, sir; I have every reason to think he could not?
Q. So that all this long harangue was delivered in Spanish?
A. Yes, sir.
Q. And then they were asked what they had to say?
A. Yes, sir; what they had to say in defense.
Q. Did he ask that in English?
A. He did not even do that. The presiding officer of the court-martial—there were ten of them, what we might call the jury—the presiding officer of that body said to Laborde in Spanish, "What have you to say?" He said a few words, and so it went until the last man was reached—William Gilday—and the presiding officer spoke to him and he did not understand him, and then the interpreter got up and said, "Do you wish to say anything?" Gilday arose and said, "All I have got to say is I do not understand one word that has been said to-day, for me or against me, and at any rate I appeal to both the British and American consuls."
Q. Now, how many of these prisoners could not speak or understand Spanish?
A. I believe there were two who could not speak and understand Spanish.
Q. Which two?
A. Milton and Gilday. Laborde understood Spanish.
Q. Milton was the American and Gilday the naturalized American subject?
A. Yes, sir; I believe there is some question whether Gilday is a British subject or American. The British consul claims that he is a naturalized American, but he himself says he never renounced his allegiance to Great Britain.
Q. How long was it after they were asked whether they had anything to say before the trial terminated?
A. The trial terminated immediately upon the last man having made his statement.
Q. And when was it the defense summed up in their behalf, if at all?
A. Immediately after the prosecution.
Q. How long did it take him to conclude that summing up?
A. It took probably fifteen minutes.

By Senator MORGAN:

Q. But his appeal, as I understand you, was entirely for mercy, and not for justification?
A. All for mercy, except you can call his plea for Milton that he was not there as a filibuster, but merely as a newspaper correspondent.

By Senator DAVIS:

Q. Did Milton undertake to give any account of why he was there?
A. Yes, sir.
Q. What account did he give?
A. He stated he came aboard the schooner as the correspondent of the Jacksonville Times-Union.
Q. Did he state he knew anything of the mission of the schooner?

A. He did not say. That is the statement that was made by him several days before the trial.
Q. What did Gilday have to say for himself?
A. He said he was a poor sailor earning his living, and he went aboard thinking the schooner was bound from Key West—I think it was for Sable Keys, going fishing; that he knew nothing of the nature of the business until after it started. Laborde claimed that his ship had been hired by some person for the purpose of going to Sable Keys for the purpose of fishing there, and he was simply held up by a revolver and told to go to Cuba.
Q. Laborde was the owner of the schooner?
A. No; he was the captain.

By Senator MORGAN:

Q. What did you ascertain to be the general feeling of the native Cubans you saw as to this rebellion or war?
A. The Cubans, all the natives of Cuba that I have seen who in the past have possessed any wealth at all, told me they had wrecked themselves to help along the war.
Q. I have seen statements in the papers about volunteer companies and regiments and perhaps brigades of native Cubans under the Spanish flag. Did you see anything of that sort there?
A. Yes, sir.
Q. To what extent, probably, were those enlistments?
A. Well, just giving a rough estimate—I never looked into the official records—but giving a rough guess, judging by the numbers of volunteers I saw in the streets, I should judge there were 3,000 volunteers.
Q. Were they volunteers for service in the field or for particular duty?
A. No, sir; they were volunteers for service in and around the outskirts of the city of Habana, guarding the banks, public buildings, theaters, and the like.

By Senator DAVIS:

Q. A sort of gendarmes?
A. That is it.

By Senator MORGAN:

Q. Sort of home guards?
A. Yes, sir. In fact they were not required to go into the field at all. Several of the volunteers who are now disgusted with the step they have taken would willingly join the insurgents.
Q. Have any of these volunteer organizations been sent to the trocha?
A. I could not find out. I tried to find out, but the government authorities would give me no information on the subject at all.
Q. What impression did the Spanish make upon you as to the character of the troops—the people employed in the army—as to whether they were substantial men, and men of intelligence and physical vigor, and so on?
A. They impressed me as being very patriotic and very courageous men—the Spanish themselves—but with one drawback, and that was lack of patriotism, caused, as they told me—that is, the privates, not the officers—caused by the fact that they are illy fed, illy clad, compelled to do the most menial service, and have not been paid for nearly five months. You go into the streets of Habana any hour of the night and if you look like a man of any means at all you will be asked for alms by Spanish soldiers. I used to go along there and give them 10 cents or a nickel or a quarter, whatever I might happen to have in my pocket when they asked me, and at the same time say "Americano," knowing that there was no knowing how long it might be before I would be in the hands of those men, and wished to be friendly with them. So, whenever I gave them anything, I always said "Americano."

By Senator DAVIS:

Q. In the course of that trial, were any attacks made by the prosecuting officer upon the United States Government?
A. No, sir.

By Senator MORGAN:

Q. While in Cuba did you visit any places around Habana?
A. Only the places I have named.
Q. How far out?
A. Forty miles.
Q. Did you leave the railroad track?
A. I did not leave the railroad track. I got off the train at the town of Guines and went about my business, which was to see Walter Dygert.
Q. Did you observe, or could you observe, the condition of the people in the country?
A. Yes, sir.
Q. What was it?
A. Wretched. Take a few coppers from your pocket and throw them in the street and half the population would scramble for them. I remember now where I went down one morning to the club and a little child playing around there attracted my attention. I gave it a few coppers and soon a dozen people came out and begged, saying they had no food. I went out on the drive one morning and went into a grocery store and was besieged by people who wanted me to buy groceries for them.
Q. What is the currency about Habana?
A. Copper, silver, and gold.
Q. No paper money?
A. No; no paper money, except now and then an American greenback.
Q. They have no national paper currency?
A. No, sir; not in Habana, at least.

By Senator DAVIS:

Q. Is there anything else of detail you would like to state that we have not interrogated you about?
A. I can not think of anything that would be of interest. Before leaving there I wrote to the captain-general, offering to prove to him every line I had written.

By Senator MORGAN:

Q. What, in your judgment, derived from what you ascertained while in the Island of Cuba, is the prospect of success of the insurgent government?
A. A very long fight and the ultimate success of the insurgent government if left alone—if left in the condition they are now. The insurgents are in a position, in my judgment, to fight for fifty years in the way they are fighting now.
Q. Did you derive any impression from Spanish sources while you were there as to their hopes for subjection of the insurgents?
A. Yes, sir.
Q. What was it?
A. Captain-General Weyler told me himself, within a week after I landed there, that he would have it suppressed within three months, and every Spanish officer I spoke to was very sanguine of it.
Q. I understand that the forces of Maceo and Gomez are divided now by what is called the trocha?
A. Well, they are divided by the trocha and quite a good deal of territory east of the trocha.
Q. In the military arrangements of that country Maceo has been assigned to the district called Pinar del Rio?
A. That is true.
Q. And other generals to two other different provinces, and Gomez is commander in chief of the whole army?
A. Of the entire army; and if Antonio Maceo obeys his orders that he has received from his chief, he will remain in Pinar del Rio.

By Senator DAVIS:

Q. Mr. Lawrence, I hold in my hand the New York Journal of May 19, containing your statement to the Secretary of State, signed by you, dated May 18, 1896. Is that statement true?
A. Every word of it.
The statement is as follows:

Hon. RICHARD OLNEY, *Secretary of State:*

In accordance with the understanding between yourself and Mr. Edward Marshall, of the New York Journal, I herewith submit to you a statement embracing such of my observations of the condition of affairs in Cuba as it seems likely may be of interest to yourself and the State Department. These were gained during my sojourn in Habana as the correspondent of the New York Journal. It is as much the duty of a newspaper man as it is the duty of a diplomatic agent to sift rumors and ascertain exact facts. This is what I endeavored to do.

I went to Cuba entirely unprejudiced and with instructions from Mr. W. R. Hearst, the proprietor of the New York Journal, to exercise the utmost care in preparing my telegrams and letters, and to especially avoid giving favor to one side at the expense of the other. At that time the impression generally prevailed that the wrongs which had led to the insurrection and the strength of the rebels had been somewhat exaggerated by the correspondents of American newspapers. I was one of those who believed that to be true.

On my arrival in Habana (March 20) I immediately placed myself in communication with the recognized Spanish authorities. It was my first effort to gain an impartial and complete view of the condition of affairs in Cuba as it then existed. I found that it was most difficult to obtain information from the Spanish authorities. Such information as they chose to give out—even of military movements long passed—was not announced in the form in which it had been communicated to the authorities by the commanders in the field, but was revised and changed in Habana. This became immediately evident.

SPANIARDS DISTORTED FACTS.

Even after the correspondents had made up their news dispatches from these revised Government reports the dispatches were subjected to the most rigid scrutiny by the press censor, who often changed facts so that they were in complete conflict with the statements which the Government had a few hours previously issued as truths. This was, it was noticeable, only done when the strength and operations of the insurgents could be belittled thereby, or the successful operations of the Spanish troops magnified.

For example, I will instance the capture of the city of Pinar del Rio, a Spanish fortress and stronghold in the Province of Pinar del Rio, in two hours, by the army of the Cuban Republic under the command of Gen. Antonio Maceo. This occurred during my first week on the island. The Government gave out the announcement that Maceo had attacked the town and been repulsed in short order and with great loss, the Spanish loss not being stated.

I accepted the Government's statement as true, and cabled it to the Journal. A few days later reliable information was received from General Maceo that the battle had resulted in a victory for the army of the Cuban Republic, the Spanish garrison having been driven from the town in a demoralized condition, after which the Cuban soldiers destroyed over 200 houses. The Cuban loss did not exceed 50 men, while 300 Spaniards were killed. This news I telegraphed to my paper after having verified it absolutely.

After its publication the Spaniards in Cuba vehemently denied its truth, reiterating their previous statements. Later the truth of the Cuban story was verified by cable dispatches from Madrid, the verification being based upon Captain-General Weyler's own report to the home Government. I may say that my second dispatch announcing the Cuban victory did not pass through the hands of the press censor. It was sent by means of a private messenger, via Key West, Fla. This is a fair sample of the methods which the Spanish authorities in Habana follow in giving out news to all parties.

FOREIGN POWERS DECEIVED.

The representatives of all the foreign governments in Habana receive their information through the same unreliable channels through which information is passed to the newspaper correspondents. It is invariably scrutinized and altered to suit the Spanish authorities before it is made public. On the other hand, it is quite as true that unreliable information and exaggerated reports are constantly being offered to correspondents and others by the insurgents and their sympathizers. This false news from the insurgent side, however, is without the official stamp. Such news as goes to the correspondents or others through the Cuban headquarters there, under the sanction of the authorities of the Cuban Republic, is, my experience teaches me, invariably reliable.

It is almost always ultimately verified by the Spaniards themselves, either in Habana or Madrid.

These statements, I think, dispose of any question which may arise concerning the reliability of the announcements made by American newspaper correspondents in Habana which have been denied by the Spanish authorities.

TREATMENT OF AMERICANS.

A matter which should, I think, be especially called to the attention of yourself and the State Department concerns the treatment of American citizens by the Spanish authorities in Habana. I will first refer to the case of Walter Grant Dygert, of Illinois. While taking a morning walk on the outskirts of the town of Guines, in the Province of Habana, within 20 miles of the Spanish capital of Cuba, he was arrested by Spanish soldiers under the supposition that he was William Gold, otherwise known as "Inglesito," a noted Cuban officer. He was placed in the military jail at Guines.

Evidence was found in his possession which proved conclusively that he had arrived in Cuba only three days prior to his arrest, and therefore could not have been "Inglesito," who had been fighting with the army of the Cuban Republic for almost a year past. Still, he was placed "incomunicado," which means that he could neither send nor receive communications to or from any living human being except the Spanish authorities. He asserted his American citizenship and his complete innocence of any offense against the Spanish laws, but the authorities even refused to notify the United States consul-general at Habana of the fact that Dygert had been arrested.

Through Cuban sympathizers who had learned of his predicament Mr. Charles Michaelson, who was then the Journal correspondent at Habana, was informed of Dygert's arrest. He immediately laid the facts before United States Consul-General Williams. I am informed that Consul-General Williams made every effort to communicate with Dygert, but that he could not gain from the Spanish authorities even an admission that Dygert was under arrest until the fact became so publicly known that further equivocation was useless.

INNOCENT MAN IN PRISON.

In the end the authorities admitted the innocence of Dygert—admitted it even to the American consul-general—but still held him in jail for over two months, in spite of the protests of Consul-General Williams. The reason that he was not released sooner was because he refused to sign a waiver of any claims for damages that he might have against the Spanish Government.

Another case is that of Frank Agramonte, a citizen of New York State, and a member of the militia of that Commonwealth. He was arrested and confined in the military jail in the Province of Santiago de Cuba. What has become of him no man except those who have been concerned in his disappearance can tell. The American consular office at Habana informed me that it has never been notified of the arrest of Agramonte, and that inquiries made at the palace of the captain-general have been met with the reply that they knew nothing about the case.

Personally I made inquiry concerning him, but was not able to learn from the Spanish authorities whether he was in prison or at liberty, alive or dead. That he was arrested there is not the slightest doubt. I have come in personal contact with four men who saw him in the custody of the Spanish soldiers.

You are probably better informed than myself regarding the cases of the Americans arrested in connection with the so-called *Competitor* expedition, but I may add to your information the facts that upon learning of their capture the captain-general issued orders for a court-martial to convene immediately upon their arrival, and personally expressed the hope that they would be executed within twenty-four hours, as a warning to others who might accompany or seek to accompany insurgent expeditions to Cuba. This was before the captain-general knew that the prisoners had been taken on the water, and were, therefore, subject to the jurisdiction of the naval and not the land authorities.

SPAIN VIOLATED THE PROTOCOL.

You know that in the trial of these men the Government of Spain violated both the letter and spirit of the protocol of 1877, known as the Cushing protocol. I was personally present when Consul-General Williams and Vice-Consul Springer protested against such procedure in the cases of American citizens. The protest was made in the name of the United States Government, and, as Mr. Williams stated, by order of the State Department. The officer who received the protest was the judge-advocate of the court-martial, and the time was one hour before the beginning of the trial.

I may state, however, that Mr. Williams had made the same protest in writing several days previously, and that his letter was read at the court-martial. The judge-advocate consulted with the prosecuting officer, who decided that the trial must proceed, notwithstanding the objections raised by the American Government. The fact that the trial was held and that the prisoners were found guilty and sentenced to death are matters on which you have already been informed by Consul-General Williams. Even though the Madrid authorities have ordered a suspension of sentence, at the request of Minister Taylor, the prisoners are still subject to the sentence, which may be carried out at any time at the will of the Spanish Government.

WEYLER'S QUEER IDEAS.

It should also be called to the attention of the State Department that Captain-General Weyler does not openly recognize the treaty rights of the United States in this matter, but that he describes concessions which are evidently made under treaty provisions as favors to the United States, thus placing this Government in the attitude of being under obligations to Spain. This may be illustrated by citing the cases of Charles Michaelson and Lorenzo Betancourt, correspondents of the Journal, who were arrested in Habana and confined in Morro Castle.

Messrs. Michaelson and Betancourt were arrested on the charge that they had passed the Spanish lines without the permission of the authorities. It immediately became evident that it was a case of mistaken identity, as neither of the men arrested had, in reality, passed the Spanish lines or had attempted to do so. Shortly after their arrest, and after the consul-general of the United States had made a formal demand upon the Spanish authorities for the release of the men, the *Bermuda* expedition was stopped by the United States Government officials as it was leaving New York Harbor.

Captain-General Weyler then released Michaelson and Betancourt with the statement that he did it as a favor to the United States in recognition of the prompt action of your Department in stopping the *Bermuda*. Thus, instead of admitting the treaty rights of the United States and according a civil trial to all American citizens arrested in Cuba not actually "with arms in hand," he places this Government in the humiliating position of suing for and accepting favors at the hands of the Spanish Government. I was informed shortly before I left Habana that the cases of Messrs. Michaelson and Betancourt had not been closed, but were still open. The two men are, then, merely on parole. The Spanish Government may take their cases up at any time. Michaelson has left Cuba, but Betancourt is still in Habana.

RECOGNIZES NO TREATY RIGHTS.

In not a single instance has Captain-General Weyler officially recognized the treaty rights of United States citizens in such matters. Invariably when he has ordered a civil trial he has announced that he did it as a favor to the United States. In the case of the *Competitor* Americans, he absolutely refused to concede their rights to other than summary trial by court-martial. He insisted, without any foundation in fact for the assumption, that these men were captured with "arms in hand." His own witnesses, Captain Butron, the engineer, and other officers of the war launch *Mensajerra*, which captured the *Competitor*, testified that the men made no resistance whatever; that they yielded to the demands of the officers of the *Mensajerra* without a struggle, and that they had no arms upon their persons.

Nevertheless, the captain-general would have carried out the sentence of death imposed had not the activity of your Department compelled an order from the home Government at Madrid ordering the sentences to be suspended. It is the general belief in Habana that dozens of Americans occupy cells in the military prisons in the eastern part of the island, and have been there for months past, without a hearing of any kind. In this contemptuous manner does Captain-General Weyler regard and treat Americans generally.

My statements of outrages perpetrated on the peasantry of Cuba by the officers of the Spanish army, and Colonel Melquizo in particular, are susceptible of the clearest and most conclusive proof, while on the other hand they are, I am convinced, only the merest hints of the dreadful state of affairs which really exists in Cuba. Were it possible to relieve some of the most important and highly respected men in the Island of Cuba from the fear of revengeful punishment by the Spaniards, I would give the names of the men of the highest standing and wealth who have witnessed every one of the horrors to which I have referred in my press dispatches.

VICTIMS OF THE "BUTCHER."

Some of the cases to which I have referred are as follows:

These men were shot without the slightest pretense at a trial near Campo Florida, near Habana: Domingo Lumones, Ramon Castellinos, Manuel Martinez, Jose Cejas, Jesus Ochoa Rodriguez, Joaquin Merina, Bargarito Zarzas, Eleno Guerra, Marguerito Verole, Basilio Rubiro, M. V. Collina, Florencio Rabelli, Benigno Galloso and son, Pedro Cardenas, his wife, Julia, and another woman named Maria Luiz; Apolo Camaronas, Inocento Rabell, Eduardo Sardenes, Cruse Ferrer, Abelardo Cartaya, Martin Diaz and son, Francisco Ferrer, Leonardo Llerena, Caridad Roys, Luz Guiterrez and son, and many others.

I might cite by name a list of men and women which would cover many pages of this statement, all of whom were murdered by the Spanish troops without the slightest excuse other than the unproved belief that they were Cuban sympathizers. It should be remembered that all these to whom I refer were noncombatants—peaceful white citizens engaged in following their daily callings when ruthlessly assassinated by the heartless men under Captain-General Weyler. Such murders are occurring daily, almost hourly, throughout the island. Weyler absolutely denies that these men are murdered, and asserts that they are killed in battle.

OFFERED TO PROVE HIS STORIES.

I personally offered to prove to the captain-general that if his officers report that these deaths are the regular casualties of battle their reports are false. I offered to take him or any reliable man whom he might designate and who should not be known as a Spanish official to the districts where these brutal killings occurred and bring him in contact with men who saw the executions, who knew that the victims were not soldiers in the army of the Cuban Republic, had never borne arms, and were not intending to bear arms; that they were peaceful farmers and farm laborers who, at the time they were murdered, were pursuing the peaceful callings of their inoffensive lives.

It was also called to my attention and proved that Captain-General Weyler was at the time I left Habana engaged in equipping his men with brass-tipped bullets, contrary to the convention signed at Geneva by Spain and all other civilized nations. Thus he violates the law of nations in the conduct of his warfare. After this bullet enters the body the brass tip spreads, mutilating flesh, tissues, and bones, and being likely to cause blood poisoning. These bullets I have myself seen.

Forty-eight hours before leaving Habana I wrote a farewell letter to Captain-General Weyler, in which I informed him of the monstrous conduct of his officers in the field, and concluded with this language:

"You still have time to order my arrest. I invite you to do so, and guarantee that an investigation shall be made, the result of which will prove you to be the most barbarous military savage the world has ever known."

The captain-general ignored such a vigorously worded challenge as that. In the letter I described to him the conduct of Colonel Melquizo's command while on the march from Jiquiabo to Minas. The soldiers were in the town of Jiquiabo.

CONDUCT OF SPANISH TROOPS.

From an eyewitness, a man of the highest standing in Cuba, who was present that night, I gathered the following information:

There was not a morsel of food in the town that had not been confiscated by Melquizo's men. Every food animal and fowl had been killed, and the people were compelled to appeal to the soldiers for sufficient food to drive away hunger. The women of Jiquiabo were in a state of terror bordering upon insanity because of the infamous conduct of the soldiers toward them. This conduct aroused the indignation of the men of the town, and they appealed to Melquizo in person for protection for the women.

His reply was that no loyal Spanish woman would refuse a Spanish soldier anything, and he presumed the women of Jiquiabo were loyal Spanish subjects. An instance was related by my informant of two soldiers entering a hut where they found a woman alone. They first spoke to her in such language as no good woman would listen to. Finally they attacked her. She secured a knife and fought them off as best she could until, when her strength was almost exhausted, she broke away from them and ran into the field. The men followed her and, realizing that the thought of escape was hopeless, the poor woman drove a knife into her breast and within a few minutes was a corpse. The name of this woman was Maria Garmuza.

This is only one of dozens of similar cases that have been reported to me. My information is of the most reliable kind, and, were a proper investigation made, I could prove it beyond a shadow of a doubt.

THE MILITARY SITUATION.

As to the military situation on the island: Enough people in this country to command respect believe that the Spaniards represent the only real army in Cuba from a soldier's point of view, and that the army of the Cuban Republic is composed of mere wandering bands of destroying outlaws led by men who respect and are subject to no law whatever. This is untrue. The Spaniards are in point of numbers superior to their opponents, but the leaders of the army of the Republic have exhibited superior brains, courage, and military genius.

Landing on the island with only a small following a year ago last February, Generals Gomez and Maceo have now under their command in the neighborhood of 100,000 men, whose numbers would be very largely increased if the men who desire to join them could pass through the Spanish lines. The Republic is in possession of almost the whole of the interior of the island. There is scarcely a town that they have not attacked and occupied.

To do this they have been compelled to drive the Spanish garrisons out of the cities, and they have done it most successfully whenever it has been attempted. The only portions of Cuba which the Spaniards have managed to hold are the capital, Habana, and other towns on the seacoast, where they have been favored with the protection of the Spanish gunboats. With their men as well armed as are the Spaniards, the Cubans could unquestionably overcome that advantage and hold the entire island against any force Spain might send against them. Even as it is the Cubans now menace the capital. General Gomez, with nearly 30,000 men, is marching westward and has reached a point in Matanzas close enough to the city of Habana to cause the authorities great trepidation.

HABANA CAN BE TAKEN.

The capital is in almost a defenseless condition against a land attack, the captain-general having sent nearly all of his available forces to the Province of Pinar del Rio to reenforce the trocha which he has established from the northern to the southern coast of the island. The fortress at Cabanas and the fortress of Santa Clara, which is situated in the city of Habana to the west of the harbor, might prove quite effectual against an attack by sea, but would, in the opinion of military men whom I have interviewed in Habana, prove totally inadequate to defend the city from an invasion on the land side. The only protection the capital has from an attack by land are a few insignificant stockade forts erected around the outskirts and garrisoned by poorly equipped, undrilled, half-starved volunteers, who, during the hours when they are off duty, may be seen in the streets of Habana asking alms of citizens like ordinary beggars.

It seems incredible that such men would succeed in holding Habana against an attack by such fighters as the Cubans under General Gomez have, on more than one occasion, proven themselves to be. In a march of over 500 miles which the commander-in-chief of the Cuban army has made since he left Puerto Principe on his second invasion he has not had a battle nor even a skirmish with the Spaniards, who have persistently avoided a trial of strength. The march has been made without the loss of a single man on either side,

and, incidentally, hundreds of peasants have swelled the ranks of the Cuban army by enlisting under General Gomez.

In Pinar del Rio Province General Maceo is commander of the situation. He has a comparatively small force, consisting, I have been told, of not over 5,000 men, who, however, are well-trained fighters and splendidly equipped with arms and ammunition. On the trocha, it was reported to me, there are over 40,000 Spanish soldiers, against which body of men flying columns of Spaniards, consisting of from 1,500 to 5,000 soldiers each, are attempting to drive Maceo's troops.

GENERAL MACEO'S VICTORIES.

They find it impossible, however, to get Maceo into a position from which he can not escape, and whenever he has met a force of Spaniards in battle he has invariably succeeded in defeating his enemies. For proof of this, his battles with the Alphonso XIII Battalion and with the force under General Suarez Inclan at the battle of Cacarajicara may be cited. After ten hours of fighting Maceo drove Colonel Dubos and the Alphonso XIII Battalion back to the seacoast, where they were compelled to take refuge on board the gunboat *Alerta*. The Spanish loss at this engagement was nearly 1,000, while General Maceo suffered a loss of not more than 200.

At Cacarajicara Maceo led Inclan into a trap and drove him back to Bahia Honda with great loss. This appears to be the fate of the flying columns that are sent after Maceo, while, on the other hand, hundreds of Spaniards on the trocha are being exterminated daily by yellow fever and other diseases.

The death rate is so high on the trocha that the supply of Spanish soldiers to take the places of those who have succumbed to disease is exhausted, and General Weyler has been driven to the extremity of calling upon the volunteers from Habana to reenforce the line. At the time I left Habana the captain-general had attempted to make a draft on the volunteers to go to the trocha, and these young men (who correspond to the State militia in this country) were in open rebellion against his order. The position they assumed was that it was their duty to guard the banks and public buildings of Habana in addition to doing guard duty generally around the city and its outskirts, and that neither General Weyler nor any other commander had authority to order them into the field.

CUBANS IN GOOD CONDITION.

The Cubans are in a position to maintain the present state of affairs for the next twenty years if Spain can find resources to keep up her end of the war for that length of time. Up in the mountains the leaders of the army of the republic have established ranches, where men are engaged in breeding and raising cattle for food purposes. The raising of vegetables is also encouraged by the Cuban commanders, and in addition to this means of subsistence they have the native food plants that grow in wild profusion all over the island.

From this it will be readily understood that no matter how long the war should last, or how much privation they should suffer in other directions, the republican army will never suffer dangerously from lack of food. As the Cubans are in a position to stop all farming except such as they indulge in themselves, the Spaniards will presently find that their own shortage of food is a great drawback to their campaign, and they will be compelled to resort to importing their rations from the United States, Spain, or some other country.

The Cubans have been accused of incendiarism in a criminal sense because they have destroyed sugar cane, tobacco, mills, and plantations. They insist that they should not be regarded as criminals, but that the orders which the commanders issued for the destruction of the island were justifiable war measures.

DESTROYED WITH OWNERS' CONSENT.

I have personal knowledge that in a great many cases the plantations have been destroyed with the consent of the owners. In fact, a great number of owners of plantations that have been destroyed informed me personally that they had invited the Cubans to do so because they did not want to grind their cane and thereby supply revenues to the Spanish Government. The fact that wealthy men cherish such hostility to Spain and are ready to help the Cubans in their fight should be sufficient refutation of the charge that the war for Cuban freedom is only backed by the ignorant classes and negroes.

I found that nearly three-fifths of the population of the island were either actively engaged in the war on the Cuban side or that the revolution enjoyed their active sympathy and support. Of course, these men dare not utter their sentiments openly, but they have willingly ruined themselves to aid the cause, and to those whom they can trust not to betray them they are not in the least backward in expressing their views.

Respectfully submitted.

FREDERICK W. LAWRENCE.

MAY 18, 1896.

Mr. MITCHELL of Oregon obtained the floor.

Mr. HALE. Mr. President——

Mr. MITCHELL of Oregon. I yield to the Senator from Maine.

Mr. SHERMAN. I rise to make a privileged motion under the thirty-fifth rule.

The PRESIDING OFFICER. The Chair recognized the Senator from Oregon, and he yielded to the Senator from Maine. Does the Senator from Oregon yield to the Senator from Ohio?

Mr. SHERMAN. I desire under the thirty-fifth rule to make a privileged motion. In my opinion the pending business requires secrecy, and I therefore ask that the galleries be cleared and the doors closed.

The PRESIDING OFFICER. Is there a second to the motion of the Senator from Ohio?

Mr. MILLS. I second the motion if the Senator from Ohio wishes to make it.

The PRESIDING OFFICER. The motion is seconded. Under the thirty-fifth rule the Chair directs the galleries to be cleared and the doors to be closed.

The Senate proceeded with closed doors to consider the resolution.

After forty minutes (at 1 o'clock and 2 minutes p. m.) the doors were reopened.

Mr. LODGE and Mr. MORGAN addressed the Chair.

Mr. HILL. I move that we go into secret session. That motion is in order.

The PRESIDING OFFICER. Is the motion seconded?

Mr. VEST and Mr. WHITE. I second the motion.

Mr. ALDRICH. I suggest that the rule be read. I think there is nothing in the rule which provides that we can go into secret session unless there is a matter pending before the Senate which in the opinion of Senators is required to be conducted in secret. No such matter is now pending before the Senate.

Mr. HILL. Yes; there is.

Mr. ALDRICH. Not that I am aware of.

Mr. HARRIS. I ask the unanimous consent of the Senate that the doors, notwithstanding the vote just taken, remain closed until the Senator from Alabama [Mr. MORGAN] shall have concluded his remarks.

Mr. MORRILL. I second that request.

Mr. HILL. Until otherwise ordered. Who knows but that some one else may want to speak?

Mr. HARRIS. Very well; until otherwise ordered by the Senate.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

Mr. MITCHELL of Oregon. I object to it.

Mr. SHERMAN and others. Question.

Mr. MITCHELL of Oregon. I do not object to the Senator from Alabama concluding his remarks.

Mr. MORRILL. That is all we ask.

Mr. HARRIS. I will confine my request to the conclusion of the remarks of the Senator from Alabama.

Mr. MITCHELL of Oregon. To that I do not object.

Mr. HARRIS. And then the future can take care of itself.

Mr. CULLOM. I hope there will be unanimous consent given to the request.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee? The Chair hears none. The Sergeant-at-Arms will clear the galleries and close the doors.

The doors were thereupon closed, and at the expiration of twelve minutes were reopened.

PROPOSED RESTRICTION OF IMMIGRATION.

Mr. LODGE. I move that the Senate proceed to the consideration of the bill (H. R. 7864) to amend the immigration laws of the United States.

Mr. MORGAN. May I inquire, as a matter of parliamentary information, what is the status of the resolution on which I have been talking?

The PRESIDING OFFICER. The Chair supposes that the resolution goes to the Calendar. The question is on agreeing to the motion of the Senator from Massachusetts to proceed to the consideration of the bill indicated.

Mr. MILLS. Let us have the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. FAULKNER (when his name was called). I am paired with the Senator from West Virginia [Mr. ELKINS].

Mr. GEAR (when his name was called). I am paired with the senior Senator from Georgia [Mr. GORDON].

Mr. MCBRIDE (when his name was called). I am paired with the Senator from Mississippi [Mr. GEORGE]. If he were present, I should vote "yea."

Mr. PASCO (when his name was called). I am paired with the Senator from Washington [Mr. WILSON]. In his absence I withhold my vote.

Mr. PERKINS (when his name was called). I am paired with the junior Senator from North Dakota [Mr. ROACH]. If he were present, he would vote "nay" and I should vote "yea."

Mr. PRITCHARD (when his name was called). I am paired with the Senator from Louisiana [Mr. BLANCHARD]. If he were present, I should vote "yea."

Mr. PUGH (when his name was called). I am paired with the senior Senator from Massachusetts [Mr. HOAR].

Mr. SEWELL (when his name was called). I am paired with the Senator from Wisconsin [Mr. MITCHELL]. If he were present, I should vote "yea."

Mr. WALTHALL (when his name was called). I am paired with the Senator from Pennsylvania [Mr. CAMERON].

Mr. WETMORE (when his name was called). I am paired with the junior Senator from Georgia [Mr. BACON]. If he were present, I should vote "yea."

The roll call was concluded.

Mr. PALMER. I should like to ask if the Senator from North Dakota [Mr. HANSBROUGH] has voted?

The PRESIDING OFFICER. The Chair is informed that he has not voted.

Mr. PALMER. I withhold my vote, being paired with that Senator.

Mr. CARTER. I have a general pair with the junior Senator from Maryland [Mr. GIBSON], and therefore withhold my vote. I desire to announce that my colleague [Mr. MANTLE] is paired with the junior Senator from Virginia [Mr. MARTIN].

Mr. DUBOIS. I am paired with the senior Senator from New Jersey [Mr. SMITH].

Mr. BATE (after having voted in the negative). I voted, but I

am paired with the Senator from Utah [Mr. BROWN], whom I do not see in the Chamber, and as he has not responded to his name, I withdraw my vote.

Mr. CULLOM. I have a general pair with the Senator from Delaware [Mr. GRAY]. If he were present, I should vote "yea."

Mr. BURROWS. I have a pair with the senior Senator from Louisiana [Mr. CAFFERY].

The result was announced—yeas 23, nays 8; as follows:

YEAS—23.

Aldrich,	Gallinger,	Peffer,	Shoup,
Butler,	Hale,	Pettigrew,	Stewart,
Cannon,	Hawley,	Platt,	Teller,
Chandler,	Lodge,	Proctor,	Warren,
Clark,	Mitchell, Oreg.	Quay,	Wolcott.
Davis,	Morrill,	Sherman,	

NAYS—8.

Berry,	Chilton,	Jones, Ark.	Vilas,
Brice,	Harris,	Lindsay,	White.

NOT VOTING—58.

Allen,	Daniel,	Jones, Nev.	Pugh,
Allison,	Dubois,	Kyle,	Roach,
Bacon,	Elkins,	McBride,	Sewell,
Baker,	Faulkner,	McMillan,	Smith,
Bate,	Frye,	Mantle,	Squire,
Blackburn,	Gear,	Martin,	Thurston,
Blanchard,	George,	Mills,	Tillman,
Brown,	Gibson,	Mitchell, Wis.	Turpie,
Burrows,	Gordon,	Morgan,	Vest,
Caffery,	Gorman,	Murphy,	Voorhees,
Call,	Gray,	Nelson,	Walthall,
Cameron,	Hansbrough,	Palmer,	Wetmore,
Carter,	Hill,	Pasco,	Wilson.
Cockrell,	Hoar,	Perkins,	
Cullom,	Irby,	Pritchard,	

The PRESIDING OFFICER. No quorum has voted. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Aldrich,	Davis,	Morgan,	Shoup,
Allison,	Faulkner,	Palmer,	Stewart,
Bate,	Gallinger,	Pasco,	Teller,
Blanchard,	Gear,	Peffer,	Turpie,
Brice,	George,	Perkins,	Vilas,
Burrows,	Harris,	Pettigrew,	Walthall,
Butler,	Hawley,	Platt,	Warren,
Carter,	Hill,	Pritchard,	Wetmore,
Chandler,	Lindsay,	Proctor,	White,
Chilton,	Lodge,	Pugh,	Wolcott.
Clark,	McBride,	Quay,	
Cockrell,	Mills,	Sewell,	
Cullom,	Mitchell, Oreg.	Sherman,	

The PRESIDING OFFICER. Forty-nine Senators have answered to their names. A quorum is present. The question recurs upon the motion of the Senator from Massachusetts to proceed to the consideration of the bill known as the immigration bill.

Mr. HILL. Will the Senator from Massachusetts indulge me for just a moment?

Mr. LODGE. Certainly.

Mr. HILL. The Senator from Maryland [Mr. GIBSON], who is a member of the Immigration Committee, is opposed to this bill, and desires to be present when it is considered, I understand. Has the Senator from Massachusetts had any conversation with him in regard to it?

Mr. LODGE. I have had several conversations with him. I have told him over and over again that I should call up the bill at the earliest opportunity. He has been fully notified in regard to it. He knows that I intended to call it up at the earliest opportunity; that I considered it a bill of great importance and desired to get it up.

Mr. HILL. The Senator from Maryland [Mr. GORMAN] made a statement on the floor yesterday afternoon, the exact details of which I do not recollect, to the effect that the junior Senator from Maryland [Mr. GIBSON] was expected here some time this afternoon.

Mr. FAULKNER. He is on the Naval Academy Board.

Mr. HILL. He is on the Naval Academy Board, on official business.

Mr. HARRIS. If the Senator from New York will allow me, I will state that before leaving the Senator from Maryland [Mr. GIBSON] especially requested me to ask that the bill should not be considered until he could return. He is one of the Visitors to Annapolis. I do not know how soon, but I suppose it can not be more than a day or two or three days before the work of the Board will be completed, and I hope, as a courtesy to an absent Senator, off on official duty, that the bill may go over.

Mr. LODGE. The bill will not be disposed of in the absence of the junior Senator from Maryland. It is a matter, I take it, which will arouse some discussion. I do not myself know whether it will or not, but I suppose it will. If the bill never is to be taken up in the absence of a given Senator, he has nothing to do but to absent himself in order to kill any bill. I told the junior Senator from Maryland that I meant to call up the bill at any time. He is perfectly aware of my intention. I said it over and over again. He consulted me about going to Annapolis, but I told him that I could not agree to delay the consideration of the bill; that I must take advantage of the first opportunity to call it up.

Mr. HARRIS. Am I mistaken in supposing that I understood the junior Senator from Massachusetts to say yesterday evening that if the bill were taken up——

Mr. LODGE. I said I would not ask that it be taken up for consideration at that time. I assumed that the junior Senator from Maryland would return to-day.

Mr. HARRIS. My impression is that the Senator said he would allow the bill to go over until the return of the junior Senator from Maryland.

Mr. LODGE. No; on the contrary, I said that I would call it up to-day.

Mr. CHANDLER. I should like to state, in the same connection, that I said to the junior Senator from Maryland that I would endeavor to make it certain that the bill would not be taken up on Monday or Tuesday of this week, in order that he might go to Annapolis. But notwithstanding that he has talked with me on the subject several times, he has had no assurance from any one that he could remain away all of this week with the idea that the bill would be delayed on that account.

Mr. HILL. I ask the indulgence of the Senate one moment further. Can the Senator from Massachusetts give us the assurance that the bill will not be disposed of finally, if it shall be taken up, until the return of the junior Senator from Maryland, or until after a reasonable opportunity for him to return? With that understanding I suppose there will be no objection to taking up the bill.

Mr. LODGE. I do not understand exactly what the statement of the Senator from New York is.

Mr. HILL. I understood the Senator from Massachusetts to say a moment ago that the bill would not be or could not be disposed of—would not be probably—until the junior Senator from Maryland had an opportunity to return. What did the Senator mean by that statement?

Mr. LODGE. I meant that the bill might give rise to discussion. I do not know whether or not it will. No one has said anything about opposing the bill except the junior Senator from Maryland. It has been discussed. It is the Senate bill which is here and which has been discussed already.

Mr. HILL. If the junior Senator from Maryland is the sole opponent who desires to discuss the bill, I do not believe, from my observation here in the Chamber, that the Senator will take very long. He has not participated in debate very frequently, although he has a great interest in this bill.

Mr. LODGE. He has already made one speech of a couple of hours against the bill, and I dare say he may wish to renew it.

Mr. HILL. That, I think, was in answer to the speech of the Senator from Massachusetts, which took about an hour.

Mr. LODGE. Yes, sir; I think so.

Mr. CHANDLER. I desire to state further that the visitation at Annapolis concludes to-morrow, so that the junior Senator from Maryland can certainly be here on Monday. Possibly the Senator from New York can give us some information as to how soon Congress will get off the hands of the President and go away.

Mr. HILL. I am not controlling this Congress.

The PRESIDING OFFICER. The debate has thus far proceeded by unanimous consent.

Mr. LODGE. I should like to say one word.

Mr. HILL. I was only endeavoring to reach some adjustment of the matter.

Mr. LODGE. I am aware that the debate is proceeding by unanimous consent. The junior Senator from Maryland, whose interests are being cared for, is only so far away as Annapolis. I will gladly agree not to press the bill this afternoon. If it is taken up, I will agree that it may be temporarily laid aside. That will give the junior Senator from Maryland ample time to return to-morrow.

Mr. FAULKNER. I do not think the Senator from Maryland will get back here before to-morrow evening. I was on the Board last year. We worked very hard and could not get through before Saturday evening. I think it will take the Board fully until Saturday evening before the members can leave.

Mr. LODGE. If the junior Senator from Maryland is so interested in this bill as he is described to be, I think he could make an effort to come back here to-morrow. I will willingly agree not to press the bill this evening, but I should like to have it taken up and made the order of business. I will gladly agree not to press the bill for consideration to-day.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Massachusetts [Mr. LODGE] to proceed to the consideration of the immigration bill, upon which the yeas and nays have been ordered. The Secretary will call the roll on agreeing to the motion of the Senator from Massachusetts.

The Secretary proceeded to call the roll.

Mr. FAULKNER (when his name was called). I am paired with the Senator from West Virginia [Mr. ELKINS].

Mr. GEAR (when his name was called). I am paired with the senior Senator from Georgia [Mr. GORDON]. If he were present, I should vote "yea."

Mr. PALMER (when his name was called). I announce my pair with the Senator from North Dakota [Mr. HANSBROUGH] and withhold my vote.

Mr. PASCO (when his name was called). I am paired with the Senator from Washington [Mr. WILSON]. In his absence I withhold my vote.

Mr. PERKINS (when his name was called). I again announce my pair with the junior Senator from North Dakota [Mr. ROACH].

Mr. PUGH (when his name was called). I am paired with the Senator from Massachusetts [Mr. HOAR].

Mr. SEWELL (when his name was called). I again announce my pair with the Senator from Wisconsin [Mr. MITCHELL].

Mr. WETMORE (when his name was called). I am paired with the junior Senator from Georgia [Mr. BACON].

The roll call was concluded.

Mr. BATE (after having voted in the negative). I desire to inquire if the vote of the Senator from Utah [Mr. BROWN] is recorded?

The PRESIDING OFFICER. It is not recorded.

Mr. BATE. Then I withdraw my vote, being paired with that Senator.

Mr. CULLOM. I have a general pair with the Senator from Delaware [Mr. GRAY]. If he were present, I should vote "yea."

Mr. PRITCHARD. On this vote I am paired with the Senator from Louisiana [Mr. BLANCHARD]. If he were present, I should vote "yea."

The result was announced—yeas 25, nays 9; as follows:

YEAS—25.

Aldrich,	Gallinger,	Peffer,	Smith,
Allison,	Hale,	Pettigrew,	Teller,
Cannon,	Hawley,	Platt,	Warren,
Chandler,	Lodge,	Proctor,	Wolcott.
Clark,	McBride,	Quay,	
Davis,	Mitchell, Oreg.	Sherman,	
Dubois,	Morrill,	Shoup,	

NAYS—9.

Brice,	Harris,	Lindsay,	Vilas,
Chilton,	Hill,	Morgan,	White.
Cockrell,			

NOT VOTING—55.

Allen,	Cullom,	Jones, Ark.	Pugh,
Bacon,	Daniel,	Jones, Nev.	Roach,
Baker,	Elkins,	Kyle,	Sewell,
Bate,	Faulkner,	McMillan,	Squire,
Berry,	Frye,	Mantle,	Stewart,
Blackburn,	Gear,	Martin,	Thurston,
Blanchard,	George,	Mills,	Tillman,
Brown,	Gibson,	Mitchell, Wis.	Turpie,
Burrows,	Gordon,	Murphy,	Vest,
Butler,	Gorman,	Nelson,	Voorhees,
Caffery,	Gray,	Palmer,	Walthall,
Call,	Hansbrough,	Pasco,	Wetmore,
Cameron,	Hoar,	Perkins,	Wilson.
Carter,	Irby,	Pritchard,	

The PRESIDING OFFICER. No quorum having voted, the Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Aldrich,	Cockrell,	Mitchell, Oreg.	Quay,
Allison,	Cullom,	Morgan,	Sewell,
Bate,	Davis,	Morrill,	Sherman,
Berry,	Dubois,	Palmer,	Shoup,
Brice,	Faulkner,	Pasco,	Stewart,
Burrows,	Gallinger,	Peffer,	Teller,
Butler,	Gear,	Perkins,	Turpie,
Cannon,	Harris,	Pettigrew,	Vilas,
Carter,	Hawley,	Platt,	Warren,
Chandler,	Lindsay,	Pritchard,	Wetmore,
Chilton,	Lodge,	Proctor,	White,
Clark,	McBride,	Pugh,	Wolcott,

The PRESIDING OFFICER. Forty-seven Senators have answered to their names. A quorum is present. The question recurs upon agreeing to the motion of the Senator from Massachusetts to proceed to the consideration of the immigration bill.

Mr. HILL. I have learned from the Senator from Michigan [Mr. BURROWS] that the Senator from Maryland [Mr. GIBSON] is still on official business at Annapolis. The Senator from Massachusetts [Mr. LODGE] informs me that he does not desire to press the bill to a conclusion in the absence of the junior Senator from Maryland, and if the bill is taken up, as I understand it, he has no objection to its going over for actual consideration until Monday.

Mr. LODGE. I will very gladly allow the bill to be laid aside temporarily, by unanimous consent, until Monday, when I understand the junior Senator from Maryland will return.

Mr. HILL. With that understanding I can see no objection, so far as I am concerned, to allowing the bill to be taken up. I think that is the wisest course under all the circumstances.

Mr. HARRIS. I ask unanimous consent that the demand for the yeas and nays may be withdrawn.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the demand for the yeas and nays is withdrawn. The question is on agreeing to the motion to proceed to the consideration of the immigration bill.

The motion was agreed to.

Mr. MORGAN. I send to the desk an amendment which I intend to propose to the immigration bill, which I ask to have read.

The PRESIDING OFFICER. The proposed amendment will be stated.

The Secretary read as follows:

Provided, That this act shall not apply to persons arriving in the United States from any port or place in the Island of Cuba.

The PRESIDING OFFICER. The proposed amendment will be printed, and lie on the table.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 4020) to increase the pension of Mrs. William Loring Spencer, widow of Gen. George E. Spencer.

MRS. EMILY E. CASH.

Mr. PRITCHARD. I am directed by the Committee on Pensions, to whom was referred the bill (H. R. 8248) to increase the pension of Mrs. Emily E. Cash, to report it without amendment. I ask unanimous consent for the present consideration of the bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to increase the pension of Mrs. Emily E. Cash, widow of Private Thomas W. Cash, a soldier in the Mexican war, to $20 a month.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

REPORT OF THE MONETARY COMMISSION OF 1876.

Mr. BUTLER. I offer a resolution, which I ask may be read and considered at the present time. It is simply to have a document printed.

The Secretary read the resolution, as follows:

Resolved, That there be printed 5,000 additional copies of Report No. 703, Forty-fourth Congress, second session, known as the Report of the Monetary Commission of 1876.

The PRESIDING OFFICER. By the rules of the Senate the resolution will go to the Committee on Printing.

Mr. BUTLER. It is to print additional copies. It is done every day here. I suppose there will be no objection to it. The edition of the document is exhausted.

The PRESIDING OFFICER. By the rules of the Senate the resolution has to go to the Committee on Printing.

Mr. BUTLER. If the Chair will pardon me, inasmuch as the edition is now entirely exhausted, I ask that the resolution be amended so as to read "3,000 copies," and that will bring it within the rule.

The PRESIDING OFFICER. Is there objection to the consideration of the resolution?

Mr. HANSBROUGH. I think it will be necessary to send the resolution to the Committee on Printing, for the reason that in cases of this kind the committee are obliged to obtain an estimate of the cost of the work from the Government Printer before authorizing the printing.

Mr. BUTLER. I will limit the number to a sum that will bring it within the rule. I hope the Senator from North Dakota will not object to it. This is the size of the document [exhibiting], and the resolution is for an additional number.

The PRESIDING OFFICER. The Chair was of the impression that the rule to refer to the Committee on Printing said "unless otherwise ordered by the Senate," but the Chair finds that motions to print an additional number shall be referred to the Committee on Printing. The rule is imperative. The resolution must go to the Committee on Printing.

Mr. BUTLER. By unanimous consent the Senate has often waived the rule. I have often had resolutions of this kind passed. I ask unanimous consent that 1,000 copies may be printed without a reference to the Committee on Printing. I will make the number small, but inasmuch as the edition is exhausted, I ask that a thousand copies be printed, because there is not one copy left in the document room.

Mr. HANSBROUGH. I shall not object to the printing of that number.

The PRESIDING OFFICER. The Senator from North Carolina proposes to modify the resolution. The resolution as modified will be read.

The Secretary read as follows:

Resolved, That there be printed 1,000 additional copies of report No. 703, Forty-fourth Congress, second session, known as the Report of the Monetary Commission of 1876.

The PRESIDING OFFICER. The Senator from North Carolina asks unanimous consent that the resolution may be considered at this time without a reference to the Committee on Printing. Is there objection?

Mr. HALE. What is the question?

The PRESIDING OFFICER. The resolution will be again read.

The Secretary again read the resolution.

Mr. HALE. Let the resolution go to the Committee on Printing.

Mr. BUTLER. I ask the Senator from Maine not to object. There is not one copy in the document room. This is the size of the document [indicating]. I ask for only 1,000 copies.

Mr. HALE. The rule of the Senate is an arbitrary one as to resolutions for printing, as it is in reference to payments from the contingent fund.

Mr. CULLOM. It is the law.

Mr. HALE. It is the law. Heretofore no question has ever been raised, and a request for unanimous consent has never been presented. Such resolutions go, as a matter of course, to the Committee on Printing. The committee will examine the subject, and, if it is a suitable and proper thing to do, will report the resolution very quickly.

Mr. PEFFER. I will say for the information of all parties concerned that early in the present session I offered a resolution of a similar character, and it was referred to the Committee on Printing and has not yet been reported. I do hope that whatever action is taken we shall have this printing done. It is a very important document. There is great demand for it.

Mr. HALE. I will state to the Senator from Kansas that I understand the printing he proposed would involve a very large expense and the committee did not think it worth while to embark on it.

Mr. BUTLER. I say to the Senator from Maine that I have myself presented several resolutions at this session where I would find a document exhausted and had requests from my constituents for them, and unanimous consent was given for the printing of additional copies, and there was never an objection interposed. This has been frequently done at the present session by others, and I have done it several times. There is not a copy of this document in the document room, and I have a number of requests for it. I have waited at this session because the Senator from Kansas told me he would ask to have it done. I ask the Senator from Maine not to object. Congress is about to adjourn and there is not a copy of it in the document room.

The PRESIDING OFFICER. The Secretary will read paragraph 2 of Rule XXIX.

The Secretary read as follows:

Motions to print additional numbers shall also be referred to the Committee on Printing; and when the committee shall report favorably the report shall be accompanied by an estimate of the probable cost thereof; and when the cost of printing such additional numbers shall exceed the sum of $500, the concurrence of the House of Representatives shall be necessary for an order to print the same.

The PRESIDING OFFICER. The Chair thinks that the resolution must go to the Committee on Printing.

Mr. BUTLER. Then, if it is going to the committee, as I am anxious to get a few copies before we adjourn, I ask leave to modify my resolution so as to provide for 3,000 copies and put it under the $500 limit. We can just as well print 3,000 copies as 1,000, and that number will come under the limit.

The PRESIDING OFFICER. The Senator from North Carolina proposes to modify his resolution so that it will provide for 3,000 copies instead of 1,000 copies. The Senator has that right. The resolution, as modified, will be referred to the Committee on Printing.

MRS. WILLIAM LORING SPENCER.

Mr. GALLINGER submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 4020) to increase the pension of Mrs. William Loring Spencer, widow of Gen. George E. Spencer, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House, and agree to the same with an amendment as follows: In lieu of the amount proposed to be inserted insert "fifty"; and the House agree to the same.

J. H. GALLINGER,
JOHN M. PALMER,
Managers on the part of the Senate.
W. C. ANDERSON,
W. S. KERR,
Managers on the part of the House.

The report was concurred in.

SECOND-CLASS MAIL MATTER.

Mr. BUTLER. I submit a resolution which will not lead to any discussion, and I ask for its adoption.

The resolution was read, as follows:

Resolved by the Senate, That the Postmaster-General be, and is hereby, directed to send to the Senate a copy of any and all rulings that have been made by him, or any official in the Post-Office Department, with reference to second-class mail matter during the last six months, including a ruling recently made prohibiting the passage through the mails, as second-class matter, certain publications which had before been allowed to pass as second-class matter, or any such orders or rulings that have been made and temporarily suspended, accompanied with the reasons for making such orders, and also the reasons for temporarily suspending such orders, if such orders have been made and temporarily suspended.

Mr. WOLCOTT. Let the resolution go over.

The PRESIDING OFFICER. The resolution will go over.

CONTEMPTS OF COURT.

Mr. BUTLER. I submit an amendment intended to be proposed by me to the bill (S. 2984) in relation to contempts of court, which the Senator from New York [Mr. HILL] gave notice that he would call up at an early day.

Inasmuch as the bill proposes to deprive persons of the right of trial by jury, I should like to get the amendment in. It relates to a vital question.

The PRESIDING OFFICER. The amendment will be received and printed.

ISSUE OF BONDS IN NEW MEXICO.

Mr. BRICE. I ask that the bill (H. R. 9275) approving certain acts of the legislative assembly of the Territory of New Mexico authorizing the issue of certain bonds of said Territory, which was called up yesterday by the chairman of the Committee on Territories, the Senator from Minnesota [Mr. DAVIS], be taken up and put upon its passage. It was read yesterday.

The PRESIDING OFFICER. The Senator from Ohio asks unanimous consent for the present consideration of the bill indicated by him.

Mr. BRICE. I ask that the Secretary read the statement made by the chairman of the Committee on Territories yesterday and what immediately followed.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The PRESIDING OFFICER. It is requested that the Secretary shall read the statement made by the chairman of the Committee on Territories yesterday.

Mr. HALE. That is not needed.

Mr. DAVIS. The bill has been read.

Mr. BRICE. The Senator from Minnesota is in the Senate Chamber, and I will withdraw the request and ask that the bill be put on its passage.

Mr. DAVIS. The bill was read in full yesterday. There is no occasion to read it again.

Mr. BATE. Mr. President, I wish to state that yesterday when this bill was called up I indicated my opposition to it, and I caused it to be laid over for a day that Senators might inform themselves of its object and terms, and I oppose it now. I do not desire, however, to delay the action of the Senate upon it. The bill in substance, though not this one, was before the Committee on Territories, of which I am a member. I observed yesterday when this bill was called up that no one of the committee was present except myself and the chairman, who reported the bill, and he reported it as coming from the committee. I want to say that it was not a unanimous report, and that I, at least, opposed it. The chairman brought it to me, and I agreed that he might report it to the Senate for its action, although I opposed the bill. And I now oppose it.

I think, without pretending to go into a discussion of its merits or demerits by detail, for I have not the data on which to do so, that it is unwise legislation. There are several series of bonds that have been issued by the Territory of New Mexico for quite a large amount, and of different character, due at different times, and some of those bonds have been refunded. The measure presents quite a complication in that regard, and I hold that it is unwise legislation for the General Government to permit the Territory to go on and pass her laws and issue her bonds, and then come afterwards and ask that the Congress of the United States shall, in the language of the bill, validate, approve, and confirm the issuance of those bonds, thus validating the laws under which they were issued and the means by which it was done. Yes, Mr. President, this bill is to validate, confirm, and approve the action of the legislature and the issuance of these bonds, although the United States Government is not bound for their payment. Some of them have been in the courts, as I am informed, and I believe in one instance perhaps adverse decision has been given, but that may have been remedied. I do not know how that is. If it is argued that it is essential that Congress should give its consent to such Territorial action, I think that consent should have been obtained before and not subsequent to the action of the Territory in the issuance of the bonds. However, I am not informed as to the details of this bill, nor as to the sentiment of the people of the Territory in regard thereto. I have understood that there was a division of sentiment there in regard to this matter, but I am not advised in such an authentic way that I can state it. Therefore, without

going into the details of this matter, I shall content myself by giving my vote against the bill. I do not desire to delay the action of the Senate at this late hour of the session upon this bill, but shall vote against it.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

POST-OFFICE APPROPRIATION BILL.

Mr. ALLISON. I desire to call up the Post-Office appropriation bill. I think it will take but a moment to dispose of it. The pending question is on the motion of the Senator from Massachusetts [Mr. LODGE] to recede from a portion of what is known as the Pasco amendment.

The Senate resumed the consideration of the disagreeing votes of the two Houses on amendment numbered 1 of the Senate to the bill (H. R. 6614) making appropriations for the service of the Post-Office Department for the fiscal year ending June 30, 1897.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Massachusetts [Mr. LODGE] to recede from amendment numbered 1.

Mr. ALLISON. I hope the Senator from Massachusetts will withdraw the motion, and I think the conferees on the part of the Senate and the House will be able to adjust it so as to meet the views expressed by him a few days ago respecting the situation in Boston and vicinity.

Mr. LODGE. I merely desire to protect the 190,000 people in the neighborhood of Boston who are affected by the amendment. With the assurance of the Senator from Iowa that the amendment can be modified in conference to meet that difficulty, I will withdraw the motion to recede.

The PRESIDING OFFICER. The motion to recede is withdrawn.

Mr. PASCO. Mr. President, I had intended to make some remarks in reference to the amendment, but as it is going back into conference I will not at present have anything to say. I will state, however, that I have received some communications from the section of country to which the Senator from Massachusetts refers, and I can assure him that the sentiment is by no means unanimous with reference to the amendment. There are very strong influences there which are entirely in favor of the amendment which was offered in and adopted by the Senate. But in the present condition of things I will not have anything to say at this time.

Mr. ALLISON. I move that the Senate insist upon its amendment and request a further conference with the House of Representatives on the disagreeing votes of the two Houses thereon.

Mr. CHANDLER. Mr. President, I am in favor of the motion, and I take occasion to express the hope that the members of the Committee on Appropriations and members of conference committees will expedite their business as fast as possible. I know that with the enlarged jurisdiction which has recently been given to conference committees they require more time in the preparation of their reports, as we require more time to watch the reports when made. Therefore the committees ought to use extraordinary diligence. There is practically no business before the Senate, and we are anxiously waiting here, I will say to the chairman of the committee, now that the New Mexican bond bill has been disposed of, for the reports of conference committees. We are greedy for them, anxious for them, and when they come within reasonable limits we want to vote upon them.

Mr. BRICE. If there is nothing before the Senate I should like to call up a bill.

The PRESIDING OFFICER. There is a motion pending. The Senator from Iowa [Mr. ALLISON] moves that the Senate further insist upon its amendment numbered 1 and request a conference with the House of Representatives on the disagreeing votes of the two Houses thereon.

The motion was agreed to.

By unanimous consent, the Presiding Officer was authorized to appoint the conferees on the part of the Senate at the further conference; and Mr. ALLISON, Mr. PETTIGREW, and Mr. BLACKBURN were appointed.

MRS. EMILY M. VAN DERVEER.

Mr. GALLINGER submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 2143) granting a pension to Mrs. Emily M. Van Derveer, widow of the late Brig. Gen. Ferdinand Van Derveer, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment.

J. H. GALLINGER,
CALVIN S. BRICE,
Managers on the part of the Senate.

C. A. SULLOWAY,
BENSON WOOD,
WILLIAM BAKER,
Managers on the part of the House.

The report was concurred in.

ELECTION OF SENATORS BY DIRECT VOTE.

Mr. MITCHELL of Oregon. Mr. President, I have been endeavoring for some time to have the Senate proceed to the consideration of Senate joint resolution No. 6, providing for an amendment to the Constitution of the United States relating to the election of United States Senators.

Mr. HILL. Will it lead to debate? [Laughter.]

Mr. MITCHELL of Oregon. I have the floor now for that purpose.

Mr. BUTLER. Mr. President——

Mr. MITCHELL of Oregon. I decline to yield further.

Mr. President, it is now so late in the session that I have abandoned any hope of being able to get a final vote on the proposed amendment to the Constitution at this session. I shall ask, however, to have it taken up at this time to enable the Senator from California [Mr. PERKINS] to submit some remarks. I also wish to make a few remarks on the subject, and then I shall ask the Senate to join with me in fixing a time next December when the joint resolution shall be set down for consideration.

I now ask unanimous consent that the regular order be laid aside temporarily, and that the Senate proceed to the consideration of Senate joint resolution No. 6.

The PRESIDING OFFICER. The Senator from Oregon asks unanimous consent that the present order may be laid aside temporarily, and that the Senate proceed to the consideration of the joint resolution named by him. Is there objection? The Chair hears none.

Mr. HILL. I desire to give notice that at the conclusion of the two or three speeches to be made on the proposed constitutional amendment, I shall ask the Senate to take up the bill to provide for the punishment of contempts of court, etc.

Mr. LODGE. I understand that the unfinished business keeps its place.

The PRESIDING OFFICER. The unfinished business keeps its place, it being laid aside temporarily by unanimous consent.

The Senate, as in Committee of the Whole, proceeded to consider the joint resolution (S. R. 6) proposing an amendment to the Constitution of the United States providing for the election of Senators by the votes of the qualified electors of the States.

Mr. MITCHELL of Oregon. Mr. President, it is not my intention at this time to delay the business of the Senate with any extended remarks. I have heretofore on several occasions during the last ten years addressed the Senate at length in favor of the pending proposed amendment to the Constitution. I have on these occasions presented to the extent of my ability the arguments which to my mind are controlling in favor of this legislation, and answered, so far as I could, the objections in opposition to it.

From the first I have not by any means minimized or underestimated the importance of any proposition which has for its purpose any change, no matter what, in our fundamental law. I have realized that any attempt in this direction should only be contemplated, much less sought to be carried out, after the most deliberate consideration of every element involved in the proposition; and especially in proposing any amendment to the Constitution should we be quite certain that the amendment proposed does not either directly or inferentially impinge to the slightest extent on that fundamental principle involved in our governmental structure which the framers of the Constitution by express provision wisely provided should never without the consent of the State interested be disturbed by amendment.

That principle is the one involved in the constitutional provision providing for equal State suffrage in the United States Senate.

The men who made the Constitution, foreseeing the probable necessity that might arise for amendment, provided in that instrument that the Constitution might in all but one respect be amended, and they provided the manner in which any such amendment might be made. In one respect, however, and only one, the framers of the Constitution, regarding that as fundamental, and believing any change in that respect would be destructive of our Government, provided there should never be any change without the consent of the State to be affected. It is well, therefore, that we consider with care whether this proposed amendment trenches, even in the minutest degree, on the principle thus sought to be protected and forever perpetuated.

Article V of the Constitution, after providing the manner in which that instrument may be amended, contains the following proviso:

Provided, * * * That no State, without its consent, shall be deprived of its equal suffrage in the Senate.

This clause is the embodiment of a principle deemed by the framers of the Constitution absolutely essential to the framework—the fundamental political structure of our present form of government—a principle indispensable to the maintenance of the equilibrium of political forces emanating from and operating upon the national and State governments respectively. As to this,

therefore, it was wisely decreed by the authors of our present system of government there never should, on any pretense whatever, while our Government lasted, be any amendment or change without the consent of the State interested.

If, then, it could be shown that the pending proposed amendment in any degree, or to any extent whatever, invades the principle enunciated in this proviso, or that it in any manner opens the door in the slightest degree to future legislation which might have such tendency or effect, then I should at once concede the proposed legislation should not be enacted.

The principle of equal State suffrage in the United States Senate I believe to be one vital to the existence of our Government, and one, therefore, which should not under any circumstances be invaded by legislation of any character whatever; but, while believing this, I am equally firm in the conviction that a change in the mode of choosing United States Senators in no manner enters the domain of this principle or in any manner opens the door to its invasion by future legislation.

The principal objection urged against this amendment, as I understand it, is that, while not directly an infringement of this clause of the Constitution which forever prohibits any amendment which will deprive any State without its consent of its equal suffrage in the Senate, it does, nevertheless, in a measure open the door in a dangerous manner and to an alarming extent to the suggestion of such an amendment in the future, and that, therefore, it is one which should not obtain the sanction of Congress. That this criticism is not warranted is clearly manifest from a careful consideration of the proposed amendment.

The question of the ratio of representation and State suffrage in the United States Senate is one thing, and the manner or mode of choosing the number of Senators allotted to each State is quite another and entirely different thing. The one—the former—that is, equal State suffrage in the Senate, was irrevocably fixed by the Constitution. Therefore as to that there can be no change while our Government in its present form exists; whereas the other, that is, the mode of choosing Senators, is one open to amendment in the one or the other of the two modes of amendment pointed out in the Constitution, that is, either by the action of two-thirds of each House of Congress or by a convention called by the legislatures of two-thirds of the several States, the action in either case to be ratified by three-fourths of the legislatures of the several States.

The pending amendment relates solely to the latter; that is, it proposes a change in the mode of choosing Senators upon the part of the several States from that of the legislatures respectively to that of a vote by the people, the qualified electors.

The framers of the Constitution, in pursuance clearly of widely conflicting views upon this subject, provided that Senators should be chosen by the legislatures respectively of the several States.

It is believed by those who advocate the adoption of the pending amendment that the political history of this country touching this question, and especially the history of Senatorial elections during the past few years, as also their effect upon many other important questions of state and general polity, loudly demand this change in the mode of choosing Senators. The advocates of the measure are unwilling to yield to any their loyalty to that principle of equal State suffrage in the United States Senate which we all believe so absolutely essential to State and national equilibrium and to the maintenance and perpetuity of our present form of republican representative government. It is, therefore, with entire confidence we give to this measure our cordial and energetic support, being assured it in no respect disturbs in the slightest degree the relation now existing between the National Government and that of the several States respectively.

Whatever of independent sovereignty now attaches to either the General Government or the States respectively is in no wise either enlarged or diminished by the proposed amendment. The ratio of representation in each House of Congress is left precisely by this amendment as it exists to-day. The physical and political structure of our Government, both national and State, is not in the least modified. The political relation of the one to the other and of each to all remains precisely as now. This being so, the only remaining question to be considered is this: Is it wise, is it politic to provide for a change in the mode of choosing Senators, as proposed by the pending amendment? Are there any good reasons which operate to demand the change? Are there any controlling reasons why the change should not be made?

Some of the more salient reasons in favor of the proposed change in the mode of choosing Senators may be summarized as follows:

First. What the people are authorized to do indirectly through the means of the ballot they should be permitted to do directly through that medium. This is republicanism; this is democracy.

The present mode is tinctured with the spirit of aristocracy; it is tainted by the odor of monarchy. The proposed change is, therefore, an enlargement and widening of the individual right of suffrage, by permitting the people to do in their own right, and directly, that which they are only permitted to do now in a vicarious and indirect manner in the matter of choosing United States Senators.

Second. The present system of choosing Senators has a tendency to divert the attention of legislators from matters of legislation in which the State and the people of the State are vitally interested, and to the great detriment of the best interests of the State and of the people.

Third. The present system of choosing Senators converts primary and other elections into pool rooms of debauchery wherein the question absorbing every mind in the selection of members of the legislature is not as to the capacity or fitness of the selection for legislative duties, but rather how he will vote for Senator.

Fourth. The proposed change will, more than any other suggested reform of the present day, have a tendency to destroy the power of local and State political bosses and eliminate them, as they properly should be, from American politics, thus remitting to the people, where it properly and rightfully belongs, the control of political affairs in the State.

Fifth. The proposed change will place the position of United States Senator in a greater measure than at present beyond the reach of those whose sole qualification for the position is their wealth. In other words, it will minimize to a great degree the debauchery of legislatures, now unfortunately quite too prevalent.

Sixth. The proposed change will have a tendency to disarm unjust criticism of the United States Senate and to create more amicable relations between the Senate and the people, a consummation most devoutly to be wished.

Seventh. The change, in my judgment, will tend to elevate the character of the United States Senate and will tend to the exaction from each Senator of a fuller recognition of the rights of the people than is the case now under the present system.

Eighth. The history of Senatorial elections in the United States during the past ten or fifteen years, notably in the Senatorial elections in the States of New York, Oregon, Washington, Idaho, Montana, Wyoming, Delaware, Kentucky, Louisiana, and other States, furnishes an unanswerable argument in favor of the proposed change.

Ninth. The choosing of Senators by a direct vote of the people instead of by the legislatures of the several States is more in accordance with a republican and democratic government and less in sympathy with that of a monarchy or aristocracy. It is only in this manner that the moral and political sense of the people can find fitting and adequate expression.

Tenth and lastly. It is a reform demanded by the great majority of the people of this country, irrespective of party, and one that should, therefore, be promptly met and acceded to by Congress, and by no branch of the legislative department of the Government should this acquiescence be so readily and cheerfully given as by the United States Senate.

Having thus briefly outlined, as I believe, and accurately stated the real character and effect of the proposed legislation, and having heretofore on several occasions argued here and elsewhere in favor of the amendment, citing perhaps all the more salient arguments to be adduced in its support, and as other Senators have also heretofore ably argued in the same direction, notably the distinguished Senator from Indiana [Mr. TURPIE] in several elaborate and able speeches at this and other sessions of the Senate, and as the distinguished Senator from California [Mr. PERKINS] is desirous of speaking at some length on the same subject in support of the proposed amendment, I shall not at this time detain the Senate further, but shall give way to him, in the hope that any extended debate may be avoided, to the end that this measure, demanded by the people of this country irrespective of party, and one which, in my judgment, stands in the front rank of the reforms of the present age, may have early consideration.

Mr. PERKINS. Mr. President, the people whom I, in connection with my distinguished colleague, have the honor to represent have manifested their opinion on this question in no uncertain way. By a vote of 187,000 against 13,000 they have shown how strong is their belief that the election of United States Senators should be by popular ballot. In entering a plea for that mode of election I am, therefore, speaking for practically all persons in California who have a right to demand representation in those bodies that make the laws by which they are governed and levy the taxes which they are to pay. It is a right in defense of which their ancestors took up arms. It is a right which was established at the cost of suffering, privation, and blood, and which is recognized to be the foundation upon which rests the liberty that 70,000,000 people now boast of. It is because the people of the United States are jealous of that right and believe that it either has been, or is in danger of being, denied them that from one ocean to the other there has arisen a demand that they themselves shall by votes deposited in the ballot box by their own hands elect the Senators who are to represent them in this Chamber.

In debating this question attention has been called to the study

given to the principles of self-government by the framers of our Constitution which has imposed upon us the election of Senators by the legislatures of the several States. The members of the convention were, as has been said, of English stock, trained in the principles of English liberty. No deliberative body that has ever assembled has been influenced by so pure a patriotism, has so unselfishly devoted itself to a great cause, has been so earnest in its effort to establish human liberty on a sure foundation. But the members of the convention were men, and man is not infallible; neither can he foresee the conditions which the progress of civilization brings about. He is compelled as best he may to judge of the future by the present and the past, and shape his course by the light which history affords. And so these men of English blood, who had had occasion to study the principles of liberty as found in England, could not wholly emancipate themselves from the influence which English institutions exerted.

THE SENATE AND THE HOUSE OF LORDS.

Throughout our Constitution this influence is observable, but in no part in so marked a manner as in that provision relating to the United States Senate. It was here that their dependence upon the past was most strongly felt. Different conditions and different material necessitated some change, but as far as the members of the convention were able they fashioned the United States Senate after the English House of Lords. Mr. Dickinson, a member of the Constitutional Convention, frankly wished to make the Senate as nearly as might be like the upper house of the British Parliament. Hamilton said:

The best form of government, not attainable by us, but the model to which we should approach as near as possible, is the British constitution. * * * Its House of Lords is a noble institution. * * * It forms a permanent barrier against pernicious innovations on the part of both Crown and Commons. * * * The English model it the only good one.

The delegates believed that a difference in the interests of the two Houses was necessary, in order that, as in Parliament, all questions coming before Congress might be looked at from different points of view. The Federalists said that we must have a landed estate. There was here, however, no landed aristocracy, no titled nobility, no class distinct from that of the people at large, from whom such a Senate could be formed. All citizens of the United States were, and were to continue to be, free and equal, and entitled to representation. That great fact lay as an obstacle in their way, and gave rise to the fiction of the State as distinct from the people, and of its representation by Senators elected by legislatures, and not by popular vote. This idea of the necessity of a difference in the basis of representation still clings to the Englishman, though he is anxious to get rid of that House in which it has been so conspicuously manifested.

Those who propose to reconstruct the House of Lords—

Says Mr. Bryce—

are at their wits end to discover some plan by which it may be strengthened and made practically useful without such a direct election as that by which members are chosen to the House of Commons.

But they will find, as the United States has found, that there can be no true representation of the people unless the people themselves cast the vote.

THE MANNER OF ELECTING SENATORS.

It has been the custom of those who have spoken and written in praise of the United States Senate to ascribe much of its strength and usefulness to the manner in which its members are elected. It is assumed that the removal of their choice from the direct action of the people has given them an independence which they would not otherwise possess, and a point of view in looking at public questions which the man elected by the people by direct vote does not have. Though coming from the same State, surrounded by the same influences, imbued with the same popular ideas as his neighbor who goes to the House of Representatives, the Senator is supposed, by reason of the mere manner of his election, to view things differently. Mr. Dickinson, who wished to make the Senate as nearly like the House of Lords as possible, recognized the independence which a long term of office would give, and argued that, endowed with authority permanent and irrevocable for three, five, or seven years, Senators would decide with uncommon freedom from influence, freedom from the chances that they would take in the coming elections, freedom from those to whom they owe their position.

Mr. Mason argued that election by the people was the only security for their rights, and Mr. Rutledge could see no distinction between election by the people and election by the people's representatives. Mr. Wilson held that the General Government is not meant for the States, but for the individuals comprising the States, and that the individuals, therefore, not the States, ought to be represented in it.

WHY COMPLAINTS ARE MADE.

Mr. President, the complaints which are now heard on every side regarding the manner of election of United States Senators are due to the fact that the framers of our Constitution did not incorporate with every part of that instrument that idea of freedom for which they had heroically fought. There was that distrust of the people which is prevalent in England to-day and which is there the principal reason for the hesitation to reform the House of Lords. There was the same fear of popular corruption that has been expressed in this country by the defenders of the present method of electing Senators. Mr. Madison thought that if an election by the people promised as uncorrupted and impartial choice there could be no necessity for appointment by legislatures, nor was it apparent, he said, that a more useful check would be derived through legislatures than through the people. But has the history of the several States justified him in refusing to give the people the right of election? Have the scandals that have arisen shown that legislatures are above suspicion? The resolution introduced here during the present session and now under consideration is sufficient answer to that question.

Mr. Gerry thought it was necessary that the people should appoint one branch of the National Legislature in order to give them confidence. If the popular election of one branch would give confidence, would the popular choice of both branches give too much? The experience of the past twenty-five years has been that the election by the people of only one branch has failed to give the confidence expected. Mr. Gerry also thought that the election of United States Senators by the people would give the landed interest too much power and render the commercial interest insecure. But one of the criticisms made by those who disapprove of election by legislatures is that the present method gives the commercial interests too much power and renders the landed interests insecure. There was also an idea that unless the State legislatures were given what was called representation there would be danger that they would be abolished. But has not experience demonstrated the fact that contests for the selection of Senators have been in many instances at the sacrifice of local legislation for the State?

THE PEOPLE'S GOVERNMENT.

It will be seen therefore, Mr. President, that those supporters of the present method of election should not place too much confidence in an argument based upon the prescience of the framers of our Constitution. To amend our Constitution is not to cast discredit upon those great and patriotic men. They were human and liable to error, and it is our duty to correct their mistakes. Were they alive to-day they would be among the strongest advocates of any amendment which would improve their work. Thomas Jefferson, in that document which every patriot venerates, gave utterance to the thought that governments derive their just powers from the consent of the governed, and that whenever any form of government becomes destructive of this and other principles affecting their life, liberty, and the pursuit of happiness it is the right of the people to alter or abolish it and to institute a new form of government that will most effectually secure those ends. The great Webster, too, in a speech delivered in the Senate sixty years ago, alluded to the Republic as "the people's Government, made for the people, made by the people, and answerable to the people."

This noted saying, in one form or another, has been used by various orators, and notably by the immortal Lincoln in that famous address delivered in the presence of the nation's dead at Gettysburg. That the framers of the Constitution had these thoughts in mind when they drafted that instrument is evident from the report of every day's proceedings of the Constitutional Convention. But they had embarked upon an unexplored sea of democracy, and they wanted to mark well the beacon lights of experience that faintly glimmered through the mist of doubt from the most liberally constituted monarchy of the world. No question caused more discussion than the plan of choosing the Senators in such a manner as would best cherish and foster the principles of State sovereignty and at the same time express the will and choice of the people.

AMENDMENTS ADOPTED.

But with all the wisdom displayed by the fathers of the Government, with all the care they took in drafting that which was to be the supreme law of the land, some of the members of the convention would not sign the Constitution and much dissatisfaction was expressed by the people; and during the very first session of Congress ten amendments were proposed, and the eleventh within a few years afterwards, and all were promply ratified by the requisite number of State legislatures, in accordance with the provisions of the Constitution.

Even the manner of choosing the President of the United States was changed by an amendment afterwards adopted. Tinkering with the Constitution, I realize, is a serious thing. I also realize that many young legislators first making their advent into political life feel called upon to propose some amendment to the Constitution. I remember in the early days in California, when first sent to the legislature from one of our mining towns, I thought the first duty incumbent upon me was to offer an amendment to the constitution. Experience, however, has taught us a lesson and many of us have profited by that experience. I realize, as I

said before, that tinkering with the Constitution is a serious undertaking and should not be encouraged unless actually needed; but who is there who does not think those amendments were needed? Who would advocate the repeal of any one of them? They are adopted in accordance with the principles enunciated by Jefferson as to the right of the people to alter or amend forms of government that become destructive of their rights.

We have presented to us many petitions asking for different amendments to the organic law of the land that are not necessary and are not demanded by the people. One petition that has been extensively circulated and presented to Congress calls for the words "Almighty God" to be placed in the Constitution. It seems to me a conclusive answer to this petition is in the fact that God has inspired every line of the Constitution that breathes religious and civil liberty and has for its object the betterment of humanity. If we put God into our daily lives, in our love to Him, in obeying His commandments and doing to others as we wish them to do to us, He will never forsake us as a nation, but will give our people wisdom and strength to right every wrong, and generations yet unborn will rise up to call blessed those who framed this Constitution, a gift from God to man, a sacred heritage that it is the duty of every son of this great Republic to jealously guard.

THE TENDENCY OF CHANGES.

The tendency in all changes of our organic law affecting elections has been to secure more certainly and more directly than ever the influence of the people themselves in governmental affairs. They may be trusted at all times. Lincoln, in one of those sayings for which he was noted, remarked that a part of the people may be deceived all the time, and all the people a part of the time, but all of the people could not be deceived all the time. The people choose the members of the legislatures, and often pledges are given in advance that candidates, if elected, will vote for this or that citizen for United States Senator. There have been instances where State conventions have nominated candidates for Senator and the legislatures afterwards chosen have ratified the nominations thus made. This is similar to the present method of choosing our President. A national convention nominates a candidate and the several electors nominated in the various States are selected upon the theory that they will vote for the candidate designated by the national convention. The electors chosen in a State on the Presidential ticket are bound only in honor to vote for the names of the candidates who head the tickets; but that is enough; and there is not a man in the land that would dare betray the trust.

Thus it has come to pass that the action of the members of the electoral college is merely perfunctory or ministerial. Custom gives them no discretion; they merely meet to formally ratify the choice of their party as expressed in the national convention and the will of the people as expressed at the ballot box. But in the selection of United States Senators it has happened that a legislature fails to carry out the will of the State or district conventions in voting for a Senator. Each of us can recall instances of the kind where previous to the election but one candidate for the Senatorship was mentioned and the people were satisfied therewith, voting for members of the legislature firm in the belief that no other Senatorial candidate would be chosen should the legislature be dominated by men of his political faith, but after the election an entirely new man would come to the front and secure the patronage of the gentlemen whose votes were so essential to success.

The recognized campaign party candidate was supplanted by one who, much to the surprise of all, had been able to win to his side a majority of the party caucus and eventually the majority of the legislature. The result was that the public press teemed with charges of undue and improper influences and partisan slander, and rancor became unbridled, and it has been openly asserted that the choice of the people had been betrayed. I am, however, not prepared to admit that anyone ever improperly obtained his seat in this body; but all will agree that had there been a direct vote of the people in the election of Senators the partisan press would be disarmed from making the charge and the files unencumbered by the slanders.

IMPROPER INFLUENCE MORE DIFFICULT.

It may be said in reply to this argument that bribery and corruption are known in connection with State and Congressional elections, and, even if this amendment prevails, that in the years to come the charge will many times be made, possibly sometimes truthfully; but it is self-evident to every thinking person that it is much easier to manipulate by influence 100 members of a legislature than to improperly influence tens of thousands of voters of an entire State at the ballot box. Besides, it removes the unjust aspersion of the defeated candidate that is frequently used against the successful one, as well as that against the true and loyal friends that have stood by him.

It is urged that State conventions may make as bad selections as legislatures, but to this the reply may be made that the people, when the election comes off, will surely correct the mistake. The unfit candidate is always rejected when the people have a voice in the proceeding; but if the legislature choose an unfit man for Senator there is no redress; the people have no power to correct the mistake. It is useless for them to protest; they must abide the consequences.

Still another strong argument in favor of the proposed change is suggested by the liability under the present method that States may continue for a long time unrepresented. Technical questions seem to arise more easily over a legislative election than over one by the people. Witness the fact that during the Fifty-third Congress the States of Montana, Washington, and Wyoming were deprived of equal representation in this Chamber, the gentlemen sent here with certificates as Senators being regarded as lacking in title. In the present Congress the State of Delaware has had but one representative on this floor through a difference of opinion as to the law by the members of this Senate. Another State has wasted the whole limit of time allowed by law for the session of that legislature in the futile attempt to elect a Senator, and if a special session of the legislature is not convened for the purpose, that great State will have but one Senator on this floor after the 4th day of March next. I need not recapitulate the facts in the cases I have referred to; they are too familiar to all.

PROTRACTED CONTESTS THAT NOW OCCUR.

Not only in the States named, but in many of the other States, it is a frequent occurrence for the legislature to have long and protracted struggles before the Senator is finally selected. This is too often to the exclusion of other business and to the neglect of important local interests. Thus the burdens of the taxpayers are increased without corresponding benefits to them. The unseemly contests which sometimes begin many days before the meeting of the legislature are followed by schemes to insure control of the organization or to favor one section of a State to the exclusion of another. All this is unseemly and unworthy the dignity of the Republic.

It will probably be urged that technicalities may arise in elections by the people whereby vacancies might be created in the Senate. But while questions have arisen and will continue to arise concerning elections by the people, they do not approach in complexity the vexatious character of those which arise touching legislative contests.

It is the boast of writers who support constitutional monarchies that in some instances they are more responsive to the will of the people than is this Government of ours; that the will of the people in other lands is more quickly manifested in the administration of affairs than in our own country.

Public opinion is the safety valve of this great republican Government. It is public opinion that makes men do their duty, and God forbid the time should ever come when public opinion does not rule those whom the people send here to legislate and to make their laws. They are the source of all power in this form of government, and that man is not true to himself, not true to the people, who is so callous that he is not sensitive to the opinion of the people. We all desire the good opinion of our associates. We all desire the commendation and good will of those whom we respect. First of all, we desire to have, and we have if we do our duty, our own self-respect, and next to that we covet the good opinion of the people. So, after all, public opinion is the equalizer, the regulator, that will not permit this Government to go very far wrong.

It is explained that our President is elected for four years and he may hold office for that term without regard to public opinion as to his policy or official acts. Representatives are chosen for two years and Senators for six years, but the latter are not elected by the direct vote of the people. The Representatives do not meet until more than a year elapses after their election, and it is possible that in that period the will of the people may have changed; but, granting that they enact legislation in entire accord with prevailing sentiment among the people, their action may be annulled by the Senate, the members of which were elected by assemblymen whose official terms have come to an end and who can not longer exert any influence, if they would, to coerce the Senate in response to the popular will.

I do not presume to assail the conservatism which a longer term of office tends to impart to the membership of this body, for that conservatism I regard as the greatest safeguard against excesses in legislation and a wise provision for the preservation of the institutions of the Republic; but there is lacking that relationship which exists between the Representatives and the people and even between the President and the people, for the President is chosen more in response to public sentiment than are the Senators, since his nomination is first made by representatives of the people in party national convention assembled and afterwards ratified by the people, by their direct vote for representative electors at the ballot box in the respective States of the Union.

THE ONE GREAT TRUTH.

It is impossible to escape from the great truth that the strength of our Union of States lies in direct representation by men who are elected by the votes of those entitled to cast ballots. In discussing this question efforts are made to withdraw this fundamental principle from consideration and to satisfy the people with a shadow. But even the most learned and able of the defenders

of the present system are at last compelled to turn to the people as the source of national strength and as the only foundation upon which can be built a nation. Even so strong a supporter of election by legislatures as a former and very distinguished member of this body seemingly unintentionally reveals the bearing of this truth on this very question now under debate. He has made a very subtle distinction between the people and the State as one justification for the election of Senators by legislatures, but in speaking of this choice he says that each member of the legislature—

Must vote openly, so that their constituents may know whether or not their representatives have followed the general judgment of the particular communities they represent, a matter of vital importance in all representative government.

It seems to me that in this sentence the whole case of the defenders of election by legislatures is given away.

The eminent jurist dwells at length upon the theory that the Senate as such upholds the doctrine of State sovereignty by reason of the fact that in its membership all States, regardless of population, area, or wealth, are equally represented. The proposed change in no way affects the equality of representation which the States now possess, nor does it in any way change that representation; it only provides a different and more direct mode of ascertaining the choice of the people for their representatives on the floor of this Senate.

It is one of the most frequent, and is regarded as one of the strongest, arguments in favor of the present system that the House of Representatives and the Senate must have different constituencies; that one must be elected by the people and the other by the State. Yet in the quotation that I have just given it is tacitly acknowledged that there is not such a thing as a State in the sense that it can be represented without reference to the people; and even more, that if such representation were possible it would be destructive of all representative government. It shows how impossible it is to escape reliance upon the will of the people; that even legislatures which, in theory, are the depositories of the power of that mysterious thing, the State, are actually compelled to show by open ballots whether or not they have paid regard to the wishes of the people in respect to votes for Senatorial candidates.

THE PEOPLE THE ULTIMATE FACTOR.

In fact, Mr. President, in whatever way we look at this question the people—the people with votes in their hands—are found to be the ultimate factor in the problem. It is their will which it is the object of our institutions to make effective, and wherever there is an obstacle put in the way of its free exercise there will be found unrest. Is it possible to conceive of scandals in cases where legislatures elect as United States Senators those who are the choice of the majority of the people who vote? Would this same people complain if their choice were made the choice of their representatives? It is the constant effort of the people that they so constitute their State legislatures that they may be sure a Senator may be elected who will represent them and not some other constituency. It is true that they are often disappointed in the selection made; that those whom they would have rejected are chosen. And this happens most frequently because of the very method of Senatorial election, and not because corrupt means are used to defeat the popular will. In too many cases the method alone is at fault, and the people who demand and will have representation insist that it shall be changed.

Every person—

Says George William Curtis—

is born with an equal claim to every kind of protection of his natural rights which any other person enjoys. The practical question, therefore, is, How shall this protection be best attained? And this is the question of government which, according to the Declaration, is established for the security of these rights. The British theory was that they could better be secured by an intelligent few than by the ignorant and passionate multitude. * * * Nobody denies that the government of the best is the best government; the practical question is how to find the best. * * * And our fathers answered the question of the best and surest protection of national right by their famous phrase, "the consent of the governed."

But although the fiction of the State was brought forward as a justification for election by legislatures, it has been more and more ignored as political education has progressed and popular rights have become better understood. The resistless movement of the century toward the goal of direct and unfettered political action is manifested here and in this matter as in similar questions abroad.

THE PEOPLE ARE THE STATE.

Every change in European institutions has brought the people nearer to the seat of power. Reform in England has been in the direction of a full and direct representation of the people. One by one the fetters which bound them have been stricken off. One by one classes have gained a right to a voice in the conduct of public affairs. More and more influence have the people secured in public affairs; more and more intolerant have they become of that which stands between them and their will. One by one the fictions of government have been exposed, and step by step they have pressed forward toward a government for the people by the people. The body which has different interests from theirs, whose point of view is widely removed from their own, they now wish to cast aside as one of the relics of a time in which freedom was denied them. They distrust as makers of laws those who do not represent them. They are beginning to fully realize that they are the State; that government is for them and should be by them; and that this can be attained only by direct representation. They will be content only when every man shall know that his vote will count in the election of those who make the laws. They demand and will secure the same measure of liberty which the people of the English colonies in America demanded for themselves, and which has been so fully secured to them by our Constitution. "Plymouth Rock," said George William Curtis, "was but a stepping stone from one continent to another in the great march of the same historical development."

It was a denial of representation which caused our ancestors to take up arms. It is representation which now enables them to bear with equanimity the burdens and annoyances which mistaken legislation imposes upon them. They recognize the errors of those who were elected by their votes as their own errors, which they have it in their power to avoid in future. What we do here concerns not ourselves alone individually. If it did, the evil would not be so far-reaching; but the errors we commit here must be charged up as errors of the people who send us here to represent them. If we misrepresent those people it is almost an unpardonable sin in a republican form of government. But this attitude of mind has been made possible only by the belief that by their own acts have the governing bodies been constituted. Raise but a suspicion that they have been denied their right to influence the course of government, and their temper is changed and everything which stands between them and their representatives is looked at with suspicion. Nothing will remove their distrust but a right to cast their ballots and have them honestly counted for him whom they believe will best represent them.

RELATION OF SENATORS AND LEGISLATORS.

This constant, ever-active desire of man to exercise his right of suffrage has gradually wrought a change in the position which the United States Senator bears to the legislature which nominally elects him. As the people have become more conversant with public affairs, as they have become better educated through the public press and the schools which have been established on every side, they have understood more clearly their rights, and have sought to make the choice of United States Senators their own. Their efforts have not yet been wholly successful, but they have changed radically the character of elections by State legislatures. The latter are not the free, untrammeled agents that the Constitution designed them to be. Senatorial elections are not wholly uninfluenced by agencies outside the Senate Chamber. "Indeed," says Mr. Bryce, "it is worth observing that the election of Senators has in substance almost ceased to be indirect."

If we have lost the substance, why should we retain the shadow? It seems to me that it is as idle to assume that the entire people of a State would be more exposed to fraud and corruption in the case of the popular election of United States Senators than they are now in the election of Presidents. It seems to me that the argument based on the fear that there would be created temptations giving rise to corruption applies with equal force to the election of President. The latter, as I have before stated, is practically elected by popular vote, the whole people of each State casting ballots for certain members of the electoral college. The electoral candidates on each party ticket, however, are virtually one man, and that man a Presidential candidate. The case, therefore, is parallel with that of the election of a United States Senator by the people, and there can be no reason for believing that there would be more fraud, bribery, corruption, or illegal practices under the latter than under the former. The cases stand on one and the same footing, and an argument in favor of one is also in favor of the other; an argument against one is also against the other.

ELECTION OF SENATORS AND THAT OF PRESIDENT.

It seems to me, too, Mr. President, that other objections to the proprosed change in the Constitution apply with equal force to the present mode of electing our Presidents. It is objected that if Senators are elected by popular vote they will be selected by men who are not chosen in pursuance of law, upon whom no oath is imposed, who have no other responsibility than to make that selection, of whose action there is no record, who act by proxy, and who compose a body which lasts but a day. I do not see on what ground it can be maintained that greater evils would flow from the nomination of a Senator by a State convention than from the nomination of a President by a national convention. I do not see in what particulars the latter convention is more permanent, more subject to law, more responsible, or that it has any record of its action which a State convention has not. I do not see in what respect a national convention can be more in accord with the Constitution than a State convention, or how our scheme of government can be endangered by the action of the latter. The equality of the States would still be maintained, for that is assured by the constitutional provision establishing equality of representation, with which methods of election have nothing whatever to

do. The independence of the Senate would not be lessened, for that, too, has been insured by fixing the tenure of office. These are the two essential facts in the constitution of this body, and neither is in any way dependent upon a given method of election.

Mr. President, the scandals which have accompanied many Senatorial elections are without doubt baseless. I can not believe that such bodies of men as compose our legislatures are fairly open to so many or to such charges as have been brought against them. But the fact that such charges have been made has to a great extent impaired the confidence of the people in the present mode of election, and has led them to demand that the election of their Senators be placed in their hands. They believe the assumption that the State can exist apart from themselves should now be set aside forever. The physical conditions existing within the boundaries of the several States determine the industries by which the people shall live, and as these differ so do the interests of the people of the States differ. Within the borders of each State there is a community whose needs are not precisely those of its neighbor.

THE RIGHT OF THE PEOPLE.

In the large affairs of the nation this community should have power to at least protest against action that would injure it and to strive for that which would benefit, as well as to have a voice in the determination of measures for the common good of all. This community is the State. There can be nothing apart from it which can be represented by the election of representatives. There can be no other interests to represent than those of the entire community if liberty is to be maintained. There can, therefore, be no point of view of public affairs different from that of the community, and its representatives can not, by the mere manner of their election, be made to look with other eyes. In the bitterest moment of his life, when the legislature of his State passed the resolution censuring him for his action in this Chamber, Charles Sumner said: "I seem to lean on the great heart of Massachusetts." In that hour of his grief and despondency he found consolation in the thought that he could lean upon the people whom he represented. So does every Senator who here does his work according to his conscience rely upon the great and generous hearts of the people whom he represents, and whose wishes they expect him to regard.

The movement in favor of Senatorial elections by the people is growing stronger every year. Already at the ballot box or through their legislatures the voters of nine States have declared in favor of the change, and it is bound ultimately to be made. Its establishment by an amendment to the Constitution would tend to restore confidence between the people and those chosen by them to make the laws of the country, without which confidence in free government can not long endure. What the people now demand is that which our forefathers contended for when they supported by force of arms the Declaration of Independence; that for which the framers of the Constitution hoped and prayed; that for which the world has given its grandest examples of heroism—a government by the people, of the people, and for the people.

Mr. CHANDLER obtained the floor.

Mr. MITCHELL of Oregon. I suggest the absence of a quorum.

Mr. CULLOM. Before that suggestion is made I wish to present some petitions.

Mr. MITCHELL of Oregon. I suggest the absence of a quorum. I desire the Senate to hear the Senator from New Hampshire [Mr. CHANDLER].

The PRESIDING OFFICER. The absence of a quorum being suggested, the Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Aldrich,	Cullom,	McBride,	Sewell,
Allison,	Davis,	Mills,	Sherman,
Bate,	Dubois,	Mitchell, Oreg.	Shoup,
Berry,	Elkins,	Morrill,	Smith,
Blanchard,	Gallinger,	Palmer,	Squire,
Brice,	Gear,	Peffer,	Teller,
Brown,	George,	Perkins,	Turpie,
Burrows,	Hansbrough,	Pettigrew,	Vilas,
Butler,	Harris,	Platt,	Walthall,
Chandler,	Hawley,	Pritchard,	Warren,
Chilton,	Hill,	Pugh,	White,
Clark,	Lodge,	Quay,	Wolcott.

The PRESIDING OFFICER. Forty-eight Senators have answered to their names. A quorum is present. The Senator from New Hampshire [Mr. CHANDLER] is recognized.

Mr. ALDRICH. Will the Senator allow me to offer a resolution for reference?

Mr. CHANDLER. Certainly.

FINAL ADJOURNMENT.

Mr. ALDRICH. I offer the concurrent resolution which I send to the desk.

The PRESIDING OFFICER. The resolution will be read.

The Secretary read as follows:

Resolved by the Senate and House of Representatives, That the President of the Senate and Speaker of the House of Representatives be authorized to close the present session by adjourning their respective Houses on Monday, the 8th day of June, instant, at 2 o'clock p. m.

Mr. ALDRICH. I move that this resolution be referred to the Committee on Appropriations, and I call the attention of the chairman of that committee to what I believe is a very natural impatience on the part of Senators to have the business of this session brought to a close. There are, I believe, some four or five of the principal appropriation bills now in conference. With the large experience of the Senate and House of Representatives in connection with such conference reports there ought to be no trouble in coming to an agreement upon those various bills within twenty-four hours, and I believe that there would not be if there was sufficient pressure brought to bear in the way of a sentiment in both Houses upon the committees of conference to secure agreements. I hope the Committee on Appropriations will give this matter very careful consideration.

The PRESIDING OFFICER. The resolution will be referred to the Committee on Appropriations, if there be no objection.

Mr. ALLISON. Only a word in respect to the resolution. Of course I have no objection to its reference to the Committee on Appropriations.

Mr. GEORGE. I should like to say something about the resolution.

Mr. ALLISON. Just one moment. The committees of conference having charge of appropriation bills are doing the best possible to bring them to a conclusion. There are differences of opinion, and of course time must be taken to settle those differences. I had hoped that by to-morrow we should be able to report upon all of those bills, but I now doubt very much whether we shall be able to do so before Monday. I assure the Senator from Rhode Island, and all other Senators who are interested in the spirit of the resolution, that we are doing the best possible. I will also say that during the session of the Senate it is almost impossible for the conference committees to make much progress, from the fact that Senators who are members of such committees are brought in here constantly to help make a quorum.

Mr. GEORGE. Mr. President, I know everybody is tired and wants to get away, but there is a measure on the Calendar of the utmost importance to the people of the country, which has passed the other House and been reported from the Judiciary Committee of the Senate with an amendment, in which a large number, a very large number, of the people of this country are interested. I do not think that we ought to adjourn until action is taken upon that measure. I refer to the bankruptcy bill; and I do hope that no adjournment will take place until the Senate has taken action upon it. I have letters from every State in the Union, except New England, urging the passage of that bill—letters stating that a large number of meritorious men, by the accidents of life and other causes, have been reduced to insolvency, that they can not pay their debts, and can not embark in any other business on account of their indebtedness.

I therefore hope that Congress will not adjourn, and, so far as I am concerned, I must be allowed to protest against the adjournment of Congress without action upon this measure.

Mr. WARREN. Mr. President——

The PRESIDING OFFICER. The Senator from New Hampshire [Mr. CHANDLER] is entitled to the floor. Does he yield to the Senator from Wyoming?

Mr. CHANDLER. I do.

Mr. WARREN. Mr. President, I do not wish to detain the Senate or take advantage of the courtesy of the Senator from New Hampshire [Mr. CHANDLER], who has so kindly yielded me the floor for a moment. I approve of the idea of an early adjournment, but it seems to me it is now too early to even consider an hour or a day when we shall finally adjourn. The Appropriations Committee, through its conferees, have very properly, in my judgment, insisted upon certain Senate amendments in disagreement with the House of Representatives. It requires only a casual glance at some of the appropriation bills to show that a number of the States, I might say a group of States, interested to but a slight extent, it is true, in these bills, are yet, nevertheless, interested in such a way that their only interests in the appropriation bills of this session are still at stake and yet unsettled. The Senate committees of conference are, in my judgment, faithful in undertaking to protect these interests. I do not believe we should cut short their time. So far as I am concerned, I shall certainly resist with my vote and voice any adjournment which will force upon our Appropriations Committee any action other than what they deem to be proper in holding out for the rights of such amendments as the Senate have insisted and are now insisting upon. I believe if the Committee on Appropriations would look in upon certain States of this Union and see the condition existing there and the necessities as to certain appropriations, not large in the aggregate, they would be willing to stay here days or even weeks rather than surrender certain Senate amendments. I know, so far as I am concerned, that I had sooner stay here in session all the remainder of the year, and even lose my vote next November thereby, than to undertake to explain to the people in my State why it is that

the Senate can not remain yet a few days in session, until the conference committees can have time and can so arrange and so insist upon an adjustment of differences in appropriation bills as to at least name the State which I in part represent, and some of the neighboring States, in one or more of the great appropriation bills.

The PRESIDING OFFICER. The resolution will be referred to the Committee on Appropriations.

ENROLLED BILLS SIGNED.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the Speaker of the House had signed the following enrolled bills:

A bill (H. R. 956) for the relief of Sophia Sparks and Julia C. Sparks, of Annapolis, Md.;

A bill (H. R. 2006) to increase the pension of Harriet C. Gregg, widow of Col. and Bvt. Maj. Gen. John Irvin Gregg, from $30 to $50 per month;

A bill (H. R. 8008) defining cheese, and also imposing a tax upon and regulating the manufacture, sale, importation, and exportation of "filled cheese"; and

A bill (H. R. 8293) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1896, and for prior years, and for other purposes.

BUREAU OF ANIMAL INDUSTRY.

Mr. WARREN. Mr. President, I wish to record a notice. I shall move at the first opportunity to take up the bill (S. 1147) for the establishment of a bureau of animal industry for the inspection of meat products and live stock, suppression and extirpation of contagious and infectious diseases among cattle and live stock, to regulate the transportation of cattle and live stock and prevent the exportation or importation of diseased cattle, live stock, or other animals, and for other purposes. I shall certainly call up the bill as soon as the pending matters are disposed of, and if a lull occurs in the meantime I shall ask the Senate to take it up, it being a bill which I think will not require much time, and it is a measure which is important to the entire country and especially to the agricultural interests and to the exporters.

PACIFIC RAILROADS.

On motion of Mr. GEAR, it was

Ordered, That 500 copies of Report No. 778, on the Pacific Railroad bill, and hearings on the same, be printed for the use of the Senate.

ELECTION OF SENATORS BY DIRECT VOTE.

The Senate, as in Committee of the Whole, resumed the consideration of the joint resolution (S. R. 6) proposing an amendment to the Constitution of the United States providing for the election of Senators by the votes of the qualified electors of the States.

Mr. CHANDLER. Mr. President, it is not my purpose to take up the time of the Senate at this late period of the session by any lengthy discussion of the question whether United States Senators should be chosen by the people. I do not intend even to attempt to reply to the eloquent argument of the Senator from California [Mr. PERKINS]. I wish, however, to make one or two suggestions and to emphasize again one or two points connected with the subject which I have hitherto presented to the Senate.

I am unable to understand why the proposition to elect the President and Vice-President by the people has dropped out of the minds and hearts of the advocates of a reformed Constitution. It is my design, whenever the pending amendment is seriously pressed for a two-thirds vote of this body, to move an addition which shall include the election of President and Vice-President by a direct vote of the people. I do not think that either Senators or the President and Vice-President ought to be so chosen; but if Senators are to be I think that the President and Vice-President ought to be. I do not myself believe with the Senator from California that the desire for the proposed change is strengthening in the minds of the people of this country. On the contrary, I believe it is a craze, a Populistic notion which has not really taken hold of the members of either of the two great political parties, but is only a hobby or a fad of the Populistic party; and I regret to see such naturally conservative Senators as the Senator from Oregon and the Senator from California on this side of the Chamber, the Senator from Illinois [Mr. PALMER] and the Senator from Indiana [Mr. TURPIE] on the other side of the Chamber, who have arrived at years of wisdom and gravity, allowing themselves to be swept away by this mere Populistic notion, which, if it is not adopted within a few years, will never be heard of again.

But, Mr. President, if the legislatures of the States are to vote upon a change in the Constitution under which Senators of the United States shall be chosen by the people, they ought also to have the opportunity to decide whether or not they will hereafter choose the President and Vice-President by direct vote. Indeed, these two things were in the beginning coupled together. They were both together the shibboleth under which the assumed movement for greater popular rights in this country began.

The first Senator on this floor who came here claiming to be the product of this new popular idea was the junior Senator from Illinois [Mr. PALMER], who now does me the honor to listen to me. The Senator came here in some sense himself a representative of the new development, because he was, I believe, named for the Senatorship by a State convention of the Democratic party. This practice of having the State conventions name Senators is unobjectionable, so far as I can perceive, and it can be adopted quite as well whether the Senators are actually elected by the people or by the legislatures in the present manner. But the Senator from Illinois entered the Senate advocating the election, not only of Senators by the people, but of President and Vice-President by the people. In his speech in the Senate he made this statement:

> From what I have said the conclusion is inevitable that none of the reasons which led the framers of the Constitution to deprive the people of the direct control of the executive department and of the Senate now exist. Experience long ago demonstrated the uselessness of the electors as agents for the selection of President and Vice-President. Electors are now but counters for the enumeration of the votes of the States, the John Does and Richard Roes of our political system.

Various State conventions of the Democratic party and all the conventions which have spoken on the subject of the Populist party have, I believe, declared that the President and Vice-President, as well as the Senators, should be elected by a direct vote of the people. Now, I ask in all seriousness, why is this part of the programme to be now omitted? I ask the Senator from California, who recently so eloquently addressed the Senate, why he proposes to elect United States Senators by the people and yet intends to deprive the people of the privilege of electing the President and Vice-President by direct vote? Why does he insist upon retaining these useless John Does and Richard Roes of our political system, as they have been characterized by the Senator from Illinois? Why does the reform stop with the United States Senators, if we are to change our Constitution at all? And I desire to know of the Senator from Illinois, whom I have learned to respect, whose views upon public questions often meet with my approval and secure my vote, why he, as a member of the Committee on Privileges and Elections, who has helped make the majority which has reported this joint resolution which is taken up in the last hours of the session, has given up the idea of electing the President and Vice-President by the people? I do not myself see when the Senator contemplates the programme with which he started when he entered the Senate, of a change in the Constitution in these two particulars, how he can justify himself in now striking down the most important feature of his change and saying no more to the Senate about the election of President and Vice-President by the people.

Mr. President, I know no reason why one change is not demanded as much as the other change. I have heard no such reason stated by the Senator from Oregon, though he may have stated it in some of the numerous reports and many speeches which he has made upon this subject in parts where I have omitted to read what he has said. I say if we are going to seriously enter upon this work of changing the Constitution we ought to let the people have the opportunity to change it in these two respects. But, of course, if all is mere buncombe, if the Senators are merely making their speeches in order to secure favor with the people at home, in order to make it easier for them to get reelected to the Senate, and can accomplish this object by the advocacy of the popular election of Senators only, then, as the half of a loaf is better than no bread, the purpose which they have in view may be as well accomplished without any advocacy of the election of President and Vice-President by the people, because there is no real seriousness whatever in the movement. I have always thought that the Senator from Oregon was serious in his advocacy of the proposition until now, when he insists, at this late hour in the session, upon getting it up, when there is no possibility of action, and it has been universally supposed it was to slumber at least until the coming short session of Congress.

Having given notice that I shall move the amendment for choosing the President by the people whenever the pending proposition is pressed, I desire to call the attention of the Senate, as I have done once before, to the fact that in one hundred and eight years there has never been any change in the form of the United States Government under the Constitution. This may seem strange to Senators who recall the fact that fifteen constitutional amendments have been adopted; and yet the truth indeed remains that in all these fifteen amendments we have made no change whatever in the form of our Government. It is exactly the same now that it was in 1788.

Mr. MITCHELL of Oregon. Will the Senator from New Hampshire allow me a question?

Mr. CHANDLER. I am anxious to be interrupted.

Mr. MITCHELL of Oregon. I imagine as much from the way the Senator has been plying other Senators with questions.

Mr. CHANDLER. I congratulate myself that I have succeeded.

Mr. MITCHELL of Oregon. Conceding what the Senator has just stated to be true, that there has never yet been in the one hundred and eight years of the existence of the Government any amendment that changes our form of government, I should like the Senator to point out wherein, to what extent, and in what respect the proposed amendment changes our form of government?

I insist that it does not do it at all.

Mr. CHANDLER. It will change the form of carrying on the Government, the method of carrying on the Government, and I say that as yet we have not changed the form and method of carrying on the Government. The only exception to this statement is the one indicated by the Senator from Illinois in his speech, and that has been made without a formal change in the Constitution. The original intention was that the electors of President and Vice-President should be governed by their own discretion and their own judgment in voting for a President and Vice-President. They have come in the process of time merely to register the decrees of political conventions, being the John Does and Richard Roes of our political system, to revert to the expression of the Senator from Illinois. But there has been no other change in the methods of carrying on this Government, and that has not been formally made. Here is, therefore, the wonderful fact which I wish to impress upon Senators who may think of this subject, if the Senator from Oregon chooses to bring it up again in this Chamber, that we have lived one hundred and eight years under this Constitution and have not changed the form and method of government at all. I said that might seem strange. Is it not, however, entirely true?

The first amendments of the Constitution were the ten that were proposed by the First Congress to the States in order to meet the objections that had been made in various State conventions when the Constitution was being ratified. On the 25th of September, 1789, Congress sent out the first ten amendments, and they were in due time ratified by the States. The Senator from Oregon will admit that those do not make any change. They are mere bills of rights. There is no change whatever in the Government itself in those ten amendments. Then comes Article XI.

Mr. MITCHELL of Oregon. The Senator will concede that those amendments impose a great many restrictions upon the power of Congress that did not exist under the original Constitution.

Mr. CHANDLER. They did not change in one single particular the method or the form of getting or continuing the Government in operation, and they did not make any change at all in anything. It was contended and believed almost universally by the wisest men of that day that the Constitution meant precisely the same before the ten amendments were adopted that it meant after the ten amendments were adopted.

Mr. MITCHELL of Oregon. Under the original Constitution there was no restriction on the power of Congress to legislate upon the subject of freedom of speech or freedom of the press.

Mr. CHANDLER. That is not changing the form of government. I do not say that the powers of the Government may not have been changed somewhat, as the powers of the Government had been diminished and enlarged by construction during one hundred and eight years, but the method of getting a government into existence and of carrying on that government has not been changed in all this time.

Mr. HAWLEY. It has always been stated by writers on this subject that the amendments were rather in the nature of a bill of rights, a general declaration of rights having been in a sense omitted in the Constitution.

Mr. CHANDLER. I had the fortune a few moments ago to anticipate the suggestion of the Senator from Connecticut. There is nothing making a change in the form of government in the ten amendments. Now, what is the eleventh?

> The judicial power of the United States shall not be construed to extend to any suit in law or equity commenced or prosecuted against one of the United States by citizens of another State, or by citizens or subjects of any foreign state.

I will not discuss that. It does not change the form of government. Not even the Senator from Oregon will say that it does, and he will argue almost any point that seems to strengthen any case he is trying to win.

Article XII is a long amendment, which I will not read, because everybody knows what it is. Here I shall have to qualify a little what I have said. Here is a slight change in the manner of getting a President and Vice-President. Under the Constitution as it was originally written, when the electors voted for President and Vice-President they did not designate for whom they voted for President and for whom they voted for Vice-President, and so affairs became mixed very soon. The person who had the largest number of votes was to be President and the person having the next largest number was to be Vice-President; but it so happened that shortly two persons received the same number of votes. That was in 1800, when Jefferson and Burr each received 73 electoral votes, and therefore it could not be determined who was elected President and who Vice-President, and the election had to be made by the House of Representatives.

This was a singular omission on the part of the very wise founders of the Constitution. Very much wiser were they, notwithstanding this little slip, than our modern Constitution tinkers who are appearing in the Populist party and in the Senate and House of Representatives. The twelfth amendment only makes the necessary change that when the electors vote for President they shall name A B for President, and when they vote for Vice-President they shall name C D for Vice-President. That is the twelfth amendment; and those of which I have spoken were all the amendments made to the Constitution down to the time of the civil war. We went on seventy-two years without any change. We grew from 4,000,000 people to 32,000,000 people. We did not find that we needed to change by a hair's breadth the form of the government of the United States which these wise fathers of ours had framed for the people of the several States and had put into operation.

Mr. President, it is almost unnecessary for me to say that what are known as the war amendments make no change in the Constitution. Article XIII, as everybody knows, declares the unconstitutionality of slavery. That was merely negative.

Article XIV first declares that citizens of every State shall be entitled to the privileges and immunities of the citizens of all the States. It is very general in this provision and makes no manner of change in the form of government. Neither does it in section 2, which provided a limited disfranchisement of rebels, and, as we all know, that when colored people were excluded from voting they should also be excluded from the basis for Representatives in the House of Representatives. There was also the declaration that the rebel debt should never be assumed either by the United States or any State. Lastly came the fifteenth amendment, which provides that the right to vote shall not be abridged in any State by reason of race, color, or previous condition of servitude.

Mr. President, I have recited all the amendments to the Constitution from I to XV, inclusive, and I defy anybody to show me that the form of government is changed in any particular. We have grown since the war began from 32,000,000 people to 70,000,000 people. Here appears the conservative character of the American people. Here it is shown that, notwithstanding we are reputed as being a people of mercurial temperament, there is really an element of conservatism down in the hearts of the people.

It was with the utmost difficulty that the people of this country were prevailed upon to lay their hands upon that sum of all villainies, human chattel slavery. In 1852 both political parties declared against any agitation of the subject, and it was only through the folly and madness of the slaveholders themselves, who undertook to extend slavery into Kansas and Nebraska, that the war of secession was begun, which resulted at last, after much tribulation, in the destruction of the system of human slavery. I insist the people of this country were in truth conservative on the slavery question; and when the war closed, and since the war, and down to this hour, when we have increased 40,000,000 of people, there has been no serious attempt to undertake the improvement of the wonderful Constitution of the United States.

So, Mr. President, I stand here to-day as a conservative on this pending question. I regret that the Senator from Illinois has lent himself in his riper years to the effort to amend the Constitution which was good enough for his fathers and has been good enough for him, and which he has fought bravely to maintain against armed rebellion. I regret that the Senator from Illinois has undertaken to proclaim the necessity of an alteration in this venerable instrument.

The more I study the Constitution of the United States the more I stand amazed at the marvelous wisdom, the far-reaching sagacity of the framers of that instrument. It is a wonder of brevity, to begin with. There is not in the whole range of human literature a document that contains so much expressed in so few words. When you take up the Constitution and turn over its pages in ordinary print, it is hard to realize that you have finished it within so few pages. The men who framed it were inspired not only by great love of country, not only by high moral and religious principles, as I believe, but they were controlled by a method of conciseness and brevity which it would be well for some of our modern legislators to imitate.

Here it is. Yet here is the Populist party crazy to change it. There are more propositions twice over in the astounding platform of the Populist party which the Senator from Nebraska [Mr. ALLEN], whom I regret not to see in his seat, read the other day, which are indorsed word for word and letter for letter, the whole of them, by the courteous and cultivated Senator from Kansas [Mr. PEFFER], than there are in the whole Constitution of the United States which our fathers wrote. I have no doubt the Populists would write them all in as one amendment if they could only secure the help of the Senator from California [Mr. PERKINS], the Senator from Oregon [Mr. MITCHELL], and the Senator from Illinois [Mr. PALMER] in the effort to put them in.

I close by saying I do not think the sober common sense of the American people will indorse this movement. I think it will disappear when the Populist party goes out, and that party will go out very soon unless it entirely absorbs, as possibly it may, the Democratic party. This change is a notion that will not continue to find favor with the American people, and when their judgment is challenged and their attention is drawn to the movement, it will be found that they will say in emphatic terms that they reject, with all the other wild ideas that are now floating about the country, the notion that it is necessary, in order to get honest

and capable and faithful Senators in this body, that the people shall take them from the nominees of political conventions, elected by the people, instead of taking them from the legislatures of the States as they have taken them during the last one hundred years, under a system of which we here now ought not to speak in derogation, as it has sent us here to represent our respective Commonwealths.

It is a good plan to speak well of the bridge that has carried us safely over, and I doubt not that when the Senator from California and the Senator from Oregon have been safely returned here by the legislatures of their respective States, chosen in the good old-fashioned way, as they will be, they will be entirely content to leave the Constitution just exactly as it is. I am half inclined to say that I regret that neither the people nor the legislature of Illinois will send to us our respected friend the junior Senator from Illinois, whom I see before me.

I had the honor to submit in a former Congress briefly my reasons against the adoption of the resolution to be sent out to the States for the election of Senators by the people, then proposed by the Senator from Oregon [Mr. MITCHELL]. It was numbered 8 and the present one is numbered 6. Strike out "8" and insert "6," and I ask to submit this as a report of the minority. It was a majority report before, I think. There has been one change in the committee, and by a bare majority the resolution is now reported to the Senate. I desire that this may be printed as a minority report.

The PRESIDING OFFICER. The Senator from New Hampshire asks that a report heretofore made by him may be printed as the views of the minority of the committee. Is there objection? The Chair hears none.

Mr. PALMER. Mr. President, no compliment can be paid to the wise conservatism of the American people that does not meet my very cordial approval. We have evinced under circumstances of great trial the conservative character of our people and the conservative nature of our institutions. The fact that to-day a part of the Senate is composed of Senators who have heretofore been in armed resistance to the Government and who with their people have submitted to the arbitrament of a great civil war is one of the highest compliments to the American people. We have also shown our conservatism by our contentment at least with all the methods and forms of the Federal Constitution. It has been the subject of fierce criticism, and the subject, too, of very strong intellectual and moral resistance on many occasions in our history. But still the Federal Constitution, with its great fundamental principles, embodying the Federal Union and the dignity and authority of the States, remains substantially intact, and those principles are still venerated and loved by all our people.

In this attempt to improve the Constitution no war is made upon its principles. The fundamental doctrine of the American Government to-day is that all power resides with the people, and that the methods of election are merely the means by which the popular will is ascertained. No one questions that doctrine, and in this movement, which has for its object a mere change in the manner of election, nothing more is expected or hoped for than that the people may more directly and emphatically and more truly express their preferences for United States Senators.

The Senator from New Hampshire [Mr. CHANDLER] intimates that if this doctrine is sound it ought to be extended to the election of the President and Vice-President. That may be so for aught I am prepared to controvert now, but whether that shall be done or not does not affect this question at all. It is not necessary for me to show, either, that the questions are entirely different, and that this, which concerns but one of the States, because it must be true that in the election of a Senator but a single State speaks, and the other proposition, which concerns all the States, is altogether different.

I have said before that the American doctrine is that all power resides with the people, and that all elections are made by them. The amendment proposed to the Constitution violates no principle. It does not obstruct the expression of the popular will. Indeed, it proposes to remove an obstruction to the free expression of the will of the people of the States. And that will bring me in a moment to another question. How is it now? The people choose the senators and representatives who compose the legislature of the State, to whom the election of Senators is confided by the Federal Constitution. What advantage has that method over the method proposed?

I do not mean to overlook the great changes which have been made in our political system. I have lived longer than most of the Senators now on this floor. I have witnessed the growth of that arbitrary, despotic institution known as the convention or the caucus, and that change in our system is as well and as completely fixed as any other alteration that can be imagined. To-day the primary question before the American people is, to which one of these arbitrary, despotic, extraconstitutional organizations shall we submit, and to which shall the American freemen submit? The caucus governs now, the convention governs now, and the Senator from New Hampshire, while no doubt his mind is at ease, expects to be the implicit, obedient servant of his party. He expects to obey. He expects to vote for the nominee of that convention, a purely extraconstitutional organization, one that has no place in our constitutional system. So the question may be addressed to each Senator here: Which one of these despotic organizations will you obey? And if you refuse to obey them, what will be the penalty of disobedience to this purely extraconstitutional institution which has become a part of our system?

Again, there are the minor caucus and the county caucus and the State caucus and the national caucus. This institution has grown up since the adoption of the Federal Constitution, and the legislatures of the States are dictated by these minor or superior caucuses. These extraconstitutional organizations we submit to with far more submissiveness than we do to the Constitution and the laws of the land. The penalty of disobedience to caucus domination, convention domination—perhaps I ought to use a milder phrase—the penalty for refusing to submit to the domination of these caucuses, the caucuses that make legislatures, is much more serious than the penalty for a mere misdemeanor, which looks to a violation of the law, because in the case of a mere misdemeanor it may involve a very few months of imprisonment or a fine, but under this despotic system it may involve the political life of a public man to disobey the dictates, the imperious, despotic commands of a party convention. By such means legislatures are made, and it is to these caucus-made legislatures that the Constitution has confided the election of Senators in the Congress of the United States.

What is the proposition on the other hand? It is that the people shall be invited to elect Senators. How much they will submit to in the way of preliminary dictation none of us can tell. It depends upon the habits of men. But this much will be certain, that the caucus will be compelled, after it makes its selection of a candidate for Senator, to submit its nominee to popular criticism. The people will at least have that much advantage which is not possible under the existing system. How is it now? The legislatures are composed of men chosen in different districts in a State. What particular influences dictate their selection none of us knows. At least I do not know in any particular instance. They assemble, and they are charged with the duties of State legislation, and when they thus have legislative powers, the Senatorial election becomes involved in controversies in regard to local and State interests, while, at least if the elections were made by the people, there would not be the facility for organizing and combining influences that are afforded under the present system.

Under the present system, I believe I could take the testimony of the Senator from New Hampshire himself that the legislatures which choose Senators are not always immaculate, but that interests, monetary interests, corporate interests, control them very often. It is possible, too, that corporate interests may exercise a very large influence on the people. But still, when the nomination is made by the party caucus in the legislature, the election follows immediately, while the two or three months or whatever the length of time which intervenes between the nomination and the election by the people affords ample time for popular criticism. It is impossible under present circumstances.

I repeat the proposition with which I started out, that the theory of our Government is that all power resides in the people, and to that I add a proposition which necessarily results from it. Every agency which interposes between the direct expression of the popular will is of necessity the subject of abuse. I may take examples found in the States. A member of the legislature is chosen by particular interests to advance certain purposes that are entirely legitimate on the part of the people who choose the representative or the senator. Other considerations enter into the choice of a Senator that are entirely distinct from the motives that led to his election, or if the senator or the representative in the State legislature is elected to serve party interests or to serve local interests that deserve consideration, the influences that control his vote for this great place may lead to an entire abandonment of the interests of his constituents on account of which he was chosen. That mode which contemplates the most direct expression of the public will, which suggests the fewest possible reasons for an abandonment of duty, is to my mind a consideration of very great consequence.

The Senator from New Hampshire intimates that I was nominated by a State convention. The fact is, I was not nominated by a State convention. I was nominated for the Senate by the votes of the primaries in 90 of the 102 counties in Illinois. The State convention did nothing more than to canvass the votes. I was a candidate as the result of the popular expression, and not as the result of the combinations that sometimes attend State conventions. I made the canvass before the people in more than 45 of the 102 counties in Illinois. I expressed my opinion upon every public question, and I declined to write letters otherwise than for publication. The plurality in the State for the members of the legislature who voted for me was over 33,000. The Senator from New Hampshire intimates that the same people would probably not return me now, and the Senator is doubtless correct. Since

that time new issues have been made, upon which I have the misfortune to differ with the machine of my State. One of the difficulties in the matter, and one of the ends to be secured by a popular election, is that the machine shall not have the power to dictate who shall represent the people of Illinois or of any other State. The machine has control in Illinois. The machine has control in other States. The machine differs with me in my opinion in regard to public measures. I defy the machine, and whether or not the machine is more powerful than the people I can not tell. I have never been in the habit of submitting to dictation from any quarter in regard to my individual views or my public conduct.

I have during my life entertained and expressed my own opinions. I say, therefore, that one of the objects that ought to be contemplated by this great change in the mode of electing a Senator is that a candidate for the Senate may appeal to the people against the machine, may resist it, and, perchance, may overthrow it. The machine will control the legislature beyond doubt. Two machines will control the legislature. The Republican machine in Illinois will control the Republican organization and the Democratic free-silver machine will control the Democratic part of the general assembly. The two machines will struggle, and one of those machines will elect, under the present system, a Senator. If the people had the right and power to choose a Senator by their direct vote, there would be some opportunity for a man of energy and force and patriotism and fearlessness; there would be some possibility of resisting and even overthrowing both those machines.

Mr. President, I have no expectation of a vote on this subject at this session of Congress. I have not interested myself very much in attempting to bring the matter before the Senate because the public mind is now engaged in other questions, and it is not probable that this question will be largely considered in the approaching canvass.

The Senator from New Hampshire [Mr. CHANDLER] speaks of this as a Populistic idea. Mr. President, I am not usually terrified by mere names. If the Populists should favor a truth, I would not reject it because of Populistic favor. I grant that the fact that the Populists teach a particular tenet is only prima facie evidence of its truth. I should want to investigate very thoroughly before I accepted it; but the Populists are wise in their generation. The Populists are attempting to appeal to the people; and my own opinion is—and I express it as a formula almost—that the rights of the people of this country are safe with the people. I recognize the old expression made half a century ago, that the sober second thought of the people will generally be right. I am quite content that this question shall lie over. I think just now the people are too profoundly engaged in the consideration of other questions to give it that consideration which it deserves. I am satisfied, too, that the machine which is found in the Republican party and the machine which will probably control the Democratic party, or such of them as will submit to the machine—I say these machines will control those serviceable party men, the men who are timid and who hesitate, the men who had rather follow the machine blindly than to encounter its wrath. Such men, I say, the machine will control.

Mr. CHANDLER. I wish to ask the Senator——

Mr. SQUIRE. I ask the Senator if he does not think it possible that the machine might control the popular nominations for Senator?

Mr. PALMER. The machines control the nominations?

Mr. SQUIRE. I refer to the nominations made by State conventions in the usual way.

Mr. PALMER. I do not quite understand the Senator.

Mr. SQUIRE. If the Senator were nominated by a popular convention, a convention of his party in his State, might not that convention be controlled by the machine?

Mr. PALMER. Possibly.

Mr. CHANDLER. Brilliant minds frequently strike the same idea. I was about asking the Senator the same question which the Senator from Washington [Mr. SQUIRE] has asked him; and as I addressed the Chair first, I had hoped that I should have had the advantage of priority of application. What I wanted to ask the Senator, seriously, was whether the election of a Senator by popular vote tends in any way to break up caucus rule and machine rule? I do not think it does. I should like to have the Senator elucidate that point.

Mr. PALMER. I think it does.

Mr. CHANDLER. I agree with the Senator that there is nothing more wicked and atrocious than machine rule when it drives one out of office instead of driving him in [laughter], but the question with me is how the election of Senators by the people will disestablish the caucus and the machine? I do not think the Senator has made that point clear.

Mr. PALMER. Mr. President, I have said that the election of Senators by the people gives to the people the opportunity at least of criticising the acts of the machine, and that it gives them an opportunity, if they think proper to exercise it, to resist and resent the domination of machines. The Senator from New Hampshire speaks of the machine as being an inconvenient institution when it turns men out of office. That, of course, is a sentiment which the Senator must feel very deeply, and one which will occur to him no doubt, but does not occur to other men with the same degree of force.

I have never myself submitted to a machine; I have never yet allowed myself to be controlled by a machine. My political life has been a somewhat varied one. I think I have come into fashion about once every ten years; very much like Sir Roger de Coverley's garments, I go out of fashion and come into fashion every now and then. I am inclined to think now on Democratic lines that I am out of fashion. But there is another consolation I have, that I am no longer in the political field. I have for three-score years and ten, at least, played my part in the politics of my State and of this country. I have always acted according to the dictates of my own judgment. Some people speak of the blessings of enjoying one's opinions. I have struggled to be and act as a free man. I have reached that limit in human life when submission to the machine is not so attractive to me as it is to my friend from New Hampshire, who may feel necessities which I do not feel.

Mr. President, it will be found on investigating this question thoroughly, and, indeed, I predict now, that the chains which make parties despotic are falling from the limbs of the people of this country. During the war, when the preservation of the Union was everything, when under the terrible pressure of the hour men yielded everything for the sake of the great result, none of us was particular about means, about how ends were to be accomplished; the great end was kept steadily in view. After the war its resentments and its bitternesses chained men into political parties—made us the slaves of mere organizations. That time has passed. The country is at peace, the authority of the Union is restored to all parts of the Republic, and there is no vestige anywhere within the limits of the United States, between the oceans or between the Lakes and the Gulf, of an unpatriotic spirit.

We are all once more Americans, and we are all intent, and the people are intent, upon the consideration of the preservation of their constitutional Government and the promotion, under that constitutional Government, of their own highest interests. Conditions as they existed one hundred years ago or fifty years ago no longer exist. To-day the schoolhouse is found everywhere; the newspaper, inaccurate as much of its information is, invades every neighborhood, and men are wiser than they were. I say wiser without meaning any disparagement to our patriotic ancestors; but men know more. Inventions have taken place, marvelous changes have taken place which embarrass us by their extent and their marvelous influence, and the people of the country are beginning to reach that point at which they are leveled up. Yes, I repeat the expression, they are leveled up, and they are far more competent now to select their President. I should have no objection myself, while the autonomy of the States is retained, to the election of President and Vice-President by the people. I am attached to the autonomy of the States, to their independence and sovereignty, and I desire that they shall preserve their just authority; and within that limit I should be perfectly satisfied that the election of President should be accomplished by direct vote. There are difficulties about it, as, for instance, the adjustment of the respective votes of the States.

As to the expression that the Senator from New Hampshire quotes from me, that the electors are now the mere counters in the election of a President, the mere John Does and Richard Roes, they are merely used as a means of determining the relative power of the States in the electoral college, and I do not know that that could be improved. But on this point, this is a question where the people would seriously select their candidate for the Senate, and the plurality would elect as it ought in the election of all public officers and does in regard to all public officers.

So this proposition involves nothing novel which ought to alarm the most conservative. It is simply a question whether the legislature, which is charged with the duty of conserving the interests of the State, shall be also required to separate themselves from those great duties and continue the exercise of the power of choosing Senators. That the duties interfere with each other nobody can doubt, because if there were no political influences—I mean if the legislatures of the States were disconnected entirely from the election of Senators—they would be the representatives of the real and present interests of the people of the States. Now, whatever may be the wants or the necessities of the people of the States with respect to local legislation, the legislators are elected with reference to the vote they will cast for Senator, and thus these duties are made to conflict, and the national interests, the party interests, are so overwhelming in comparison with those of the people of the States, of the local interests, that a Democratic legislature, or a Republican legislature, or a Populist legislature, instead of consulting the interests for which they are elected assume at once the sphere and field of political action, and if they elect a

Senator who is satisfactory to the party in power all their shortcomings in regard to the interests of the people of their States are forgiven, unless indeed they should be guilty of some crime which would subject them to indictment. It is a mixture of authority and a confusion of duties from which the legislatures of the States ought to be relieved.

Mr. HILL and Mr. HAWLEY addressed the Chair.

The PRESIDING OFFICER. The Senator from New York [Mr. HILL] first addressed the Chair.

Mr. HAWLEY. If the Senator from New York will withhold his motion for a moment, I should like to say a few words on the pending bill.

Mr. HILL. I yield to the Senator.

Mr. HAWLEY. Of course I am not intending to take much of the Senate's time, but I should like to put on record my entire dissent, my vigorous dissent, from the Senators who are advocating the pending proposition to change the Constitution by providing for the election of Senators by the people.

The Senator from Illinois reminds me of one of the traditional stories of John Randolph, who, on some occasion like this, stretched his long form, threw forward his hand, and pointing with his skinny, long finger, lifted up his high-keyed voice and screamed, "Change is not reform." The American people have learned that, and it has been the general caution in considering constitutional changes. Certain it is that they have been made with exceeding deliberation and care. The amendments which followed speedily after the adoption of the Constitution have just been described, and I need not enlarge upon them. They were the deliberate judgment of the various States, and they were intended to supply what appeared to be simply broad general declarations, as in a bill of rights, and to more specifically describe reserved rights.

In the process proposed Senators would be chosen by a convention—if these gentlemen have their way, a popular convention. They are now chosen by a convention; and the question is, which is the more dignified and deliberate and safe body to which to refer this great question?

We all know what the popular State convention is. Each party would nominate in such a body a candidate for the Senate. How are the members of the convention chosen? A notice is put up that there will be a caucus at a hotel, or a schoolhouse, or a public hall at the county seat or in the township. How many attend? Perhaps 10 or 20, or in times of great excitement 50 per cent of the voters of the party.

They are the active party men, the young men out for a social afternoon or evening, and include the thoughtful schemers. Delegates are selected sometimes upon the nomination of a committee, sometimes by ballot. It is a compliment to be sent to the State convention, but it is by no means certain that a careful choice is made. Now, the millionaire or multimillionaire who is keen and a practiced hand and is determined to secure the convention, and will use money in large or small sums, according to the size of his State or the necessities of the case, has an enormous advantage. He can send his agents in advance or engage agents on the spot throughout the State to arrange for favorable delegations by packing caucuses.

Is not that so? Is not that a fair description of the manner in which a State convention can be and sometimes is controlled? Observe, it is a temporary affair, usually for a single day only. But there would be a far greater probability of selecting abler and truer men as candidates for the legislature.

But what is the other convention which now chooses a United States Senator? It is the legislature. The members of it are chosen at a formal election under the sanction of statutes, with a formidable list of careful restrictions as to how the voters shall be registered, how the ballots shall be printed, how they shall be received, how they shall be counted, and how the result shall be forwarded, and out of that comes the choice of a man to go to a convention that is to last a month or five months, as the case may be, according to the size of the State and the quantity of business. And it is a convention which has unlimited power to tax and is the maker of and mender of the whole body of laws.

It is a great deliberative convention, and to add to its dignity and secure the conservativeness, if I may say so, of the proceedings, the United States statute comes, without asking permission, into the legislature of the sovereign State, and regulates minutely the details of choosing a Senator. The election shall be held on the Tuesday after the meeting and organization of the legislature. The two houses assembled shall vote separately for him whom they would have to be their United States Senator. The next day the two houses meet in joint convention—a complete reconstruction of the old legislature, now, mind you, meeting as one body—and there the votes of the previous day are compared. If the two houses shall have agreed, then the election of a Senator is announced; if they shall not have agreed, they are to meet each day and give at least one ballot for their choice for Senator.

How can we lead the people—to use the old-fashioned New England phrase—how can we lead the people through a more deliberate and better-guarded process, a more conservative process, than this for choosing a Senator?

In the other case, the case of a nomination by a popular convention, there is no statutory sanction, no laws against double voting, no oath of office, no official record, no laws against bribery, no protection whatever be put around the vote. The whole affair is open to the rush and corruption, the unbarred and unpunished corruption of great popular assemblies.

I call attention to what you all know already, the extreme conservativeness of the Constitution of the United States. In many respects there is nowadays a rush and a cry in behalf of the people—"The people want this," "The people demand this," "Let this be referred to the people." Sir, the people made this conservative Constitution, with all its balances and checks, that their own hasty will or enthusiasm, their temporary passion, might have some check, some delay before taking the form of permanent statutes.

The choice of the electors of President and Vice-President was supposed to give a halting place for the will of the people; it was supposed that the electors would accept the trust and exercise an independent judgment, but that has become a fiction of law, yet not without its uses. Why, Mr. President, the Senate itself is one of those conservative interventions between the immediate expression of the will of the people and the final crowning of legislation. Why do not these gentlemen who talk so much about the will of the people, about referring measures to a popular vote, and all that, demand that the nation shall abolish the Senate and content itself with but one voice, and that the voice of the House of Representatives, who are called the strictly popular representatives of the people's will? Because the judgment of the wisest men in the world, not those of our great convention alone, but those of other countries, is that there ought to be two bodies, one, if possible, chosen for a longer term than the other, theoretically chosen from among men of rather more age and experience, and theoretically with a little more wisdom. And to them is given a longer term and the renewal of one-third only every two years. So this very Senate itself is one of those devices of the fathers for a halting, a stepping-stone, a place to consider, a check, a balance, before rushing popular action into final constitution and law.

I say with the Senator from New Hampshire, the longer I live the more I am amazed by those men striding about in that great convention of 1789 as if they had full knowledge of what was to happen in hundreds of years, and creating a Constitution which, as has often been said, is the greatest work of human hands. I would approach it with solemnity. I would hesitate long before I would change it. Of course nothing human is absolutely perfect, but there is nothing of human creation, in my judgment, so nearly perfect as that Constitution.

Now, a single lesson from history, a minor lesson from history in this matter. Our friends the enemy, the late Confederates, had a convention. They had a chance to make a complete constitution. What did they do? They took the old Constitution? What changes did they make in it? They did not content themselves with the present Democratic doctrine that protection by taxation is not permitted by the Constitution. They specifically prohibited it in their revised constitution. What else? They gave cabinet officers the right to sit in the two deliberative bodies. Now, if they made any other serious change, if those were not the two chief changes, my memory fails me. Does the Senator from Mississippi [Mr. WALTHALL] recollect anything further of consequence? There were some phrase changes besides. There were men in that convention who had seen all the errors, if there be such, all the defects and shortcomings of the old Constitution. They had a chance to make a perfect instrument. Did they change the method of electing Senators? They did not touch it. I doubt if they thought of it.

The present method, in my judgment, is the most conservative, the safest, the wisest. If I were to characterize this new process roughly with the freedom of the press, I should say that it was an attempt to provide that the United States Senate shall belong to rich and corrupt men.

Mr. HILL. Mr. President——

Mr. MITCHELL of Oregon. Will the Senator from New York yield to me a moment? We have made much more progress in the discussion of this important question to-day than I hoped we would be able to do. We have had a number of interesting speeches on both sides of the question. I do not know whether there is any disposition, in fact, upon the part of any Senator upon either side to discuss the measure further. If there is not, for one, I should be glad if we could come to a vote now in regard to the matter, but as I said before, if there is a disposition to discuss it further, then I would ask the unanimous consent of the Senate that the joint resolution go over until the next session and

be put down as the special order for the second Monday of December next. I ask unanimous consent that that be done.

The PRESIDING OFFICER. The Senator from Oregon asks unanimous consent that the joint resolution under consideration may be postponed until the next session and be made the special order for the second Monday of December at 2 o'clock. Is there objection? The Chair hears none, and that order is made.

CONTEMPTS OF COURT.

Mr. HALE. Mr. President——

The PRESIDING OFFICER. The Chair had recognized the Senator from New York. He yielded to the Senator from Oregon.

Mr. HILL. I ask that the unfinished business be temporarily displaced to take up for consideration the bill (S. 2984) in relation to contempts of court.

The PRESIDING OFFICER. The Senator from New York asks unanimous consent that the unfinished business may be further temporarily laid aside, and that the Senate proceed to the consideration of a bill which will be stated.

The SECRETARY. A bill (S. 9284) in relation to contempts of court.

The PRESIDING OFFICER. Is there objection? The Chair hears none. The bill will be read.

Mr. ALDRICH. Mr. President——

Mr. HAWLEY. Will the Senator yield to me for morning business?

Mr. ALDRICH. Before the Senator proceeds——

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Rhode Island?

Mr. HILL. Yes, sir.

Mr. ALDRICH. As the Senator's bill is a Senate bill and there are some important House bills that should be acted upon at this session, I ask the Senator from New York to yield to me to ask consent to take up a House bill which has been amended by the Senate committee, and which, I think, will not take any time.

Mr. HILL. I will yield.

IMPORTED PARCELS AND PACKAGES.

Mr. ALDRICH. I ask that House bill 6259 may be taken up.

The PRESIDING OFFICER. The Senator from Rhode Island asks unanimous consent that the Senate proceed to the consideration of a bill which will be read by title.

The SECRETARY. A bill (H. R. 6259) to expedite the delivery of imported parcels and packages not exceeding $500 in value.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

Mr. WOLCOTT. There are some matters requiring action in executive session. I move that the Senate proceed to the consideration of executive business.

Mr. HAWLEY. No; I trust not. Please let us transact some morning business.

Mr. WOLCOTT. Is this measure morning business?

Mr. HAWLEY. I have some morning business to present.

Mr. WOLCOTT. I supposed the Senator had finished. Of course I will give way for morning business.

Mr. ALDRICH. I hope the Senator from Colorado will allow this bill to be taken up and discussed. If there is any objection to it, of course I will not press it.

The PRESIDING OFFICER. The Senator from Colorado moves that the Senate proceed to the consideration of executive business.

The motion was not agreed to.

The PRESIDING OFFICER. Is there objection to the consideration of the bill indicated by the Senator from Rhode Island?

Mr. WOLCOTT. I object, Mr. President.

The PRESIDING OFFICER. The Senator from Colorado objects to the consideration of the bill for which unanimous consent is asked.

Mr. ALDRICH. I move that the Senate proceed to the consideration of the bill. I will state that I do not expect to continue the discussion of it.

Mr. LODGE. I should like to ask if that would displace the unfinished business?

The PRESIDING OFFICER. The Chair will state the question. Objection having been made, the Senator from Rhode Island moves that the Senate now proceed to the consideration of the bill indicated by him.

Mr. ALDRICH. I will state that I do not intend to keep the bill before the Senate if it leads to long discussion. I should like to have an opportunity to have it considered for a few minutes in order that I may make a statement of the purposes of the bill and the reasons why I desire to have it acted upon.

Mr. LODGE. I ask if that would have the effect of displacing the unfinished business?

The PRESIDING OFFICER. If the motion should prevail the Chair understands that it would displace the unfinished business.

Mr. LODGE. I trust that will not be done.

Mr. WOLCOTT. I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum being suggested, the Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Aldrich,	Davis,	Lodge,	Pugh,
Bate,	Dubois,	Mitchell, Oreg.	Quay,
Berry,	Elkins,	Mitchell, Wis.	Sewell,
Brice,	Gallinger,	Morgan,	Shoup,
Brown,	Gear,	Nelson,	Smith,
Butler,	George,	Palmer,	Squire,
Cannon,	Hale,	Pasco,	Turpie,
Chandler,	Hansbrough,	Peffer,	Walthall,
Chilton,	Harris,	Perkins,	Warren,
Clark,	Hawley,	Pettigrew,	Wolcott.
Cockrell,	Hill,	Platt,	
Cullom,	Lindsay,	Pritchard,	

The PRESIDING OFFICER. Forty-six Senators have answered to their names. A quorum is present.

Mr. HALE. It is evident that we can do nothing to-night. We have been sitting very late during all the week. I move that the Senate adjourn.

The motion was agreed to; and (at 5 o'clock and 6 minutes p. m.) the Senate adjourned until to-morrow, Saturday, June 6, 1896, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

FRIDAY, *June 5, 1896.*

The House met at 11 o'clock a. m. Prayer by the Chaplain, Rev. HENRY N. COUDEN.

The SPEAKER. The Clerk will cause the Journal of the preceding session to be read.

Mr. KEM. Mr. Speaker, I make a point of no quorum.

The SPEAKER (after counting the House and a quorum appearing). The Clerk will read the Journal.

The Journal of yesterday's proceedings was read.

The SPEAKER. The question is on approving the Journal.

Mr. BROMWELL. Mr. Speaker, the Clerk, as he read the Journal, made it appear that the gentleman from New Jersey [Mr. LOUDENSLAGER] asked to have the bill relating to the relief of John Cahill referred to the Committee on Invalid Pensions. It was I who made that motion, having introduced the bill.

The SPEAKER. The correction will be made.

The Journal was approved.

SPECIAL ORDER FOR SATURDAY.

Mr. HENDERSON. I offer a privileged resolution, which I send to the Clerk's desk.

The Clerk read as follows;

The Committee on Rules, to whom was referred resolution No. 376, have had the same under consideration and report the following substitute therefor:

Resolved, That on Saturday, June 6, 1896, it shall be in order for individual members to move to suspend the rules, under the regulations and requirements of Rule XXVIII.

The resolution was agreed to.

ORDER OF BUSINESS.

Mr. STRODE of Nebraska. Mr. Speaker, I now move the previous question upon the contested-election case of Martin *vs.* Lockhart. I am requested to yield a moment, however, to the gentleman from Ohio [Mr. GROSVENOR] before asking a vote on the question.

EMPLOYEES IN THE DEPARTMENTS, ETC.

Mr. GROSVENOR. Mr. Speaker, I desire to call up House resolution numbered 357.

The Clerk read as follows:

Resolved, That the Secretary of the Treasury be, and he is hereby, directed to furnish to the House of Representatives the following information, to wit:

First. The number of bureau officers, chiefs of division, clerks, and employees of every grade who were employed in the Treasury Department on the 4th day of March, 1893, and who have since been removed, or have died, or have resigned, separately stating the numbers of the several grades of clerkships, and separately stating those holding positions in the classified service under the civil-service law and those not in the classified service.

Second. The number, by the same designation of grades, of those appointed in the Treasury Department since the said date, with the same classification, to wit, those who have received appointments under the civil-service rules and those appointed not under the civil-service rules.

Third. The number of employees, clerks, chiefs of division, and other officers of the Treasury Department who were appointed during said period without civil-service examination and civil-service rules and who are now covered by the orders of the President extending the civil-service law, rules, and regulations to the employees of said Department.

Mr. GROSVENOR. Mr. Speaker, there is a substitute. I ask that the substitute be read.

The Clerk read as follows:

Resolved, That the Secretary of State, the Secretary of the Treasury, the Secretary of War, the Attorney-General, the Postmaster-General, the Secretary of the Navy, the Secretary of the Interior, and the Secretary of Agriculture be, and they are hereby, directed to furnish the House of Representatives the following information, to wit:

First. The number, names, salary of each, and the States to which they are

credited, of all bureau officers, chiefs of division, clerks, and employees of every grade who were employed in their respective Departments on the 4th day of March, 1893, and who have since been removed or reduced in salary, or who have died or resigned, stating the same in classes according to grade and salary, and stating also, separately, those who were in the classified and those who were in the unclassified service.

Second. The number, names, salary of each, and the States to which they are credited, of all officers and employees of the classes above named who have been appointed or promoted to positions in their respective Departments since the 4th day of March, 1893, stating, separately, those in the classified and those in the unclassified service.

Third. The number, names, salary of each, and the States to which they are credited, of all the ex-Union soldiers in their respective Departments who have been appointed, promoted, reduced, or removed, stating them separately, or who have resigned or died, since the 4th day of March, 1893.

Mr. GROSVENOR. Mr. Speaker, the original resolutions were addressed to each of the Departments of the Government separately. The Committee on Reform in the Civil Service have reported back a substitute for one of the resolutions, and have made the substitute broad enough to cover all of the Departments, so that it will obviate the necessity or propriety of acting on the several resolutions which were introduced. This resolution is simply to make certain inquiries which can not be answered at the present session of Congress doubtless, but which will afford the country some knowledge of how skillfully and adroitly matters are being carried on in the interest of the enthronement of civil-service reform. Upon the adoption of this resolution I demand the previous question.

Mr. DOCKERY. I hope we shall have order, Mr. Speaker, so that we can hear the gentleman.

The SPEAKER. The gentleman asks for the previous question.

Mr. DOCKERY. Mr. Speaker, I hope that the gentleman will not call for the previous question at this time, because I desire to offer an amendment to the resolution.

Mr. GROSVENOR. I insist on the previous question.

Mr. DOCKERY. I ask my friend from Ohio——

Mr. GROSVENOR. I should like to accommodate my friend, but in the present condition of business I dislike to have any amendment offered to so pertinent a resolution.

Mr. DOCKERY. Will the gentleman allow me to state what the amendment is?

Mr. GROSVENOR. The gentleman can offer his as a separate resolution. I will support it without knowing what it is.

Mr. McMILLIN. I believe my friend from Missouri is a member of the committee.

Mr. DOCKERY. I am a member of the committee, in good standing, too, let me say. [Laughter.] I should like to have the privilege of offering the amendment. I ask the gentleman to let me read the amendment, and then perhaps he will accept it. I desire to strike out, in line 11 of the resolution, the words "ninety-three," so that the resolution will read "March 4, 1889." In other words, I desire to secure a statement from the Departments of all the removals since March 4, 1889, and covering the period to which the gentleman refers. The resolution, as it now stands, is under the suspicion of being a partisan resolution, and I know my non-partisan friend——

Mr. GROSVENOR. Oh, nobody would believe that if it were stated. [Laughter.]

Mr. DOCKERY. I know my friend does not desire the resolution to be subject to any such suspicion.

Mr. CANNON. Why not go back to 1883?

Mr. DOCKERY. No; I want to go back to 1889, so that we can cover the period from March 4, 1889, to March 4, 1893, and show the removals made under the last Administration. Now, it is alleged—of course I would not state it here—that the civil-service rules were suspended in the Post-Office Department for the purpose of turning out 1,700 Democrats.

Mr. McMILLIN. Twenty-one hundred.

Mr. GROSVENOR. Oh, I can not yield for a speech.

Mr. DOCKERY. I believe the number was 2,100. That is the allegation of some wicked Democrat, especially this Democrat from Tennessee who has just made it.

Mr. GROSVENOR. That is a wicked Democrat. You have got the right man. [Laughter.]

Mr. DOCKERY. This amendment if agreed to will allow the late Republican Administration to vindicate itself from that aspersion just made by the gentleman from Tennessee [Mr. McMILLIN]. [Laughter.]

Mr. GROSVENOR. Mr. Speaker, I decline to further continue debate on this subject. I want to preserve the pristine purity of my resolution.

Mr. DOCKERY. Then the gentleman denies me an opportunity to offer an amendment.

Mr. GROSVENOR. Let your proposition stand on its own merits. It has merit.

Mr. DOCKERY. Let the House have a vote on it.

Mr. McMILLIN. Surely the gentleman would not in a matter which was brought up two or three weeks ago debate it for two or three minutes so that debate could not be had after the previous question was ordered, and also thereby cut off an opportunity for offering amendments?

Mr. GROSVENOR. I did it for that express purpose.

Mr. McMILLIN. You did it for that purpose! I am glad you are bold enough to state that.

Mr. GROSVENOR. You would have understood it that way if I had denied it. [Laughter.]

Mr. McMILLIN. I am glad also—— [Renewed laughter.]

Mr. DOCKERY. The country understands the gentleman's purpose.

Mr. McMILLIN. The country understands your proposition.

The SPEAKER. The gentleman from Ohio demands the previous question.

The question was taken; and the Speaker announced that the ayes seemed to have it.

Mr. McMILLIN and Mr. DOCKERY. Division.

The House divided; and there were—ayes 146, noes 40.

Mr. McMILLIN. Let us have the yeas and nays on that. If we are to be cut off from debate we will have a little opportunity to meditate, at least.

The SPEAKER. The gentleman from Tennessee is not in order.

Mr. McMILLIN. I will try to make myself in order. I demand the yeas and nays. I will conform myself to the most fastidious requirement.

The yeas and nays were ordered.

The question was taken; and there were—yeas 170, nays 53, not voting 131; as follows:

YEAS—170.

So the previous question was ordered.

The following pairs were announced:

Until further notice:

Mr. DALZELL with Mr. CRISP.

Mr. GILLETT of Massachusetts with Mr. COWEN.

Mr. BURRELL with Mr. COCKRELL.

Mr. STEPHENSON with Mr. NEILL.

Mr. STEELE with Mr. MCCLELLAN.

Mr. HEATWOLE with Mr. DINSMORE.

Mr. BARTHOLDT with Mr. DENNY.

Mr. MCCALL of Massachusetts with Mr. DE ARMOND.

Mr. FOSS with Mr. MCLAURIN.

Mr. NORTHWAY with Mr. PRICE.

Mr. COUSINS with Mr. LIVINGSTON.

Mr. BOWERS with Mr. MINER of New York.

Mr. SNOVER with Mr. MADDOX.

Mr. CORLISS with Mr. MOSES.

Mr. JOHNSON of Indiana with Mr. COX.

Mr. PICKLER with Mr. MILES.

Mr. BARHAM with Mr. KYLE.

Mr. MEIKLEJOHN with Mr. CROWLEY.

Mr. FOOTE with Mr. HUTCHESON.

Mr. COLSON with Mr. KENDALL.

Mr. WILLIAM A. STONE with Mr. LAWSON.

Mr. HICKS with Mr. SPENCER.

Mr. HITT with Mr. WASHINGTON (except Underwood case).

Mr. ROYSE with Mr. TURNER of Virginia (except Tucker-Yost election case).

Mr. SMITH of Michigan with Mr. BERRY.

On this question:

Mr. LEWIS with Mr. TYLER.

Mr. HOOKER with Mr. COOPER of Florida.

Mr. LOUD with Mr. WILSON of South Carolina.

Mr. BINGHAM with Mr. WHEELER.

Mr. VAN VOORHIS with Mr. WILLIAMS.

For this day:

Mr. BRUMM with Mr. ELLETT.

Mr. PERKINS with Mr. MEYER.

Mr. MCCLEARY of Minnesota with Mr. RUSK.

Mr. LEISENRING with Mr. TUCKER.

Mr. CURTIS of Iowa with Mr. RICHARDSON.

The result of the vote was then announced as above recorded.

Mr. DOCKERY. Mr. Speaker, I move to recommit the resolution to the Committee on the Civil Service, with instructions to report it back to the House with the words "ninety-three," in line 11, stricken out, and the words "eighty-nine" substituted therefor.

The question being taken on the motion to recommit, the Speaker announced that the noes seemed to have it.

Mr. DOCKERY. I call for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 61, nays 163, not voting 130; as follows:

YEAS—61.

Dalzell,	Lewis,	Sauerhering,	

So the resolution was adopted.

Mr. BAILEY. I desire to know whether I am recorded. If not, I desire to announce my presence if necessary to make a quorum.

The SPEAKER pro tempore. The gentleman is not recorded. His announcement that he is present will appear in the RECORD.

The result of the vote was announced as above stated.

Mr. GROSVENOR. I move to reconsider the last vote and also move that the motion to reconsider be laid on the table.

The SPEAKER pro tempore. If there be no objection, the motion to reconsider will be laid on the table.

Mr. McMILLIN. On that question we want a vote.

The SPEAKER pro tempore (having put the question on laying on the table the motion to reconsider). The ayes seem to have it.

Mr. McMILLIN. Let us have a division.

Mr. GROSVENOR. I withdraw the motion.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had passed bills of the following titles; in which the concurrence of the House was requested:

A bill (S. 2989) to increase the pension of Caroline S. Baker;

A bill (S. 3216) donating condemned cannon and condemned cannon balls to the Wyoming State Soldiers' Home, at Cheyenne, Wyo., and for other purposes;

A bill (S. 2923) for the better improvement of the Government reservation at the city of Fort Smith, in the State of Arkansas, and for other purposes;

A bill (S. 2742) for the relief of Charles Fletcher, alias James H. Mitchell;

A bill (S. 2334) construing the acts of Congress in relation to the award of life-saving medals;

A bill (S. 1785) for the correction of muster of Adolph von Haake, late major Sixty-eighth Regiment Veteran Volunteer Infantry;

A bill (S. 1551) granting a pension to Mrs. Selena McKay, of Suwanee County, Fla.;

A bill (S. 1501) granting an increase of pension to Mrs. Lucy Alexander Payne, widow of Capt. J. Scott Payne, Fifth United States Cavalry;

A bill (S. 1488) to provide for the payment of the claim of Christian M. Kirkpatrick for paving the street adjacent to the United States arsenal at Indianapolis, Ind.;

A bill (S. 1277) to place Henry Biederbick, Julius R. Frederick, Francis Long, and Maurice Connell on the retired list of enlisted men of the Army; and

A bill (S. 915) for the relief of Sarah R. Dresser.

The message also announced that the Senate had passed without amendment bills of the following titles:

A bill (H. R. 8469) to authorize the Baltimore and Washington Transit Company of Maryland to enter the District of Columbia;

A bill (H. R. 4888) for the relief of George Hager;

A bill (H. R. 7919) granting a site for the erection and maintenance of a charity hospital by the city of Biloxi, Miss.;

A bill (H. R. 956) for the relief of Sophia Sparks and Julia C. Sparks, of Annapolis, Md.;

A bill (H. R. 4921) to relieve the North Georgia Agricultural College from the payment of $450 for damaged gun;

A bill (H. R. 5258) granting an honorable discharge to John B. Besler;

A bill (H. R. 5279) granting a pension to Jerusha H. Brown; and

A bill (H. R. 6607) for the relief of Helen Larned.

The message also announced that the Senate had passed with amendments the bill (H. R. 8262) authorizing and directing the Secretary of the Navy to furnish condemned cannon to certain Grand Army posts, a monument association, and army post; in which the concurrence of the House was requested.

The message also announced that the Senate had passed the following resolution:

Resolved, That the Secretary be directed to request the House of Representatives to return to the Senate the bill (S. 1189) granting a pension to Eliza Sandford.

The message also announced that the Senate had passed the following resolutions; in which the concurrence of the House was requested:

Resolved by the Senate (the House of Representatives concurring), That the local United States engineers in the State of California, under the direction of the Chief of Engineers of the United States, be, and they are hereby, authorized and directed to examine and survey Mormon Channel and Calaveras River, in the said State of California, with special reference to a dam at Bellota and cut-offs in the San Joaquin River below the city of Stockton, Cal., and to report the result thereof to the Chief of Engineers of the United States as speedily as possible.

Also:

Resolved by the Senate (the House of Representatives concurring), That there be printed 1,000 additional copies of part 2, together with its accompanying atlas, of Senate Document No. 137, of the Fifty-fourth Congress, first session, for the use of the United States Fish Commission.

Also:

Resolved by the Senate (the House of Representatives concurring), That the Public Printer is hereby authorized and directed to print 2,200 extra copies of the report of Leonhard Stejneger on the Russian fur-seal islands, being Article I of the Bulletin of the United States Fish Commission for 1896. Of the said number of copies, 500 shall be for the use of the Senate, 1,000 for the House, 500 for the use of the Treasury Department, and 200 for the use of the Fish Commission.

The message also announced that the Senate had passed without amendment the following resolution:

Resolved by the House of Representatives (the Senate concurring), That there be printed 10,000 copies each of the majority and minority reports of the Committee on Ways and Means concerning reciprocity and commercial treaties, and also 10,000 copies of the hearings before the subcommittee of said Committee on Ways and Means on reciprocity and commercial treaties; 3,000 copies of said reports and hearings for the use of the Senate and 7,000 copies for the use of the House of Representatives.

SENATE BILLS AND JOINT RESOLUTIONS REFERRED.

Under clause 2 of Rule XXIV, the following Senate bills and resolutions were taken from the Speaker's table and referred by the Speaker as follows:

A bill (S. 915) for the relief of Sarah R. Dresser—to the Committee on Indian Affairs.

A bill (S. 1277) to place Henry Biederbick, Julius R. Frederick, Francis Long, and Maurice Connell on the retired list of enlisted men of the Army—to the Committee on Military Affairs.

A bill (S. 1488) to provide for the payment of the claim of Christian M. Kirkpatrick for paving the street adjacent to the United States arsenal at Indianapolis, Ind.—to the Committee on Claims.

A bill (S. 2923) for the better improvement of the Government reservation at the city of Fort Smith, in the State of Arkansas, and for other purposes—to the Committee on the Public Lands.

A bill (S. 1551) granting a pension to Mrs. Selena McKay, of Suwanee County, Fla.—to the Committee on Pensions.

A bill (S. 1785) for the correction of muster of Adolph von Haake, late major Sixty-eighth Regiment Veteran Volunteer Infantry—to the Committee on War Claims.

A bill (S. 2334) construing the acts of Congress in relation to the award of life-saving medals—to the Committee on Interstate and Foreign Commerce.

A bill (S. 3216) donating condemned cannon and condemned cannon balls to the Wyoming State Soldiers' Home, at Cheyenne, Wyo., and for other purposes—to the Committee on Naval Affairs.

A bill (S. 2742) for the relief of Charles Fletcher, alias James H. Mitchell—to the Committee on Military Affairs.

A bill (H. R. 8262) authorizing and directing the Secretary of the Navy to furnish condemned cannon to certain Grand Army posts, a monument association, and army post, with Senate amendments—to the Committee on Naval Affairs.

Concurrent resolution—

Resolved by the Senate (the House of Representatives concurring), That the Public Printer is hereby authorized and directed to print 2,200 extra copies of the report of Leonhard Stejneger on the Russian fur-seal islands, being article 1 of the Bulletin of the United States Fish Commission for 1896. Of the said number of copies 500 shall be for the use of the Senate, 1,000 for the House, 500 for the use of the Treasury Department, and 200 for the use of the Fish Commission.

To the Committee on Printing.

Concurrent resolution—

Resolved by the Senate (the House of Representatives concurring), That there be printed 1,000 additional copies of Part II, together with its accompanying atlas, of Senate Document No. 137 of the Fifty-fourth Congress, first session, for the use of the United States Fish Commission.

To the Committee on Printing.

Concurrent resolution—

Resolved by the Senate (the House of Representatives concurring), That the local United States engineers in the State of California, under the direction of the Chief of Engineers of the United States, be, and they are hereby, authorized and directed to examine and survey Mormon Channel and Calaveras River, in the said State of California, with special reference to a dam at Bellota and cut-offs in the San Joaquin River below the city of Stockton, Cal., and to report the result thereof to the Chief of Engineers of the United States as speedily as possible.

To the Committee on Rivers and Harbors.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had agreed to the reports of committees of conference on the disagreeing votes of the two Houses on the amendments of the Senate to bills of the following titles:

A bill (H. R. 4020) granting an increase of pension to Mrs. William Loring Spencer; and

A bill (H. R. 2143) granting a pension to Mrs. Emily W. Van Derveer, widow of the late Brig. Gen. Ferdinand Van Derveer.

The message also announced that the Senate had passed without amendment bills of the following titles:

A bill (H. R. 8248) to increase the pension of Mrs. Emily E. Cash; and

A bill (H. R. 9275) approving certain acts of the legislative assembly of the Territory of New Mexico authorizing the issue of certain bonds of said Territory, and for other purposes.

The message also announced that the Senate had further insisted upon its amendment to the bill (H. R. 6614) making appropriations for the service of the Post-Office Department for the fiscal year ending June 30, 1897, numbered 1, disagreed to by the House of Representatives, had asked a further conference with the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. ALLISON, Mr. PETTIGREW, and Mr. FAULKNER as the conferees on the part of the Senate.

ORDER OF BUSINESS.

Mr. POOLE. I desire to present a privileged report.

Mr. STRODE of Nebraska. I believe I had the floor and yielded it temporarily.

The SPEAKER pro tempore. The gentleman from Nebraska [Mr. STRODE] is entitled to the floor.

Mr. POOLE. Will not the gentleman yield a moment for the presentation of a conference report?

Mr. STRODE of Nebraska. If it is a matter which will not take any time I shall be glad to yield.

Mr. POOLE. I think it will take but a few moments.

The SPEAKER pro tempore. Does the gentleman from Nebraska yield?

Mr. STRODE of Nebraska. I think I can not. I am afraid we may get engaged in something which will involve another call of the yeas and nays.

Mr. POOLE. This matter will probably not take five minutes.

ELECTION CONTEST—MARTIN VS. LOCKHART.

Mr. STRODE of Nebraska. I now ask the previous question on the pending contested-election case from the Sixth Congressional district of North Carolina.

The previous question was ordered.

The SPEAKER pro tempore. The first question is on the adoption of the substitute submitted by the gentleman from Texas [Mr. BAILEY].

Mr. BAILEY. Mr. Speaker, I believe that under the rules a motion to recommit would not be order in this case until after the substitute has been disposed of. But for reasons which the House will perfectly well understand, I ask unanimous consent that the vote may be taken on a motion to recommit before we vote upon the substitute.

The SPEAKER pro tempore. Is there objection?

Mr. KEM. I object.

The SPEAKER pro tempore. The gentleman from Nebraska objects. The question is on agreeing to the substitute.

The question being taken, there were on a division (called for by Mr. BAILEY)—ayes 49, noes 115.

Mr. BAILEY. No quorum, Mr. Speaker.

The SPEAKER pro tempore. The Chair overrules the point, as there was a quorum on the vote last taken.

Mr. BAILEY. I call for the yeas and nays.

The yeas and nays were ordered, 48 members voting in favor thereof.

The SPEAKER pro tempore. The Clerk will call the roll.

Mr. ATWOOD. Mr. Speaker, I ask unanimous consent that the resolution upon which we are about to vote be read. Sitting over in this corner, I can not hear much that is going on. I should like to have the resolution of the gentleman from Texas read.

The SPEAKER pro tempore. Without objection, the substitute offered by the gentleman from Texas will be reported.

Mr. KEM. I object.

The SPEAKER pro tempore. Objection is made by the gentleman from Nebraska [Mr. KEM].

Mr. LACEY. I make the point of order that we have the right to have a resolution read a second time when during the first reading there has been such confusion that it could not be heard.

The SPEAKER pro tempore. The Chair overrules the point of order. It is not in order to ask for the reading of the resolution after the roll call has been ordered.

The Clerk proceeded to call the roll.

Mr. ABBOTT (when his name was called). Mr. Speaker, I do not know what this resolution is. I ask that it be read.

The SPEAKER pro tempore. The roll call can not be interrupted. The gentleman is out of order.

The question was taken; and there were—yeas 57, nays 156, not voting 141; as follows:

YEAS—57.

Livingston,	Moses,	Spencer,	

So the substitute was rejected.

Mr. QUIGG. Mr. Speaker, on this question I am paired with the gentleman from Massachusetts [Mr. MOODY]. If he were present, he would vote in the negative; I should vote "aye."

Mr. HURLEY. On this question I am paired with the gentleman from Texas [Mr. COOPER]. If he were present, he would vote "aye," and I should vote "no."

Mr. RICHARDSON. I am paired with the gentleman from Iowa [Mr. CURTIS], and withdraw my vote.

The following additional pairs were announced until further notice:

Mr. TOWNE with Mr. WILSON of South Carolina.

Mr. BINGHAM with Mr. DOCKERY.

The following were announced for this vote:

Mr. HURLEY with Mr. COOPER of Texas.

Mr. VAN VOORHIS with Mr. WHEELER.

Mr. ARNOLD of Rhode Island with Mr. MCRAE.

Mr. SOUTHARD with Mr. MONEY.

Mr. HOOKER with Mr. SPENCER.

Mr. HILBORN with Mr. STRAIT.

Mr. HULICK with Mr. TYLER.

Mr. FOWLER with Mr. BARTLETT of Georgia.

Mr. MOODY with Mr. QUIGG.

Mr. LOUDENSLAGER with Mr. SETTLE.

The result of the vote was then announced as above recorded.

Mr. BAILEY. Mr. Speaker, I move to recommit the pending resolution to the Committee on Elections No. 2.

The question was taken; and on a division (demanded by Mr. BAILEY) there were—ayes 39, noes 70.

Mr. BAILEY. No quorum.

The SPEAKER pro tempore (Mr. PAYNE). The point of order is overruled.

Mr. BAILEY. From that decision I appeal.

The SPEAKER pro tempore. The Chair declines to entertain the appeal. [Applause on the Republican side.]

Mr. BAILEY. Yeas and nays——

The SPEAKER pro tempore (continuing). The question is on the adoption of the resolution. [Applause on the Republican side.]

Mr. BAILEY. I demand the yeas and nays on the motion to recommit. I was endeavoring to do so when interrupted by Republicans applauding the Speaker for denying the constitutional right of a member.

The yeas and nays were ordered.

The question was taken; and there were—yeas 51, nays 149, marked present 1, not voting 153; as follows:

YEAS—51.

Allen, Miss.	Culberson,	McCreary, Ky.	Shaw,

Danford,	Lawson,	Quigg,	
De Armond,	Layton,	Ray,	
Denny	Leisenring,	Richardson,	

So the motion to recommit was rejected.

The following additional pairs were announced:

Mr. PITNEY with Mr. MAGUIRE.

Mr. GROUT with Mr. DOWNING.

The result of the vote was then announced as above recorded.

The SPEAKER pro tempore. The question recurs on the adoption of the resolutions submitted by the Committee on Elections.

The question was taken; and the Speaker pro tempore announced that the ayes seemed to have it.

Mr. BAILEY. I demand a division.

The question was taken; and on a division there were—ayes 113, noes 5.

Mr. BAILEY. No quorum.

The SPEAKER pro tempore. The Chair overrules the point of order, a quorum having been disclosed on the vote just taken.

Mr. BAILEY. I appeal from the ruling of the Chair. The empty seats about me testify to the fact that there is no quorum present.

The SPEAKER pro tempore. The gentleman will be in order. The Chair declines to entertain the appeal. [Applause on the Republican side.]

So the resolutions were adopted.

Mr. STRODE of Nebraska. I move to reconsider the vote by which the resolutions were adopted, and also move to lay that motion on the table.

The SPEAKER pro tempore. In the absence of objection, the latter motion will be agreed to.

Mr. BAILEY. I object.

Mr. STRODE of Nebraska. I withdraw the motion.

Mr. BAILEY. I renew it.

The question was taken on the motion to lay on the table; and the Speaker pro tempore announced that the ayes had it.

Mr. BAILEY. Division.

Mr. GROW. I demand the yeas and nays.

Many MEMBERS. Oh, no.
Mr. GROSVENOR. Mr. Speaker——
Mr. GROW. I withdraw the demand for the yeas and nays.
Mr. BAILEY. I renew the demand.
The yeas and nays were refused, 4 members only rising in support of the demand, and 75 in opposition.
So the motion to lay on the table the motion to reconsider was agreed to.
Mr. BAILEY. I move that the House do now adjourn.
The SPEAKER pro tempore. The Chair declines to entertain the motion.
Mr. BAILEY. I appeal from the decision of the Chair.
The SPEAKER pro tempore. The Chair declines to entertain the appeal. [Applause on the Republican side.]
Mr. STRODE of Nebraska. Mr. Speaker, the contestant is ready to take the oath of office, and I ask that he be now sworn in.
Mr. Martin, having appeared at the bar of the House, was duly qualified, taking the oath of office required by law.
Mr. BAILEY. Call the next case on the docket. [Laughter.]

INTERNATIONAL EXPOSITION AT OMAHA.

Mr. MERCER. Mr. Speaker, I ask consent for the consideration of Senate bill No. 1506, to authorize and encourage the holding of a transmississippi and international exposition at the city of Omaha, in the State of Nebraska, in the year 1898; and I ask that the bill be read before objection is called for, as I desire the House to understand exactly what this matter is.
The bill was read at length.
Mr. MERCER. Mr. Speaker, I also desire to have read, as a part of my remarks, the report of the Committee on Ways and Means.
Mr. DINGLEY. Mr. Speaker, has consent been given for the consideration of the bill?
The SPEAKER pro tempore. It has not. Is there objection to the present consideration of the bill?
Mr. KEM. Mr. Speaker, "the gentleman from Nebraska, Mr. KEM," objects. [Laughter.]
The SPEAKER pro tempore. Objection is made by the gentleman from Nebraska [Mr. KEM].
Mr. MERCER. Mr. Speaker, if it is in order, I move that the House resolve itself into the Committee of the Whole for the consideration of this bill.
The SPEAKER pro tempore. That would not be in order.

CONTESTED-ELECTION CASE—RINAKER VS. DOWNING, SIXTEENTH DISTRICT OF ILLINOIS.

Mr. MOODY. Mr. Speaker, I desire to call up the contested-election case of Rinaker *vs.* Downing, and to present a report of Committee on Elections No. 1 thereon, which report has been prepared in accordance with the order of the House heretofore made. It is very brief, and I ask that it be read in my time, for the information of the House.
Mr. McMILLIN. I would ask the gentleman whether he proposes to proceed to the disposition of the case at this time?
Mr. MOODY. Mr. Speaker, I am directed by the committee to ask for a disposition of the case at the present time.
Mr. McMILLIN. I wish to state that one of the gentlemen who represents the minority on that Committee on Elections has been called home. Another [Mr. DINSMORE] is, as is well known, temporarily crippled and on crutches, and is absent from the Hall at this time. The only other is sick. I understand that the conclusion of the majority has only been reached within the last few minutes, or at least within half an hour, and that no opportunity has been given for the presentation of the views of the minority. I ask on behalf of the contestee, Mr. Downing, that a short time, a reasonable time only, be given for the presentation of the views of the minority. It is unheard-of to call a case up and dispose of it the hour the committee reports it, over the protest of the member, and when he asks only time to prepare the minority report.
Mr. MOODY. Mr. Speaker, I should like to ask the gentleman from Tennessee——
Mr. McMILLIN. I do this as preliminary to the presentation of the report.
Mr. MOODY. I did not catch the meaning of the gentleman. Does he ask time for the presentation of the report or time for some debate?
Mr. McMILLIN. For the presentation of the report. I think it is but reasonable, and I do all of this pending the presentation of the report of the committee, and before it is read, in order that we may have an understanding concerning it.
Mr. MOODY. Mr. Speaker, if the request of the gentleman from Tennessee [Mr. MCMILLIN] may remain pending, I think if the House will hear the report read they will be in a condition to act more intelligently upon that subject.
Mr. McMILLIN. But I want to state that if that very reasonable request is not granted I shall feel that it is our duty to raise the question of consideration on the case to get a little time to prepare the report. If an amicable arrangement, however, can be made as to the presentation of the views of the minority, why I have no desire to make that point.
Mr. MOODY. Let the report be read in my time.
Mr. McMILLIN. Pending the right to raise the question of consideration.
The SPEAKER pro tempore. Without objection, the report will be read.
Mr. KEM. I object.
The SPEAKER pro tempore. Does the gentleman from Massachusetts offer any resolution?
Mr. MOODY. The resolution is contained in the report.
The SPEAKER pro tempore. The Clerk will report the resolution.
Mr. McMILLIN. Then I raise the question of consideration.
The SPEAKER pro tempore. That will be in order when the resolution is read. The Clerk will read the resolution.
The Clerk read as follows:

Resolved, That Finis E. Downing was not elected a member of the House of Representatives of the Fifty-fourth Congress from the Sixteenth Congressional district of Illinois and is not entitled to the seat.
Resolved, That John I. Rinaker was elected a Representative to the Fifty-fourth Congress from the Sixteenth Congressional district of Illinois, and that he is entitled to the seat.

Mr. MOODY. Mr. Speaker, my purpose—I do not know but it may be modified by some objection—was to ask for the reading of the report in my time.
The SPEAKER pro tempore. That would be in the nature of debate.
Mr. McMILLIN. The question of consideration would have to be raised at this time?
The SPEAKER pro tempore. Yes, it would.
Mr. McMILLIN. Then I raise the question of consideration, if the gentleman insists. I want to state, to be entirely candid with the House, that it is insisted by the contestee that in order to reach this conclusion they had to count the 39 "assisted votes," which he claims were not legal votes, and that the gentleman himself now making the report agreed should not be counted before. To count these votes is in direct violation of the election law of Illinois.
The SPEAKER pro tempore. Debate is not in order except by unanimous consent.
Mr. McMILLIN. Then some votes that are not legal votes, and that look very much like doctored votes, have to be counted, and then only 5 majority is obtained. I think we ought to have the right to present these views. These numbered 26. After 158 of the 160 polling precincts had been examined and no material change, these were found and counted, though not folded as required by law.
Mr. MOODY. If the gentleman will pardon me, the statement that I make will appear fully in the report. The gentleman who presents his report has not changed his individual views in respect to the question of "assisted voters," but, as appears in the report——
Mr. McMILLIN. Will my friend permit me to ask him a question in that connection?
Mr. MOODY. Certainly.
Mr. McMILLIN. If the gentleman's contention the other day was correct, would not this contestee still be entitled to his seat? Do you not have to count these "assisted" votes in order to reach this result?
Mr. MOODY. If the contention which I made the other day, and which I still adhere to personally, is correct, the sitting member is entitled to retain his seat by a plurality of 27 votes.
Mr. McMILLIN. That is what I thought, and I wanted an opportunity to enter a protest by way of a minority report. Even after all of these are counted they are only able to oust Downing by 5 majority in a total vote of nearly 39,000.
Mr. MOODY. I will simply say what is indicated in the report, that I do not think that that is a practicable matter of discussion in the House. Whatever my personal views may be on the subject, I do not believe that on that branch they will be adopted by the House, as they were on the other branch when this case was here for consideration before; and I do not desire at this time of the session to take the time of the House in debating a subject which I believe is finally decided in the minds of the majority.
Mr. McMILLIN. But, Mr. Speaker——
The SPEAKER pro tempore. This debate is out of order.
Mr. KEM. Regular order, Mr. Speaker.
Mr. McMILLIN. I raise the question of consideration, but am willing to have the report read.
The SPEAKER pro tempore. The question is, Will the House now proceed to consider the resolutions offered by the gentleman from Massachusetts.
Mr. MOODY. Have I not the right to have the report read, Mr. Speaker?
The SPEAKER pro tempore. The Chair thinks not, except when the matter is under discussion.
Mr. CANNON. Well, I suppose we can determine to consider

the question, and then we can discuss it. We can hear the report read and be prepared to act intelligently on it.

Mr. HENDERSON. Undoubtedly.

Mr. McMILLIN. I insist that there should not be consideration without an opportunity to give this contestee a chance to present his side of the cause.

Mr. KEM. Regular order, Mr. Speaker.

The question was taken on the question of consideration; and the Speaker pro tempore announced that the ayes seemed to have it.

Mr. McMILLIN. Division, Mr. Speaker.

The House divided; and there were—ayes 126, noes 25.

Mr. McMILLIN. No quorum, Mr. Speaker.

The SPEAKER pro tempore (after counting). One hundred and eighty-one present—a quorum; the ayes have it.

Mr. McMILLIN. Tellers.

The question was taken on ordering tellers.

The SPEAKER pro tempore. Twenty-seven gentlemen have risen—not a sufficient number—and tellers are refused. The ayes have it, and the motion is agreed to, and the House determines to consider the resolution.

Mr. MOODY. Mr. Speaker, I ask for the reading of the report in my time.

The Clerk read as follows:

In obedience to the resolution of the House adopted May 13, 1896, Committee on Elections No. 1 has caused the ballots cast in the disputed election to be recounted, under its direction and supervision.

The returns as originally canvassed were as follows:

Counties.	John I. Rinaker.	Finis E. Downing.	M. M. Cooper.	Peter D. Stout.
Cass	1,892	1,932	58	95
Morgan	3,838	3,478	168	218
Scott	1,113	1,209	20	144
Pike	2,631	2,911	164	921
Greene	1,736	2,104	95	153
Macoupin	4,486	3,749	214	311
Calhoun	667	752	13	58
Jersey	1,413	1,681	70	29
Total	17,776	17,816	802	1,929

Total vote for Congressman, 38,323.

The plurality for Mr. Downing upon the returns was 40.

The ballots in all the counties except Morgan County have been carefully preserved. In that county, although the custody of the ballots has been such as to prevent any unauthorized handling, they were returned and kept in so slovenly a manner that the committee deemed it wise in that county to accept the official returns instead of the recount, although the latter differed only slightly from the returns, and not enough to affect the result.

The following table shows the result of the recount by counties, so far as the contending parties are concerned:

Recount.

Counties.	Rinaker.	Downing.	Rinaker's gain.	Downing's gain.
Cass	1,900	1,930	10	
Morgan	3,838	3,478		
Scott	1,140	1,219	17	
Pike	2,643	2,915	8	
Greene	1,751	2,117	2	
Macoupin	4,485	3,737	11	
Calhoun	671	755	1	
Jersey	1,412	1,687		7
Total	17,840	17,838	49	7

Thus it appears that by the recount of the committee Mr. Rinaker made a net gain of 42 votes, and of the ballots cast had a plurality of 2 votes.

The committee heretofore has determined that 1 illegally rejected vote should be given to Mr. Rinaker, and 6 illegally cast votes should be taken from Mr. Downing and 4 illegally cast votes should be taken from Mr. Rinaker.

With these corrections the plurality for Mr. Rinaker is 5.

In this computation are included the ballots of illiterate voters who were assisted in marking their ballots without first taking the oath prescribed by the law of Illinois. If these ballots are rejected Mr. Downing's plurality would be 27. The majority of the committee, however, are of the opinion that these ballots ought to be counted. The minority of the committee, while still adhering to the opinion that the law requires the rejection of these ballots, which was fully expressed in a former report to the House, yet believe that the House would not adopt their opinion in that respect in the absence of a controlling decision by the court of final resort in the State of Illinois.

We therefore submit the following resolutions:

Resolved, That Finis E. Downing was not elected a member of the House of Representatives of the Fifty-fourth Congress from the Sixteenth Congressional district of Illinois and is not entitled to the seat.

Resolved, That John I. Rinaker was elected a Representative to the Fifty-fourth Congress from the Sixteenth Congressional district of Illinois, and that he is entitled to the seat.

Mr. MOODY. Mr. Speaker——

Mr. McMILLIN. Now, if the gentleman will permit me, I will make a request——

Mr. MOODY. Certainly.

Mr. McMILLIN (continuing). In the interest of what will at least be fair——

Mr. MOODY. The understanding is that the gentleman is speaking in my time, and that I do not yield the floor.

Mr. McMILLIN. Entirely so. This report, Mr. Speaker, shows that after even counting 39 "assisted" votes that the gentleman making the report thinks should not be counted, there is only 5 majority, by the greatest figuring that can be done, in favor of the contestant. This result was reached since this House assembled to-day, when we were in the midst of yea-and-nay roll calls, when it was impossible for members to attend committee meetings, and no opportunity has been given to the contestee to present his side of the cause. His attorney and he were prepared to do so, one gentleman, who is crippled and on crutches and away from here, was not able to be present, another sick, and a third out of the city, and I think it is but decent and fair that a reasonable time should be given; and I ask that it be given to file the minority report and allow this case to be decided on its merits.

Mr. MOODY. Mr. Speaker, I have no discretion in reference to this matter. The committee have directed me to prepare this report, to present it to the House, and to ask present action on it.

Mr. McMILLIN. The gentleman having the matter in charge has discharged his duty in that respect, and I can see how the demand of the committee would carry him thus far; but I think that, knowing his fairness as I do, he will agree with me that this is not an unreasonable request. The result is certainly a surprise to the contestee.

Mr. HOPKINS. I will ask the gentleman one question. If Mr. Downing had not secured an injunction, would not these ballots have been counted a year and a half ago?

Mr. McMILLIN. I am not informed as to that; but if that be true, a few hours' time will not hurt the presentation of it. When this case was up before it was of so questionable a character that the party in power in this House, with two-thirds majority, thought it ought to go back to the committee. The committee have reported the case, and the minority were trying to present their views, and here we have the committee asking, in hot haste, to take the matter up now and dispose of it without giving the sitting member a chance. I know it is entirely within your power to do so, but I do insist, as a member of the House, that I am making no unreasonable request when I ask that the case be postponed.

Mr. HULICK. I would like to ask the gentleman a question.

The SPEAKER pro tempore. The gentleman from Massachusetts has the floor. Does the gentleman yield to the gentleman from Ohio?

Mr. MOODY. I yield to the gentleman.

Mr. HULICK. Does the gentleman want to discuss the original question and all the facts in connection with the case, or does he wish to have presented to the House an exception to the recount as it was ordered by the House? Is it a new case that you wish to raise in regard to the count of these ballots and the conduct of the committee in reporting the case, or do you wish to go back and discuss all the original questions we have already discussed?

Mr. McMILLIN. We want to show, and I believe we could show to a fair-minded tribunal, as I trust this would be on presentation of the facts, that the conclusion reached in this report is not the result of such a legal count as ought to have been made. We desire to show, first, that 39 assisted votes were counted here in direct violation of the statute of Illinois, and secondly, that 24 votes were counted that have every appearance of having been doctored for a purpose since the election was held last November. We ask for justice, not merely delay.

Mr. MOODY yielded to Mr. CANNON, but subsequently said: If the gentleman from Illinois will first permit me to make a brief statement of the position of this case, I will then yield to him. The House will recall that when the case was last here for consideration the majority of the committee believed from the record that Mr. Rinaker was entitled to the seat by a plurality of 30 votes, and they based that belief largely upon the testimony of a person who had made an unofficial count of certain portions of the vote. The minority of the committee believed that it was safer to recommit the whole case to the committee and order a recount of the ballots, and the view of the minority was adopted by the House. Accordingly, the committee, with the purpose of finishing the controversy at the earliest possible moment, with all due diligence procured the ballots to be brought from the State of Illinois to this building, and proceeded to have them counted under their direction and supervision. There can be no possible doubt about the fairness and the diligence with which every member of the committee devoted himself to that recount.

There were 160 precincts in the district. As the recount proceeded 157 of those precincts were counted and the sitting member was still left in his seat by a considerable plurality. The one hundred and fifty-eighth precinct then came up for a recount. That was a precinct over which no doubt had been cast by the record. The contestant had not hoped to gain any votes in that precinct. The sitting member had not feared that he would lose any votes in that precinct. But when the recount was made it was found that there was a net gain of 26 votes made in that precinct for Mr. Rinaker. At once it was seen that the whole resu[lt]

of the recount depended upon that precinct, which never had been referred to before in the controversy. Naturally enough at that point in the count the attention of the committee was challenged by the extraordinary gain made there for the contestant, and the sitting member, who had felt that he was to be safe in his seat, expressed the greatest doubt of the accuracy and honesty of the ballots in that precinct. The extraordinary character of the result there challenged the attention of the committee and they had the ballots counted again twice over, the last time in the presence of the parties to the contest and of their attorneys.

They then, in accordance, I believe, with my own suggestion, caused the ballots to be counted with respect to every other candidate upon the ticket, and with respect to the vote upon two constitutional amendments which at that election were submitted to the people of Illinois.

In the first place, it appeared that there was nothing whatever suspicious about the ballots themselves. There was nothing upon the face of the ballots to indicate any wrongdoing on the part of anybody. That was conceded by the counsel for the sitting member.

In the second place the great weight of evidence was that when the inclosure containing those ballots was opened it was found sealed under the seal of the election officers of the precinct, which seals were not broken until the ballots were brought here. There was some evidence tending to show the contrary, but in my opinion, and in the opinion, I think, of every member of the committee who heard and read it, the great weight of the testimony was the other way, and we were satisfied that the ballots which showed this gain for the contestant were taken from a package which had been honestly and carefully secured from the day of the election until it was opened in this building.

In the third place, the precinct was one which was in Democratic control. There are six election officers in Illinois under the law. There are three judges of election, and at this precinct two of the judges were Democrats and one Republican. There are also three clerks, of whom two were Democrats and one Republican; making four Democrats and two Republicans election officers in that precinct. All of them are conceded to be honest, upright men. When these ballots left the hands of the precinct officers they passed into the hands of a Democratic clerk of the court. He was succeeded in a short time by another Democratic clerk of the court, and the ballots out of which these gains arise have been, from the time they left the hands of the voter until they were brought and opened here in the presence of our committee, in Democratic custody. It is not strange, Mr. Speaker, that the sitting member, under the conditions I have stated, when he found that the views which had been adopted by the majority of the committee heretofore had been entirely overthrown by the recount—it is not strange, I say, that he should feel solicitude when he thought he saw his seat taken from him by a loss in an entirely unexpected quarter. As I have said, the gain for Mr. Rinaker in this precinct challenged the attention of the committee, but I believe, and I think every other member of the committee believes, that that gain came from an honest ballot box, and that the reason it did not appear in the return was simply because the election officers had made a mistake.

Mr. ALLEN of Utah. Will the gentleman yield for a question?

Mr. MOODY. In a minute.

I will say in addition that according to the law of Illinois there must be a record kept of the voters by name who vote at any election—a poll list, as it is called. The poll list showed that 433 persons voted at that precinct; the ballot box showed 433 ballots cast at that precinct; and it was conceded by the counsel for the sitting member that those ballots bore no marks of suspicion; nay, he went further, and conceded that they were the very ballots themselves which were cast at that election.

Mr. ALLEN of Utah. The gentleman said that among the ballots counted were some for candidates for other offices. How did the count of those ballots compare with the count with regard to the candidate for Congress?

Mr. MOODY. Mr. Speaker, in reply to that question I will say that very many of the candidates upon the Republican ticket made precisely the same gain that General Rinaker did; some others made a less gain. I attached no very great significance one way or the other to that recount. I hoped I might be able to do so.

Mr. Speaker, I have gone thus far for the purpose of showing to the House that the only question rising on the recount arises out of that one ballot box alone. I have stated my views about it. If there is any way, without prolonging the debate here—and I shall have to be informed by others more skillful than I am in parliamentary proceedings—if there is any way in which an outline of the views of the other side can be presented to this House without any great delay, I shall be glad to have it done. But I do not want to precipitate a general debate and take up much time on that simple question.

Mr. HOPKINS. One question right there. Is it not a fact that when the committee met this morning to formulate the report that has just been read the Democratic members of the committee absented themselves from the meeting?

Mr. MOODY. Well, I should not say "absented themselves"; they were not present. [Laughter.]

Mr. MCMILLIN. The gentleman from Illinois [Mr. HOPKINS] has made an insinuation which he ought not to make. In order to meet that insinuation——

Mr. HOPKINS. There was no insinuation at all.

Mr. MCMILLIN. Mr. Speaker——

The SPEAKER pro tempore. The gentleman from Massachusetts [Mr. MOODY] is entitled to the floor.

Mr. MCMILLIN. Will the gentleman yield to me a moment?

Mr. MOODY. If I do not cover the matter in a moment in what I am about to say, I will yield to the gentleman. I beg pardon of the House for not saying it before. There are three Democratic members of that committee. One of those is at his home in Georgia; another, the gentleman from Arkansas [Mr. DINSMORE], has been injured by an accident, as many know; the other, the gentleman from Virginia [Mr. TURNER], is ill at his home. That accounts for the absence of those three gentlemen. I had no purpose of insinuating that they had purposely remained away; and that is the reason I did not accept the expression of my friend from Illinois [Mr. HOPKINS], who used the words "absented themselves." I simply said they were not present. I did not mean to insinuate that there was any purpose in their absence. On the contrary, I do not think there was any such purpose on the part of any member.

Mr. GROSVENOR. Then there is nobody here to make a minority report.

Mr. MOODY. One other remark, and I am done. It has been suggested by the gentleman from Tennessee that if the assisted voters be rejected in the count the sitting member is entitled to retain his seat. That is true. In that case, as appears by the report, he is entitled to hold the seat by a plurality of 27. It is also true, in my opinion, that the law requires the rejection of those votes. But, Mr. Speaker, the facts showed that those men voted in good faith; they were legal voters, and they supposed they were complying with the law. They had the right to vote, and while I personally believe that those votes ought to be rejected, I am not fool enough to believe that I can get a majority of this House to agree with me, whether I am right or wrong.

Mr. MCMILLIN. Permit me right there. The gentleman admits that he believes those votes were not legally cast.

Mr. MOODY. Not legally counted.

Mr. MCMILLIN. Not legally counted. In the next place, he admits that if those votes were not counted, the contestee would retain his seat.

Mr. MOODY. Yes, sir.

Mr. MCMILLIN. Therefore the gentleman who brings in this report believes that the contestee is entitled to this seat?

Mr. MOODY. Yes; and I intend so to vote. I am doing my duty by the committee and by the House. But my single point is that I do not care to bring up for discussion my private views on that question when I am satisfied that they will not be adopted by the House.

Mr. POWERS. Will the gentleman be kind enough to state the question which arises in regard to the assisted voters?

Mr. MOODY. Possibly the gentleman from Vermont [Mr. POWERS] was not present when that question was under discussion. I will therefore briefly state that the statute of Illinois contains a provision which in substance permits illiterate persons to have their votes marked for them whenever they shall take an oath that they are illiterate.

The statute contains no provision that if they did not take the oath the vote should not be counted. But in my own opinion, following the controlling authorities, in the first place in the State of Minnesota, in the second place in the State of Michigan, and in the third place in the State of Kentucky, legally the votes ought not to be counted even though cast in good faith; for a decision the other way would open the door wide to fraud; and also, Mr. Speaker, because the House, or rather the committee of the House, unanimously reported upon the same statutes of Illinois in the last Congress that the votes under such circumstances could not be counted.

Mr. POWERS. Did the evidence show that the voter was not sworn?

Mr. MOODY. There is no doubt whatever of the facts. The evidence is clear on that point. But I have already stated my conclusion in the matter, and, knowing that the House will not adopt that conclusion, I do not see the necessity for arguing the point. It has been once debated, and very fully debated in the House, and I do not desire to go into it again.

Mr. CANNON. Will the gentleman yield to me for a question?

Mr. MOODY. Certainly.

Mr. CANNON. I want to ask the gentleman if the evidence

showed that these assisted voters were, in fact, entitled to the assistance?

Mr. MOODY. The evidence in some cases did show it, but not in all of them.

Mr. CANNON. If entitled to assistance, by whom would they be assisted?

Mr. MOODY. By the election officers.

Mr. CANNON. Well, the gentleman has cited the Minnesota and Michigan cases. Let me ask if it is not true that the line of decisions in Illinois, with reference to the election law, do not tend to the conclusion, so far as that State is concerned, that this provision is directory only?

Mr. MOODY. That is the contention of our friends on the committee who do not agree with me. I think the contention is the other way since the adoption of the Australian ballot system. But the majority of the committee do not agree with my view on that point.

The thing in my mind, when the case was before the House on the report of the committee a few weeks ago, was what I conceived to be the iniquity of seating the contestant on the record as then made up. And I may be permitted to say, Mr. Chairman, that even in the eyes of my colleagues of the committee I was justified in that view, and the action of the House has testified, I think, that I was justified in the position I took before it. But I had no such feeling about the other questions. I had expressed my views fully with regard to the rights of the contestant and the contestee in this respect, and I desire to adhere to them.

Mr. RICHARDSON. Will the gentleman allow me to ask him a question?

Mr. MOODY. Certainly.

Mr. RICHARDSON. I understood you to say that in the recount of the 158 voting precincts the Committee on Elections unexpectedly discovered what they think is an error in one of them, which results in a loss to the sitting member of 26 votes?

Mr. MOODY. Yes, sir.

Mr. RICHARDSON. Will the gentleman please describe how this fact was developed, and in what the error consisted?

Mr. MOODY. Has the gentleman been here since the discussion of this case commenced?

Mr. RICHARDSON. I have been; and think I heard all the gentleman said on the question.

Mr. MOODY. I do not know, then, that I can explain any more clearly than I have already done the source of this error and its discovery. I will say to the gentleman, however, that these ballots were cast in a Democratic precinct, where Democratic officers were in control, where all of the Democratic and Republican officers are conceded to be honest men. They were counted in a way to give Mr. Downing a plurality of some 20 or 30 votes—the exact number does not matter—and nobody deemed at the time but that it was a correct count; no evidence was placed in the record with regard to the precinct. After the election the ballots were taken from the election officer, handed to a Democratic clerk according to the law, a man who is conceded to be an honest man, by him turned over to a Democratic successor, an honest man, and by him brought here under the subpœna of the Committee on Elections to be counted. According to the weight of evidence the package in which the ballots were contained was sealed up when opened here, and was in substantially the same condition that it was in when it left the election precinct on the night after the election.

The gain was in this way: Mr. Rinaker gained 24 votes, which seem not to have been counted for him, and Mr. Downing loses 2, the net gain for the contestant in the precinct being 26 votes. Without that gain of 26 votes, Mr. Downing, unquestionably, would be entitled to retain his seat by a considerable plurality. In my judgment and in the judgment of every member of the committee there was no fraud in this precinct, but simply an error in making up the count after the election. This error we correct; for the theory of a recount is that we may discover errors and correct them. No other errors were discovered in the precinct, and no one would question that this was merely an error, except that it was so great, so unexpected, and so disastrous in its consequences.

Mr. RICHARDSON. I want to ask the gentleman if he thinks that the same error which was detected in the count for Congressman obtained in the count for the other officers voted for in these ballots?

Mr. MOODY. It does in a great many, but not in all cases. There is a gain for the Republican ticket. Four or five of the officers upon the Republican ticket gained just 24 votes, as General Rinaker did. Some of them gained a less number. One man gained 25.

Mr. RICHARDSON. But as to the county officers, there is a gain.

Mr. MOODY. Yes.

Mr. RICHARDSON. Did it change the result in any of those cases?

Mr. MOODY. No; it was too late to change any result. Everybody accepted the result as final.

Mr. McMILLIN. It seems not too late to change this one.

Mr. REEVES. Will the gentleman now yield to me for a question?

Mr. MOODY. Yes.

Mr. REEVES. I want to ask if it is not true that in another precinct in some one of these counties a gain for Mr. Downing of 12 votes was discovered in substantially the same manner that the gain of 24 appears here for the other man?

Mr. MOODY. Mr. Speaker, that is true; but it deserves this qualification, that when the record was made up the sitting member put in evidence which satisfied me that the officers made a clerical mistake on the night of election and then and there corrected it, and so the cases are not quite on all fours. Now, Mr. Speaker——

Mr. McMILLIN. Will the gentleman permit me to ask another question?

Mr. MOODY. Yes.

Mr. McMILLIN. Touching those ballots, I hold in my hand one of the Illinois ballots, and I will get the gentleman to state whether the law does not require that the ballot shall be folded more than once; that it shall be folded in this way [illustrating], so as to make more than two folds?

Mr. MOODY. Yes.

Mr. McMILLIN. Now, I will get you to state whether or not those ballots that were found marked and not counted were not simply folded one time and strung on the wire.

Mr. MOODY. That is true, Mr. Speaker.

Mr. McMILLIN. Then they were not——

Mr. MOODY. Let me finish my answer. And it is also true of a great many other precincts throughout the district.

Mr. McMILLIN. And would it not be possible, with those ballots thus folded, to have simply turned them over and marked them for either ticket?

Mr. MOODY. Yes; possible, but not easy.

Mr. McMILLIN. Then it could be done. I think the gentleman is in error in supposing it could not be easily done. If he will take this one and fold it up in that way, he will see he is mistaken about that.

Mr. MOODY. It is hardly profitable to discuss one part of the evidence; but I will say, in reply to the gentleman from Tennessee, that those ballots were strung upon a wire so that they were held closely together. While it would be possible, if a person were so disposed, to get at parts of the ballot and mark, say, the Republican circle, in my opinion it could not be done without showing some result, and I will state to the House that there was no loss on the Democratic ticket. If these ballots had been marked by some fraudulent person there would probably have been not only a gain for the contestant, but there would have been shown, as the effect of the markings, a loss for the Democratic ticket, which did not appear. My opinion, therefore, is that by some of the accidents that may happen the ballots were overlooked in the count, honestly overlooked; and I say again that the evidence shows conclusively that nobody could have had any chance to get at these ballots in the manner in which it is suggested. Now, Mr. Speaker, if the gentleman on the other side will make some agreement as to some short time in which he desires to present his views to the House, I shall be glad to do that. Otherwise, I ought, I think, in obedience to the instructions of my committee, to ask the previous question.

Mr. McMILLIN. On behalf of the contestee, against whom this proceeding was not perfected in the Elections Committee until within the last hour, I have asked that the case be postponed a reasonable time, say until to-morrow, or whatever time is reasonable, in order that the views of the minority may be presented, and that Mr. Downing, contestee, may have that hearing to which he is entitled. The fact already appears that one member of this minority is sick, another away from the city, and the only remaining one crippled and on crutches. This is not unreasonable. It is extraordinary not to grant it. I have never in many years' service known this right denied. You claim only 5 majority in a poll of over 38,000. We can show that this claim is not true and Downing is entitled to the seat.

Mr. MOODY. Mr. Speaker, I move the previous question.

Mr. TERRY. I would like to ask the gentleman from Massachusetts a question.

The SPEAKER pro tempore. The gentleman from Massachusetts demands the previous question.

Mr. TERRY. I would like to ask the gentleman——

Mr. MOODY. If it is really a question I will yield.

Mr. TERRY. That is what it is, sir.

Mr. MOODY. I ask the gentleman if he wants to ask me a question?

Mr. TERRY. I want to ask you a question in order that the House may understand exactly from your answer and from the record what we are asked to do in this case. [Cries of "Regular order!"]

The SPEAKER pro tempore. Does the gentleman from Massachusetts yield?

Mr. MOODY. I do not know how I can make any further answer.

The SPEAKER pro tempore. The question is on the previous question.

Mr. TERRY. Will the gentleman permit me to ask him a question?

The SPEAKER pro tempore. The gentleman from Arkansas will be in order.

Mr. TERRY. I am endeavoring to be in order.

The SPEAKER pro tempore. The gentleman from Massachusetts declines to yield.

Mr. TERRY. I did not know that he had declined.

The SPEAKER pro tempore. The Chair informed the gentleman that he declined to yield.

Mr. TERRY. I preferred to hear that declaration from his lips.

The SPEAKER pro tempore. The gentleman from Massachusetts declined to yield. The question is on ordering the previous question, and no debate is in order.

Mr. FITZGERALD. I would like to ask the gentleman a question.

The SPEAKER pro tempore. Debate is not in order.

Mr. FITZGERALD. Have I not the right to ask the gentleman a question if he wishes to answer it?

The question was taken on ordering the previous question; and the Speaker pro tempore announced that the ayes seemed to have it.

Mr. MCMILLIN. Division.

The House divided; and there were—ayes 146, noes 8.

Mr. MCMILLIN. The yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 165, nays 56, not voting 132; as follows:

YEAS—165.

Acheson,	Dayton,	Huling,	Prince,
Adams,	Dingley,	Hunter,	Pugh,

McCormick,	Pitney,	Steele,	Woomer.

So the previous question was ordered.

Mr. TRELOAR. Mr. Speaker, I have voted "yea," but being paired with the gentleman from Florida, Mr. SPARKMAN, I withdraw my vote.

Mr. TRACEY. Mr. Speaker, I am paired with the gentleman from Arkansas, Mr. MCRAE. If he were present, I would vote "yea."

The following additional pairs were announced:

Mr. TRACEY with Mr. MCRAE, until further notice.

Mr. PITNEY with Mr. MAGUIRE, on this question.

Mr. TRELOAR with Mr. SPARKMAN, for this day.

The result of the vote was then announced as above recorded.

Mr. MCMILLIN. Mr. Speaker, I now move to recommit this report to the Committee on Elections No. 1.

The question being taken on the motion of Mr. MCMILLIN, the Speaker pro tempore announced that the noes seemed to have it.

Mr. MCMILLIN. I ask for a division.

The House divided; and there were—ayes 31, noes 130.

Mr. MCMILLIN. I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 48, nays 165, not voting 140; as follows:

YEAS—48.

Abbott,	Clarke, Ala.	Layton,	Shuford,
Allen, Miss.	Cooper, Fla.	Lester,	Stallings,
Bailey,	Cooper, Tex.	McCreary, Ky.	Sulzer,

Howard,	McLaurin,	Sauerhering,	Wilson, S. C.
Howell,	McRae,	Settle,	Woodard,
Hubbard,	Meiklejohn,	Shannon,	Woomer.

So the motion to recommit was rejected.

The following additional pairs, for this day, were announced:

Mr. COOK of Wisconsin with Mr. HALL.

Mr. HICKS with Mr. LITTLE.

Pending the announcement of the vote the Speaker pro tempore presented a report from the Committee on Enrolled Bills, as follows:

ENROLLED BILLS SIGNED.

Mr. HAGER, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles; when the Speaker signed the same:

A bill (H. R. 956) for the relief of Sophia Sparks and Julia C. Sparks, of Annapolis, Md.;

A bill (H. R. 2006) to increase the pension of Harriet C. Gregg, widow of Col. and Bvt. Maj. Gen. John Irvin Gregg, from $30 to $50 per month;

A bill (H. R. 8008) defining cheese, and also imposing a tax upon and regulating the manufacture, sale, importation, and exportation of "filled cheese"; and

A bill (H. R. 8293) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1896, and for prior years, and for other purposes.

CONTESTED-ELECTION CASE—RINAKER VS. DOWNING, SIXTEENTH DISTRICT OF ILLINOIS.

The result of the vote was then announced as above recorded.

The SPEAKER pro tempore. On this question the yeas are 48 and the nays are 164, and the motion to recommit is disagreed to.

The question being taken on the resolution reported from the Committee on Elections No. 1, the Speaker pro tempore announced that the ayes seemed to have it.

Mr. MCMILLIN. Mr. Speaker, I ask for a division.

The House divided; and there were—ayes 140, noes 31.

Mr. MCMILLIN. I ask for the yeas and nays, Mr. Speaker.

The yeas and nays were ordered.

The question was taken; and there were—yeas 167, nays 52, not voting 134; as follows:

YEAS—167.

Dinsmore,	Lorimer,	Ray,	Woomer.
Dockery,	Loud,	Richardson,	
Downing,	Low,	Robertson, La.	

The following additional pairs were announced:

Mr. SIMPKINS with Mr. STRAIT, on this question.

Mr. FOWLER with Mr. BARTLETT of Georgia, on all election cases except Underwood's.

Mr. HULICK with Mr. TYLER, contested-election cases.

Mr. SPARKMAN. Mr. Speaker, I have voted, but I am paired with the gentleman from Missouri [Mr. TRELOAR], and I withdraw my vote.

Mr. RICHARDSON. Mr. Speaker, I ask respectfully to have the vote recapitulated.

The SPEAKER pro tempore. The Chair declines to direct a recapitulation of the vote.

Mr. RICHARDSON. Does the Chair decline to comply with a reasonable request like that?

The SPEAKER pro tempore. On this question the yeas are 167, and the nays are 51. The yeas have it, and the resolutions are adopted.

Mr. WHEELER. Mr. Speaker, I move to reconsider the vote.

Mr. COOKE of Illinois. I move that the motion to reconsider be laid on the table.

The question being taken on the motion of Mr. COOKE of Illinois, there were on a division (called for by Mr. WHEELER and others)—ayes 143, noes 15.

Mr. WHEELER, Mr. MCMILLIN, and others called for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 155, nays 45, not voting 154; as follows:

YEAS—155.

Acheson,	Brewster,	Dayton,	Hadley,
Adams,	Broderick,	Dingley,	Hager,
Aldrich, Ala.	Bromwell,	Dolliver,	Hainer, Nebr.

Dockery,	Livingston,	Robertson, La	Wilson, S. C.
Downing,	Lorimer,	Robinson, Pa.	Woomer.
Faris,	Loud,	Royse,	
Fischer,	Low,	Rusk,	

So the motion to reconsider was laid on the table.

The following additional pair was announced:

Mr. PICKLER with Mr. RUSSELL of Georgia.

Mr. MAGUIRE. I am paired with the gentleman from New Jersey [Mr. PITNEY]. If he were present, I should vote "no" on this q estion.

Mr. RICHARDSON. I am paired on political questions with the gentleman from Iowa [Mr. CURTIS]. I do not know how he would vote; but if he were present, I should vote "no."

The result of the vote was announced as above stated.

Mr. COOKE of Illinois. Mr. Speaker, the gentleman who has just been declared elected is present; and I ask that the oath of office be administered to him.

Mr. John I. Rinaker, amid applause on the Republican side, came forward (accompanied by Mr. COOKE of Illinois) and was duly qualified by taking the oath of office prescribed by law. As he retired to his seat, Mr. Rinaker was again greeted with applause.

ORDER OF BUSINESS.

Mr. DINGLEY rose.

Mr. JONES. I move that the House do now adjourn.

The SPEAKER. The gentleman from Maine [Mr. DINGLEY] is recognized.

Mr. DINGLEY. Inasmuch as it is understood that a quorum will be required for the transaction of business this evening, and as no quorum can probably be obtained, I move that the House do now adjourn.

Mr. RICHARDSON. I submit that the remark just made by the gentleman from Maine is not in order, and should be excluded from the RECORD. Remarks have been excluded from the RECORD to-day on the same ground.

The SPEAKER. The Chair really thinks the gentleman from Tennessee [Mr. RICHARDSON] understands the difference between such a case as he refers to and the present——

Mr. RICHARDSON. But the gentleman from Maine stated——

The SPEAKER. And also the propriety of not interrupting the Speaker when he is addressing the House. [Laughter.]

Mr. RICHARDSON. "The gentleman from Tennessee" submits with becoming grace to the lecture from the Chair; but nevertheless the remark of the gentleman from Maine, which reflected upon this side of the House, was not in order, and the Chair knows it.

The SPEAKER. The Chair heard no remark of the gentleman from Maine which reflected on anybody.

Mr. RICHARDSON. He stated it was understood there would be no quorum here to-night.

Mr. GROSVENOR. Perhaps he meant it was understood that the Republicans would not be present. [Laughter.]

Mr. RICHARDSON. I do not think a remark like that of the gentleman from Maine ought to be made.

The SPEAKER. The Chair did not understand it to be a reflection on anybody. Perhaps if the present occupant of the chair had been here all the afternoon he might adopt a different construction. [Laughter.]

REPRINT OF A REPORT.

On motion of Mr. HURLEY, by unanimous consent, a reprint of House Report No. 795, to accompany the bill H. R. 7251, was ordered, the supply of the same having been exhausted.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted to Mr. MURRAY for ten days, on account of sickness in family.

The motion of Mr. DINGLEY was then agreed to; and accordingly at (4 o'clock and 55 minutes p. m.) the House adjourned until 11 o'clock a. m. Saturday.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, the following executive communications were taken from the Speaker's table and referred as follows:

A letter from the Secretary of the Treasury, transmitting an acknowledgment of the receipt of the House resolution of February 17, 1896, and making reply to the inquiries contained therein in regard to the amount of bonds offered and sold under the resumption act of 1875, greenbacks and Treasury notes redeemed, the surplus or deficiency of revenues, and amounts paid on account of the reduction of the public debt between July 1, 1879, and March 1, 1893, and between March 1, 1893, and January 1, 1896—to the Committee on Ways and Means, and ordered to be printed.

A letter from the Acting Secretary of the Treasury, transmitting, in compliance with the provisions of the act of January 12, 1895, a statement of the documents received and distributed by the Department from January 1, 1895, to December 31, 1895—to the Committee on Printing, and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS.

Under clause 2 of Rule XIII, bills were severally reported from committees, delivered to the Clerk, and referred to the several Calendars therein named, as follows:

Mr. MCCALL of Massachusetts, from the Committee on Elections No. 3, to which was referred the bill of the House (H. R. 1987) relating to contests of elections of members of the House of Representatives, reported the same with amendment, accompanied by a report (No. 2234); which said bill and report were referred to the House Calendar.

Mr. MCRAE, from the Committee on the Public Lands, to which was referred the bill of the Senate (S. 2923) entitled "An act for the better improvement of the Government reservation at the city of Fort Smith, in the State of Arkansas, and for other purposes," reported the same without amendment, accompanied by a report (No. 2236); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. GAMBLE, from the Committee on Indian Affairs, to which was referred the bill of the House (H. R. 9146) to provide for the revision and adjustment of the sales of the Otoe and Missouria Reservation lands, in the States of Kansas and Nebraska, and to confirm the titles under said sales, reported the same with amendment, accompanied by a report (No. 2237); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. DINGLEY, from the Committee on Ways and Means, to which was referred the bill of the Senate (S. 1341) entitled "An act to prohibit the further issuance of interest-bearing bonds without the consent of Congress," reported the same adversely, accompanied by a report (No. 2246); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

By Mr. BAKER of Kansas, from the Committee on Invalid Pensions:

The bill (H. R. 8683) granting a pension to Frederick Lierman. (Report No. 2220.)

The bill (H. R. 7551) for the relief of Oliver J. Lyon. (Report No. 2221.)

The bill (H. R. 9319) granting a pension to Malachi Salters, a sergeant of Company F, Ninth Regiment Illinois Volunteer Cavalry. (Report No. 2238.)

The bill (H. R. 9285) granting a pension to Henry H. Tucker, of Minneapolis, Kans., late a sergeant of Company E, Thirty-first Ohio Volunteer Infantry, and a first lieutenant of Company B, One hundred and forty-third Illinois Infantry. (Report No. 2239.)

By Mr. KIRKPATRICK, from the Committee on Invalid Pensions:

The bill (H. R. 3250) granting a pension to Levi R. Long. (Report No. 2222.)

The bill (H. R. 4525) granting a pension to Henry Hubbell. (Report No. 2224.)

The bill (S. 2456) entitled "An act granting a pension to Oliver P. Gooding." (Report No. 2225.)

The bill (H. R. 1306) to increase the pension of Benjamin F. Douglass. (Report No. 2240.)

The bill (H. R. 3585) granting a pension to George W. Bailey. (Report No. 2245.)

By Mr. PICKLER, from the Committee on Invalid Pensions:

A bill (H. R. 9362) granting an increase of pension to Col. Benjamin Beach, reported in lieu of House bill No. 9231. (Report No. 2226.)

The bill (H. R. 9350) granting an increase of pension to Patrick H. Smith. (Report No. 2227.)

The bill (H. R. 9312) granting an increase of pension to Stephen H. Morse. (Report No. 2228.)

The bill (H. R. 9315) granting a pension to H. R. Draper. (Report No. 2241.)

By Mr. POOLE, from the Committee on Invalid Pensions:

The bill (H. R. 7350) to increase the pension of Susan D. Yates. (Report No. 2229.)

The bill (H. R. 921) granting a pension to Ira Ingraham. (Report No. 2230.)

By Mr. THOMAS, from the Committee on Invalid Pensions:

The bill (H. R. 616) granting a pension to Charles Beckwith. (Report No. 2231.)

The bill (H. R. 617) granting a pension to Lovinia Parker. (Report No. 2232.)

The bill (H. R. 7964) granting a pension to Annie E. Bassett. (Report No. 2242.)

The bill (H. R. 5262) granting a pension to Maria C. Hill. (Report No. 2244.)

By Mr. LOCKHART, from the Committee on Military Affairs: The bill (H. R. 4498) to correct the date of muster of Rosalvo Brazelton as second lieutenant of Company D, Forty-second Regiment Indiana Volunteer Infantry. (Report No. 2233.)

By Mr. HURLEY, from the Committee on War Claims: The bill (S. 581) entitled "An act for the relief of the legal representatives of Hiram Somerville." (Report No. 2235.)

By Mr. SULLOWAY, from the Committee on Invalid Pensions: The bill (S. 3218) entitled "An act granting an increase of pension to Charles D. Hanscom." (Report No. 2243.)

PUBLIC BILLS, MEMORIALS, AND RESOLUTIONS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials of the following titles were introduced and severally referred as follows:

By Mr. PARKER: A bill (H. R. 9361) to increase the efficiency of the Regular Army of the United States and to localize the recruiting of regiments in time of war—to the Committee on Military Affairs.

By Mr. McLACHLAN: A bill (H. R. 9381) granting lands to the city of Santa Barbara for the purpose of a permanent water supply for said city—to the Committee on the Public Lands.

By Mr. GROSVENOR: A joint resolution (H. Res. 198) to authorize the further retention in the Treasury of the residue from the first payment derived from the sale of the Cherokee Outlet—to the Committee on Indian Affairs.

By Mr. CHICKERING: A resolution (House Res. No. 410) to have printed 10,000 additional copies of the majority and minority reports of the Committee on Ways and Means on Senate bill 1341, for the use of the House—to the Committee on Printing.

By Mr. BISHOP: A resolution (House Res. No. 411) for the relief of Samuel Lee—to the Committee on Claims.

By Mr. BOUTELLE: A resolution (House Res. No. 412) for the consideration of Senate resolution No. 149 on Saturday, June 6, immediately after reading of the Journal—to the Committee on Rules.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Invalid Pensions was discharged from the consideration of the bill (H. R. 9331) to increase the pension of Louis Alexander Dunlop, alias Alexander Dunlop; and the same was referred to the Committee on Pensions.

PRIVATE BILLS, ETC.

Under clause 1 of Rule XXII, private bills of the following titles were presented and referred as follows:

By Mr. BLUE: A bill (H. R. 9363) granting a pension to Anna B. Gillett—to the Committee on Invalid Pensions.

By Mr. CURTIS of Kansas: A bill (H. R. 9364) granting an increase of pension to Stephen R. Smith—to the Committee on Invalid Pensions.

By Mr. HARRIS: A bill (H. R. 9365) for the relief of George Thompson—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9366) to grant an honorable discharge to James Geissinger—to the Committee on Military Affairs.

Also, a bill (H. R. 9367) to grant an honorable discharge to John M. Bassler—to the Committee on Military Affairs.

By Mr. KERR: A bill (H. R. 9368) to pension Levi Benedict—to the Committee on Invalid Pensions.

By Mr. McCLEARY of Minnesota: A bill (H. R. 9369) granting a pension to Mrs. Lavina Estlick—to the Committee on Pensions.

By Mr. McCREARY of Kentucky: A bill (H. R. 9370) for the benefit of Harrodsburg Presbyterian Church—to the Committee on War Claims.

By Mr. McEWAN: A bill (H. R. 9371) to remove the charge of desertion from the record of Samuel C. Shureman, alias Samuel C. Wadsworth—to the Committee on Military Affairs.

By Mr. McMILLIN: A bill (H. R. 9372) granting a pension to Lon M. Staring—to the Committee on Invalid Pensions.

By Mr. SPALDING: A bill (H. R. 9373) granting a pension to Jane Baker—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9374) granting a pension to Eliza Ann Harrington—to the Committee on Invalid Pensions.

By Mr. McLACHLAN: A bill (H. R. 9375) to grant a pension to Clara A. Wycoff—to the Committee on Invalid Pensions.

Also, a bill (H. R. 9376) for the relief of Lucy M. Cleveland—to the Committee on Pensions.

Also, a bill (H. R. 9377) for the relief of Henry S. Hill—to the Committee on Military Affairs.

Also, a bill (H. R. 9378) for the relief of the legal representatives of John Moshier—to the Committee on War Claims.

Also, a bill (H. R. 9379) for the relief of Homer A. Wells—to the Committee on Invalid Pensions.

By Mr. McCLEARY of Minnesota: A bill (H. R. 9380) placing Capt. Aaron Tyler's company of Minnesota militia on the roll of United States Volunteers—to the Committee on Military Affairs.

PETITIONS, ETC.

Under clause 1 of Rule XXII, the following petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. BOUTELLE: Petition of citizens of Bangor, Me., in favor of House bill No. 260, to increase the pay of letter carriers—to the Committee on the Post-Office and Post-Roads.

By Mr. DALZELL: Petition of sundry citizens of Pittsburg, Pa., in favor of House bill No. 260, to increase the pay of letter carriers—to the Committee on the Post-Office and Post-Roads.

By Mr. DOLLIVER: Sundry petitions of citizens of the State of Iowa, asking for favorable action on House bill No. 838, to reduce letter postage to 1 cent per half ounce, and House bill No. 4566, to amend the postal laws relating to second-class matter—to the Committee on the Post-Office and Post-Roads.

By Mr. FARIS: Petition of A. A. Hargrave and 40 other citizens of Rockville, Ind., favoring House bill No. 6851, in behalf of Wilberforce University—to the Committee on Military Affairs.

By Mr. GROSVENOR: Memorial of Columbus Golden Post, No. 89, Department of Ohio, Grand Army of the Republic, in favor of House bill No. 7860, favoring the erection of a monument to the memory of the private soldiers and sailors of the Union armies—to the Committee on the Library.

By Mr. HENDERSON: Telegram from Thomas J. Elderken, of Chicago, Ill., urging the passage of the seamen's bill—to the Committee on Rules.

Also, telegram from P. P. Morrissey, grand master of the Brotherhood of Railroad Trainmen, urging the passage of the arbitration bill—to the Committee on Rules.

By Mr. MCLACHLAN: Petition of members of the California Yearly Meeting of Friends, assembled in Whittier, Cal., protesting against military drill in public schools—to the Committee on Education.

Also, petition of George R. Trampton and others, urging the removal of the Marquette statue from the Capitol—to the Committee on the Library.

By Mr. SPALDING: Papers to accompany House bill No. 3924, to remove charges from the record of Franklin Benham—to the Committee on Military Affairs.

By Mr. WATSON of Ohio: Telegram from F. W. Arnold, general secretary and treasurer of the Brotherhood of Locomotive Firemen, urging the passage of the arbitration bill—to the Committee on Rules.

SENATE.

SATURDAY, *June 6, 1896.*

The Senate met at 12 o'clock m.

Prayer by the Chaplain, Rev. W. H. MILBURN, D. D.

The VICE-PRESIDENT resumed the chair.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on motion of Mr. GALLINGER, and by unanimous consent, the further reading was dispensed with.

ENROLLED BILLS SIGNED.

The signature of the Vice-President was announced to the following enrolled bills, which had previously been signed by the Speaker of the House of Representatives:

A bill (S. 1420) granting an increase of pension to Elizabeth W. Sutherland;

A bill (H. R. 6739) for the relief of John N. Quackenbush, late a commander in the United States Navy;

A bill (H. R. 7171) authorizing and directing the Secretary of the Navy to donate 4 condemned cannon and 4 pyramids of condemned cannon balls to James T. Shields Post, No. 45, Grand Army of the Republic, of Galesburg, Knox County, Ill., and for other purposes;

A bill (H. R. 956) for the relief of Sophia Sparks and Julia C. Sparks, of Annapolis, Md.;

A bill (H. R. 2006) to increase the pension of Harriet C. Gregg, widow of Col. and Bvt. Maj. Gen. John Irvin Gregg, from $30 to $50 per month;

A bill (H. R. 8008) defining cheese, and also imposing a tax upon and regulating the manufacture, sale, importation, and exportation of "filled cheese"; and

A bill (H. R. 8293) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1896, and for prior years, and for other purposes.

RIVER AND HARBOR BILL.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of State, acknowledging the receipt of the act entitled "An act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes," returned by the President of the United States with his objections, and passed by both Houses of Congress, upon reconsideration of the same; which was read, and ordered to be placed on the files.

ALCOHOL IN THE ARTS.

The VICE-PRESIDENT appointed (in compliance with the act approved June 3, 1896, entitled "An act to repeal section 61 of an act to reduce taxation, to provide revenue for the Government, and for other purposes, which became a law August 28, 1894") Mr. PLATT, Mr. ALDRICH, and Mr. JONES of Arkansas members of the joint select committee on the part of the Senate to consider all questions relating to the use of alcohol in the manufactures and arts, free of tax, etc.

PETITIONS AND MEMORIALS.

Mr. CULLOM presented a petition of the Trade and Labor Assembly of Galesburg, Ill., praying for the Government ownership and control of the telegraph lines; which was referred to the Committee on Post-Offices and Post-Roads.

He also presented a petition of Atwood Camp, No. 73, Sons of Veterans, of Atwood, Ill., praying for the enactment of legislation to constitute organized camps of Sons of Veterans, United States Army, a national reserve, and directing the Secretary of War to furnish them with arms, etc.; which was referred to the Committee on Military Affairs.

He also presented a petition of Encampment of the Department of Illinois, Grand Army of the Republic, praying for the enactment of legislation to establish a national park to commemorate the campaign, seige, and defense of Vicksburg; which was ordered to lie on the table.

Mr. BURROWS (for Mr. MCMILLAN) presented a petition of the Baptist Church of Wheatland, Mich., and a petition of the Woman's Foreign Missionary Society of the Methodist Episcopal Church of Detroit, Mich., praying for the enactment of a Sunday-rest law for the District of Columbia; which were referred to the Committee on the District of Columbia.

He also (for Mr. MCMILLAN) presented a petition of the Council of Trades and Labor Unions of Detroit, Mich., praying for the enactment of legislation restricting immigration; which was ordered to lie on the table.

He also (for Mr. MCMILLAN) presented a petition of Wolverine Division, No. 182, Order of Railway Conductors, of Jackson, Mich., praying for the passage of the so-called arbitration and contempt bills; which was referred to the Committee on Education and Labor.

He also (for Mr. MCMILLAN) presented a memorial of the faculty of the University of Michigan, remonstrating against the passage of Senate bill No. 1552, for the further prevention of cruelty to animals in the District of Columbia; which was ordered to lie on the table.

Mr. TELLER presented a petition of Bainbridge Council, No. 14, Junior Order United American Mechanics, of Leadville, Colo., praying for the enactment of legislation restricting immigration; which was ordered to lie on the table.

He also presented a memorial of the Medical Society of Weld County, Colo., remonstrating against the passage of Senate bill No. 1552, for the further prevention of cruelty to animals in the District of Columbia; which was ordered to lie on the table.

He also presented a petition of sundry citizens of Colorado praying that the right of equal suffrage be granted to women; which was ordered to lie on the table.

He also presented sundry memorials of citizens of Colorado, remonstrating against the reception of the Père Marquette statue; which were ordered to lie on the table.

He also presented a petition of the Granite Cutters' National Union of Denver, Colo., praying for the enactment of an eight-hour law; which was referred to the Committee on Education and Labor.

He also presented a petition of the Trades and Labor Assembly of Denver, Colo., praying for the enactment of legislation prohibiting the use of convict labor in the construction of public buildings erected by the Government; which was referred to the Committee on Education and Labor.

He also presented petitions of the Trades and Labor Assembly of Aspen, Colo.; of Typographical Union, No. 29, of Peoria, Ill.; of Local Union, No. 1, Association of Buffers and Polishers, of Meriden, Conn., and of Local Union, No. 10, United Brotherhood of Carpenters and Joiners, of Chicago, Ill., praying for the free and unlimited coinage of silver; which were ordered to lie on the table.

Mr. VILAS. I present a memorial of citizens of Polish nationality, of Milwaukee, Wis., setting forth at some length their reply to certain criticisms that have been made in regard to the immigration of citizens of Poland. It is, I think, a very interesting and important memorial. It is not very long, and I ask that it be printed as a document.

The PRESIDING OFFICER (Mr. HARRIS in the chair). The memorial will be referred to the Committee on Immigration, and it will be printed as a document, if there be no objection. It is so ordered.

Mr. BRICE presented a petition of the Trades and Labor Assembly of Sandusky, praying for the enactment of legislation authorizing money-order post-offices to receive money on deposit; which was referred to the Committee on Post-Offices and Post-Roads.

He also presented a petition of the Christian Endeavor Union of Cincinnati, Ohio, and a petition of the Citizenship League, of Cincinnati, Ohio, praying for the enactment of legislation to prevent interstate gambling by telegraph, telephone, etc.; which were referred to the Committee on Interstate Commerce.

SPECIAL LIQUOR TAXES.

Mr. PEFFER. I present two petitions, both relating to the same subject, one being the petition of John A. Reed and 13 other citizens of Kansas, praying for the passage of Senate bill No. 239, to prohibit the collection of special liquor taxes from persons other than those who are duly authorized by State laws to traffic in intoxicating liquors; and also the petition of H. H. Bowen and 19 other citizens of Kansas, asking for the same relief.

In this connection I wish to make a brief statement. I think this is the proper time to make it, as there seems to be a misapprehension in the public mind as to the object of Senate bill 239, to which the petitions relate. In order to relieve the misapprehension I will read that bill. It is entitled "A bill to prohibit the collection of special liquor taxes from persons other than those who are duly authorized by State laws to traffic in intoxicating liquors." The bill itself has but one section, as follows:

Be it enacted, etc., That whenever, in any State, by the laws thereof duly enacted, traffic in spirituous, vinous, malt, or other intoxicating liquors is limited to particular persons or classes of persons, collectors of United States internal revenue shall not hereafter collect special liquor taxes from, nor

shall they issue stamps or receipts therefor to, any person or persons within such State other than those who at the time are duly authorized by the laws of such State and in accordance with the provisions thereof to engage in or carry on such trade or traffic: *Provided*, That nothing in this act shall be held to relieve any person or persons from the penalties prescribed under provisions of existing laws for engaging in the business of manufacturing or dealing in any kind of intoxicating liquors without having first paid the special taxes imposed by the laws of the United States.

A week or ten days ago a meeting of Presbyterians was held in the State of Kansas, and, as has been the custom with other religious denominations in that State the last three months or more, the preachers in the assembly proposed a resolution indorsing the object of Senate bill No. 239. The report of that meeting, as it is printed in the newspapers, shows that some lawyers present quibbled at the proposed legislation, and gave it as their opinion that the bill was based on or was the product of ignorance on the part of the Senator from Kansas. The trouble with the lawyers was that they themselves did not understand the object of the bill.

The object of this bill has not been, it is not now—and the bill so provides—to prohibit in any manner interference with the rights of either the Government or the rights of the States. It simply provides that in States where the liquor traffic is limited to particular persons, no revenue-tax receipts shall be issued to persons other than those who are authorized by the State laws to engage in the traffic in intoxicating liquors, and it applies the same in a license State or in a local-option State as in a prohibition State.

I found extreme difficulty—practical impossibility—in getting favorable consideration of that bill upon the part of the Finance Committee of the Senate. I then introduced another bill, which I thought would relieve our situation in Kansas and in other places where we have like trouble. I proposed to amend the existing statute so as to require the collectors of internal revenue in the several districts, at the end of every calendar month, to make out a list of the persons who had paid the taxes in the several counties in the district during the last preceding calendar month, and to supply the county officers having charge of the county records with that list. The Committee on Finance referred the bill to the Treasury Department. Here is the answer of the Secretary of the Treasury:

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY,
Washington, D. C., May 28, 1896.

SIR: I have the honor to acknowledge the receipt of your letter of the 21st instant, inclosing Senate bill No. 3115, "to amend section 3243, Revised Statutes, relating to taxes under the internal-revenue laws."

You request my views on the bill. In reply I have the honor to state that your letter and the bill were referred to the Commissioner of Internal Revenue, and herewith I transmit copy of his report.

I fully concur in his opinion that "the proposition to impose upon collectors of internal revenue the duty of making monthly reports to State officers is in every way objectionable," and therefore I can not approve the bill.

Respectfully, yours,

J. G. CARLISLE, *Secretary.*

HON. JUSTIN S. MORRILL,
Chairman Committee on Finance, United States Senate.

This is the letter of the Commissioner of Internal Revenue:

TREASURY DEPARTMENT,
OFFICE OF THE COMMISSIONER OF INTERNAL REVENUE,
Washington, D. C., May 25, 1896.

SIR: I have the honor to acknowledge receipt by your reference from the Committee on Finance of the Senate of a copy of Senate bill 3115, on which you ask my views.

The bill proposes to add to section 3243, Revised Statutes, as it now stands, the following: "And in order to make the provisions of this section more effectual it shall be the duty of collectors of internal revenue, on the first day of every calendar month, to prepare and forward by mail to the officer or person having custody of county records in each of the counties within the particular collection district a statement showing how many and what persons, with their post-office addresses, paid such taxes in said county during the last preceding month, and for what trade or business the tax was paid."

In my opinion the proposition to impose upon collectors of internal revenue the duty of making monthly reports to State officers is in every way objectionable. The law as it now stands (section 3240, Revised Statutes) requires an alphabetical list of special taxpayers to be kept conspicuously in the collector's office for public inspection. In my opinion it would be contrary to sound public policy to enlarge this provision as proposed in the bill.

I return the papers as requested.

Respectfully, yours,

G. W. WILSON,
Acting Commissioner.

To the honorable the SECRETARY OF THE TREASURY.

Mr. President, we have the statement of the Secretary of the Treasury in approval of the opinion of the Commissioner of Internal Revenue that such a proposition is contrary to public policy, and I make some emphasis upon this point in order that persons who are interested in the passage of such legislation as I am proposing here may understand that the Government of the United States has finally removed itself wholly and absolutely from all sympathy and connection with the laws of any State in the Union with respect to the enforcement of its penalties against the illicit traffic in intoxicating liquors.

This is all I care to say.

The VICE-PRESIDENT. The petitions will be referred to the Committee on Finance.

GOLD AND THE WHEAT FARMERS.

Mr. LODGE. I present a paper by L. G. Powers, containing certain data relative to gold and the world's wheat farmers. I move that the paper be printed as a document. It will involve a very small cost.

The motion was agreed to.

REPORTS OF COMMITTEES.

Mr. FAULKNER, from the Committee on the District of Columbia, to whom was referred the bill (S. 1604) for the relief of John A. Fairfax, of the District of Columbia, reported it with amendments, and submitted a report thereon.

Mr. MITCHELL of Wisconsin, from the Committee on Military Affairs, to whom was referred the bill (S. 111) to correct the military record of Reese P. Peoples, submitted an adverse report thereon, which was agreed to; and the bill was postponed indefinitely.

Mr. GALLINGER, from the Committee on the District of Columbia, to whom was referred the bill (S. 2424) to provide for the appointment of five police magistrates for the District of Columbia, and for other purposes, submitted an adverse report thereon, which was agreed to; and the bill was postponed indefinitely.

He also, from the Committee on Pensions, to whom was referred the bill (H. R. 9139) granting a pension to Margaret J. Young, reported it without amendment, and submitted a report thereon.

He also, from the same committee, to whom was referred the bill (S. 396) granting a pension to Henry Farmer, reported it without amendment, and submitted a report thereon.

Mr. HAWLEY, from the Committee on Military Affairs, to whom was referred the bill (H. R. 5407) to remove the charge of desertion now standing against Oscar A. Bulette, known in his military title as Austin Bulette, late private in Company E, Fifty-second Illinois Infantry Volunteers, during late war, reported it without amendment, and submitted a report thereon.

He also, from the same committee, to whom was referred the bill (S. 2202) to reorganize the line of the Army, etc., reported it with amendments.

He also, from the same committee, to whom was referred the bill (H. R. 4199) to correct the military record of Edward H. Munson, late a private in Company H, Thirty-second Regiment New York Infantry, reported it without amendment, and submitted a report thereon.

Mr. BROWN. I was unanimously instructed by the Committee on Indian Depredations, to whom was referred the bill (S. 2726) to amend an act entitled "An act to provide for the adjudication and payment of claims arising from Indian depredations," approved March 3, 1891, to report it with amendments, and submit a report thereon.

The VICE-PRESIDENT. The bill will be placed on the Calendar.

Mr. WARREN, from the Committee on Agriculture and Forestry, to whom was referred the joint resolution (S. R. 157) extending the scope of the investigations by the Agricultural Department in the matter of the improvement of public roads, reported it without amendment.

Mr. HANSBROUGH, from the Committee on the Library, to whom was referred the bill (S. 3251) to procure a site and erect a peace monument at Appomattox, Va., reported it with an amendment, and submitted a report thereon.

REPORT OF LIBRARIAN OF CONGRESS.

Mr. HANSBROUGH submitted the Annual Report of the Librarian of Congress for the calendar year 1895; which was ordered to lie on the table.

He also, from the Committee on the Library, reported the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That the Annual Report of the Librarian of Congress be printed, and that 500 copies, with covers, be printed for distribution by the Librarian.

BILLS INTRODUCED.

Mr. TURPIE introduced a bill (S. 3263) for the relief of Henry Folkenning, of Indianapolis, Ind.; which was read twice by its title, and, with the accompanying paper, referred to the Committee on Claims.

Mr. PUGH introduced a bill (S. 3264) for the relief of I. J. Lee; which was read twice by its title, and, with the accompanying paper, referred to the Committee on Claims.

Mr. WETMORE introduced a bill (S. 3265) to promote Lieut. William McCarty Little, United States Navy, retired, to be a commander on the retired list; which was read twice by its title, and referred to the Committee on Naval Affairs.

Mr. CARTER introduced a bill (S. 3266) for the relief of Albert L. Pitney; which was read twice by its title, and referred to the Committee on Claims.

NORTHERN PACIFIC RAILROAD.

Mr. SMITH submitted an amendment intended to be proposed by him to the joint resolution (S. R. 124) to facilitate the reorganization of the Northern Pacific Railroad Company, etc.; which was ordered to be printed.

PURCHASES OF INTERNAL-REVENUE STAMPS.

Mr. PLATT. I introduce and ask to have considered at this time a resolution for the restatement of some accounts.

The resolution was read, as follows:

Resolved, That the Secretary of the Treasury and the proper accounting officers be, and they are hereby, authorized and directed to restate the accounts of the persons and firms named herein, and report the same for the information of the Senate, showing the balance of commissions due them on their purchases of internal-revenue stamps printed from their private dies, as provided in section 3425 of the Revised Statutes of the United States, on the full amount, face value, of stamps purchased without distinction as to the time when such purchases were made, namely:

William Bond & Co., William Roeber, H. & W. Roeber, The New York Consolidated Card Company, Samuel Hart, John J. Levy, Lawrence & Cohen, Andrew Dougherty, Byam, Carlton & Co., Byam & Carlton, C. W. Lord, Lord & Robinson, James H. Wheedon, Excelsior Match Company, American Match Company, James Eaton, P. Eichele & Co., Cowles & Leete, C. S. Leete, Phineas T. Ives, William Gates, A. J. Griggs, Henry Stanton, F. P. Newton, Brocket & Newton, The Clark Match Company of Woodbridge, Conn.; Joseph Loehr, Swift & Courtney, Michael Daily, J. R. Brown, Brown & Durling, Newbauer & Co., B. Bendel & Co., A. Messenger, Griggs & Scott, Griggs & Goodwin, L. G. Hunt, Schmitt & Schmittdiel, John Loehr, J. E. Hethrington, Jeremiah Curtiss & Son, John I. Brown & Son, I. S. Johnson & Co., The Centaur Company, Johnston, Holloway & Co., Dr. J. H. McLean, B. Brandreth, George A. Brandreth, executor; J. E. Schwartz, Schwartz & Haslett, B. A. Fahnestock & Co., J. H. Schenck & Son, Dr. J. C. Ayer & Co., R. P. Hall & Co., Demas Barnes, Demas Barnes & Co., P. H. Drake & Co., Fleming Bros., H. R. Stevens, A. L. Scoville & Co., Thomas J. Husband, Kennedy & Co., A. Vogeler & Co., C. N. Crittenton, Frederick Brown, Barclay & Co., D. Ransom, Son & Co., Dr. D. Jayne & Son, The World's Distributing Medical Association, Dr. R. V. Pierce, John Bull, A. S. Low, C. E. Hull & Co., J. Burnett & Co., Merchant's Gargling Oil Company, Hiscox & Co., R. H. McDonald & Co., Trenton Match Company, George F. Wilson, Herman Tappan, W. T. Brown & Co. (or Portland Match Company), Iron City Match Company, The Swift and Courtney and Beecher Company, A. Beecher & Sons, E. R. Tyler, Curtiss & Brown, D. M. Richardson, The Richardson Match Company, S. R. Hartman & Co., and Henry Dalley, jr.

Mr. ALLISON. It does not occur to me that the Senate can authorize a restating of an account. It seems to me that if an account is to be restated it must be done by a joint resolution. I do not know what object the Senator has in view, but certainly this would require a great number of investigations to be made relating to old accounts. I do not like to object to the resolution, but I do not quite understand why there should be a restating of the account by the auditing officers of the Treasury and then open an account already closed, as it appears to me.

Mr. PLATT. I suppose that it is necessary in order to put them in a position where Congress can pass upon them.

Mr. SHERMAN. Is there a bill?

Mr. ALLISON. This is a Senate resolution, I understand.

Mr. PLATT. Let it be made a joint resolution.

Mr. ALLISON. I do not see how the Senate can direct an accounting officer.

Mr. PLATT. It may be made a joint resolution, if that is deemed necessary.

Mr. SHERMAN. The object is to get information in regard to a bill pending here?

Mr. PLATT. The bill is pending here.

Mr. ALLISON. It is a request for the accounting officers to restate an account. That means that they shall open an account already closed in the Treasury and restate it here for the purpose of laying a foundation for a claim. I do not believe that ought to be done.

Mr. SHERMAN. Information in support of a claim or against a claim could be called for, but it seems to me that there is no necessity for restating the account.

Mr. PLATT. Let it be made a joint resolution and go over.

The VICE-PRESIDENT. The resolution will be modified as indicated, and go over under the rule.

The joint resolution (S. R. 160) for the relief of William Bond & Co. and others was read twice by its title.

SECOND-CLASS MAIL MATTER.

The VICE-PRESIDENT. The Chair lays before the Senate the resolution of the Senator from North Carolina [Mr. BUTLER] coming over from yesterday. The resolution will be stated.

The SECRETARY. A resolution directing the Postmaster-General to send to the Senate a copy of any and all rulings made with reference to second-class mail matter during the last six months.

Mr. HILL. Is the resolution printed?

The VICE-PRESIDENT. The resolution has been printed. It comes over from a previous day.

Mr. HILL. I have not a copy of it at my desk.

Mr. SHERMAN. I do not think the resolution is understood. I ask that it be read.

The Secretary read the resolution submitted yesterday by Mr. BUTLER, as follows:

Resolved by the Senate, That the Postmaster-General be, and is hereby, directed to send to the Senate a copy of any and all rulings that have been made by him, or any official in the Post-Office Department, with reference to second-class mail matter during the last six months, including a ruling recently made prohibiting the passage through the mails, as second-class matter, certain publications which had before been allowed to pass as second-class matter, or any such orders or rulings that have been made and temporarily suspended, accompanied with the reasons for making such orders, and also the reasons for temporarily suspending such orders, if such orders have been made and temporarily suspended.

The VICE-PRESIDENT. The question is on agreeing to the resolution.

The resolution was agreed to.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 2143) granting a pension to Mrs. Emily M. Van Derveer, widow of the late Brig. Gen. Ferdinand Van Derveer.

The message also announced that the House had passed the bill (S. 2169) to regulate mail matter of the fourth class.

ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills; and they were thereupon signed by the Vice-President:

A bill (H. R. 2143) granting a pension to Mrs. Emily M. Van Derveer, widow of the late Brig. Gen. Ferdinand Van Derveer;

A bill (H. R. 4020) granting an increase of pension to Mrs. William Loring Spencer;

A bill (H. R. 4888) for the relief of George Hager;

A bill (H. R. 4921) to relieve the North Georgia Agricultural College from the payment of $450 for damaged gun;

A bill (H. R. 5258) granting an honorable discharge to John B. Besler;

A bill (H. R. 5279) granting a pension to Jerusha H. Brown;

A bill (H. R. 6607) for the relief of Helen Larned;

A bill (H. R. 7919) granting a site for the erection and maintenance of a charity hospital by the city of Biloxi, Miss.;

A bill (H. R. 8248) to increase the pension of Mrs. Emily E. Cash;

A bill (H. R. 8469) to authorize the Baltimore and Washington Transit Company, of Maryland, to enter the District of Columbia; and

A bill (H. R. 9275) approving certain acts of the legislative assembly of the Territory of New Mexico, authorizing the issue of certain bonds of said Territory, and for other purposes.

SUNDRY CIVIL APPROPRIATION BILL.

Mr. ALLISON submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 7664) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1897, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 141.

That the House recede from its disagreement to the amendment of the Senate numbered 140, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 96, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$325,000"; and the Senate agree to the same.

The committee of conference have been unable to agree upon the amendments of the Senate numbered 2, 3, 4, 6, 7, 8, 13, 15, 16, 17, 32, 61, 97, 109, 122, 123, 124, 146, 147, and 161.

W. B. ALLISON,
EUGENE HALE,
A. P. GORMAN,
Managers on the part of the Senate.

J. G. CANNON,
E. J. HAINER,
JOSEPH D. SAYERS,
Managers on the part of the House.

The VICE-PRESIDENT. The question is on concurring in the report.

Mr. ALLISON. When the report is concurred in I shall make a statement in regard to the disagreeing votes.

Mr. SHERMAN. I think the Senator ought to state the leading features of the agreement. What is the first amendment which was agreed to? We can not tell by the numbers to what the amendments relate.

Mr. ALLISON. No. 140, which is the first amendment on which the House recedes, is an amendment relating to the Oregon improvement. The House inserted the word "completed," while making the appropriation. The Senate inserted the word "continuing," the appropriation not being sufficient to complete the work, and the House recedes from its disagreement.

Mr. MITCHELL of Oregon. So that the word "continuing" remains in the bill?

Mr. ALLISON. The word "continuing" remains in. The Senate receded from amendment numbered 141, the substance of the same being in the river and harbor bill.

As to amendment 96, the House recedes from its disagreement with an amendment. That is the amendment of the Senate relating to the survey of public lands. The House originally inserted "$250,000" for surveys. The Senate increased the appropriation to $400,000. The item was divided, and the amount retained in the bill, if the conference report is agreed to, will be $325,000.

Those are the only amendments which have been agreed to in conference. When the report is agreed to I desire to make a statement in respect to the amendments still in disagreement.

The report was concurred in.

Mr. ALLISON. Mr. President, I desire to make a brief statement respecting the disagreements between the two Houses on the amendments stated in the conference report as read at the desk. I make this statement with a desire that in some way the Senate may express its opinion as respects the differences. There is, I know, some restlessness on account of the prolongation of these conferences. The Senate conferees, representing the views of the Senate, have not been willing to recede from certain amendments until they could know something more of the wish of Senators respecting them. The House conferees refuse to agree to certain amendments proposed by the Senate having reference to public buildings. These public buildings are of two classes.

Mr. PLATT. May I inquire of the Senator from Iowa whether those are all the matters now in disagreement?

Mr. ALLISON. They are not. I am mentioning first the disagreement on the public-building amendments. These items are of two classes, one class relating to the enlargement of the limit of certain buildings as compared with the limit prescribed hitherto. They comprise six buildings in all. First, they relate to the buildings at the capitals of the three new States of Idaho, Wyoming, and Montana; secondly, they relate to public buildings that have already had expended upon them large sums of money, but which can not be completed, as reported from the Supervising Architect's Office, without a small addition to the limit of cost. These are the buildings at Kansas City, Mo., Savannah, Ga., and Camden, N. J., three in all.

The Senate also inserted an item for a new public building at Salt Lake City, Utah, that being a State capital, and also for a new public building as an addition to the National Museum in this city.

The House conferees refuse to deal with any of these public buildings where a limit has been increased, embracing not only these capitals of new States, but also embracing two or three public buildings that are far on the way toward completion and upon which large sums of money have been expended. So much for the public-building amendments, which embrace practically the amendments from 2 to 17.

Mr. HAWLEY. Before the Senator from Iowa passes from the public-building amendments I should like to make an inquiry, if he will pardon me, because it is rather difficult to keep the run of the bill by the numbers merely. There was in the bill an innocent little public-building proposition to give the great sum of $15,000 to replace the rotten old building at Fortress Monroe for a post-office. Has that gone out?

Mr. ALLISON. I thank the Senator from Connecticut for calling my attention to that item. It is still in disagreement. The Senate conferees felt that they could not give up so important an office, although the amount is small, without the consent of the Senate, and therefore that is also in disagreement.

Mr. HAWLEY. I am glad to hear it.

Mr. ALLISON. I omitted to mention that, as I ought to have done.

There is another important amendment still in disagreement, known as amendment numbered 97, relating to the reclamation of arid lands in the new States, which I think I need not dwell upon, because I believe that can be arranged if another conference is ordered.

The next item is a small appropriation made by a Senate amendment for the International Exposition at Brusels next year, to which the Government of the United States is invited. We made, by an original amendment in the Senate, an appropriation of $35,000 for this purpose. We proposed to the House conferees to reduce that amount greatly, changing the phraseology so that a small sum could be used, having been informed that it is absolutely necessary for the Congress of the United States in some way to make recognition of the International Exposition in order that the State Department may accept the invitation of the Government of Belgium. The House conferees refused to put anything in the bill for that purpose. That item is still in disagreement, and we shall be glad to know the sense of the Senate upon it.

Amendments 122, 123, 124, on page 81 of the bill, relate to the lighting of the Executive Mansion and the public grounds. The question of lighting has been under consideration during most of the present session. It is found not only in the sundry civil bill, but it is also found in the bill making appropriations for the government of the District of Columbia.

During the progress of the conferences it was tacitly agreed by the conferees on both sides that we would abide by and conform to the bill that was pending in both Houses of Congress relating to the price of gas in this District. Therefore this matter was held in abeyance until the question of the price of gas, not only to private consumers, but to the Government of the United States and the government of the District of Columbia, should be settled by the action of the two Houses upon the subject. The two Houses have acted upon the subject, and have agreed on the price to be paid by private consumers and the price to be paid by the Government of the United States and by the government of the District of Columbia. Now the House conferees refuse to conform to the recent statute upon the subject, but insist that we shall go on and deal with the subject as though the two Houses had not done anything respecting it. The conferees on the part of the Senate felt that we were bound by the action of the two Houses on this subject, and therefore proposed to the conferees on the part of the House that the rates to be provided for in this bill should be the rates provided by law, without mentioning any rates. That is disagreed to.

There are two amendments relating to hospitals of this city, the Garfield Hospital and Providence Hospital, upon which the conferees have not been able to agree.

There is another amendment on page 107 of the bill, known as amendment 161, relating to the regulation of the distribution of materials and articles used in the various Soldiers' Homes. This amendment was proposed by the Managers of the National Soldiers' Home, and it has been stated as absolutely important and essential to the efficient and careful and economical management of those Homes. The amendment was inserted in the Senate as a regulation of the appropriations for that purpose. The conferees on the part of the House of Representatives refuse to agree to it, and that item is still in disagreement.

Now, I believe I have stated all the disagreements between the two Houses upon the subject. Most of them are important, and the Senate conferees do not feel that they would be justified in abandoning these carefully prepared provisions, affecting as they do many States and many people in various portions of the country, without taking the advice of the Senate.

I shall be glad for one to have the members of the Senate familiar with the arrangement in regard to the price of gas make some statement before I make the motion which I intend to make later on, that the Senate shall still further insist upon these amendments.

Mr. DUBOIS. Mr. President, I desire to address the Senate briefly in regard to the amendment numbered 2, public building at Boise City, Idaho; numbered 4, public building at Cheyenne, Wyo.; numbered 7, public building at Helena, Mont., and numbered 17, public building at Salt Lake City, Utah.

As has been stated on this floor a number of times, there is not a public building in any one of those States. The representatives from those States in the Senate vote cheerfully $11,000,000 for fortifications. We are absolutely safe so far as we are concerned; there is no gun that could shell us; but we believe it is for the public interest. Our constituencies indorse us in voting for that appropriation and we do it cheerfully. We vote $60,000,000 for rivers and harbors, scarcely a dollar of which will be spent in our part of the country. It is for the general good, and our constituencies indorse our action in that respect. We vote from eight to twelve million dollars for battle ships. That subject is of less interest to us directly than to any other portion of the country, yet it is for the general good. But when we ask that you give us one public building in each of our capital towns, we are confronted with the statement by the House that we shall not have them.

In these capitals are the courts, the offices of the surveyors-general, all the Federal offices, which have been enumerated in the Senate before. Outside of any matter of justice or right it would be economy for the Government to erect these buildings. Yet it is an open secret that the Speaker of the House and the chairman of the Committee on Public Buildings and Grounds of that body say that there is no further need for public buildings at this time, and that they have determined that no public buildings shall be erected.

I wish to call attention to the fact that the First district of Maine, where the Speaker resides, has 153,000 people, and they have in that district $1,153,929 worth of public buildings. In the Second district, with 169,000 people, there is a public building at Lewiston, one at Bath, one at Wiscasset, and one at Waldoboro. In the district represented by the chairman of the Committee on Public Buildings and Grounds of the House there is a public building at Ellsworth, one at Castine, one at Belfast, one at Rockland, and one at Augusta, and there is in that district a population of 154,000 people.

I dare say there is no more need for public buildings in those districts. There is no place in which to put them. Yet when the Senate says that these new States ought to have public buildings those gentlemen insist that there is no occasion for the erection of other public buildings. The chairman of the Committee on Appropriations of the House lives in a town which would not make a respectable suburb of some of these capitals. He has a very handsome public building there. It is only a county seat. There is not a United States court and there is no Federal office at that place.

Mr. CULLOM. It has been provided for.

Mr. DUBOIS. There is none at the present time. They have public buildings sufficient. I insist that in fairness, in justice, public buildings ought to be granted to these new States.

There are county seats in those States larger than any of the

towns I mentioned in the districts represented by these gentlemen, yet we do not ask for public buildings for those places. We do not ask one for Butte, Mont., which has a population of nearly 60,000 people, but we do ask for public buildings at our capitals. I move that the Senate insist on the amendments numbered 2, 4, 7, and 17, which provide for public buildings at the capitals of the new States; and I shall ask for a yea-and-nay vote of the Senate on the proposition.

Mr. SHOUP. Mr. President, I desire also that the committee of conference on the part of the Senate shall insist on the retention in the bill of the appropriations for the buildings in the recently admitted States. In the Fifty-first Congress my colleague at that time introduced a bill for a public building at Boise City, the capital of Idaho. The bill passed the Senate, but did not pass the House of Representatives. In the Fifty-second Congress I introduced a bill appropriating $200,000 for a public building at Boise City. The bill passed the Senate and was reported favorably by the Committee on Public Buildings and Grounds in the other House, but did not pass that body. In the Fifty-third Congress I again introduced a bill for a public building at Boise City. So we have been striving ever since Idaho has been admitted to the Union to secure an appropriation for a public building at that place, but up to the present time have failed. While the bill introduced in the Fifty-third Congress did not pass the Senate, there was at that time an agreement made with the Appropriations Committees of both branches of Congress whereby it was arranged that an appropriation should be made in the Fifty-fourth Congress for the erection of public buildings at the capitals of the new States.

For this reason, and for the reason that there is not a public building at any of the capitals of these new States, I believe, Mr. President, that the conferees on the part of the Senate should insist on the retention of these items in the appropriation bill.

Mr. SEWELL. It appears to me, Mr. President, that the item of the bill appropriating $125,000 for the construction of a public building at Camden, N. J., should be retained in the bill. If we delay much longer the erection of a public building at that place the price of land will have quadrupled in value, so that we shall have to come to Congress and ask for a great deal more money for the purpose. I trust that the conferees on the part or the Senate will be instructed to hold out for the appropriation for all the public buildings appropriated for by the amendments of the Senate.

Mr. VEST. Mr. President, I simply desire to state in regard to the items of the sundry civil bill which apply to these public buildings that, having served upon the Committee on Public Buildings and Grounds since I have been a member of the Senate, part of the time as chairman of the committee, I am familiar with these provisions. A rule has obtained in that committee for many years before I became a member of it, which was some eighteen years ago, that the capitals of all the States in the Union should have public buildings; and when these new States were admitted this question was taken up for consideration. An adjustment was finally made as to the cost of the sites in those new States, and sums were agreed upon as to the public buildings to be erected in the capitals in each one of them. Utah at that time had not been admitted. Since that adjustment was made the State of Utah has come ito the Union, and, as is known to every Senator present, Salt Lake is one of the most beautiful cities of the Union, as well as one of the most important, and promises to be the metropolis of a vast section of country, which agriculturally and for mining wealth is unsurpassed. I must express my astonishment that the House of Representatives should oppose appropriations so manifestly just as these in regard to the capitals of the new States.

In regard to the sums which are absolutely necessary to those buildings that are already in process of construction at Kansas City, Savannah, and Camden, N. J., those improvements were entered upon deliberately, with the full knowledge of every Senator who paid the slightest attention to that matter. We have put up the foundations and partially constructed the buildings, and, as they are exposed to the weather, it is worse than extravagance to leave them in their present condition. If we do the materials will be injured. We shall be not only retarding the work, but absolutely throwing away the money which has already been expended. It is false economy in a business point of view, and it is utterly indefensible to leave these partially constructed buildings in their present condition. It is useless to consider now whether it was right or wrong to commence them; but we made appropriations for them, we bought the sites, we commenced the work, and we have entered into contracts as to a great deal of it. Now, the other House, by refusing to approve these appropriations put in by the Senate, deliberately says it is willing to risk losing all the expenditures we have made.

I sincerely hope the Senate will insist upon its amendments.

Mr. MORRILL. Mr. President, the rule was first established in the Senate Committee on Public Buildings and Grounds that the capital of every State should have a public building if they asked for it and there was any business for it. There was never any trouble at all about bills which were reported from that committee for public buildings in the State capitals receiving the attention of the other House and passing there until they changed their rules, so that the Committee on Public Buildings and Grounds of that House does not have charge of public buildings, but they go to the Committee on Appropriations, thereby depriving the House Committee on Public Buildings and Grounds of any control of any part of that business so far as appropriation is concerned.

Mr. DUBOIS. I move that the Senate further insist on its amendments numbered 2, 4, 7, and 17, providing for public buildings at the capitals of the States of Idaho, Wyoming, Montana, and Utah, respectively.

Mr. VEST. Does the Senator's motion include the partially constructed buildings in other cities?

Mr. DUBOIS. Whilst I should cheerfully vote for the other amendment, I prefer to keep the four State buildings separate and free from any other complication.

The VICE-PRESIDENT. The Secretary will state to the Senate the motion of the Senator from Idaho.

The SECRETARY. That the Senate further insist upon its amendments numbered 2, 4, 7, and 17.

Mr. BACON. Mr. President, I understand the desire of the Senator from Idaho to be that the vote shall be taken separately as to the public buildings which are authorized by the Senate amendments, and also separately upon the amendments relative to the public buildings now in the process of construction.

Mr. VEST. If the Senator from Georgia will permit me, I will ask the Senator from Idaho to embrace in his motion the amendments in regard to the public buildings in Kansas City, Savannah, and Camden, so as to take the vote upon all together.

Mr. BACON. I think that should be done.

Mr. DUBOIS. Very well.

Mr. PLATT. I think the motion ought to be with reference to all the amendments relating to public buildings.

Mr. ALLISON. If the motion of the Senator from Idaho is modified to that extent, it will include amendments numbered 2, 3, 4, 6, 7, 8, 13, 15, 16, and 17.

Mr. PLATT. I do not know specifically what amendments it will include.

Mr. BACON. I have not yielded the floor, Mr. President.

The VICE-PRESIDENT. The Chair had recognized the Senator from Georgia [Mr. BACON], who has not yielded the floor.

Mr. PLATT. I was not aware of that.

Mr. BACON. Mr. President, I shall detain the Senate but a moment. I simply desire to state in reference to the public building at Savannah that the matter is now at a stage where if it is not acted upon, as is proposed by the Senate amendment, at the next session it will be too late. It must either be done now or not at all. There is a proposed change in the building, which has had the architect's estimate, and there is a communication from the Secretary of the Treasury stating the fact that it is necessary that it shall be done at once; that it can not be postponed. I trust, in view of the statement made by the distinguished Senator from Missouri, to which I will not attempt to add, that this amendment will be insisted upon by the Senate, as well as the other amendments which the chairman of the Committee on Appropriations has reported back to the Senate.

I have nothing further to say except to present the fact of the necessity for immediate action, and that postponement will defeat the object which is sought to be attained.

Mr. PLATT. Mr. President, I do not know where these buildings are located which are partially completed and the work upon which the Senate thinks and the Senate conferees think should be continued. The Senator from New Jersey [Mr. SEWELL] says there is one in his State. There is certainly none in mine, and therefore I may say a few words in reference to this subject without the suspicion that I have any interest in representing my State on the subject.

I can not understand the feeling that seems to prevail on the part of the House conferees that no money shall be expended upon a public building, no matter how great the necessity or the economy. I can understand perhaps that another body shall say that no new buildings shall be commenced, but to say that the work on those in process of construction shall stop simply because of the arbitrary determination that money shall not be expended for such a proposition, is, it seems to me, entirely unjustifiable, and I think the Senate ought to take a very firm stand upon the question.

This Government is not going into bankruptcy. I think we have heard that quite too often in the Senate. There is no prospect of the bankruptcy of the United States. Senators even seem to roll that word under their tongue as though it were a sweet morsel. It would not be sweet to them if they believed there was any real danger of bankruptcy in this country. The truth about it is that we have a good deal of money in the Treasury. It was obtained by the sale of bonds, which I wish it had not been necessary to sell, but it is there, and no amount of deficiency which can be contemplated is going to exhaust the surplus in the Treasury within the next two years. I can not understand the policy

which, in the case of an individual, would lead him to borrow money and pay interest upon it and put the money in his pocket, keeping it to pay the note when it should fall due. It certainly can not be the policy of this Government, having borrowed money and having $170,000,000 that we have no use for, to keep it until the bonds fall due, thirty years from now. We have plenty of money to make these improvements and to build these buildings, and I think the Senate ought to insist, and to do so very strongly, on the subject.

Mr. WARREN. Mr. President, I shall detain the Senate only a moment.

I indorse very heartily what has been said in favor of sustaining the conferees on the part of the Senate both as to the buildings in the capitals of the new States and as to the other public buildings yet in disagreement. There is a little difference in the situation as to the two classes, and I should prefer that the vote be taken on them as separate propositions. I hold myself ready to vote yea upon them as separate propositons or if voted on together. I think it is better, however, to vote on them separately, because the capitals are exactly on the same basis one with another and from one view, and are on a little different ground from the others in another view and from another standpoint. Some will consider that the unfinished buildings should have preference; others that the capitals should have preference; and I think a separate vote will injure neither one nor the other.

Now, as to the buildings at the capitals, there is a business side and a sentimental side. Go, for instance, to the town in which I reside, the capital of Wyoming, and ask for the State offices and you will find a magnificent capitol building, costing more money than is asked for to build this United States building. You will find all the State officers comfortably and safely lodged therein. If you ask for the county offices—it being a county seat—you will be directed to a building which cost nearly one-half as much as is proposed for this building. You will find all of the county and school-district officers comfortably and safely housed and papers covered at night by sufficient fireproof vaults. Ask for the city offices and you will find a suitable city hall and office building; you will find magnificent buildings for the fire companies and their apparatus, and, in fact, suitable offices and buildings for all branches of the service. The officers are housed and properly taken care of. You ask for the United States offices and you will find them scattered all over the city. some in third stories, some in second stories, some on ground floors, and perhaps some in basements and isolated rooms. You will find the United States land office, the register and receiver's office, in quarters otherwise sufficient, but which have no fireproof vaults. Their papers are subject to be destroyed any day or any night by fire.

Thus, in a country where the people think enough of themselves to provide for all branches of their Government proper buildings and proper safeguards for their papers and valuable documents, we find the United States with nothing at all. There are no permanent United States improvements. Not a dollar has ever been spent by the National Government inside of the State for permanent improvements for civil purposes. It seems to me that as a matter of safety for the records, as a matter of business, to save rent and expenses, the Government should provide a proper building in which to house its officers and documents. If we fail to do this, what are the people of that State to think of the paternal Government, when they, the people of that State, have gone forward in their infancy and comparative poverty and have built all these State and municipal buildings, while the United States would seem to have so little regard for the people of that State, and has so little confidence in the State, that it neglects to carry out by appropriations in the pending bill legislation that has already been had, in fact, because these buildings have been authorized by laws heretofore passed?

It seems to me we ought not to be confronted with the proposition, whenever we are asked where the United States buildings are, and where the United States is represented in Wyoming, to have to admit that, so far as tangible evidence is concerned, the United States has not yet been apprised of the fact that the State of Wyoming is in the Union.

Mr. CULLOM. Mr. President, I only desire to say a word in reference to this subject, pertaining to public buildings in the country especially.

It seems to me there is no question about what the duty of the Senate is in the premises, and so far as I am concerned I am perfectly willing to have a separate vote, if the Senators who are representing the States in which the capitals interested are located are desirous that the proposition shall be separately voted upon, or I am willing to vote to adhere to the appropriations inserted in the bill by the Senate in favor of all the buildings that are named in the measure.

I find upon inquiry of the chairman of the committee, the Senator from Iowa, that altogether the amount for appropriations involved in this matter in the pending bill is only $395,000, and I am informed by the Senator at least $100,000 of that amount can be taken off without at all interfering with the progress of the work. So it seems to me there is no question as to the duty of the Senate to adhere to those appropriations, so that the public buildings in these State capitals shall be constructed, and so that the work on the buildings which are in progress of construction shall be carried on. I hope that the Senate will give a united expression in favor of adhering to these items of appropriation. If $100,000 of the total sum is taken off it will amount to only $295,000. It seems to me it is a very small item to be disputed between the two Houses of Congress, when everybody knows that the construction of these public buildings has to be carried on in order to protect the work, and to get the buildings completed to accommodate the people.

In the case of the new States, where they have State capitals and no public buildings, I do not think Congress ought to hesitate a moment in allowing a reasonable appropriation, so that the work there can be begun.

The VICE-PRESIDENT. The Chair understood the Senator from Idaho [Mr. DUBOIS] to agree to the suggestion. Is that correct?

Mr. DUBOIS. I prefer to have a separate vote. I am for the others, and will vote for them very cheerfully. My colleagues on the floor representing the new States agree with me, I think, that under the circumstances, as the question of buildings in their State capitals occupies a peculiar position, we will desire a separate vote, all of us being willing and anxious to vote for the other appropriations and will do so.

Mr. SEWELL. I do not think the Senators representing the new States ought, on reflection, to ask for a separate vote. It looks like they will get through their matters, and we will be left. I shall be obliged to move to amend the motion by putting the others on.

Mr. VEST. We can not hear what the Senator from New Jersey says.

Mr. SEWELL. I shall feel obliged to move to amend the motion, if the Senator will not consent to take a vote on the whole proposition.

Mr. DUBOIS. I will say to the Senator that if he prefers it we will vote on his proposition first. I can not see how it will jeopardize the other buildings in the least degree. If it does, then it will have the effect of defeating the proposition for our buildings. That must be the logical sequence.

Mr. SEWELL. Will the Senator from Idaho explain to the Senate the object of having a separate vote? I can not understand that.

Mr. DUBOIS. I can explain it very easily. Everyone admits the absolute justice of our claim, and the last Congress, as a matter of fact, appropriated money for the construction of these buildings in the new States, but the money has never been expended or the work carried on.

Mr. SEWELL. The State I represent has a stronger claim than that, as the original appropriation for the building I refer to was made before the Senator's State was admitted.

I wish to amend the proposition of the Senator from Idaho by including all of the other public buildings the appropriations for which have been disagreed to by the House of Representatives.

Mr. DUBOIS. I shall accept the amendment, if the Senator from New Jersey is so insistent upon it.

Mr. SEWELL. I think it is but right that all should be included.

Mr. CARTER. I hope the Senator from Idaho will accede to the request of the Senator from New Jersey [Mr. SEWELL] to incorporate in his motion all the public-building propositions provided for by the amendments of the Senate, to the end that there may be a vote to insist upon the primary proposition of the Senate.

Mr. CULLOM. I think that is the proper course, and the one more likely to secure a solid vote of the Senate.

Mr. CARTER. I hope the Senator from Idaho will accept that.

Mr. DUBOIS. I have accepted the suggestion of the Senator from New Jersey.

The VICE-PRESIDENT. The Chair submits to the Senate the question, Will the Senate further insist upon its amendments, the numbers of which will be stated by the Secretary?

The SECRETARY. Amendments in relation to public buildings, numbered 2, 3, 4, 6, 7, 8, 13, 15, 16, and 17.

The VICE-PRESIDENT. The question is on the motion of the Senator from Idaho [Mr. DUBOIS] that the Senate still further insist on the amendments the numbers of which have been stated.

Mr. DUBOIS. On that I call for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CULLOM (when his name was called). I have a general pair with the Senator from Delaware [Mr. GRAY], but I am satisfied that if present he would vote on this question as I do, and therefore I vote "yea."

Mr. DUBOIS (when his name was called). I will ask the Senator from New Jersey [Mr. SEWELL] whether I can assume that his colleague [Mr. SMITH], with whom I am paired, would vote "yea" on this proposition, if present?

Mr. SEWELL. Yes.

Mr. DUBOIS. Then I vote "yea."

Mr. GEAR (when his name was called). I am paired with the Senator from Georgia [Mr. GORDON], but being satisfied that he would vote the same way as I do upon this proposition if he were present, I vote "yea."

Mr. PASCO (when his name was called). I am paired with the Senator from Washington [Mr. WILSON], but understanding that he would vote "yea" if present, I vote "yea."

The roll call having been concluded, the result was announced—yeas 58, nays 0; as follows:

YEAS—58.

Aldrich,	Cullom,	McBride,	Quay,
Allison,	Davis,	Mills,	Sewell,
Bacon,	Dubois,	Mitchell, Oreg.	Sherman,
Bate,	Faulkner,	Mitchell, Wis.	Shoup,
Berry,	Gallinger,	Morgan,	Stewart,
Blanchard,	Gear,	Morrill,	Teller,
Brown,	George,	Nelson,	Turpie,
Burrows,	Gorman,	Palmer,	Vest,
Butler,	Hale,	Pasco,	Walthall,
Cannon,	Hansbrough,	Peffer,	Warren,
Carter,	Harris,	Perkins,	Wetmore,
Chandler,	Hawley,	Pettigrew,	White,
Chilton,	Jones, Ark.	Platt,	Wolcott.
Clark,	Lindsay,	Pritchard,	
Cockrell,	Lodge,	Pugh,	

NAYS—0.

NOT VOTING—31.

Allen,	Elkins,	Jones, Nev.	Smith,
Baker,	Frye,	Kyle,	Squire,
Blackburn,	Gibson,	McMillan,	Thurston,
Brice,	Gordon,	Mantle,	Tillman,
Caffery,	Gray,	Martin,	Vilas,
Call,	Hill,	Murphy,	Voorhees,
Cameron,	Hoar,	Proctor,	Wilson.
Daniel,	Irby,	Roach,	

So the motion was agreed to.

Mr. SEWELL. I would inquire whether the Senator from Iowa has submitted any further motion as to the sundry civil bill?

Mr. ALDRICH. I understood the Senator from Iowa to move that the Senate still further insist on its amendments which have been disagreed to by the House of Representatives.

Mr. ALLISON entered the Chamber.

Mr. CULLOM. The Senator from Iowa is now present.

The VICE-PRESIDENT. The Chair understood the Senator from Iowa to intimate that he would subsequently make the motion referred to by the Senator from Rhode Island [Mr. ALDRICH], but the motion is not pending.

Mr. ALLISON. I believe the motion of the Senator from Idaho [Mr. DUBOIS] covers all the amendments to No. 17, inclusive. I now move that the Senate insist upon the remainder of the amendments still in disagreement and ask for a further conference. Before the vote is taken I desire to have some expression of the Senate respecting amendments numbered 122, 123, and 124, in order that I may be either strengthened or weakened in what I understand to be the situation respecting those amendments.

Mr. FAULKNER. Mr. President, I shall only detain the Senate a moment in response to the request of the Senator from Iowa. I am very much surprised to hear from the Senator that there is any disagreement upon those amendments by the House of Representatives, as a bill which has been passed by the Senate and House of Representatives and is now in the hands of the President on this subject is the original bill of the House of Representatives which had been sent to the Senate, and the very question about which the other House disagrees with the Senate the Senate gave way to the House in conference upon that bill. The original bill provided—

That the Washington Gas Light Company of the District of Columbia is authorized to charge and collect, after the passage of this act, for illuminating gas furnished to and paid for by the Government of the United States, and other consumers in the District of Columbia, at the rate of not exceeding $1.

The Senate amended that by making the rate $1.15, and the conference report on it, which was adopted by both Houses, fixed the amount at $1.10 for private consumers, and yielded to the House in reference to dollar gas for the Government and for the District of Columbia. Therefore the Senate has in reference to this question agreed to the original proposition contained in the House bill as to the cost of gas for the District of Columbia and for the Government of the United States.

The conference report on the amendments submitted by the Senate conferees embraced the words "Government buildings," but for fear that that phrase would prevent the price for street lamps from being fixed at a dollar, the House conferees insisted upon striking out the word "buildings," using the words "United States Government and the government of the District of Columbia," which was agreed to by the Senate conferees. Therefore I can not understand, the Senate having yielded the entire question as to the particular subject in controversy, how, in the conference committee represented by the Senator from Iowa, those representing the House of Representatives should maintain a disagreement when the Senate is willing to yield to the original proposition of the House.

I desire also to submit this statement, that in the House bill the amount was fixed definitely at $1 per thousand cubic feet of gas consumed either by the Government or by the District, for this reason: Some members of the House conference were of the opinion that the plan of lighting the city of Washington was a mistake; that, instead of having the same number of street lamps we have now burning 6 cubic feet of gas per hour, we should have double the number of street lamps burning 3 cubic feet an hour, which would not cost any more to the city, but would diffuse the light more generally throughout the streets, especially on those streets where there are a number of trees; and for that reason they declined to fix any amount as to street lighting, except fixing it by the thousand cubic feet, which they fixed at $1 per thousand. That was another reason why the bill fixed definitely the amount to be paid per thousand cubic feet.

As to the repair and keeping in proper condition of the street lamps, the House conferees very properly said that was a matter that the District Commissioners have the right to control themselves; they have the right either to do it themselves or they have the right to lease it by contract to a third party, and the gas company has no right to complain one way or the other in reference to this subject. All they are required to do under this bill is to furnish the gas, which is paid for at a certain rate per cubic foot.

I will not add anything further, but will ask that there may be incorporated at the end of my remarks a table furnished to the Committee on the District of Columbia by the District Commissioners of the cost of street lights in 24 cities, including Washington, and I will state to the Senate that that table, which includes all the leading cities in the United States, shows that Washington is getting its light cheaper than any other city in the Union, except two, and those are Cleveland and Allegheny, where the cost of material is not more than one-fourth what it is here.

The table referred to is as follows:

Price of gas for the year 1893 in a list of 24 cities, being the same list adopted by the Board of Commissioners for the District of Columbia in its report made to the second session of the Fifty-first Congress in the year 1891.

Cities.	Gas burned per lamp per year.	Cost per M for gas used in public lamps.
New York	12,000	$1.53
Chicago	15,144	1.32
Philadelphia	19,402½	1.14
Brooklyn	11,700	1.74
St. Louis	14,000	2.64
Boston	15,312	1.07
Baltimore	20,000	1.16
San Francisco	17,272.5	2.28
Cincinnati	15,276	1.34
Cleveland	24,440	0.76
Buffalo	15,800	1.32
Milwaukee	*19,422	1.26
Newark	13,200	1.64
Minneapolis	13,200	1.18
Jersey City	12,957	1.54
Louisville	20,000	1.00
Omaha	20,000	1.25
Rochester	22,000	1.07
St. Paul	24,000	1.22
Kansas City	10,310	1.90
Providence	16,700	1.25
Indianapolis	10,000	1.50
Allegheny	14,400	0.70
Washington	18,000	0.94 1/16

* Average.

Mr. GORMAN. Will the Senator from West Virginia permit me to ask him a question for information?

Mr. FAULKNER. Certainly.

Mr. GORMAN. Do I understand the Senator from West Virginia to say distinctly that in this adjustment made between the Committees on the District of Columbia of both Houses, where there has been allowed $1 a thousand for gas for the use of the Government and the District of Columbia, that that is exclusive of the cost of the maintenance and repair of street lamps?

Mr. FAULKNER. I do state so most emphatically; and that the whole subject of the cost, including the cost of repair and keeping in condition the lamps, was fully considered by the conference committee; and the whole subject of the reduction of price to the Government from $1.25 to $1 in its buildings was included in the consideration of this question.

Mr. GALLINGER. Mr. President, a single word before this matter passes from the consideration of the Senate. I have served on the Committee on the District of Columbia during the entire five years that I have been a member of this body, and among the vexed questions which have troubled us at every session of Congress has been the matter of regulating the price of gas in the District of Columbia. We have given a great deal of consideration to it at the present session, and I am sure that every member of the committee congratulated himself, as I congratulated myself very recently, that we had reached a fair and just agreement on this question and that we probably would not be troubled with it in the near future again.

We have reduced the price of gas from $1.25 to $1.10 for private consumers and from $1.25 to $1 for the Government of the United States and for the government of the District of Columbia. It is a very large reduction, and it seems to me, after a very careful consideration of the matter, that we shall be doing ourselves and the gas company with which we are dealing an injustice if we undertake a further reduction than that which was made.

I desire to put on record my dissent from legislation such as is contemplated on this appropriation bill. Both Houses of Congress have recorded their verdict on this question. They have passed a bill that undoubtedly will receive the sanction of the President of the United States, and why, after Congress has given its time, and after committees of this body have given days and weeks to the consideration of this question, we should have it disturbed upon an appropriation bill, passes my comprehension. We have given to the subject what we claim to have been intelligent consideration; we have listened patiently hour after hour and day after day to the representations of all parties in interest; and we reached a conclusion that both Houses of Congress unanimously ratified. It does seem to me, in view of that fact, that this body ought to stand by the Committee on the District of Columbia and ought to instruct its conferees to insist that the conclusions reached in the bill which has passed both Houses of Congress should stand for the present as the law.

We went beyond that. At the request of the House conferees we increased the candlepower of gas from 24 to 25. I am inclined to think that in that bill the candlepower is perhaps higher than is required or given in any other city in the United States. We have done everything that we could consistently and properly do to relieve the people of this District and the government of the District and of the nation from the exactions from which it was claimed they were suffering because of this company, which they are pleased to call a monopoly. I am astounded, Mr. President, that after both Houses of Congress have recorded their votes, and I think upon the conference report without a dissenting voice, this question should be reopened and we should be asked to disturb it on an appropriation bill.

I do not know that the Senator from Iowa [Mr. ALLISON] desires that a vote shall be taken on this question; but if he does, I am prepared to move that it is the judgment of the Senate that the conferees on the part of this body shall insist upon keeping this matter at the same rate which is provided in the bill that has recently passed both Houses of Congress. Of course I shall defer to the Senator from Iowa in that matter.

Mr. ALLISON. Unless there is some objection in the Senate, as one of the conferees I shall take it for granted that the Senate does not now propose to reverse its action taken after so many months of examination.

The VICE-PRESIDENT. The question is on agreeing to the motion of the Senator from Iowa [Mr. ALLISON], that the Senate further insist on the remainder of its amendments disagreed to by the House of Representatives and ask for a further conference.

The motion was agreed to.

By unanimous consent, the Vice-President was authorized to appoint the conferees on the part of the Senate; and Mr. ALLISON, Mr. HALE, and Mr. GORMAN were appointed.

INDIAN APPROPRIATION BILL.

Mr. PETTIGREW. I present a conference report on the Indian appropriation bill. It is a final report. It is very important that it should go to the House, and I ask for its present consideration.

The report was read, as follows:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 6249) making appropriations for current and contingent expenses of the Indian Department and fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1897, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate numbered 70, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 64, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"That the Secretary of the Interior be, and he is hereby, directed to withhold any further distribution and payment out of the money derived from 35 per cent of the judgment in favor of the Old Settler or Western Cherokee Indians against the United States in the sum of $800,386.31, set apart for the payment of expenses and for legal services justly and equitably payable on account of the prosecution of said claim, until otherwise authorized by law."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 69, and agree to the same with an amendment as follows: Strike out, in line 9 of the matter inserted by said amendment, the word "ninety-eight" and insert in lieu thereof the word "ninety-seven"; and the Senate agree to the same.

R. F. PETTIGREW,
H. M. TELLER,
F. M. COCKRELL,
Managers on the part of the Senate.

J. S. SHERMAN,
CHARLES CURTIS,
GEORGE C. PENDLETON,
Managers on the part of the House.

Mr. LODGE. I understand that an agreement is reported upon the three amendments which went back to conference on disagreement. Two of those amendments, numbered 69 and 70, relate practically to one subject. The House conferees recede from their disagreement to one amendment and they recede from their disagreement to the other with an amendment. The other amendment, 64 I think the number is, relates to the Old Settlers' claims, so called. I desire a separate vote on amendments numbered 69 and 70, relating to schools.

Mr. CULLOM. That can not be done.

Mr. LODGE. Very well. Then I shall ask for a yea-and-nay vote on the whole report, which covers those three amendments, because—I will state my objection—the report substantially agrees to the Senate amendments to the House proposition in regard to sectarian schools. It reduces the time provided in the original Senate amendment from two years to one, but it practically leaves the whole matter open to be fought over again in the next Congress. It is really a concession to the Senate amendment, to which I have been opposed from the beginning, and therefore I am opposed to agreeing to this settlement of it. On that question I should like a vote.

Mr. CULLOM. I should like to inquire of the Senator from South Dakota whether this is the final report upon all the amendments which have not been disposed of heretofore?

Mr. PETTIGREW. It is a final report.

Mr. CULLOM. It closes up the bill if the report is adopted.

Mr. PETTIGREW. The Senate practically recedes from its amendment in regard to the Old Settlers' attorneys' fees matter and leaves the matter as it stands now—that is, with an amendment that the money shall not be distributed until further provided by law.

The House recedes from its disagreement to the Senate amendment in regard to schools, with an amendment to it which makes the time for finally disposing of the question of sectarian contract schools July 1, 1897, instead of July 1, 1898, as provided in the Senate amendment. Amendment numbered 70 simply inserts the word "*further*" after the word "*Provided*," which creates a subhead, and has no material effect so far as the merits of the bill are concerned. The House recedes from its objection to that amendment.

Mr. TELLER. We leave in the bill the declaration as to the policy of the Government to take charge of these schools in the future, so that it practically closes up the sectarian schools or the non-Government schools after the 1st of July, 1897. I do not think it leaves it open for further controversy. I think it establishes what is the policy of the Government in respect to the matter from that time on.

Mr. LODGE. It seems to me it does leave it open, but as it is impossible to get a separate vote on it, and we can only vote on concurring in the whole report, which is a final report, I shall not press the request for the yeas and nays.

The VICE-PRESIDENT. The question is on concurring in the report of the committee of conference.

The report was concurred in.

IMPORTED PARCELS AND PACKAGES.

Mr. SEWELL. I ask unanimous consent to call up the bill (H. R. 6259) to expedite the delivery of imported parcels and packages not exceeding $500 in value.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Finance with an amendment, to strike out all after the enacting clause and insert:

That articles, not merchandise intended for sale, not exceeding $500 in value, imported in packages not exceeding 100 pounds in weight, in vessels of the United States, may be specially delivered to and appraised at the public stores, and the entry thereof liquidated by the collector under such regulations as the Secretary of the Treasury may prescribe, and after such appraisement and liquidation may be delivered, upon payment of the liquidated duties under the bond provided for in this act, to express companies or other duly incorporated inland carriers bonded for the transportation of appraised or unappraised merchandise between the several ports in the United States: *Provided*, That not more than one such consignment to one ultimate consignee from the same consignor shall be imported in any one vessel: *And provided*, That the original appraisement of and liquidation of duties on such importations shall be final against the owner, importer, agent, or consignee, except in the case of manifest clerical errors, as provided for in section 24 of the act of June 10, 1890: *Provided*, That nothing contained in this act shall apply to explosives, or any article the importation of which is prohibited by law.

SEC. 2. That such express companies or other inland carriers shall be responsible to the United States under bond for the safe delivery of such articles to the ultimate consignee: *Provided*, That if any package shall not be delivered to the ultimate consignee by the express company or other inland carrier, and shall be returned to the collector of the port where such articles are entered under the provisions of this act within ninety days from the date of importation intact, the collector shall take charge of such package and dispose of it as unclaimed merchandise, and the duties, including additional duties, if any, under section 7 of the act of June 10, 1890, paid shall be refunded by the Secretary of the Treasury out of any moneys in the Treasury not otherwise appropriated; and the express company or other inland carriers shall be relieved of any liability therefor under its bond; and before any express company or other inland carrier shall be permitted to receive and transport any such articles they shall become bound to the United States in such bonds, in such form and amount, and with such conditions not inconsistent with law, as the Secretary of the Treasury may require.

SEC. 3. That articles transported under the provisions of this act shall be corded and sealed in such manner as shall from time to time be prescribed by

the Secretary of the Treasury; and the collector of the port of first arrival shall retain in his office a permanent record of such merchandise so forwarded.

SEC. 4. That such packages may be consigned to and entered by the agents of the express company or other inland carrier or steamship company, who shall at the time of entry state the ultimate consignee, and in all cases where a certified or other invoice is now required by law such invoice may be attached to or inclosed in the package, under such regulations as the Secretary of the Treasury may prescribe; and the delivery of such articles to the express company or other inland carrier shall not be delayed because of the nonarrival of the triplicate invoice, but the ultimate consignee shall be liable for any increased duty found due on reliquidation, if any, after receipt of said merchandise from the express company or other inland carrier or steamship company making entry under this act; and the provisions of section 2857, Revised Statutes, shall not apply to importations under this act.

The VICE-PRESIDENT. The question is on agreeing to the amendment reported by the Committee on Finance.

Mr. MILLS. I should like to have the bill explained. It seems to me to be a very important measure.

Mr. ALDRICH. The bill was reported from the Committee on Finance, and it is proposed to be amended upon the suggestion of that committee. The bill in its present form merely permits merchandise, not intended for sale, which is sent here by express companies, to be expedited. It does not change the law in any respect whatever as to appraisement of merchandise. It simply allows expedition in cases of merchandise, not intended for sale, forwarded by express.

Mr. MILLS. What is it intended for?

Mr. ALDRICH. For that very purpose.

Mr. MILLS. To be expressed where?

Mr. ALDRICH. Between this country and any other country.

Mr. MILLS. It relates to merchandise transported in bond?

Mr. ALDRICH. Merchandise transported under bond given by the express company. It has the hearty approval of the Treasury Department, and everybody else, I think, who has investigated the subject.

Mr. MILLS. I merely want to understand it. There is a law now in relation to transporting goods in bond.

Mr. BATE. What is the meaning of the provision that the express company shall be relieved from its bond?

Mr. ALDRICH. It can not be relieved except on the return of the goods. If the goods are not delivered to the ultimate consignee, if he can not be found, and the goods are returned to the collector of the port of original entry, then that provision applies.

Mr. BATE. In that event the company is relieved.

Mr. ALDRICH. That is all. It is not relieved in any other case. The bill is very carefully guarded.

Mr. BATE. And the Treasury Department approves the bill?

Mr. ALDRICH. Yes; it has the hearty approval of the Department.

The PRESIDING OFFICER (Mr. HARRIS in the chair). The question is on agreeing to the amendment reported by the Committee on Finance.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

Mr. ALDRICH. I move that the Senate request a conference with the House of Representatives on the bill and amendment.

The motion was agreed to.

By unanimous consent, the Presiding Officer was authorized to appoint the conferees on the part of the Senate; and Mr. ALDRICH, Mr. ALLISON, and Mr. VEST were appointed.

HUDSON RESERVOIR AND CANAL COMPANY OF ARIZONA.

Mr. PEFFER. I ask unanimous consent to call up the bill (S. 3167) to grant to the Hudson Reservoir and Canal Company of Arizona the right of way through the Gila River Indian Reservation.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported from the Committee on Indian Affairs with an amendment, in section 8, line 13, after the word "*Provided*," to insert the following proviso:

Provided, That the rights herein granted are upon the express condition that the grantee thereof, its successors or assigns, shall at all times during the continuance of the grant furnish the Indians located under its canal along said right of way with water sufficient for all domestic and agricultural purposes and purposes of irrigation, on such just and reasonable terms and under such rules and regulations as shall be prescribed by the Secretary of the Interior.

Mr. HILL. I should like to inquire who introduced that bill.

The PRESIDING OFFICER. The bill was introduced by the Senator from Kansas [Mr. BAKER] by request, and reported by the Senator from South Dakota [Mr. PETTIGREW].

Mr. PEFFER. From the Committee on Indian Affairs.

The PRESIDING OFFICER. From the Committte on Indian Affairs.

Mr. PEFFER. It has the approval of the Secretary of the Interior.

Mr. HILL. The bill seems to create a very great monopoly, and I was rather surprised to find it championed by the Senator from Kansas [Mr. PEFFER]. It needs some explanation to the Senate.

Mr. VILAS. What is the Calendar number?

The PRESIDING OFFICER. Eleven hundred and eighty-four is the Calendar number.

Mr. PEFFER. If it will relieve the Senator from New York——

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

Mr. PEFFER. Question.

The amendment was agreed to.

Mr. BATE. Is this a Senate bill? We know nothing of it over here.

Mr. HILL. Do I understand that the Senator from Kansas declines to explain this bill?

Mr. PEFFER. I do not know what the Senator from New York says. I only guess at it spiritually. I will say to the Senator, however, for his relief, that my colleague, Mr. CURTIS, in the House, called my attention to the bill and is very anxious to have it disposed of, so that it may become a law during the present session.

Mr. BATE. I ask that the bill be read again.

The PRESIDING OFFICER. The bill will be again read.

Mr. TURPIE. I object to the further consideration of the bill.

The PRESIDING OFFICER. The Senator from Indiana objects to the further consideration of the bill.

RHODA AUGUSTA THOMPSON.

Mr. PLATT. There are two pension cases on the Calendar, House bills, which I think there is special reason for passing at this session. I will ask the indulgence of the Senate to consider them now. The first is the bill (H. R. 6826) granting a pension to Rhoda Augusta Thompson, daughter of the late Thaddeus Thompson, a private in the Revolutionary war.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to place upon the pension roll the name of Rhoda Augusta Thompson, daughter of the late Thaddeus Thompson, a private in Colonel Lamb's regiment of artillery and in Capt. Joseph Thomas's company of artillery, and to pay her a pension of $12 per month during her natural life.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

MINOR CHILDREN OF PATRICK F. REYNOLDS.

Mr. PLATT. The next case on the Calendar which I desire to call up is one of peculiar merit and hardship. It is the bill (H. R. 6603) to pension the minor children of Patrick F. Reynolds.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to place on the pension roll the names of the minor children of Patrick F. Reynolds, deceased, late a member of Company H, First Connecticut Volunteer Cavalry, and to pay to their legal guardian the pension to which they would have been entitled under the act of June 27, 1890, had not the soldier left a widow surviving at the date of his death.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

WILLIAM SODEN.

Mr. VILAS. I ask the Senate to take up and consider the bill (S. 3059) granting a pension to William Soden, which has been reported by the Committee on Pensions.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to place upon the pension roll the name of William Soden, late a private of Company E, Twenty-third Wisconsin Volunteer Infantry, at $20 a month.

Mr. MILLS. The bill has been reported, I take it, by the Committee on Pensions?

Mr. VILAS. Oh, yes.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

HENRY PRINCE.

Mr. PUGH. I ask the Senate to take up and consider the bill (H. R. 1826) granting a pension to Henry Prince.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to place upon the pension roll the name of Henry Prince, late private in companies commanded by Captains Christmas and Spirey, Georgia Volunteers, Indian war of 1836, and to pay him a pension of $8 per month.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

Mr. QUAY. Mr. President——

Mr. PUGH. I also ask the Senate to take up the bill (H. R. 1827) granting a pension to Nancy B. Prince, widow of Elbert Prince.

Mr. HALE. I rise to a privileged report.

Mr. QUAY. Will the Senator from Maine pardon me for one moment? I wish to have passed a private pension bill.

Mr. HALE. I will yield to the Senator from Pennsylvania, but I must insist upon presenting a conference report when that matter is concluded.

The PRESIDING OFFICER. The Senator from Pennsylvania is recognized.

Mr. QUAY. At the request of my colleague [Mr. CAMERON], who is necessarily absent, I ask unanimous consent to call up the bill (S. 3141) granting a pension to Rachel Kern.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Pensions with an amendment, in line 8, after the words "Reserve Corps," to insert "at the rate of $12 per month"; so as to make the bill read:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension roll, subject to the provisions and limitations of the pension laws, the name of Rachel Kern, foster mother of James M. Allen, late corporal of Company D, Twelfth Regiment Pennsylvania Reserve Corps, at the rate of $12 per month.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

FRANCIS E. HOOVER—VETO MESSAGE.

Mr. GALLINGER. I desire to make a statement. Some days ago I gave notice that on June 3, after the routine morning business, I would ask the consideration of the message of the President of the United States vetoing the bill (H. R. 1149) granting a pension to Francis E. Hoover. I will say that I am very anxious to get an opportunity to call that bill up to-day, inasmuch as the claimant is moved by machinery and is utterly helpless. The committee are unanimous in their view that the bill ought to pass notwithstanding the objections of the President. I beg consideration at the earliest possible moment that I may ask that that bill be laid before the Senate.

PROPOSED RESTRICTION OF IMMIGRATION.

Mr. HALE. I submit a conference report on the naval appropriation bill.

Mr. LODGE. The hour of 2 o'clock having arrived, is it not in order that the unfinished business shall be laid before the Senate?

The PRESIDING OFFICER. The hour of 2 o'clock having arrived, it is the duty of the Chair to lay before the Senate the unfinished business, which will be stated.

The SECRETARY. A bill (H. R. 7864) to amend the immigration laws of the United States.

Mr. HALE. I ask that the unfinished business be temporarily laid aside, that the Senate may proceed with the conference report.

Mr. HILL. I desire to call the attention of the Senator from Massachusetts to the fact that this bill was temporarily laid aside and the contempts bill was taken up last night.

Mr. LODGE. It has to come up each day, I think, and be temporarily laid aside, so as to keep its place as the unfinished business.

The PRESIDING OFFICER. Under the rule it is proper that it shall be laid before the Senate at this hour. What is the pleasure of the Senate in regard to the bill?

Mr. HALE. I ask that it be temporarily laid aside.

The PRESIDING OFFICER. The Senator from Maine asks the unanimous consent of the Senate that the bill be temporarily laid aside in order that the Senate may proceed to the consideration of other matters.

Mr. HALE. Of a conference report.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

NAVAL APPROPRIATION BILL.

Mr. HALE submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 7542) making appropriations for the naval service for the fiscal year ending June 30, 1897, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate numbered 39, 42, 43, 44, 45, 46, 47, 48, 51, and 52, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 32, and agree to the same with an amendment as follows: In lieu of the word "two" inserted by said amendment insert the word "three"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 40, and agree to the same with an amendment as follows: Insert after the word "one," in line 24, page 49 of the bill, the following: "and not more than one"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 41, and agree to the same with an amendment as follows: Strike out in line 3 of said amendment the word "five" and insert in lieu thereof the word "four"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 49, and agree to the same with amendments as follows: Strike out, in line 5 of said amendment, the words "three hundred and fifty" and insert in lieu thereof the words "four hundred and twenty-five"; and add at the end of said amendment the following: "That if the Secretary of the Navy in any case shall decide to make a contract for the completed ship, including armor, and the lowest bid shall exceed a fair estimated price, allowing for the finished armor said average of $425 per ton, he shall accept none of the bids, but shall report the same to Congress on the first day of its next session: *And provided further*, That the Secretary of the Navy shall examine into the actual cost of armor plate and the price for the same that should equitably be paid to contractors therefor, and shall report the result of his investigation to Congress not later than January 1, 1897"; and the Senate agree to the same.

EUGENE HALE,
M. S. QUAY,
Managers on the part of the Senate.
C. A. BOUTELLE,
AMOS J. CUMMINGS,
Managers on the part of the House.

The PRESIDING OFFICER. The question is on concurring in the report.

Mr. CHANDLER. As I understand the report, the conferees on the part of the Senate have consented to three battle ships instead of two. I still adhere to my opinion that the third battle ship will not be advanced a single month or a single day by being authorized at this time instead of being authorized next winter. Two battle ships a year are all we ought to build, and we ought to build two each year for the next ten years. We ought not to overwhelm the contractors for armor with a great amount of work to-day and leave their establishments empty and idle to-morrow. The moment that we adopt this policy, when they have no work they come here and complain that the Government has induced them to build up the establishments, to put large sums of money in them, and they say, "Now, you are bound to give us work; you are under a moral obligation to give us work"; and they make that outcry notwithstanding we may have paid them enough for the work already done to repay to them every dollar of the whole cost of their plant.

Mr. GEORGE. I desire to ask the Senator from New Hampshire a question.

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Mississippi?

Mr. CHANDLER. Certainly.

Mr. GEORGE. How many establishments, navy-yards, or whatever you call them, are there in this country at which these ships can be constructed?

Mr. CHANDLER. There are only two concerns that now have the hydraulic press and the heavy machinery for shaping armor.

Mr. HALE. The Senator from Mississippi is asking about the construction of the battle ships.

Mr. CHANDLER. There are only two establishments that can make the armor. There are half a dozen establishments that could build the hulls of the ships. There are, I will say, half a dozen manufacturers of steel who could in nine months get ready to make this armor by getting their hydraulic press and some of their machinery from abroad. There is no doubt about that. There are only two establishments now fitted up, however, to make armor; but within nine months a third or a fourth establishment could get ready to manufacture armor.

I repeat, there is not the least need of authorizing a third battle ship at this time. But that is not my principal objection to the conference report. It is that the Senate conferees have consented to increase the price of armor which the Secretary of the Navy may pay from $350 a ton for finished armor, the amount recommended by the Senate Committee on Naval Affairs, to $425 per ton. The judgment of the committee was that the cost of the armor was $300 a ton. The allowance of the committee was $350 a ton. The conference report carries that amount up $75, from $350 to $425, which is an increased cost of the armor of each battle ship, assuming the quantity to be 3,000 tons, of $225,000.

Mr. GEORGE. An increased cost.

Mr. CHANDLER. An increased cost by the concession of the conference committee over the $350 a ton which by the decision of the Senate committee and the decision of the Senate itself was a fair price with a fair profit added. I do not believe that that concession ought to be made. I do not believe that we ought to pay the price which shall be paid under this conference report for armor.

I agree with the graphic statement made by the Senator from Georgia [Mr. BACON], that it is impossible to conclude that a steel ingot, which can be procured at the price of $17 a ton, and which is only hardened and shaped into great masses of armor to go upon a ship's side, can be increased to $425 a ton before it is placed upon the side of the ship. The price we are paying for armor is as much per pound as a highly finished gun costs. Take one of the most elaborately finished cannon of the Navy, which is bored and polished and made almost as carefully as a watch is made, and it does not cost more than $450 or $500 a ton. Here for these great masses of armor, which require heavy machinery to handle it, of course, but which is not difficult to fabricate, we propose to pay 20 cents a pound.

Mr. PLATT. May I ask the Senator——

Mr. CHANDLER. It is an extravagance that we ought not to commit ourselves to by adopting this conference report.

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Connecticut?

Mr. CHANDLER. I yield to the Senator.

Mr. PLATT. If we fix in the bill $425 as the maximum cost, does not the Senator believe that $425 per ton will be the cost? Does the Senator suppose that there will be any competition which will bring the price below that figure?

Mr. CHANDLER. Undoubtedly we shall pay $425, because there is no competition. There is a large profit in the armor at $425. The makers of the armor have already made armor for foreign governments at $300 a ton, and we propose now to better that price by $125 a ton, which is too much profit, when you consider the fact that we propose to give these two establishments the armor to build for three ships in addition to the contracts for two ships that have lately been made.

Mr. HAWLEY obtained the floor.

Mr. MITCHELL of Oregon. I should like to ask the Senator in charge of the bill a question.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. MITCHELL of Oregon. The question simply is whether any change has been made, and, if so, what, in regard to the place where the battle ships are to be constructed.

Mr. HALE. That is all left as the Senate fixed it.

Mr. MITCHELL of Oregon. It is as the Senate fixed it?

Mr. HALE. The House receded from all those amendments.

Mr. SQUIRE. In this connection, may I be allowed a question before the Senator from Connecticut proceeds? Has there been any change in the provision in regard to the construction of torpedo boats?

Mr. HALE. All those items are left unchanged.

Mr. CHANDLER. Mr. President, is debate going on upon the bill?

Mr. BACON. We are unable to hear anything the distinguished gentlemen say.

Mr. HALE. All the Senate amendments were left in regard to that matter. The House receded.

The PRESIDING OFFICER. The question is on concurring in the report of the committee of conference.

Mr. HAWLEY. I have been once recognized. I think I have the floor. Have I not?

The PRESIDING OFFICER. The Senator from Connecticut was recognized, and he will proceed.

Mr. HAWLEY. Mr. President, I am, I freely say, a good deal surprised by the tone of the remarks made by the Senator from New Hampshire, and I regret them, because his former very honorable experience as Secretary of the Navy will give an undue weight to what he has been saying. I am bound to suppose that he speaks without interest or prejudice. I certainly do. I have not a personal friend aside from the ordinary general friendly acquaintance with officers. I have no citizen friend who has any interest whatever in the Bethlehem works or in the Carnegie works, and none myself, direct or incidental. If the Senator from South Carolina [Mr. TILLMAN] were here I should make some remarks upon his intimation as to whether there were lobbyists in the Senate, and all that sort of thing.

Now, one question is, shall we get a contract at all if we make the price $425 per ton for armor? I am very glad that the conferees have brought back so favorable a report as they have done. I happen to know from a very thorough investigation what was the custom in Europe some eight or ten years ago, and an inquiry at the Navy Department shows me that it has not changed. No government in Europe manufactures armor. The Senator from New Jersey [Mr. SMITH] has proposed that the Government shall erect and build an establishment for the manufacture of its own armor. The experiment has been tried. We have not discussed any proposition on this subject for the last two years that has not been discussed by the European governments and the experiments have been mostly tried. In the manufacture of guns the British Government entered into a sort of partnership with Gray, Armstrong & Co. some years ago. After going on with it a while the Government went out of it and paid $325,000 to get rid of the whole concern. Some of them do make some guns, but they make contracts usually for the rough parts, as we do, and have them finished in finishing establishments where the fine finishing is put on, and the pieces are assembled.

I asked the Navy Department, with all these contracts made by European governments with private concerns, as we have been doing here, if there had not come to be a market rate; whether there was not a price which was understood from the experience which has been had to be a reasonable one. We have a bureau of information with some very bright, active men in it; we have the attaches of our legations abroad, whose business it is to secure all the information of this sort which may be useful to our Government. The Navy Department tell me that the bids on the last award of contracts made they considered a fair average price, and the lowest price to be received by one of these manufacturers is the one to be received by the Bethlehem works for $525 a ton.

I suppose there are some Senators here who have been to these establishments, and who have seen and been able to judge from their own inspection what must be the enormous cost of such a plant. The Bethlehem Company claim to have a plant for this work costing $4,000,000; and they say that they should have a 5 per cent dividend at least; that they should have what is usual in many establishments, a 10 per cent allowance for the repair and replacement of their machinery and of their great machine tools. I really do not believe that fairly we can expect them to make this armor under perhaps $500 per ton.

I have spoken not only of the enormous plant, the waste, and the reasonable dividends to be made upon the investment, but there is another very large element which every business man and every experienced Senator understands perfectly well, and that is the element of uncertainty as to the number of tons they will be allowed to make. Whenever the concern is stopped, whenever it is without a Government contract, the waste is going on, the pay of the men to keep the machine tools in order, the pay of many workmen who must be kept within reach somewhere ready for the renewal of business.

You could not get up a very general competition upon this matter if you embraced the whole civilized world, because there are no concerns that are going to spend three or four million dollars simply to go into a general competition. No capitalists can be assembled anywhere who will advance such an amount of money without quite a reasonable probability—yes; you might say an absolute certainty—that they would be able to get some business which would be sufficient to compensate them for their outlay; for what other use is a 125-ton hammer, such a one as there is at Bethlehem, except perhaps occasionally for making steel shafts or propellers? There is nothing else for which such a hammer can be used, I believe, except it may be used in the manufacture of some of the larger parts of a great engine. But the money invested in such establishments is practically idle capital if they can not get contracts from the Government.

I am willing to vote for this report, but I protest against the idea that $300 or $350 is sufficient compensation for armor. I will inquire of the Senator from New Hampshire [Mr. CHANDLER] what was the contract made with the Russian Government by the Bethlehem concern?

Mr. CHANDLER. Two hundred and fifty-nine dollars.

Mr. HAWLEY. Two hundred and fifty-nine dollars. That is no guide in the world. I am assured by the representatives of that concern, and every great steel man in the country will tell you the same, that there was a large loss to them upon that contract; but they plunged into the field in competition with European manufacturers, determined to make an impression, if possible, because there was a possibility of their being compelled to lie idle here, and it is one of the commonest things in the history of great enterprises that they will carry on their works at a decided loss for a time rather than to allow the machinery to rust and throw their skilled hands out of employment. Now they are in what may be called fair competition; and they have been awarded the manufacture of some armor at a cost of $525 per ton.

As I have said, I am willing to vote for the conference report.

Mr. GEORGE. Mr. President, the first thing that strikes one who is unacquainted with the arcana of this matter is this, that steel, which costs the manufacturer $17 a ton, is turned out to the Government at $425 a ton in the shape of armor plate. I believe that is so.

Mr. HAWLEY. Not a plate exactly. It is a curved armor.

Mr. GEORGE. A curved plate?

Mr. HAWLEY. It is in the curving form of armor plate.

Mr. GEORGE. I want to call the attention of the Senate to the very extraordinary pains which the committee have taken in making this report to secure for these contractors the sum of $425 per ton.

The report is rather a curious one, and I will read it and explain it to the Senate. Before I do that, though, I had as well call the attention of the Senate to a fact pretty well known—that there are only two establishments in the United States which can make this armor plate, and therefore there will be no competition, and unless the United States is protected either by the action of Congress or by the action of the Secretary of the Navy there is no protection at all to the Treasury. Now, I will read from this report, so that the Senate may understand it:

> That if the Secretary of the Navy in any case shall decide to make a contract for the completed ship, including armor, and the lowest bid shall exceed a fair estimated price, allowing for the finished armor said average of $425 per ton, he shall accept none of the bids.

Mr. President, on its face that would appear to be fair. If it had provided that upon the making of bids and examination of the contract he thought no contract was low enough he should not accept the bids, that would be right; but the committee are particular to exclude from him and from his consideration the question whether $425 per ton is a fair price or not.

Then I want to call the attention of the Senate to the remainder of the amendment, which shows the wrong of thus excluding from the consideration of the Secretary of the Navy, when he comes to determine whether he will accept the bid or not, the question whether $425 is a fair average price or not. The committee seems to have been of the opinion that the true, equitable price of this plate was unknown; and in what I am going to read to the Senate they require the Secretary of the Navy to inquire into that; but all his information, however much he may get, is excluded from his consideration when he accepts this bid, for the report says:

And provided further, That the Secretary of the Navy shall examine into the actual cost of armor plate and the price of the same that should equitably be paid to contractors therefor, and shall—

Do what? Shall deduct it from the $425, if he shall believe that is too much? No. But if he reaches the conclusion that $300 per ton, as the Senator from New Hampshire [Mr. CHANDLER] says, is a fair price, he must nevertheless go on and make the contract at $425 per ton. I will read the whole sentence:

And provided further, That the Secretary of the Navy shall examine into the actual cost of armor plate and the price for the same that should equitably be paid to contractors therefor, and shall report the result of his investigation to Congress not later than January 1, 1897.

Mr. GORMAN. Will the Senator from Mississippi permit me to interrupt him?

Mr. GEORGE. Certainly.

Mr. GORMAN. The Senator from Mississippi will not understand this amendment as being one framed by the conference committee. This amendment was reported from the Committee on Naval Affairs and adopted by the Senate. It was not the verbiage at all of the conference committee.

Mr. GEORGE. I am reading from the conference report.

Mr. GORMAN. That amendment is the action of the Senate, and no change whatever has been made in that language by the conference committee. This was the amendment offered by the distinguished Senator from Georgia [Mr. BACON] from the Committee on Naval Affairs.

Mr. GEORGE. What was the action of the Senate?

Mr. GORMAN. The provision as adopted was for $350 a ton.

Mr. GEORGE. It makes a great deal of difference, Mr. President, whether it is $350 a ton or $425. So the way the thing stands now is this: The conference committee acknowledged they do not know, and it is not known, what is a fair and equitable price for this armor plate. They fix it at $425 per ton, and they require the Secretary of the Navy to reject a bid which appears to be too high on all other parts of the contract, but he must stand by that. It is for that reason that I think we ought to reject this conference report.

Mr. PETTIGREW. Mr. President, I judge from what was said in the Senate a few days ago that the situation in regard to this armor-plate controversy is about this: There are two establishments which make armor plate in this country, the Carnegie Works and the Bethlehem Steel Works, and those two plants are in a combination, so that there is no competition. They make a price that they will charge the Government, and they bid for a foreign contract, at $259 per ton while they charge us four hundred or five hundred dollars per ton for the same plate.

It is said that in bidding for this foreign contract they put the price so low as to be compelled to make the plate at a loss. I believe that it is practically stated that they did that because they saw foreign armor-plate makers were plundering the foreign governments by charging $550 per ton, and they went over there and made their bid in order to get in. Having got in, the price was at once raised to $525 a ton for foreign nations, and they got part of it. This is urged as a reason why we should pay this same outrageous price.

The Committee on Naval Affairs, it appears, have investigated the cost of armor plate, and they find it can be made at a profit for about $300 a ton, and they reported for the payment of $350 a ton, so that there should be a profit to those people who, it is also admitted, out of the first contracts which they received from this Government, made a profit which paid for their entire plant. Now, Senators stand here and say we must give them $425 a ton, so that they shall be sure to reap a profit upon a plant which we have bought and presented to them. That is about the proposition.

It seems to me, in the face of these facts all the way through, that all the Senate can do under the circumstances is to refuse to build any battle ships at all, and yet the astonishing proposition is brought in here by our committee that we shall increase the number of battle ships from two to three and give the armor companies $75 more per ton as a gratuity. In what kind of a position is the Republican party going to be in the next campaign, taking these admitted facts? Who is going to defend this sort of thing on the stump? It will be heard at every schoolhouse throughout the West. The Populist party will use what has been said on this floor here, and how are we to go forward and undertake to defend it? I am not going to do it.

It seems to me that the Senate ought to recede from the position, the outrageous and astonishing position, in which we are placed, and ought to refuse to buy one pound of armor plate. Have we not an antitrust law? And yet we propose to be the third party in a trust and to reach our hands into the Treasury of the United States and take out $75 a ton, or $225,000 on 3,000 tons, more than our own committee has reported to the Senate is a fair profit.

I can not vote for a conference report on the naval appropriation bill which justifies any such transaction. I think we ought to reject the report and send the committee back and see if it can not make a better bargain with the other House.

Mr. BACON. Mr. President, I can scarcely doubt, if the Senate fully appreciate the exact situation, that they will fail to agree with this report. If it were the fact that these ships were now about to be constructed and no delay in the decision of this question were practicable, then, rather than decide in a manner which would do injustice to those contractors, we might with propriety go forward and agree to pay an amount larger than we thought was a proper amount, but the fact exists that it is not necessary in order that these ships shall be constructed in due time that the question of the price of this armor shall be settled at this session of Congress.

We are in this remarkable position. The Committee on Naval Affairs of the Senate sat for months engaged diligently in the effort to ascertain what was the proper price to be paid for this armor. Those who are most directly interested in the matter had it in their power to inform us what was the cost of this armor. They had the information. It can not be conceived that these great works are blundering in the dark and do not know what is the cost of the armor which they are furnishing to the Government; and yet, in face of the fact that the Government, through a committee of this Senate, was diligently seeking to get that information, with that information in their possession and with these two companies by their principal officers before that committee giving testimony, that information is withheld from us.

Mr. SQUIRE. Will the Senator allow me to ask him a question?

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from Washington?

Mr. BACON. Yes, sir.

Mr. SQUIRE. Does the Senator state to this body that the committee are absolutely without facts as to what the armor costs?

Mr. BACON. I mean to state, in reply to the inquiry of the Senator, that so far as any information given by the proprietors of those two plants is concerned we are absolutely without information as to the cost of the armor.

Mr. SQUIRE. May I inquire what information the committee had?

Mr. BACON. It is set out in the report. There is a great mass of information, from which various conclusions may be drawn, and from which conclusions were drawn by the committee.

Mr. QUAY. Will the Senator permit me?

Mr. BACON. I hope the distinguished Senator from Pennsylvania will permit me to answer the question asked by the Senator from Washington before he interrupts me. I shall then be very glad to respond to what he intends to ask me, if I can.

There was, as I say, a great mass of information. This examination as to the cost of material, the cost of labor, and the cost of plant occupied months, but from that information only general conclusions can be drawn. No specific, direct, accurate, absolute figures can be stated as those which are taken from the testimony. But we had this much of direct testimony: There is at the Bethlehem works and at the Carnegie works an officer of the Navy detailed, whose duty it is to inspect this armor, and while they have not detailed minute information as to the cost of processes, etc., as educated men, familiar with this kind of work, they have had very general opinions formed, and upon a careful consideration of the question propounded each one of these officers has stated to the committee, and through that committee to the Senate, that he does not believe that it is possible that that armor could have cost those two companies exceeding $250 a ton for material and labor, not including the question of interest on the plant.

In that immediate connection I want to call the attention of the Senate to this significant fact: Not only have these companies failed and refused to give us information as to what is the cost of this armor, but in the face of the fact, known to them, that this testimony had been given by these two officers that the armor did not cost exceeding $250 a ton, they were still dumb and have never denied or sought to prove the contrary.

Mr. President, what is the situation in view of that fact? I agree with the distinguished Senator from Connecticut [Mr. HAWLEY] that we ought to deal liberally with these parties, and I want to deal liberally with them; I want them to have what would be considered by everyone as a liberal profit; and, in order to do that,

in order that liberality on our part may be properly exercised, it is due to the Government that the gentlemen who compose these companies should give to Congress the information which they have, and should let us know what is the cost of this armor.

Mr. SQUIRE. I desire to still further inquire on this subject of the cost of armor whether the committee—I understand the Senator from Georgia was a member of the committee——

Mr. BACON. I was.

Mr. SQUIRE. Therefore I suppose I am quite right in addressing him for information, not only for myself, but other Senators on the floor. I would ask him whether the committee took into consideration, in their endeavor to ascertain the real and full cost of this armor, the cost of what are called running expenses in manufacturing—that is to say, the cost of the power, the cost of the office help, the light, and everything else which goes into the production of a great manufacturing plant.

Mr. President, in explanation of this question perhaps I may be permitted to state that for many years of my life I was connected with a very large manufacturing institution, an establishment for the manufacture of arms for the Government, and I know how important it is that those items should be considered in getting at the real cost.

Mr. BACON. I hope the Senator will make his argument in his own time. If he has any distinct question to ask me, I shall be happy to answer it, but it is not exactly the thing——

Mr. SQUIRE. I am not endeavoring to make a speech, but I should like to know whether the Senator has taken the cost of the items which I have mentioned into consideration.

Mr. BACON. If the Senator asks me that question I shall try to answer it.

It is not pretended by the committee that we, in suggesting $350 a ton, have fixed a price which, upon a consideration of all the items of expenditure is deemed by us as the exact, accurate price; but upon a survey of all the testimony, upon a consideration of all that could be learned from the owners of this property and from others with the information within their power to give as to what is the cost of this armor, if they will not give it, we suggest that Congress shall fix it at this price, not as the absolute, final determination of the matter, but fix it with a limit beyond which the Secretary of the Navy shall not make a contract, with the view that if he can not make a contract within that figure that fact shall be reported to Congress in order that Congress within the time, which will be ample, may make the proper investigation and see what is the proper price.

Mr. President, I declined to yield to the Senator from Pennsylvania [Mr. QUAY] at a particular time. I shall be glad to hear now what he wished to ask me.

Mr. QUAY. I merely wished to put the question to the Senator which he has answered in reply to the Senator from Washington [Mr. SQUIRE] as to statements before the Committee on Naval Affairs as to the cost of the labor and material in the production of a ton of armor, and to say that the contention of the armor manufacturers is that they ought not to be held to a mere ordinary measure of profit upon the capital invested and the labor and material until they have received back the money invested in the plant at the request of the Government. That is the entire question involved here. The Senator from Georgia holds, I think, with me, that this manufacture of armor can not be treated as though it was an ordinary branch of business, for the product of which there were consumers all over the world, and which was free to all. The fact is that this plant can produce nothing but armor plate, and there are no customers for it but the Government. The plants were established at the request of the Government, and with the understanding that the price of the armor was to be upheld until they had got back the money invested.

Mr. BACON. I desire to say, what I have not only once said, but twice, and probably three times said, that I quite agree with the proposition of the distinguished Senator from Pennsylvania [Mr. QUAY], which had been previously announced by the Senator from Connecticut [Mr. HAWLEY], that we ought to deal liberally with these parties, and that they ought to be allowed a profit greater than the profit which ought to be considered sufficient for ordinary enterprises.

Mr. QUAY. Mr. President——

Mr. BACON. I ask the Senator to excuse me one moment before yielding further.

I say, before we can do that, before we can understand, before we can determine what is a liberal profit, we must know the cost. How can it be estimated what is a liberal profit if the cost is concealed? These parties have it in their power to give us the information and will not do so.

I have been supporting the proposition for four battle ships. I want to see a navy which will be a protection to us, and which will stand in readiness in a case of an emergency demanding that protection. I know that in this day especially a navy can not be improvised, and for that reason I am in favor of proceeding as rapidly as possible in the construction of an efficient navy. But I am here to say now that if this proposition is to be carried through, if the Government of the United States is to be called upon to make contracts for armor for the ships at these prices, which I consider to be exorbitant, then I will not only go down to three battle ships, but I will stand with those who are willing to vote for only two battle ships. If the emergency is such or the conditions are such that we have to make contracts in the dark, with the absolute refusal of those parties to tell us what is the proper price to pay for armor, then I shall not vote for the number of ships that I think ought to be constructed under proper circumstances, and I shall only vote for those which I conceive to be absolutely necessary and without which we can not afford to do.

Mr. GEORGE. Let me ask the Senator from Georgia a question. Did the parties when they were before the committee know that the committee were inquiring into the cost of making the armor?

Mr. BACON. They did know it in the most absolute and unqualified manner that it is possible for information to be conveyed to man.

Mr. GEORGE. And they declined to give the information?

Mr. BACON. Yes, sir; they absolutely failed to give us any information, and we are standing here to-day with the proposition that ingot steel, which costs $17 a ton for both material and labor after it has been cast and is ready to be forged into armor, and which subsequently has incorporated into it nothing except that which it derives from the Harveyizing process, is to be converted into a product at the enormous price of $425 per ton by the processes through which it is put by these companies, and they will not tell us how much of that is the actual cost and how much is profit, and we are proceeding in the dark.

Mr. SQUIRE. Will the Senator tell me what is the reduction proposed from the price formerly paid?

Mr. BACON. It is only about $75 a ton.

Mr. SQUIRE. It was $500 a ton before?

Mr. BACON. Five hundred dollars a ton was paid before for what they did, and the extra processes and the material furnished by the Government ran the price up to over $600 per ton. It is a fact that an iron plate not so long as the desk at which the clerks sit, taller or wider, as you may term it, will cost from $25,000 to $30,000—a piece of iron.

Whenever we are called upon to pay such exorbitant prices, those who demand them should give us the information and should not say, "You must pay this sum, or we demand that you pay this sum, and at the same time we will not let you know how much profit we are to make upon it." We concede that they ought to have liberal profits, but how is it possible to estimate the amount of profit without knowing the cost?

Mr. SQUIRE. Does the Senator from Georgia charge that there is any collusion between the firms engaged in this business, or any combination or trust?

Mr. BACON. We went all over that matter the other day when the distinguished Senator from Washington was not present. If he will turn to the RECORD of last Wednesday he will see full statements on that question. I desire to say, though, on this question, that of course I take no part in any charges of impropriety on the part of anybody, and nothing that I have said can be construed into anything of the kind. It is purely a business matter. But I do not think these manufacturers are dealing with the Government in a proper business way. It is true they are entitled to the consideration of the Government. It is true they have gone forward and put up a plant for the purpose of constructing the armor plate for the Government, and it is further true that they can not look to any other parties, possibly, except foreign governments, for whom they make some of this armor. But practically in this country at least they can look to no other parties for patronage than the Government. Therefore, they are entitled to the consideration of the Government. They are entitled to be given the work, if they will do it at proper prices, and I think they are entitled to compensation exceeding in liberality the compensation given to parties engaged in ordinary enterprises. But, I repeat, the whole scope of the contention is this: The contracts for the construction of the hulls of the ships can proceed. They will not be delayed by this.

The report of the committee shows, from the evidence of distinguished officers who were before it, that it is not necessary that the contracts for the armor shall be given out until next winter. If within proper limits a contract can be made prior to that time, so that the manufacturers will know what work they will have ahead, well and good. But if they decline to give us information, and if contracts are only to be made at prices which we think are too high, is it too much to ask that the Government shall wait until next winter to determine this matter? The amendment from the committee simply provided that if the Secretary of the Navy could make contracts at $350 per ton no further communication with Congress on the subject was needed; but believing, as we

did, that that was an ample price, we named that sum, and said that if he could not get armor at that price he should report to Congress in order to make further investigation.

In closing I will simply add one thing in respect to the question whether the manufacturers were informed of the fact that we were charged with the duty of inquiring as to the cost of the armor. They not only knew that we were inquiring into the cost of the armor for the purpose of determining what is a proper price for the Government to pay, but they knew that we were inquiring as to the cost of armor, because the Senator from New Jersey [Mr. SEWELL] had introduced a bill under which, if enacted into law, the Government would erect its own plant and make its own armor. So the parties were upon the most distinct notice that the purpose of the committee was to get the most accurate information which was obtainable. In the face of that knowledge we stand to-day before the Senate to say that the committee was absolutely unable to get from those men anything which would give us information upon which we could base a legitimate and proper and accurate conclusion.

Mr. QUAY. Before the Senator from Georgia takes his seat I desire to ask him a question for information. I understand that the president of the Carnegie works and the president of the Bethlehem Iron Company were before the committee. Were they asked what was the cost of the armor?

Mr. BACON. They were asked a number of questions, all of which were asked for the purpose of eliciting information on that point.

Mr. QUAY. Why was not a straightforward question put to them? Why could not the committee put the straightforward question to them, "What does the armor cost you per ton?" I ask for information. I do not know.

Mr. BACON. I understand that, and if the Senator will take the evidence he will find a number of questions asked of Mr. Wharton, to which in each instance he replied: "That is a matter of detail about which I do not know. You must ask some one else." If the Senator will examine the evidence he will not be in any doubt that the committee not only sought diligently to ascertain from the gentlemen what was the proper cost of the armor, but that the gentlemen themselves could be in no doubt whatever that such was the desire of the committee.

Mr. QUAY. The desire of the committee could have been manifested by its asking the question, it seems to me.

Mr. BACON. The testimony is rather lengthy, and I can not stop to read to the Senator several hundred pages of testimony. It is printed, and I presume the Senator has a copy in his desk. If the committee has failed in its duty to propound proper questions I have no doubt he can point it out. The committee is not composed of gentlemen of the inexperience of myself, but contains among its number the distinguished Senator from Maine [Mr. HALE], who has been so long connected with the committee, the distinguished Senator from New Hampshire [Mr. CHANDLER], who has not only long been a member of the committee, but was formerly Secretary of the Navy, and the Senator from California [Mr. PERKINS], familiar with shipbuilding, and others, and any man who will examine the testimony must come to the conclusion that the committee did all it was proper to do.

I recollect one question put to Mr. Wharton was what dividends were paid, and he declined to tell. What is the use of pressing further when questions are asked and a man says "I do not know; that is a matter of detail. To find that out you must go to somebody else." What is the use of pressing further if, when a crucial question is asked, by which the committee could form some conclusion as to what is the cost and fair profit, such as "What dividends does your company pay?" the witness declines to tell?

Mr. SQUIRE. Mr. President, I do not desire to make any extended remarks on this subject, but on the very point which has come up during the interlocutory discussion this morning I desire to say a very few words.

I do not think the committee can blame manufacturers for refusing to disclose the secrets of their business. I do not think the committee has a right to exact from the company information which the company does not see fit to publish to the world.

Mr. BACON. As the distinguished Senator from Washington interrupted me several times, will he pardon me right here to make a suggestion?

Mr. SQUIRE. I should like to finish the statement, if the Senator will permit me.

Mr. BACON. Very well.

Mr. SQUIRE. Often manufacturers have obtained peculiar processes that reduce the cost as compared with the cost of a similar process conducted by like institutions throughout the world, and they do not care to impart this information to all those engaged in similar business. It is not right that they should be required to lay bare all the secrets of the business establishment.

I remember very well that during the late war, and near the end of it, there was a commission (I think Robert Dale Owen was a member of it; it is sometimes called the Robert Dale Owen Commission) appointed to make an investigation as to contracts in regard to the cost of small arms which were being purchased by the United States Government from contractors with the United States, and that an endeavor was made to ascertain the cost of the manufacture of the separate parts and the cost of various processes. When various manufacturers were called upon to give information they declined, I believe, in all instances except one that I happen to think of. Perhaps there were others, but I recall but one instance where a manufacturer was disposed to give the commission the information as to the exact cost in detail of the various processes. It so happened that in this case the manufacturer saw fit to make such a statement, and he was given the benefit of his frankness. But the others refused to do so, and nobody charged that they were wrong, nobody proposed that the Government should refuse to give them contracts for that reason. They received their contracts from the Government just as they had before.

It seems to me unreasonable that we should exact from these manufacturing institutions details as to the cost of their various processes. It is not fair to them. It is right for the Government to patronize these great institutions. They are of great service to the Government in time of peace, and particularly so in time of war. They save the Government a large outlay which would be necessary to establish plants, whether for the manufacture of armor plate or of great guns or of other instruments of war. I believe it is to the advantage of the Government to encourage private parties and private companies to engage in the manufacture of materials of war. I believe it can be done far cheaper. So far as my information goes, and it has been extensive in some directions in connection with the manufacture of war material, such material can be constructed at far less cost by private individuals and by private companies than it can by the Government, when you come to take into consideration the cost of the plant, the deterioration, the improvements constantly to be introduced.

The Senator from Connecticut [Mr. HAWLEY] referred a few moments ago to the 125-ton steam hammer at Bethlehem. I was in Bethlehem a few days ago. I have no personal or private interest whatever in the work, of course, as the Senator from Connecticut said he had none; but I visited the place a few days ago, and my attention was called to the fact that this steam hammer was absolutely idle. It cost thousands and thousands of dollars. It is not used. Why? Because another process has been adopted by which the work of forging is conducted to better advantage, and of course the last improvement was introduced expressly with the view to the manufacture of these plates, which we saw forged on the day the Committee on Naval Affairs visited that great establishment.

I believe it to be for the interest of the Government to promote the manufacture of its war material by private persons rather than that the Government should engage in its manufacture. Let the risk be taken by these people. Let them have a profit. The time will come soon enough when they will have to go out of business. They can not keep the institutions running forever at this rate, and some allowance must be made for the fact that the plant after a time will become of less value. I believe it is right for the Government to stimulate not only the building of ships by private parties, but the building of ships' armor and the building of great guns. I wish that more of our guns for the Army and Navy could be supplied by private companies or persons. It would be of advantage.

When we come to consider the question of cost we must regard all elements, not only the cost of material and labor, but we must take into consideration all that comes under the head of running expenses. These running expenses are ordinarily figured at from 25 to 50 per cent on the cost of labor and material. Take $250 as the cost, and say 40 per cent, which would be $100, and that would make $350, without considering the question of interest upon plant or any profit to the manufacturer.

Mr. BACON. Will the Senator from Washington allow me to make a suggestion?

Mr. SQUIRE. Let us be reasonable, and——

The PRESIDING OFFICER (Mr. BURROWS in the chair). Does the Senator from Washington yield to the Senator from Georgia?

Mr. BACON. I wish the Senator would pay me one-fifth of the time he took from me, in order to permit me to say a few words at this point.

Mr. SQUIRE. Very well; I yield.

Mr. BACON. I wish to suggest, in reply to the argument of the Senator from Washington that we ought not to require any manufacturer to disclose his secrets; that while it is eminently true in a case where there is competition, it is not true where there is no competition. In the case of an ordinary manufacturer who deals with the Government, if the Government does not like his price or his work it can go to somebody else; but in the case of a business recognized as a monopoly, recognized as one established with the expectation that it would be a monopoly, the most

open dealing is required on the part of the party who deals with the Government in order that the Government may see what is a proper price to pay, so that with a knowledge of the cost a proper liberality may be exercised in determining what price shall be paid for the material. There is no competition in this case.

Mr. SQUIRE. I agree with the Senator if it is really true that there is no competition whatever and that the plant is confessedly under a Government subsidy. But is such the admitted fact? Is the latter point proven? No, sir. It is an assumption not warranted.

Mr. BACON. One other word, if the Senator will permit me. He and I were both at the works together. There is no secret there. There is nothing intricate there. The distinguished Senator says he is familiar with machinery. He will bear with me that the machinery there, while extremely ponderous, is not intricate and not delicate. It has to be accurate, of course, but it is nothing like the machinery which is used in the building immediately alongside where guns are made, and nothing like the accuracy or delicacy of work is required in the one that there is in the other.

Mr. SQUIRE. We all know that it is needful to have some special knowledge and skill to conduct these great operations. We all understand that it takes a high class of talent. While the Senator says these operations appear to be simple, there are many of them the result of a great deal of study. It is very simple to see it done. It is a good deal like the problem of making an egg stand on its end. It is easy after you know how. I believe it was said that it was very easy for Columbus to discover America after he had done it. When somebody referred to the fact, Columbus asked him to stand an egg on end. He could not do it. Columbus just tapped the end of it. It stood up. Then it was said, "That is nothing." It is easy to do a thing after you know how. So it is very easy, apparently, for us to witness these operations and say how beautiful and simple they all are, but it takes a great deal of study, a great deal of time. There is a great loss of time, and oftentimes when money has been expended it is practically of no value, because the work has to be done all over again.

What did we see when we visited that establishment? The Senator from Georgia will remember that we saw one of those plates, which cost $25,000, thrown aside, not accepted by the Government. That is a little item—$25,000. One of the plates had been thrown aside and was not paid for; so often these incidents occur. I do not know that there are many such instances, but that one was an object lesson to us that day. It seems to me we ought to indulge in a reasonable amount of liberality in this business. The idea of a great Government screwing and twisting down a manufacturer to the last cent is absurd. I believe in being fair and honorable and expecting good work and a high grade of inspection. I believe we ought to have the best, and I believe we are now getting better material than the nations which are paying lower prices. I know we are getting a higher grade of inspection. That is an open secret; it is a fact. In my judgment we are getting a better class of armor plate than that furnished abroad at the lower prices.

As the Senator from Connecticut [Mr. HAWLEY] said a few minutes ago, it is a fact that sometimes great manufacturing concerns do take work to be supplied to foreign nations at rates for which they could not afford to do it in their own country as a regular business. They do that because they have to keep their works running and keep their men together. Here are two or three or perhaps five thousand men. You discharge them and they go away. They are scattered all over the country. Many of them are specialists. You can not begin to get the same class of men together in a short time. We should be reasonable about this proposition. The idea of quibbling over a few dollars a ton more or less! It seems to me all wrong that we should criticise this measure so severely as it has been criticised.

Mr. CHANDLER. How much does the Senator from Washington think it costs to manufacture armor, and what does he think is a fair profit on it?

Mr. SQUIRE. In the first place, I am not qualified; but if I were to make a shrewd guess at it, when the officers who have been interrogated put the price at $250 a ton for labor and material alone, I should say the actual cost of the work, including money expended, would probably be $350 a ton; and then on that I think there should be a fair profit. There should be enough profit to provide for deterioration and the final abandonment of this class of business, because this work is conducted at the pleasure of the Government. It is a great business while it runs, but after it is all over there is no use for such an establishment. Of course the other branches of the business can go on, but I refer to the manufacture of cannon or armor plate. You know it is proverbial that republics are changeable as to their policies in some respects, particularly in regard to building a navy. I was talking with Admiral Ammen a few days ago on that subject, and he made use of that remark. He said, "Our nation is going on swimmingly and we are all agreeable to the doctrine of an increase in the Navy; but how long will the American people be in that condition?" It is different in those great imperial nations where absolutism exists and a fixed policy is to prevail for a long term of years. When the time comes that there is a change on that subject the people owning this great plant will have nothing to do or comparatively little in this line of business. Hence great risks are being taken for which there should be reasonable compensation. I repeat that in a fair estimate of the cost other items should be considered beyond the bare cost of labor and materials.

I say this fact ought to be taken into consideration, and we ought to give them a good, fair price. I want to see these three ships built. It has been suggested that we should be satisfied with two. I do not believe in bunching the ships together too much. I think, as the Senator from New Hampshire [Mr. CHANDLER] very wisely said a few moments ago, it would do to have two or three ships a year for perhaps eight or ten years to come. It would be well to do so. There are going to be improvements in ships. We have seen that in the past. We see the improvements that have taken place in the last ten years in naval architecture. There will be other improvements, and it is not wise or well to have too many ships of one pattern made in any one year or in any one limited period. But I believe we need a greater Navy. We ought to have at least a dozen battle ships, and the sooner we have them the better for our trade as a nation, the better for our safety as a nation, and for reasonable independence in our foreign intercourse. We ought to have a larger Navy, and I should be willing to vote for four battle ships to-day, as I did when the bill was before the Senate, but I shall be satisfied if we have three.

I believe the Senate and the House have spent enough time on this subject, and that we ought to come to a conclusion and sustain the conferees in their report.

Mr. GORMAN obtained the floor.

Mr. QUAY. Will the Senator from Maryland yield to me for a moment?

Mr. GORMAN. Certainly.

Mr. QUAY. In reply to the suggestion of the Senator from New Hampshire [Mr. CHANDLER] to the Senator from Washington [Mr. SQUIRE], I am not, so far as I am concerned, prepared to say what, under the circumstances, would be a reasonable profit to the manufacturers of armor. But I am prepared to say what, in my judgment, is an unreasonable profit. The only figures given in the testimony taken before the Naval Affairs Committee upon which to base an estimate of cost and profit are those of the naval officers who inspect at the different works that $250 is the probable cost of labor and material. With that information before them, the committee agree that $350 will pay the companies for the cost of labor and material and a reasonable profit. In other words, that a reasonable profit will be a hundred dollars.

It appeared before the committee that $3,000,000 has been invested in the Carnegie plant alone, and that they have delivered to the Government 8,800 tons of armor since the plant was established. It would make the actual profit received from the Government up to date $880,000 against an original investment of $3,000,000 in the works. I do not think the Senate will consider that a fair rate of profit, notwithstanding the prophecy of the Senator from New Hampshire.

Mr. GORMAN. Mr. President, as one of the conferees on this bill, I feel it due to myself that I should make a statement to the Senate of the reasons why I did not concur in the report. I do not care to detain the Senate by contesting the matter of the construction of ships. It is perfectly well known that I have from the beginning been very earnest in advocacy of the reduction of the number of battle ships from four to two. I never have contemplated stopping altogether the construction of these machines of war. But it is due that I should say to the Senate that the conferees on the part of the Senate have in my judgment obtained the very best possible arrangement they could get from the conferees on the part of the House without delaying and possibly putting the bill in jeopardy. With respect to the number of battle ships, the usual course has been followed which conference committees as a rule pursue—compromising the differences. The Senate conferees added one to the number which the Senate had voted for, making three. Of course I myself did not agree to that change. If the entire responsibility were put upon my shoulders I never could have agreed to it.

As to the other matter—the armor for the ships—it was said to those representing the Senate, and said with truth, that neither the Department nor any officer of the Government charged with the duty of protecting the Government's interest has ever suggested a reduction or limitation of the prices to be paid for the armor; that it never had been investigated except by the Committee on Naval Affairs of this body, and, so far as they could gather from that testimony, it was not by any means conclusive that the armor could be manufactured at all, even for the amount inserted in the report—$425 a ton. They said to us with great force, "There are the Secretary of the Navy and the Chief of the

Ordnance Bureau of the Navy Department, who are opposed to limitation, and we do not believe it is safe to make any limitation whatever." They further said to us that in view of the fact that the French Government pays $540 a ton for the same class of armor and that the English Government pays $438 a ton, they could not agree to make much of a discount below the prices paid by those two great countries, and that therefore, on the basis of the information, on the statements presented, they could not agree to the radical reduction that the Senate had made. That is all there is in the case.

It was new legislation, practically, on the part of the Senate, objected to on the part of the House; and while, as I said a moment ago, I have not agreed to the report and have not signed it, I do not believe, from the temper exhibited and the earnestness exhibited and the statements they have made, that better terms can be made. I deem it due to myself and the other conferees to make that statement, although I could not agree with them in the report.

Mr. WHITE. Mr. President, I have no doubt the conferees have done the best the circumstances would permit; but I rise more particularly for the purpose of calling the attention of the Senate to a matter already noted by the Senator from Washington [Mr. SQUIRE]. He says that in his judgment the manufacturers referred to ought not to be required to divulge their secrets. Of course not. For instance, if they told us that their dividends were enormous we would have an absolute basis upon which we could proceed to reduce the price of the armor plate, and that would be highly improper.

The Senator from Washington says that we ought to have some confidence in these people—that faith is all that we require; and I call the attention of the Senator from New Hampshire especially to the fact that what he lacks in this connection is faith. We ought to have entire faith in the proposition that the proprietors of these works would not charge the Government a cent beyond the very lowest market rate.

There is one thing also which strikes me as being particularly pertinent in this discussion, as sustaining the report of the conferees and likewise the views of the Senator from Washington. He says that our inspection produces a better class of armor plate than is furnished to any other purchaser. Of course, the fact must not get abroad that the inspection results in a better class of armor plate, and we ought, therefore, to pay more for it. The precise number of additional blowholes that may be in the plate sold to our enemies is not given, but it is somewhat cheering and encouraging to us to know that in these warlike days we are furnishing our enemies with armor plate which we may penetrate with ease. [Laughter.]

Mr. SMITH. Mr. President, I am not going to detain the Senate more than a very few minutes on this question, because I do not think a great amount of talk is needed to vote intelligently on what we shall do with the report of our conferees.

The question is simply this: We are confronted with a combination of armor-plate manufacturers for whose work we have practically paid in a price for armor plate beyond what was a fair and reasonable profit, believing when we agreed to pay it that they in return would be willing to make the armor plate for the Government at a fair and reasonable price after the manufacture was established. They now refuse to do that. We have carried out our part of the contract.

Mr. QUAY. Will the Senator from New Jersey permit an interruption?

Mr. SMITH. Certainly.

Mr. QUAY. A few days ago when this subject was under consideration I presented figures to the Senate showing that, instead of the Government having paid in full for these plants, the Carnegie Company and the Bethlehem Company were actually $3,000,000 short of their outlay. I took those figures from the report of his own committee.

Mr. SMITH. With all due respect to the Senator from Pennsylvania, the figures will not warrant that statement. The facts are as I state them, that we have paid enough money over and above the actual amount, with a fair profit on the works, to own them.

Now, the question is whether we are willing to go on record as Senators to continue that monopoly. I believe that it is our duty to send the report back into another conference; and whether there are any battle ships built or not we owe it to ourselves to try and keep these men on a fair businesslike basis when we are to give them a price such as will permit them to realize more than any ordinary profit that is given to any manufacturer in this country that I know of at this time, except perhaps the manufacturers of bicycles.

Mr. President, I am not going to detain the Senate in regard to this matter. It is purely a business question whether we want to continue to pay enormous prices for armor plate without an effort to get it at a fair price. If we believe that we ought to make an effort to get it at a fair price, the conferees should be instructed to go back and insist on our amendment. If we think that we ought to continue in the hands of this monopoly and pay them any price they demand, then I say we should vote to receive and accept the proposition of the conference report.

Mr. CHANDLER. Mr. President, I do not wish to be understood as criticising the Senate conferees for agreeing to advance what may be called the Senate price of armor from $350 to $425 a ton. I certainly can not blame the honorable Senator from Pennsylvania [Mr. QUAY] who sits before me for endeavoring to secure what he deems to be a fair and reasonable price for armor for the Bethlehem works and the Carnegie works. Those are great industrial enterprises in his own State. There are at the Carnegie works regularly employed, I think, 25,000 men; at the Bethlehem works there are over 5,000 men employed; and it is a commendable act in the Senator from Pennsylvania that he endeavors to secure a liberal price, so that these battle ships may go forward. It would be far from me to suggest that the Senator from Pennsylvania has been in any degree influenced by the fact that this work is to go to his own State to think that a larger price should be paid than his public duty would require him to advocate.

The Senator from Maryland [Mr. GORMAN], I believe, did not sign the conference report, and I did not distinctly understand his position upon the question after he had finished the remarks which he lately submitted to the Senate.

The Senator from Maine [Mr. HALE] has the natural desire which a member of the Appropriations Committee has to bring this session to an end; and he recognizes the necessity of having an agreement reached. The Senator, with his great skill and adroitness in the management of conference reports, has met with firm, strong, determined antagonists at the other end of the Capitol. The House, with views championed by young and active and energetic committeemen, have fought with zeal, possibly with desperation, according to the character of some committees and some members of some committees, for the views which they have entertained, and they have insisted upon it that we should make contracts for this armor without any limitation whatever upon the contractors; that we should legislate the Secretary of the Navy into their hands, so that when the combination of these two great concerns fixed a price and said to the Secretary of the Navy, "That is the lowest price we will give you," the Secretary of the Navy should have nothing to do but to make the contract, as he has had nothing to do in connection with the contracts for the *Kentucky* and *Kearsarge* but to take the price of $550 a ton which these two combined armor concerns have chosen to affix. The Secretary of the Navy congratulated himself that in connection with the contracts for the *Kentucky* and the *Kearsarge* he had succeeded in reducing the price of finished armor from $600 a ton down to $550 a ton, and the Secretary of the Navy stands, unless he is assisted by Congress, helpless in the presence of this combination of armor manufacturers.

The Senator from Pennsylvania and the Senator from Washington and other Senators say we have not sufficient evidence as to the cost of armor. Mr. President, we have such testimony as we have been able to procure. The Senator says that the committee believe that it costs for labor and material $250 a ton to make this armor. That was the impression of the Government experts; but, if I am not mistaken, there is no member of the committee who thinks it costs in labor and material alone $250 to make the armor. There are one or two members of the committee who believe that it does not cost and could not possibly be made to cost for labor and material $150 a ton.

Mr. President, we have the further fact, to which I call the attention of the Senate, that although the foreign combination and the American combination, formerly two and now one, get $550 a ton whenever they can get it, whenever there is no competition or they can prevent competition, yet, as reported by the Chief of the Bureau of Ordnance, as recorded in the testimony taken before the committee, and as found in my remarks on this subject the other day, their price for the foreign trade is $300 a ton. If anybody believes that they make and sell that armor in the foreign trade for less than cost or that they make and sell that armor in the foreign trade without a reasonable profit, he does not comprehend the situation in this country and in Europe in connection with the manufacture of armor.

The great fact with which the Senate is confronted is that which has been stated by the Senator from New Jersey [Mr. SMITH], that there is no competition in this country for the armor. Ex-Secretary Tracy testified as a reason for making the contract with Carnegie, Phipps & Co. that we had but one concern in the country which could make armor—the Bethlehem Company—and he thought it was a mistake for this Government to be wholly in the hands of one concern, and, therefore, he invited the Carnegie Company to take a contract for the manufacture of an amount of armor equal to that manufactured by the Bethlehem Company. He induced them to do it, in order that there might be two concerns in this country that could make armor, and in order that, if

we went on to build additional battle ships, we might have competition.

Mr. President, the two concerns were built, and in my belief—without reckoning interest, and I think if the Senator from Pennsylvania is going to reckon interest on one side he ought to reckon it on both sides—we have paid these concerns every dollar that their armor has cost and every dollar that they have put into the plant with which they are now engaged in making armor.

Mr. President, these figures are apparent. The result depends somewhat upon what you think armor costs. I do not believe that the cost for labor and material, as I said, is over $150 a ton.

The unpleasant fact to which I call the attention of the Senate is that, notwithstanding the efforts that were made, advisedly made, deliberately made, to put the Navy Department in a position to have competition when it should wish to purchase armor, there is no competition to-day. There is a close combination between the Carnegie Company and the Bethlehem Company. This was proved by the Senator from Georgia [Mr. BACON] the other day, when he showed how carefully the two concerns, in bidding for armor for the *Kentucky* and the *Kearsarge*, had so planned it that the price of one for armor should be a little lower than the price of the other on the one ship, and a little higher than the price of the other on the armor of the second ship, and that both prices should be substantially the same, with just the necessary difference to give each one the armor for one ship, and that the price should be about $550 a ton, exactly what the representatives of the two concerns had told the Secretary of the Navy a few days before that they would bid, and they told him that not one dollar less than that would they bid.

The Secretary of the Navy, having made the two contracts for the hulls of the *Kentucky* and the *Kearsarge*, was obliged to agree to pay $550 a ton for armor to these two combines and to give the armor for one ship to the one concern, and the armor for the other ship to the other concern. And the House of Representatives, to-day represented on this floor, has insisted upon it from the beginning to the end of these conferences that we should legislate the Secretary of the Navy into the hands of this combination, and that we should order the construction of four more battle ships without the slightest protection against extortionate prices for armor, and in the face and eyes of the fact, which the House of Representatives well knew, that one of these same concerns had furnished a large quantity of armor to a foreign government for less than $260 a ton.

Mr. President, I care no more for this measure than any other Senator. As I said, I do not criticise the chairman of the conferees on the part of the Senate for his anxiety to have an end to this business. I do not criticise the Senator from Pennsylvania, who, as a member of the conference committee, represents his own State, and the United States as well, in the performance of public duty. I do not criticise even the Senator from Maryland, who refused to sign the conference report, yet who has not made the fight against its adoption which is characteristic of the Senator from Maryland when he has deep convictions upon any subject.

Mr. President, for one I propose to discharge my duty on this question. I stand by the members of the Senate Committee on Naval Affairs, who, after investigating this subject, are still of the opinion that $425 is an enormous price for the armor, which we propose to submit to if this conference report is adopted, because the whole scheme of competition in the manufacture of armor has failed and because the House of Representatives is unwilling to have any legislative protection whatever enacted against the extortions of the combined armor manufacturers.

Mr. HAWLEY. Mr. President, I am not going to take the time of the Senate. I do not see how the House of Representatives is dictating to us, for I do not see how it has turned over the Government bound hand and foot to the manufacturers of armor plate. The House prescribed no price at all for armor, as I understand it, in the bill as it came to us, leaving the Secretary of the Navy and the very capable officers under him to go on and build the ships. Such has been the uniform custom up to this time. I am entirely willing, speaking only for myself, to eliminate entirely from the bill any reference whatever to prices, and I have the highest confidence that if the present Secretary of the Navy should make a contract at four hundred next year it would be found upon investigation that he was entirely justified in what he had done. I do not understand what the Senator means by the House of Representatives having a representative on this floor, and the House having dictated to us, or dictated to the Government, or anything of the sort.

Mr. PERKINS. Mr. President, as a member of the Committee on Naval Affairs I have listened to the argument of the Senator from New Hampshire and the Senator from Georgia and other members of the committee, and I want to say that which they have not stated, I think, that we did not volunteer to go into an investigation of this question. It was brought before the Naval Committee by a resolution properly presented in the Senate and adopted. After communicating with the Secretary of the Navy upon the subject-matter, and obtaining what information he could present to us, we then called before us witnesses who were competent by reason of their profession to give us such testimony as the committee desired or thought necessary to have in order that they might arrive at an intelligent conclusion. We had no feeling whatever in the matter. It is a matter of common notoriety, aye, of official record, that there has been severe criticism in years gone by of those who manufacture armor plate.

It has been stated here, and not controverted, perhaps, that we had no real data whereby we could fix an absolute figure the steel was costing this great trust, for it evidently is a trust, because if one company receives a contract for one ship the other company receives a contract for the other ship, as was the case with the *Kearsarge* and the *Kentucky*. We first ascertained what was the price of billet or ingot steel, which was $17 a ton. Then we asked the manner in which it was manipulated to make it into armor plate fit to protect a ship against the shell and shot of its adversary. As has been so well stated, we believed that $350 per ton would leave them a handsome margin of profit, from the fact that the same companies had furnished steel armor plate to the Russian Government for $300 per ton, and those who know their energy, their business zeal, and capacity would never accuse them of manufacturing the plate and selling it for less than it has cost them.

But what impressed me perhaps more strongly than any proposition was my own knowledge of what certain classes of machinery cost to forge. I am somewhat familiar with the forging of steel and the cost of heavy steel engine plates, and especially steel shafting. The shafting for a great steamer is a ponderous piece of work. It requires a steam hammer of great capacity, of 50 tons or more, and after it has been forged into shape and prepared as near as a rough implement can get it, it must then go into a lathe, and it is turned down carefully in that lathe; every inch of it being carefully scrutinized, for the very life and safety of the ship and her cargo and passengers depends perhaps upon the solidity of that piece of steel shafting, to which the propeller, which forces her through the water, is attached. For one of these shafts when completed the very highest price in the market, I think, is about 10 cents a pound, or about $224 a ton for a long ton of 2,240 pounds. Why should this armor cost us nearly twice that much—25 cents a pound more? Why should this piece of plate cost that much more?

But I do not care to weary the Senate by going into details. I want the Senate to understand that your committee did investigate, so far as it was practicable for them to do so, and the result of that investigation has been presented in the printed testimony submitted to the Senate.

The question now before us, however, is the report of the conference committee. The Senate believed that the price fixed in the report of the Naval Committee was right; the Senate conferees believed that it was right and so stated, but we are only one branch of the legislative department of this Government, and while we may wrap around ourselves the robes of our own assumed self-knowledge and righteousness and think we know it all, yet there is another, a coordinate branch, which is, I think, our equal in every respect. We have disagreed upon this proposition. It is one of compromise now, and we have selected our committee, as did the House of Representatives select theirs. They have met, they have consulted and interchanged views upon this question, and have submitted their report to us for our ratification or disapproval.

The naval bill carries in it much more than the question of armor plate. It makes declaration to the country that we are going to continue to build up this great Navy to defend our country and maintain the dignity and honor of the old flag whether on our own shores or in foreign waters, and I am so deeply interested in the success of the bill that I am more than half disposed to vote to concur in the recommendation made by the committee of conference, to refer this matter to the Secretary of the Navy, who is not obliged to make a contract immediately for this armor plate. The bill provides that the contract for the three battle ships, if we provide for building that many, shall not be entered into for three months—ninety days—which brings it late into the autumn. Then there will be plenty of time to make a contract for the armor plate, and knowing the Secretary of the Navy as we do, knowing how zealous he is in maintaining the efficiency of that Department, how zealous he is in guarding its finances so that the Government shall get value for every dollar expended, I do not believe, with the light he now has before him on this question, that he will enter into any contract for armor plate for these three additional ships until Congress shall have again convened.

I would make a suggestion to him, if I might be permitted to do so, in regard to his dealings with this trust. I do not mean to use the term "trust" in an offensive way. They are two great companies, developing our great manufacturing resources, employing thousands and thousands of men, taking the iron ore from the earth, running it into pig iron, from pig iron into ingots of steel,

and from ingots of steel rolling it out into great plates, and putting those plates upon those vessels, which are magnificent pieces of marine architecture. I say all honor to those engaged in American industry who develop the great resources of our country. But, nevertheless, these companies have combined upon the manufacture and upon the price of this armor plate, and it is our duty, representing the Government here in our legislative capacity, and it is the duty of the Secretary of the Navy, to say to them: "Other great works, machine shops, are taking contracts to repair ships, to build pieces of machinery, for 10 per cent advance upon the cost. That percentage will leave you a good profit. I may be willing to enter into such a contract with you for armor plate for two or three of those ships. Then we will show to our representatives just what it costs, just what you can manufacture it for, and at the same time leave you a handsome profit."

I want to say one word in defense of these two great manufacturing companies; and that is, that while they have been receiving great profits in the manufacture of this plate, we must not forget that they have not had continuous work for their different great factories. Only a part of the time have they been employed, and the balance of the year they have remained idle. As has been said also, they have no other customers except the Government; and therefore we should, as the Senator from Georgia [Mr. BACON] says, deal with them liberally, give them a generous profit, but not permit them to take advantage of our Government by extortionate charges or by a combination and forming a great trust.

But, as I said, the question now is, shall we concur in the report of the committee of conference, or shall we reject it, thereby placing in jeopardy the very life of this bill? It would be a great misfortune if the bill should fail to become a law; and believing, as I have said, that the Secretary of the Navy will use that wise business judgment, that wise discretion, with which we all credit him, and that he will not hastily enter into a contract for the manufacture of this armor plate for these three ships, if we authorize the construction of that many, I shall vote to concur in the report of the committee of conference.

Mr. HAWLEY. I wish to ask the Senator one question for information. The Senator spoke, and I was very glad to hear him speak, from knowledge of the manufacture of those splendid shafts for steamships. They are made in sections, it is true, and they are the simplest form of straight and round pieces of steel, and yet they cost what?

Mr. PERKINS. Two hundred and forty dollars a ton.

Mr. HAWLEY. Two hundred and forty dollars a ton. Now, these great plates for the turrets, and other similar pieces of armor, are made with a great deal of care, and a large expenditure is incurred in forming them into the shape required. The shape of the plates must be perfectly adapted to the vessel, and they must be tempered with exquisite care and skill; and yet Senators think that to make such armor plate would not cost twice as much as to make a straight, simple shaft.

Mr. PERKINS. The plate is made by a great hydraulic press, a great power press, while the shaft must go into the lathe and there be turned down with an exact nicety and skill, which is necessary for it to revolve smoothly and without moving out of its center.

Mr. HAWLEY. Yes; but all the pieces of armor must always exactly fit.

Mr. PLATT. Mr. President, I think, on the whole, I shall vote to sustain the conference report, and yet there are some very embarrassing conditions with reference to it. One thing which I do not like is that Congress shall attempt to fix the price which the Government shall pay for the material or the labor or in any way the cost of what it has to purchase. In the carrying on of the operations of this Government I think that is an innovation. I do not remember that an executive officer has ever before been limited in this way by the action of Congress, and if we are going to limit an executive officer with reference to the amount which shall be paid for the armor which is to go on a ship, we may as well limit him with reference to the woodwork, the machinery, the boilers, and all the other materials which go to make up the ship.

Mr. CHANDLER. Will the Senator allow me a moment?

Mr. PLATT. Yes.

Mr. CHANDLER. We have never authorized any vessel of the Navy whatever without putting a limit to the price.

Mr. PLATT. A limit to the price, perhaps, but not a limit as to the rest of the materials of which the vessel is constructed, and there is no reason why we should do it with reference to a vessel and should not do it with reference to other supplies which the Government has to purchase. Congress should investigate, I think, the cost of steel which is furnished by private parties for the Government to make cannon if they are going to investigate the price of armor plate; and this discussion has really suggested that probably the steel which is furnished out of which the Government constructs its guns may be extravagant in price; or, when we construct a public building, like the Congressional Library, for instance, or the post-office, that we should investigate and see whether we should not limit the price of the granite which enters into the work. So it seems to me that, unless here is a very clear case, we ought not to put any limit upon the Executive. The only reason which can be given why we should limit the Executive in obtaining these supplies as to the price for steel armor is that there are only two concerns in the United States which can make it, and they are supposed to be in combination not only as between themselves but with foreign makers.

When the Senator from New Jersey [Mr. SMITH] introduced his bill directing that the Government should establish a plant for the making of steel armor, I thought that that was hardly advisable; I thought it much better that armor should be supplied by private concerns. I think always, where it is practicable, the Government had better buy what it needs from private manufacturers rather than to attempt to go into the manufacturing business itself. But perhaps, Mr. President, that is the only way in which we can obtain steel for armor plates, for cannon, and for the various uses in our naval and military operations in which we must have it, and I am not sure that the Senator from New Jersey has not hit the real way in which to remedy any extravagance of price to which the Government may have been submitting or may have to submit. I do not like that feature of the amendment.

Mr. HALE. The Senator will remember that this amendment was not reported from the Committee on Appropriations on the bill originally, but was put on in the Senate.

Mr. PLATT. I know it was. I am not finding any fault.

Mr. BACON. Will the Senator from Maine kindly repeat his observation, so that we may hear it on this side?

Mr. HALE. I say the amendment to which the Senator from Connecticut is objecting was not put on by the Appropriations Committee, but was put on the bill in the Senate on the report of the Naval Committee. I do not know but that the Senator from Georgia himself offered it. I think he did.

Mr. BACON. That amendment did not fix the price, but simply fixed the limit beyond which it should not go, and directed if a contract could not be made within that limit that the matter should be reported to Congress for its action at the next session.

Mr. HALE. That was an amendment offered in the Senate.

Mr. PLATT. Mr. President——

Mr. BACON. If the Senator from Connecticut will pardon me, that was an amendment I offered under the instructions of the Naval Committee. It was not my amendment, but an amendment of the Naval Committee.

Mr. PLATT. I am not criticising the conference committee and I am not criticising the Naval Committee; I am not finding any fault with either; but I do not like to find myself in this position, voting that unless certain materials can be obtained at a certain price we are to stop building ships; or if material can not be obtained for our cannons at a certain price we are to stop having cannon. It seems to me that this Government ought in some way to be run so that the Executive can be trusted with obtaining what the Government needs to carry on its military and naval operations. If there is any great scandal about it, it would be the subject of investigation, and if shown to be improper upon investigation public sentiment would compel it to cease. The trouble about this case in particular seems to me to be that there has not yet been any such investigation as to determine whether there is anything which amounts to a scandal. So in the second branch of the case we do not know whether the limitation which is put upon this armor plate is too low or too high. We are going in the dark about it. I am not sure this investigation of the Naval Committee was directed especially to this point. I think possibly this was a matter which came out as incidental to the object of the investigation of the Naval Committee. At any rate we find ourselves in this position: That the Naval Committee say that not more than $300 or $350 a tons ought to be paid for this armor plate, and the Senator from Pennsylvania [Mr. QUAY] and other Senators here, and I think my colleague [Mr. HAWLEY], think that that is too small, and that even the compromise sum of $425 per ton is probably, under the circumstances, altogether less than we ought to pay. This is legislation by guesswork, Mr. President; that is to say, we guess that armor plate ought not to cost more than so much to the Government, and legislate that if the Government can not get it for that sum then we shall stop building ships.

I do not like it in either branch. I do not like to limit the executive. I do not like to fix the price of armor plate by legislative action and then say that if it can not be obtained for that we shall stop building ships. But, on the whole, I am left nothing to do except to vote for the conference report.

The PRESIDING OFFICER. The question is on the motion

of the Senator from Maine [Mr. HALE] to concur in the report of the conference committee.

Mr. MILLS. I call for the yeas and nays.

The yeas and nays were ordered.

Mr. HALE. Mr. President, I shall not long detain the Senate at this hour, but shall try to state the situation in a business way.

The two Houses came to a deadlock on two general and important propositions; first, as to the number of new battle ships that should be authorized by the bill—an old controversy which had between the two Houses been fought out repeatedly before and almost always settled by compromise, as conference reports are wont to settle controversies.

The other controversy was not an old controversy that had been settled heretofore by adjustment, but was an absolutely new proposition put upon the bill, not by the committee reporting it, but by the Naval Committee, which had considered a new subject and reported a proposition limiting the cost of armor plate in any future contract, thereby taking upon itself what, as the Senator from Connecticut [Mr. PLATT] has well said, had not been undertaken before by the legislative body in determining and limiting the price of particular materials used by the Department to whom Congress commits the discretion of making the contracts. The Senate conferees could not avoid that conflict. They met on equal terms with the House conferees and the House conferees on equal terms with them. The first point that was settled, as I have said, was settled by a compromise, as it invariably is or almost invariably is.

The House of Representatives had committed itself more than once by a yea-and-nay vote in favor of four battle ships; the Senate had equally committed itself by more than one yea-and-nay vote to two battle ships; and unless both sides yielded partially, or one side yielded entirely, the two Houses would remain at loggerheads, and every vote which had been taken in either body after a determined resistance and disagreement would have only hardened each body in its attitude, and we should have been here with the subject suspended in the air, each House fighting for its own proposition, and believing earnestly and seriously in its own proposition—the House that four ships were not too much, we that two ships were enough.

On that proposition the conferees at last determined that it was a fair subject-matter for adjustment, that three ships were large enough, that three ships were not too large; better upon one side, as we thought, than four; better upon the other side, as the House thought, than two; and so, in the spirit of adjustment and of compromise, we agreed to the three ships. I do not say that two would not have suited me better; I do not say, and am not called upon to say, that four would not have suited me better. I was well content to take three. It is enough; it is a large enough grant to be given this year. It is not, I think, sir, too large. Under this condition that the popular body, which originates appropriation bills, which comes direct from the people, believing that the general feeling on this subject required four ships to establish our Navy upon a basis that would not bring us into war, but would hinder war—that being, as I considered, the main thing in the controversy, and I do so consider it now—the conferees, exercising their best wisdom, agreed to the three ships.

Then we came to another subject-matter, and that was a limitation for the first time put upon an appropriation bill, in which it is declared—

That in case the Secretary of the Navy shall make separate contracts for the armor and armor plate for said battle ships, he shall not accept bids at a rate exceeding an average of $350 per ton of 2,240 pounds; and in case the said Secretary can not make contracts for said armor and armor plate within said limit, he shall delay action and report the offers made to the next session of Congress.

Mr. President, that was put on the bill by the Naval Committee in the Senate, and by the united action of the Naval Committee. I was myself a member of the committee which conducted that investigation, and a considerable part of the time had charge of the proceedings, presiding in the body. The Committee on Naval Affairs was faithful and industrious, early and late, in bringing out what it could of the facts. It was engaged in a new domain; it was engaged in a difficult domain. The impression made upon that committee was—and it was made upon my mind—that the contractors were receiving an undue profit, a larger profit than they should make; but as to what the amount of that profit was one man had one view and another man had another.

When we came into conference, the House committee did not put itself upon the ground especially that one price was needed, or one limit or another; but they said that while the Senate has the information upon this subject-matter, it is an innovation and it can not be urged upon us that we shall consent necessarily to the Senate proposition, which imposes a measure never before put upon a Department without more reasons. Finally I said, as did my colleague on the committee—I did especially, because I represented both committees—"The Senate committee investigated this subject thoroughly." "Where is the report?" "Well, the committee has made no report." The committee has not been able to make a report, Mr. President. The Naval Committee has not reported as a conclusion fixed in dollars and cents that $350 is the absolute figure beyond which a contract shall not be made. Some of the committee believe that is too high, and some, perhaps, believe that it is too low, but we have submitted no report; we were not able to submit a report; we have had no time to submit a report; we have had no opportunity of coming to a conclusion. "There is the testimony," we said, "and the House must take it for what it is worth." But the House had a right to say that under present conditions the Senate should not drive the House to absolutely submit to this amendment that the Senate had put on, fixing $350, while one of the conferees, and perhaps two, on the part of the Senate, are urging here that there should be no limitation whatever. The Senator from Maryland [Mr. GORMAN] was in favor of no limitation, and the Senator from Pennsylvania [Mr. QUAY] was in favor of no limitation. There was the attitude of the Senate conferees.

Mr. BACON. Permit me to call the attention of the Senator to the fact that the Senator from Pennsylvania and the Senator from Maryland, to whom he has referred, are not members of the Senate Naval Committee.

Mr. HALE. Undoubtedly, but they were members of the conference, and were dealing with the House conferees, who are members over there of the House Naval Committee. But there was the difficulty we were in.

Now, what should be done, Mr. President? One question has been asked me which I have not been able to answer, "If $350 is an absolute rule of limitation that ought to be put in the bill, why was it not put on the Secretary last winter when you were conducting your examination as applied to the *Kearsarge* and the *Kentucky?* Was it not before the committee?" What was the answer I could make? This was the only answer: "Yes," I said; "it was more than that. The Secretary of the Navy asked the Naval Committee, which was investigating this subject of armor plate, if it desired to indicate any limitation to him on the *Kearsarge* and the *Kentucky*, as he had made no contract, and the answer that the committee sent back in the midst of their examination was that it did not intend to interfere with those ships, although the Secretary waited for an admonition." Why, Mr. President? Because some of us believed that a certain figure was not enough. We did not believe that we had come to an actual demonstrated result and conclusion that would justify us in saying to the Secretary of the Navy that he should not make those contracts. He made those contracts at $550 per ton.

I was not able to answer when I was asked why, if it were so important that this contract price should be $350, we did not stop a contract at $550. But we were not able; we had not gone far enough; we had not arrived at a definite conclusion. What was the result? The result was that at last we were not willing to yield absolutely the question of limitation to the House conferees, and my coconferees at last agreed, or at least the Senator from Pennsylvania [Mr. QUAY] and I did, making two of us, that we would take $425.

Now, Mr. President, I want to say as a matter of fact—and I want Senators to listen to this—it is not that $425 is going to fix the price of armor for these new ships; it is not that $350 is going to fix the price; I do not know that I would have agreed to $425 if I had not been face to face with the other fact that we had already agreed to an amendment providing that the Secretary of the Navy in making contracts for the hulls alone shall have one hundred and twenty days, or four months, which carry him nearly to the middle of October, six weeks before the meeting of Congress, and therefore Congress will not commit itself to $425 or $350. There will be no contract made by any Secretary until the next Congress gets together.

But we did not stop there—I did not. I was anxious to save the rights of the Government, as I have been all through this controversy in the Naval Committee, as earnest as any other member. We put on another provision asking the Secretary to make a full examination into the actual cost of armor and to report to Congress the result of his investigation in the early part of the next session, so that we shall have the result of that investigation and the result of the investigation of the Naval Committee and everything else. On that basis the conferees agreed to this result. It was the best that they could do.

Mr. President, I am not in favor of legislating the Secretary of the Navy into the hands of contractors, and have never in any controversy taken any such position; but I realized that we were confronted here by the House of Representatives that had made no such investigation; that we had not even made a report and formulated our results; that we had declined to interfere with the contract that the Secretary had already made, and the best thing we could do out of this controversy was to get the three ships and get the limitation of $425, which I do not count as of any importance, and request the Secretary to make an examination and report the facts.

If we have done wrong, if we have been legislating anybody

into the hands of contractors, then, if the Senate wants to reject this report and send it back, let it do it; but there will be only one result out of it.

Mr. SQUIRE. Mr. President——

Mr. HALE. I wish the Senator would not interrupt me.

If you go back, it will only be a question of figures. What if you get $400, which everybody will agree to, instead of $425? It is leather and prunella. It is not of the slightest account. No contract will be made at either price, and you will have the whole thing open with a chance, as the House conferees notified us, that if they go back into conference they will feel at liberty to revert to the original House proposition, in which they were largely sustained by that body, providing for four battle ships instead of three or two; and we will be hung in the air again.

I leave it to the Senate, and if they think the conference have not done the best, they will reject the report. If, on the other hand, the Senate believe under these conditions that we have done our best, put the report through by a vote of the Senate, and Senators will find when Congress assembles in December that no harm will have been done.

Mr. SQUIRE. There is only one question I should like to ask, in order to make it perfectly clear. Is there any implication, either in law or in any other way, that the Secretary shall make the contract at $425? I understand the Senator to mean that there is no implication whatever. In the case of river and harbor contracts, an outside figure is named for the improvement, and it is supposed that the work will proceed up to the extent of the appropriation for that purpose.

In this case I understand the Senator to mean that there is no implication whatever. We are not binding the Secretary to make contracts at that price. There is no reason in the world why he should make contracts at that price.

Mr. HALE. I have said that already. I am entirely willing to have a vote. The yeas and nays have been called for and ordered.

Mr. PETTIGREW. It appears in this case that there are two parties only in this country who can make armor plate. That they are in collusion is admitted. They have a combination, and yet Senators stand up here and assure us that there is no probability that we will pay $425 a ton. It seems to me it takes a great deal of confidence to vote upon it with any such belief.

The PRESIDING OFFICER. The question is on concurring in the report of the committee of conference, on which the yeas and nays have been ordered. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. CULLOM (when his name was called). I am paired with the Senator from Delaware [Mr. GRAY]. Not knowing how he would vote, I withhold my vote.

Mr. HANSBROUGH (when his name was called). I am paired with the junior Senator from Illinois [Mr. PALMER].

Mr. PASCO (when his name was called). I am paired with the Senator from Washington [Mr. WILSON].

Mr. PERKINS (when his name was called). I have a general pair with the junior Senator from North Dakota [Mr. ROACH]. I transfer my pair to the Senator from Montana [Mr. MANTLE] and vote "yea."

Mr. PUGH (when his name was called). I have a general pair with the senior Senator from Massachusetts [Mr. HOAR].

Mr. SHOUP (when his name was called). I am paired with the Senator from California [Mr. WHITE]. I am informed that he would vote "yea" if present, and I will therefore record my vote. I vote "yea."

Mr. WALTHALL (when his name was called). I am paired with the Senator from Pennsylvania [Mr. CAMERON]. I transfer my pair to the Senator from Kentucky [Mr. LINDSAY] and vote "nay."

The roll call was concluded.

Mr. MITCHELL of Oregon. I was requested by the Senator from Nevada [Mr. STEWART], who was compelled to leave the Chamber, to announce that if he were present, he would vote against the adoption of the report.

Mr. PRITCHARD. I am paired with the Senator from Louisiana [Mr. BLANCHARD], but I understand that he would vote "nay" if present. I will therefore vote. I vote "nay."

Mr. GEAR. I am paired with the Senator from Georgia [Mr. GORDON]. If he were present, I should vote "yea."

Mr. PUGH. I transfer my pair with the senior Senator from Massachusetts [Mr. HOAR] to the senior Senator from South Carolina [Mr. IRBY] and will vote. I vote "nay."

Mr. GORMAN. I announce my pair with the Senator from Maine [Mr. FRYE].

Mr. BACON (after having voted in the negative). I have a general pair with the junior Senator from Rhode Island [Mr. WETMORE]. Under our arrangement either has the right to vote in his discretion and in matters not political. I will therefore permit my vote to stand in this case, although he is not present.

Mr. ALLISON. I have a general pair with the Senator from Missouri [Mr. COCKRELL], who is absent to-day on account of illness. I am authorized to vote in case my vote is necessary to make a quorum. I vote "yea."

Mr. SQUIRE. I should like to announce that I have a general pair with the Senator from Virginia [Mr. DANIEL], but in this case I feel at liberty to vote under our understanding. I vote "yea."

Mr. BATE (after having voted in the negative). I should like to inquire whether the Senator from Utah [Mr. BROWN] has voted.

The PRESIDING OFFICER. The Senator from Utah has not voted, the Chair is informed.

Mr. BATE. I have a right to vote to make a quorum, and for that purpose I will allow my vote to stand.

Mr. CULLOM. I feel at liberty to vote in order to make a quorum. I vote "yea."

Mr. HANSBROUGH. I will record my vote to make a quorum. I vote "yea."

The result was announced—yeas 22, nays 24; as follows:

YEAS—22.

Allison,	Hansbrough,	Morrill,	Squire,
Burrows,	Hawley,	Perkins,	Teller,
Clark,	Lodge,	Platt,	Turpie,
Cullom,	McBride,	Quay,	Warren.
Davis,	Mitchell, Oreg.	Sewell,	
Hale,	Morgan,	Shoup,	

NAYS—24.

Bacon,	Chandler,	Jones, Ark.	Pritchard,
Bate,	Chilton,	Mills,	Pugh,
Berry,	Dubois,	Mitchell, Wis.	Smith,
Butler,	George,	Nelson,	Vest,
Caffery,	Harris,	Peffer,	Walthall,
Cannon,	Hill,	Pettigrew,	Wolcott.

NOT VOTING—43.

Aldrich,	Daniel,	Irby,	Roach,
Allen,	Elkins,	Jones, Nev.	Sherman,
Baker,	Faulkner,	Kyle,	Stewart,
Blackburn,	Frye,	Lindsay,	Thurston,
Blanchard,	Gallinger,	McMillan,	Tillman,
Brice,	Gear,	Mantle,	Vilas,
Brown,	Gibson,	Martin,	Voorhees,
Call,	Gordon,	Murphy,	Wetmore,
Cameron,	Gorman,	Palmer,	White,
Carter,	Gray,	Pasco,	Wilson.
Cockrell,	Hoar,	Proctor,	

So the report was nonconcurred in.

Mr. HALE. I move that the Senate further insist on its amendments and request a new conference.

The motion was agreed to.

By unanimous consent, the Presiding Officer was authorized to appoint the conferees on the part of the Senate at the further conference; and Mr. HALE, Mr. QUAY, and Mr. GORMAN were appointed.

REPORT OF THE MONETARY COMMISSION OF 1876.

Mr. QUAY. I move that the Senate proceed to the consideration of executive business.

Mr. BUTLER. I desire to offer a resolution.

Mr. QUAY. I withdraw the motion for the purpose of enabling the Senator from North Carolina to offer a resolution.

Mr. BUTLER. I submit a resolution and ask that it be read and lie on the table. I shall call it up on Monday.

The resolution was read, as follows:

Resolved, That there be printed 3,000 additional copies of Report No. 703, Forty-fourth Congress, second session, known as Report of the Monetary Commission of 1876.

Mr. HARRIS. The resolution should go to the Committee on Printing.

The PRESIDING OFFICER. The request of the Senator from North Carolina is that it lie on the table.

Mr. HARRIS. If that be the request, let that course be pursued.

The PRESIDING OFFICER. The resolution will lie on the table and be printed.

EXECUTIVE SESSION.

Mr. QUAY. I renew my motion that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After thirty-three minutes spent in executive session the doors were reopened.

COLUMBIA INSTITUTION FOR DEAF AND DUMB.

Mr. VILAS, Mr. HANSBROUGH, and others addressed the Chair.

Mr. HALE. One trouble is, if Senators get bills through in which they are interested, they may leave the city and on Monday we shall have no quorum.

Mr. VILAS. I am not going to call up a bill.

Mr. HALE. I do not object.

Mr. VILAS. Mr. President, some time ago you did me the honor to appoint me a director on the part of the Senate of the Columbia Institution for the Instruction of the Deaf and Dumb in place of the Senator from Mississippi [Mr. WALTHALL], who

left the Senate, very much to the regret of his associates, but has now returned. I ask leave to resign that position.

The VICE-PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

Mr. VILAS. The Vice-President has the power under the law to make the appointment.

The VICE-PRESIDENT. The Chair will appoint Mr. WALTHALL as the successor of Mr. VILAS.

MARITIME CANAL OF NORTH AMERICA.

Mr. HANSBROUGH. I ask unanimous consent for the present consideration of the bill (S. 3049) to incorporate the Maritime Canal of North America, and for other purposes.

The VICE-PRESIDENT. The bill will be read for information.

The Secretary proceeded to read the bill, but before concluding was interrupted by

Mr. HALE. That bill can not go through, Mr. President, by unanimous consent. It is a great project for a canal.

Mr. HAWLEY. From what committee was the bill reported?

Mr. HALE. The bill can not go through without discussion.

Mr. HANSBROUGH. The bill was reported unanimously by the Committee on Commerce. It has the sanction of the War Department. It does not ask for a cent of money from the Government of the United States, not even to make a survey. It is for the construction of a canal entirely upon American soil, and it simply asks for a charter for the incorporation of the company.

Mr. HALE. Where is the canal proposed to be located?

Mr. HANSBROUGH. Between Lake Erie and the Hudson River.

Mr. HALE. That clearly can not go through without debate.

Mr. PLATT. From what I heard of the reading of the bill so far as it has gone it is proposed to give by the United States power to condemn land in the State of New York.

Mr. HAWLEY. A corporation wholly in one State.

Mr. HALE. Of course.

The VICE-PRESIDENT. Objection is made, and the Chair will recognize the Senator from Texas [Mr. CHILTON].

Mr. CHILTON. I ask leave to call up a bill.

Mr. HANSBROUGH. Do I understand there is objection to the consideration of the bill which I called up?

The VICE-PRESIDENT. The Chair understood the Senator from Maine [Mr. HALE] to object.

Mr. HALE. Yes, sir. The bill will be debated, Mr. President. I move that the Senate adjourn.

Mr. CHILTON. I hope the Senator will allow the bill which I desire to have considered to be passed. I tried to get it up yesterday, but the Senator from New Hampshire objected in order that he might have time to investigate it, and it was passed over. It will only take a moment, and it is a very short bill.

Mr. HALE. Well, let us see, Mr. President.

EASTERN JUDICIAL DISTRICT OF TEXAS.

Mr. CHILTON. I now ask unanimous consent for the present consideration of the bill (H. R. 2708) to constitute a new division of the eastern judicial district of Texas, and to provide for the holding of terms of court at Beaumont, Tex., and for the appointment of a clerk for said court.

The VICE-PRESIDENT. The bill will be read for information, subject to objection.

The bill was read; and by unanimous consent, the Senate, as in Committee of the Whole, proceeded to consider it.

The bill was reported from the Committee on the Judiciary with amendments, in section 1, line 4, after the name "Tyler," to strike out "Angelina"; so as to make the section read:

That the counties of Jefferson, Orange, Newton, Jasper, Hardin, Liberty, Tyler, San Augustine, Sabine, Polk, and San Jacinto shall constitute a division of the eastern judicial district of Texas.

The amendment was agreed to.

The next amendment was, in section 3, line 3, after the name "Tyler," to strike out "Angelina"; so as to make the section read:
